of differences, need no other explanation. It is of course not to be assumed that they have no history before and after Ezekiel (cf. the four presences in Enoch 40 and Apoc. Bar 51¹¹ 21⁴, and the four angels in Enoch 87²⁻³ 88¹ 90³¹). For the seven lamps which are the seven spirits of God we have already found points of connexion in the OT, but we need to adduce such passages as To 12¹⁵, Enoch 90²¹, in order to realize how fixed an element in apocalyptic imaginations these seven spirits (or angels, archangels) were. The use of the article in Rev 1⁴ 4¹⁰ 8⁴ is itself proof of the familiarity of the conception. That foreign speculations, Persian or Babylonian, lie behind it is probable (see Cheyne, *OP* 281 ff., 323 ff., 334 ff.; Gunkel, *Schöpfung*, 294-302, and *Archiv f. Religionswissenschaft*, 1898, 294-300; Stave, *Parasimus*, 216-219). It is therefore a natural inference that the twenty-four elders, clothed in white, sitting on thrones and crowned, come from tradition, and are not an invention of the author. They represent probably not the Christian Church, twelve tribes and twelve apostles (though 21¹⁴ may indicate the writer's desire to add the Christian to the Jewish twelve), but the glory and power, especially the reigning or judicial power of God, His heavenly court. They are associated, as are the seven spirits and the four cherubim, with God and His throne, not with the creation (see Gunkel, *Schöpfung*, 302-308). Is 24²³ gives probable evidence of the antiquity of the conception (cf. Is 63⁹, LXX). With the general description of God's throne should be compared, e.g., Enoch 14. 71, Secrets of Enoch 29. 22.

We have already found reasons for regarding 11¹⁻¹³ as a Jewish oracle (or two fragments of a Jewish apocalypse), used by our author in a sense wholly different from its original literal meaning. It is a most convincing illustration of our author's union of dependence on traditional forms of expression, and independence of the traditional use and meaning of such forms.

The great sign in heaven which ch. 12 presents can be accounted for only in a very slight degree on the basis of the OT. Yet nowhere is the writer's dependence upon traditional material more certain. Assuming that he did not invent these figures, it is not difficult to understand what he meant to say by the use of them. The chapter contains a picture, in some sense an explanation, of Satan's present power in the world, and his fierce hostility to the Christian Church; and at the same time the assurance that his power is soon to end. Christ escaped his hands, and is with God. Satan has already been cast down from his old place in heaven, and no longer brings accusations against the saints before God; and, though he is now all the more determined in his assaults upon Christ's brethren on earth, his reign is doomed to a speedy end. This application of the figure, however, by no means explains its origin. Many of its details can be fitted to this use only by violence, if at all, and could not have been devised for the purpose. What then was the source, and of what sort was the writer's use of this material?

Gunkel's book must be regarded as little short of epoch-making in its significance for the interpretation of this chapter, even though serious doubt be felt regarding certain of his conclusions. He offers convincing proof of the long and widespread influence in Hebrew literature of the Babylonian myth of creation—the victory of Marduk, the god of light (the sun), over the chaos-beast Tiamat, the dragon of the deep. He traces the transition from a cosmological to an eschatological use of the conception, on the principle, which explains many features of the Jewish hope, that God will make the last things as the first (Barn. 6¹⁸); and the interpretation of the dragon as a historical

instead of a natural power. In this way the myth becomes a poetic expression of the expectation that the hostility of the world-ruling nation against Israel will come to a supreme manifestation; that then J^c will intervene directly, or through the angel Michael, and again, as at the beginning, the dragon will be bound or slain (cf. Is 51²⁻¹⁰ 27¹). 'The beast that comes up out of the abyss' (Rev 11⁷) is this well-known figure in Jewish eschatology. It could be regarded as a symbol, or representative of the hated nation, as in Dn 7 it becomes four beasts, to describe the four successive masters and enemies of the Jewish nation, and as in Rev 13 it is the Roman empire; or it could be more distinctly and personally conceived, as in Rev 12, as the Satan who gives the hostile kingdom its evil power. It could also be conceived of as a *man* in whom evil reaches its height (Antichrist, perhaps Rev 11⁷).

Gunkel is not contented, however, with this general and probable identification of the dragon of ch. 12. He proceeds to defend two much more dubious positions. First, that our chapter rests ultimately upon, and follows closely, a part of the Babylonian myth of which we have no other remaining record—the account of the birth of Marduk, his escape from the dragon who knows him to be his destined destroyer, and the dragon's fierce persecution of his goddess-mother during the period of the boy's growth to maturity, 'the three and a half times,' from the winter solstice to the spring equinox (?). Second, that in contrast to the free poetic use of such material in the earlier prophetic and poetic books of the OT, we find in the apocalypses an increasing tendency to look upon these ancient and mysterious figures with awe, and to believe that they really contained, and could reveal to one who had wisdom, the explanation of present evil and the secrets of its coming end. This reverence for apocalyptic traditions explains, Gunkel contended, what nothing else but literal vision could explain, the confident belief of these writers in their own predictions. He finds, therefore, in such sources as these not only an illustration of the literary method of the seer, but an explanation of his self-consciousness, a psychological account of apocalyptic writings. Both of these positions of Gunkel are insecure, and from the second one he has himself in part withdrawn. The freedom with which we have found our author combining and modifying OT materials renders it hazardous to attempt to reconstruct his sources when they are unknown, and also prevents the assumption that he looked upon such materials with awe and derived from them his revelation.

It is not probable that the material in Rev 12 stands in its original form and order. Gunkel himself recognized that v. 6 and vv. 7-16 offer two variants. Wellhausen (*Skizzen und Vorarbeiten* 6 Heft, p. 215 ff.) regards 1-6 and 7-14 as doublets, and would distinguish two actions in the original story which are here confused. 1. In heaven, the dragon wars with the angels, or with the sun, moon, and zodiac (vv. 3, 7, 1), is conquered and cast down to earth with his angel host (vv. 3, 9, 4b). 2. On earth, he makes war with the woman who bears the son (4b is already an earthly scene), the son is snatched up to heaven (4), the woman flees into the wilderness, the dragon pursues her there, but must leave her (5-13-16), and turns against those of her seed who did not escape with her. There must then have followed an account of the overthrow of the dragon by the rescued Messiah after His growth to maturity. Something like this, Wellhausen thinks, was a Jewish apocalypse of the siege of Jerusalem. It described how the remnant (the woman) had escaped out of the city and been rescued through great dangers; how the Romans (dragon) had turned against those who remained in Jerusalem, who are to be destroyed (Rev 11¹⁻² is, however, a fragment of the same time which anticipates the rescue of those, the Zealots, who occupied the temple itself during the siege). The fall of the Roman power itself must follow at the hand of the Messiah, who has been born, according to prophecy, in Palestine, but was translated at once to heaven, so that He will come as a heavenly being, according to the more transcendental Messianic hope of late Judaism. So Wellh. offers a *literary-critical and contemporary-*

historical explanation of ch. 12 in opposition to Gunkel's *tradition-historical* explanation.

We may regard Wellhausen's analysis as plausible, for the war in heaven and the casting of the dragon down to earth must originally have preceded his persecution of the woman (vv. 12 and 13 suggest this order). But Gunkel is surely right in denying that the figure is the pure invention of the Jewish writer, whom he as well as Wellh. accepts. Its history goes further back, and its original connexion with a sun-myth is highly probable. It is a striking fact that Greek mythology in its story of the birth of Apollo, and the attempt of the dragon Pytho to kill his mother (Dieterich, *Abraxas*, p. 117 ff.), and also the Egyptian story of the birth of Horus (Bousset, p. 410 f.), contain striking points of likeness to Rev. 12, so that Gunkel's resort to a postulated Babylonian story may not be necessary. In all of these sun-myths, however, the flight of the woman is before the birth of the child, and for its rescue from the dragon.

The questions left open by these recent discussions of the chapter are many, and the hypothesis of a Jewish Messianic use of a heathen sun-myth, and then a Christian adaptation of the Jewish form, leaves room for much diversity of opinion in detail; yet it is a wholly credible hypothesis, and the actual history of the tradition here embodied is probably more rather than less complex than the theory.

Heathen may well be the description of the woman (v. 1) and of the dragon (vv. 3, 4), his effort to engulf the woman, her wings, and the wilderness to which she flies (14-16). Jewish (certainly not Christian) may be the idea of the birth and immediate translation of the Messiah to God (v. 5),* so also the office of Michael (?), and perhaps a change of order by which the woman's flight is made to follow the birth of the child. The Hebrew language, according to Wellh. and Gunkel, lies behind the Greek of the chapter. Christian is v. 11, and, moreover, so plainly out of keeping with the rest, as almost to prove that the Christian writer is using material already shaped (cf. Vischer). The verse contains the message of our writer, and is one of his characteristic anticipatory sayings. Christian may also be the change of order by which Christ's birth and ascension are made to precede the casting of the dragon out of heaven (cf. Jn 12³¹ 14³⁰ 16¹¹ 38, 1 Jn 3⁸, Col 2¹⁵). This gives Christ an earlier and higher part in the drama than the Jews ascribed to their Messiah.

In answer to the question as to the writer's use of this uncanonical material, we are bound to conclude that it was as free and poetical as his use of OT conceptions. V. 11 gives us the clue. The victory of Christian faith over the world through martyrdom is the counterpart on earth, the interpretation for man, of the victory of Michael over the dragon in heaven. The place of Michael here, where we should expect only the direct deed of Christ, shows both the extent of the writer's dependence on tradition and the confidence with which he finds a Christian meaning behind unchanged Jewish forms.

Are we not to see, then, in ch. 12 any reference to historical factors and events? Wellhausen's exact determination of the history here symbolized is far from convincing, and, moreover, it fails to explain many features in the picture. It need not, however, be doubted that the dragon was, at some point in the genesis of the chapter, regarded as a symbol of the Roman empire. His seven crowned heads and ten horns mean world-rulership, and his persecution of the woman's seed is the same persecution with which our whole book deals. So far, indeed, even Gunkel allows the presence of contemporary history in ch. 12.

The case is a more complex one in chs. 13 and 17, but the difference is one of proportion and degree. Traditional elements are here in abundance, and beyond dispute, yet the reference to Rome is more

specific and detailed. Gunkel admits the latter element here (as in Dn 7. 8, Enoch 85-90, 4 Ezer 11. 12, Apoc. Bar 53 ff.), but restricts it within narrow limits, and will by no means allow that these figures were freely invented allegories, every feature of which can be explained as a reference to contemporary history. He differs from the ruling critical opinion most radically in his refusal to recognize any allusion to Nero. Two questions must be kept quite distinct in the study of these chapters: (1) the question how much is due to apocalyptic tradition, and how much is re-shaped or invented for the sake of the application of the traditional figures to Rome; and (2) the question whether this application is made by the writer of our book, or was already present in the—possibly Jewish—sources from which he drew.

The seven heads and ten horns appear in each case (12³ 13¹ 17³). The Roman world-empire was meant by all. Yet the differences are so great that one must conclude that more or less independent traditions lie behind the three chapters, even if they are ultimately traced to one root. The seven heads and ten horns sum up the outfit of the four beasts in Dn 7, though they do not need that explanation. We can well suppose the numbers to have been symbolic at first, but the effort to apply them to individual kings, and so to estimate the nearness of the end, was inevitable. There is evidence in the chapters of different efforts of that kind.

In 12³ it is the seven heads that are kings, in 13¹ it is the ten horns, but in 13³ the smitten head must mean a king. The latter is commonly interpreted (by Victorinus, and by modern scholars from Eichhorn, Lücke, Bleek, down to Holtzmann and Bousset) of Nero's death, which ended the Julian dynasty, and seemed likely for a time to bring the empire to an end in anarchy. Gunkel thinks the Hebrew original read 'the first head,' hence Julius Caesar, whose death threatened the empire, but issued in its greater power (cf. Dn 8⁹ on Alexander's death). In 17¹⁰ the seven heads are the seven kings of Rome, and the writer feels bound by that number even when he needs to add an eighth. The ten horns, on the other hand, are apparently allied kings.

The evidence of later adaptations or interpretations of given figures is often clear. The seven mountains of 17⁹ is so clearly such an addition for the sake of the identification of the woman with the city Rome, that one is more inclined to find in vv. 15 and 18 also allegorical interpretations, and to question whether the woman was originally invented as a figure of Rome. She is now, of course, the city Rome (vv. 6-8), and may have been created in that sense; but even if so, not, we may be almost certain, by our author.

The second beast in 13¹⁷ is evidently now the prophet or priest (priesthood) of Roman emperor-worship (cf. 16¹³ 19²⁰ 20¹⁰). But here also older traditions are to be supposed. Bousset regards this as a Jewish figure of Antichrist (*Komm. Excursus* on ch. 13, *Antichrist*, p. 121), and a Jewish apocalyptic writer may very well have interpreted as Antichrist the religion of emperor-worship, and put this by the side of the beast who stood for the empire itself as its helper in evil. None of the many attempts to find a definite person in the second beast (Vespasian, Simon Magus, Paul, etc.) have made any approach to success. The personal interpretation of the first beast, however, as signifying Nero, has become almost a fixed assumption of critics. Gunkel's attack upon this stronghold of the *contemporary-historical* method has not changed the prevailing opinion (see Bousset, Holtzmann, etc.). It has, however, served to emphasize the fact that if the beast from the abyss is here by some one made a symbol of Nero, yet the beast was not first *invented* for this use, and it is not certain by whom, whether by our author or by a source, the identification was made. The opinion,

* Bousset omits the Jewish link in the chain because this feature has no parallel in the Jewish Messianic hope.

indeed, does not go beyond probability. In view of the embodiment of the supernatural power of evil in Antiochus Epiphanes in Daniel, it is not possible to settle the question by a general appeal to 'congruity, analogy, proportion,' and a sarcastic thrust at the famous critics who have 'placed T. Claudius Nero along with Christ, Satan, Death, Hades, the Church, and other powers and principles which constitute the *Dramatis Personæ* of the Apocalypse' (Benson, p. 159). But it must be said that the evidence is of a wholly different sort from that which Daniel furnishes, with its detailed history of Antiochus (chs. 8, 11), and is not such as we should expect if the writer had set out to indicate his belief that Nero would return from the grave, and be the demonic power of evil in the last assault of evil against good. On the origin and history of the belief in Nero's return the fullest investigation is that of Zahn (*Zeitsch. f. kirchl. Wissensch. u. k. Leben*, 1885-86). See also Bousset, *Komm.* p. 475 ff., and Charles, *Ascension of Isaiah*, pp. li-lxxv.

The chief evidence that Rev. refers to this expectation is in ch. 17. The return of one of the seven kings as an eighth, who is nevertheless also the beast himself (v.¹¹), suggests this more or less current expectation. In the ten kings of v.¹² it is possible to find the Parthian kings, with whom it was believed that Nero would return against Rome. And the idea that the city Rome would be destroyed by the very beast that represents her empire, in league with outside kings (vv.^{16, 17}), is difficult to explain at all apart from the Nero myth, which would perfectly explain it. If Nero be found here it is natural to infer that v.⁸ describes in general terms his death, return, and final destruction. Yet this formula ('was, and is not; and is about to come up out of the abyss, and to go into perdition') so fully sums up the general apocalyptic theory of the power of evil (the history of the chaos-dragon, Gunkel), and seems shaped so clearly in contrast to the formula which sums up the nature of God ('who was, and who is, and who is to come'), that the reference to Nero may be, if present at all, secondary. The verse in which our author's hand is most clearly seen (v.¹⁴) so interrupts this Nero story with an anticipation of 19¹⁹⁰⁷. (for how are the ten kings to be overcome by the Lamb and His followers before they assist the beast in the destruction of Rome?) as to suggest that Nero was not in his mind, but here, as in 12¹¹, only the Christian conflict with evil. So also the interpretation of the slain and healed head in 13⁸ is uncertain, and even the number 666 gives no secure support to this historical reference. The Greek solution of this riddle, ΑΑΤΕΙΝΟΣ, '(THE) LATIN,' which is as old as Irenæus, though not adopted by him, is still held by many; but the Hebrew נְרוֹ קֶסֶר NERO CÆSAR, — which in a Latin spelling נְרוֹ קֶסֶר would yield 616, an early variant, — has far the larger number of advocates. Yet קֶסֶר is the proper spelling of *Cæsar*, which would make 676. And when in answer to this objection it is said that an apocalyptic writer would prefer 666 to 676, because of its symmetry, and because it corresponds to the number of the name Jesus (ΙΗΣΟΥΣ=888), it is natural to ask whether 666 might not have been chosen at first outright for its symbolic meaning, to signify the one who persistently falls short of holiness or perfection (seven), as Jesus goes beyond it in the fulness of His character and power (so Milligan, *Baird Lecture*, p. 328; Briggs, *Messiah of the Apostles*, p. 324). So the number 3½, the length of the reign of evil (Dn 7²⁵ 12⁷, Rev 11^{2, 3, 11} 12^{6, 14} 13⁵) needs no other explanation than the symbolism of the broken seven: the power of evil will be cut off in the midst and come to an untimely end. If, however, the number is to be interpreted by *gematria*, another view claims

serious attention. Zahn (*Zeit. f. kirchl. Wissensch. u. k. Leben*, 1885, p. 568 ff.) argued that Irenæus opposed the reading 616 because those who held it did so for the sake of applying it to Caligula (ΓΑΙΟΥΣ ΚΑΙΣΑΡ=616)—an interpretation which Iren. rejected. Holtzmann (*Stade's Geschichte*, ii. 388 ff.), Spitta, and Erbes independently (as Zahn predicted) came to the conclusion that this was, in fact, the original reading and meaning of the number, and that ch. 13 is part of a Jewish oracle of Caligula's time. In fact no ruler since Antiochus Epiphanes so filled the rôle of Antichrist in the Jewish mind as he who attempted to have his image erected in the temple. To him 13^{4, 5}, and to the priesthood of his worship vv.^{14, 15}, would admirably apply. Moreover, he recovered from what seemed a fatal illness at the beginning of his reign. Bousset does not wholly reject the hypothesis that a Caligula apocalypse underlies this chapter (*Komm.* pp. 433-5). Other interpretations of the number 666 must here be passed by, though Gunkel's 'the chaos of old' may be mentioned. The number does not prove, and can hardly be said to give substantial support to the identification of the beast with Nero.

Beyond the unmistakable general reference to Rome, it is hard to find history in our author's visions; and this reference had certainly been given already to the figure of the beast, and in all probability by Jews. Events during the last half of the century must have led Jewish apocalyptic writers to many more expressions of their hatred of Rome and visions of its overthrow than have survived. Indeed, Pompey is already called the dragon in Ps-Sol 2²⁹ (see Assump. Mos., 4 Ezra, Apoc. Bar). Our author and the Christian communities for which he writes have reason to share the Jewish hatred of Rome, and enter into the inheritance of various Jewish expressions of it. Our author has, as it were, eaten the book of past prophecies against peoples and nations before he utters his own. The ancient language has, as we have seen, often the value of poetry to him; but it is impossible, though we might wish it, to refer the polemic against Rome only to sources used by our author, or to resolve it into a figure of the war against evil in general.

iv. HISTORICAL SITUATION.—We have already seen that the date of separate oracles in our book cannot be assumed to be the date of the book as a whole. 11¹⁻¹³ is from some time before 70, but is not literally used by our author. The figurative application of this oracle to the safe keeping of the true people of God would be more natural after the event of 70 had disproved its literal sense. Ch. 13 may have been shaped in Caligula's reign, or soon after Nero's death. 17¹⁰ must have been written under the sixth emperor of Rome, i.e. Nero, counting from Julius Cæsar, or his successor, counting from Augustus, but Nero's successor might be regarded as Galba, or as Vespasian. That one more emperor is expected only shows that the number seven is fixed; and that he is to reign a short time could be inferred from the nearness of the end, and does not require the knowledge on the writer's part that the reign of Titus was in fact short. But if v.¹⁰ comes from Vespasian's reign (and so is consistent with 11¹⁻¹³), must not v.¹¹ have been added by some later hand? The writer, it would seem, already lives under the eighth emperor (Domitian), and adds this verse in order to adjust what was written under Vespasian (v.¹⁰) to his own time by so adding an eighth as not to overpass the fixed number, seven. On the basis of this verse Harnack (*Chronologie*, p. 245 f.) confidently dates the book under Domitian. Yet it is possible that the writer of v.¹⁰, under Vespasian, expected the return of Nero, one of the seven, as an eighth, who, coming back after death out of the abyss, could be regarded as the very demon spirit of Rome, the

beast itself. But even if, in this way, with Bousset, we date ch. 17 as a whole under Vespasian, this also may be the date only of a source.

Though historical allusions do not fix the date, yet, taken in connexion with other indications of age, the date ascribed to the book by Irenæus (v. xxx. 3), 'near the end of the reign of Domitian,' i.e. about A.D. 93-96, is to be preferred to that which was for some time the ruling view of critics, A.D. 66-69 (Lücke, Bleek, etc.). It is not in sections clearly dependent upon apocalyptic tradition, but in those more original, and especially in the letters, that we should confidently expect to find indications of the author's own time. In spite of the ideal and typical significance of the seven Churches, actual conditions unquestionably meet us here. Persecution past and future forms the background of the letters. The writer was (not is) in the little island of Patmos 'on account of the word of God and on account of the testimony of Jesus,' i.e. probably not in order to receive his revelation (cf. 12), but because of his Christian preaching (cf. 6⁹), that is, in banishment (see 1^{9a}). But the banishment of a conspicuous Christian seems to disclose a definite movement against Christianity in Asia Minor on the part of Rome such as we do not know of before Domitian. There are persecutions already past (Ephesus, 2²; Pergamum, 2¹³, had its martyr; Philadelphia, 3¹⁴; in Smyrna and Philadelphia at the hands or at the instigation of Jews, 2⁹ 3⁹); yet this past persecution could be that under Nero. A renewed and greater trial, of world-wide scope (3¹⁰), is soon to come. At present the Roman world tempts rather than compels Christians to adopt a heathen manner of life and heathen worship. (Is this present quiescence in the writer's mind when he says that the beast 'was, and is not; and is about to come up out of the abyss, and go into perdition' (17⁸)? Imprisonment and death are anticipated for the faithful, and for this the letters, indeed the whole book, will prepare them. Its theme is the glory and reward of martyrdom. The heretical teachings which are condemned in Pergamum (the teaching of Balaam) and in Thyatira (that of Jezebel) result in heathen ways of living rather than in doctrinal errors, though they seem to have based their worldliness on some sort of gnosis (2²⁴). It is uncertain whether 'Nicolaitan' was the proper name of this sect (possibly derived from the NICOLAS of Ac 6⁹) or only the Gr. name for Balaamites (so Schürer, who appeals to the *vikn* of Jos. Ant. iv. vi. 6). Schürer argues with much force that JEZEBEL was the priestess of the Chaldean Sibyl, Sambethe, who had a sanctuary at Thyatira (*Theol. Abhandl. C. von Weizsäcker gewidmet*, 1892, pp. 37-58). To this hypothesis it has been objected (Bousset, Zahn) that the impression is given that she is directly under the discipline of Christ (vv. 21-23), that the church is at fault for allowing her (v. 20), and that the sphere of her activity is the Christian community (vv. 20, 24), so that a false Christian prophetess rather than a heathen is indicated. The wife of the bishop (Zahn) she surely need not be. Satan's throne in PERGAMUM (2¹³) may refer to the worship of Asklepios there, whose symbol was the serpent, or to the fact that here emperor-worship was first introduced, with temple and priesthood. The latter would better explain the martyrdom of ANTIPAS (unless he were killed by a mob), and would better fit the figure of the second beast (13^{11a}). Caesar-worship was Rome's worst deed, and resistance to it was that overcoming even to death which our book urges by entreaty, threat, and promise (15² 16⁶. 10 17⁶ 19²⁰. 20⁴⁻⁶).

Although the effort to force emperor-worship upon Jews goes back to Caligula (A.D. 39-40), the total impression is that of a late, not an early time.

To the actual destruction of Jerusalem there is no reference. The condition of the churches (forgetfulness, indifference, worldliness) points to a relatively late time. It seems necessary to suppose that St. Paul's position as founder and unquestioned leader of the church in Ephesus is a thing entirely past. That church has had a new founding (Weizsäcker). If 17⁸ expresses the belief in the return of Nero from hell, this is a late form of the belief in his return, after the possibility of his being alive had passed.

v. TEACHINGS OF THE BOOK.—1. *Predictions*.—The question what the author of Rev. intended to say about the future (and it was to reveal future things that he wrote, 1¹ 4¹ etc.) is complicated by the difficulty of distinguishing between the meaning of his sources and his meaning in the use of them, and the related difficulty of distinguishing between figure and reality in his use of language. That all is literal our discussion thus far makes it impossible to admit. Are we prepared, with the spiritual interpreters of all ages, to say that all is figure (as now Milligan, Benson, etc.)? Or shall we say, 'Rev. is not a poem, an allegory, but the figurative alternates with that which is to be taken very earnestly and literally; the latter much predominates' (Jülicher, *Einkl.* 172)? Our review of the writer's use of OT and other materials must rather incline us to put the predominance on the other side.

(a) *General*.—The undoubtedly real elements in our writer's prediction are the speedy coming of God (1⁸ 14⁷ 21⁶) in judgment, with or in the coming of Christ as judge and ruler of the world (17²² 20). This coming Christ will divide true from false Christians, and reward each according to his deeds (22²³ 22¹²). Through Him also God will judge and destroy the tempting and oppressive power of evil dominant in the world, the Roman empire (19^{11a}), and Satan himself, whose authority Rome possesses, whose spirit Rome embodies (ch. 20). All who belong to her shall perish with her. Those who hold fast the faith during the present tribulations and the greater ones soon to come, and who endure in patience and faith even to death itself, shall be rewarded with special glory and power, and especially close association with Christ and His royalty (6¹¹ 14¹⁻⁵ 20⁴⁻⁶). But the destination to be with Christ and God in blessed and eternal nearness and fellowship is at last for all the faithful alike (27. 11. 17. 26-28 35. 12. 21 (cf. 20) 51¹⁰ 7^{9a}. 14¹³ 21-22⁶ 14).

(b) *Details*.—Turning to details, we have to attempt to draw the line between figure and reality, especially in reference to the fall of the power of evil, and the events that lead up to it, the saving of the faithful and the heavenly or angelic background of the action.

(1) *The fall of Rome*.—In the first half of the book six seas and six trumpets bring forth the preliminary powers and acts of the Divine judgment over evil. But neither in their special character nor in their sequence do they make the impression of describing literal events.

The first four seals introduce horsemen who are derived, one can hardly doubt, from Zec 1¹⁸ 11 6¹⁻⁵, and so ultimately from the four winds, well fitted to serve as destructive messengers of God. They are summoned forth by the four living creatures,* who were originally the four winds driving the storm-cloud, God's chariot (Ezk 1⁴ etc.). In 7¹ the four winds are destructive forces, and since in 9¹⁴ 16 four angels are loosed which then appear as hosts of cavalry (cf. 20²), we may infer that the four winds symbolized the nations that are to execute the Divine judgment in some final war (cf. the use of the winds as symbols of Israel's dispersion, Ezk 5¹⁰ 12¹⁴ 17²¹, Zec 2⁶ 7¹⁴).

Of the four seals, however, two introduce warriors (Romans and Parthians?), and two famine and pestilence. A fourfold enumeration of the plagues which God will send upon His people in the last days is found in the Prophets (Jer 15² 3, Ezk 14²¹, cf. 51² 17), and quoted in Rev 6^{5b}. †

* It is less natural to suppose that John is addressed, for he is already there, and needs only to look.

† It is tempting to suppose that this originally ended the description of the four horsemen, and explained that to each of them was given a fourth of the earth to destroy (cf. Ezk 5¹³).

The fifth seal discloses the prayers of the martyrs for vengeance, which are a real agent of judgment in the Hebrew view (see below). The sixth is an earthquake.

Earthquake and volcanic phenomena furnish the imagery of the first four trumpets, and, in part, of the fifth and sixth.

J. T. Bent ('What St. John saw on Patmos,' *Nineteenth Century*, 1888, pp. 813-821) argues that 612-17-87-1916-7-17-21 describe actual phenomena seen at the eruptions of the island volcano, Santorin, within sight of Patmos; and that 912-17-18 are poetic amplifications of the same theme. Much in Bent's article is fanciful, yet the imagery, esp. of Rev 8, fits Santorin well (see Fouqué, *Santorin et ses éruptions*, 1879, esp. pp. 22-31, 38 ff.). Nothing could be more like the pit of the abyss than the crater of this volcano, and nothing better fitted to suggest demonic agency than the smoke darkening sun and air, the sulphurous vapours which killed the fish in the sea, and blinded and even killed men, the masses of molten rock cast up and falling into the sea like a great mountain or the star Wormwood, the rekindling of the sea, the rise and disappearance of islands (see also B. K. Emerson, *Bulletin of the Geol. Society of America*, March 1900). But Santorin is 80 miles from Patmos. Only the highest points of the island Thera, and the smoke of the eruptions, could have been seen. Bent refers for details to reports of refugees. Eruptions took place in B.C. 197 and A.D. 46 (Fouqué, pp. 3-9).

Account must be taken of OT parallels. Hühn finds the following parallels with the Egyptian plagues:—(1) Ex 7:17-21, cf. Rev 8:11-12; (2) Ex 7:27-32, cf. Rev 10:1; (3) Ex 9:1-11, cf. Rev 16:7-9; (4) Ex 9:13-17, cf. Rev 16:10-11; (5) Ex 10:1-13, cf. Rev 16:12-14; (6) Ex 10:14-15, cf. Rev 16:15-17; (7) Ex 10:18-20, cf. Rev 16:18-20; (8) Ex 10:21-23, cf. beast itself would at last turn in hatred. The demonic nature of the beast is here quite clear. The actual Satanic power in the writer's experience was Rome, and his hope was for its fall; but though it was the agent and embodiment of Satan's hatred and power against God's people, yet its fall will bring only the binding, not the destruction, of Satan. He has other resources, and will be given an opportunity to make one more effort before the end comes. The arrangement of material compels us to regard the threefold judgment upon Satan, one past (connected with Christ's birth and ascension), two future, a preliminary binding connected with the fall of Rome, and a final destruction, as expressing realities in the author's mind no less than the fall of Rome itself, to which he gives a definite place in this larger drama of the Christian conquest of evil. But reality need not mean materiality. Caution is needed in interpreting the angelology of our book. We have already observed how little actuality, apart from Christ, has the angel who speaks for him (e.g. 22:6ff.). In the letters we have messages from Christ to the Churches, but in form they come from the angel who represents Christ, through John, to the angels who represent the Churches. In spite of the difficulty of supposing that John and his writing must mediate between two angels, it remains probable that the angel of the Church is a real angel, conceived not as ruling over the Church, not as its heavenly guardian, but as its heavenly counterpart, personating its actual character, and hence worthy of praise and blame, not different from the Church itself ideally or abstractly conceived. John's writing of the message of the Christ-angel is, of course, for the sake of the actual Church, which is really addressed (note the use of the second person singular). It can be spoken of as a writing to the angel, in accordance with the heavenly setting of the vision, only because the angel is the heavenly presence and personal representation of the actual Church in its actual character. Against the contrary arguments of Zahn and others it remains that 'angel' is used throughout the book in the literal sense, and that no human official could be so completely identified with the Church. The intervention of John's book between two angels does not prove that they were not angels, but reveals the sense in which our writer ascribes reality to them.

In order rightly to estimate the significance of the angelic and demonic framework or background of our writer's predictions we should study its history, for it is no free invention or original insight of his. This eschatology, with its union of earthly (political) and unearthly (angelic) beings and events has far-reaching roots, and one would need a far more complete review than can here be attempted of the angelology, demonology, and eschatology of the OT and of Judaism in order to view it in the right light. In this picture are blended many elements from originally independent sources of which the history can only imperfectly be traced. Gunkel has done a very great service in his study of the history of the Babylonian myth of the creation of the world by the slaying or binding of the chaos beast, the dragon of the deep, by the god of light. He has shown how in the OT certainly (Is 51:9-27, Dn 7, etc.), and not improbably in Babylonia, this cosmological myth became eschatological, the last things were to be like the first, the dragon was to rise in a new conflict against God and be again overcome before the new creation. He has also shown how this myth, though retaining features of its original sense, the conception of creation as the binding and confining of the ocean (cf. Pr. Man 3, 'who has bound the sea by the word of thy commandment'; who has shut up the deep and sealed it by thy terrible and glorious name,' with Rev 9:1-20), became, especially in its eschatological use, a figure of the world-kingdom that oppressed the people of God. Its future assault would be literally by war, not by tempest (see the union in Dn 7). It is evident how perfect an expression of this final form of the dragon-myth is contained in the words, 'the beast that thou sawest was, and is not; and is about to come up out of the abyss, and to go into perdition' (Rev 17:8). But this leads us over to an idea not Babylonian in origin, that the gods of the nations are angels (demons) (Dt 4:19 32: LXX, Sir 17:14), and that these angels of the nations are responsible for their sins against Israel. Daniel contains this idea in a developed form. The beasts which in ch. 7 suggest the chaos dragon in his late eschatological and political form, give place in chs. 10-12 to angel princes of the nations whom Israel's prince, Michael, is to overthrow. So also in the late apocalypse, Is 24-27, the Babylonian dragon of the deep (here three monsters probably stand for three nations) is to be slain by God in the last judgment (27:1); but before this (or parallel to it) is the punishing of the angelic counterparts of earthly kings, and, very significantly, their imprisonment for a time in the pit before their final punishment (24:1-22). That the coming day of 'J' includes a heavenly judgment over these spiritual powers of the world-kingdoms, is seen also in Is 34:5, Ps 82, 58 (?). Both in Is 24:1, cf. Is 20, and in 34:5 earthquake phenomena are the manifest sign of this judgment upon angel beings. That Persian eschatology influenced Jewish at this point is quite beyond serious question. (See esp. Stave, *Parinismus*, p. 145 ff.). There we find the conception of a struggle between good and evil spirit powers, becoming especially severe at the end when the Satanic leader, Angra Mainyu, assails the abode of Ahura Mazda, the good god. He is overthrown, either by the god himself or by the Parsee Messiah, Soshyos, and is held in imprisonment for a time before he is destroyed. The resurrection and the creation of the new heaven and earth are additional elements in the Parsee eschatology parallel to the Jewish. The idea of the fall of Satan from heaven through an ambitious attempt to be like God is used poetically in application to the fall of Babylon in Is 14:12-15, with evident allusion to a myth describing the failure

of the morning star to mount the eastern sky. See also *Secrets of Enoch* 29:4-5, and cf. *Enoch* 68:4-5.

The Bk. of Daniel introduces a further element, the essential embodiment of the demonic power of evil in a man (Antiochus IV.). This human, not simply national, incarnation of the power of Satan may have had an important history in Jewish thought before it comes to light in the early Christian expectation of Antichrist (2 Th 2:1-12, 1 Jn 2:18, Δ. 3, 16, etc.; cf. Apoc. Bar 40:1-3). Bousset (*Der Antichrist*, 1895) has made probable the Jewish origin of this conception as an outgrowth or modification of the Babylonian dragon myth, probably originating with Daniel.

Another line of development connects itself with Gn 6:1-3, and is found in combination with some of those already traced in *Enoch* 1-36, 83-90. The points of contact with Rev. here are close enough to deserve a more careful scrutiny.

The Book of *Enoch* (ch. 8 ff.) contains an account—probably the blending of two accounts—of the fall of angels from heaven, on the basis of Gn 6:1-3, and of the binding of their leader (Azazel or Semjaza) by one of the four archangels in darkness beneath rocks or under the hills of the earth, with his associates. At the last judgment they are to be taken thence and cast into the abyss of fire (104:4-9:13). If they had not been bound, man would have perished from the earth (107). But though the greater powers of evil are chained, lesser powers, the evil spirits, half human, proceeding from their sons, the giants, continue, and to them disease and all sorts of evil are ascribed. In the dream vision of chs. 83-90 the same conception is found. Here we read of the fall of a star from heaven and then of other stars (86:1-3), and of the violent deeds of their sons. Then one of the four great angels binds in an abyss the first star that fell, and his followers likewise (88:1-3). This is before the Flood. During the whole period of human history these fallen angels lie bound in the earth; but the evils under which Israel groaned are due to the misdeeds of the 'seventy shepherds.' These are angel representatives of the kingdoms to which the Jews were in subjection from the Exile onwards (89:9-10), who transgress their commission as chasteners of Israel. At the last judgment the stars that first fell are brought before God, then the seventy shepherds, and all are cast into the same abyss of fire (90:21-25, so 1004). Into a like abyss, but not the same one, apostate Israelites were cast (90:26). Then the old house (Jerusalem) was taken away, and the new house was brought and erected by God (97:2-29). Certain points of likeness between this apocalypse and Rev. are evident: the two sorts of angelic powers of evil, Satan and his angels accounting for the evil of the world in general, and angels of the nations explaining the particular and present sufferings of the Jews. But the binding of Satan in the abyss is at the beginning of human history, not at the beginning of the Messianic reign. The idea that evil angels are confined under the earth may well have been an inference from the phenomena of earthquake and volcano, cf. e.g. *Enoch* 67:4ff. The same conception, depending on *Enoch*, though with variations, is found in later parts of *Enoch* (39:1-2a 51:4-6 67-69), in Bk. of Jub. ch. 5, *Secrets of Enoch* 187 (cf. chs. 7, 18, 20), Jude 6, 2 P 24. In *Enoch* 15:11-21:10 the fallen and imprisoned angels are seven stars that transgressed the commandment of God by not rising at the appointed time; and though ch. 19 declares them to be the angels of Gn 6:1-3, one suspects a different origin, namely, in planets or meteors. The possibility of Greek influence on the eschatology of *Enoch* is not to be denied (Dieterich, *Nekyia*, 1893).

Comparing the eschatology of Rev 12-22 with these earlier OT and Jewish conceptions, we are struck most of all by the free union of elements of an originally diverse origin. Ch. 12 stands nearest to the Babylonian myth, even though one hesitate to adopt Gunkel's bold reconstruction. The dragon is a water beast (v. 15). He is cast out of heaven with his host by Michael, in a war which can have been nothing but an effort to dispossess God. But his fall here follows the birth and ascension of Messiah; and by this change of order which appears to have been due to our John himself, what was a history of the world became a history of Christianity, and the fundamental victory over evil, upon which hope rests, was not that effected by God at creation, but that achieved by Christ through His resurrection. In 9:1-11 the allusions to the demonic powers, with Apollyon at their head, who are confined in the abyss, seem to rest on a wholly different conception.

The Satan of chs. 12 and 20 is certainly more than a representative of Rome, and these two chapters must be intended to put the present evil power and its coming fall into relation to an ultimate principle of evil, which Rome only for a time embodies. Through the birth and ascension of Christ a victory has been achieved over the power of evil in heaven. After Rome's fall, there still remains a final victory to be achieved over the power of evil in the world. So much we may safely say the writer intends in a literal sense.

(4) *The thousand years.*—This leads to the question of the significance to him of the 1000-years' reign of Christ and the martyrs. It is a part of the last conflict against evil. While Satan is bound in the abyss, Christ and His saints reign over the world, subduing the remaining powers of evil. It is true that in Jewish apocalypses the idea of a temporary earthly reign of Messiah (or of Israel) arose in the effort to conceive of the final consummation in more transcendental, heavenly terms, and yet provide for the literal fulfilment of the national, earthly hopes of Israel. In *Enoch* 91 Messiah does not appear, but an earthly Messianic age is followed after a final judgment by a consummation of heavenly character. In 4 Ezr 7 Messiah has to do only with the earthly kingdom, not with the heavenly which follows it after 400 years. But in Rev. the 1000 years has no such significance. Our writer does not need it for the literal fulfilment of the

earthly and national features of the prophetic hope, for he uses these freely in a figurative sense of the new heaven and earth (21. 22). He does not need it in order to give Messiah His rights, for the Lamb is still on the throne in the final consummation (21. 22-23 22. 3). Holtzmann, indeed, declares that the idea that this 1000-years' reign is a period of peace and rest is the only proper enrichment of Biblical theology in our book, since in St. Paul the interval between the coming of Christ and the consummation is a period of the progressive conquest of evil (1 Co 15. 20-28). But where in Rev. is the suggestion that peace and rest characterize the 1000 years? It is here also a reigning of Christ, and the reward of martyrs is a share in His power. St. Paul expresses the common expectation of the Christian's part in this reign of Christ in 1 Co 6. 3. There is every reason to suppose that judging and ruling characterize the 1000 years in Revelation. The difference between this first resurrection and the second is not the difference between a preliminary earthly and a final heavenly rest. For the final consummation, as we have seen, is described by our author in thoroughly earthly (Messianic) terms poetically taken. It is the difference between power and blessedness. In other words, the 1000-years' reign here corresponds closely to the Jewish expectation of the time when the sword of justice and vengeance should be in the hands of the righteous (Enoch 91. 12 90. 13-24, cf. 95. 7 96. 12 99. 4 99. 16-100. 3 5, 17n 72).

In Rev 22. 3 33 the rule of those who overcome is promised: but is this more literally meant than the other promises (27. 17 etc.)? In 16. 510 it seems to be said that Christians are already a kingdom and priests reigning on the earth. The brief episodal treatment of the 1000 years in 20. 4-6 as part of the account of Satan's overthrow, prevents our giving it the significance in the writer's mind that has often been given to it. The possibility cannot be wholly excluded that it stands here because it stood in some account of Satan's overthrow, which our author adopted, as he did so much else, for its general meaning, not for its detail. We shall perhaps be better able to estimate its meaning to him as we turn from his predictions to his religious conceptions. It is certain that the *overcoming* with which John is most concerned is first Christ's overcoming of sin through His death and exaltation, then the Christian overcoming of the evil life and false worship of the world and its hatred and persecutions, by patience and faith even unto death. And this overcoming is so referred to in the midst of the description of Satan's fall from heaven (12. 1), and of the fall of Rome (17. 14), that we wonder after all at the end whether this is the reality and those the figure; whether, not of course originally but to our writer,—the one who inserted such verses as these,—this did not express their real meaning. It is certain that he believed chiefly in the triumphant vindication of Christian faith, both in the case of individuals who endured unto death, and of the world which was now in the power of evil. The conviction that death could only bring the faithful soul to its God, and that the future could only see God and Christ manifestly enthroned over the universe, our author held with all the intensity of his being, and expressed in all the variety of form with which the literature of hope furnished him, without too much anxiety about formal consistency. That Christ's conquest of evil involved the fall of Rome, but that the fall of Rome was not the end of evil itself, but the beginning and guarantee of its end, we may also regard as secure.

2. *Religious ideas (theology) of Revelation.*—The biblico-theological study of Rev. should proceed, according to the modern view of this discipline, largely by the comparative method. We are not to assume that the author had a theology of his own; and we are most concerned to know the sources and influence of the Christian ideas of the book, and how they fit into the history of Christian thought. This is far more an average book, that is, an embodiment of average beliefs and hopes, than the letters of St. Paul or the Gospel of St. John. It expresses the faith and the temper of Christianity in the early years of its conflict, its struggle for existence against a hostile world. As its message is one of a speedily coming judgment and deliverance, its underlying theology will concern the persons through whom, and the way in which, salvation is to be effected. God and Christ, redemption past and to come, are its themes. The general conception of the deliverer and the deliverance will be determined by the conception of the evil from which men desire to be delivered. The theology of our author will be fundamentally determined by the question whether he conceives of the evil chiefly as political or as religious. The answer to this question is not altogether easy. Although Rome now embodies the spirit of evil itself, and is endowed with its authority, yet on the one hand it is through its religion that its evil power is exerted (2. 13 11. 16), and on the other hand it is only a temporary repre-

sentative of the ultimate evil power, the Devil and Satan, the destroyer (9. 1), the deceiver of the whole world (12. 9), the real persecutor of the saints (12. 17). Titius is doubtless, on the whole, right in suggesting that the political view of evil and salvation seems to be offered to the writer by some of his sources, but that it is disavowed by him (*Die neuest. Lehre von der Seligkeit*, iv. 35); yet the case is not wholly clear, and the central problem in the interpretation of the Christianity of the book lies just here. The fall of Rome would seem to be a chief act in that Divine judgment which is to bring blessedness to the faithful. But this Jewish 'apocalyptic connexion of politics and religion' is not the teaching of the book as a whole, otherwise Christ's person and work, and the Christian conduct and hope, must have been determined by the goal of political world-rulership. It is not, indeed, decisive that 'the conduct of the faithful is not political, but is characterized exclusively by patience (13. 10 14. 12)' (Titius); for this is true also in the Bk. of Daniel, the occasion of which, like that of Rev., is not war, but religious persecution. Here literal world-rulership is unquestionably hoped for, and yet the conflict with the beast, as in Rev., 'is carried on, on the one side by executions, and on the other by quiet martyrdom' (cf. Dn 11. 32). Many Jews expected that world-rulership was to come to them through God's direct intervention, upon purely religious conditions on their part. Nor can we say with confidence that the literal world-rulership of the saints was not in our author's mind (2. 27 3. 21 5. 10 20. 4-6). When the Roman empire is regarded as the Satanic power, it is not easy to escape the conception of a kingdom of the saints which shall literally displace it. Nevertheless, it remains true that for our author the ultimate evil power is not Rome but Satan, and that the final struggle and victory are in the spiritual realm. It is not the world-rulership of Rome, but its blasphemous claims, that made it the present agent of Satan's power. Both by temptation and by violence it endangered the Christian life and the Christian faith. Any power that opposed the sole worship of the one God, whether Jewish (2. 3) or Roman (2. 13 13. 8 etc.), is Satanic.

(a) *God.*—The fundamental faith of the book is, then, that God alone is to be worshipped, since He alone is eternal and all-powerful. Monotheism is the basis on which the apocalyptic hope rests, since this is always only the hope that the real kingship of God will soon become manifest and actual. God is He who was, and who is, and who is to come (1. 4 4. 8, cf. 11. 17), while the power of evil 'was, and is not; and is about to come up out of the abyss, and to go into perdition' (17. 8-11). The difference between these two definitions saves the Christian faith which this book represents from dualism. The doctrine of God is Christianity's great inheritance from Judaism, and is given here not only in Jewish terms, but in the Jewish spirit. God is the Creator (4. 11 10. 14), omnipotent (*παντοκράτωρ*) (1. 8 11. 17 15. 3 16. 7-14 19. 15 21. 2; elsewhere in NT only 2 Co 6. 18). Fear, not love, is the temper of worship (14. 7 15. 4 19. 11. 18). God is indeed described as one to be feared, one whose coming self-manifestation will be in wrath and judgment (6. 16 17 11. 18 14. 11. 19. 20 15. 7. 8 16. 19. 15). He is a King who is absolute in power and just in His judgments. This justice is His supreme quality, on which faith and hope rest (6. 10 15. 3 16. 7 19. 1. 2).

(b) *Christ.*—Christ is conceived as one equal to His task, which is threefold. (1) He is to overthrow the Roman empire (19. 21-23) and its allies (17. 14), and so is described as warrior and king, wholly in Jewish terms. He is the lion of the tribe of Judah (5. 5, cf. 22. 16), with a sword in His

mouth (1¹⁶ 21¹⁶ 19¹⁶, Is 11⁴), the destined ruler of the heathen (2²⁶ 12⁶ 19¹⁵, Ps 2⁹, cf. Ps-Sol 17²⁶). (2) But since the real power of evil is not Rome but Satan, Christ must be conceived not only as the greatest of kings, 'King of kings and Lord of lords' (17¹⁴ 19¹⁶ 1⁹), as God is in the OT (Dn 2⁴⁷), but as one supreme in the world of spirits. So in the first vision of Him (1⁹⁻²⁰), He appears as an angelic being, like Gabriel in Dn 10, but above him, since He applies to Himself (17²⁸ 22¹³) the name 'the first and the last,' which belongs to God (1⁸ 21⁶, Is 41⁴ 44⁶ 48¹²). He is 'the living one' (1¹⁸), as God also is (4⁹ 10⁶); the One who has already, by His resurrection, gained the mastery over those powers of evil which are the last of all to be destroyed, Death and Hades (1¹⁸, cf. 20¹⁴, 1 Co 15²⁰). The second vision of Christ (5¹⁻¹⁴) shows still more clearly His superiority to all angelic powers, even those that stand closest to the throne of God. He only of them all can open the book of the Divine purposes. The seven spirits of God are His eyes (5⁶), or are in His hand (3¹). This elevation is His, — just as in Ph 2⁶⁻¹¹, — because of His redemptive death (5⁹). The whole creation joins in ascribing to Him praises as to God (5¹³⁻¹⁴, cf. 1^{5b} 6⁷⁻¹⁰).

The angel-like and God-like nature of the risen Christ is the best proof that our writer's view went beyond the political. Such a One as this was not needed for the overthrow of Rome. Yet it is a striking fact that the victory over spirit powers of evil is not, as we should expect, expressly ascribed to Christ. The demon-beasts of Rome are taken and cast into the lake of fire, but by whom is not said (19¹⁹⁻²⁰), though it is the sword in Christ's mouth that slays their followers (v. 21). The dragon recognized in Christ his deadly foe (12^{4c}), but it is Michael who cast him down from heaven (12⁷⁻⁹), 'an angel' who chained him in the abyss (20¹⁻³, cf. 9¹⁻¹¹); fire from heaven devoured his hosts, and it is not said who cast him, and after him Death, into the lake of fire (20¹⁰⁻¹⁴). So the key of the abyss is in an angel's hand (9¹ 20¹) in spite of 1¹⁸. Our writer does not feel the need of formally displacing the angel by Christ in these Jewish figures. Angelology had already influenced the Jewish conception of Messiah in Enoch 37 ff. (see 46¹) on the basis of Daniel. But in general Michael retained his place as Israel's heavenly representative, defender, priestly intercessor. Bousset suggested (*Der Antichrist*, p. 151) that Jewish speculations about Michael may have influenced early Christian ideas about Christ, and Lueken (*Michael*, Göttingen, 1898) has made the hypothesis probable. In our book, however, Michael is not displaced, but performs one of his chief functions (12^{7c}); on the other hand, the worship of angels is expressly forbidden (19¹⁰ 22⁸⁻⁹); and Christ is, with God—in spite of 19¹⁰ 'worship God'—the object of the worship of angels and men alike. While angels are classed with men, Christ is classed with God; and various titles and expressions carry us beyond not only the Messianic but also the angelological speculations of Judaism. He is once called 'the Son of God' (2¹⁸, but see also 2⁷ 3², cf. 1⁶ 14¹); once, 'the beginning of the creation of God' (3¹⁴), as only the Divine wisdom is called in OT (Pr 8²²), and as Christ is called only by St. Paul in the NT (Col 1¹⁵). He is called once also the Word of God (19¹³), and even this Johannine (Hellenistic) title is surpassed by the title of eternity, 'the first and the last' (17²⁸ 22¹³). Yet one hesitates to put stress on the pre-existence which these titles imply, because the resurrection so supremely marks Christ and conditions His exaltation (1^{5a} 18²⁶ 5^{9c}). A cosmical significance and fitness to deal with the cosmical principle of evil the writer certainly wishes to affirm. He would seem almost to identify Christ

and God if, as seems probable, he adds to Jewish sources the expressions 'and of his Christ' (11¹⁵), 'and of the Lamb' (22³), without feeling the need of changing the following words to plurals. Yet close as is the association, closer and more abiding than in 1 Co 15²⁰⁻²⁸, subordination remains, and is expressed in simple and unreserved fashion (1¹ 27⁷ 32¹² 14²¹). — (3) But it is neither the world-empire, nor its demon-gods, nor Satan himself that furnished the chief task of Christ. The Christian community was His greatest deed. He created it by His redeeming death (1⁶ 5⁹⁻¹⁰), and is first and last the Lord of the Churches, knowing them as they are (2² etc.), ruling them in love, but with severity (2¹⁶ 23³ 3¹⁹), their Lord (11⁵ 14¹³ 22²⁰ 21). For Him the perfected community is destined as a bride (19⁷⁻⁹ 21²⁻⁹). Believers are His servants (11²⁰), as they are the servants of God (7³ 10⁷ 11¹⁸ etc.). The name which most expresses what Christ is to the Christian is the 'Lamb,' used twenty-nine times in the book. The figure of a lamb as if slain, i.e. with throat cut as if about to be sacrificed, the author is able to use in such a way that it gives an impression of power and excites feelings of reverence and awe. Although the Lamb slain is a striking Christian transformation of the Lion of Judah's tribe (5⁵⁻⁶), yet lion-like rather than lamb-like qualities remain dominant. The seven horns and the seven eyes picture kingly power and Divine knowledge. The Christian Messiah is one crucified, indeed, but nevertheless kingly and powerful, a stern warrior and righteous judge (6¹⁶ 14¹⁰ 17¹⁴). His place is near the throne of God (5⁶ 8⁷ 9¹⁷), and at last upon it (21²² 22³). Although the name Jesus is commonly used (1⁹ 12¹⁷ 17⁶ 19¹⁰ 20⁴ 22¹⁶), yet the reference is to the heavenly, not the earthly life. Neither allusions to the birth of Christ (12¹⁻⁵, cf. 5⁶ 22¹⁹), nor to His death (5^{9c}, cf. Is 53; 17, cf. Zec 12¹⁰, Dn 7¹³), indicate a use of the Gospel accounts. The fact of the death, however, is of vital significance. The crucifixion was the crowning sin of Jerusalem (11⁵), but the slaying—the blood of the Lamb—is that through which He made men a kingdom, priests, unto God (1⁶ 5¹⁰). This effect is explained as a purchase (redemption), 5⁹ 14³⁻⁴ (cf. 1 Co 6²⁰ 7²³), with which the reading, *λύσαντι ἐκ*, in 1⁸ ('loosed'), would correspond. But it is also said that the redeemed had 'washed their robes and made them white in the blood of the Lamb' (7¹⁴, cf. 22¹⁴ *καὶ*, and the less probable reading, *λούσαντι ἁπὸ*, in 1⁶).

The figure of the slain Lamb itself pictures the fact of the atoning significance of the death, but does not give us a definite theory regarding it. It is not certain whether the Paschal lamb is in mind (Ex 12²⁸, 1 Co 5⁷), or Is 53⁷ (as probably in Jn 1²⁹ 36). The vicariousness of Christ's death is not indicated, and the contact with St. Paul's thought at this point seems formal rather than real.

(c) *The Christian life.*—The divergence of the thought of our book from St. Paul becomes still more evident when we note that the white garments which the redeemed wear signify moral purity (3⁴⁻⁵). It is the duty of the Christian Church to array itself in white. The fine linen, bright and pure, is the righteous deeds of the saints (19⁸). Such raiment can be, as it were, bought of Christ (3¹⁸), or given (6¹¹ 19⁸); but its possession is evidently regarded more from the moral than from the ritual point of view. There is no such reflexion upon the relation of gift and duty in the Christian life as in St. Paul; but by the side of praise for redemption by Christ's blood, is an almost legalistic conception of salvation by works. In the letters, works are required by Christ (22⁵ 19²³ 22²⁶ 31. 2. 8. 15, cf. 14¹³ 18⁶ 20⁶ 12. 13 22¹³, Holtzmann). They are His works (22⁶), the keeping of His words or commands

(3^o), as well as God's words (1^o 12¹⁷ 14¹² 20⁴), of which Jesus is a witness (1^o 3¹⁴). To keep God's commands is to keep the testimony of Jesus (1^o 2¹⁷ 19¹⁰ 20⁴) or His faith (14¹²). Pure morals (2¹⁴ 20 3¹⁴ 14⁴ 5) and a pure worship (2¹⁴ 20 13¹² 14⁹) are enjoined, over against heathen influence; and, to keep these in such a time, patience, endurance, fidelity were the most needed virtues. 'The patience and the faith of the saints' (13¹⁰) are closely related virtues. That faith and patience alike mean fidelity is evident (2¹³ 14¹² 2¹⁰ 17¹⁴). They were most manifest in martyrdom. As Christ, through the shedding of His blood, proved Himself a 'faithful witness,' and attained as a reward His place of power, so Christians gain the highest glory through a martyr death. Its power as an example is one of the clearest interpretations given by our author to Christ's death (see 7¹⁴ 12¹¹ 3²¹ 20⁴⁻⁶). The point of view of reward is that from which salvation is predominantly regarded (2⁷ etc., 'to him that overcometh,' 11¹⁸ 22¹² 7¹⁴).

vi. RELATION OF REV. TO OTHER NT BOOKS.—

1. *St. Paul.*—The question in what relation the Christology and Soteriology of Rev. stand to Paulinism is one to which a confident answer is impossible until we know better how to answer the questions both of source and of influence with reference to St. Paul's thought at these points. If St. Paul is the author of the 'higher Christology,' Rev. must be under his influence, and certainly the expression 'the firstborn from the dead' (1⁵) suggests Col 1¹⁸ (cf. 1 Co 15²⁰), though Bousset believes that Ps 89²⁸ (LXX) accounts for it. To the same verse, Col 1¹⁸ (cf. v. 15), the expression 'the beginning of the creation of God,' points (3¹⁴). Yet these parallels are far from conclusive. Both St. Paul and Rev. exalt Christ above angels as a reward for His earthly life and death (Ph 2⁶, Rev 5⁶).

If St. Paul was the first to connect the forgiveness of sin with the death of Christ, the thought of Rev. is in some sense due to him; but St. Paul's originality at this point is an open question (1 Co 15^{3, 11}), and the effect of the death of Christ is here described in a wholly un-Pauline way. Again, the universality of the gospel owed most to the championship of St. Paul, but Weizsäcker is justified in saying that in Rev. Judaism has become universalistic and free from law, not in the Pauline way, but in a way of its own. The thought of Rev 5⁶ is that of Eph 2¹³, but dependence is not evident.

There are many points of contact between the two writers in eschatology, but none that cannot be explained from the common basis of Jewish and primitive Christian conceptions. It is not probable that we are to infer from Rev 7¹⁻³ 11¹⁻¹³ an expectation like St. Paul's of the final repentance and salvation of the Jewish people (Ro 11²⁶); it is, however, possible. St. Paul expects a literal renewal of the world (Ro 8¹⁸⁻²², cf. Rev 21¹); also (before this?) an interregnum of Christ (1 Co 15²²) when He and His (6²⁻³) will overcome all powers hostile to God (Rev 20⁴⁻⁶); the last foe to be destroyed is death (1 Co 15²⁶, Rev 20¹⁴). It is a striking fact that while the literalness of these expectations is not to be questioned in St. Paul's case, in Rev. we feel ourselves to be everywhere on the border line between fact and figure. None of these parallels is so striking as the contrast between St. Paul's attitude towards Rome and that of Revelation (Ro 13¹⁻⁷, 2 Th 2⁷). Even at this point, however, we cannot think of an intentional polemic against St. Paul. Antichrist has taken on a Roman instead of a Jewish character by the course of events. The effort of Baur and Volkmar to prove the presence of an anti-Pauline polemic in the book cannot be regarded as successful. The Christianity of the John of Rev. is neither national nor legal in a

Jewish sense (e.g. 5⁶ 7⁹ 21²⁴ 21²⁵ 21²⁶). The absoluteness of its freedom from Judaism, i.e. of its conviction that Christians are the true Jews, is seen in the fact that it can adopt without change such thoroughly Jewish pictures as 7¹⁻³ 11¹⁻¹³, taking for granted their figurative application to the Christian community. Its conception of faith and of works is neither St. Paul's nor is it aimed against St. Paul's conception.

We may agree with Jülicher that the Christianity of Rev. is neither Pauline nor anti-Pauline; and that, as far as one can speak of the religious conceptions of the book outside of the eschatological circle, they can be understood as a simple development of the primitive form in which the gospel came through Jewish believers to Jews. It must, however, be a late, not an early development.

2. *The Synoptic Gospels.*—The traditional defence of the apostolicity and truth of Rev. by the claim that it is only an elaboration of the eschatological teachings of Jesus, especially in Mt 24 [-25] = Mk 13 = Lk 21 + 17²⁰⁻³⁷ + 12³⁵⁻⁴⁸, must now be reconsidered and tested in view of a growing inclination on the part of scholars to regard these chapters as due to an elaboration of the simpler teachings of Jesus regarding the future, under the influence of the eschatological conceptions, inherited from Judaism, of which Rev. is a product and record. The parallels are, of course, unmistakable; but for the historical interpretation of them we must wait for further studies in the Gospels, and in the history of those traditions of the life and teachings of Jesus out of which the Gospels came.

Holtzmann (*Eind.* 422) adduces the following parallels: Mk 13⁷⁻⁸ = Rev 6⁴⁻⁸ 12, Mk 13¹⁰ = Rev 14⁶, Mk 13¹³ = Rev 2²⁸, Mk 13¹⁹ = Rev 16¹⁸, esp. Mk 13²⁴⁻²⁵ = Rev 6¹²⁻¹⁴ 8¹² 9¹⁻², Mk 13²⁶ (still more closely Mt 27³⁰) = Rev 17, Mk 13³⁷ = Rev 7¹, Mk 13³¹ = Rev 6¹⁴ 17¹⁷ 21¹, and apparent contrasts between Rev 11¹ and Mk 13¹⁴, Rev 10⁶ 8 14¹⁵ and Mk 13³².

Von Soden (*Abhandlungen*, p. 132), on the basis of various parallels (Rev 13¹⁰ Lk 21³⁴, Rev 6¹⁰ Lk 18⁷, Rev 6¹⁸ Lk 23³⁰, Rev 3¹⁶ Lk 12³⁰ [= Mt 24²⁸], Rev 3²⁰ Lk 12³⁶ 14¹⁵⁻²⁴, Rev 11⁹ Lk 21³⁶, Rev 3¹⁴ 17¹⁵ Lk 12³⁰ 4⁵, Rev 11² 22⁶ Lk 18⁸, Rev 12²¹⁰ Lk 21⁸, Rev 10⁹ Lk 14¹⁵, Rev 22⁷ Lk 11²⁸, Rev 16¹⁸ Lk 12⁴⁷), regards it as probable that the Christian editor of Rev. was familiar with Luke's Gospel. He thinks (p. 158 f.), on the other hand, that Matthew used Rev. in its present form because of the parallel use of words and phrases in many passages (cf. e.g. Mt 5¹³ Rev 19⁷, Mt 6²⁶ Rev 21⁶, Mt 20¹⁶ 22¹⁴ Rev 17¹⁴, Mt 16¹⁸ Rev 11⁸ 3⁹ 20¹, Mt 27³⁵ Rev 11² 21² 22¹⁹, Mt 26⁶ Rev 17¹, Mt 19¹⁷ 23³ 25²⁰ [to keep, *teinein*, commands of Christ] 26¹⁸ Rev 13² 22¹⁰, Mt 16¹⁸ 18¹⁸ [ἀνά] Rev 15, Mt 26⁶² Rev 13¹⁰, Mt 24³⁰ Rev 17, Mt 24¹² Rev 24¹⁹ 31⁶, Mt 27¹² Rev 12¹, Mt 21¹ Rev 21²⁴, Mt 21¹⁶ Rev 12⁴ 17). Such parallels as Holtzmann adduces between Rev. and Mk 13 are referred by von Soden and many others to common or related Jewish apocalyptic sources.

3. *The Gospel and Epistles of St. John.*—The relation between Rev. and the other Johannine writings has been obscured by critical attacks and apologetic defence. Zahn's extravagant statement, that the common use of the name Logos (Jn 1¹⁻¹⁴, 1 Jn 1¹, Rev 19¹³) outweighs all the irreconcilable contradictions which have been found between the ideas of Rev. and those of the other Johannine writings, is anything but conclusive, although the importance of this point of connexion is to be recognized. Even Zahn admits the difficulty of the problem presented by the *difference of style*, but thinks that both John and Rev. betray a Hebrew author, and that the same man might write differently as a prophet and as a historian and teacher. It is really by appeal to a supernatural agency that Zahn reconciles the books. In the Bk. of Revelation St. John is in ecstasy and receives everything in vision, the form as well as the material (p. 614 f.). So the books are not by the same real author, after all; and how would Zahn estimate the relative value of the work of John and that of the Spirit? In regard to the peculiar style of Rev., with its departures from grammatical rules, certainly in part intentional,

perhaps in the effort to give the effect of the Hebrew prophetic style, see especially Bousset, *Komm.* pp. 183-208.

That Rev. is not by the author of the Gospel and the First Ep. of John appears to the present writer little less than a certainty. There are, indeed, ideas common to these books. We have already noticed the common use of all the Johannine writings by the Montanists because John promises the prophetic spirit, and Rev. is a product of it; and the common rejection of all by the so-called Alogi, though later opponents of Montanism were contented to reject Revelation. There are also Johannine forms of expression in Rev. (see, e.g., 3³⁰, Jn 17², Rev 2²⁶, 27 3²¹, Jn 15²⁶, 17¹⁸ 20²¹). But so there are here Pauline forms of expression. Indeed the thought-world of our author is related to one side of St. Paul's, while John and I John are related to another; and while it is not impossible that both Rev. and John presuppose St. Paul, between these books themselves little but contrast can be discovered, both in thought and in expression.

Bousset has sought to prove a linguistic relationship such as to justify the belief that Rev. came from the same circles in Asia Minor from which the Johannine writings came. The John of Asia Minor was, he believes, not the apostle, but the presbyter John; and though neither the Gospel nor the Apocalypse was written by him, Bousset supposes that both rest in some way upon him. That the John of Asia Minor was the apostle remains, however, still the more probable supposition (see the elaborate argument of Zahn, *Forschungen*, vi. 1900, pp. 175-217). But the inference that the John of Rev. must in that case be the apostle, is weakened by the observation that the apocalypticist does not speak with the authority of his own person. The authoritative author of his book is Christ. All that the author claims for himself is that he is a genuine prophet. The common idea 'that he appears as a special authority before his readers rests on fancy' (Jülicher, *Einf.* 176). It is not he but Christ who criticizes and commends the Churches. There remains, of course, the other possibility, that, like other apocalypses, this also is pseudonymous, issued in the apostle's name. But we should in that case confidently look for clear references to the apostle's experiences, whereas the writer regards himself everywhere as a prophet, and seems to look upon the apostles from without (21¹⁴, cf. 18²⁰). That the apostle was the author of Rev., and therefore not of John (Baur, etc.), is now urged anew, chiefly on the ground of external testimony, by B. W. Bacon (*Introd. to NT*, 1900); but, though not impossible, it can never be so established as to be a weighty presupposition for the solution of the problem of the Gospel. That the writer of Rev. need not have known Jesus, remains a strong indication that he did not know Him.

In distinction from the Gospel, the Apocalypse can be historically interpreted and estimated without regard to the question of its author, i.e. of its final author; but a book of this class cannot be understood at all apart from the stream of apocalyptic tradition out of which it comes, of which it is in large measure a product. Of its authorship nothing more than guesses can be given. With the nature of the book itself and the resulting method of its interpretation it is possible to deal more positively.

Conclusion.—The historical value of this book as a witness to early Christianity, and the temper and expectation with which it faced its long struggle against the world, cannot be over-estimated. The religious value of apocalypses in general lies not in their form or forecast, but in the religious faith

that they express. The special religious worth of Rev. lies first of all in its Christianity and then in what results from this; in the fact that though chiefly apocalyptic it is partly prophetic in character, that though largely dependent on tradition it is not wholly without the marks of a creative spirit (Bousset, p. 11). 'The book has its imperishable religious worth because of the energy of faith that finds expression in it, the splendid certainty of its conviction that God's cause remains always the best and is one with the cause of Jesus Christ; but it is unreasonable to treat the detail of its phantasies as an authentic source for a history of the past or the future' (Jülicher, p. 168).

The form of the book is uncongenial to us; but a fair historical judge will not condemn it for its form, which the age supplied, and which served the age. We shall do best justice to the form if we regard it as practically poetical. The line which must be drawn for a true appreciation of our book is not the rough line between literal and figurative speech, but the far more delicate one between pictures consciously fashioned to express spiritual realities, and visions of persons and actions literally taken, but *valued* for the spiritual realities that lie behind them. This is an important distinction, but does not involve a fundamental contrast. Our author is a poet, whether consciously or not, since, whether taken as word-pictures or as actualities his visions were to him, as they are to us, symbols of spiritual realities, of Christian faiths and hopes.—But, apart from form, are the faiths and hopes of the book fully Christian? It is hard not to judge the hatred of Rome and the desire for vengeance as in some measure a departure from Christ. The difference between His announcement of the fall of Jerusalem and this prediction of the fall of Rome is just the deeper-lying difference between prophecy and apocalypse. Christ would not allow the kingdom of God to be put into contrast and competition with the kingdom of Caesar (Mk 12⁴⁻¹⁷). St. Paul followed His contradiction of Judaism at this point (Ro 13⁷, so 1 P 2¹³⁻¹⁷); but the writer of Rev. seems hardly to escape altogether the Jewish confusion of religion with politics. To use the money of the realm, or rather to engage in transactions involving papers which must be attested by the official stamp (χρυσῶμα) of the emperor (Deissmann, *Neue Bibelstudien*, 1897, pp. 68-75), seemed to him the worship of the beast (13¹⁷). With this goes also the absence of love, and with it again the absence of hope for men. The missionary spirit of Christianity is not here. Christians are to hold fast what they have, and the sinful world will be more sinful still until its speedy destruction. To the union of religion with politics belonged, in the Jewish mind, the hope that the saints would in the end rule over the world (20⁴⁻⁶). Whether it is possible to regard this millennial reign as taken by our author from some Jewish source for its underlying idea, or whether we must regard him as adopting the reality with the form, through the influence of his attitude towards Rome, it is in either case impossible not to regret the influence of these verses upon Christian history. To this criticism, however, two things are to be said. One is that as events, especially the Exile, brought about the transition from prophecy to apocalypse in Judaism, so events put Christianity at this crisis in the attitude of self-defence against the threatened extinction of its faith at the hands of Rome. The other consideration is that it was not for its chiliastic hope, but in spite of it, that Rev. held its place in the Christian Canon; and it has not been this that has given the book its power.

It is the Christianity, not the Judaism, of the book that has made and kept for it a place in

Christian Scriptures. It aimed to put Christ at the centre of religious faith and hope. His words are the complete law of God, His testimony is the full contents and inspiration of prophecy. The Churches are under His eye, and responsible only to Him. He also opens the book of God's final purposes for mankind. His birth, death, and resurrection began that victory of good over evil, which His coming and reign will bring to a glorious completion, for His coming is the coming of God. The power and abiding worth of the book is in this splendid faith, against all appearances, in the kingship of Christ and God; in the strong hope which maintained itself amid persecution and unto death; and in the intensity of emotion through which the language, though both our ignorance and our knowledge make it in part less impressive than it was at first, has still the power, and in many passages the unimpaired power, to stir in us an answering hope and faith.

LITERATURE.—The principal books in which a historical understanding of Rev. has been furthered, and several of the important articles and discussions regarding it, have been named in the course of this article. The text may be studied with the help of Weiss (*Die Johan. Apoc.*; *Textkrit. Untersuchungen*, 1891), Gwynn (*The Apocalypse of St. John*, 1897), and Gregory (*Text. Kritik d. NT*, 1900); the older critical view (contemporary-historical) in the Commentaries of Lucke, Bleek, and Ewald. In America, Stuart's *Commentary* (1845) defended this general method, with some 'church-historical' features. Of recent critics the works of Vischer, Spitta, Gunkel, and Bousset are most deserving of study. The Commentaries of Bousset (*Meyer's Series*, 1896) and Holtzmann (2nd ed. 1893) are of the greatest value. See also the *Introductions* of Holtzmann, Jülicher, Zahn, and Bacon; also the *Histories of the Apostolic Age* by Weizsäcker (ii. 18 ff. 161-206), McGiffert, and Bartlett; the *NT Theologies* of Weiss, Beyschlag, Stevens, Holtzmann, Titius (*Die neuest. Lehre von der Seligkeit*, iv. 1900), and artt. on Apoc. by Harnack in *Encyc. Bibl.* and Bousset in *Encyc. Bibl.* Of other books bearing in an important way upon the understanding of Rev., reference may be made again to Gunkel, *Schöpfung und Chaos* (1896); Bousset, *Der Antichrist* (1895, in English, *The Antichrist Legend*, 1896); Lucken, *Michael* (1898); Weinle, *Wirkungen des Geistes*, etc. (1899).

FRANK C. PORTER.

REVENGE, REVENGER.—See AVENGE, and GOEL.

REVEREND.—In earlier English there is no difference in meaning between 'reverend' (from Lat. *reverendus*, pass. ptp. of *revereri* to fear, revere) and *reverent* (through Old Fr. *reverent*). Only the form 'reverend' occurs in AV: Ps 111⁹ 'Holy and reverend is his name' (קדש ויורא קרבו); LXX ἁγιος καὶ φοβερός, Vulg. *sanctum et terribile*; and 2 Mac 15¹² 'Reverend in conversation' (ἀλθιμωρα τῆς ἀνδρείας, Vulg. *verecundum visu*, RV 'reverend in bearing'). RV maintains the mod. distinction between 'reverend' = to be revered, and 'reverent' (as from act. ptp.) = revering. It retains 'reverend' in Ps 111⁹ and 2 Mac 15¹² and adds Ph 4⁸ marg. (Gr. *σεμνός*, RV 'honourable'); and it also introduces 'reverent' into Tit 2³ 'reverent in demeanour' (ἐν καταστάσει ἱερωσικῆς, AV 'in behaviour as becometh holiness'). The older versions that use the word always spell it 'reverent' (Bish. in Ps 111⁹, Gen. and Dou. in 2 Mac 15¹²).

J. HASTINGS.

REVIVE.—In some of the examples of 'revive' in AV it is evident that the meaning is literally to come back to life from the dead (or transitively to bring back to life). Thus 1 K 17²² 'The soul of the child came into him again, and he revived'; 2 K 13²¹ 'When the man was let down and touched the bones of Elisha, he revived, and stood up on his feet'; Neh 4² 'Will they revive the stones out of the heaps of the rubbish which are burned?'; Ro 14⁹ 'Christ both died, and rose, and revived.' And, even when this is not the meaning, the word carries greater force than it now bears to us. Thus Ro 7⁹ 'When the commandment came, sin revived, and I died.' Cf. Erasmus, *Commune Crede*, 89, 'It is more probable by the deade to understonde those

that have departed from theyr bodies afore the daye of judgements (for as sone as they shall be revived and risen agayne, they shall be judged)'; Lk 15²⁴ Rhem. 'This my sonne was dead, and is revived'; and Shaks. *1 Henry VI.* i. i. 18—

'Henry is dead, and never shall revive.'

J. HASTINGS.

REZEPH (רִזְיָה; B' *Páphes*, B^{ab} *Páphes*, A *ῥή* *Páphes*, 2 K 19¹²; BQ^{ms} *Páphes*, NQ* *Páphes*, A *Páphes*, Is 37¹²; Vulg. *Roseph* 2 K 19¹², *Reseph* Is 37¹²).—Mentioned in the message of the Rabshakeh of Sennacherib to Hezekiah, when demanding the surrender of Jerusalem, with Gozan and Haran, and the children of Eden which were in Telassar. The district in which this town was situated belonged, for several centuries, to Assyria, and its name occurs, as was to be expected, many times in the Assyrian records, generally under the form *Razappa* (also *Razapa* and *Razapi*). The site is now represented by *Rusifa*, between Palmyra and the Euphrates, and is thought to be the *Ῥοζάφα* of Ptolemy (v. 15). The earliest mention of the place in the Assyrian records is in the Eponym Canon, where we learn that Ninip-kibi-usur was the prefect in B.C. 839. From B.C. 804 to 774, the prefect was Igi-guba-ēres, or Ninip-ēres, who, judging from the length of his term, and the fact that he was twice eponym, must have enjoyed the confidence of his superiors to an unusual degree. Other prefects mentioned as having held the office of eponym were Sin-šallim-anni in 747, and Bēl-ēmur-anni in B.C. 737. As all the above-named prefects of Rezech have Assyrian names, it is very probable that they were, without exception, Assyrians. The tablet K 9921, however, mentions a governor (*bēl pihati*) named Abda,* who seems to bear a native name, and probably held office at a later date than the eponyms whose names are given by the Assyrian Canon. The district was an important trade-centre in ancient times, as the tablets and lists from Nineveh show.

LITERATURE.—Delitzsch, *Paradies*, p. 297; Schrader in *Rehm, HWB*, s.v., COT ii. 11.

T. G. PINCHES.

REZIN (רִזְיָה).—No doubt the name was originally spelled רִזְיָה, i.e. *Rezon* or *Razon*. The LXX *Ῥαζαν* (in Kings, but in Isaiah *Ῥαζελ* or *Ῥαζ*) disputes the place) points to the *o* sound; so does the Assyrian *Ra-ṣun-nu* and the Pesh. רִזְיָה.

1. From 2 K 16⁷ and Is 7¹⁻⁹ we learn that Rezin, king of Damascus, and PEKAH, king of Israel, planned an attack on Judah. This was in the year B.C. 734. Damascus and Israel were vassal States, subject to the suzerainty of Assyria. In III Raw. 9, No. 3, Tiglath-pileser (see Winckler, *Keilinsch. Textb.* p. 17) enumerates the articles paid him in tribute by *Ra-ṣun-nu* of Damascus and Menahem of Samaria. The two tributaries were now anxious to throw off the yoke. Naturally they sought to enlist the aid of their neighbour Judah, which, for all that appears, was at this time nominally independent of the great king. Meeting with a refusal, the confederates moved forwards against Ahaz. We have no reliable information as to the earlier events of the campaign. The assertion in 2 K 16⁸ that Rezin 'recovered Elath to Syria, and drove the Jews from Elath; and the Syrians came to Elath and dwelt there unto this day,' is obviously an error. The Syrians had nothing to do with that district, which came rather within the sphere of Edom. The original אֵדוֹם (Edom) of the text has been corrupted into אֲרָם (Aram), אֲדוֹמִים (Edomites) into אֲרָמִים (Aramians, Syrians), and when once this was done the *רִזְיָה*—

* Probably there should be a vowel at the end (*Abda u*, or, perhaps, *Abda'i*). Cf. אֲבָדָה and its variant אֲבָדָה.

tion of the king's name, Rezin, easily followed. It should be noted that according to 2 Ch 28¹⁷ the Edomites were actively hostile to Ahaz. All, then, that we really know of the beginning of the campaign is that the two kings, of whom Rezin was the more active and powerful, advanced with their troops against Jerusalem and besieged it. Isaiah endeavoured to allay the intense alarm which this caused amongst the citizens, but his efforts did not meet with much success. Ahaz, at all events, put more confidence in foreign intervention than in the prophet's assurance of Divine protection. He 'took the silver and the gold that was found in the house of the LORD, and in the treasures of the king's house, and sent it for a present,' i.e. as tribute, to Tiglath-pileser, entreating his immediate help. The Assyrian was only too delighted with the pretext for interference. His approach was the signal for the murder of Pekah by his own subjects (2 K 15³⁰), who then accepted the great king's nominee, HOSHEA, as their sovereign: 'I took the land of Bit-Chumria [Beth-Onri] . . . the whole of its people.' I carried away their possessions to Assyria. Pekah their king did they dethrone, and I set Hoshea to rule over them' (III Raw. 10, No. 2, in Winckler). Turning against Damascus, he encountered a more determined resistance. 2 K 16⁹ states that he 'took it, and carried the people of it captive to Kir, and slew Rezin.' But the Assyrian monarch himself informs us that the siege lasted more than a year. It ended in B.C. 732. Schrader (*COT* i. 257) says that Rawlinson found the slaying of Rezin mentioned on a block, which was unfortunately left behind in Asia and has since disappeared.

Winckler (*Alttest. Untersuch.* pp. 74, 75) identifies 'the son of Tabeel' (Is 7⁹) with Rezin. He explains Tabeel (*Tab-El*) as meaning 'El is wise,' and argues from the equivalent name *Eliada* (1 K 11²) and from the *Tab-rimmon* of 1 K 15¹⁸ that such a name as *Tab-El* was not uncommon amongst the kings of this dynasty. And since 'the son of Remaliah' in Is 7⁶ means Pekah, he holds that 'the son of *Tab-El*' in Is 7⁷ means Rezin. Damascus, too, being the predominant partner, the chief profit of the expedition would fall to its king. The series of Damascene kings, therefore, according to him is as follows:—

| | |
|---------------------------|---------------------------------------|
| Circa 950 B.C. | Rezin. |
| From about 885–844. | Bir'idri, the Ben-hadad of the Bible. |
| From 844 to about 804 (?) | Hazael. |
| 804 (?)–744 (?) | Mari'—in the Bible, Ben-hadad. |
| 743 (?)–? | Tab-El. |
| 7–732 | Rezin. |

But the identification on which this depends is precarious. Obviously the periphrasis, 'the son of Remaliah,' is intended to be contemptuous. It recalls the fact that Pekah was a usurper, entirely unconnected with the royal family. Probably, then, 'the son of *Tab-El*' is also a scornful title, hurled at one who was a mere puppet in the hands of the two kings. If *Tab-El* had been a king of Damascus, it would have been no derogation to Rezin's dignity to be entitled his son.

2. In Ezr 2²⁸ = Neh 7⁵⁰ 'the children of Rezin' (רִזְנִי) are mentioned amongst the Nethinim. The LXX has *viol* *Paḥūr*: the *viol* *Δαυδ* of 1 Es 5²¹ is evidently a mere scribe's error, resulting from the common confusion of ר and ד. Guthe, in Kautzsch's *Apokr.*, unhesitatingly restores the 'Rezin' in this passage.

J. TAYLOR.

REZON (רִזְן 'prince'), son of *Eliada*, was one of the generals of that Hadadezer, king of Zobah, whom David overthrew (2 S 8^{3a}). Falling into disfavour with his master, as David had done with Saul, he fled from him. A band of freebooters

attached themselves to his standard; and, beginning in this feeble fashion, he eventually became strong enough to seize Damascus, where he founded a dynasty. During his own lifetime he proved a thorn in the side of Solomon (1 K 11²⁵), and the kings who traced their descent from him were amongst the most persistent and troublesome of Israel's adversaries.

The question has been raised whether *Rezon* is the correct name. LXX A, it is true, supports that form with *Paḥūr*; but B has *Ἐσρώμ* 1 K 11²⁵, which apparently corresponds to רִזְוִן, to which also the

Pesh. רִזְוִן may point. Moreover, the רִזְוִן of

1 K 15¹⁸ seems to occupy much the same position in the genealogy as the רִזְן of 1 K 11²⁵. Hence the conjecture that רִזְוִן (*Hezron*) should be substituted for the רִזְוִן (*Rezon*) and the רִזְוִן (*Hezion*) of these two passages respectively. On the other hand, it must be remembered that the Greek for רִזְוִן would most likely have been *Ἐσρώμ* rather than *Ἐσ.*; cf. *Ἀσέλ* for רִזְוִן and *Ἐσέλ* for רִזְוִן. The three kings, *Hezron* (our *Rezon*), *Tab-rimmon*, and *Ben-hadad*, must also have enjoyed very long reigns if they occupied the entire interval from David to Asa. In the absence, therefore, of absolutely conclusive evidence, we are not at liberty to alter the form of the name or to assume the identity of *Rezon* and *Hezion*.

The integrity of the text and the reliability of the statements in 1 K 11²⁵, the only passage where this prince is named, are also disputed. Internal evidence, coupled with the fact that LXX (B, Luc.) omit the words, proves that 'when David slew them of Zobah' is no part of the original text. Kittel (*Hist. of the Hebrews*, ii. 53) points out that even in the MT it looks as though vv. 23–25 had been interpolated between v. 22 and v. 26, and that in the LXX (B, Luc.) the whole episode is connected with v. 14. But the connexion with v. 14 is as unsuitable as that with v. 22. In either case it interrupts the Hadad narrative, and gives the impression of a gloss. This, however, is not to say that it is unhistorical.

J. TAYLOR.

RHEGIUM (Ῥήγιον), the modern Reggio, was an important and ancient Greek colony near the south-western extremity of Italy, and close to the narrowest point of the straits separating that country from Sicily, opposite Messina (Messina) and about 6 to 7 miles distant from it. It was a much more important place in the ancient system of coasting navigation than it is in modern times. The whirlpool of Charybdis near Messina, and the rock of Scylla some miles from Rhegium round the promontory north of the town, were reckoned much more dangerous then; and ships had often to lie at Rhegium waiting for a suitable wind, and avoiding the currents which in certain circumstances run very strong in the straits. Hence the Dioscuri, the patrons and protectors of sailors, were much worshipped at Rhegium, and are represented on its coins: the mariners of the ships that put in at Rhegium would often make or discharge their vows to the 'Twin Gods' in the town.

Rhegium occupied not merely an important but also a dangerous and exposed situation. A great city in the 6th and 5th cents. B.C., it was totally destroyed, and its inhabitants sold as slaves, by Dionysius of Syracuse in 387. Again in 280–270 it was destroyed. Campanian troops, received as a garrison into the city, murdered the male population and made themselves masters of the place, till they were captured and exterminated by a Roman army, and the town was given back to the scanty remnant of its former population. Henceforth it was in alliance with Rome as a *civitas*

fœderata. After this it is mentioned only incidentally amid the Roman wars. It narrowly escaped the forfeiture of its territory to the soldiers of the triumvirs after the battle of Philippi, being spared by Augustus probably from a desire to keep at this important harbour a population accustomed to navigation and friendly to himself; and in the Sicilian War (B.C. 38-36) it rendered good service both to his fleet and his army, and was rewarded with the title of *Julium Rhegium* and an increase of population (with other accompanying advantages). Strabo mentions it as a flourishing town about A.D. 20. It presented a curious mixture of Greek and Roman population and life, shown in its mixed Greek and Latin inscriptions. It was the terminus of one of the great Roman roads, a branch of the Appian Way, diverging from it at Capua, built probably by the prætor Popilius in B.C. 134 and called *Via Popilia*. The actual point of crossing to Sicily was at the *Columna* or *Statua*, 6 miles or more north of Rhegium.

The ship in which St. Paul sailed from Malta to Puteoli, the 'Dioscuri' * (a name of good omen), lay for a day in the harbour of Rhegium, waiting till a south wind arose, which carried it to Puteoli on the morrow after it sailed (*δευτεραίαι*). Probably some of the sailors on the 'Dioscuri' took the opportunity of thanking the Twin Gods in the city for their successful voyage at that early season of the year, and praying for equal luck to their destination. The manœuvre by which the ship reached Rhegium seems quite clear; and yet has caused much trouble and variety of opinion. The ship must have had a favourable wind from Malta, otherwise it would not have attempted the crossing over the open sea so early in the year. This wind carried it to Syracuse, but there it had to lie for three days, which proves that the wind had shifted and was then against it. It then sailed to Rhegium; and, as it had to wait in Rhegium till a south wind set in, the wind with which it reached Rhegium cannot have been south. The expression *περιελθόντες*, which Luke uses, shows that the wind was so far unfavourable that the ship could not run a straight course (*εὐθυδρομεῖν*, Ac 16¹¹ 21¹), but had to tack, running out north-eastwards towards Italy and then back to the Sicilian coast. This is the explanation of a practical yachtsman, James Smith, in his *Voyage and Shipwreck of St. Paul*. The explanation of *περιελθόντες* as 'sailing round the Sicilian coast' seems certainly wrong. The reading *περιελθόντες* in N¹ B seems to be a corruption, accepted through failure to understand the true text; it can hardly be rendered 'weighing anchor' (which is the suggested rendering), for in Ac 27⁴⁰ it has an accusative following it in that sense, as Blass points out; moreover, it is of great consequence in Ac 27⁴⁰ to give that information (see Smith, *op. cit.*, on the passage), but here it is unnecessary.

W. M. RAMSAY.

RHEIMS VERSION.—See VERSIONS.

RHESA (Ῥηδά).—A son of Zerubbabel, Lk 3²⁷.

RHODA (Ῥόδη).—The name means 'Rose.' When St. Peter was miraculously released from prison he went to the house of Mary the mother of Mark. A damsel (*παῖδισκῆ*) of the name of Rhoda came to the door, but opened not the gate for gladness, and ran in and told how Peter stood before the gate.

* Luke saw or heard the ship (a Roman imperial vessel) called by its Latin name *paravento* *Geminis* or *Castoribus* (compare the inscription *CIL* iii. No. 3, *navis paravento Isopharia*, i.e. whose sign was the Pharian Isia) in the Greek translation *παρὰ τὴν Διοσκουρίαν* (where the dative represents the Latin *abl.* *abso.*, as in *consule Cicerone, ὑπὸ τῷ Κοκκίῳ*); and the formula remains in his text to puzzle those commentators who study only literary Greek and neglect technical language.

She was accused of being mad, but persisted in her statement (Ac 12¹³⁻¹⁶). Nothing further is known of her. The name is fairly common both in literature and inscriptions, and was often given to slave girls.

A. C. HEADLAM.

RHODES (Ῥόδος) ranks among the most brilliant of the many brilliant cities of ancient Greece. The city was founded in B.C. 408, at the extreme north-eastern point of the island of Rhodes, when the three ancient cities, Lindus, Camirus, and Ialysus, were concentrated in the new foundation. It enjoyed an admirable situation and a splendid climate. The commercial aptitude of the population knew how to use its advantages by wise laws and just dealings with their competitors and allies in the trade of the eastern Mediterranean. Rhodes was at its highest pitch of power in the 2nd cent. B.C., having been made mistress of great part of Caria and Lycia in the settlement of 189, after the defeat and expulsion from Asia Minor of Antiochus and the Seleucid power. The city was, however, too powerful to suit the Roman policy. In B.C. 166 the Carian and Lycian cities were declared independent by Rome; and another blow was struck at Rhodian commercial supremacy by making DELOS a free port in the same year. The result of these disasters is to be observed in the diminution and alteration of Rhodian coinage about that time. But Rhodes continued to maintain its commerce. It was relieved of Delian competition by the great massacre of the Romans in Delos by Mithridates in B.C. 87; and by continuing loyal to Rome in that critical time, when almost every other Greek city joined Mithridates, it recovered favour and was permitted to regain part of its Carian possessions. In the Roman civil wars Rhodes from B.C. 47 to 43 supported the cause of Caesar, and suffered severely in consequence. C. Cassius captured the city in 43, and exacted 4500 talents from its people; and another Cassius in 42 burned all the Rhodian ships except thirty, which he manned with crews of his own and took away. Rhodes henceforth was a city devoid of real power; and it sank practically into a common provincial town of the Roman empire, though it ranked as a free city under the early emperors (except for a short time under Claudius, who took away its freedom and afterwards restored it again). Yet Strabo mentions (p. 652) that it was the most splendid city known to him in respect of harbours, streets, walls, and other equipment. Such was its condition in the time of St. Paul. Shortly afterwards Vespasian made it a part of the province Lycia.

Rhodes is mentioned in the NT only as a point where St. Paul touched on his voyage from Troas to Cæsarea, Ac 21¹. The route along the coast between the ports of the province Asia on the one side and those of Syria or Egypt on the other, was probably the most frequented seaway in the whole of the Mediterranean. The voyage was marked by a number of stopping-points,—Cos, Patara, etc.,—where the ordinary ships engaged in the trade called as a matter of course; and these are mentioned in Ac 20 and 21, with the exception of MYRA (which is given in the Western Text only). Rhodes was one of them; and the ship on which St. Paul and the whole body of delegates were sailing touched there between Cos and Patara. This is all in the customary form. Hundreds of ships did the same every year. An excellent illustration is supplied by the voyage of Herod, about B.C. 14, from Palestine by Rhodes, Cos, Chios, and Mitylene, to Byzantium and Sinope (see Jos. *Ant.* XVI. ii. 2).

Rhodes was also, beyond all doubt, one of the ports of call on the voyage from Alexandria to

Puteoli or to Ostia. It is, indeed, not mentioned in the voyages of that class described under MYRA, but none of those narratives gives a list of harbours, and we may assume with confidence that in each case Rhodes was a port where the ship called (unless in exceptional circumstances). That is proved by the voyage of Vespasian from Alexandria to Rome in A.D. 70, which was by way of the Lycian coast and Rhodes, as is seen by comparing Dion Cassius, lxi. 8, with Zonaras, xi. 17, and Jos. *BJ* vii. ii. 1. The voyage of Herod the Great in B.C. 40 from Alexandria to Rome by Pamphylia and Rhodes is also a good illustration.* Herod evidently passed east and north of Cyprus, like the ship in Ac 27¹⁻⁴; but it was the stormy season, and the over-sea voyage, common in the summer season, could not then be risked: see MYRA, where these two voyages may be added to the examples quoted.

Rhodes is also mentioned in 1 Mac 15²³ among the States to which the Romans sent letters on behalf of the Jews about B.C. 138 (see PHASELIS, LYCIA, DELOS, etc.). Only self-governing free States were thus addressed; and Rhodes, as almost the greatest maritime State of the eastern Mediterranean, was of course included. The ships carrying Jews from the west and from the Ægean coasts and cities to and from Jerusalem, for the Passover, would all, as we have seen, call in ordinary course at Rhodes. Such ships are implied in Ac 18¹⁸⁻²² 20³. It may be taken as practically certain that in a great commercial centre like Rhodes there would be Jews resident; but hardly any memorial of them has been preserved.

In Ezk 27¹⁵ the Septuagint reads 'Sons of the Rhodians were thy merchants'; where AV and RV have 'The men of Dedan were thy merchants' (traffickers, RV). There can be little doubt that the Septuagint text in this passage is a change made by translators in the 3rd cent. B.C., who had no knowledge of the desert carrier tribe Dedan, but were familiar with the Rhodians as the greatest merchants of their time in the Levant (see DEDAN). In Gn 10⁴ and in 1 Ch 1⁷, also, the Septuagint text has 'Rhodians' (Ρόδιοι) as the fourth of the sons of Javan; but RV, following the Hebrew text, has Dodanim in the former place and Rodanim in the latter (AV Dodanim in both places). Among the sons of Javan, Rhodes, which was inhabited by Greeks (though by Dorians, not Ionians; see DODANIM), would be quite suitable; and the Septuagint text is accepted by most moderns in those two places.

The island of Rhodes is about 43 miles long from N.E. to S.W. by 20 miles where the breadth is greatest; its nearest point is about 12 miles from the mainland. The famous *colossus* was a statue of the sun-god, 105 feet in height, which stood at the harbour entrance. It was erected to commemorate the success of the Rhodians in withstanding the siege by Demetrius Poliorcetes in B.C. 280; but it fell during an earthquake in 224, and the fragments remained lying, shown as a curiosity till A.D. 672, when the Arab general who conquered Rhodes is said to have sold them to a Jew of Enesa. The island was soon afterwards reconquered by the Byzantine arms, and remained in Christian hands for many centuries. The most interesting and glorious period of Rhodian history in many respects began in 1310, when the Knights of St. John of Jerusalem took the city from the Byzantine empire, and founded a State, including several of the neighbouring small islands and some towns on the mainland, especially Halicarnassus and Smyrna (the latter being taken in 1345, and held till 1403). The Knights of Rhodes were engaged in ceaseless warfare with the Turks. The

city, which was very strongly fortified by the Knights, was besieged unsuccessfully in 1440, 1444, and 1480; but at last, in 1522, the Knights surrendered on honourable terms to Sultan Suleiman, and retired to Crete, then to Sicily, and finally to Malta. The modern town of Rhodes is full of memorials of the time of the Knights, and contains hardly any apparent traces of its older history. Its harbours have been allowed to become choked with sand, and its trade is quite insignificant.

W. M. RAMSAY.

RHODOCUS (Ρόδοκος).—A Jew who betrayed the secrets of his countrymen to Antiochus Eupator. He was detected and imprisoned, 2 Mac 13²¹.

RIBAI (רִבִּי; LXX in 2 S 'Ρειβά, in 1 Ch B 'Ρεβιά, A 'Ρηβαί, & 'Ραβεία).—The father of Ittai (1 Ch Ithai) the Benjamite, one of David's thirty heroes (2 S 23²³ = 1 Ch 11³¹).

RIBLAH.—1. (רִבְלָה, once, Jer 52¹⁰, רִבְלָה; LXX 2 K 25²¹ 'Ρεβλαθά, elsewhere Δεβλαθά, and other corrupt forms).—The name of a place in the 'land of Hamath,' now *Ribleh*, in the Bek'á, or broad vale between the two ranges of Lebanon and Hermon, on the right bank of the Orontes, about 100 miles N.N.E. of Dan, 65 miles N. of Damascus, and 50 miles S.S.W. of HAMATH (which see). It was at Riblah that Pharaoh-necoh, three months after his defeat of Josiah at Megiddo (B.C. 608), in some way obtained the presence of his successor, Jehoahaz, and threw him into chains that he might no longer reign in Jerusalem (2 K 23³³). Riblah is also mentioned as the place which, at the close of the siege of Jerusalem (B.C. 586), was Nebuchadnezzar's headquarters, and to which Zedekiah, and other prisoners taken out of the captured city, were brought for punishment (2 K 25²¹ = Jer 39⁶ = Jer 52²¹; 2 K 25²⁰, 21 = Jer 52²⁶, 27). Riblah is now nothing more than a 'miserable' village of 40-50 houses (Rob. *BRP* iii. 543); but Robinson (*ib.* p. 545) points out how, from its situation, on the banks of a mountain stream, and in the middle of a vast and fertile plain, and also on the great road leading from Egypt and Palestine to Babylon, it was a suitable resting-place, whether for the army of Necoh, who had designs on Babylon, or for Nebuch., while watching the operations that were taking place in Judah. See, further, on the modern Ribleh, Sachau, *Reise in Syrien* (1883), 55-57. 'Riblah' is likewise read by most modern scholars (Ges., Ew., Smend, Cornill, etc.), with 4 MSS, in Ezk 6¹⁴ for 'Diblah' (דִּבְלָה): 'I will make the land desolate from the wilderness (on the S. of Judah) to Riblah (in the far North),' the expression being regarded as a designation of the whole extent of Palestine, to its ideal limits, and Riblah being perhaps mentioned instead of the usual 'entering in of Hamath' (Nu 34⁸, 2 K 14²⁵, Am 6¹⁴, Ezk 47²⁰ *al.*), on account of its having become prominent at the time (B.C. 592—see Ezk 12). If the 'approach to Hamath' is rightly placed at the N. end of the broad vale between Lebanon and Anti-Libanus, where, as the traveller from the S. approaches Riblah, he finds himself entering a new district, and sees the country towards Hamath open out before him (see esp. van de Velde, *Narrative*, 1854, ii. 470; and cf. Rob. *BRP* iii. 568; Moore, *Judges*, 80, 82; also Jos 13⁵, Jg 3³), this reading will be quite natural. Other scholars, however, doubt whether the Isr. territory can ever have been regarded as extending as far as the N.

* Which implies that the 'approach to Hamath' was at some distance from a place at the foot of Mount Hermon. The opinion (Rob. *ib.* 569; HAMATH, vol. ii. p. 290*) that the expression denoted the approach to Hamath, not from the S., but from the West, is hardly probable (cf. Keil on Nu 34⁸).

* Jos. *Ant.* xiv. xiv. 2f.; *BJ* i. xiv. 3.

end of Lebanon, and think the 'approach to Hamath' must be supposed to have denoted, somewhat vaguely, a more S. part of the vale of Coele-Syria (Keil and Dillm. on Nu 34⁸; Buhl, *Geogr.* 66, 110; notice Rehōb in Nu 13²¹): in this case Riblah is certainly a more N. point than would be expected; on the other hand, if the reading be not adopted, Diblath (RV 'Diblah') must be the name of a place otherwise unknown, which is hardly likely in such a connexion.

2. Nu 34¹¹ (הַרְבֵּל, with the art.: LXX ἀπὸ Σαφάμαρ Βηλα for ἡλὲρ ἡρῶν). One of the places mentioned on the (in parts) obscurely-defined ideal borders of the promised land, Nu 34¹⁻¹⁵. It is described as being on the E. border, somewhere between Hazar-ēnān—which (Ezk 47¹⁷ 48¹) was on the 'border' of the territory of Damascus, and was to be (Nu 34^{9, 10}) at the N.E. corner of Israel's territory—and the Sea of Chinnereth (i.e. the Sea of Galilee). There is difficulty in determining the site; for the places mentioned on the N. border of Israel, in both Nu 34⁷⁻⁹ and Ezk 47¹⁵⁻¹⁷, are very uncertain; and while some scholars (Robinson, Knob., Conder) think that this border may be drawn (approximately) across the N. extremity of Lebanon (Hazar-ēnān being then situated at one of the sources of the Orontes—either [Keil] the spring of Lebweh, 22 m. S.W. of Riblah 1 [Rob. iii. 532], or [Conder, *Heth and Moab*³, 8, 11 f.] 'Ain el-Asy, 11 m. S.W. of Riblah 1), others (Buhl, 66 f.; cf. RIBLAH 1) consider this to be too far N., and think that it should be drawn across the S. extremity of Lebanon (Hazar-ēnān being then either Baniās itself, or el-Hadr, 9 m. E. of it).^{*} The Riblah of Nu 34¹¹ is, however, some place between Hazar-ēnān and the Sea of Galilee; so that upon none of these suppositions can it be identical with Riblah 1 (which is to the N. even of 'Ain el-Asy). No Riblah in a suitable situation seems at present to be known. The suggestion (Wetzst.; see Dillm.) to read (after LXX) 'to Harbel' (הַרְבֵּל) for 'to Riblah,' and to identify Harbel with Harmel (or Hörmül), a place about 8 miles S.W. of Riblah (see Sachau's map, or the one in Bād., Route 31), does not really lessen the difficulty of the verse.

S. R. DRIVER.

RICHES.—See **WEALTH**.

RID.—The original meaning of 'rid' is to *rescue* (Anglo-Sax. *hreddan*, cf. Dutch *redden* and Germ. *retten*), and this is its meaning in five of its six AV occurrences (Gn 37²², Ex 6⁸, Lv 26⁸, Ps 82⁴ 144^{7, 11}). Cf. Gn 37²² Tind. 'When Reuben herde that, he went aboute to ryd him out of their handes and sayde, let us not kyll him'; Tind. *Expos.* 77, 'Because we be ever in such peril and cumbrance that we cannot rid ourselves out, we must daily and hourly cry to God for aid and succour'; Jer 15²¹ Cov. 'And I will ryd the out of the hondes of the wicked, and delyver the out of the honde of Tirautes.' In the remaining passage the meaning is *clear out*, *drive out*, Lv 26⁸ 'I will rid evil beasts out of the land' (RV 'cause evil beasts to cease out of the land'), which is the modern meaning. The process by which the word thus practically reversed its meaning (from *rescue* to *destroy*) may be illustrated from Spenser, *FQ* i. i. 36—

'Unto their lodgings then his guesstes he riddes,'

where the meaning is neutral, *removes*. Cf. also Lv 14³⁶ Cov. 'The preast shall commaunde them to ryd all thinge out of the housse,' and Udall, *Erasmus' Paraph.* i. 52, 'With these men the Pharisees consulted by what meanes they might ridde Jesus out of the waye.' J. HASTINGS.

^{*} Dillm. and Keil adopt intermediate views. Dillm. (p. 213) would not draw it N. of the present road from Berūt to Damascus; Keil takes it as far N. as Lebweh.

RIDDLE (רִידָה, from root רח [Oxf. Heb. Lex.

compares Arab. حَالٌ 'decline, turn aside, avoid,' hence perhaps *riddle* as *indirect*, obscure]; verb denom. רח 'to propose an enigma'; רח רח 'to put forth a riddle,' Ezk 17²: LXX αἰνύματα, προβλήματα; Vulg. *enigma, problema, propositio*) is closely related in the OT to the PROVERB (לֵצִי), which for the most part is represented in the LXX by παραβολή—PARABOLE. It has been suggested, indeed (Oort in Cheyne's *Job and Solomon*, p. 127), that some of the proverbs were originally current among the people as riddles, such as 'What is worse than meeting a bear? Meeting a fool in his folly' (Pr 17¹²); 'What is sweet at first, and then like gravel in the mouth? Bread of falsehood' (Pr 20¹⁷). Like the proverb or the parable or the allegory, the riddle served a more serious and didactic purpose than we usually associate with the word. The didactic usage is found throughout the whole of the OT. It is seen in Nu 12³, where Jehovah chides Aaron and Miriam for their opposition to Moses, and says to the honour of the great Lawgiver, 'Mouth to mouth speak I to him, plainly and not in riddles' (מִתְּחִילָה). In Ps 49⁴ the Psalmist says, 'I will incline mine ear to a parable (לֵצִי): I will propound my riddle (רִידָה) upon the harp,' and the subject of the psalm—the transitoriness of godless prosperity and the blessedness of a hope in God—justifies his application of the words. In Ps 78² the same didactic purpose is manifest. The Psalmist proposes to set forth the early history of Israel in parable and riddle for the instruction of his own age and time: 'I will open my mouth in a parable (לֵצִי): I will utter riddles (רִידָה) from the olden time.' This parabolic use of the history of Israel by the Psalmist is taken by the evangelist (Mt 13^{34, 35}) as justifying the employment of parables by Jesus to set forth the kingdom of heaven: 'All these things spake Jesus in parables to the multitudes, that the word might be fulfilled which was spoken by the prophet saying, "I will open my mouth in parables: I will declare things hidden from the foundation of the world," which last words are a variation from the LXX "riddles from the beginning" (προβλήματα ἀπ' ἀρχῆς). This didactic purpose attributed to the riddle is well illustrated in Pr 1⁶ by its association with words of like purport: 'To understand a parable (לֵצִי), and an obscure saying (רִידָה), the sayings (מִדְּבָרִים) of the wise and their riddles (רִידָה).' In the Wisdom books of the Apocrypha it is perhaps natural to find examples of the didactic usage. In Wis 8⁸ it is said in praise of Wisdom: 'She understandeth subtleties of speeches and interpretations of riddles' (στροφὰς λόγων καὶ λύσεις αἰνυμάτων); in Sir 39² it is said of the man who meditates in the law of the Most High, 'He will keep the discourse of the men of renown, and will enter in amid the subtleties of parables (ἐν στροφαῖς παραβολῶν). He will seek out the hidden meaning of proverbs (ἀποκρυφα παροιμιῶν), and be conversant in the riddles of parables' (ἐν αἰνύμασι παραβολῶν), these last words being inverted in 47¹⁸, where Solomon is apostrophized as filling the earth with 'parables of riddles' (ἐν παραβολαῖς αἰνυμάτων). The association of the riddle with the parable is found in Ezk 17², where the prophet is commanded 'to put forth a riddle (רִידָה רח), and utter a parable' (לֵצִי לֵצִי, LXX παραβολήν),—the saying being called a riddle because it requires interpretation, and a parable because of the comparison it contains of the kings of Babylon and Egypt to two great eagles, and of their treatment of Israel to the cropping of the cedar of Lebanon. There are still two occurrences of the word 'riddle' in the Prophets, where it is not so easy to say whether the didactic or the more special usage is exemplified.

In Dn 8²² the king of fierce countenance that is to arise, by whom Antiochus Epiphanes is meant, is credited with the gift of 'understanding riddles' (קִיבֵּן חִידוֹת); and in Hab 2⁶ the prophet, speaking of the proud and ambitious man who seeks to make nations and peoples his own, asks, 'Shall not all these take up a parable (פָּרָבָה), and an obscure saying (סִלְיָה), riddles (חִידוֹת), against him?'

The riddle in the more special sense of a puzzle to sharpen the wits, or a paradoxical question to stimulate interest, is found in the OT, and bulks largely in the Talmud and later Jewish literature. With riddles the Jews have been wont from an early period in their history to display their intellectual ingenuity, or test the wisdom of the learned, or entertain festive occasions and hours of leisure. Deutsch (*Literary Remains*, p. 47), speaking of the Haggadah of the Talmud, refers to the *Pilgrim's Progress*, and says that Bunyan in his account of his own book unknowingly describes the Haggadah as accurately as can be—

'Would'st thou divert thyself from melancholy?
Would'st thou be pleasant, yet be far from folly?
Would'st thou read riddles and their explanation?
Or else be drowned in contemplation?
O then come hither
And lay this book, thy head and heart together.'

The riddle is not, however, confined to Jewish literature. The riddle of the Sphinx is familiar from classical antiquity. It was a riddle that Tarquin the Proud acted when by striking off with a staff the heads of the tallest poppies in his garden he gave Sextus the hint to put out of the way the chief citizens of captured Gabii. The riddle as an amusement at feasts and on convivial occasions among the Greeks and Romans is mentioned in the pages of Athenæus and Aulus Gellius. (See Bochart, *Hierozoicon*, iii. 384).

It was at his wedding feast that Samson proposed the terms of his famous riddle (Jg 14). He gave his Philistine friends seven days to find it out, promising if they should be successful thirty fine linen wrappers and thirty gala dresses (v. 12; Moore's *Commentary*, p. 335), and requiring from them the same if they should be unsuccessful. They accepted the terms, and Samson propounded his riddle—'Out of the eater came something to eat, and out of the strong came something sweet?' How far a riddle was fair, the solution of which required a knowledge of incidents so special as Samson's encounter with the lion and its sequel, need not be discussed. Their deceit and the treachery of his wife put the Philistines in possession of the secret. 'What,' they asked, 'is sweeter than honey, and what is stronger than a lion?' At once he saw he had been duped, and in a satirical vein he exclaimed, employing still the language of riddles: 'If ye had not ploughed with my heifer, ye had not found out my riddle.'

Solomon with his high repute for wisdom in other things is credited also with skill in the solution of riddles. The Queen of Sheba on her visit to Jerusalem proved him with riddles (1 K 10¹ = 2 Ch 9¹). And Solomon 'told her all her questions, there was not anything hid from the king which he told her not' (1 K 10² = 2 Ch 9²). Josephus tells a similar tale of Hiram king of Tyre. Solomon and Hiram were on the most friendly terms. 'What cemented the friendship between them,' says Jos. (*Ant.* viii. v. 3), 'was the passion both had for wisdom; for they sent riddles (ἀποβήματα) to one another, with a desire to have them solved; and in these Solomon was superior to Hiram, as he was wiser in all other respects.' In another passage of his writings the Jewish historian (*c. Apion.* i. 18. 17), records the testimony of Diodorus the historian of the Phœnicians, who says

that Solomon when he was king at Jerusalem sent riddles (ἀποβήματα) for Hiram to guess, and desired that he would send others back for him to find out, the condition being that he who failed should pay a fine to him who was successful. And as Hiram was unsuccessful, he had a large amount to pay. At length he found a man of Tyre, Abdemon by name, who was able to guess the riddles proposed by Solomon, and himself propounded others which Solomon could not solve, thus recovering for his sovereign the money he had lost. None of these riddles have survived, and therefore we have no means of estimating their character as hard questions.

There are to be found, however, in the Proverbs bearing the name of Solomon, sayings that appear to be of the nature of riddles. The riddle of the insatiable things is one of these (Pr 30^{13, 16}). 'The horse-leech (but see art. HORSE-LEECH) hath two daughters, crying, Give, give. There are three things that are never satisfied, yea, four things say not, It is enough.' What are these? And the answer is, 'The grave, and the barren womb, the earth that is not filled with water, and the fire that saith not, It is enough.' This is followed by the riddles of the four mysterious things (Pr 30¹⁸⁻²⁰), of the four intolerable things (Pr 30²¹⁻²³), of the four little wise things (30²⁴⁻²⁸), and of the four stately things (30²⁹⁻³¹). Riddle and interpretation alike exhibit precise observation of nature, and convey at the same time moral instruction.

To the riddles of the OT fall, perhaps, to be added the words of the mysterious writing on the wall on the night of Belshazzar's feast (Dn 5²⁵⁻²⁸), MENE, MENE, TEKEL, UPHARSIN (which see). The inscription is to be read according to recent authorities, 'A mina, a mina, a shekel and half minas.' Vv. 26-28, says Bevan (*The Book of Daniel*, p. 106), are plays upon the words of the inscription; in v. 28 the play is a double one. 'Mina—God hath numbered thy kingdom and finished it. Shekel—thou hast been weighed in the balance and hast been found wanting. Half mina—thy kingdom hath been divided and given to the Medes and Persians.'

The parable is one of the unique features of the teaching of Christ (ἀπαβολή in the Synoptists; ἀποβολή in St. John), but the riddle, except in so far as the evangelist Matthew justifies instruction by parables with a reference to Ps 78³, is not expressly mentioned. Only once in the NT is the riddle expressly named, and in that instance (1 Co 13¹³) the mention of it is obscured in EV. The meaning is—'Now we see through a glass, in a riddle' (ἐν ἀβύπτῳ), in contrast to the direct vision of spiritual realities, 'face to face.' In the Revelation of St. John there is a riddle which remains an enigma in spite of all attempts to solve it: 'He that hath understanding let him count the number of the beast; for it is the number of a man, and his number is six hundred and sixty and six.' Following the method known among the Jews as *Gematria*, by which a number is obtained from the numerical values of the letters of a name, it has been found that the Hebrew transliteration of *Neron Cesar* yields a total of 666. Although adopted by many modern interpreters, this solution of the riddle has not attained general acceptance any more than others which have been proposed from a much earlier time (see Bengel, *Gnomon*, p. 1095 ff.; Milligan, *Baird Lectures on The Revelation of St. John*, p. 321 ff., and art. REVELATION [BOOK OF] above, p. 258). In the Talmud and Rabbinical literature there is no lack of riddles. In fact the Jews exhibit a *curiosa felicitas* in this department which is unique. 'A large number of famous sayings,' says Abrahams

(*Jewish Life in the Middle Ages*, pp. 386, 387), 'are put in the form of riddles. Who is mighty? Who is a fool? Who is happy? A whole class of popular phrases in the Talmud and Midrash are nothing more nor less than folk-riddles, the chief exponents being women and children; but distinguished Rabbis also utilized this language of wisdom. Ethical works of the Middle Ages abound in philosophical riddles. Riddles found their way into the prayer-book for the Passover Eve. It goes without saying, therefore, that many Hebrew riddles of the Middle Ages were serious intellectual exercises.' To keep up attention and to stimulate interest while the intricate subtleties of the law are being expounded, such an assertion as this would be announced—'There was a woman in Egypt who brought forth at one birth "six hundred thousand men."' The interpretation follows: the woman was Jochebed, the mother of Moses, who was himself equal to the whole armed host of Israel who came out of Egypt. Talmudic lore records a story of Rabbi Jehuda, sage and saint, akin to that related of Tarquin the Proud. The emperor Antoninus Pius sent him a message to say the imperial exchequer was empty: how could it be replenished? The Rabbi took the messenger into the garden and tore up the big radishes and planted young ones in their place. He did the same with the turnips and the lettuces. The emperor understood the hint; he dismissed the old officials and put new in their place. Many of the riddles that thus delighted the Jewish fancy seem trivial enough. For example: 'The fish is roasted with his brother, is placed in his father, is eaten with his son, and thereafter is helped down with his father,' where his 'brother' is the salt which comes like himself from the sea, his 'father' is the water from which he is taken, and his 'son' the sauce in which he is served! Riddles whose solution depends upon the numerical values of the Hebrew letters are common. 'Take 30 from 30 and the remainder is 60.' The explanation is that 30=ל: remove ל, whose numerical value is 30, and the remainder is ו=60. The letters of the Hebrew alphabet have also a lingual meaning, and a good example of a riddle whose solution depends upon such a meaning is the following: 'There was a she-mule in my house: I opened the door and she became a heifer.' To be solved thus: From the Hebrew for 'she-mule' take away the letter ר (Daleth=door) and there remains קר 'heifer.'

Plays upon words scarcely come under the scope of this article. They are found most abundantly in the Prophets and in the rhetorical passages of Job, but they occur also with considerable frequency in the Proverbs, and they are to be met with, though rarely, in the Psalms. In those plays upon proper names which are found in the etymological explanations of the name of the law-giver of Israel (Ex 2¹⁰; cf. Jos. c. *Apion*. i. 31), of the name of Samuel (1 S 1²⁰), and many more, the Talmud is said to be especially rich. (Upon 'Paronomasia in the OT,' see Casanowicz, *JBL* (1891), pp. 105-167).

LITERATURE.—For the usage of the Hebrew word רִידִיקוּלוֹס see *Oxf. Heb. Lex. s.v.*: Delitzsch, *Zur Geschichte der Jüdischen Poesie*; Cheyne, *Job and Solomon*; Toy, *Proverbs*. On Biblical and Talmudic riddles—Hamburger's *RE*; Löw, *Die Lebensalter*; Abrahams, *Jewish Life in the Middle Ages*; Wünsche, *Die Räthselweisheit bei den Hebräern*. T. NICOL.

RIDICULOUS.—Only Sir 34¹⁸ 'He that sacrificeth of a thing wrongfully gotten, his offering is ridiculous.' The meaning is active, *derisive, mocking* (Gr. *προσφορά μεμωκημένη*, RV 'his offering is made in mockery'). Cf. Shaks. *Love's Labour's Lost*, iii. 78, 'The heaving of my lungs provokes me to ridiculous smiling.'

RIGHTEOUSNESS IN OT.—The idea of Righteousness is one of the most complex and difficult of the ruling ideas of the OT. The subject may be introduced by one or two statements of a general nature. (1) Righteousness in the OT is strictly a personal attribute. There are a few instances where the word is used of things, but these are undoubtedly secondary (see below, p. 274*). So also are the cases where it is applied to a social aggregate like the people of Israel; these arise either through personification of the community, or through the virtues of representative individuals being conceived as leavening the mass. (2) The personal relations indicated by the term are of three kinds: forensic, ethical, and religious. Righteousness, e.g., may denote (a) a forensic right, as when Judah says of Tamar, 'she has been in the right against me' (Gn 38²⁶); or (b) a moral state, as Gn 6⁹ 'Noah was a righteous, blameless man in his generation'; or (c) a direct relation between man and God, as in Gn 15⁶ 'Abraham believed J', and he counted it to him for righteousness'. But under each of these heads the notion breaks up into a great variety of distinct applications, while the figurative extensions of (a) into the spheres of (b) and (c) create subtle distinctions which at times defy classification. (3) It may be remarked that the history of the idea in the OT exhibits a development in almost exactly the opposite direction to that observed in the case of Holiness. Holiness (which see) is primarily a religious term, which gradually acquires ethical content under the influence of the revelation of God as a Being of perfect moral purity. Righteousness, on the contrary, belongs in the first instance to the region of moral ideas, and becomes a technical term of religion by a process whose outlines can be traced in the OT.—It will be convenient in the present art. to treat the subject under three main divisions, corresponding broadly to three stages in this development; viz. (i.) The meanings of Righteousness in ordinary popular speech; (ii.) the conception of Righteousness in the pre-exilic prophets (Amos to Jeremiah); and (iii.) the theological developments of the idea, chiefly in exilic and post-exilic writings.

The Hebrew words expressing the idea of Righteousness are the following derivatives of the root צדק:—

1. The adj. צָדִיק; LXX *δικαιος*, etc.; EV 'righteous,' more rarely 'just,' etc.

2. The abstract nouns צִדְקָה and צִדְקָה, which appear to be practically interchangeable; LXX *δικαιοσύνη*, etc.; EV 'righteousness,' more rarely 'justice,' etc.

[The Aram. צִדְקָה appears in Dn 4³¹.]

The verbal forms are much less frequently used, viz.:—

3. The Qal צָדַק (22 times in MT); LXX *δικαιοῦν* *ἐναι*, *δικαιοῦν* (pass.), etc.; EV 'be righteous,' 'be justified,' 'be just,' etc.

4. The Hiphil צִדְקֶה (12 times, always in a declarative sense except Is 53¹¹, Dn 12²³); LXX *δικαιοῦν*, etc.; EV 'justify,' etc.

5. The Piel צָדַק (5 times, with the sense 'make out to be in the right,' or 'make to appear in the right'); LXX *δικαιοῦν*, etc.; EV 'justify.'

6. The Hithpael (refl.) צִדְקָה (Gn 44¹⁸); LXX *δικαιοῦν* (pass.); EV 'clear ourselves.'

7. The Niphal צָדַק (Dn 8¹⁴, of the Temple); LXX *καθαρίζω* (pass.); EV 'be cleansed.'

The Greek and English terms given above represent only the prevalent usage of LXX and EV respectively. With regard to the latter, it may be said that the words 'righteous' and 'righteousness' cover approximately the uses of צדק in the OT. Out of some 520 instances where the Heb. root appears, about 400 are rendered in AV by 'righteous,' 'righteousness,' or 'righteously.' In over 100 cases 'just,' 'justice,' 'justly' are employed, sometimes appropriately enough, but at other times quite arbitrarily (cf. e.g. Gn 6⁹ with 7¹, or Am 2⁶ with 5¹²). There are, besides, a few miscellaneous renderings, which it would serve no useful purpose to tabulate. On the other side, 'righteous' stands for צָדִיק ('upright') in Nu 23¹⁰, Job 47 237, Ps 107⁴², Pr 2³ 332 14⁹ 15¹⁹ 23¹⁰ (similarly the adv. Ps 67⁴ 96¹⁰). RV has rectified some of those anomalies: for instance, except in Nu 23¹⁰, 'righteous,' etc., never are used except for some form of צדק. The usage of the LXX is marked by somewhat greater diversity, as was to be expected from the variety of

circumstances in which the different books were translated. In the great majority of cases, however, the Heb. terms are represented by *δικαιοσύνη* and the cognate words, although other renderings are frequent, as *ἀνυστατος*, *καθαρὰ*, *εὐστα*, *ἀνυστα*, *ἐπίστα*, *ἐπιστάτης* (the last two are instructive). And, conversely, *δικαιοσύνη*, etc., are used for such words as *נָקִי*, 'innocent', *חַסְדִּים*, 'kindness', *אֱמֶת*, 'truth', 'fidelity', *מִשְׁפָּט*, 'judicial decision', 'judgment', etc. A certain freedom of translation is, no doubt, permissible in view of the extreme versatility of the Heb. notion, and its association with numerous parallels; and these Heb. synonyms have naturally to be taken into account in forming conclusions regarding the OT idea of righteousness. Cf. Hatch, *Essays in Bibl. Gr.* 49.

1. **RIGHTEOUSNESS IN COMMON LIFE.**—In the earliest historical literature—the documents J and E of the Hex., and the oldest sources of the Bks. of Samuel and Kings—the words for 'righteousness' occur, not very frequently, but in connexions which convey a pretty complete idea of what they meant in everyday life. Here the most prominent aspect of the notion is the *forensic*, although this by no means excludes an ethical and religious reference. In early Israel, law, morality, and religion were closely identified, all three resting largely on traditional custom or being embodied in it. Morality consisted in conformity to the conventional usages of the society to which a man belonged (Gn 26⁷, 2 S 13¹² etc.); the administration of justice was the enforcement in individual cases of the acknowledged rules of social order: and, again, these rules were invested with religious sanctions as expressing the will of J'. Thus a man's legal rights were a measure of the morality of his conduct, and at the same time all rights existing between men were also rights before J'. When it is said that the forensic element preponderates, what is meant is that questions of right and wrong were habitually regarded from a legal point of view as matters to be settled by a judge, and that this point of view is emphasized in the words derived from *קָרָא*. This, indeed, is characteristic of the Heb. conception of righteousness in all its developments: whether it be a moral quality or a religious status, it is apt to be looked on as in itself controvertible and incomplete until it has been confirmed by what is equivalent to a judicial sentence. Now, within the forensic sphere we can distinguish three aspects of righteousness which are of fundamental importance for the subsequent history of the idea; and these may be illustrated from almost any period of the language.

(1) Righteousness means, in the first instance, being in the right in a particular case. Of the two parties in a controversy, the one who has the right on his side is designated as *קָרָא*, and the one in the wrong as *קָרָא*: Dt 25¹ 'If there be a quarrel between men, and they bring it to the judgment-seat, and (the judges) judge them, they shall justify the *קָרָא* and condemn the *קָרָא*'; cf. 16¹⁹, Ex 23⁷, Is 5²³ 26²¹, Pr 17¹⁵ 18⁵, 17 24²⁴ etc. Similarly, a person accused or suspected of wrongdoing is *קָרָא* if he is innocent and *קָרָא* if guilty (Gn 20⁴, 2 S 4¹¹, 2 K 10⁹, Pr 17²⁸). It makes, of course, no difference whether the case is actually submitted to a judge or not; all questions of right and wrong are conceived as capable ideally of being so settled, and the intrinsic merits of the dispute are described by the same terms; see Ex 9⁷ ('J' is in the right, and I and my people are in the wrong'); 1 S 24¹⁷, 1 K 8²³ (cf. Ex 23³). Thus *קָרָא* (קָרָא) in this sense appears to be later) denotes the right or innocence of an incriminated person, his claim to justification, the validity of his plea (2 S 19²³ 26²², Neh 2²⁰).^{*} In these cases righteousness is an inherent quality, not depending on the decision of the judge, but at the most demanding

^{*} The fem. of the adj. *קָרָא* is nowhere used; in the only instance where the right of a woman is concerned the simple verb is employed; Gn 39²⁰ (*קָרָא* קָרָא).

recognition by him. And although the conception is essentially forensic, it is obviously one to which ethical ideas readily attach themselves. Righteousness comes to mean *unimpeachable moral conduct* (Gn 30³²—a difficult case); and in this sense it may be predicated of a man's whole life, the righteous man being one who is blameless before an ideal tribunal; see 1 K 2³² 3⁶, Gn 7¹, 6⁹ (P) 18²², Dt 9⁴, La 4¹³ etc. In this application a religious reference is probably always included, the ideal tribunal being that of God.

Legal phraseology is naturally transferred to the case of mere debate: Job 41³ 33¹²; here to 'justify' means virtually to admit the force of one's arguments (27⁵). With this may be connected the use of the words to express correctness in prediction (Is 41²⁶), or truthfulness in speech (Is 45¹⁹ 23 63¹, Ps 52⁸, Pr 8⁸ 12⁷ 16¹³); although other explanations are here possible (see below, p. 274).

(2) Righteousness, however, has a second sense, which is purely forensic; it means the *legal status* established by a public judgment in one's favour: Is 5²³ 'take away the righteousness of the righteous from him' (cf. 10²). Examples of this kind are rare in allusions to secular jurisprudence; but the distinction plays a very important part, as we shall see, where forensic analogies are transferred to men's standing before God; and it could hardly be drawn so clearly there unless it had some basis in ordinary judicial administration.*

(3) Lastly, righteousness is the quality expected of the judge in the exercise of his office. His fundamental duty is to 'justify' (*קָרָא* = 'declare in the right') him who is in the right, and to condemn (*קָרָא*) him who is in the wrong (Dt 25¹, 2 S 15⁴ etc.); and, if the circumstances require it, to inflict punishment on the wrong-doer (Dt 25²; cf. 2 S 12⁹ etc.). In this he is said to manifest *קָרָא* (Dt 1¹⁶ 16¹⁸, 20, Lv 19¹⁵, Is 11⁴ 16³), or in a common phrase to execute *קָרָא* *קָרָא*.† The temptations to which a judge was mainly exposed being bribery and 'respect of persons,' his righteousness consists essentially in his rising superior to such influences and deciding each case with absolute impartiality on its merits. Stress, however, is naturally laid on the duty of redressing the wrongs of the poor and defenceless; hence judicial righteousness is frequently equivalent to deliverance or protection. This idea lies, indeed, in the verb *קָרָא* itself, which means not only to judge, but also to vindicate or defend (1 S 24¹⁵, Is 1¹⁷ etc.).

The forensic sense of righteousness illustrated above appears to be fundamental in Heb., and goes back to a remote period in Semitic antiquity. It is found in a phrase closely corresponding to OT usage in one of the Tel el-Amarna tablets (15th or 14th cent. a.c.), where Abdiheba of Jerusalem says, *sa-du-uk ana ia-a-ki aš-hum amiluti Ka-ki* = 'I am innocent with respect to the Kashi' (KIB v. 306 f.). That a similar usage prevailed in Aramaic and Phœnician is shown by the inscriptions in both languages (see Lidzbarski, *Handbuch der nordsem. Epigraphik*, p. 357). The forensic conception of righteousness appears, therefore, to be characteristic of the northern group of Semitic dialects. In Arabic, on the other hand, the root has no forensic

* It may here be pointed out that it is doubtful if the adj. *קָרָא* bears this sense of outward justification even in the religious sphere (Kautzsch). It seems confined to the inherent character on which a legal right is based, but not to include the status which results from a vindication of that right. In other words, it is used of the godly as *entitled* to Divine justification, but not as *actually justified*. Kautzsch thinks there are exceptions in Is 40-66 and 24-27; but that is not quite clear. Zec 9⁹ would be a case in point if the meaning is to be determined by the following epithet *קָרָא* ('vindicated and victorious'; G. A. Smith, *Twelve Prophets*, ii. 466). On some doubtful cases in the Psalms, see below, p. 278.

† This expression was probably used originally of judicial action (2 S 8¹⁵, Jer 22¹⁵ 23⁵, Ezk 45⁹), but was extended to moral conduct in general (Gn 18¹⁹, Ezk 15⁵, 18²¹, and very often). In Dt 1¹⁶ etc. (above) *קָרָא* is partly the personal virtue of the judge, partly the objective right which is the result of his just action; the word appears first in Hosea and Isaiah. It is possible that this judicial sense of righteousness (3) is less primitive than that described under (1). At least the cases are few where the adj. is applied to a human judge (though often to God as the Supreme Judge of men). 2 S 23³ is a clear example; on Zec 9⁹ see the last note; other possible cases are Jer 23⁵, Ezk 23⁴⁰.

associations. The verb *sadaqa* means to speak the truth; *saddaka*, to attribute truth to a speaker, to accept or homologate his statement; *saddik* is one who is habitually veracious, and *sadik* a true or sincere friend. All these uses embody the ethical idea of *trustworthiness* or genuineness; and a reflexion of this moral sense is probably to be recognized in some peculiar subsidiary applications, as when the verb is employed of eyes and ears that faithfully perform their functions, or of earnestness or steadiness in battle 'as opposed to a false show of bravery,' or of the desperate running of a hunted animal (see Lane, *Lexicon*). *Saddak*, the marriage gift from husband to wife, was originally a pledge of friendship; and even the much discussed *rumk sadk* possibly means a *trusty lance*, and not a straight or, sound or hard lance (Wellhausen, *GGN*, 1893, p. 434), though Noldeke considers that in this case the meaning 'straight' is certain (*Fünf Mollagat*, 2, p. 40).

It has commonly been held that the varied senses of righteousness can be reduced to the single idea of 'conformity to a norm,' resting ultimately on the physical analogy of *straightness*. But the notion of 'conformity to a norm' could hardly be primitive; and, even if all the uses of *ṣḏq* could be brought under it, it would not thereby be proved to be fundamental, since all legal and ethical terms necessarily imply a reference to a norm. It is indeed very doubtful if *straightness* be the concept originally expressed by the root. Certainly, nothing of the kind can be inferred from the cases in the OT where the word is used of material objects. *Just balances, weights*, etc. (Lv 19:35, Dt 25:18, Job 31:6, Ezk 45:10), are simply such balances, etc., as justice demands (cf. Am 5:6), just as *sacrifices of righteousness* (Dt 33:19, Ps 40:5:19) are sacrifices rightly offered. The phrases *paths of righteousness* (Ps 23:3) and *gates of righteousness* (119:15) are so obviously figurative that they do not fall to be considered here at all. The evidence from Arabic is equally inconclusive. Here the discussion has turned largely on the use of *sadk* as an epithet of the lance (see above). It happens, however, to be applied in particular to the *knots* of the lance reed (cf. *sadk 'ul-ku'ub*, Muall. Antara, 48), where, if the word describes any physical quality at all, it must be *hardness*; unless, indeed, *ka b* be understood as a section of the reed between two knots (Noldeke, *ib.*). On the whole, perhaps, the idea of hardness best accounts for the higher developments of the idea both in Arabic and Hebrew. The transition from hardness to trustworthiness is easy and natural, while the same analogy in the legal sphere might denote unimpeachableness of conduct on the part of a suitor, or steadfastness of character on the part of the judge. But these speculations are of little account; the meanings of righteousness in OT have to be ascertained from usage, and the fundamental usages appear to be those stated in the preceding paragraphs.

ii. RIGHTEOUSNESS IN THE PROPHETS.—Although the prophets were the great champions and exponents of righteousness in Israel, it is not easy to say precisely in what respect their teaching marks an advance on the current notions examined in the last section. In their use of terms they adhere closely to the common forms of speech: the *ṣḏq* is still the man whose cause is just, and *ṣḏq* and *ṣḏq* continue to be used of forensic right or judicial rectitude. Nevertheless it is clear that the whole idea is elevated to a higher plane in the teaching of the prophets, and acquires a significance at once more ethical and more universal. The difference of standpoint is partly to be explained by the state of things which the prophets saw around them. By the 8th cent. the old consuetudinary morality had broken down under the pressure of far-reaching economic changes which had affected disastrously the life of the people. Large numbers of Israelites had been dispossessed of their holdings, and in consequence deprived of their civil and religious rights; the poor were defrauded and ground down by the rich, and even the forms of law had been turned into a powerful engine of oppression. In face of a situation like this, it is evident that the prophetic ideal of righteousness must rest on deeper foundations than mere use and wont. It rests, in fact, on the ethical character of J'. What is distinctive of the prophets is the conviction that social righteousness is the necessary and inexorable demand of J''s moral nature. So intense is this conviction that the idea of abstract right seems to stand out before their minds as an objective reality, a power that may be resisted but can never be defeated. 'Never before,' says Wellhausen, 'had this been proclaimed with such tremendous emphasis. Morality is that through which alone all things subsist, the sole reality in the world. It is no postulate, no idea, it is at once necessity and fact,—the most living,

personal energy,—Jahwe, the God of Forces.'* This is most clearly to be seen in Amos, the father of written prophecy; but all the prophets move on the lines laid down by him, and mean by righteousness substantially what he means, although they may not give it the same central position which it occupies in his book. It may suffice to note the following points. (1) The prophets are concerned in the first instance with that exercise of righteousness on which the well-being of the community most depends, *the public administration of justice*. Amos demands that right (*ṣḏq*) be set up in the gate (5:15); that right roll down like waters, and righteousness like a perennial stream (5:24); and complains bitterly of those who turn righteousness to wormwood, i.e. turn the fount of justice into a source of wrong and misery (5:7, 6:12). Isaiah and Micah hurl their invectives against the ruling classes for their perversion of justice and legalized plunder of the poor (Is 1:17, 3:14, 5:23, 10:1, Mic 2:1, 3:1-2, 3:1), and Jeremiah denounces the rapacity and misgovernment of the kings (22:13, 15, 23:1; cf. Ezk 34:36). Cf. further, Hos 10:12, Is 1:21, 57, Jer 22:3 etc. A well-governed State, repressing all wrong and violence, and securing to the meanest his rights as a member of J''s kingdom, is the embodiment of the prophetic ideal of righteousness. At the same time, the spirit which ought to preside at the seat of judgment is conceived as a principle pervading the whole life of the nation, and regulating the relations of its different members and classes. Civic righteousness is perhaps more a function of the community, a sound and normal condition of the body politic, than a rule of individual conduct; although the latter is, of course, included (Hos 10:12, Jer 42). (2) In their conception of what constitutes righteousness, the prophets are not dependent on a written code,† and still less on the technicalities of legal procedure. Their appeal is to the moral sense, the instinctive perception of what is due to others, the recognition of the inherent rights of human personality. The idea is far broader than what we usually mean by right or justice; it includes a large-hearted construction of the claims of humanity; it is, as has been said, the humanitarian virtue *par excellence*.‡ And this is true not only in private relations, but also in the sphere of judicial action. The righteousness of the judge appears pre-eminently in his vindication of the widow, the orphan, and the stranger, the oppressed and defenceless classes generally (Is 1:17 etc.). In Amos the *ṣḏq* is always the poor man, with no influence at his back, who must therefore look to the judge to maintain his rights. This feature might be considered accidental, arising from the injustice to which the poor were subjected at that time. But it is important, nevertheless, as exhibiting an aspect of the Heb. idea of judicial righteousness which is apt to be overlooked by us. It denotes not merely the neutral impartial attitude of mind which decides fairly between rival interests, but a positive energy on the side of right, a readiness to protect and succour those who have no help in themselves. (3) Righteousness in this ethical sense is not only rooted in the moral instincts of human nature, but is a reflexion of the character of J'. It is what He requires of men, what He has looked for in vain from Israel (Is 5:7), that in which He delights, which He seeks to produce on earth (Jer 9:24). The inflexibility of this Divine demand for social righteousness is one of the most impressive things in prophecy. Ritual service is as nothing in J''s sight; He despises and hates

* Jer. u. jüd. Gesch. 3:100.

† The idea of righteousness as obedience to the written law of God, which bulks so largely in the later writings, appears in Dt 6:10; cf. 24:13, Zeph 2:3.

‡ Cf. the combination of *ṣḏq* with *ḥesed* ('kindness') in Hos 10:12, Jer 9:24.

it when offered by men of immoral life. But the claims of righteousness are absolute, and the nation that will not yield to them, though it be the chosen people of Israel itself, must perish. Further, this righteousness, being based at once on the nature of man and the nature of God, is universal in its range. It has its witness in the human conscience everywhere (Am 3⁹), and determines the destiny of other nations as well as of Israel (1⁸ 2⁹ etc.). It is, in short, the moral order of the universe, and the supreme law of J's operations in history. (4) As the lack of righteousness is the cause of Israel's destruction, so the presence of it is a constant feature of the Messianic salvation to which the prophets look forward. 'A king shall reign in righteousness, and princes decree justice' (Is 32¹⁶). The Messiah's kingdom shall be established in righteousness (9⁷), and He shall judge the poor in righteousness (11⁴ 5), etc. Cf. Jer 22¹⁶ 23⁵ 33¹⁸, Hos 2²¹ (?), Is 1²⁶ 32¹⁶ 33⁵ etc. (5) Righteousness as a personal attribute of J is not named by the prophets so frequently as one might expect. The adj. *ṣḏq* is not used in this sense till a comparatively late period (Zeph 3⁹, Jer 12¹). Amos never mentions the righteousness of J, though the image of the plumb-line in 7⁷ 8 shows that the conception was in his mind (cf. Is 28¹⁷). Isaiah speaks of a judgment 'overflowing with righteousness' (10²²), and of the Holy God as 'sanctifying himself by righteousness' (5¹⁶), i.e. showing Himself to be God through the exercise of judicial righteousness. The idea is common to all the prophets. From the special circumstances in which their work was carried on, they dwell chiefly (if not exclusively) on the *punitive* side of the Divine righteousness, the side which it presents to the guilt of Israel (Hos 6⁶ 10⁴, Hab 1¹²). Righteousness, in short, is here equivalent to *retribution*, although retribution is not regarded as an end in itself, but only as a step in the carrying out of a redemptive purpose.

These appear to be the chief features of the idea of righteousness which is characteristic of the pre-exilic prophets. It is not yet to be called strictly a religious conception, inasmuch as its human side consists of moral qualities displayed by men in their relations to one another, and the righteousness of men before God is an idea hardly represented in the prophets. But it makes the religious development possible, and some anticipations of that development in the prophetic writings will have to be considered under the next head.

iii. RIGHTEOUSNESS IN THE SPHERE OF RELIGION.—We come now to consider the different forms assumed by the idea of righteousness as expressing relations existing immediately between God and man. These are based on the monotheistic principle, interpreted by the help of the forensic categories described above (under i.). J is the supreme Ruler and Judge of the universe, and His judgments are seen in history or providence. But the ordinary course of providence could not always be accepted as the final expression of the mind of the Judge; it is usually in some great crisis, some decisive interposition of J felt to be impending, that the ultimate verdict is looked for. Meanwhile nations and men are on their trial, they are severally in the right or in the wrong before God, and in the final day of reckoning the issues will be made clear, and the justice of the Divine government fully vindicated. Although all the elements of this conception are present in pre-exilic prophecy, the special applications of it now to be dealt with belong mostly to a later period, and are the result of certain currents of thought which come to the surface in the age of

the Exile. There are three things to be looked at: the righteousness of Israel; the righteousness of the individual; and the righteousness of God.

1. THE RIGHTEOUSNESS OF ISRAEL.—The question of Israel's right against other nations is one little considered by the earlier prophets. It was doubtless a factor in the popular religion, revealing itself in that eager longing for the day of J which Amos rebukes (5¹⁸). From that point of view it was a matter of course that J should maintain the cause and right of His people, and moral considerations hardly entered into the feeling. The prophets, on the other hand, were too much concerned to impress on Israel a sense of its utter unrighteousness before God to pay much heed to the violation of right involved in its subjection to nations morally worse than itself. In the 7th cent., however, partly as a consequence of the Deuteronomic reformation, the idea of a righteous Israel begins to exert an influence on prophetic thought (cf. Dt 6²⁰). The first prophet to treat the matter expressly from this point of view is Habakkuk (the idea is latent in Nahum), who uses the technical terms *ṣḏq* and *ṣḏq* to designate Israel and its heathen oppressors respectively (1¹³; cf. 2⁴: see the Comm.), and appeals to J to redress the wrongs suffered by His people. But it was the Exile that brought the question to the front in the prophetic interpretation of history. The Divine sentence had gone forth confirming the moral verdict of the prophets on the nation's past, and the more spiritual part of the people acknowledged the just judgment of God in what had befallen them (La 1¹⁸). But there still remained the promise of a glorious future, in which the righteousness of J would be displayed not less than in the judgment now past. Israel, therefore, has a right which, though obscured for the present, is recognized by J, and will be vindicated by Him in due time. Wherein does this righteousness of Israel consist?

Deutero-Isaiah.—The answer to this question is given by the writer of Is 40-55 in a manner which went far to fix the sense of righteousness for all subsequent theology. The prophet looks to his people's restoration from exile as a final disclosure of the righteousness both of Israel and of J, and an event fraught with the most blessed consequences for humanity. That Israel has been, and is, in the wrong before God is explicitly acknowledged in the ironical challenge of 43²⁸ ('that thou mayest be in the right'), and is implied in many passages besides. But its sin has been forgiven, the punishment endured has been adequate (40²), and, in spite of the unpreparedness of the people, J brings near His salvation (46¹³ 51⁵ 52¹⁰); the hidden right of Israel, which exists amidst all its unworthiness and shortcoming, is about to be made manifest. And here, in accordance with forensic usage, the idea of righteousness is resolved into two perfectly distinct conceptions. On the one hand it denotes the inherent right of Israel's cause at the bar of the Divine judgment (as in i. (1)); and on the other hand the external vindication of that right through a judicial intervention of J (i. (2)). In the latter sense righteousness means justification (54¹⁴ 17 45²⁴), and is practically equivalent to salvation, the deliverance of the people being regarded as the execution of a Divine sentence in its favour.* The idea of the inherent righteousness of Israel, however, is more difficult, and several elements appear to enter into it. (a) Israel is in the right, first of all, as having suffered wrong at the hands of the world-power. The triumph of Babylon has been the triumph of brute

* In 41², where it is said of Cyrus that 'right meets him at every step,' *ṣḏq* bears the sense of right vindicated on the field of battle, i.e. 'victory' (see the Comm.).

* Read *ṣḏq* *ṣḏq*.

force over helpless innocence (47⁶ 52³⁻⁵), and a violation of the moral order of the world. On this ground alone Israel has a plea before the Judge of all the earth, it has a right (עֲדָתָהּ) which does not escape the notice of J" (40²⁷; cf. Mic 7⁹). (b) Righteousness includes, in the second place, a way of life in accordance with the law of God. Of the better part of the people it is said that they follow after righteousness (51¹) or know righteousness (51⁷), just as it is said of another section that they are far from righteousness (46¹⁴).^{*} Similarly, in 53¹¹ it is said of J"'s righteous Servant that by his knowledge he shall make many righteous, i.e. bring them to a moral condition conforming to the Divine will. (c) There is, perhaps, yet another element to be taken into account: Israel is in the right in virtue of its being identified with the cause of J", the only true God. Israel is J"'s witness, His client in the great controversy between the true religion and idolatry, His servant and His messenger whom He has sent (43^{10, 12} 44³ 41^{8, 9} 42¹⁹ etc.). As the organ of J"'s self-revelation, the nation represents the cause that must ultimately triumph, and is therefore essentially in the right. This vocation of Israel is described as perfectly realized in the ideal Servant of the Lord (49³), whom J" has called in righteousness (42⁹) and appointed for a light of the Gentiles, that His salvation might be to the ends of the earth (49⁶; cf. 42^{1, 4}). The Servant's confidence that he shall be justified (50^{8, 9} 49⁴) rests on the consciousness of his election, and the unique relation which he holds to the redemptive purpose of J".

The same distinction between inherent and external righteousness is met with in chs. 56-60, which are assigned by some scholars to a later date. Thus in the sense of justification (salvation, prosperity, etc.) the nouns occur in 56^{1b} 58² 59⁹ 61^{3, 10} 62¹¹. (cf. 48¹², possibly an interpolated passage in the earlier part). Of inherent right, the adj. is used in 57¹ 60²; the substantives in 56^{1a} 59² 64⁴; the aspect most prominent appears to be obedience to the law.—The idea of civic righteousness in the sense of the pre-exilic prophets appears in 59¹⁴.

The sense of Israel's right against the nations appears likewise in other post-exilic writings, particularly in the Psalter, where the antithesis of 'righteous' and 'wicked' sometimes denotes Israel and the heathen respectively; cf. Ps 71¹⁰ 145³ 31¹⁸ 33¹ 52⁶ 75¹⁰ 94²¹ 97¹¹ 119^{15, 30} etc. etc. But here it is no longer possible to separate between the national and individual references of the idea of righteousness; and it is therefore better to deal with the subject after we have considered—

2. THE RIGHTEOUSNESS OF THE INDIVIDUAL.—That individual righteousness was an idea familiar in early times to the Israelites, is sufficiently clear from such passages as 1 S 26²³ 1 K 8³⁴ Is 31^{6, 11} (?if genuine), etc.[†] It may be true that the individual was hardly felt to possess an independent religious status before God. His life and his interests were seen to be merged in those of his family or the community (1 S 3¹³ etc.); and it was perhaps not expected that his outward fortunes should correspond exactly with his moral condition. At all events, there is no evidence that the inequalities of providence in this sphere pressed severely on religious thought till towards the Exile, when a growing sense of personal right begins to assert itself (Dt 24¹⁶, 2 K 14⁹). In the remarkable prophetic experience of *Jeremiah*, religion appears to resolve itself into a personal relation of the individual soul to God. And it is noteworthy that immediately he is confronted by the gravest problem of Jewish theology,—Why is it that the man who is right with God has to suffer affliction and

injustice in the world? 'Too righteous art thou, O J"', for me to contend with thee; yet of judgments would I speak with thee: Wherefore is the way of the wicked prosperous?' etc. (12¹).

Ezekiel.—Besides the general tendency of thought referred to in the last paragraph, there were two special reasons for the rapid growth of individualism in the exilic and post-exilic ages. One was the dissolution of the State, in consequence of which the principle of collective retribution was necessarily suspended, and each man became directly accountable to God for his own sins (Jer 31²⁹, Ezk 18²⁴). But another and more permanent cause was the introduction of the written Law as the basis of religion. The Law makes its appeal in the first instance to the individual conscience, and, although the aim of the Deuteronomic covenant was to make of Israel a righteous nation through obedience to the Divine will (Dt 6²⁵), its immediate effect was only to set up a standard of righteousness which served as a test of the individual's relation to God. The influence of these two facts is very apparent in the conception of righteousness which meets us in the Bk. of Ezekiel. Except in a few instances (16³¹, 23⁴⁵ 45³⁰) the words 'righteous' and 'righteousness' are there used solely to denote the religious condition of individual persons in the sight of God (3²⁰, 13² 14^{14, 30} 18²⁵, 21³² 33¹², etc.). Sometimes even the plu. נִפְּטָיִם is employed of the separate virtues or good deeds, which when integrated make up the religious character (3²⁰ 18⁴ 33¹³; cf. Is 33¹⁵ 64⁶). In form the idea is purely legal, consisting in obedience to the precepts of the written Law; its content, as given in 18²⁵ 33¹³ etc., is mainly but not exclusively ethical. And to this conception of righteousness there is attached a rigorous theory of individual retribution; according as a man's state is when the judgment overtakes him, so will his destiny be: the righteous shall live, and the wicked shall die.

Book of Job.—Ezekiel's doctrine of retribution was formulated with express reference to the final judgment which determines whether a man is to be admitted into the perfect kingdom of God or excluded from it. When the principle was extended to the ordinary course of providence, it was found to be contradicted at many points by experience. Hence arose the most serious stumbling-block to the faith of OT believers—the inequalities, the seeming injustice, of God's providential dealings with men. This problem emerges in many forms (see Hab 1^{2-4, 13} Is 53, Mal 3^{15, 18}, Ps 37, 39, 49, 73, etc.), but nowhere is it treated with such penetration and such intensity of feeling as in the Bk. of Job. Job, a typically pious man, acknowledged to be such by the Almighty and the Satan, as well as by his fellow-men, is suddenly visited by a series of calamities which, on the current view of providence, could only be explained as the punishment due to heinous sins. This view is upheld, in the discussion which ensues, by the three friends, and is partly shared by Job himself. His mind is dominated by the thought of God as his adversary in a lawsuit; or rather his chief complaint is that the Almighty constitutes Himself both accuser and judge, while there is no umpire who can lay his hand upon them both (9³²). He feels himself to be the victim of an accusation brought against him by an all-powerful antagonist; and his contention is that the accusation is unjust—that he is in the right and God in the wrong in this unequal quarrel. This, of course, as the other disputants are quick to point out (8³ 34¹⁷ 36³ 37²³ 40⁶), is to impugn the judicial righteousness of God; and such a position is to them simply inconceivable. 'How can a man be in the right against God?' they ask (4⁷ 5¹⁴ 25¹); and Job retorts with bitter irony, 'How indeed! seeing He is the

^{*} Many commentators take the word in these passages in the sense of outward justification. But the parallelism in 51⁷ ('in whose heart is my law') strongly favours the more ethical meaning, and this ought in fairness to rule the interpretation of 51¹. 46¹² is more doubtful.

[†] On an Aramaic inscription of the 7th cent. B.C. (Nerab ii. 2) the following words are put into the mouth of a dead priest: 'For my righteousness before him, he (the god) gave me a good name and lengthened my days' (Hoffmann, Z.A., 1896, p. 221 f.).

Omnipotent against whom there is no redress' (9²). Thus to the friends the question at issue is the righteousness of Job, which they ultimately deny; while to Job himself it is the righteousness of God in His providential dealings with men: 'he condemns God that he himself may be in the right' (40⁸, cf. 34⁵). Although he is forced to acknowledge that God has pronounced him guilty, he is nevertheless perfectly sure of his own righteousness (27⁸), by which he means in the first instance his 'just cause against God' (35²), his innocence of the unknown transgressions laid to his charge by his irresistible opponent. 'I am innocent—in the right' is his constant cry (9²⁰, 13¹⁸ 34⁵ etc.). But behind this formal and purely forensic sense of righteousness there lies a deeper question, viz. What constitutes the righteousness of a man before God, or what entitles him to a sentence of justification in the shape of temporal prosperity? On that point there does not appear to be any fundamental difference between Job and his friends. Righteousness means morality combined with piety—loyal and whole-hearted obedience to the will of God. Observance of the written Law is obviously excluded by the conditions of the poem; but it is assumed that God's will is known, and that a man may so fulfil it as to be righteous. Job is a man perfect and upright, fearing God and shunning evil (1¹ etc.). That his outer life had been morally correct was known to all the world; what was known to himself alone and God was that there had been no hypocrisy or secret infidelity in his heart (29¹², 31¹⁻³); his morality had been inspired by religion, by reverence, and perfect allegiance to his Creator. On that point the testimony of his conscience is clear and unwavering; and it is the undoubted teaching of the book that this plea of Job's is valid, and that the real problem lies where Job's argument places it, in the mystery of the Divine government. We are not here concerned with the solution which the author intends to suggest, but it can hardly consist, as some have thought, in the undermining of Job's consciousness of innocence, and his being convicted of a subtle kind of sin in the shape of self-righteousness. It is rather to be looked for in the remarkable distinction which the patriarch is led to draw between the God of Providence who condemns and persecutes him, and the God to whom his heart bears witness, who is even now his friend, and must yet appear as his avenger, though it be after his death (18¹⁹⁻²¹ 16²³⁻²⁷). Job is enabled in some degree to maintain his fellowship with God apart from outward tokens of His favour, sustained only by the witness of his conscience, and the nascent hope of seeing Him as He is, in another state of being.

It has already been pointed out that in this book the terms for righteousness are employed of being in the right in argument; cf. 11² 27⁵ 32⁴ 33¹⁻³. Note also the occasional use of *ṣḏq* in the sense of external justification (= prosperity), 8⁶ 29¹⁴ [?] 33²³ 36⁷.

Proverbs and Ecclesiastes.—In the two remaining canonical *Hokhmah* books the conception of righteousness is as distinctly individualistic as in Job or Ezekiel. A very common theme in the Proverbs is the contrast between the 'righteous' (*ṣḏq*—sing. or plu.) and the 'wicked' (*ṣḏq*).^{*} Here the righteous do not form a *party* (as often in the Psalms); they are a *class*, comprising all who follow the moral ideal taught by the wise men. All men, in short, are divided by the Proverbialists into good and bad, and 'righteous' is simply one of the commonest designations of the good part of

* See 323 10 *pass.* (11 times), 118. 10. 23. 31. 125. 7. 10. 12. 21. 26. 135. 9. 25. 141. 22. 154. 28. 30. 212. 13. 241. 26. 252. 281. 12. 28. 292. 7. 16. 27. There are many other contrasts, as *sinner* 1321, *evil-doers* 215, *fools* 1021 etc.; and many synonyms, as *wise* 90 1130 2334, *good* 220, *upright* 2110 etc.

mankind. It follows that the idea of righteousness presented in the book is essentially ethical, though no doubt with a strong dash of utilitarianism; the virtues chiefly insisted on being those which experience shows to be necessary for the welfare of society, and therefore most immediately beneficial to the individual who practises them. At the same time the moral system has a religious background. The written Law is the supreme standard of morality or righteousness. Moreover, one of the chief objects of the writers is to inculcate the doctrine of individual retribution in the ordinary course of Divine providence. However the fact may be explained, the difficulties surrounding this question are ignored in the Proverbs, and the law of retribution is regarded as fully manifested in the present life: 'The righteous shall be requited in the earth, much more the wicked and the sinner' (11³¹). Hence the idea of righteousness appears to have lost the eschatological reference which it frequently has in other parts of OT, and (what is more remarkable) it has all but lost the sense of outward justification, such as we meet with occasionally even in the Bk. of Job. Although it is constantly asserted that righteousness is the way to honour, wealth, prosperity, etc., it does not seem ever to be identified with these external tokens of God's approval except in 21²¹ 8¹⁸. In Ecclesiastes the same conception of righteousness as the supreme moral category prevails; cf. 3¹⁷ 7¹⁵ 8¹⁴ 9¹⁻². The sayings most characteristic of the author are these two: 'Be not righteous overmuch' (7¹⁶), and 'There is not a righteous man upon the earth that doeth good and sinneth not' (7²⁰). The latter is perhaps the only passage in OT where righteousness is treated as equivalent to sinlessness; the former exhibits a reaction against the casuistries of Pharisaic legalism. The vacillation of the book on the subject of retribution (contrast 7¹⁵ 8¹⁴ 9² with 3¹⁷ 9¹ etc.) raises difficult critical questions which need not be considered here.*

The Psalms.—It is very difficult to analyze and classify the varied aspects of human righteousness presented in the Psalter. For one thing, it is impossible (as was said above) to draw a sharp line of division between the righteousness of the nation and that of the individual. The point of view most characteristic of the Psalms is intermediate between these two. In a large number of passages the distinction of *ṣḏq* and *ṣḏq* is applied to two parties within the community; the 'righteous' being the religious party who have regard to the Covenant, and the 'wicked' the godless and wealthy anti-theocratic party who set religion and morality at defiance.† Here the idea of righteousness is partly national, since the 'righteous' represent the true ideal Israel; partly individual, inasmuch as the party is formed by those members of the nation who accept the Law as their rule of life. In some cases, indeed, it is difficult to say whether the contrast intended be one within the nation or between the nation and the rest of the world. The ungodly in Israel are animated by the same spirit as the heathen that know not God, and conversely the qualities of the righteous are the same whether the predicate be extended to the people as a whole or restricted to a portion of it.

With regard to the conception of righteousness implied by this contrast, the following points have to be noted. (a) The conflict of parties is, first of all, a conflict of religious first principles. The righteous are distinguished by their faith in the

* Both in Proverbs and Ecclesiastes there are references to the public administration of justice, where of course the idea of righteousness has the ordinary legal applications: cf. Pr 17¹⁵ 26 18¹⁵ 17 2424 2526, 815 1612 255 319, Ec 318 50.

† Cf. 15 512 113 5 3211 3417. 30. 22 37 *pass.* 5522 6410 6923 9212 1120 14013 1415 etc.

moral government of the universe. They trust in Jⁿ (16¹ 26¹ 22⁹), and consciously identify themselves with His cause in the world; they stake their existence on the conviction that 'there is a God that judgeth in the earth' (58¹¹), and that 'in the end judgment must be given for righteousness' (94¹⁵ Wellhausen). The wicked, on the contrary, are practical atheists. They deny, not perhaps the existence of God, but His providential action (14¹ 53¹), and acknowledge no higher authority than their own lawless wills (12¹ 59⁷ 64² 94⁷). Thus the Divine decision in their favour for which the Psalmists pray will be the vindication of that view of the world to which they have committed themselves—the proof that they are *in the right* in the fundamental beliefs on which their life is based. (b) The sphere in which the contrast is wrought out is that of personal and social morality; hence there is a constant reference, tacit or expressed, to the moral character of the suppliants. They are those who practise righteousness and justice (106² 119²¹); they appeal to their integrity (7⁸ 25²¹ 41¹²); they claim to be upright, or upright of heart (32¹¹ 33¹ 37¹⁸ 64¹⁰ 97¹¹ 140¹³), and innocent (94²¹); to have clean hands and a pure heart (18²⁰ 24²⁴); cf. 17¹⁵ 26¹⁵. On the other hand, the wicked are cruel, unjust, deceitful, bloody-minded, adulterous, avaricious, etc.; men who, with no fear of God before their eyes, trample every social obligation under their feet.* (c) Another element in the Psalmists' sense of righteousness is the fact that they suffer wrong at the hands of their enemies (7¹ 10² 22²⁷ 31¹⁵ 69²⁵ 119²⁵ 125³ 143³ etc.). The outrages perpetrated by the heathen nations on Israel, and by the rich upon the poor within Israel, are a violation of the moral order of the world which cannot pass unpunished under the just government of Jⁿ; the oppressed are, *ipso facto*, in the right against their oppressors. (d) Lastly (as in Deutero-Isaiah and elsewhere), righteousness bears the sense of *justification* through the judicial interposition of Jⁿ, usually in the form of a restoration of temporal prosperity. So in 24⁵ 'he shall receive blessing from Jⁿ, and righteousness from the God of his salvation' (cf. 17¹⁵ 35⁷ 37¹ 112⁹ etc.); in 23³ 'paths of righteousness' means 'paths of prosperity' (118¹⁹ 132⁹).†

Now, while all these elements may enter more or less into the Psalmists' consciousness of being in the right,—that consciousness on which they base their expectation (or explain their experience) of deliverance (4¹ 7⁹ 17¹ 18²⁰ 24²⁴ etc.),—they are not of equal importance. The second (b) far outweighs the others. Righteousness is in the main an ethical word, describing the condition of those whose lives are governed by regard for the moral law. To the question in what sense morality constitutes righteousness before God, the Psalms, of course, furnish no direct answer. The chief consideration, no doubt, is that obedience to the written Law was the condition of acceptance with Jⁿ under the Covenant. This thought is often expressed (19⁷ 78⁷ 99⁷ 103¹⁸ 105⁴⁵ 119 *pass.*, etc.), and may be presumed to be always in the mind of the writers. At the same time it is to be observed that only the ethical (as opposed to the ceremonial) elements of the Law enter into the conception of righteousness, a fact which shows that the influence of the prophets still lives in the devotional poetry of Judaism. Nor is there anything in the Psalms

* Righteousness in judgment is emphasized, e.g., in the portraits of the king, 45⁷ 72² (cf. 58¹ 82²⁵ 90⁴ etc.). In 72³ 85¹⁰ 11¹³ the word possibly means the ideal state of a well-ordered commonwealth, bringing peace and prosperity in its train (cf. Is 45⁸).

† As was remarked above, צדק (the adj.) does not appear to have this sense; it refers to the inherent state or character of those who are in the right, whether it has been manifested by external providential acts or not. 118¹⁵ 20 are hardly exceptions.

that can properly be called self-righteousness or legalism in a Pharisaic sense, i.e. the Psalmists do not think of their good works as giving them an absolute title to justification. They do not (like Job) maintain their right *against* God—'in thy sight shall no man living be in the right,' 143²—they are ever conscious of defect and sin cleaving to all they do; and merely plead the steadfast direction of their will towards the ethical ideal as evidence of their fidelity to Jⁿ. Righteousness, in fact, is a relative term, meaning *in the right* as against some other, not absolute moral perfection in the sight of God. In 106³¹, where a single good action is said to be 'counted' for righteousness, the word has doubtless a sense approaching to *merit* (cf. Gn 15⁶); but here the Pauline maxim has to be borne in mind that the 'reckoning' of a reward is of grace, not of debt (Ro 4⁴). It is a manifestation of grace on the part of Jⁿ that He renders to a man according to his works (62¹²).

This is not the place to examine the moral ideal of the Psalmists in detail (see ETHICS); it is in all important features the common property of post-exilic Judaism, and it has its centre in the individual life. Only one point needs to be adverted to, in order to guard against a possible misconception. It is found that in connexion with the idea of righteousness considerable emphasis is laid on the humane virtues. In 112⁴ 'righteous' and 'merciful' occur together in the description of the God-fearing man; in v. 9 of the same Psalm charity to the poor is mentioned as a condition of righteousness; in 37²¹ 112⁹ the righteous is characterized by willingness to lend and to give.* Now, it is a well-known fact that in later times righteousness acquired the special sense of mercy or even almsgiving (see below), and it might be supposed that in the passages just cited we have the first indication of that important change of meaning. It is very doubtful if this view be correct. In reality, the phenomenon in question is little different from a feature we have already remarked in the prophetic conception of righteousness. To say that the righteous man is merciful, etc., is not the same thing as to identify righteousness and mercy; all that is meant is that mercifulness is one feature of the ideal righteous character; and any stress laid on such virtues in particular passages is amply explained by the prominence assigned to them in the moral code of Judaism.

Some additional illustrations of the various kinds of human righteousness may here be given from the later writings of OT.—In Mal 3¹⁸ the two parties in the restored community are distinguished as the 'righteous' and the 'wicked' respectively (as in Psalms).—In 32²⁰ righteousness means *justification* through a return of prosperity; as also Jl 2²⁸: 'the early rain in token of justification' (צדק),—less probably, in *just measure*; Dn 9²⁴ ('everlasting righteousness').—In Is 24¹⁶ 26²¹ צדק is a predicate of the nation of Israel; in 26⁷, perhaps of the theocratic party.—In 26⁹ the idea seems to be that when Jⁿ rouses Himself to the exercise of His judicial functions, the inhabitants of the world will learn what true piety is.—Is 64⁵, Dn 9¹⁸ express a sense of the worthlessness of the works of righteousness (צדק) performed by the people; the consciousness of being in the right (often so powerful in the Psalms) cannot maintain itself in the face of prolonged national misfortune. Dn 8¹⁴ (צדק) is a peculiar case: the cleansing of the sanctuary is considered as a *justification*, a vindication of its rights against the heathen who had profaned it.

3. THE RIGHTEOUSNESS OF GOD.—In the OT righteousness is never predicated of any other deity than Jⁿ, the God of Israel.† It appears to be regarded

* The same combination is met with in Proverbs (cf. 12¹⁰ 21²¹ 29⁷), and perhaps in Job (20¹⁴).

† In Ps 58, 82 many commentators find the unfamiliar idea expressed that the government of the world has been delegated by Jⁿ to inferior, semi-divine beings, the gods of the heathen. To the unrighteous judgment of these subordinate deities is ascribed the perversion of right which prevails on earth. If this view were correct (which is doubtful), it would certainly show that righteousness was *expected* of all beings to whom Divine honours were paid; but such a representation hardly conflicts with the statement made above.

not as a natural attribute inseparable from the very notion of Godhead, but as one which Jⁿ alone has proved Himself to possess in the positive revelation of Himself through the history of Israel (see Is 45^{19c}). The idea has its roots in the fundamental institutions of the Hebrew religion. From the time of Moses, Jⁿ was regarded as the fountain of right in Israel, the King and Judge of His people, dispensing justice continuously through His accredited representatives (Dt 1⁷).^{*} The development of the idea is due chiefly to influences emanating from the prophets. It belongs to their view of Jⁿ as an ethical Person having an independent character of His own, in contrast with the gods of the heathen, who were conceived even by their worshippers as arbitrary and capricious beings, subject to incalculable humours and swayed by self-interest. The righteousness of Jⁿ is the steadfastness of His character, to be seen, first of all, in His inflexible determination to punish Israel for its sins (Is 28¹⁷ etc.). It comes to light in the moral order of the universe, which is just Jⁿ Himself operating in history in a way that answers to the sense of right which He has implanted in human nature. In Zeph 3⁸ His moral rule is described as having the constancy and uniformity of the natural law that brings in the dawn: 'Jⁿ is righteous in the midst of her; he doeth no iniquity; morning by morning he bringeth his judgment to light, nothing is missing' (cf. Hos 6⁶ 'my judgment goeth forth as the light'). In a similar and nearly contemporary passage we read: 'The Rock, his work is perfect, for all his ways are judgment; a God of faithfulness and without iniquity; righteous and upright is he' (Dt 32⁴).

This prophetic conception of the Divine righteousness receives a remarkable expansion in the hands of Deutero-Isaiah. The most suggestive passage is 45¹⁹⁻²¹: 'Not in secret have I spoken, in a place of the land of darkness; I have not said to the seed of Jacob, Seek me in the waste. I, Jⁿ, speak righteousness, proclaim uprightness. . . A righteous God and a Saviour (אל צדק וישועה) there is not except me' (cf. v. 23 'righteousness is gone forth from my mouth,—a word that shall not return'; and 63¹ 'I that speak in righteousness, mighty to save'). Here two things are to be noted: first, that righteousness is a feature not merely of Jⁿ's judicial action, but of His whole manner of revealing Himself in history; and, secondly, that beyond the universal moral order of the world it embraces a redemptive purpose, which, however, is ultimately coextensive with the destiny of mankind. The fundamental thought would seem to be the trustworthiness and self-consistency of Jⁿ's character,—His being ever true to His own nature and purpose,—and along with that His straightforwardness in the revelation of that purpose to Israel. In the same profound ethical sense the words are used in 41¹⁰ 42⁶ 45¹²: the upholding of Israel, the election of the ideal servant, and the raising up of Cyrus, are all moments in one comprehensive purpose of salvation which Jⁿ, in virtue of His righteousness, steadily pursues to its glorious issue.[†] Elsewhere than in

Deutero-Isaiah, this precise sense of righteousness is rarely met with in OT (see Zec 8⁸, Neh 9⁸, and those passages in the Psalms where righteousness is parallel to faithfulness). Its indirect influence, however, has been very great, as appears from the remarkable way in which the Psalmists emphasize the gracious aspect of the attribute (see below).

The teaching of Deutero-Isaiah on this subject stands somewhat apart from the rest of the OT, and represents a standpoint hardly reached by subsequent writers. Righteousness appears to be conceived as a moral attribute expressing what Jⁿ's character is in itself, apart from His legal relations with men; and it is difficult to trace a connexion between this view of righteousness and the commoner forensic conceptions about to be considered. Smend describes it as 'die Zuverlässigkeit mit der er sich als der Helfer Israels beweist' (*Rel.-gesch.* 3 304; cf. 1st ed. 421 ff.), and seems to derive it from the idea of Jⁿ's being in the right in His controversy with Israel (see (a) below). Dalman treats it simply as a manifestation of judicial righteousness on the part of God ((b) below). Were it not hazardous to depart from the forensic usage which is so prevalent in Hebrew, one might be tempted to suppose that we have here to do with an independent development of the notion parallel to what is found in Arabic.

For the most part, however, the idea of Divine righteousness is based on legal analogies applied to the relation between Jⁿ on the one hand and Israel or mankind on the other. Here, again, there are two cases to be distinguished. (a) Not infrequently, in the prophets and elsewhere, Jⁿ appears as the *plaintiff* in a legal action, pressing His suit against Israel, and calling for the judgment of an ideal tribunal (Is 1¹⁸ 43²⁶, Mic 6⁶ etc.). When in this connexion the word 'righteous' is employed of Jⁿ, it denotes that He is *in the right* and His adversary in the wrong in the controversy between them. The adj. has this sense in the mouth of Pharaoh, Ex 9²⁷ ('Jⁿ is in the right,' etc.). It is so used also in the following passages, where the righteousness of Jⁿ is acknowledged in the punishment of Israel's sin: La 1¹⁸, Ezr 9¹⁵, Neh 9³, 2 Ch 12⁶, Dn 9¹⁴. Similarly, צדק in Dn 9¹⁶, מִצְדָּק in 1 S 12⁷, Mic 6⁶; * and the verb in Ps 51⁶ ('that thou mayest be in the right in thy sentence'). By an extension of meaning parallel to what we have already noted in the secular sphere, this sense of righteousness might readily pass over into that of ethical perfection; and there are a few instances where the word is possibly to be so understood; cf. again Zeph 3⁸, Dt 32⁴, Zec 8⁸; also Neh 9⁸, Ps 145⁷ etc.

(b) The prevalent conception of the OT is that in which Jⁿ is represented not as one of the parties in a lawsuit, but as the supreme Judge, who sits enthroned above the confusion and strife of the world, and dispenses absolute justice in the end to all His creatures. Righteousness, accordingly, is pre-eminently the *judicial* attribute of God; it is that which pertains to Him as 'the Judge of all the earth' (Gn 18²⁵). Jⁿ is a righteous Judge (Jer 11²⁰, Ps 7¹¹); judges the world in righteousness (Ps 9⁸ 96¹³ 98⁹); He sits on a throne judging righteousness (9⁴); righteousness is the foundation of His throne (89¹⁴ 97²); cf. 11⁷ 36⁶ 48¹⁰ 50⁸ 71¹⁹ 97⁹ 111³ etc. Hence the word may be expected to have the same range of meaning as the ordinary OT conception of judicial righteousness, which we have seen to be a somewhat wider idea than its modern equivalent. (a) It includes of course, first of all, the cardinal virtues of the judge: e.g. love of right (Jer 9²³, Ps 11⁷ 33³ 99⁴); rigorous impartiality in the distribution of punishment or reward (Job 8³ 36³ 37²³); and unerring recognition of men's true moral condition (Jer 11²⁰ 20¹², Ps 7⁹; cf. Is 11³ of the Messiah).[†] Its action is naturally two-sided:

* צדק in Jg 5¹¹, Ps 11⁷ 103⁶ is probably different (= manifestations of judicial righteousness, in a sense favourable to Israel).

† Die göttliche *Zedakah* ist diejenige Gesinnung, welche in ihrer Bethätigung den wahren, d. i. sittlichen Werth oder Unwerth einer Persönlichkeit (oder einer Gemeinschaft) in absolut richtiger Weise anerkennt' (Diestel, *JDT*, 1860, p. 179).

* An expressions of the righteous will of Jⁿ, the precepts of the Law are sometimes spoken of as themselves 'righteous' (Dt 4⁸, Ps 19⁸, and often in Ps 119). So in Dt 33¹⁰, and perhaps elsewhere (Ps 6⁹ 119¹⁴⁰ etc.), the righteousness of Jⁿ means that which He requires of man, or that which is prescribed in the Law. Some writers have thought it strange that this Divine attribute is nowhere mentioned in the Pent. in connexion with the Mosaic legislation, which, from one point of view, might seem the most signal exhibition of Jⁿ's righteousness in the whole history of Israel. The explanation probably lies in the essentially prophetic character of the conception referred to in the text above. By the prophets the term is applied not to the legislative activity of Jⁿ, but to His dealings in providence.

† Cf. also 42²¹ 'Jⁿ was pleased, for his righteousness' sake, to magnify revelation,' etc. Less significant, but still noteworthy, are 41²⁶ 43⁹, where the terms are applied to predictions as verified by the event.

towards the wicked it is vengeance (Jer 11²⁰ 20¹², Is 59^{1st}, Ps 129⁴ etc.), while for the righteous it means vindication and deliverance; and usually the two sides of the idea will be displayed in the same act of judgment, the deliverance of the righteous being effected through the destruction of the wicked. (β) But frequently the second is so emphasized that the other is almost or quite left out of view; and this tendency is so pronounced as almost to bring about a transformation of the whole idea of Divine righteousness. Thus in virtue of His righteousness Jⁿ establishes the righteous (Ps 7⁹), and pleads the cause of His people (Mic 7⁹); He answers their prayer by terrible things in righteousness (Ps 65⁵), etc. So in the many places where the righteousness of God is referred to as an object of praise (Ps 7¹⁷ 22³¹ 35²⁸ 40¹⁰ 51¹⁸ 71^{1st}, 10 89¹⁸ 145⁷), it is not the abstract justice of Jⁿ's dealings that calls forth adoration, but His proved readiness to help and bless His people. This aspect of righteousness may be defined as the *justifying activity* of God. (γ) Once more, the name righteousness is given to the *act* of justification in which the Divine attribute is manifested, and to its external consequences as seen in the lot of the justified. In other words, righteousness is synonymous with salvation (Is 46¹³ 51², 6. 8 59^{1st}, Ps 40¹⁰ 51¹⁸ 71^{1st}, 98² etc.). This objective righteousness is spoken of indifferently as that of God the Justifier, or of men the justified * (cf. Ps 111³ with 112³, and see the passages cited above amongst the illustrations of human righteousness). It should be added that in many cases the context hardly determines whether it be the subjective attribute in the Divine mind or the outward embodiment of it in providence which is to be understood.

It is evident that the OT writers know nothing of the sharp contrast often drawn by theologians between the righteousness and the mercy of God. Righteousness and saving activity, so far from being opposed to each other, are harmonious principles of action in the Divine nature; Jⁿ is a righteous God *and* a Saviour (Is 45²¹). Accordingly, the Psalmists constantly appeal to the righteousness of God, not only for judgment (22²³ 35²⁴), but for deliverance (31¹ 71² 143¹¹), for quickening (5⁸), for the answer to prayer (143¹), etc. Again, righteousness is frequently associated with other attributes expressing the gracious attitude of Jⁿ to His people, e.g. *mercy* or *grace* (תְּחִינָה Ps 36⁶, 10 89¹⁴ 103¹¹ 145⁷), *faithfulness* (אֱמֻנָה Zec 8⁹, Ps 36⁶ 40¹⁰ 88¹² 89¹⁴ 96¹³ 119¹³⁷, 142 143¹), *compassion* (חַסֵּד 116³), *goodness* (145⁷), etc. These parallelisms are not to be pressed so far as to identify righteousness with grace or faithfulness; all that is implied is that in Jⁿ's providential action various attributes meet, so that the same act may from different points of view be regarded as an exercise of righteousness, or of faithfulness, or of mercy. Still they suffice to show that in the mind of the writers there was no sense of opposition between righteousness and grace in God. How far their idea is from mere retributive justice,—the *constans et perpetua voluntas suum cuique tribuendi*,—appears with almost startling force from the singular wish of Ps 69²⁷ that the wicked may not come into Jⁿ's righteousness (i.e. have no share in His justifying activity), or the not less remarkable prayer of 143¹, 2 'Answer me in thy righteousness. And enter not into judgment with thy servant: for in thy sight shall none living be in the right.' † Nay

* 'Gottes Gerechtigkeit hat einen mehr ursächlichen, aktiven, die menschliche einen mehr sekundären und receptiven Charakter, jene ist eine Kraft, diese ein Zustand' (Duhm on Ps 112).

† Here 'enter into judgment' apparently means to appear as the accuser in a legal process (Wellhausen). The Psalmist does not shrink from the judgment of God, in which His אֱמֻנָה is operative, but only from a controversy with the Almighty, like that in which Job so recklessly engaged.

more, the principle of retribution is in Ps 62¹² expressly deduced not from the righteousness of God, but from His grace: 'to thee belongeth grace: for thou requitest each man according to his works'; here the meaning must be that it is an act of condescending grace on the part of God to take cognizance of the differences in human conduct.

On the other hand, however, these examples do not justify certain extreme theories that have sometimes been built upon them. They do not, e.g., warrant the definition of righteousness as God's fidelity to the Covenant (Kautzsch, Riehm, etc.). No doubt, faithfulness to covenant obligations is a part of the ethical righteousness of Jⁿ when once a covenant has been established; but there is nothing to suggest that the attribute comes into play only with the covenant relation, or that its sphere of exercise is confined to the maintenance of the Covenant with Israel. Again, it is an exaggeration to deny that retribution is an element of the Divine righteousness. This has been done by Diestel and Ritschl, who hold that the righteousness of God has a positive reference only to the purpose of salvation, and that retribution has merely an accidental connexion with it in so far as the punishment of the wicked may be necessary for the establishing of the righteous. The distinction here attempted to be drawn is illusory. The punishment of sin is directly connected with the Divine righteousness in such passages as Is 5¹⁰ 10²² 28¹⁷, Ps 7¹¹ 50⁶, 1 K 8³² etc.; and if this does not more frequently occur, the reasonable explanation is that the matter was too self-evident to require to be insisted on. But the mistake of both these theories, as of others that might be mentioned, is that they tend to dissociate an OT idea from the historic institutions in which it was incorporated in Hebrew thought, and try to reconstruct it on the unsafe foundation of an abstract definition. The language of the OT is not scholastic but practical; its writers do not analyze and expound ideas, but express in vivid popular speech the spiritual truths by which their religious life was sustained. That the Divine righteousness was mainly conceived by them as a judicial attribute is beyond dispute, and they must be presumed to include under it all that the term would imply if used of a human judge,—the punishment of the guilty as well as the vindication of the innocent. The prominence which is given to the latter aspect of the notion is certainly a fact of the utmost significance for theology, but it involves no departure from the analogy of secular justice as administered in ancient Israel. If it be considered that the Psalmists and other writers were accustomed to look on a judge as the natural protector and patron of the oppressed, and, further, that they were always confident in the substantial justice of their own cause before God, there need be no difficulty in recognizing the essentially judicial character of their conception of the Divine righteousness, although to their minds it presents on the whole the aspect of grace.

Another point may be referred to. The OT does not appear to teach a justification of sinners as such. In Protestant theology, according to Ritschl, justification is a *synthetic* judgment of God, expressing, that is, His resolve, for the sake of Jesus Christ, to treat as righteous those who have no righteousness in themselves. Assuming that to be a correct statement of the evangelical doctrine, we have merely to observe that the OT does not proceed quite so far. It rather leads us to think of justification as an *analytic* judgment, a declaration of righteousness by God in favour of such as are inherently in the right. Those who are justified are, in fact, sinful men,—though

never, of course, 'wicked' (רָעָה), — but still, in the relative sense in which the word is used, they are the 'righteous'; and it is *quā* righteous, not *quā* sinners, that they are objects of the justifying decree of God. It is true that in the actual experience of OT believers this order of ideas is generally reversed. The consciousness of being in the right is seldom strong enough to be long maintained in the absence of the outward marks of God's approval in the shape of temporal good fortune; the case of Job is quite exceptional. The external justification, therefore, as a rule comes first in the thought of OT writers; and from it they derive the assurance that they are inherently righteous before God. And as the withdrawal of outward prosperity is a proof of sin in the righteous, so the act of justification is equivalent to the pardon of sin; cf. Job 33²⁸, where the conversion of a sinner under the chastening hand of the Almighty is said to be followed by the restoration of his righteousness. Thus the teaching of the OT may be said to culminate in the thought of righteousness as a gift of God, an idea appearing most clearly perhaps in Ps 24⁶⁹, Is 46¹³ 51⁵ 56¹. In these passages we find the nearest approximation to what we mean by 'imputed' righteousness. The idea of the righteousness of one person being imputed to another is, it need hardly be said, entirely foreign to the OT.

In late Hebrew the word צַדִּיק underwent a remarkable change of meaning, for a full account of which the reader is referred to the valuable treatise of Dalman cited below (under Literature). A few points may here be noted.

(1) In the sphere of private morals צַדִּיק became almost equivalent to the OT צַדִּיק; i.e. it denoted any exercise of benevolence which goes beyond a man's legal obligations. Obviously, this is a development of the humanitarian aspect of the idea which we have seen to be prominent in the prophets and the Hagiographa, and it reaches its climax in the sense of *almesing* (see Mt 6¹). Dalman considers that the word had this sense in the Aramaic dialect before its adoption by the Jews, but this is hardly proved by the examples he adduces (p. 18). It is not necessary to take the original צַדִּיק in Dn 4²⁴ as anything else than right living; and the occurrence of the later sense in the Targ. (Gn 18¹⁹) is no sure evidence of an independent Aramaic development. It seems more natural to suppose that the usage of the Targ. registers a change which the idea had undergone in the religious thought of later Judaism.

(2) In the judicial sphere צַדִּיק has ceased to be a properly judicial attribute. It is a consideration which comes in to moderate the operation of strict justice (צֶדֶק), so that the question is actually raised, and answered with much ingenuity, how, in accordance with OT injunctions, צַדִּיק is to be exercised in judgment.* This, of course, applies equally to the Divine righteousness and to that of a human judge. Here, again, we have the one-sided exaggeration of a single element in the old Hebrew notion of judicial righteousness. Originally it included both the exercise of impartial justice and a readiness to espouse the cause of the oppressed. Eventually—partly through the parallel development in the sphere of private morals, and partly, as Dalman observes (p. 18), from a more developed sense of formal right—the two ideas proved to be incompatible, and the name צַדִּיק was appropriated to that which, strictly speaking, has nothing to do with a judge's functions at all.

The question arises, To what time can these changes, or the beginnings of them, be traced back? Here the evidence of the LXX is of importance. Where the reference is to righteousness manifested by God to man, צַדִּיק is not infrequently rendered by δικαιοσύνη (Dt 6²³ 24¹³, Ps 24⁽²³⁾ 33⁽³²⁾ 103⁽¹⁰²⁾ 6, Is 17²⁵ 28¹⁷ 59¹⁸, Dn 9¹⁹) or δίκαιος (Is 56¹). For human righteousness we have only δίκαιος in Ezk 18²⁰ 22 and δικαιοσύνη (—alms) in Dn 4²⁴. On the other hand, δικαιοσύνη stands for צֶדֶק in Gn 19¹⁸ 20¹³ 21²⁵ 24²⁷ 32¹⁰, Ex 15¹³ 34⁷, Pr 20²⁸, Is 63⁷. These facts indicate a tendency to confuse the ideas of צַדִּיק and צֶדֶק, though they do not show it to be far advanced; something must be allowed for the difficulty of rendering in another language the peculiar shades of meaning assumed by the Hebrew term.—In the original Hebrew of Ben Sira, the later sense of צַדִּיק appears (314 8²⁰ [cf. Pr 16⁹] 210 40¹⁷), alongside of the more general OT sense (12³ 16¹⁴ 44¹³ 51³⁰): some passages are ambiguous (40²⁴ etc.).—Since the OT probably contains

* Some of Dalman's illustrations are very striking (p. 5 f.). E.g. it is said that a judge exercises 'righteousness' when he pays out of his own pocket the fine he has imposed on a poor man.

writings of more recent date than the Greek translation of the Pent., or even the age of Ben Sira (c. 200 a.c.), it would not be surprising if in some parts of the Canon the idea of righteousness were found to have undergone the transformations just described. Yet, as has been already said, it is doubtful if this is the case. The OT emphasizes humanity or mercy as an element in the ethical ideal; but it is this ethical ideal itself, and not any particular virtue, which is described by the term righteousness. So again in the administration of justice: righteousness, with whatever latitude of meaning, is always an attribute proper to the judge, never a foreign influence brought in to modify judicial action. There is no foundation in OT for the rabbinical maxim, 'Where judgment is there is no room for צַדִּיק, and where צַדִּיק is there is no judgment' (Dalman, p. 6).

RIGHTEOUSNESS IN NT.—The words denoting 'righteous' and 'righteousness' in NT, δίκαιος and δικαιοσύνη, primarily signify what is conformable to an ideal or standard, agreement with what ought to be. These terms naturally take their colour from the system of morals in connexion with which they are used. Righteousness will be a very noble or a very commonplace virtue, according to the standards by which men measure character and conduct. Accordingly we find that, in profane Greek, righteousness is chiefly a social virtue. Usage and custom prescribe the standard of righteousness and measure its elevation. In NT, however, righteousness is, above all things, a religious word; it is rightness according to the Divine standard; it is conformity to the will and nature of God Himself. Since, therefore, the character of God is conceived in NT teaching as absolute moral perfection, righteousness in men becomes a name for that disposition and method of life which accord with God's holy will; in short, righteousness is Godlikeness.

The adjective δίκαιος occurs with nearly equal frequency in the Synoptic Gospels and in the Pauline Epistles. The noun δικαιοσύνη occurs seven times in Matthew, once in Luke, and not at all in Mark, and is more frequently used by St. Paul than by all the other NT writers combined. In studying the NT concept of righteousness it will be convenient to begin with the Synoptic Gospels, with special reference to the teaching of Jesus, then to consider the Pauline usage, and finally to notice that of other NT writers. We shall thus be led to a general estimate of the NT doctrine.

(A) RIGHTEOUSNESS IN THE SYNOPTIC GOSPELS.—We may here take as our starting-point that saying of Jesus to His disciples: 'Except your righteousness shall exceed the righteousness of the scribes and Pharisees, ye shall in no wise enter into the kingdom of heaven' (Mt 5²⁰). The righteousness which He required was in some essential respect higher than that which was current in the life and ideals of the Jewish people of His time. We must therefore briefly describe the popular Jewish idea of righteousness. That idea grew out of the current conception of God and of His revelation. Righteousness was thought to consist in obedience to commandments, and the nature of the Divine commands was viewed quite

superficially. The rich young man who came to Jesus asking what he should do to inherit eternal life, is an illustration of the view which the Jews took of the commandments (Mt 19¹⁶⁻²¹). He said that he had kept them all. His conception evidently was that to refrain from the outward sins which they forbade—stealing, lying, Sabbath-breaking, and the like—was to keep the commandments. Only a superficial conception of the import and bearing of the commandments could have permitted him to make the claim that he had kept them all from his youth. The same faulty notion of the real moral requirements of the law lay at the root of the pride and self-righteousness of the Pharisees. They were able to think themselves righteous only because they measured themselves by an imperfect standard, an inadequate idea of the high demands which the law made upon the inner life. Religion was conceived as a legal affair, and therefore righteousness consisted primarily in the observance of all the rites and ceremonies prescribed in the law, and in refraining from all the acts which the law forbade.

Righteousness was thus placed too much in externals and too little in the state of the heart. It exaggerated the ritual features of religion, and overlooked its deeper spiritual requirements upon conduct and life. Either of two results might flow from this externalism in religion—results which would be equally detrimental to a healthy religious life. On the one hand, if one supposed himself to have done all that was required, he would easily fall a prey to spiritual pride, for had he not achieved this lofty height of goodness by his own exertions? On the other hand, if a man felt that he had failed to do the Divine will and to win acceptance with God, he would naturally become hopeless and despondent. We accordingly find that the religious life of the Jewish people, to a great extent, oscillated between self-righteousness and despair. Jesus must therefore have demanded something vastly superior to this observance of ritual, this conformity to commandments and prohibitions, when He said, 'Seek ye first God's kingdom and righteousness' (Mt 6³³). What then is that true righteousness, that *δικαιοσύνη θεοῦ*, which Christ requires and fosters in the lives of His disciples? This question can best be answered by appeal to the Sermon on the Mount, a collection of the sayings of Jesus, some of which were uttered on various occasions. They are grouped together as illustrating chiefly the nature and demands of 'God's kingdom and righteousness.' In the 'beatitudes' are described the qualities which fit men for the kingdom of God—the characteristics which constitute true righteousness. They are such as spiritual poverty, a sense of one's weakness and sin; meekness, mercifulness, purity, and peacemaking. They are qualities which stand opposed to pride, presumption, and selfishness. They are, above all, qualities of the inner life. They describe what a man is in the secret springs of his motives and dispositions (Mt 5³⁻⁹).

The true righteousness is a heroic virtue. It is founded in strong convictions of truth and duty, and is willing to suffer, if need be, for the truth (Mt 5¹⁰⁻¹²). The truly righteous, the sons of the kingdom, have a saving, illuminating power. They are the world's 'salt' and 'light.' They preserve the world from moral corruption, and they shed abroad upon men the light of love and helpfulness (Mt 5¹³⁻¹⁶). Again, the true righteousness is not a destructive, but a constructive principle. The righteousness of Christ's kingdom will not break with the past. It will conserve all that was true and good in OT religion, and build upon it. It requires that the earlier and imperfect system of

Judaism should not be rejected, but fulfilled. Its true ideal content is to be developed out of the limited and provisional form in which it had been apprehended in earlier times, into its destined universality and spirituality. The Divine law which has been revealed is to be observed and taught in its essential spiritual content, and not merely in its outer form, and thus the righteousness of the sons of the kingdom will 'exceed the righteousness of the scribes and Pharisees' (Mt 5¹⁷⁻²⁰).

Then follow several illustrations of the true righteousness. The law prohibiting murder had commonly been taken merely as a prohibition of an overt act. Not to kill another was to obey it. But Jesus places right and wrong, not in overt acts, but in inner motives. He who cherishes murder and hate—the passions from which murder springs—is, morally speaking, a murderer. From hate murder would spring were there no outward constraint preventing it. But he who would commit an overt act of sin but for an outward restraint, has really committed it in his heart already (Mt 5²¹⁻²⁶). The same principle holds good respecting sensual passion. The impure thought, the carnal desire, is itself, in God's sight, the act of adultery. Every effort must be made, every necessary self-denial endured, by those who would be truly righteous, to break the power of evil thought and to exclude impurity from the heart (Mt 5²⁷⁻³²).

Three further illustrations are given. The first concerns truthfulness. The Jews had been accustomed to make a fictitious distinction between oaths taken in J's name, which they had regarded as sacred, and other oaths, which they had felt at liberty to violate. Jesus discountenances not only this false distinction, but all such profane appeals to sacred names or objects. Those who confirm their assertions and promises by such oaths thereby betray the fact that their simple word is not regarded as binding, and thus show themselves not to be really truthful. The simple assertion should be enough. The honest man's word is as good as his most solemn oath. Be absolutely truthful, says Jesus, and the meaning and occasion of these irreverent oaths in common use will completely disappear (Mt 5³³⁻³⁷). The next illustration respects revenge. The OT civil law of retaliation—which, at best, was a rude kind of justice incident to an undeveloped ethical code—was commonly construed as a permission to take private revenge. This disposition to do the offender an injury like that which he has done, Jesus discountenances. Better suffer injustice, He says, than resort to revenge, which springs from hate, and is wholly incompatible with love (Mt 5³⁸⁻⁴²). The third illustration deals with the contrast of love and hate. From the OT maxim, 'Thou shalt love thy neighbour,' many had drawn the inference, 'Thou shalt hate thine enemy.' Then, by making 'neighbour' mean 'friend,' it was easy to find in the maxim a justification for hatred towards personal enemies. This inference Jesus utterly repudiates. The righteousness of the kingdom requires that we should love all men; that we should seek the good even of our enemies. We may not hate even those who injure us. The gospel has no place for hatred, because it is essentially un-Godlike. God hates no one; He blesses all, even the wicked. So must the man do who possesses God's righteousness. Love is the essential principle of moral perfection, and hatred is the opposite of love. This love which finds its perfect exemplification in the character and action of God is the law of the Christian life. The Christian ideal is completeness of love; conformity to the moral complete-

ness of God's own perfectly loving character (Mt 5⁴⁵⁻⁴⁸).

The next group of passages illustrates how men are to 'do their righteousness.' The first illustration is drawn from alms-giving. Beneficence is not to be ostentatious. Those who give alms to be seen of men must do so from selfish motives. They, indeed, obtain their appropriate reward, but it is not the Divine approval (Mt 6¹⁻⁴). The next example is prayer. A false righteousness leads men to perform their devotions in public that they may create the impression that they are unusually pious. The true inner righteousness dictates that men pray in secret. Nor is prayer to be based on the idea that God is a reluctant Giver whose favour is to be won by the wearisome repetition of the same wish or cry. God is, on the contrary, a willing Giver who knows all our wants in advance, and only desires that we be willing to receive His mercies. A simple sincere request is therefore enough. Then follows the model prayer illustrating the true spirit, as well as the simple form of prayer (Mt 6⁹⁻¹³). Jesus then shows that fasting performed with a mere semblance of humility and sorrow is no part of true righteousness, but that it may be such when practised unostentatiously from real inward contrition (Mt 6¹⁶⁻¹⁸). Then follows a series of striking contrasts between the worldly and selfish spirit and supreme concern for the spiritual life. The latter must be placed first, and must subordinate to itself all other interests. Every life must have one main direction. There can be but one supreme choice. That should be made central in life which is truly central. Other things, so far as needful, God will supply. Seek, then, first His kingdom, and His righteousness; and all those things shall be added unto you (Mt 6³³⁻³⁴).

It is not necessary for our present purpose to follow this series of sayings further. It illustrates, better than isolated uses of the words 'righteous' and 'righteousness' could do, the real content of Jesus' doctrine of righteousness as the Synoptic tradition has preserved it. It does not, indeed, yield us any formal definition of righteousness, but it shows us what righteousness is by exhibiting its characteristics and by showing how it expresses itself in human conduct. It leaves no doubt that the righteousness of the kingdom is essentially Godlike character. If it is not precisely identical with love, it is, at any rate, absolutely inseparable from it. Love is the completeness (*τελειότης*) of God, and the completeness of character in men consists in love. Righteousness appears to be conceived of as the different kinds of right action which have their spring in love. Righteousness is never presented in our sources as a mere judicial principle in contrast to mercy or grace. It is right conduct and right character, both of which are grounded in love. Nor does the word bear the semi-formal sense in which we shall find it employed by St. Paul. It is not thought of under the form of a *status* or relation; it is used rather in the simple ethical sense, to include the qualities of a character which is acceptable to God.

(B) RIGHTEOUSNESS IN THE WRITINGS OF ST. PAUL.—In several instances the phrase *δικαιοσύνη θεοῦ* is used to denote an attribute of God. In Ro 3⁵ St. Paul asks the rhetorical question: 'But if our unrighteousness commendeth the righteousness of God, what shall we say?' The context shows that the 'righteousness of God' here means essentially the same as the faithfulness or truthfulness of God (cf. vv. 3-4). His righteousness is His faithfulness to His own nature and promises. If men are untrue to Him, their falseness will but set His righteousness in the stronger relief. Again, in 3^{21, 25} St. Paul speaks of the *ἐνδεξις τῆς δικαιοσύνης*

αὐτοῦ which God has made in the death of Christ, and which should prevent men from supposing that because God treated leniently the sins of men in past times, He is indifferent to sin or lightly regards it. Here, then, *δικαιοσύνη θεοῦ* must denote that self-respecting quality of holiness in God, that reaction of His nature against sin, which must find expression in condemnation of it. Righteousness in this sense is the reaction of God's holy nature against sin which expresses itself in the Divine wrath (*ὀργή θεοῦ*).

In the prevailing use of the word by St. Paul, however, righteousness means the state of acceptance with God into which one enters by faith. This is its meaning in Ro 1¹⁷ 'For therein (in the gospel) is revealed a righteousness of God by faith unto faith; as it is written, But the righteous shall live by faith'; also in Ro 3^{21, 22} 'But now apart from the law a righteousness of God hath been manifested, being witnessed by the law and the prophets; even the righteousness of God through faith in Jesus Christ unto all them that believe.' We cannot accept the view of some, that in these passages also 'the righteousness of God' refers to the character of God, although we grant that between the idea of righteousness as an attribute of God and righteousness as a gift of God, a state of acceptance with God into which God introduces one, there is an essential connexion (cf. Sanday-Headlam on Ro 1¹⁷). The righteousness which God confers has its ground in the righteousness of God. The state of acceptance into which the believer is represented as inducted is a state of fellowship and harmony with God. The conditions of being accounted righteous are such as God's perfect character prescribes. These conditions may be summed up in the word *faith*. Now faith is, in St. Paul's view, a personal relation with God mediated through Christ. It involves by its very nature spiritual union with God, obedience to His will, and increasing likeness of character to Him. There is thus a close connexion between the righteous character of God and the righteous *status* which He reckons as belonging to believers on condition of faith. But, formally considered, they are quite different.

The meaning of *δικαιοσύνη* now under consideration explains the meaning of justification (*δικαίωσις*), and of the reckoning of faith for righteousness (Ro 4). To *justify* means in Pauline phraseology, to regard and treat one as righteous; to confer the gift of righteousness: in other words, to declare one accepted with God. This judgment of justification God pronounces upon condition of faith. The phrase 'to reckon faith for righteousness' is a periphrasis for 'to justify.' To declare righteous upon condition of faith, means the same as to reckon faith for righteousness. In both cases the meaning, expressed in a somewhat formal and legal way, is simply this: that faith is the necessary condition of a gracious salvation. Salvation is a free gift; faith is its humble and thankful acceptance. St. Paul is fond of conceiving this process of salvation in forensic forms of thought, and of interpreting it by judicial analogies. This tendency is due to his OT and Rabbinic training. None the less does he lay stress upon its ethical and spiritual significance. If justification is a 'forensic act,' there corresponds to it and is involved in it a spiritual renewal. If righteousness is a gift or a state, it is also a character. It is an inward state as well as an outward one. It would be a great mistake to represent St. Paul's doctrine of salvation as predominantly legal or forensic. He has indeed brought over from his Jewish training the legal conception of righteousness as an acquittal before God and of justification as the decree of acquittal, but his intensely ethical principles of grace and faith put quite a different content into these thought-forms

from what they have in Jewish theology. Essentially, St. Paul is far more of a mystic than of a legalist, though he still speaks, to some extent, the language of legalism in which he had been born and trained. Cf. Thackeray, *Relation of St. Paul to Contemporary Jewish Thought*, 87 ff.

The question arises: If faith is reckoned for righteousness, is it because faith is synonymous with righteousness or a substitute for it? Faith is not righteousness in the sense of being so inherently excellent that it may be regarded as equivalent to righteousness. The power and value of faith are in its object. Faith is great because it allies man with God. Faith is union with Christ, and this union involves and guarantees increasing Christlikeness, and Christlikeness is righteousness. The imputation of faith for righteousness involves a gracious treatment of man on the part of God; it is an anticipatory declaration of what the grace of God will increasingly realize in those who in faith open their lives to the power of the Divine life. Justification means an entire forgiveness and an increasing attainment of righteousness.

(C) RIGHTEOUSNESS IN THE JOHANNINE WRITINGS.—In one passage only in the Fourth Gospel is the word *δικαιος* applied to God: 'O righteous Father, the world knew thee not, but I knew thee' (17²⁶). The idea of God's righteousness here appears to be that it is the quality which prevents Him from passing the same judgment upon Christ's disciples which He passes upon the sinful world. Upon this equitableness of God, Jesus bases His confidence in asking that special blessings be conferred upon His disciples. The thought is similar in 17¹¹, where the Father is designated as *ἀγιος*. As the One who is absolutely good,—wholly separate from all that is sinful and wrong,—God is besought to guard from evil those whom He has given to His Son. In both these cases the righteousness or holiness of God is conceived of, not as a forensic or retributive quality, but as God's own moral self-consistency, His faithfulness to His own equity.

In 1 Jn (1⁹ 2²⁹) God is described as *δικαιος*, and, in both cases, in a sense closely akin to that which we have found in the Gospel. 'If we confess our sins, he is faithful and righteous (*πιστός καὶ δίκαιος*) to forgive us our sins' (1⁹). The correlation of the word *δικαιος* with the word *πιστός*, as well as the entire context, shows that righteousness here is that quality of God which would certainly lead Him to forgive those who repent. It would be inconsistent in God—contrary alike to His promises and to His nature—not to forgive the penitent, and to exert upon his life the purifying influences of His grace. In the remaining passage (2²⁹), the term 'righteous' has a broader meaning, and designates the moral perfection of God in general, as the type and ideal of all goodness in man: 'If ye know that he (God) is righteous, ye know that every one also that doeth righteousness is begotten of him.' Since God is essentially righteous, those who are begotten of Him must also be righteous. A similar thought is presented in 3⁷, but in the reverse order: 'He that doeth righteousness is righteous, even as he (Christ) is righteous.' As against the Gnostic over-emphasis of knowledge, the apostle insists that the mere intellectual possession of truth is not enough. Truth, or righteousness, is not merely something to be known, but something to be done (1⁶ 3²¹). The man is righteous who walks in the truth as his native element (2 Jn 4, 3 Jn 3.4); in whom the truth dwells, controlling and guiding him (Jn 8⁴, 1 Jn 2⁴); who belongs to the truth and draws from it the strength and inspiration of his life (Jn 18²⁷, 1 Jn 2²¹ 3¹⁹). Doctrine and life are inseparable.

(D) RIGHTEOUSNESS IN OTHER NT WRITINGS.—There is nothing characteristically different in the conception of righteousness in the minor types of NT teaching from what we have already found. The word is almost always used in the practical, religious sense of the good life which Christ in the gospel requires and imparts. Both James and Hebrews allude to righteousness in the sense of a gift of God on condition of faith (Ja 2², He 11⁷), but both these Epistles generally speak of it as that good life which the Christian loves and seeks. In the Petrine Epistles righteousness is the holy life in contrast to sin, as in 1 P 2²⁴ 'that we, having died unto sins, might live unto righteousness.' In Revelation righteousness is predicated of the judgment (19¹¹, cf. 15⁴), and is said to be 'done' (cf. 1 Jn) by those who are righteous in the world to come (22¹¹).

From this sketch it appears that the NT presents the idea of righteousness mainly in two ways: (1) as a quality of God's nature and action, and (2) as the character which God requires of man. The first of these ideas is the logical basis of the second. What God requires is grounded in what God is. What, now, is the actual content of that Divine righteousness which is the test and measure of all good life in men? What is the ethical nature of God? St. John replies that it is love, and the whole NT conception of God agrees with this answer. Righteousness is an activity or aspect of love. When it is used to denote more especially the law and penalty side of God's nature, it is the self-respecting, self-preservative aspect of holy love—love as it appears in forbidding all sin and enjoining conformity to the perfect standard of uprightness. Righteousness is an element of love, without which love would be mere benevolence or good-nature. But since love is eternally holy, and is a consuming fire to all sin, justice and judgment are the foundation of God's throne. In the NT, righteousness is sometimes used more comprehensively to denote the equity or uprightness of God in general, His correspondence to what He ought to be; sometimes more narrowly to denote the judicial aspect of His nature and action. In the latter sense it may be defined as the self-respect of perfect love.

LITERATURE.—The NT idea of righteousness is more or less fully discussed in all Commentaries and Biblical Theologies. The Pauline doctrine is carefully considered in Meyer and Sanday-Headlam on *Romans*, and in Morison on *Romans Third*. The general subject receives attention in the *NT Theologies* of Baur, Weiss, Beyer, Bovon, and Holtzmann, and special aspects of it in Wendt's *Teaching of Jesus*, Bruce's *Kingdom of God*, and St. Paul's *Conception of Christianity*, and Stevens' *Pauline Theology*. A careful study of the words will be found in Cremer's *Bib. Theol. Lex. of NT Greek*.

G. B. STEVENS.

RIMMON (רִמְמוֹן).—The name of a Syrian deity mentioned as occupying a temple in Damascus during the activity of Elisha in Israel (2 K 5¹⁸). It appears in such compound proper names as Hadad-rimmon (Zec 12¹¹) and Tab-rimmon (1 K 15¹⁸). LXX reads *Ρεμμάρ* and the Vulg. *Remmon*. It has been interpreted as 'pomegranate' by Movers (*Die Phönizier*, i. 197 f.) and Lenormant (*Lettres assyriologiques*, ii. 215, r. 1). But the name is now identified with the Bab.-Assyr. deity *Rammān*, god of wind and weather, of the air and clouds, of thunder, lightning, and storm. He is designated in the inscriptions as AN. IM, that is, 'god of the celestial regions,' and on reliefs and seals he is figured as armed like Jove with thunderbolts. *Rammān* is sometimes derived from *rm* or *rm*, and thus taken to mean 'the high,' 'majestic' one (cf. Baudissin, *Studien*, i. p. 307); again it is derived from the stem *rm* 'thunder,' and supposed to be 'the thunderer' (Schrader, *Jahrb. f. prot. Theol.* i. 334 ff.). The correct derivation of the word is that advocated by Pinches from a Bab.-

Assyr. root *ramānu*, 'roar,' 'thunder' (cf. Del. *HWB* 624). For Syria and the west, in a comparative list of deities, *Hadad*, *Adad*, *Daddu*, *Dala*, *Addu* appear as special names for Rammān (Bezold, *PSBA*, June 7, 1897). The identification of *Hadad* or *Adad* of Syria with *Rammān* of Babylonia-Assyria is established by the fact that these two names are represented by one and the same ideogram in several proper names (cf. Pinches, *PSBA*, 1883, pp. 71-73). Rimmon is then a Hebraized form (the word for 'pomegranate') of the Bab.-Assyr. name *Rammān*, and is identical with the Syrian god *Hadad* or *Adad*. The importance of this deity in Syria is seen in the fact that his name heads the list of four gods of the North Syrian kingdom of *Panammū* to whom his son *Bar-Rakūb* offered prayer (cf. *Ausgrabungen in Sendschirli*, vol. i. p. 61). For a detailed description of the latest utterances on the etymology of the name, and the attributes and relations of Rammān, see Jastrow, *Religion of Babylonia and Assyria*, pp. 156-164. It may be that the compound (Heb.) form *Hadad-Rimmon* (in Bab.-Assyr. *Adad-Rammān*) arose, as suggested by Baethgen (*Beitr. z. sem. Relig.-Gesch.* 75), in a manner similar to Adonis-Osiris in Cyprus. Such combination would be self-explanatory to the population of all Western Asia. To this 'prince of the power of the air' was dedicated the eleventh month, the rain-month Shebat. In the Bab. pantheon, Rammān appears as the son of Anu and Anatu.

'Rimmon'; Meyer, *Gesch.* i. 175, 182; Hilprecht, *Assyriaca*, 76 ff.

IRA M. PRICE.

RIMMON (רִמּוֹן 'pomegranate,' Ρερμων).—A Beerothite, the father of Baanah and Rechab, who murdered Ish-bosheth, the son and successor of Saul (2 S 4^{2, 5, 9}).

RIMMON.—1. The rock (רִמּוֹן (ה) קֶלֶע, ἡ πέτρα (ροῦ) Ρερμων) in the eastern highlands or wilderness (*midbar*) of Benjamin, whither the remnants of the Benjamites (Jg 20⁴⁵ 21¹³) fled. It has been identified by Robinson (i. 440) as a lofty rock or conical chalky hill, visible in all directions, on the summit of which stands the village of *Rummān*. It forms a remarkable object in the landscape as seen from the village of *Jibā*, some 6 miles distant. It is about 4 miles east of *Beitin* (Bethel) (cf. van de Velde, *Memoir*, 345; *SWP* ii. 292). A place of this name is mentioned by Eusebius and Jerome as existing in their day 15 miles north of Jerusalem (*Onomast.* s. 'Rimmon').

2. (רִמּוֹן) A city in the south of Judah, towards the border of Edom, Jos 15²² ('Ερωμωθ); in 19⁷ (Β' Ερεμμωθ, Α' Ρερμων) counted to Simeon; in *Zec* 14¹⁰ ('Ρερμων) named as lying to the far south of Jerusalem. In the first two of these passages Rimmon is coupled with Ain (in the first with, in the second without, the conjunction *v*), cf. 1 Ch 4³². In *Neh* 11²⁸, on the other hand, we read *En-rimmon* ('spring of the pomegranate'), and there are good grounds for holding that this is the correct reading in all the other passages as well. See *EN-RIMMON*.

Van de Velde (*Mem.* 344) has identified Rimmon and En-rimmon with *Umm er-Rumāmin*, between Beit-Jibrin and Bir es-Seba, very nearly at the distance mentioned by Eusebius. He mentions that Grotius and Rosenmüller suppose, as a solution of the difficulty, that Ain and Rimmon were near together, and in later years united in one. 'Ain is probably identical with a site only half a mile north of *Umm er-Rumāmin*, now called *Tell Khewelfeh*, and opposite another ancient site, *Tell*

Hora. Between the two *tells* is a copious fountain filling a large ancient reservoir, which for miles around is the chief watering-place of the Bedawin population of this region. A city at the base of which such a remarkable fountain existed would well derive its name from "the fountain," and its vicinity to *Rimmon* would justify both its distinct enumeration and its collective appellation.' *SWP* (iii. p. 397) confirms this, stating that *Khan Khuweilfeh* is an extensive ruin near *Bir Khuweilfeh*. Caves, cisterns, broken pillars, shafts, and traces of walls are found. The ruins extend along the valley and on the higher ground. The well is large, lined with well-dressed stones, and resembling the Beersheba wells. The *tell* has an artificially-levelled platform, and seems to have formed a fortress. The water-supply is perennial. At *Khan umm er-Rumāmin* there are heaps of well-dressed stones, many of which are drafted. There are also several large lintel stones, and part of a stone apparently representing the seven-branched candlestick. These remains probably belong to the Byzantine period (*SWP* iii. 398).

3. In Jos 19¹⁵ one of the boundaries of Zebulun is given as 'Rimmon that stretched to the Nēah' (רִמּוֹן הַנְּהָר; AV wrongly 'Remmon-methoar to Neah'). In 1 Ch 6⁷⁷ (Heb. 62) the name appears as *Rimmon* (רִמּוֹן), and in Jos 21³⁵ as *Rimmonah* (for which, by a textual error, MT has *Dimnah* [which see]). See Dillm. *Joshua*, *ad loc.*

Robinson proposes to identify Rimmon with the village of *Rummāneh*, north of Nazareth, and this site has since been accepted. *Rummāneh* is a small village built of stone, and containing about 70 Moslems. It is situated on a low ridge above the plain, and there are a few olive trees around. The water-supply is from cisterns and a well. There are rock-cut caves, and traces of ancient remains in the village (*SWP* i. 417).

C. WARREN.

RIMMONO.—See **RIMMON**, No. 3.

RIMMON-PEREZ (AV Rimmon-parez, following, with LXX and Vulg., the pausal form given in the MT of Nu 33^{19, 20} רִמּוֹן פֶּרֶז; LXX Ρερμων Φαρης (also Ρερμων and Ρερμων Φ.), Vulg. *Remmonphares*).—One of the twelve camping places of the children of Israel, mentioned only in the itinerary of Nu 33, between Hazeroth and Moseroth. Ewald identifies it with Rimmon in the south of Judah (Jos 15²² etc.), and some of the names following are referred by him to the same region. He thinks it probable that the Israelites made their way for some distance into the southern part of the country, afterwards allotted to Judah and Simeon, and that in this portion of the itinerary a trace may be found of such a campaign; cf. Nu 14²⁵ 21¹⁻³, and *HORMAH*. The second part of the name may have been added in commemoration of a victory gained at this place, after the analogy of *BAAL-PERAZIM*.

A. T. CHAPMAN.

RING (usually רִנְגָא *tabbā'ath*; δακτύλιος).—The rings of the tabernacle and its furniture are spoken of as having been cast (Ex 25¹² etc.), and this sense of moulding appears in the cognate Arabic *ṭaba'a* 'to print,' *maṭba'ah* 'printing press.' Rings are referred to in connexion with the boards for the corners of the tabernacle (Ex 26²⁴); there are also rings through which bars pass to keep in position the upright boards for the sides of the tabernacle (v. 29). Similarly, rings were attached to the ark of the covenant (25¹²), to the brazen altar (27^{4, 7}), to the altar of incense (30⁴), and were used for fastening on the high priest's breastplate (28²³).

In Est 1⁶ and Ca 5¹⁴ לִיָּלִי is translated 'ring' in AV and RV, but a preferable rendering would be 'cylinder' or 'rod.' The 'rings' (רִנְגָא) of Ezk 1¹⁸ are *felloes* (so RVm; cf. 1 K 7²³). In RV the more

general term 'ring' is used instead of 'ear-ring' (עָרִיךְ; see EAR-RING) in Gn 24²⁴ 35⁴, Job 42¹¹, Ex 32^{1,3}. In Ezk 16¹², where RV gives 'ring' for 'jewel' of AV, the allusion may be, not to a ring in the nose, but to the custom still prevailing among the Bedawin, in the case of a favourite child, of fastening an ornamental ring, jewel, or bead to a lock of hair over the brow and allowing it to dangle down as a protective charm nearly as far as the eyes. The ear-ring as worn by the Bedawin is about an inch and a half in diameter, and opens with a hinge like a bracelet, so that when closed it clasps the outer ear. The hasty removal of such ornaments is translated 'break off' (שָׁקַע) in Ex 32². The ring (*ṭabba'ath*) appears as an ornament in Is 3²¹, and as a gift for sacred purposes in Ex 35²², Nu 31⁵⁰ (both P).

Signet-ring.—In closest connexion with the general meaning of 'ring' is the special sense of signet-ring: Gn 41⁴², Est 3^{10, 12} 8^{2, 10}, in which *ṭabba'ath* is the equivalent of עֶמְקָה *hēthām* in Gn 38¹⁸ (in v. 25 חֶמְקָה), Ex 28^{11, 21, 36} 39^{6, 14, 30}, Jer 22²⁴, Hag 2², Job 38¹⁴ 41⁷, Ca 8⁵; יִצְקָה in Dn 6¹⁷; δακτύλιος in Lk 15²², and σφραγίς in Ro 4¹¹, 1 Co 9², Apoc. *passim*, etc. See art. SIGNET.

Both in biblical usage and in modern custom there are several important meanings connected with the employment of signet-rings.

1. *Irrevocable testimony*, Jer 32⁴, Ro 4¹¹, 1 Co 9².—Where the art of writing is limited to the educated few, as is the case still in the East, the difficulty of affixing the signature is got over by the use of a seal. In front of every Turkish police-court men sit with paper and ink ready to write out a statement of evidence or form of appeal, and one or two men are usually to be met with who have seals for sale and are expert in cutting monograms for brass seals. When a village is divided into two parties, as in the case of a dispute about a right of way through private property, it is customary to present to the local magistrate two papers covered with the seals of those who thus witness for and against the road.

2. *Delegated authority*.—Thus Pharaoh took off his ring and put it upon Joseph (Gn 41⁴²), and Ahasuerus gave his ring to Haman (Est 3¹⁰). Hence the figurative description of Zerubbabel as a signet of the Lord (Hag 2²²). Thus in an Oriental custom-house a junior clerk borrows the seal of a busy higher official, and an indolently obliging censor leaves in the mission press his seal which gives to books the right of circulation in the empire.

3. *Completion*.—From its being affixed to the end of a document as a testimony to the truth of what is stated, the act of applying the seal gave a sense of finality to what was thus sealed (Dn 9²⁴ 12⁴).

4. *Inviolability* (Job 14¹⁷, Eph 4³⁰, Rev 5²).—A sense of sanctity was connected with anything sealed.

The veneration felt towards anything guarded by a seal was illustrated some years ago at Sidon. A coasting vessel had gone on the rocks near that town, and a few days afterwards there was washed ashore a small bag of gold coins, which the captain had received from a British merchant in Beyrout, with instructions to deliver it over to another merchant in Jaffa. The bag was found on the Sidon beach by a Syrian peasant; and though such a treasure, washed up at his feet from the sea, might in itself have been regarded as sent from God to him, he shrank from breaking the seal. He walked the intervening distance of twenty miles in order to deliver the money to its owner in Beyrout.

Arabic tales abound in accounts of things kept secret and wonders wrought by seals of power, the most celebrated being the wishing seal of king Solomon.

In the Book of Job there occur several beautiful figurative applications of the signet, such as the sealing up of the stars (9⁷) as of something folded away and laid out of sight, the sealing of instruction in night visions (33¹⁶) like the imprinting of a mould upon clay, and the sealing up of man's

hand (37⁷) as expressing the limitation of human power. See also art. SEAL, SEALING.

G. M. MACKIE.

RINGSTRAKED.—So the adj. רִיגָה *āḥōd* is tr^d in all its occurrences, Gn 30^{30, 39, 40} 31^{8, 9, 10, 12}. The root verb רִיגָה is found once, Gn 22⁹ 'Abraham . . . bound Isaac his son,' so that the primary idea is 'banded' or 'striped.' The adj. is used of striped cattle, goats, or sheep. The LXX tr. δαίλευκος except in 31⁸ λευκός, and it is followed generally by the Vulg. (*albus*) and most English versions 'white'; but Tind. has 'straked' in 31⁸, and then the Bishops' Bible gives 'ringstraked' throughout. The word does not seem to occur in Eng. literature elsewhere. See STRAKE. J. HASTINGS.

RINNAH (רִנָּה).—A Judahite, one of the sons of Shimon, 1 Ch 4²⁰. The LXX (B Ἀνά, A Παρνών) makes him the son of Hanan, taking the following רִנָּה thus (ὡς Παρά [Ἀνά]) instead of making it a proper name, BEN-HANAN, as AV and RV.

RIPHATH (רִפְתָּה; A Ῥιφάθ, D Ῥεφάθ).—One of the sons of Gomer, Gn 10³. The parallel passage, 1 Ch 1⁶, reads **Diphath** (רִפְתָּה, so RV, but AV Riphath); but this is certainly an ancient scribal error, easily explicable as due to an interchange of ר and ד. The LXX (B Ῥεφάθ, A Ῥιφάθ) and Vulgate (*Riphath*) support this view.

The ethnographical sense of Riphath is uncertain. Perhaps the view of Josephus (*Ant.* i. vi. 1) that the Riphæans (i.e. Paphlagonians) are meant is still the most plausible. Bochart and Lagarde think of the Bithynian river Rhebas, which falls into the Black Sea, and the district Rhebantia in the Thracian Bosphorus; but, as Dillmann remarks, this appears to be too far west for the position of Riphath between ASHKENAZ (? Phrygia) and TOGARMAH (? W. Armenia). A widely-held opinion, which makes its appearance as early as the Book of Jubilees, identified Riphath with the fabulous Riphæan mountains, which were supposed to form the northern boundary of the earth.

J. A. SELBIE.

RISSAH (רִיסָה; B Δεσά, AF Ῥεσά).—A camping place of the children of Israel, noted only in Nu 33^{21, 22}. It has been proposed to identify it with *Rasa* in the Peutinger Tables, on the road from the Gulf of Akabah to Jerusalem, or with Ῥήσα of Jos. *Ant.* xiv. xiii. 9, xv. 2, BJ i. xiii. 8; but according to some MSS this place is Θήσσα.

A. T. CHAPMAN.

RITHMAH (רִיתְמָה; LXX Ῥαβμά; Vulg. *Rethma*, Nu 33^{18, 19}).—The first of the twelve stations following Hazeroth which are given in Nu 33 only. The name seems to be connected with רִתְמָה (AV and RV 'juniper', RVm 'broom'), and to indicate a place where that shrub was found in abundance. Such are noted by Robinson (*Wady Abu Retamât*) and Palmer (*Wady Erthame*), but any definite identification of this or of the eleven following stations must be regarded as very uncertain.

A. T. CHAPMAN.

RIVER.—In the OT this is the AV rendering of the following words: 1. נָחַל; or נָחַר, an Egyptian loan-word, which in the singular is always (except in Dn 12⁵ bis. 6, 7, where it means the Tigris) used of the Nile: Gn 41^{1, 2, 3} bis. 17, 18, Ex 12^{22, 23, 5} bis. 4⁹ bis. 7^{15, 17, 18} ter. 20 bis. 21 ter. 24 bis. 25, 28 [Eng. 8³ 8⁵ (9), 7 (11) 17⁵ [all JE], Am 8^{8, 9}, * Is 19⁷ ter 23^{8, 10}, Jer 46 [Gr. 26] 7, 8, Ezk 29^{3b, 9}, Zec 10¹¹]. In all these passages the LXX renders by ποταμός (in Ezk 20^{2b, 9}, Zec 10¹¹ ποταμοί) except Is 23^{8, 10}, where a different text appears to have been followed. The plur. נָחָרִים is used of the Nile arms or canals: Ex 7¹⁹ 8^{1 (5)} [both

* The prophet's allusion in these two passages to the rise and the fall of the Nile (נָחַר נָחָר) is quite obscured by the AV rendering 'flood.'

P], Is 7¹⁸ 19⁶ 37²⁵ = 2 K 19³⁴, Nah 3⁵, Ezk 29⁴ 4 bis. * 5. 10 30¹², Ps 78⁴⁴. The LXX has in all these passages ποταμοί (in Is 7¹⁸, Ezk 29⁴ 4 bis. * ποταμός) except Is 19⁶, which reads αὐτοὺς ποταμοῦ ποταμοῦ, and 37²⁵, where the text is mutilated. The same word ποταμός is used of watercourses in general in Is 33²¹ (δαῖ- ποτες), and is even applied once to shafts or tunnels cut in the rock by the miner, Job 28¹⁰ (cf. נַחַל in v. 4).

2. נַחַל (LXX in the following passages ποταμός, unless otherwise noted), the most general term for river, occurs some 120 times in the OT. It is uncertain whether it is derived from a root נַחַל 'to flow,' or whether the latter is a denominative from נַחַל, which may be a loan-word (cf. Assy. *nāru*, 'stream,' 'river'). It is used of rivers in general in Nu 24⁹ [JE], Job 14¹¹ 40²⁵, Ps 74¹⁵ 78¹⁶ etc.; very frequently of particular rivers: the river of Eden and its branches Gn 2¹⁰ 12. 14; the Nile Is 19⁶; esp. the Euphrates (נַחַל עֻפְרַת) Gn 15¹⁸, Dt 17, Jos 14, which is often called נַחַר as the river *kar' ēloxyh* (cf. the title 'the great river,' נַחַר קָדִישׁ, in Gn 15¹⁸, Dt 17, although this title is once, Dn 10⁴, applied to the Tigris), Gn 31²¹, Ex 23³¹, Nu 22⁶, Jos 24² 2. 14. 15 [all E], Ezr 8¹⁸, Neh 2⁷ 9 37 (and Aram. נַחַר, emphat. נַחַר, Ezr 4¹⁰ 11. 16. 17. 30 and oft.), prob. also Gn 36¹⁷ (P; see REHOBOTH, No. 2), without the art. (poet.) in Is 7²⁰, Jer 2¹⁵, Mic 7¹², Zec 9¹⁰, Ps 72⁹; the river of Gozan 2 K 17¹⁸ 18¹¹, cf. 1 Ch 5²⁶; the rivers of Babylon Ps 137¹; the gates of the 'rivers' of Nineveh Nah 2⁷ (BA πύλαι τῶν πόντων, καὶ π. τ. ποταμῶν), as נַחַר is used of the canals of Egypt in Ex 7¹⁹ 8¹ (in both נַחַר); In Job 28¹¹ 'he (the miner) bindeth the streams (נַחַר) that they trickle not,' the reference is to underground water which is prevented by the use of lime or clay from percolating into the mine (A. B. Davidson, *ad loc.*). The נַחַר in Aram-naharaim (Gn 24¹⁰, Dt 23⁴ [both Μεσοποταμία], Jg 3⁸ [B ποταμοὶ Συρίας, A 2. Μεσοποταμία ποταμῶν], Ps 60 [title; Μεσοποταμία Συρίας]) was probably meant by the Hebrew writers to have a dual sense ('Aram of the two rivers,' these being probably [see Dillm. on Gn 24¹⁰] the Euphrates and the Chaboras), but the original ending may have been a plural one (נַחַר), as would appear to be implied by the Tel el-Amarna *Na-ri-ma*, *Nahrinut*, and the Egypt. *Nhrima*.

3. נַחַל (etym. uncertain) is used either (a) of a torrent of rushing water or (b) of a valley through which a torrent flows or has flowed, a 'torrent-valley' (modern *wady*).† For this latter sense cf. Gn 26¹⁷ 18, Nu 13²⁵ 24 21¹² 32², Dt 1⁴ 23⁶ (see Driver's note; so Jos 12² 13⁹ 16 [same phrases]; v. 5 is uncertain [see Driver's note], so Jos 12² (2nd time) 31² 16 (2nd time) 44² [as 29²⁴], 2 K 10³². For AV 'river(s)' RV substitutes the very misleading tr. 'brook(s)' in Nu 34⁵, Dt 10⁷, Jos 15⁴ 47 16⁸ 17⁹ 19¹¹, 1 K 8⁸³, 2 K 24⁷, 2 Ch 7⁸, Am 6¹⁴, Ezk 47¹⁹ 48²⁸, and the equally misleading 'valley' in Dt 24⁴ 36 bis 38. 12 44², Jos 12² 2 bis 13⁹ bis. 16 bis, 2 K 10³². The use of נַחַל in the sense (a) above (reproduced by the LXX in the following passages, unless otherwise noted, by χειμάρρους or χειμάρρος) may be illustrated by its application to the Kishon Jg 4⁷ 13 5²¹ 17, Ps 83¹⁰ (10); to Elijah's stream Cherith 1 K 17⁴ 5. 6. 7, which was liable to dry up in summer, cf. Sir 40¹³ (ποταμός); to water bursting from the rock Ps 78²⁰ (|| עֵשׂ). Prefixed to another word, it is often used in the sense (b) above: *Nahal* Arnon Nu 21¹⁴ [here plur.], Dt 24⁴ (φάραγξ) 36 38. 12. 16 44², Jos 12² 2 13⁹ 16, 2 K 10³²; *N. Eshcol* ('Wady of the Cluster') Nu 32⁹, Dt 1²¹ (both φάραγξ βόρρος); *N. hushshittim*, 'Wady of the Acacias' Jl 4 (3) 18 (χειμάρρος τῶν σχοίνων); *N. Besor*

1 S 30⁹ 10. 21; *N. Gad* 2 S 24⁵; *N. Gerar* Gn 26¹⁷; *N. Zered* Nu 21¹², Dt 2¹² 14 (LXX in last five passages φάραγξ); *N. Jabbok* Gn 32²⁴, Dt 2³⁷ 31⁶, Jos 12²; *N. Kidron* 2 S 15²³, 1 K 2³⁷ 15¹³ 18⁴, 2 K 23⁶ 12, 2 Ch 15¹⁶ 29¹⁶ 30¹⁴, Jer 31 (38) 40 (πάλα); *N. Kanah* Jos 16⁹ 17⁹ (φάραγξ); *N. Sorek* Jg 16⁴ (B' Ἀλσωρή, A δ χειμάρρος (v) Σωρή); *N. ha-Arabah* Am 6¹⁴ [dub.; Wellh. would read *N. Mizraim*; LXX δ χειμάρρος (v) τῶν δυσμῶν]. The familiar river (RV 'brook' except in Jth 1⁹ 'river') of Egypt is *N. Mizraim* (modern *Wady el-Arish*). See EGYPT (RIVER OF). נַחַל is once, Job 28⁴, used of a miner's shaft (cf. the use of נַחַר in v. 10).

4. 5. נִיבַל, by-form נַבְּל or נַבְּל (root נִיבַל 'flow' [?]). The former occurs only in Jer 17⁸ 'he shall be as a tree planted by the waters (נִיבַל, ὁδαρα), and that spreadeth out his roots by the river' (נִיבַל, ἐκ τῆς ἰκμάδα, 'to moisture'); the latter only in Dn 8² 3. 6 (Theod. transliterates τὸ Οὐβάλ, LXX has ἡ πύλη).

6. קָנָה, from a root קָנָה 'to hold,' is a poetical word, whose nearest English equivalent is perhaps 'channel,' the original idea being that of holding or confining waters.* It thus denotes, primarily at least, the stream-bed rather than the stream. Its occurrences are: Ps 18¹⁵ (16) (where for 'channels of waters,' עֵינֵי קָנָה, we should read, as in 2 S 22¹⁶, 'channels (i.e. bed) of the sea,' עֵי. נ). The LXX has in the latter ἀπέσεις θαλάσσης, and in the former πηγὰι ὁδάρων 41¹ (AV and RV 'brooks,' LXX πηγὰι) 120⁴ (AV and RV 'streams,' LXX χειμάρρους), Jl 1²⁰ 4 (3) 18 (in both AV 'rivers,' RV 'brooks,' LXX ἀπέσεις), Ca 5¹² (AV 'rivers,' RV 'brooks,' LXX πληρώματα), Job 6¹⁵ (עֵי. נ 'channel of torrents,' LXX χειμάρρους), Is 8⁷ (AV and RV 'channels,' LXX φάραγξ), Ezk 6³ 31¹² 32⁶ 34¹³ 35⁹ 36⁴ 6 (AV in all the Ezekiel passages has 'rivers,' RV 'water-courses,' LXX φάραγξ in all except 31¹², where it has πεδίον).

7. חָלַק, from root חָלַק 'divide,' cf. the proper name PELEG and the explanation of it given by J in Gn 10²⁵. This word means an artificial water-course, a canal formed for the purpose of irrigation. Its occurrences are: Job 29⁶ ('rivers of oil,' LXX simply γάλα); Ps 1³ (AV 'rivers,' RV 'streams,' LXX διέξοδοι) 46⁴ ('there is a river [נַחַר] whose streams [נַחַר], LXX ὀρημματα, arms or branches led from the river through the surrounding land] make glad the city of our God' 65¹⁰ (10) (ποταμός, see below) 119¹³¹ ('mine eyes run down with rivers [LXX διέξοδοι] of waters'), borrowed from or quoted in La 3⁴⁸ (LXX ἀπέσεις. The figure in these two passages is probably that of the tears in their flow tracing furrows on the cheek); Pr 5¹⁶ ('should thy springs be scattered abroad, thy streams of water [LXX ὁδαρα] in the street?' an exhortation to conjugal fidelity, addressed probably to the husband, who is cautioned against seeking pleasure from sources outside his own house; see the various interpretations discussed in Wildeboer or Toy) 21¹ ('the king's heart is in the hand of the LORD as the watercourses'; so RV, which brings out the meaning more clearly than the AV 'rivers'; LXX ὀρημ ὁδάρων); Is 30²⁵ (LXX ὁδωρ διαπορεύμενον, || עֵי. נ) 32² ('as rivers of water in a dry place,' LXX ὁδωρ φερέμενον). There is some doubt as to Jg 5¹ 16 and Job 20¹⁷. In the former of these passages AV has 'for (m. 'in') the divisions of Reuben,' RV 'by the watercourses of Reuben,' מִנֵּי being here and in Job 20¹⁷ taken in both versions as the plural of נַחַל, a supposed by-form of נַחַל, but it is not improbable that we should at least in Jg 5 vocalize מִנֵּי (cf. 2 Ch 35⁵ 12), giving the meaning of 'divisions' in the sense of clans or families. In Jg 5¹⁶ the LXX has μερίδες, and in v. 16 διαπέσεις, while in Job 20¹⁷ it reads ἀμεξίς

* Cornill, following the LXX, deletes the last clause of the MT, in which עֵי. נ occurs a third time.

† See Driver on Am 5²⁴.

* The word קָנָה is used figuratively of the bones of the hippopotamus, as being hollow, Job 40¹⁵, and of the furrows between the scales of the crocodile, 41⁷ (15).

ροάδων, after which Duhm emends to נָח, הַלָּךְ 'milk of the pastures.' But Dillm., Budde, and most tr. 'streams,' viz. of honey, etc., as explained in v.^b (cf. 29^b). In Ps 65¹⁰ (9) 'the river of God' (נָחִיָּה הַיְּהוָה) is the channel or conduit by which rain is poetically supposed to be conducted from its reservoirs in the heavens (cf. Job 38²² 'Who hath cleft a conduit for the rain?'). See Driver, *Par. Psalt. ad loc.*

8. הַנָּחַל. The proper meaning of this word is 'conduit' (from Hiphil of נָחַל), and it is so rendered by both AV and RV in 2 K 18¹⁷ 20³⁰, Is 7³ 36² (LXX, except Is 7³, where 'conduit' is not expressed, ὕδραγωγός). In Job 38²² AV has 'water-course,' RV 'channel' (poet. for rain), LXX ῥόοις; in Ezk 31⁴ AV 'little rivers,' RV 'channels' (for irrigation), LXX συστήματα. In 1 K 18²² 35, 38 the same Heb. term is used for the 'trench' round Elijah's altar (LXX θάλασσα); but in Jer 30 [Gr. 37] 12 46 [Gr. 26] 11 it (really a diff. word) means either *new flesh* or *plaster* (something coming up, or placed on the wound); LXX ὠφελεία, confusing with הַנָּחַל from נָחַל.

In the NT 'river' occurs only in Mk 1⁸, Jn 7³⁸, * Ac 16¹³, Rev 8¹⁰ 9¹⁴ 16¹² 22¹ 2, in all of which it is the tr. of ποταμός. The imagery of Rev 22¹ is borrowed from Gn 29⁴ and from the vision in Ezk 47.

Rivers serve in Scripture, as they have done in all ages, to fix boundaries: Gn 15¹⁸, Ex 23³¹, Nu 34⁸, Dt 1⁷ 38¹⁶ 11³⁴, Jos 1⁴ 12¹ 15⁴ 16⁸ 17⁹ 19¹¹, Jg 4¹³, 2 S 10¹⁶, 1 K 4²¹ 24⁸, 2 K 10²³ 24⁷, Ezr 4¹⁰, Neh 2⁷ etc.; they are utilized for bathing Ex 2⁸, for drinking 7¹⁸ 21, 1 K 17⁴, for fishing Ex 7¹⁸ 21, Lv 11⁹ 10, Ec 1⁷, Ezk 29⁴, and for irrigation (see above); they serve as means of defence Nah 3⁸, and as a highway for navigation Is 18²; a river side appears as a place of prayer in Ac 16¹³.

Besides the instances of figurative employment of the word 'river' which have been referred to above, the following may be noted:—In Jer 46⁷ the rising of the Nile is used as a symbol of an Egyptian invasion; cf. the similar use in Is 8⁷ of 'the river' to typify the invading hosts of Assyria, and the language used in Jer 47²; in Is 43² (cf. Ps 66¹²) rivers are a type of danger or affliction; in Is 59¹⁰ a manifestation of Jehovah is compared to a נָחַל, the probable rendering being that of RV 'He shall come as a rushing stream, which the breath of the LORD driveth' (AV 'when the enemy shall come in like a flood, the spirit of the LORD shall lift up a standard against him'; see the Comm. *ad loc.*); in Ps 46⁴ a river (נָחַל) is a type of Jehovah's favour; in Job 29⁶, Ps 119¹³⁶, La 3⁴⁶ (all נָחַל), Mic 6⁷, Job 20¹⁷ (both נָחַל) 'rivers' typify abundance; in Am 5²⁴ righteousness is compared to a perennial torrent (נָחַל); a well-spring of wisdom and a flowing torrent (נָחַל) are coupled in Pr 18⁴; a river (נָחַל) is a symbol of peace in Is 48¹⁸ 66¹²; the breath of Jehovah is compared in Is 30²⁸ to an overflowing torrent, and in v.³³ to a torrent of brimstone (both נָחַל).

The נָחַל בְּלִיָּה, lit. 'torrents of Belial,' of 2 S 22⁵ is a doubtful phrase. It is generally explained as 'torrents of worthlessness (= wickedness),' but Cheyne (*Expositor*, 1895, p. 435 ff., see also *Expos. Times*, viii. [1897], p. 423 f., and *Encyc. Bibl.* art. 'Belial') discovers a mythological allusion in the expression and renders it 'streams of the underworld,' identifying *Belial* with the Babylonian goddess *Belili*, whom he connects with the underworld. Hommel agrees with this identification, but Cheyne's interpretation is opposed by Baudissin and Jensen (see *PRE³*, s. 'Belial,' and the articles by all four scholars in the *Expos. Times*, ix. pp. 40 ff., 91 f., 283 f., 332, 567).

* The quotation 'Out of his belly,' etc., may represent the general sense of such OT passages as Is 44³ 55¹ 58¹¹, Jer 21⁹, Ezk 36²⁵ 47¹⁰, Jl 2¹⁸ 31⁶, Zec 13¹ 14⁸—the series resting ultimately (Westcott) on Ex 17⁹, Nu 20¹¹.

For the river system of Palestine, see vol. iii. p. 642 f., and for an account of particular rivers the articles under their respective names.

J. A. SELBIE.

RIVER OF EGYPT.—See EGYPT (RIVER OF), and add that in RV of Am 8⁸ 9⁶ the Nile is called the 'River of Egypt' (רִיבְּנֹר מִצְרַיִם, AV badly 'flood').

RIZIA (רִיזִיָּה; B Ραζιά, A Ραζιά).—An Asherite, 1 Ch 7²⁸.

RIZPAH (רִיזְפָּה; LXX Ρεζφά, except 2 S 21⁸, where A has Ρεφφάδθ).—A concubine of king Saul. She is called the daughter of Aiah (2 S 3⁷ 21⁸), which may imply that she was a descendant of that Hivite clan in the S.E. of Palestine from which Esau is said to have taken one of his wives (Gn 36² 24 [R]).

When the Philistines struck down the kingdom of Saul, and David established himself in Hebron, Rizpah must have withdrawn to Mahanaim among the few who clung to the ruined house. For (2 S 3⁸ 11) when Abner held towards Ishbosheth the position, and was suspected of cherishing the designs, of a Mayor of the Palace, some who doubted his loyalty accused him of having entered into an intrigue with his dead master's concubine. The sting of the accusation lay in the fact that such an alliance was regarded at that period as a sure step toward claiming the throne (cf. 2 S 16²², and especially 1 K 2²²).

At a later period in David's reign (the exact date of the incident is uncertain, since the story is found in an appendix to the history of David), a three years' famine fell upon the land (2 S 21¹⁶). The oracle, when consulted, decided that Jⁿ was angry with His people, and that the cause of that anger was to be found in the fact that Saul, instead of remaining true to the oath of the congregation (Jos 9), had deprived the Gibeonites of the privileges which the oath secured them, and had oppressed this clan. David accordingly approached the Gibeonites with offers to stanch the feud. These rejected all money compensation, and, denying that they had any quarrel with Israel at large, demanded the blood of the guilty house. Seven descendants of Saul—five of them sons of Merab; two, Armoni and Mephibosheth, sons of Rizpah—were thereupon seized and delivered over to their vengeance. The Gibeonites brought them up to Gibeon, which, from its name 'the hill of God,' evidently bore a sacro-sanct character, and there exposed * the seven before Jⁿ. To the rock on this hill the unhappy Rizpah resorted, and, spreading her mourning cloak of sackcloth, kept dreary watch beneath her dead to scare from their prey the wheeling vultures of the daytime, the prowling jackals of the night. The judicial execution had taken place in the early days of barley harvest. It lends a sharper touch to the picture, if one can see the reapers come and go in the fields, while above them the silent woman crouched beside her dead, whose death was to avert the curse from those fields. For she must watch on the height until the merciful rain of heaven signalled the end. The fall of rain is not inserted as a mere mark of the length of her guard; it is not 'the periodic rains in October' which are referred to. Probably it is mentioned as the sign from which men concluded that the famine-drought was broken, that the sacrifice was effectual, that the anger of Jⁿ was averted from His land, and that now at last the mother might cease from her fearful watch. A. C. WELCH.

* The word used is rare and uncertain in its meaning. It occurs again Nu 25⁴. The likeliest sense is the general one 'exposed.' Probably the method of actual execution was not mentioned, because so well known as to need no detailed explanation. See, further, art. HANGING.

ROAD (Anglo-Sax. *rad*, a journey, literally 'a riding,' from *ridan* to ride) is found in AV only once, 1 S 27¹⁰ 'Whither have ye made a road to-day?' The sense is a riding into a country with hostile intent, a 'raid' (so RV). Cf. Calderwood, *Hist.* 143, 'All who were under the danger of the lawes for the roade of Ruthven were charged to crave pardon'; and Spenser, *FQ* vi. viii. 35—

'In these wyld deserts where she now abode,
There dwelt a salvage nation, which did live
Of stealth and spoile, and making nightly rode
Into their neighbours borders.'

See WAY.

J. HASTINGS.

ROBBER, ROBBERY.—See CRIMES AND PUNISHMENTS, vol. i. p. 522^b.

ROBBERS OF CHURCHES.—See CHURCHES (ROBBERS OF).

ROCK.—In the OT this is the AV tr. of the following terms:—1. סֹלֶכֶס, properly 'flint,' AV renders by 'rock' only in Job 28⁹ 'he (the miner) putteth forth his hand upon the rock (RV 'flint,' AVm 'flinty rock'), he overturneth the mountains by the roots' (cf. v. 10 'he cutteth out channels among the rocks,' צִוְרוֹת). The combination הַר אֶבֶן 'rock of flint' (so AV and RV, LXX πέτρα ἀκροτομος, cf. Wis 11⁴) occurs in Dt 8¹⁵, and אֶבֶן הַחַיִּים (|| סֹלֶכֶס), lit. 'flint of rock' (AV and RV 'flinty rock,' LXX στερεὰ πέτρα) in 32¹³. In the only other two instances in which the Heb. word occurs, הַר stands alone: Ps 114⁸ (|| אֶבֶן; AV and RV 'flint,' LXX ἀκροτομος), Is 50⁷, where it is used as a symbol of firmness, 'therefore have I set my face like a flint' (στερεὰ πέτρα; cf. Ezk 3⁹ 'as an adamant harder than flint' [אֶבֶן, πέτρα] have I made thy forehead'). See, further, art. FLINT.

2. [רָקַע] only in plur. רִקְעִים. This, which is perhaps an Aram. loan-word (רִקְעָא *képhā*, cf. the NT *Kephās*, see art. PETER in vol. iii. p. 756), occurs only in Jer 4²⁰ 'they climb up upon the rocks' (for refuge; LXX πέτραι), and in Job 30⁶ of one of the dwelling-places of a race of outcasts (|| רִקְעִים 'caves'; on cave-dwellers or *Troglodytes*, see Driver, *Deut.* 37 f.), cf. 24⁸ 'they embrace the rock' (אֶבֶן, πέτρα) for want of a shelter.' In 30⁶ the LXX has a shorter text than the Hebrew, the whole verse reading ὡς οἱ οἰκοὶ αὐτῶν ἦσαν τρωγυλαὶ πετρῶν.

3. רָקַע is once rendered 'rock' by AV, namely Jg 6²⁶ 'build an altar upon the top of this rock' (מ. 'strong place,' RV 'strong hold,' B ῥὸ Μαοῦκ, A ῥὸ ἔπος Μαῶχ). The reference is probably to a natural stronghold rather than to a fortification (Moore). The word רָקַע 'place of refuge' (if from רָקַע or 'strong place' (if from רָקַע) occurs elsewhere only in the Prophetic books (21 times) and in Proverbs (once) and Psalms (9 times). For רָקַע אֶבֶן, applied to God, see below. Cf. also art. MAUZZIM.

4. קָלַע, the nearest English equivalents of which are 'cliff' and 'crag.' The ideas of steepness and inaccessibility are connected with the word, at least in earlier passages, although in later ones it has at times a more general sense. In the following passages קָלַע is used (LXX, wherever 'rock' is expressed, has πέτρα, unless otherwise noted): Nu 20¹⁸ bis, 10 bis, 11 [all P], Neh 9¹⁵, Ps 78¹⁶ (v. 15 אֶבֶן), of the rock struck by Moses; in the similar narrative, Ex 17⁶ bis [E] אֶבֶן is used, and so in Dt 8¹⁵, Ps 78¹⁵ (v. 16 קָלַע) 105¹¹ 114⁸, Is 48²¹ bis [on the later Jewish legends regarding this rock, see below on 1 Co 10⁴]. In Nu 24²¹ [JE] the words of Balaam with reference to the Kenites, 'strong is thy dwelling-place, and thy nest' (ken, a characteristic word-play) is set in the rock, allude to the safety

of birds and their nests on inaccessible cliffs, cf., for the same figure, Ca 2¹⁴, Jer 48 [Gr. 28]²⁸ 49 [Gr. 29]¹⁶, Ob³, Job 39²⁸. Dt 32¹³ [JE] 'He made him to suck honey out of the crag' (קָלַע; || 'oil out of the rock of flint,' אֶבֶן סֹלֶכֶס) has in view the stores of honey that are found in Palestine in the caves and fissures of the dry limestone rocks (cf. Ps 81¹⁶ אֶבֶן), and the fact that the olive flourishes even in rocky soil (cf. Job 29⁶ אֶבֶן, LXX ῥὰ δῆρη); see Driver, *Deut. ad loc.* The קָלַע of Jg 1²⁶, 2 K 14⁷, Is 16¹ 42¹¹ (in the first two passages with the art. in both MT and LXX) is very frequently taken to be Petra, the rock-built capital of Edom (see art. SELA). But while this might suit the two passages in Isaiah (but see Dillm. *ad loc.*), and is very appropriate to 2 K 14⁷, it appears quite impossible to fit such an identification to the situation of Jg 1²⁶. There are strong reasons for taking 'the cliff' in this last passage to be some prominent cliff near the south end of the Dead Sea, perhaps the modern *es-Safieh* (see Buhl, *Gesch. d. Edom.* 20, and Moore, *Judges, ad loc.*). In Jg 6²⁰ (probably a late interpolation) קָלַע, but in v. 21 אֶבֶן (and so in 13¹⁹ of Manoah's sacrifice), is used of the rock on which Gideon offered his sacrifice; the fissure of the cliff ETAM was one of Samson's places of refuge, Jg 15⁸, 11, 12, cf. 20⁴⁵, 47 21¹⁸ the crag RIMMON to which the Benjamites fled, 1 S 13⁶ the crags where the Israelites took refuge from the Philistines, 23²⁰ the crag in the Wilderness of Maon to which David fled from Saul [on *Sela-hammahleketh* of v. 23 see art. under that name], 1 Ch 11¹⁵ the rock at Adullam, Is 2²¹ (|| אֶבֶן, and so in vv. 10, 19) the crags to which men are to flee from before the LORD, Jer 16¹⁶ the refuge from which the Israelites are to be hunted, 48 [Gr. 31]²⁸ the crags for which Moab is to abandon her cities (cf. 21¹³). Crags are spoken of as the haunt of bees Is 7¹⁹ (cf. Dt 32¹³ above), conies (*Hyrax Syriacus*) Pr 30²⁶, wild goats Job 39¹, Ps 104¹⁶, cf. 1 S 24² (אֶבֶן); sepulchres are hewn in rocks, Is 22¹⁶; a rock is a type of hardness, Jer 5³ 'they have made their faces harder than a rock'; precipitation from a rock appears as a form of execution in 2 Ch 25¹² (κρημνός), cf. (?) Jer 51 [Gr. 28]²⁸, and see art. HANGING in vol. ii. p. 298^b; the feet set upon a rock typify security, Ps 40⁸ (2), cf. 27⁶ 61³ (2) (both אֶבֶן); crags were splintered by the storm in Elijah's vision, 1 K 19¹¹; the shadow of a great crag is grateful in a weary land, Is 32²; cliffs are strong places of defence, Is 33¹⁶ [for the two crags of 1 S 14⁴ see BOZEZ and SENEH]; the clefts of the rocks in the wadis were the scene of the sacrifice of children, Is 57⁵; in a hole of the rock Jeremiah was to hide his girdle, Jer 13⁴; the word of the LORD is compared to a hammer that breaketh a crag in pieces, Jer 23²⁰; in Ezk 24⁷ the blood of Jerusalem's idolatrous sacrifices is compared to blood shed upon a bare rock (ἐπὶ λεωπετρῶν), which does not sink into the earth but continues to cry to heaven for vengeance, cf. the threatening in the following verse; Ezk 26⁴ 14 declare that Tyre is to become a bare rock (קָלַע, λεωπετρά), there being here a punning allusion to the name of the city (Tyre = אֶבֶן = 'rock'); the question 'do horses run upon crags?' introduces in Am 6¹² a reproach for conduct of a thoroughly unnatural kind.

5. אֶבֶן is best reproduced by 'rock,' having all the senses (except, of course, the geological one) which that word bears in English. In many instances it is synonymous with קָלַע (see the numerous parallel occurrences of the two terms quoted above), but there are some passages where אֶבֶן occurs in which קָלַע could not have been suitably used, at least by early writers. Besides the occurrences of the word which have been already noted, אֶבֶן is used: of the rock where Moses had a partial vision of the glory of Jahweh, Ex 33²¹, 22

* Raid is of Scand. origin. Raid, says Skeat, was the northern Border word, 'road' being used in the south; but the first quotation above is Scottish, and yet 'road' is used.

[J]; of the rocky summit (κορυφή ὄρεων) from which Balaam looked down upon the camp of Israel, Nu 23⁹ [JE]; of the rock OREB where the Midianite prince Oreb was slain, Jg 7²⁵ (Σούρ), Is 10²⁶; of the rock where Saul's seven sons were 'hanged' (see HANGING in vol. ii. p. 298⁵) by the Gibeonites, and where Rizpah kept her ghastly watch, 2 S 21¹⁰; in Job 14¹² the removing of the rock out of its place is an accompaniment of the wearing down of a mountain by slow natural forces, while in 18⁴ the question 'shall the rock (τὰ ὄρη) be removed out of its place?' is tantamount to 'shall the constitution of the world be subverted?'; the custom of cutting inscriptions on rocks, of which so many examples are known, is referred to in Job 19²⁴; rocks are the shelter of a class of outcasts, Job 24⁸, see under No. 2, above; in Pr 30¹⁹ the way of a serpent over a rock (i.e. its mysterious movements, without the aid of feet) is one of the four things which the writer cannot understand; Jehovah is to be a stone of stumbling (ἡ πέτρα ὁ σκάνδαλον) and a rock of offence (ὁ λίθος ὁ πηγάς) to both the houses of Israel; in Is 51¹ Abraham is called the rock (see vol. iii. p. 795⁵, 'Additional Note') whence Israel was hewn; the perennial snow on the rocky summit of Lebanon is mentioned in Jer 18⁴; the rocks are broken asunder (Nowack [emending the text] 'kindled') by the fury of the LORD, when it is poured out like fire, Nah 1⁶.

We have reserved till now those passages in which the term 'rock' is figuratively used of God. These are the following. The word ὄρη is used in 2 S 22¹ [= Ps 18³ (σπερμα)] 31⁴ (κραταίωμα) 42¹⁰ (Ἀντιλήμπτωρ) 71³ (σπερμα). The term employed is πᾶς in Dt 32⁴ 15. 18. 30. 31 (all θεός, cf. v. 37), 1 S 22¹ (? δικαίος), 2 S 22³ (φύλαξ) 32 (κτίστης) [= Ps 18³² (31) (θεός)] 47 (φύλαξ) [= Ps 18⁴⁷ (46) (θεός)] 23³ (θεός), Ps 19¹⁵ (14) (βοηθός) 28¹ (θεός) 31³ (θεός ὑπερασπιστής) 62² (7 (6), 8 (7) (all θεός) 71³ (θεός ὑπερασπιστής) 73²⁸ (θεός) 78³⁵ (βοηθός) 89²⁷ (26) (ἀντιλήμπτωρ) 92¹⁶ (15) (θεός) 94²⁸ (βοηθός) 95¹ 144¹ (both θεός), Is 17¹⁰ (βοηθός) 26⁴ (? μέγας) 30²⁹ (θεός) 44⁸ (LXX om.), Hab 1¹² (LXX om.). In some of these passages it has been contended that *zur* has the force of a proper (Divine) name. Hommel, for instance, in support of his claim that a certain class of personal names found in P, which have been widely suspected of being late and artificial, are *bona fide* ancient Hebrew survivals, brings forward two compound names to show the existence in early times of a Divine name *Zur*. These are *Zuri-gaddana*, from a S. Arabian inscription not later than B.C. 800, and *Bir- (or Bar-) Zur*, from Zinjerli (8th cent. B.C.). But, while Hommel has rendered a service by calling attention to these names, one does well to remember that, whatever they may prove for the period and the place to which they belong, it is very questionable whether they justify the inference that *Zur* was used in a similar sense by the early Hebrews, and it remains as doubtful as before whether names like *Pedahzur*, *Elizur*, *Zuriel*, and *Zuri-shaddai*, Nu 1⁶ 6. 10 33³ [why are these the only instances in the OT of compounds with *zur*, and why are they confined to P?], were at any time, and much more in early times, prevalent in Israel. To the present writer the probability appears to be that, as far as the OT is concerned, Dt 32 is the source to which all the above passages may be traced back; and neither in Dt 32⁴ 18 nor in Hab 1¹², the passages which plead most strongly in favour of Hommel's view, does it seem to be necessary to take *zur* as a Divine name in the proper sense. The circumstance that *ḥeli* and *zur* are both employed in the sense we are examining (sometimes even side by side, e.g. Ps 18³ [cf. v. 23] 71³), strengthens the conclusion that in all the instances cited we have to do simply with one of those metaphors of which Hebrew writers are so fond. 'It (*zur*) designates

Jehovah, by a forcible and expressive figure, as the unchangeable support or refuge of His servants, and is used with evident appropriateness where the thought is of God's unvarying attitude towards His people. The figure is, no doubt, like *crag*, *stronghold*, *high place*, etc., derived from the natural scenery of Palestine' (Driver, *Deut.* 350; similarly Bertholet and Steuernagel. Hommel's contentions will be found stated in his *AHT*, pp. 300, 319 f., where he opposes the views of G. Buchanan Gray contained in *HPN*, 195 f.; Gray replies to Hommel in the *Expositor*, Sept. 1897, p. 173 ff.: cf. also Whitehouse's view, as expressed in art. PILLAR in the present work, vol. iii. p. 881¹).

In the NT 'rock' always represents πέτρα. Its occurrences are as follows: Mt 7²⁴ || Lk 6⁴⁸ as a type of a sure foundation, in Jesus' simile of the two buildings; Mt 16¹⁸ 'upon this rock I will build my church' [this passage is exhaustively discussed in art. PETER in vol. iii. p. 758]; Mt 27⁵¹ the rocks were rent by the earthquake at the Crucifixion; Mt 27⁶⁰ || Mk 15⁴⁶ Joseph's tomb was hewn out in the rock, cf. Is 22¹⁶; Lk 8¹³ part of the seed scattered by the sower fell ἐπὶ τὴν πέτραν, 'upon rock,' which is interpreted by the ἐπὶ τὰ πετρώδη of Mt 13²⁰.²⁰ [the expression means places where only a thin coating of soil covered the underlying rock, hence RV appropriately 'rocky places'; AV infelicitously 'stony places,' which suggests ground in which a number of loose stones were found]; Ro 9³³ 'As it is written, Behold I lay in Zion a stone of stumbling (λίθον προσκόμματος) and a rock of offence (πέτραν σκανδάλου),' where Is 8¹⁴ and 28¹⁶ appear to be in view as in 1 P 2⁶⁻⁸; in Rev 6¹⁵ the caves and rocks of the mountains play the same part as in Is 2¹⁵ and as the mountains and hills in Hos 10⁸ (cf. Lk 23³⁰). Finally, there is 1 Co 10⁴, where St. Paul says of the Israelites who were led by Moses through the wilderness that 'they did all drink the same spiritual drink, for they drank of a spiritual rock that followed them: and the rock was Christ' (ἐπὶνεν γὰρ ἐκ πνευματικῆς ἀκολουθοῦσης πέτρας, ἡ πέτρα δὲ ἦν ὁ Χριστός). Not only does St. Paul here spiritualize the smitten rock and the water that flowed from it, giving to these a Eucharistic sense (cf. the foreshadowing of Baptism which he discovers in the Passage of the Red Sea and the Pillar of Cloud, v. 1, and St. Peter's treatment of the Deluge and the Ark, 1 P 3²⁰⁻²¹), but he has drawn upon later Jewish expansions of the OT story. Neither in Ex 17⁶ nor in Nu 20⁶ is it hinted even that the water continued to flow from the rock after the temporary occasion for it had passed (contrast the case of Jg 15¹⁹). Jewish *haggāda*, however, went much beyond this, describing how the rock accompanied the Israelites all through their march (cf. St. Paul's ἀκολουθοῦση πέτρα), and how, wherever the Tabernacle was pitched, the princes came and sang to the rock, 'Spring up, O well, sing ye unto it,' whereupon the waters gushed forth afresh (*Bamidbar rabba* Nu 21¹⁷; Delitzsch in *ZKW*, 1882, p. 455 ff.; Driver, *Expos.* Jan. 1899, p. 15 ff.; Thackeray, *St. Paul and Contemp. Jew. Thought*, 204 ff.; the Comm. on 1 Corinthians; cf., for instances of similar Jewish fancies, Schürer, *GJV* ii. 343 [*HJP* ii. i. 344]).

RV substitutes 'rocky ground' for AV 'rocks' in Ac 27²³ as tr. of τραχεῖς τόποι (lit. 'rough places'), and 'hidden rocks' for AV 'spots' (Vulg. *maculae*) in Jude¹² as tr. of σκιάδες [the AV rendering was, no doubt, influenced by the parallel passage 2 P 2¹³; see the Comm. *ad loc.*]. J. A. SELBIE.

* In the last clause of this verse the true reading is διὰ τὸ καλῶς οἰκοδομηθῆαι αὐτὸν (RV 'because it had been well builded'), not ἐπὶ τῷ λίθῳ γὰρ ἐπὶ τὴν πέτραν (AV 'for it was founded upon a rock'), which has been introduced from Mt 7²⁵.

† St. Paul follows similar methods of interpretation and argument in Ro 10⁶ and Gal 4²².

ROD (מִשְׁכֶּבֶת *matteh*, מַקְלֵל *makkēl*, שֵׁבֶט *shēbet*, מִשְׁכֶּבֶת *mishkeneth*; *páßos*).—The rod or staff in the hand is the chief emblem of Oriental travel. Thus Jacob setting out for Paddan-aram left everything behind him except his *makkēl* (Gn 32¹⁰), the Israelites kept the first Passover feast *makkēl* in hand (Ex 12¹¹), and Elisha sent his *mishkeneth*, the companion of his journeys, on before, as if it had been a living friend, to represent him in the chamber of death (2 K 4²⁹). The modern Syrian peasant when on a journey carries a staff slightly longer than that used in Europe. He invariably holds it by the thin end, with the hand an inch or two down and the thumb often resting on the top. Such a manner of grasping the stick is suggestive of defence; and by the way in which he raises himself by means of it in the steep and rough mountain path, and pushes himself along when travelling on the dusty road of the hot plain, it is evident that the walking-stick is also meant to be a support on the journey. Protection from danger and something to lean upon,—such are the two original meanings of the rod or staff.

In EV the word *matteh*, used literally, is translated 'rod' when referring to the rod of Moses (Ex 4² and oft.), of Aaron (Ex 7¹⁰, 12 and oft.), of the heads of the tribes (Nu 17³⁻¹⁰), of Jonathan (1 S 14²⁷⁻⁴³), and is tr. 'staff' in Gn 38^{18, 28}, Is 10^{15, 24}, 28²⁷ (as a kind of *flail*) 30²² (for *punishment*), Hab 3⁴.

of office. The Heb. word is translated 'sceptre' in Gn 49¹⁰, Nu 24¹⁷, Ps 45⁶, Is 14⁵, Ezk 19^{11, 14}, Am 1^{8, 9}, Zec 10¹¹, and in RV of Ps 125³. See SCEPTRE.

These meanings of power, authority, punishment, or correction are exemplified in 2 S 7¹⁴, Job 9³⁴ 21⁹ 37¹³ (AVm), Ps 2⁹, Is 11⁴. In Is 11¹ the expression 'a rod (מִשְׁכֶּבֶת, of which the only other occurrence is Pr 14², where see Toy's note) out of the stem of Jesse' is more appropriately rendered in RV 'a shoot out of the stock of Jesse,' where the figure is that of a cut-down stump, which will put forth a single flourishing 'rod.' Compare, for the figure, מִשְׁכֶּבֶת in Ezk 19^{11, 12, 14} (blooming up into a *shēbet*, sceptre of rule).

Along with his 'rod' or club (*shēbet*) the shepherd had also his 'staff' (*mishkeneth*), which was a straight pole about 6 ft. in length. Its service was for mountain climbing, for striking troublesome goats and sheep, beating leaves from branches beyond the reach of his flock, and especially for leaning upon. As he stood clasping the top of his stick with both hands, and leaning his head against it, his conspicuous and well-known figure gave confidence to the sheep grazing around him among the rocks and bushes of the wilderness. The *mishkeneth* is essentially something to lean upon. Thus it is the word used for Elisha's staff (2 K 4²⁹), and it indicates the untrustworthiness of Egypt as a reed of cane for Israel to lean upon (Is 36⁶), in-

1. Shepherd's rod or, rather, club (*shēbet*).
2. Shepherd's staff (*mishkeneth*).
3. Common staff (*matteh*, *makkēl*, or *mishkeneth*).

In the Heb. *matteh* is coupled with *shēbet* in Is 9⁴ (of taskmaster; fig. of oppressor; cf. 10^{5, 24} 14⁵) 10¹⁶ 28²⁷ 36⁶, and with *makkēl* in Jer 48¹⁷ in such a way as to imply that the terms were practically interchangeable under ordinary circumstances.

It is in the primitive usage of the shepherd's life that a distinction is found between the 'rod' and the 'staff.' The shepherd carries both, but for different purposes. In Ps 23⁴ the 'rod' (*shēbet*) is a club about 2½ ft. long, made from an oak sapling, the bulging head being shaped out of the stem at the beginning of the root.* The shepherd's *shēbet*, frequently with large-headed nails driven into the knob, is his weapon against men and animals when in the wilderness with his flock. It is worn either suspended by a thong from the waistband or inserted in a special sheath or pocket in the outer cloak; cf. Lv 27³², and Mic 7¹⁴, Ezk 20³⁷ (last two fig.). The *shēbet* was, further, the staff of authority (not necessarily of a king), Jg 5¹⁴ and perhaps Gn 49¹⁰. It is seen in the sculptures of Assyrian and Egyptian kings, and was the original of the military mace and the baton and truncheon

stead of upon the strength of God. In Nu 21¹⁸ the *mishkeneth* is used by the nobles in digging a well (see LAWGIVER); the angel who appeared to Manoah carried a *mishkeneth* (Jg 6¹¹); in Zec 8⁴ the *mishkeneth* is characteristic of old age.

'He that leaneth upon a staff' (סֹמֵךְ בַּמִּשְׁכֶּבֶת, *B sparōw skvrālht*) of 2 S 3³ should probably be 'he that handleth the spindle' (see Driver, *ad loc.*), if the text be correct, which H. P. Smith (*Sam. ad loc.*) doubts. The references to *makkēl* are generally to the ordinary staff* for a journey [in Hos 4¹² 'their staff declareth unto them,' there is reference to the practice of *rhabdomancy*], at once protective and supporting. Examples are Jacob's staff (Gn 32¹⁰), the staff of the Passover feast (Ex 12¹¹), Balaam's staff (Nu 22²⁷), with which he could support himself by resting the end of it on the front of the broad Oriental saddle; also probably the staff in David's hand when he went out to meet Goliath (1 S 17⁴⁰), for being then on a journey he would have laid aside the more cumbersome shepherd equipment.

In NT *páßos* has the twofold meaning of a staff for a journey (Mt 10¹⁰, Mk 6⁹, Lk 9⁸, He 11²¹) and a rod for chastisement (1 Co 4²¹ [cf. the verb in 2 Co 11²⁹], Rev 2²⁷ 12⁵ 19¹⁵).

G. M. MACKIE.

RODANIM, reading of MT in 1 Ch 17 for the Dodanim of Gn 10⁴, answering to the Ρόδιαι of the LXX in both passages. See DODANIM.

* This is also the word used in Gn 30³⁷ of the sticks employed by Jacob in his cattle-breeding artifices.

* This manufacture of the *shēbet* from a young tree might suggest that in the metaphorical use of *shēbet* (Arab. *sabṭ*), 'tribe,' the reference is to various seedlings with a common origin—the tribes of the children of Israel. It is to be noted, however, that *matteh* is equally (183 t.) used for 'tribe,' and possibly the original reference in both cases is to a company led by a chief with a staff. See, further, on the relation between *shēbet* and *matteh*, Driver in *Journ. Philol.* xi. (1882) 213 f.

ROE.—This word occurs once in AV (Pr 5¹⁹, RV 'doe') as the equivalent of רֹעֵ: *ya'alah*; see DOE. In all other places where 'roe' occurs in AV (2 S 2¹⁸, 1 Ch 12⁸, Pr 6⁵, Ca 27. 9. 17 3⁵ 4⁵ 7³ 8¹⁴, Is 13¹⁴) it is the tr^a of *zēbi* or *zēbiyyāh*, and in these RV also gives 'roe,' but in every passage except 2 S 2¹⁸ and 1 Ch 12⁸, with marginal note, 'gazelle,' which is undoubtedly the correct rendering. See GAZELLE.

G. E. POST.

ROEBUCK.—This word, wherever it occurs in AV (Dt 12¹⁵. 23 14⁵ 15²³, 1 K 4²³), is the equivalent of רֹעֵ *zēbi*, LXX *δορκάς*. RV has in all these passages consistently tr^a *zēbi* 'gazelle' (see GAZELLE). 'Roebuck' is the proper tr^a for רֹעֵ *yahmūr*, which is rendered by AV 'fallow deer' (Dt 14⁵, 1 K 4²³). Tristram (*Fauna and Flora*, p. 4) says that *yahmūr* is used by the natives of Carmel for the roebuck, which is still found there. One of the districts of Carmel is known as *Yahmūr*, perhaps from the former abundance of this animal. Conder says that the roebuck is called *hamūr* in Gilead. The people about *Kāna* and '*Alma*, north of Carmel, call it *wa'l*, which is one of the names of the ibex or wild goat, which animal, however, is not now found there. In N. Africa *yahmūr* is synonymous with *baḥar el-waḥsh*, *Alcephalus bubalus*, Pall. From these facts two things are evident—(1) That 'fallow deer' is not a correct tr^a of *yahmūr*. The fallow deer is רֹעֵ *'ayyāl* (see HART). The first three animals of the list (Dt 14⁵) are '*ayyāl*, correctly tr^a in both AV and RV 'hart'; *zēbi*, AV incorrectly 'roebuck,' RV correctly 'gazelle'; and *yahmūr*, AV incorrectly 'fallow deer,' RV correctly, as we believe, 'roebuck.' The LXX (B) gives us no help, as it has only *ελαφος* and *δορκάς*, the equivalents of '*ayyāl* and *zēbi*, and drops out *yahmūr* from the lists. (2) That *bubale* (LXX AF *βούβαλος*), as proposed by some, is also not a correct tr^a for *yahmūr*. The *bubale* is not now found west of the Jordan, and only rarely east of it. The roebuck is found in considerable numbers on both sides of this river. The *bubale* is not called *yahmūr* where found on the confines of Palestine. The roebuck is so called both east and west of the Jordan. It is most numerous in the thickets, in the wādis of Carmel and N.W. Galilee.

The roebuck, *Cervus capreolus*, L., is shaped like a gazelle. Its full length is 3 ft. 10 in. from the tip of the nose to the end of the rump; height at shoulder 2 ft. 4 in., at rump 2 ft. 6 in. The horns are about as long as the face, on a line with it, and have three short branches. The eyes are almond-shaped, with point forward. There is no external tail. The coccyx is 2 in. long, but is covered by the rump fat. The colour is grey, with a reddish-brown shade towards the posterior part of the rump, and white between the thighs and on the belly. (See figure of a specimen in *PEFS*, July 1890, p. 171).

G. E. POST.

ROGELIM (רֹגֵלִים; Ρωγελλῖμ, A in 2 S 17²⁷ 'Ρωγελῖμ).—The native place of Barzillai the Gileadite. The exact site is unknown; it probably lay in the north of Gilead (2 S 17²⁷ 19²¹).

ROHGAH (Kethibh רֹהַג, corrected by Keri רֹהַג; B om., A 'Oḡā).—An Asherite, 1 Ch 7³⁴.

ROIMUS (Ρόϊμος), 1 Es 5⁸, corresponds to Rehūm, Ezr 2², or Nehūm, Neh 7⁷.

ROLL.—See WRITING.

ROMAMTI-EZER (רֹמַמְתִּי-עֶזֶר).—A son of Heman, 1 Ch 25⁴⁻⁵. There is reason to believe that this and five of the names associated with it are really a fragment of a hymn or prayer (see GENEALOGY,

III. 23 n.; and cf. Kittel in *SBOT*, and W. R. Smith, *OTJC* 143 n.).

ROMAN (Ρωμαῖος, esp. Ac 16²¹. 37. 38 22²⁸⁻³⁰ 23²⁷).—Roman citizenship (*civitas*) might be held in NT times (a) by birth, from two Roman citizens united in *justa nuptiæ*. There was no *conubium*, or right of Roman marriage unless specially granted), except with a Roman woman. If the union were un-Roman (with a Latin woman, a foreigner, a concubine) or unlawful (with a slave, etc.), it gave no *patria potestas*, and the children followed the mother's condition. It might also be held (b) by manumission in certain cases, or (c) by grant, either to entire cities or districts, or to individuals in reward of political or other services, as to a soldier on his discharge. Under Claudius, however, Messalina sold the *civitas*, and the price gradually fell (Dio, lx. 9) to a ridiculous figure. The chief captain (Ac 22²⁸) bought it at a high price; but if St. Paul was born free, it must have been held at least by his father (Ramsay, *St. Paul*, 30f.). The franchise of Tarsus (Ac 21²⁹ 'Ιουδαῖος, Ταρσεύς) would not imply the *civitas* as a matter of course, for Tarsus was an *urbis libera* (Pliny, *NH* v. 27).

The most practical advantage of the *civitas* in NT times was that no citizen could be scourged (lex *Valeria* B.C. 509, lex *Porcia* of uncertain date) or put to death by any provincial authority without the right of appeal to the emperor. Even the *praefectus praetorio* could not condemn him to *deportatio*, and the emperor himself commonly had him executed by the sword, reserving the cross, the fire, and the beasts for slaves and other low people. It was illegal when Paul and Silas were scourged at Philippi (Ac 16³⁷), and when Paul was to have been examined at Jerusalem by scourging (Ac 22²⁴ *μολοῖσιν ἀντάρξασθαι*). In both cases *ἀκράτῃς* is *re incognita* (Ramsay, *St. Paul*, 225), for it would not have been less illegal after condemnation. Of the other two scourgings mentioned in 2 Co 11²³ nothing further is known.

The right of appeal to the emperor seems to continue neither the old *provocatio ad populum*, which was limited even in republican times by the *questiones perpetuae*, and had now become obsolete, nor the old *intercessio* of the tribunes, which was purely negative, and limited by the first milestone from Rome. It seems rather to rest on the general authority of the emperor, under the lex *de imperio*, to do almost anything he should consider *ex usu reipublicae*, etc. The appeal was not granted quite as a matter of course. Festus confers (Ac 25¹²) with his assessors before deciding (v. 25 *ἐκρίνα*). Once granted, it stopped the case. The governor could not even release the accused (Ac 26³²). His only duty was to draw up a statement of the case (*apostoli, litterae dimissoriae*—Festus asks Agrippa's help in doing this) and send him to Caesar. St. Paul is delivered to a centurion, *συνεπὶς Σεβαστῆς*—one of the legionary centurions employed on detached service at Rome, and therefore called *peregrini* from the Roman point of view, and by him handed over at Rome to his chief, the *στρατοπεδάρχης* (Ac 28¹⁶, but om. WH) or *princeps peregrinorum* (so Mommson: not the *praefectus praetorio*).

The accused might be kept before trial in (a) *custodia publica*, the common jail, though a man of high rank was frequently committed to (b) *custodia libera* as the guest of some citizen who would answer for his appearance. Intermediate was (c) *custodia militaris*, where one end of a light chain (*άλυσίς*) was constantly fastened to his right wrist, the other to the left wrist of a soldier (so St. Paul, Ac 26³⁰ 28³⁰, Eph 6²⁰, 2 Ti 1¹⁶). In this case he might either be kept in strict custody (2 Ti 1¹⁷, where Onesiphorus needs diligent search to find St. Paul), or allowed to live in his own

lodgings and receive in them what company he chose (Ac 24²³ 28³⁰). The actual trial was before the emperor (often in person) and his *consilarii*; and each count of the indictment was separately examined. 2 Ti 4¹⁷ seems to say that the *prima actio* against St. Paul had been a failure, though the apostle has no hope of escape on the second.

A false claim of citizenship was a capital crime (Suet. *Claudius*, 25).

LITERATURE.—Mommson, *Römische Staatsrecht*, 1876-77, and (for peregrini) *Berlin. Akad. Sitzungsber.* 1895, p. 501; Willems, *Droit public Romain*, 1883; Karlowa, *Römische Rechtsgeschichte*, 1885; W. M. Ramsay, *St. Paul the Traveller*, 1895.

H. M. GWATKIN.

ROMAN EMPIRE (most nearly *orbis terrarum*, ἡ οὐκουμένη, Lk 2¹; and its people *genus humanum*, as Tac. *Ann.* xv. 44 'odio humani generis.' *Imperium populi Romani* does not cover the free cities, and *Romania* seems first found Ath. *Hist. Ar.* 35, and Orosius, *Hist. e.g.* vii. 43).—Augustus left the Empire bounded by the Rhine and the Danube, the Euphrates, the African desert, the Atlantic, and the North Sea. These limits he recommended to his successors, and they were not seriously exceeded till Trajan's time, except that the conquest of Britain was begun by Claudius in 43, and finished as far as it ever was finished at the recall of Agricola in 85. Germany had recovered its independence in 9 A.D. by the defeat of Varus, and the conquest of Parthia was hardly within the range of practical politics.

Not Rome destroyed the ancient nations, but their own wild passions and internecine civil strife. The Greeks could make nothing of the liberty Flamininus gave them, the Gauls were no better, and even Israel—the one living nation Rome did crush—was in no very different case in Judæa. Rome came in as often as not to keep the peace; and when the Empire settled down, it seemed quite natural that 'all the world' should be subject to her. Virgil and Claudian sing with equal enthusiasm her everlasting dominion; and even the Christians firmly believed that nothing but Antichrist's coming would end it (2 Th 2⁶). So, though she had mutinies enough of armies, Israel was almost the only rebel nation. She could mass her legions on the great river frontiers, and leave a score of lictors to keep the peace of Asia, a garrison of 1200 men to answer for the threescore States of Gaul. She no more ruled the world than we rule India by a naked sword.

Hence there was a vast variety even of political *status* within the Empire. Some cities had the Roman *civitas* (see ROMAN), others only the *jus Latii*; some, like Athens, were in theory free and equal allies of Rome, while others had no voice in their own taxation. Italy had the *civitas*, and was supposed to be governed by the Senate, whereas a senator could not even set foot in Egypt without the emperor's permission. Some provinces were governed by senatorial proconsuls or pro-prætors, others by *legati Augusti pro prætore*, or, like Egypt or Judæa, by a *præfectus augustalis*, or a *procurator* of lower rank. Some regions, again, had client kings, like Mauretania, Judæa under the Herods, or Thrace. True, the Empire was steadily levelling all this variety. The client kingdoms disappeared—Galatia as early as B.C. 25, Chalcis (held by Agrippa II.) as late as 100. The autonomy of the *urbes liberæ* was commonly respected—Hadrian was archon twice at Athens; but the Roman *civitas* was steadily extended till Caracalla gave it in 212 to all free inhabitants of the Empire.

Broadly speaking, the Eastern half of the Empire was Greek, the Western Latin. The dividing line may run pretty straight from Sirmium to the altars of the Philæni. But Greek

was dominant in parts of the West,—Massilia, Sicily, and the coasts of Southern Italy,—and was in most places the language of culture and of commerce, whereas Latin in the East was not much more than an official language. Nor was either Latin or Greek quite supreme in its own region. Latin had perhaps displaced by this time the Oscan and other dialects of Italy; but it had only well begun the conquest of Spain, Gaul, and the Danube countries. Greek was opposed by the rustic languages of Thrace and the interior of Asia Minor, such as the Lycaonian (Ac 14¹¹) and the Galatian. Further East it had tougher rivals in Aramaic and Coptic, which it was never able to overcome, though Alexandria was a Greek city, and Galilee almost bilingual in the apostolic age. The distribution of the Jews resembled that of the Greeks in being chiefly Eastern, and in following the lines of commerce westward: but their great centres were Syria and Alexandria within the Empire, Babylonia beyond it.

Rome was never able to make a solid nation of her Empire. In Republican times her aim was utterly selfish—to be a nation ruling other nations, and getting all she could out of them. The Republic broke down under the political corruption this caused, and the proscriptions completed the destruction of healthy national feeling. The Empire had higher aims from the first, and the sense of duty to the conquered world increased on it as time went on; but it could neither restore nor create the patriotism of a nation. The old Roman nation was lost in the world; and if the world was lost in Rome, it did not constitute a new Roman nation. Greeks or Gauls might call themselves Romans, and seem to forget their old people in the pride of the Roman *civitas*; but Greeks or Gauls they remained. Every province of the Empire had its own character deeply marked on the society of the apostolic age and on the Churches of the future. Galatia was not like Asia, and Pontus or Cilicia differed from both. There were peoples in great variety; but the old nations were dead, and the one new nation was never born.

Yet the memory of nations put the Empire in a false position. It belonged, like the Christian Church, to the universalism of the future; but the circumstances of its origin threw it back on the nationalism of the past. Augustus came in after the civil wars as a 'Saviour of Society,' sustained by the abiding terror of the proscriptions. Hence he was forced into a conservative policy very unlike the real tendency of the Empire to level class distinctions, to replace local customs by uniform laws and administration, and to supersede national worships by a universal religion. The Empire was hampered by Republican survivals, degraded by the false universalism of Cæsar-worship. Augustus had to conciliate Rome by respecting class-feeling, and by leaving Republican forms of government almost unaltered. He was no king, forsooth (not *rex*, though called βασιλεύς in the provinces, Ac 17⁷, 1 P 2¹³, 17),—only *princeps*, the first citizen of the Republic. The consuls were still the highest magistrates, though those who gave their names to the year were replaced during the year by one or more pairs of *consules suffecti*. Prætors, quaestors, etc., went on much the same, and even the anarchical power of the tribunes was not limited by law till the reign of Nero, though the popular assemblies vanished after that of Augustus. The Senate deliberated as of old under the presidency of the consuls, and the emperor himself respectfully awaited their *Nihil vos moramur* at the end of the sitting. It still governed Italy and half the provinces, and furnished governors for nearly all—deep offence would have been given if any one

but a senator had been made *legatus Augusti pro praetore*. Above all, the Senate could legislate without interference from tribunes or *Comitia*. It elected all the magistrates (from the time of Tiberius), and even the emperor owed to it his constitutional appointment. So far as forms went, the State was a Republic still, and became a real one for a moment when the government lapsed to the consuls at an emperor's death. The name *respublica* lasted far past 476.

But the emperor was not only master, but fully recognized as such. The liberty of the Senate was hardly more than liberty to flatter him. The pillars of his power were three. He had (1) the *imperium proconsulare*, which gave him full military and civil power in the great frontier provinces, where most of the army lay. The rest were left to the Senate; but as his *imperium* was defined to be *maius*—superior to that of ordinary proconsuls—he practically controlled them too. The power was for life, and was not forfeited in the usual way by residence in Rome. He held also (2) the *tribunicia potestas*, also for life, and without limitation to the first milestone out of Rome. This made his person sacrosanct, and gave him the *jus auxilii*, by which he cancelled decisions of magistrates, and the *intercessio*, by which he annulled decisions of the Senate. He had also (3) other powers conferred separately on Augustus, but afterwards embodied in a *lex regia* or *de imperio* for his successors. A fragment of the law passed for Vespasian is preserved (*CIL* vi. 930), and two of its clauses run—

'Utique, quaecumque ex usu rei publicae, majestate divinarum, humanarum, publicarum privatarumque rerum esse censebit, ei agere, facere jus potestasque sit, ita uti divo Augusto Tiberioque Iulio Caesari Augusto Tiberioque Claudio Caesari Augusto Germanico fuit; utique quibus legibus plebeis scitis scriptum fuit ne divus Augustus d.c. tenerentur, is legibus plebisque actis imperator Caesar Vespasianus solutus sit, quaeque ex quaque lege, rogatione divum Augustum d.c. facere oportuit, ea omnia imperatori Caesari Vespasiano Augusto facere liceat.'

Thus the emperor was not arbitrary. He was subject to law like any other citizen, unless dispensed by law. True, he could alter law by getting a *senatus consultum*, or by issuing his *edict* as a magistrate. He could also interpret it by a rescript or answer to a governor who asked directions; his *acta* were binding during his reign, though the Senate might quash them afterwards; and, as we have seen, he had large discretionary powers. But by law he was supposed to govern, and by law he commonly did govern. The excesses of a Nero must not blind us to the steady action of the great machine, which was so great a blessing to the provincials. Moreover, though the Senate was commonly servile enough, it was no cipher even in the 3rd century. It represented the tradition of the past, the society of the present; and every prudent emperor paid it scrupulous respect. If an emperor is called bad, it need not mean that he was incompetent (Tiberius was able enough), or that he oppressed the provinces (Nero did not). It means that he was on bad terms with the Senate, and, therefore, with the strong organization of society which culminated in the Senate. Nero did himself more harm by fiddling and general vulgarity than by murders and general villainess. Society was always a check on the emperor, and in the end it proved the stronger power. If Diocletian shook off the control of the army, he did it only by a capitulation to the plutocrats of society.

The religious condition of the Empire was not like anything in modern Europe. It had no established or even organized Church, for the regular worshipers were local, except that of the emperor. Priesthoods might run in families or be elective, or sometimes any one who knew the ritual might act

as priest; but the priests were not a class. Taken as he commonly was from the higher ranks of society, the priest was first of all the great senator or local magnate, so that his priesthood was only a minor office. The priests were not a clergy, except in the irregular Mithraic and other Eastern cults, where they were not yet taken from the higher classes. Nevertheless, there were sharp limits to Roman toleration, though persecution was not always going on. Intolerance, indeed, was a principle of heathenism, laid down in the Twelve Tables, and impressed by Maecenas on Augustus. Rome had her gods, whose favour had built up the Empire, and whose wrath might overthrow it: so no Roman citizen could be allowed to worship other gods without lawful authority, which could be given only by the Senate. Gradually all national gods obtained recognition, so that the pantheon of the Empire became a large one; but the individual was as strictly as ever forbidden to go outside it. Thus we get the anomaly of persecution without a persecuting Church.

The emperor's own position was equally unlike that of modern sovereigns. He held the office of *Pontifex Maximus* in permanence after the death of Lepidus, B.C. 12. This gave him a dignified position as head of the college of pontiffs, which superintended the State religion; and it gave him by law or usurpation the appointment of pontiffs, vestals, and flamens. But these were only local officials; with the priests in the provinces and with the irregular Eastern cults the *Pontifex Maximus* had no direct concern. Complete as was the identification of Church and State in Rome, the office gave its holder no exorbitant power over religion.

The strength of his position was not official but personal—vaguely indicated by the title *Augustus* (Σεβαστός, Ac 26^{21, 22}). The courtly fiction that the Julian house was descended from the gods might do service for a time; but the truth came out clear at Vespasian's elevation. If he was a tough old general with no romance about him, who died with a scoff on his lips at his own divinity, he was none the less the impersonation of the glory of the world and Rome; and this is what made the emperors divine, and kept them so in spite of absurd deifications like those of Claudius and of Poppaea's infant. Emperor-worship might be fashion; but it was also a real cult sustained by genuine belief. If courtiers placed Augustus among the household gods, courtiers did not keep Marcus there in Constantine's time. Kings were counted gods from the Pharaohs of Egypt to the Jubas of Mauretania; and the Greeks had worshipped great men from Lysander (B.C. 403) onward, till deification became a cheap compliment for kings and their favourites. Rome understood better than the Greeks the difference between gods and men—*deus* is a much more definite word than *θεός*; yet even she deified legendary kings. But Romulus was the last of them, and she never deified the heroes of the Republic. Flamininus was a god in Greece; but Scipio was no more than a man at Rome; and even Sulla was only *Felix*, not *Augustus*. To the last she reserved the honour for emperors and their near relations, for the worship of Hadrian's favourite Antinous was rather Eastern and Greek than Roman. Yet in the goddess Roma the spirit of the State was worshipped long before the honours of deity were pressed on the dictator Caesar by a grateful people and a servile Senate. Caesar's murder was a warning to Augustus; and he called himself *Divi Filius*, but not *Divus*. He allowed the Asiatic cities to build temples to him after the battle of Actium, but required them to join with him the goddess Roma. Other cities followed; first in Asia in apostolic times was

Pergamum, 'where Satan's seat is' (Rev 2¹³). Such cities were called *νεωκόποι* or temple wardens of Augustus, as Ephesus (Ac 19³⁵) was *νεωκόπος* of Artemis. Before long a *Commune Asiatæ* (τὸ κοινὸν τῆς Ἀσίας) was formed, with a chief priest or ASIARCH (in looser sense, as Ac 19³¹), unless these be past Asiarchs) in each city, and over them an elected Asiarch (in the strict sense) or chief priest of the province. Other provinces did likewise, as Bithynia, Galatia, Phœnicia, etc., and in B.C. 12 the 60 States of Gaul organized a *Commune*, meeting annually at the confluence of the Rhone and the Saône. These provincial assemblies were powerful enough—the priests were always magnates—to answer some of the purposes of representative government. They could complain of a bad governor, and often obtain his recall. In Italy, and especially in Rome, the worship of the emperor was chiefly represented by that of his genius or his virtues: only at his death he was formally placed among the gods by the Senate. '*Reliquos deos accepimus*,' says Valerius Maximus, '*Cæsares dedimus*.' This deification was the rule, though emperors who displeased the Senate were not deified when the honour could safely be refused them; and it can be traced well into Christian times, certainly till Jovian (364), and perhaps as late as Theodosius, though long before that time the emperor had ceased to be a real divinity, even among the heathens.

If the Empire was the greatest of hindrances to the gospel, it was also the greatest of helps. We must look below its superficial tolerance in the Apostolic Age, below the deeper enmity proclaimed by Nero's persecution. The single fact that the Empire was universal went far to complete the fulness of time for Christ's coming. Rome put a stop to the wars of nations and the great sales of slaves resulting from them, to the civil strife of cities and their murderous revolutions. Henceforth they were glad to live quietly beneath the shelter of the Roman peace. Intercourse and trade (witness the migratory Jews) were easier and freer than ever since in Europe till quite recently. It was settled peace, too, such as never came again till after Waterloo. Whole provinces hardly saw the face of war for generations together. Roman law went with Roman citizenship; and Latin civilization overspread the West, while Greece under Roman protection completed her conquest of Asia within Mount Taurus.

Historically, the Empire is the great barrier which won for civilization a respite of centuries by checking at the Rhine the tide of Northern barbarism, and at the Euphrates the two thousand years' advance of Asiatic barbarism through Parthian and Saracen and Turkish times, beginning with Alexander's retreat from the Sulej, B.C. 327, and ending only at the repulse of the Turks from Vienna in 1683. During that momentous respite Rome gathered into herself the failing powers of the old world, and fostered within her the nascent powers of the new. This was her work in history—to be the link between the ancient and the modern—between the heathen city-states of the ancient world and the Christian nations of the modern. Her weakness was not political. Emperors might rise and fall, but the Empire itself did not perish when emperors rose and fell no more. It was not military: generals might blunder, but nearly to the end no enemy could face a Roman legion in the shock of battle. It was partly economic, in slavery and bad taxation; partly educational, in the helpless hark back to the mere words of the past; partly also administrative. Christian thought is even now profoundly influenced by the fact that the Empire had no good police. Brigands were plenty in

Judæa (ἀγορῆς 15 times in NT, of which 2 Co 11²⁶ may refer to Gentile regions), and, though other provinces were better off, the evil increased as time went on, and the emperor lost control of the administration. Hence arbitrary severities and laws of atrocious cruelty against such offenders as were unlucky enough to be caught. The Empire was by far the worthiest image of the kingdom of God yet seen on earth, but its imperfections are writ large on every form of Christian thought which looks on power as the central attribute of deity. After all, the Empire was the passing of the ancient world. With all their grandeur, its rulers were only the *καταργούμενοι* (1 Co 2⁶).

LITERATURE.—See ROMAN; and add Boissier, *Religion romaine*; Westcott's *Comm. on St. John's Epp.* ('The Two Empires'); Lightfoot, *Ignatius*, iii. 404; and authorities quoted by them, to which add Fustel de Coulanges, *La Gaule romaine*; and E. G. Hardy, 'The Provincial Councils from Aug. to Diocl.', in *Eng. Hist. Rev.* v. 221.

H. M. GWATKIN.

ROMANS, EPISTLE TO THE.—

- i. Place of the Epistle in tradition. Genuineness.
- ii. Time and Place of writing.
- iii. Occasion and Purpose: (1) Jews in Rome; (2) Christians in Rome; (3) Apostolic foundation; (4) Jewish or Gentile readers? (5) Letter or Treatise? (6) Relation to other letters of the group.
- iv. Sketch of main arguments, and Analytical Table.
- v. Importance of the Epistle.
- vi. Theology and characteristic ideas: (1) God, Attributes and Will—Law, Christ; (2) Man under sin; (3) Man under law and under grace, the Spirit; (4) Man's admission to grace, faith, justification; (5) Grace and the moral life; (6) The Christian community and its Institutions.
- vii. Materials for personal history of St. Paul.
- viii. Transmission of the Text. Integrity. Literature.

i. PLACE OF THE EPISTLE IN TRADITION.—What has been remarked of 1 Corinthians applies equally to this Epistle. But definite traces of its language occur already in 1 Peter, fainter but still distinct traces in Hebrews, and probable distinct traces in James, though here the case is less clear, and Mayor, in his edition of *James*, contends for the priority of the latter (see for details, and traces in Jude, Sanday-Headlam, lxxi ff.). The Epistle was well known to Clem. Rom. (nine passages are distinctly traceable), Ignatius (twelve), Polycarp (six), Justin Martyr (seven), and apparently to Gnostic writers (Naassenes, Valentinians, and Basilides) quoted by Hippolytus. For details, see Sanday-Headlam, who add some very instructive quotations (thirteen, of which seven seem indisputable) from *Test. of xii. Patriarchs*. The first reference to our Epistle by name is that by Marcion, who included Romans in his collection of Pauline Epistles (see below, § viii.). We may safely repeat here what was said on 1 Corinthians (which see), that the Epistle to the Romans has been recognized in the Christian Church as long as any collection of St. Paul's Epistles has been extant. In the Muratorian and other early lists our Epistle stands seventh among the Pauline Epistles, i.e. last among the Epistles addressed to *Churches* as distinct from individuals. Its present position at the head of the list appears first in the 4th cent. (see on 1 Cor., § 1, and Sanday-Headlam, lxxxiv ff.). Another important direct quotation is in Irenæus, *Hær.* III. xvi. 3, and in IV. xxvii. 3, an 'elder,' the pupil of men who had seen the apostles, is represented as quoting Ro 11^{17, 21} ('Paulum dixisse') and 3². Marcion, it is true, omitted chs. 15, 16, and certain other passages; but neither he nor any other heretic impugned the authority of the Epistle, which is included in all the ancient versions. But no weight of external attestation could be more eloquent than the style and character of the Epistle itself. Its very difficulty is of a nature which raises it above the plane of arti-

ficiality. For this difficulty springs from no clumsiness of expression or confusion of thought, but from the depth of the questions handled and the originality of their treatment. It is the most 'Pauline' of all the writings which bear St. Paul's name. Accordingly, critics who have set down almost every other writing of the NT as anonymous, have allowed that this Epistle, along with those to the Corinthians and Galatians, is really from the hand of St. Paul. The somewhat reckless criticism of Bruno Bauer produced little or no effect upon the body of critical opinion in Germany. In more recent times the hypercriticism of the Dutch school of Loman and others, and the extreme theories of Steck (on these see 1 CORINTHIANS, § 4; also Sanday-Headlam, pp. lxxxvi-lxxxviii), have failed to shake the main body of representative critics in their estimate of our Epistle.

ii. TIME AND PLACE OF WRITING.—The ministry of St. Paul as recorded in Acts falls into three periods: (a) The Antiochene (Ac 13-18²³), when Antioch was his headquarters. Towards the end of this period (Ac 16-18) he founds the great Churches of the Ægean region. (b) The Ægean or Ephesian period (Ac 18²⁴-21¹⁰), when he transfers his residence to Ephesus; at the end come his second visit to Corinth and his last voyage to Jerusalem. (c) The period of captivity (Ac 21¹¹-28) at Cæsarea and Rome. To the first period belong the Epistles to the Thessalonians, written from Corinth; to the second, the four Epistles to the Galatians, Corinthians, and Romans. The third period is that of the 'captivity group,' Philippians, Colossians, Ephesians, Philemon. Our Epistle was in all probability the last of its group,—certainly it is later than 1 and 2 Corinthians. It was written from Corinth, where (assuming that 16²² belongs to our Epistle, see below, § viii.) St. Paul was the guest of the Gaius of 1 Co 1¹⁴.

Phœbe, possibly the bearer of the letter, was a 'deaconess' of Cenchreæ, the eastern port of Corinth. Moreover, St. Paul was on the eve of departure from Corinth with the alms collected by him in Macedonia and Achaia (15²³, 26) for the 'poor saints' of Jerusalem. From the latter place he was hoping to visit Rome, and afterwards Spain (15²³; cf. 2 Co 8¹⁻², Ac 24¹⁷ 20²² 19²¹). It was after the winter, which St. Paul had probably spent in Corinth (1 Co 16⁶), for he proposed to sail to Syria (Ac 20³) and to reach Jerusalem before Pentecost (Ac 20¹⁶). But Ro 15 contains no allusion to the plot of the Jews which at the last moment forced him to change his route (Ac 20³). The exact year in which the Epistle was written depends upon the dates to be assigned to 1 and 2 Cor. (see 1 CORINTHIANS, § 6 and reff., and CHRONOLOGY OF NT). If, as the present writer inclines to believe, the chronology of Lightfoot, etc., is not definitely superseded, the Epistle dates from just before the Passover of the year 58. If the whole scheme has to be shifted back two years, then the corresponding date in 56 must be adopted. The point may, for the purpose of this article, be left in suspense. The relative date, i.e. with reference to the other Epistles, is the point of real importance for the historical explanation of our Epistle. On this point the limits of doubt are narrow. There is no question but that Romans belongs, with 1 and 2 Cor., to the Ægean period (see above), in contrast to 1 and 2 Thess., which belong to the Antiochene period, and to Philippians, Colossians, Ephesians, Philemon, which come after St. Paul's captivities had begun. There is, moreover, no doubt that Romans was written on the eve of St. Paul's departure from the Ægean region, and therefore was preceded in time by both Epistles to the Corinthians. The point which is less absolutely certain is the relation of Romans to Galatians. It is not so very im-

portant to subdivide the alternative hypotheses which agree in supposing Romans to follow Galatians. If Lightfoot's view of the close psychological relation between 2 Corinthians and Galatians remains unshaken in itself, and is not outweighed by general chronological considerations, we have a very intelligible historical situation for the origin of Romans (see below, §§ iii. v.). Even if Galatians has to be placed at the beginning of the Ephesian period (Weiss, etc.) or at the close of the Antiochene period (Ramsay, Rendall, etc.), we lose, no doubt, something of the dramatic unity of situation, but we may still regard Romans as the mature expression and expansion of the thoughts struck out at white-heat in Galatians. But the relation is wholly reversed if (with Clemen, *Chronol. der Paul. Briefe*) we regard Galatians as presupposing Romans. This view is part of a general rearrangement of Pauline chronology discussed in the art. 1 CORINTHIANS, vol. i. p. 485. Its direct proof is drawn from the relation of the treatment of circumcision, the law, etc., in our Epistle to that in Galatians, which is supposed to represent an exacerbation of the apostle's attitude. The view to be maintained below (§§ iii.-vi.) seems quite as legitimate an inference from the facts, and in itself more in accord with our general knowledge of St. Paul's thought and temper. If the reader finds it unsatisfactory, he may remember that he has the hypothesis of Clemen to fall back upon.

iii. OCCASION AND PURPOSE.—In order to estimate the occasion and purpose of our Epistle, we must first ask, For what readers was it meant? and, secondly, What was the apostle probably desirous to say to such readers at this particular time? This necessitates a glance at the antecedents of Roman Christianity.

The Christian body to which our Epistle is addressed was clearly not, like that of Thess. or even of Gal., of recent origin (18¹³ 15²² 16⁷). In view of features of the Epistle, to which attention will presently be drawn, its origin is to be sought in connexion with the existence of a Jewish community in Rome.

1. *Jews in Rome.*—The first known connexion of the Jews and Romans was in the 2nd cent. B.C., under the Maccabees (1 Mac 8¹⁷, 12¹¹, 14¹⁶, 24¹⁵ 15¹⁶). Jewish embassies had gone to Rome, and had obtained treaties of alliance (B.C. 161, 144, 141, 129). Probably their earliest settlements in Rome date from this period,—though there is no need to seek a special occasion at Rome at a period when Jews were beginning to find their way all over the civilized world. Cicero (*pro Flacco*, 59) tells us of a large Jewish community in Rome, which sent annual subsidies to Jerusalem. The captives brought by Pompey from the East (B.C. 61) swelled their numbers. Many of these gained enfranchisement (Philo, *Leg. ad Gaium*, 23), and these are probably the *Libertini* who supported a synagogue of their own at Jerusalem (Ac 6⁹). Their worship was expressly tolerated by Julius, Augustus, and Tiberius. They occupied, according to Philo, a quarter of their own beyond the Tiber. But there is evidence of synagogues, and therefore of Jewish residents, in other parts of the city also. Josephus tells us how 8000 Jews in Rome supported the complaints against the rule of Archelaus in Judea (A.D. 2-4; *Ant.* xvii. xi. 1; *BJ* ii. vi. 1). The satires of Horace, Juvenal, and Persius show that the Jews were far from popular in Rome; while yet, partly from the attraction which foreign rites had for the superstitious, partly, no doubt (Schürer, *HJP* § 31, v.), from the more serious attraction of the fusion of a higher morality and a purer theism than were to be found elsewhere, they did not

lack very numerous adherents ('Unus multorum,' Hor. *Sat.* i. ix. 71). A temporary expulsion, A.D. 19, by Tiberius, did not long check their growing numbers and importance in the city (see, for details, Schürer, *Gemeindeverfassung*, and *HJP* § 31, i. ii.; Berliner, *Gesch. der Juden in Rom*, 1893; Sanday-Headlam, *Romans*, Introd. § 2, and authorities cited by them).

2. *Origin of Christianity in Rome.*—A movement which so profoundly stirred Judaism at its religious centre could not fail to find an early response in the Jewish community at the centre of the world's intercourse. At every great festival at Jerusalem, Roman Jews would be present (*ἐκδημούντες*, Ac 2¹⁰, i.e. *ἐκ πανηγύρεαι*, as Demosth. c. *Mid.* p. 584). This was the case at the first Christian Pentecost. We may see in the mention of the Roman Jews of Ac 2¹⁰ a significant hint of what may possibly have happened. 'Some who had gone forth from Rome as Jews may well have returned there as Christians' (W. H. Simcox). But we must look rather to the constant stream of movement to and fro than to the result of so momentary an impression as that of this one festival. 'It would take more than they brought away from the Day of Pentecost to lay the foundations of a church.' The origin of the Roman Church is to be looked for in the steady though obscure circulation, kept up among the Jews as among other classes, between Rome and the provinces. Aquila and Priscilla may have been Christians before their expatriation from Rome, A.D. 51, 52. It was, at any rate, in the class to which they belonged that the seed of the vast tree of Roman Christianity was first sown and grew (see also Sanday-Headlam, p. xxvii, for details from Ro 16).

3. *Apostolic foundation of the Roman Church.*—There is no need to assume that any apostle first planted the gospel in Rome, nor do the facts permit the supposition. St. Paul is not, in writing to the Romans (15²⁹), building upon the foundation laid by another. He is, on the contrary, discharging an unfulfilled portion of his mission as Apostle to the Gentiles (11¹³ 14¹⁴). The Roman Church, then, had hitherto lacked apostolic leadership and, so far as our Epistle informs us, organization on any permanent basis (see below, § vi. 5, and art. 1 CORINTHIANS, vol. i. p. 490). It is true that early tradition ascribes the foundation of the Roman Church to St. Peter, and a less ancient but still somewhat early tradition ascribes to that apostle a twenty-five years' episcopate of the Roman Church. The highly contentious character of the questions here at issue, their extraordinary complexity, and their secondary bearing upon our main subject, forbid anything but the slenderest discussion of them in this article. But it may be said, with reference to the first-named tradition, that the earliest testimony on the subject ascribes the foundation of the Roman Church to St. Peter and St. Paul jointly; it is 'Petro-Pauline,' i.e. ascribes nothing to St. Peter which it does not equally ascribe to St. Paul. Moreover, it hinges primarily on the martyrdom of the two apostles at Rome. Clement, writing soon after 95 (5⁴⁴), couples the death of the two apostles in a context suggestive of martyrdom; he does not expressly locate their death at Rome, but speaks of it as if it were within the direct knowledge of those on whose behalf he is writing. Ignatius (*ad Rom.* iv. 3) is less explicit; he suggests that the two apostles had given instructions to the Roman Christians. His language exemplifies the habitual association of the two names. This is stronger still in Dionys. Cor. (in Eus. *HE* II. xxv. 8); he makes the two plant the Church of *Corinth* as well as that of Rome. Irenæus (and perhaps

Hegesippus, *ap. Eus. HE* iv. xxii.) knows that the Roman Church claims the two apostles as its founders. Tertullian (*Præscr.* 36) speaks of the two apostles as having 'poured into that Church all their doctrine along with their blood.' His Roman contemporary, Caius, knows the *τῶν ἀποστόλων* of the two apostles on the Vatican and by the Appian Way. We must notice, lastly, the interesting statement in the *Prædicatio Pauli*, quoted by pseudo-Cyprian (*De rebapt.*, Hartel, vol. iii. p. 90), that after long separation the two apostles met and suffered together in Rome. It is a very improbable suggestion of Lipsius, that this stream of tradition owes its origin to the attempt to harmonize the relations of the two apostles, and that it presupposes the Clementine tradition in which the anti-Pauline tradition of SIMON MAGUS at Rome was incorporated. This latter tradition is closely connected with the tradition which ascribes to St. Peter a special connexion with the Roman Church, i.e. as distinct from St. Paul. Whether it is possible to separate them, so as to exhibit the story of St. Peter's twenty-five years' episcopate, without any dependence on the legend which brings Simon Magus to Rome (which in turn seems wholly due to a well-known mistake of Justin, see *Dict. Chr. Biog.* art. 'Simon Magus'), is a most intricate question. An inadequate discussion of it would be worthless, an adequate discussion would transgress the proportions of this article. Suffice it, then, to say that the question of importance for our purpose is whether St. Peter can be credibly held to have come to Rome as early as the reign of Claudius (41–54). There are two possible sources for this supposition. The one is the statement of Justin, that Simon came to Rome in this reign. But, apart from the mistake upon which Justin founded this statement, neither Justin, nor Irenæus, nor Tertullian after him, know anything of the Roman conflict of Simon with St. Peter. The other source is the idea that St. Peter, on leaving Jerusalem (Ac 12¹⁷), came to Rome shortly before the death of Herod Agrippa I. (i.e. about A.D. 42); the Lord having (as inferred from that text) commanded the apostles to remain twelve years in Jerusalem. Neither of these alternatives proves any foundation in fact for so early a visit of St. Peter to Rome.

On the whole, we conclude that the Petro-Pauline tradition is the only one which goes back to the 1st cent., that it is presupposed by the tradition of the Roman conflict between St. Peter and Simon, and by the tradition of St. Peter's twenty-five years' episcopate, and that its foundation in fact is the martyrdom of both apostles at Rome. This was the 'foundation' of the Roman Church in the sense in which the 'foundation-stone' of a building is often laid after the actual foundations have been long in progress. The two apostles 'consolidated the Church with their blood.' There is therefore no primitive tradition which brings St. Peter to Rome before St. Paul, or any long time before the usually accepted date of his martyrdom. (See Lipsius, *Apokr. Apostelgesch.* vol. ii., and *Quellen der röm. Petrusage*; Erbes, 'Todestage der Apostel Paul. und Pet.' in *Texte und Untersuch.* xix. 1; Lightfoot, *St. Clement*, vol. ii. p. 490 ff.; the very careful and fair discussion in Sanday-Headlam, *Intr.* § 3; and Chase in art. PETER in vol. iii. of the present work).

4. *Composition of the Body addressed by St. Paul.*—We must assume as the basis of discussion that St. Paul was not wholly ignorant of the composition and general state of the Church to which he was writing. The names and data of ch. 16, which we believe to be an original part of the Epistle (see below, § viii.), and the sureness of touch which

marks all St. Paul's references to the readers of this Epistle, are enough to carry us thus far. The Epistle, then, is certainly meant for readers of *Gentile origin*. St. Paul counts the Romans, as such, as Gentiles; see 1th *ἐν οἷς ὄντε καὶ ὑμεῖς*, v. 13 *ἐν τοῖς λοιποῖς ἔθενον*, cf. 15th. The readers are expressly described as Gentiles 11¹³⁻²², especially *ὑμῖν λέγω τοῖς ἔθνεσιν*, while he speaks of the Jews in the third person 9th 11²³⁻²⁸ 31. These passages are quite conclusive, and would justify a verdict if taken alone.

But there are other passages which show with equal clearness that St. Paul is contemplating readers *Jewish in their religious education and ideas*. (1) The general argument of the Epistle, levelling down the Jew, both under law and under grace, to the footing of the Gentile, is more intelligible as addressed to Christians of Jewish habits of thought. The careful discussion of Abraham's righteousness suggests a similar origin. Nor, be it observed, is there any suggestion of anti-Pauline agitators in the Roman Church to account for this line of argument (as in Galatians). Add to this the assumption of knowledge (5th) as to Adam and his heritage of death, the pains taken (3rd 6th) to rebut the imputation of antinomianism, and to show (ch. 11) that the rejection of Israel may be but the necessary step to their eventual acceptance. (2) The dialectical form in which Jewish difficulties are carefully faced, and paradoxes especially abhorrent to the Jewish mind repelled with *μη γένοιτο* (3rd 4th 7th 13 9th 20 11¹¹, cf. Gal 2¹⁷); the *προεχόμενα* of 3rd (cf. 4th, and 7th 6th in conjunction with the expansion, vv. 7-28, also 9th). (3) Here we must emphasize the express statement 7¹⁻⁵ that the readers had lived under the Law, and in 'oldness of letter,' and that by the death of Christ they had been discharged from their allegiance to the Law. This passage was regarded by Mangold (*der R.-Brief u. s. gesch. Voraussetzungen*, 1884) as the immovable corner-stone of the Jewish-Christian character of the Roman Church. It seems to explain St. Paul's readiness throughout to make use of Jewish concessions (2nd 3rd 19 29th 4th 6th 14th) and his regard for objections natural to a Jewish mind.

In any case, there is not the smallest evidence in the Epistle that St. Paul apprehended hostility on the part of his readers (see 6¹⁷ 16¹⁷). He writes as a Jew to Jewish, but not to inveterately prejudiced readers. The *Judaism* of the Dispersion was, in many places (e.g. Berea), milder and less *pratiqum* than that of Palestine. The Jewish *Christianity* of the Diaspora may well have stood, in many cases, in an analogous relation to that of the *πρωτοὶ ἄγιοι* (Ac 21^{20c}). Evidently, the Jewish influence which had moulded the religious temper of the Roman Church was not, as in Galatia and Corinth, of a recently imported or aggressive type.

How, then, are we to combine the two classes of evidence? Partly we might explain their divergence by St. Paul's habit of treating one portion of a Church as if it represented the whole; e.g. at Thessalonica, Corinth, and Ephesus there were numerous Jewish Christians, but St. Paul addresses the Churches, especially the first and last named, as wholly Gentile.

But the mere assumption of a mixed composition does not quite account for the phenomena. The readers are treated by St. Paul as a homogeneous body. Even in ch. 14 the distinction between the strong and the weak is not to be simply identified with that between Gentile and Jew. The Roman community as a whole is treated as Gentile in its elements, but Jewish in its ideas and feeling. Now, a class of men corresponding to this description existed all over the Hellenistic Jewish world in the PROSELYTES, the *σεβόμενοι* of Acts, who, without as a rule accepting circumcision, frequented the

synagogues, observed the moral law, worshipped the God of Israel, and were instructed in the Scriptures. It was among these, according to Acts, that the gospel everywhere made its first heathen conquests. Probably the Roman Church was no exception. If so, there would of course be, as at Corinth, etc., a nucleus of Christian Jews, and, by the time when our Epistle was written, numbers of heathen might well have become proselytes directly to the Christian body without previously passing through the intermediate stage of Jewish proselytism. Still it was the proselytes who gave the tone to the community, and they owed their all, as Christians, to the influence and training of Christian Jews. We are compelled to form hypotheses in this matter, and it is this hypothesis which best satisfies the conditions of our problem. The old Tübingen alternative of anti-Pauline Jewish, or anti-Jewish Pauline Christianity, is not imposed upon us either by the facts of history or by the internal evidence of the letter itself. (On this subject see also Hort, *Romans and Ephesians*, pp. 19-33; Beyschlag in *SK*, 1867; Schürer's art. on 'Romans' in *Encyc. Brit.*.)

5. *Letter or Treatise?*—This being assumed, we may approach the question of the writer's purpose. St. Paul would not fail to see that the future of Gentile Christianity in the Roman world depended to no small extent upon the future of the Christian body in the imperial city. We accept the suggestion of Ramsay, that St. Paul had early grasped the importance of the Roman empire as a vehicle for the dissemination of the gospel. To commend his own gospel—the gospel of the Gentiles—to a community like that at Rome, was no hopeless task. To this end a *personal visit* to Rome was the obvious means, and this he had long resolved to pay (1st). But a letter such as this would pave the way for a successful visit, and meanwhile it would accomplish much. Hence its reasoning conciliatory tone (12th 15th etc.), specially characteristic of a period of reaction from a critical contest, when the apostle's own desire for peace was, moreover, finding concrete expression in the great *λογία* (15²⁰ 30th). It was, then, no mere arbitrary choice which led St. Paul to address this, his greatest letter, to Rome. The Epistle is not a systematic treatise which might with equal appropriateness have been addressed to any Church. It has, primarily at least, in view the idiosyncrasy of the Christian community at Rome (see below, § v.).

6. *Relation to other Epistles of the group.*—Our Epistle comes at the close of a period of deep agitation, reflected in the Epp. to the Corinthians and Galatians, and summed up in 2 Co 7⁵ *ἐξωθεν μάχαι, ἐσωθεν φόβοι*. Referring for details to the articles on those Epistles, it will suffice to say that many of 'the circumcision' had never in their hearts acquiesced in the recognition (Ac 15, Gal 2⁹) of a Christianity emancipated from the Law, or frankly recognized the apostleship of St. Paul. At Corinth the latter question had been brought into prominence, in Galatia the former and deeper question. The Epistle to the GALATIANS stands in the closest relation to our Epistle, and its main ideas must be grasped as a preliminary to the understanding of Romans (see below, § v.). 'To the Galatians, the apostle flashes out in indignant remonstrance the first eager thoughts kindled by his zeal for the gospel, striking suddenly again* a stubborn remnant of Judaism. To the Romans he writes at leisure, under no pressure of circumstances, in the face of no direct antagonism, explaining, completing, extending the teaching of the earlier Epistle, by giving it a double edge directed against Jew and Gentile alike' (Lightfoot). The agitators of Galatia had insisted upon the Law as a necessary and permanent scheme of righteousness and salvation

for mankind. Laid down by God as the condition of man's communion with Himself, it could not be set aside by any subsequent covenant. Man could only appear before God as a faithful doer of the Law. St. Paul in reply had addressed himself to two main points: (1) to prove that the Law could not, and that faith alone could, make man righteous in God's sight; (2) to show the true position of the Law in the history of God's dealings with man. Righteousness, he argues, is a free gift from God to man, and as such was accorded to Abraham on the sole condition of faith in an unconditional promise. The inheritance of this promise passes not by any earthly law of succession, but to those who resemble Abraham in his faith. The Law, being of long subsequent date to the Promise, could not be meant to affect its fulfilment. It was given for a temporary purpose, pending the fulfilment of the Promise, namely, to prepare men for the fulfilment by bringing out and making men feel their essential sinfulness and helpless inability to approach God with any claim to righteousness of their own. The righteousness which they could not earn is accorded as the fulfilment of the promise to Abraham's faith in Christ. Like the promise itself, it is unconditional, demanding nothing on our part but faith. To go back to circumcision is to abandon the attitude of faith, and to refuse to see that in Christ the Law has fulfilled its purpose, and has an end. 'Behold, I Paul say unto you, that if ye accept circumcision, Christ shall profit you nothing' (Gal 5, cf. the whole of ch. 3). This is the central thought worked out in Romans, but fortified and enlarged by a wider outlook upon history, a profound application to the principles of the moral life, and a comprehensive philosophy of the history of revelation. In this latter part of our Epistle (chs. 9-11) the school of Baur saw its principal purpose. This is a mistake. But it is essential to St. Paul's argument to show that the righteousness of faith, by excluding the Jewish 'boast,' does not involve a reversal of God's 'gifts and calling.'

iv. ARGUMENT OF THE EPISTLE, AND ANALYSIS.

—The theological part of the Epistle extends from 1¹⁸ to the end of ch. 11. It treats successively the Theology of (1) Redemption (1¹¹-5), (2) of the Christian life (6-8), and (3) of history (9-11). The Theology of Redemption comprises two themes, summed up and contrasted in 5¹²⁻²¹, viz. the 'wrath of God' (1¹⁸-3²⁰) and the righteousness of God (3²¹-5¹¹). The wrath of God is the correlative of man's need of redemption. 'First comes the statement that the world up to that moment had been, morally speaking, a failure' (Mozley, *Miracles*, Lect. vii., a remarkable passage on our Epistle). A moral creed was there, but not a corresponding life. Among Jews and Gentiles alike the facts are the same: 'knowledge without action.' The utmost the knowledge of right could do for man was to confound him with a sense of utter self-condemnation. And this self-condemnation was but the perception of an awfully real fact—the wrath of God revealed in all its fearful intensity, not only upon the careless Gentile, but upon the privileged Jew, whose privilege (none the less real because of his apostasy, 3¹⁻⁸) only heightened his personal guilt. But God's dealings with men, His self-revealed character, had not only led men to fear His holiness, but had also from the first led men to look upon Him as a Saviour. His long series of mercies to His people had led them to look forward to something in the future, some deliverance more final, more complete, more marvellous, than His mighty works of old. God was pledged to redeem, and God was righteous (see below, § vi. (1)). The OT revelation had led men to hold to the righteousness of God as containing

the promise of salvation; the gospel declares it as an accomplished fact. And the universality of the wrath of God before Christ only brings out that redemption, when it came, was the sole outcome of the righteousness of God, and not in any degree the achievement of man. God's *righteousness* has as its correlative the *fact* of Redemption. The redeeming work of Christ, then, wherein God appears as 'righteous and making righteous' (3²¹), humbles man even more completely than did the antecedent revelation of wrath—their boast is shut out, not (only) by a law of works, but (even more completely) by a law of faith. The privilege of the Israelite has no place in the sight of God.

And this strange result, so far from revoking the word of God in the OT, is really its fulfilment. This gospel of faith, this levelling of privilege, was preached before the Law, before any characteristic institute of Judaism was ordained. The whole story of Abraham—the boasted father of Jewish privilege—makes this clear (ch. 4). 'Well, then, my readers,' the apostle concludes, 'let us all make this gift of God our own' (see Beet on *ἔχωμεν*, 5¹). Peace with God is ours, founded on the certainty of God's love for us—a certainty created in our hearts by the Spirit of God Himself, but no mere subjective certainty; for actual recorded fact speaks plainly to us of that love—a love transcending all probable limits of human devotion. We can trust God to complete what He has begun, and live in joyful hope, however the appearances of life are against us.

True, the experience of history, so far, has been that of a world-wide heritage of death and sin. But the act of weakness which bequeathed that heritage to man has now been superseded by an act of Divine power fraught with the promise of Righteousness and Life to all who receive the abundance of its grace (5¹²⁻¹⁹).

In this great twofold division of human history, how subordinate a part was played by Law! It forms the last episode of the heritage of death, aggravating the disease in order to intensify man's want of the Remedy (5²⁰).

St. Paul has done half his work, and what he has done is 'more than half of the whole.' He has shown that the wall of sin no longer shuts out the soul from God, that access to God is ours, that the Christian Life is made possible.

But it remains for him to place the Christian Life itself before our eyes, and this he does in the second great section. And, first of all, he takes it in the concrete (ch. 6). The twofold question, 'Shall we sin?' (vv. 1-18) at first sight answers itself—no one would say that the Christian is to sin. But the weight of the question really turns on the *reason why*? These chapters (6-8) give us the fundamental principles of Christian ethics. And, first of all, he shows us that 'the grace wherein we stand,' which he has hitherto viewed negatively as Justification, i.e. Forgiveness of sin, is on its positive side union with Christ. If we were united to Him by Baptism, the rite resembling His Death, we shall further be united with Him by something corresponding to His Resurrection, viz. a new vital energy—*καὶ ἀνάστασιν ζωῆς*; only, we must realize this—allow the new life of Christ to wield our limbs. For we are no longer under an external compulsion, but instinct with an indwelling Force—'not under law, but under grace.'

Our obedience to the will of God will be not *less* complete for this reason,—but *far more*. 'If,' he continues, 'you seem to take what I have said as a paradox, I will make my meaning plain by an unworthy metaphor. You have to choose between slavery and slavery—nay, you have made your choice—you have renounced slavery to sin. Well, then, you are slaves of righteousness, slaves of

God: you cannot, if you look back on the past, repent your choice. You are dead in Christ, and when a person dies, he passes out of the control of law. You then, in dying with Christ, died to the law, and are alive to Christ alone' (6¹⁵⁻¹⁷).

St. Paul passes from the concrete picture of the Christian life to the consideration of the forces which are at work in it (7⁵⁻⁸). He employs the method of difference, comparing the pre-Christian life *at its very best*, i.e. as lived under Divine law, with the Christian life; the old life under the letter with the new life in the Spirit. This contrast is tersely stated in 7^{5, 6}, then life under law is characterized in 7⁷⁻²⁵, and life in the Spirit in ch. 8. In 8^{1st} the question asked in 6¹, so far as it needs an explicit answer, is formally answered.

The connexion of 9-11 with the general argument of the Epistle may be best seen if we consider how they are anticipated in 3¹⁻⁸. That this is so can be readily proved. The Rejection of Israel, then, was a fact which apparently collided with the main thought of the first section—the Righteousness of God. The Righteousness of God was apparently, to St. Paul, above all God's consistency with, or truth to, His revealed character and purpose. And the absolute levelling of Jew and Gentile—especially the *levelling down* of the Jew to the position of the Gentile as the object of God's wrath—had the look of a revocation of express promise, the going back upon God's own covenant. Was, then, God a 'covenant-breaker'?—*μή γένοιτο*. Yet to St. Paul the difficulty was a very real one, and had to be explained. His fundamental explanation is found in 9⁶⁻²⁹ and 11¹⁻¹⁰—viz. that the proper party to the Divine covenant, the true heir to the Promises, is not Israel after the flesh, but the believing few—or, rather, all who by their faith prove themselves true sons and heirs of Abraham (see ch. 4), and that this has been made plain by God all along. But there is the equally important thought that the calling in of all nations—without which the Divine promises from Abraham downwards would not be satisfied, nor the Truth of God really maintained—would have been impossible but for the rejection of the Jews. 'By their fall, salvation had come to the Gentiles,' their unrighteousness had established the Righteousness of God (3⁹). This is the great paradox of the third section. Still, even with St. Paul, *τὸ συγγενὲς τοῦ θανάτου, ἢ τοῦ ὕδατος*, blood is thicker than water, and he will not surrender the hope of the ultimate conversion of the apostate people, consecrated as they are by the root whence they had sprung (11¹¹⁻³²).

The argument therefore falls into the following tabular scheme:—

- I. EPISTOLARY INTRODUCTION, 11-15.
 - A. THE SALUTATION (1-7).—α. The writer, his gospel and apostleship (1-6); β. the readers (7a); γ. the greeting (7b).
 - B. THE ROMANS, AND THE APOSTLE'S DESIRE TO PREACH TO THEM (8-15).
- II. DOCTRINAL PART (116-11).
 - A. THEOLOGY OF SALVATION (116-8).
 - a. Theology of Redemption (116-5).
 - Preamble (116-17).
 - (1) The Wrath of God (118-320).
 - All, Gentiles (119-32) and Jews (21-38), alike (39-20) under the wrath of God against sin, and in need of redemption; (21-16 lay down a general principle, preparing for the direct attack (17-29) upon Jewish self-esteem).
 - (2) The Righteousness of God (bringing redemption to all) (321-521).
 - a. The fact of Redemption (321-26) (vv. 28-29). *Significance of the Death of Christ*.
 - β. All men on an equality in view of this fact (327-30).
 - γ. The Righteousness of Faith older than that of Law (331-425).
 - δ. The Righteousness of Faith the basis of Certitude and Hope (51-11).

- a. Conclusion. The work of Christ in contrast with the failure of Adam (512-21).
- b. Theology of the Christian Life (61-320).
 - (1) Synthetic treatment. 'The Christian and the pre-Christian life contrasted as—
 - a. Life and death (61-14).
 - β. Sin and righteousness (615-23).
 - γ. Law and grace (or letter and Spirit) (614 71-8).
 - (2) Analytic treatment (75-25): the factors (or psychology) of the Christian life.
 - a. Under Law: flesh, will, intellect (75 7-25).
 - β. Under Grace: spirit, and the Spirit of God (76 8).
- THE SPIRIT OF SONSHIP IN CHRIST creates (Obedience to God's Will (81-17). In us (Certitude and Hope (818-39).
- B. THEOLOGY OF HISTORY (9-11; cf. 31-3).
 - (The character of God as shown in the history of the People of God).
 - The problem of the rejection of Israel (91-5) considered in relation to—
 - a. The Past (the promise of God) (96-23).
 - (1) The promise to Israel was never, from the first, tied to fleshly descent (7-13), but freedom was expressly reserved to God (14-18).
 - (2) This freedom vindicated—α. *a priori* (19-21), and β. *a posteriori* (22-24); what has happened is the fulfilment of God's word in prophecy (25-30).
 - b. The Present (921-1021), the responsibility of the rejected.
 - (1) The actual error of Israel (930-105).
 - (2) Their error analyzed and defined (103-13).
 - (3) Its inexcusable nature shown (1013-20).
 - c. The Future (111-36). The Rejection of Israel.
 - (1) Only partial (111-10).
 - (2) Only temporary (111-39).
 - Doxology, closing part II. B. and the doctrinal portion of the Epistle (1133-36).
- III. PRACTICAL PART.
 - A. GENERAL SOCIAL AND MORAL DUTIES (12. 13).
 - a. Practical Christian Conduct (121-21).
 - b. The Christian and the Civil Power (131-7).
 - c. The Law of Love (138-10).
 - d. The Approach of the Day (1311-14).
 - B. MUTUAL DUTIES OF SECTIONS IN THE CHURCH (141-1513).
 - a. The Strong and the Weak (141-23).
 - b. Gentiles and Jews (151-13).
- IV. EPISTOLARY CONCLUSION (1514-1627).
 - a. The Apostle and his readers (1514-24).
 - b. The *lexis*, and the Apostle's approaching visit to Jerusalem (1525-34).
 - c. Introduction of Phœbe (161-2), and salutations to individuals (3-16).
 - d. Final warnings (17-20) and benediction.
 - e. Salutations from individuals (and benediction in many MSS) (21-24).
 - f. Final Doxology (25 27).

v. IMPORTANCE OF THE EPISTLE.—It is evident that we have here, not exactly a systematic treatise on Christian doctrine, but a letter, held together in all its parts by a central idea, the working out of which in its presuppositions and applications is the essential purpose of the whole. This central idea is to be sought for in connexion with what the apostle calls (2¹⁶ 16²⁵) 'my gospel' (cf. 1¹⁻⁶). This expression, understood in the light of Gal 2⁷, points to more than a mere subdivision of labour between the apostles. Not merely the well-being, but the very existence of non-Jewish Christianity depended upon the gospel specially entrusted to St. Paul (compare Ph 2¹⁶ with Gal 2^{2c}). The gospel of the uncircumcision, St. Paul's gospel (Ro 16²⁵, Eph 3^{6, 7}), meant the levelling of Jewish privilege and self-righteousness (Ro 10³ 3³⁰), and this rested upon the principle of *faith* as the sole ground of righteousness in the sight of God (3^{27, 28} read γὰρ, 4¹⁶ etc.).

If this view is correct,—and it seems to follow directly from St. Paul's own language,—it at once places Romans in a fundamental position among our materials for a Pauline theology, and marks the earlier chapters as fundamental in comparison with the rest of the Epistle. To take the latter point first: it was a too external view of the Epistle which led Baur to see its primary purpose in the subject of chs. 9-11. Near to the

apostle's heart (9^{1st}) as that subject was, it belongs to the historical application of the fundamental idea of the Epistle rather than to the fibre and substance of that idea itself. The ideal relation between God and man holds good prior to any particular course which in God's providence the religious history of the world may have followed. Had the Jews never enjoyed the position of a chosen people, the fundamental facts of human nature in relation to God would have been the same. The Law came in as a secondary factor (3²⁰), and the historical relations of Jew and Gentile, the apostasy of the Jews, belong to the sphere not of eternal realities, but of the contingent. Therefore the first eight chapters accomplish St. Paul's primary purpose; the next three round off his fundamental thought by vindicating it in the light of religious history. And of the first eight chapters, clearly those (6-8) which deal with the principles of the Christian life presuppose and are governed by those which treat of man's fundamental relation to God (1-5). These chapters, then, which are directed to convincing all Christians, especially those of Jewish habits of thought, that man cannot become righteous by means of law, but only by faith, are the central portion of the Epistle, and it is there that its main purpose is to be found. St. Paul's main purpose was, then, to commend 'his gospel,' the principle of the righteousness of faith, to the Christians of Rome. But if so, it is a letter, not a treatise in the full sense of the word. So far from being meant as a compendium of Christian doctrine, it is not written with special reference to what was common to St. Paul and the older apostles (1 Co 15¹¹). This the Romans already know, and it is taken for granted (16¹⁷ 6¹⁷). The apostle writes not to controvert, nor even to reconstruct *de novo*, but to complete (1¹¹). St. Paul's gospel was but the explicit formulation of what was implied in the gospel as preached by all, and from the first. If Christ, as all taught and all believed, had died not in vain, then righteousness did not come through Law (cf. Gal 2²¹). It need not, then, surprise us that the enunciation *ex professo* of the specifically Pauline doctrines is almost confined to the Epistles of this group. In the earlier Epistles to the Thessalonians, St. Paul is at a simpler stage of his teaching. To the recent converts of Macedonia, temperance, righteousness, and the judgment that was to come (Ac 24²²) supply the natural heads of instruction. In Philippians we catch the last echoes of the great controversy; in Ephesians, Colossians, Philemon, and still more in Timothy and Titus, new circumstances call forth different categories of doctrine. But throughout, the principles of Romans and Galatians are presupposed and are fundamental. Lastly, as compared with Galatians itself, our Epistle is primary. Galatians (see above, § iii. 6) is addressed at a special psychological moment. Its argument from the priority in time of the covenant of faith reappears, identical in substance, but in more extended elaboration, in Ro 4. But the eternal principle which underlies this historical argument is worked out in Romans with a wider outlook and a deeper foundation in human nature. The Gentile world is included in the arraignment of human helplessness before God. The history is carried back from Abraham to Adam; the justification of man is put into relation with the righteousness of God, the inability (8³) of the Law to save is grounded upon a searching psychological analysis of its exact effect (Ro 7^{5st}, cf. Gal 3¹⁹), and the contrasted moral renovation effected by the Spirit (Gal 5^{18st}) is described at length and put into relation with a comprehensive and sublime view of the meaning and destiny of creation. No doubt, the root-ideas of Romans are

those of Galatians; but in the latter Epistle St. Paul is dealing with the controversy of the hour, in Romans he is dealing with human nature itself, and with the fundamental and universal relations of man as man to God as God, as conditioned by the central fact of history—the Person and work of Christ. Our Epistle, then, is the ripe fruit of St. Paul's distinctive mission as a master-builder (1 Co 3¹⁰) in the formation of the Church. In chs. 1-5, where he speaks as a Jew to Jews, we see Judaism *led out of itself* by the gospel, but by its own methods and from its own premises. This is a re-statement, but on a broader basis, of the position of Galatians. Then in chs. 6-8, speaking as a Christian to Christians, he brings out the contrast between law (and flesh) and grace (and spirit) as the respective spheres of the old and the new life. Here the Jewish point of view, its legalism and nationalism, are left far behind, and the ethical categories of the OT (even in their truest significance) have given place to those of the New (compare the deepened sense of the terms 'spirit' and 'flesh,' below, § vi.), the obedience of slaves to that of sons, the natural man to the spiritual; propitiation for sin issues in the destruction of its power (8^{1st}), the satisfaction of Law by Christ in its supersession as a factor in the spiritual life.

vi. THEOLOGY AND CHARACTERISTIC IDEAS. — An article like the present neither requires nor permits a full discussion of these; but it would be incomplete without a brief enumeration of the principal characteristic conceptions of the Epistle.

1. For his *conception of God*, St. Paul is dependent on the Old Testament. In other words, he does not so much analyze the idea of God as the absolute or perfect Being, as insist upon the character of God as it has entered into human experience in the course of God's dealings with men. This has been the case in two main ways. On the one hand, God has revealed Himself to man through nature (1^{20st}) and conscience (2^{14st}). 'His eternal power and divineness' and the doom due to sin are made known to man apart from direct revelation, and moral apostasy is therefore without excuse. On the other hand, the will (2²⁹) and character of God have been specially revealed, and Divine promises have been given, to a particular nation entrusted with His 'oracles' (9^{1st} 3¹). Both Jew and Gentile, in their several ways, have the terrible knowledge, antecedent to Christ, of the *wrath of God* (1¹⁸). This conception is with St. Paul primarily *eschatological* (see Sanday-Headlam, *in loc.*, and on 5⁹), but the certainty of its unveiling in the 'day of wrath' (2⁵) is a *present* certainty. The wrath of God in our Epistle is the category which includes the sternly retributive attitude of God towards sin, His *δικαιοκρατία* (2⁵). It stands in the closest relation to the OT conception of the Divine HOLINESS (see *Expositor*, March 1899, p. 193). If the Divine wrath is an experience common to Jew and Gentile alike, the Divine RIGHTEOUSNESS (see the two artt. on this subject) is one specifically related to *revealed* religion. This is, of course, true on the view very commonly taken of the phrase *δικαιοσύνη θεοῦ* in 1¹⁷ and other passages of the Epistle, viz. that it denotes, not an attribute of God Himself, but a righteousness which *man* derives from God as its source. This view, which has influenced the RV of 1¹⁷, supplies an idea so obviously necessary to St. Paul's contrast between the false righteousness and the true (10³ etc.), and is in such close correspondence with his language in 2 Co 5²¹, Ph 3⁹ etc., that it must, in some way or other, be included in any satisfactory explanation of the phrase in 1¹⁷ and cognate passages. But there is a marked tendency in many quarters to go back to the sense suggested by the parallelism

of *δύναμις θεοῦ* and *δικ.* θεοῦ in 1¹⁶, 17 as the primary one, and to recognize the antithesis between the wrath of God as the 'revelation' antecedent to the gospel, and the 'righteousness of God' as the specific revelation of the gospel itself. The main objection to this is the presupposition that by God's 'righteousness' must be meant His stern retributive *justice*, i.e. His anger against sin. The result of an examination of the use of the conception of God's righteousness in the Old Testament is, however, adverse to this presupposition. The subject is *sub iudice*, and it is beyond the province of this article to attempt to decide it (see above, § iv.; Sanday-Headlam, p. 24 ff.; *Expos.*, March 1893, p. 187 ff.; Häring, *dik. θ. bei Paulus*, Tübingen, 1896; Beck in *Neue Jahrb. f. deutsche Theol.* 1895, p. 249 ff.; Kölbinger in *SK*, 1895, p. 7 ff. Häring, p. 14 ff., tabulates the principal alternative views). There is, at any rate in this Epistle, the closest correlation between the righteousness of God and the justification of the believer in Christ (3²⁶).

A similar correlation exists between the final salvation of man and the *Glory of God*. By this expression St. Paul sometimes means the honour due to God from His creatures (1 Co 10³¹, Ro 16²⁷); but there is a sense, specially characteristic of our Epistle, in which it denotes the supreme destiny of man, realized in the ultimate salvation of the redeemed (3²³ 9²³, cf. 8¹⁹, 21, 30). The idea of the word *δόξα* here seems to be the positive counterpart of the more negative *ἀποκάλυψις*. The latter suggests the removal of something which hides, the former the shining forth of the thing previously hidden in all its sublime reality. Relatively, this is seen in any signal display of Divine power, e.g. in the resurrection of Christ (6⁴). Absolutely, it is reserved for the consummation of all things, when the kingdom of God shall appear in its perfection, and the righteous shall shine forth in it as the sun. In this connexion the Divine PRE-DESTINATION must be taken into account. In 9²³, though the general context relates more especially to the Divine predestination of men to *function*, i.e. to the several parts they play in the providentially ordered course of history, there is in the immediate context unquestioned reference to those whom God has prepared for *glory* (see above), in contrast to those who are 'made ready' (it is not said 'by God Himself') for destruction. There is neither here nor elsewhere in the Epistle anything said of the 'double predestination.' But the predestination of the saints is clearly laid down in 8³⁰. Only, in the latter passage *foreknowledge precedes predestination*. On the whole, while frankly recognizing the predestinarian language used, we must also recognize its limitations. The apostle does not appear to be giving expression to a systematized scheme of thought on the subject.

The will of God for man's conduct enters into man's experience in the form of *Law*. In the generic sense, the term is applicable to any authoritative principle of action normally issuing in human obedience (8^{2a}, cf. 3^{27b}, 1 Co 9²¹). Such obedience may, however, be the response either to an enabling principle working from within (see passages just quoted, and 8^{14c}), or to a summons confronting man from without. In this, the characteristic sense of *νόμος* in our Epistle, law is a factor in the moral life fitted to acquaint the intellect with the Divine standard of conduct (7²³ and previous context), but incapable (*ἀδύνατον*, 8³) of bringing the life of man into harmony with its precepts. This result, due to the conditions of human nature (below, 2) is the more apparent the mor. fixed and definite the form in which law is promulgated. This appears to be the meaning of 'the letter' (*γράμμα*), in which the full moral effect of law is seen (7⁶, cf. 2 Co 3⁶, 1 Co 15³⁶, Ro 3¹⁹ 4¹⁵ 5²⁰ 7⁷, Gal

3¹⁹). This was above all true of the one law which had conveyed to man in inexorable fixity and definiteness the Divine standard of action, the Jewish law, *ὁ νόμος*. The denotative force of the definite art. depends upon its context. In most cases, 'the law' in question is the Jewish law; on the other hand, the anarthrous *νόμος* may well be used of the Jewish law, either as a law or as representing the principle of law, or as a quasi-proper name (probably 7¹, possibly 3³¹ etc.). See, further, art. LAW (IN NT). The Christian is ideally free from 'law' as an external principle (6¹⁴), but to be *ὑπὸ χάριν* is to be *ἐν νόμῳ Χριστοῦ* (1 Co 9²¹, cf. Ro 8², see below, 2; on the whole subject, cf. Gifford, p. 41 ff.).

In connexion with the doctrine of God, we must, lastly, note the bearing of the Epistle on the theology of the *Person and Work of Christ*. Neither are treated of *ex professo*. But in 1⁴, 5 and 9² we have the contrast between what Christ was, *κατὰ σάρκα*, and His higher nature as Son of God (1⁵) and as actually God (9²). The difficulty of the former passage is in the exact interpretation of *κατὰ πνεῦμα ἁγιασμένης* (see Gifford and Sanday-Headlam, *in loc.*). In the latter there is a still more difficult question of punctuation (see the Commentaries, also Ezra Abbot, *Critical Essays*, and Hort's critical note, *in loc.*). On the whole, the punctuation assumed just above appears distinctly the more probable. The principle, moreover, of *τέλος νόμου Χριστός* (10⁴), and Christ as an object of Faith (1¹ *δοῦλος Ἰσο. Χρ.*, contrast 1 Co 7²³), and 10¹³ which identifies Christ (by the context) with *πατ.*, make decisively in the same doctrinal direction. (On 8² see below, 2).

On the Atonement, 3²⁵, 26 is a classical passage, but it leaves open most of the difficult questions which attend the theology of that mysterious subject. The reader must consult the admirable excursus of Sanday-Headlam on the subject, Lightfoot's notes, and the discussion of the passage in R. W. Dale, *The Atonement*. The key to the meaning is to be found in the words *ἱλαστήριον . . . ἐν τῷ αἵματι αὐτοῦ*, rather than in the *ἐνδεδίξας τῆς δικαιοσύνης αὐτοῦ*, which, taken by itself, would hardly compel us to go beyond the thought of punishment as a vindication of God's moral government, which by no means exhausts the significance of the Atonement. The doctrine is emphasized, but not explained, in 5⁶⁻¹⁰.

2. St. Paul's doctrine of man is formulated in OT categories, but enlarged and deepened by his outlook upon life and history, and by his personal experience as a Jew and as a 'slave of Christ' (Ro 1¹). His comprehensive formula for human nature is 'flesh'—'all flesh' (cf. 1 Co 3⁴ *ἄνθρωποι = σάρκιναι*). From the time of Theodore of Mopsuestia to our own day the moral colour of St. Paul's conception of *σάρξ* has been matter of keen debate. The close relation between flesh and sin in his theology is obvious. But to make the connexion essential, is to mistake the entire meaning of the apostle. In Ro 8³ we have the crucial passage. What the law could not do—namely, liberate man from the law of sin—God did by sending His own Son, and in Him condemning sin 'in the flesh.' That is, sin was, by the mere fact (*πρέμψας*) of the coming of Christ, shown to be a usurper in human nature. This was effected by the Son of God coming 'in the likeness of sinful flesh'—*ἐν ὁμοιωματι σαρκὸς ἁμαρτίας*. 'Sinful flesh' is the universal condition in which our common humanity draws its first breath (5¹⁴). Christ did not enter into this condition, but into its 'likeness.' The unlikeness certainly did not consist in 'the flesh' (1³ 9²) which Christ took in reality, not in mere likeness. St. Paul could not have written *ἐν ὁμοιωματι σαρκός*. But neither did he write *ἐν σαρκὶ*

ἀμαρτίας, which he should have done had sin been to him part of the very meaning of 'flesh' (see Gifford's admirable discussion, *Intrud.* p. 52, and *in loc.*). His language expresses with consummate accuracy the thought that Christ 'by taking our flesh made it sinless' (Tertull.), and so broke the empire over human nature usurped by sin. Flesh, in fact, has with St. Paul a physical (σάρκινος) and a moral (σαρκενός) sense. In the former sense, as long as this life lasts we are ἐν σαρκί (Gal 2²⁰), in the 'mortal body' (Ro 6¹² 8¹¹). But ideally the Christian has left the flesh as the sphere of his moral life behind (Ro 7⁸ 8⁹). But in the pre-Christian, and even in the imperfectly Christian life, the σάρκινος is inevitably σαρκενός (Ro 7¹⁴, 1 Co 3¹⁶). This is carried back by him to a historic beginning in the one sin of one man (5¹², 16-18), which left human nature under the reign of death and sin. Unquestionably, actual disobedience is to St. Paul far graver than passive or congenital sin. Before sin becomes a fact of experience, the individual is, comparatively speaking, 'alive' (7⁹). But guilt in some sense is there already (5¹⁴), and rebellion is there, though latent and 'dead' (7²⁰), and it needs but the first shock of prohibition to 'revive' (v. 9). Under the most favourable conditions of enlightenment, with the law of God to guide it, and with complete mental assent to and enthusiasm for (7²⁴, cf. 2¹⁷) that law, human nature experiences helpless failure and disaster. But, where the higher guidance is absent or lost, man becomes more and more lost to self-respect and moral conviction (1¹⁸, 32). In a sense the heathen is, like the Jew, under law: apart from the ideal sense in which 'the Jewish law was a law for all men' (Hort, *Romans and Ephesians*, p. 25), his reason and conscience (2¹⁴), if normal and healthy, tell him what is right. The 'natural virtue' of Aristotle is fully recognized by St. Paul, and it is, in fact, this inward moral law that is restored in Christ. But, in fact, the law of conscience condemned the Gentile as completely as the written law condemned the Jew (3⁹), and not less so when its voice had ceased to be heard (1²³, 32).

3. *Sinful man does not*, according to St. Paul, *lack a higher nature*. The inward self (7²²) is capable of renewal (12²), though in sore need of it. For the higher self St. Paul has the term πνεῦμα (1 Co 5², 2 Co 7¹), though in this sense he employs it sparingly, and not in our Epistle. More characteristic of Romans is the term νόος, which plays so prominent a part in the analysis (7²²). Νόος is an inalienable endowment of human nature, i.e. it belongs to the flesh (cf. Col 2¹⁸), and may be involved in its bondage to sin (1²⁶, cf. Tit 1¹⁶); but it is the highest endowment of the flesh, and is capable of conveying to the will the commandment of God (7²³); but there its power ceases—St. Paul would have accepted, so far as it goes, Aristotle's dictum that 'understanding alone moves nothing.' The understanding, the higher self, can indeed 'wish' what is right (7^{15a}), but its wish has no power in the face of the flesh wielded by sin—'to wish and to effect' (Ph 2¹³) requires a vital energy (Ro 6⁴) which human nature cannot originate.

This vital energy is the Spirit (see καὶνότης in 6⁴ 7⁶, cf. 2 Co 5¹⁷) which inhabits the body of Christ, and dwells in those who are in vital union with Him. The word πνεῦμα in this Epistle is used, now for the Spirit of God, now for the inward man (see above) *as renewed and energized* by union with Christ (see *Expositor*, May 1899, p. 350 ff.; Sanday-Headlam, pp. 162 ff., 199 f.). It is this living union with the crucified, risen, and glorified Christ that distinguishes the new self from the old self (παλαιὸς ἄνθρωπος, 6⁶), the pre-Christian life ἐν σαρκί, ἐν παλαιότητι γράμματος, from the regenerate life ἐν πνεύματι, ἐν Χριστῷ, ἐν

καὶνότητι ζωῆς, the obedience of sons from the obedience of slaves—slaves in mind possibly to a law of God, but practically to a law of sin (7²⁵ 6^{16a}). To make quite clear the perfection of the obedience implied in the new state, St. Paul employs, in 6^{16a}, with an apology for doing so (v. 19), the term 'slavery' to describe it (cf. 1¹); but he proceeds to throw it aside (8¹⁵) in completing his theology of the Christian life. The son and the slave differ above all in this, that the son's interest is centred on his father's will, that of the slave is elsewhere. This is expressed in the famous antithesis of the two φρονήματα (8⁶, cf. Ph 2⁵ 3¹⁰, Col 3²), by which St. Paul sums up his fundamental distinction of human character. It must be noted here that the language of ch. 8 postulates the distinct Personality of the Spirit (v. 3a) not less clearly than that of 1 Co 2^{10a} implies His divinity. The Spirit dwells in the children of God in this life as an instalment (ἀπαρχή, 8²⁴, cf. ἀπαρχὴν elsewhere) of the life which is theirs already (v. 10), but to be unveiled in its glory only with the consummation of God's kingdom over all His creatures (8^{18a}).

4. St. Paul's conviction of the *profound degradation of human nature* is thus at once deepened and relieved by his belief in its *lofty capacities and destiny*. The latter, though to be fully realized only in the life to come, are to be entered upon in this life. We have now to notice St. Paul's doctrine of the transition from the helpless, hopeless old life to the 'life and peace' of the new. Obviously, man cannot by himself cross so vast a chasm. But the 'good-news of Christ' comes to him as 'the power of God to his salvation' (1¹⁶), if he believes it. Faith, then, presupposes that the Divine power to save has already been directed towards the believer; and it has as its immediate accompaniment the opening of a life in fellowship with God from which the sinner as such is excluded. In other words, by believing, the sinner is in God's sight as though his sin had not been,—he is 'justified by faith.' By justification, then, St. Paul primarily means the non-imputation—the forgiveness—of sin (he equates the two ideas, 4⁸, 9 etc.). Justification renders possible, for the first time, active righteousness (6¹⁸ 8^{13a}) in God's sight, but it is not possible to confuse the two in one idea without destruction of St. Paul's most characteristic thought. If once it is grasped that justification means to St. Paul the removal of the impassable barrier set up between God and the soul by sin, and not the progressive assimilation of character to the filial type which springs from reconciliation as its root, and that faith is to the apostle not merely assent to doctrine as divinely revealed, but personal trust in God through Christ, it becomes easy to see how central a place the doctrine of justification by faith holds in St. Paul's system, how unreal is its supposed conflict with the severest standard of Christian obligation, or the most thankful use of divinely provided means of grace, and how profoundly it appeals to the most legitimate and elementary need of human nature, the longing for a gracious God (see Jn 6²⁷). The doctrine, taken by itself, does not offer an account of all that grace does for a man, but of how a man is *admitted* to grace. The two things are clearly distinguishable in St. Paul, though, of course, in practice they can never be separated (compare carefully Ro 8¹ with context before and after). Faith, then, is to St. Paul the attitude of soul which never regards itself as righteous before God, but refers all to God's free gift. Its trust in God is absolute; but it has as its objective foundation certain definite facts (5², 6^{16a}) which become material for faith under the influence of the Spirit, who interprets to the soul the Death of Christ as the

outcome of God's love (5⁶). Hence it is 'through faith' (3²¹) that the Death of Christ reaches its effect in the justification of the sinner. It is this fact—even more than the inclusion of all alike under sin—that reduces all men to one level in God's sight (3²⁷). (On this subject see the articles on FAITH and JUSTIFICATION in the present work, and a most careful discussion in Sanday-Headlam, pp. 28-39; also *Expositor*, March 1899, p. 200 ff.; Ritschl, *Lehre d. Rechtfertigung*, vol. ii. ch. 4, § 36, and all important commentaries on Romans). Justifying faith, then, is not purely 'dogmatic,' because it is trust in a *Person*. Neither is it purely 'undogmatic,' because it rests upon, and includes the knowledge of, something *which that Person has done* (1 Co 15³, the germ of an 'Apostles' Creed'). Lastly, justification, to St. Paul, is doubtless one act, the entrance once for all into the state of grace (5¹⁴). But it remains as a root of character; its connexion with vital holiness is not that of mere succession in time, but as its organic beginning. Faith is the abiding sphere of all Christian life (Gal 2²⁰, 2 Co 13⁵), not a passing emotion, evoked by a single great crisis and subsiding with it.

5. *Grace and the moral life.*—The act of faith is not meritorious in its character, for this would be open, equally with righteousness by works, to the objection of 4^{4a}. It must come, that is, from God as its source; it not only *receives* God's free gift, but it *is* God's free gift. In other words, by excluding merit, we seem to deprive man of his responsibility. It may be questioned whether St. Paul had ever formulated in his own mind the problem of 'responsibility without merit,' which is the age-long *cruz* of the doctrine of grace. Both from the consideration of justifying faith, and again from that of Divine predestination to glory (above, 1), the moral responsibility of man seems threatened, if St. Paul's principles are logically developed. But he neither develops them in this way himself, nor does he seem conscious of the need for a reconciliation of the opposed truths. That all human history is in God's hands, and that the sin of man, *e.g.* the apostasy of Israel in rejecting Christ, is used by God as a step to the fulfilment of His will for man, is insisted upon. But the fact is wholly disallowed as an extenuation of the sinner's responsibility; St. Paul repudiates with intense indignation (3³⁰) the charge that his teaching encouraged any such view. 'Ch. 9 implies arguments which take away free will, ch. 10 is meaningless without the presupposition of free will' (Sanday-Headlam, p. 348). It is to be noted that St. Paul's entire case for the need of redemption (1-3³⁰) is an indictment of human sin, which loses all force if human responsibility is lost sight of. Although by 'works of law' no flesh shall be justified, yet God 'will render to each man according to his works' (2⁶, cf. 14¹²). The stress laid by St. Paul upon personal faith and individual renewal as the heart and mainspring of the moral life, gives to his theology of conduct a strongly individualistic character. But no one could be further from individualism in the sense in which that term is often used. The personal life of the Christian is one of *fellowship* with the saints through Christ. All the manifestations of the Christian life are conditioned by membership of a body (12^{3a}). And in critical questions of moral alternative (ch. 14) the sense of brotherhood is a safe guide. We are to ask not merely 'what does my liberty permit?' but 'how will my conduct help or hinder my brother?' We are to respect the liberty of others (14⁴⁻⁶), but to be ready to subordinate our own (for the whole chapter, cf. 1 Co 8-10, 13).

An interesting application of St. Paul's general

theory of conduct is the attitude inculcated by him towards the civil power (13¹⁻⁷). In a word, his spirit is that of good citizenship, idealizing the magistrate as 'the minister of God.' This position, natural to a born 'Roman' (Ac 22²⁸), is very much in advance of the general spirit of the apostle's compatriots, and decidedly in contrast with that of the Apocalypse. This is partly to be explained by the circumstances. When St. Paul wrote, Imperial Rome was not yet 'drunk with the blood of the saints'; on the contrary, the imperial officials had more than once protected him against Jewish fanaticism.

6. *The Church and its institutions.*—The Roman community does not seem as yet to possess a permanent organization of 'bishops' and deacons (see Sanday-Headlam, *Intro.* § 3 (3)). The list of ministries (12^{7a}) must be compared with others of the same kind (see the table in art. 1 CORINTHIANS, vol. i. p. 490). The *πρόεδρος* can hardly be a permanent officer; he comes too low on the list, and is apparently on a line with the *κυβερνήτης* of 1 Cor. There is evidence (16⁵) that the houses of different members of the community formed scattered centres for the worshippers of the household or neighbourhood (see Sanday-Headlam, *in loc.*). Of the *sacraments*, the Eucharist is not mentioned; but upon Baptism great stress is laid (6¹⁻³). To St. Paul's readers, to believe and to be baptized were, probably in all cases, coincident in time. Faith issued in baptism as its concrete expression and correlative. Baptism was the external means of union with Christ, the closing of the door upon the old and lower self, the opening of the new life of grace. It does not occur to St. Paul to put faith and baptism in any sort of rivalry. Faith in Christ would involve the desire to join His body by His appointed means. In all probability, the reference to faith and its confession in 10^{9a} is associated with the thought of baptism.

vii. *MATERIALS FOR PERSONAL HISTORY OF ST. PAUL.*—The Epistle is far less rich than those to the Corinthians and Galatians in details as to St. Paul's personal history. His long-standing desire to see Rome is mentioned in ch. 1 and in 15²³; the puzzling reference to his having preached *μέχρι τοῦ Ἀλκυραίου* in 15¹⁹ (see art. 2 CORINTHIANS, vol. i. p. 495), if the words do not compel us to suppose that he had actually entered Illyricum, would be satisfied by his visit to Berea, the last important place in Macedonia (Ac 17¹⁰). His further intention to visit Spain (15²⁴) is a fact of great interest, as also is his apprehension as to his coming visit to Jerusalem with the *λογία* (vv. 23-25). The names in ch. 16 contain those of many friends of the apostle otherwise unknown to us, including his kinsmen Andronicus and Junias, Jason and Sosipater. In Tertius we have the only certain name of an amanuensis employed by the apostle. His reference to miracles worked by himself (15¹⁹) should not be overlooked (cf. 2 Co 12¹³).

Of deeper interest, though open to more doubt, is the personal bearing of the passage 7⁷⁻²⁵. It is impossible to regard the passage as a mere *μετασχηματισμός*, describing the phenomena in the first person merely for the sake of vividness. The *ἐγώ* is too emphatic, too repeated, the feeling too deep, for a purely impersonal statement. On the other hand, the passage is universal in its reference, and supplies the argument with an indispensable piece of analysis. We may regard it as St. Paul's account, based upon reflexion as well as on experience, of the utmost that law can do for human nature. And if so, we may use it in order to understand how St. Paul may well have come to realize, even before his conversion, that if the preaching of the apostles (cf. 1 Co 15¹¹⁻³) was true, if Christ had died 'not in vain' (Gal 2²¹), then

righteousness *did not* come by the law. It enables us to realize something of the 'kicking against the goads,' which, as we know, had preceded the scene on the road to Damascus.

viii. TRANSMISSION OF THE TEXT. INTEGRITY.

—The text of our Epistle comes to us through much the same lines of transmission as that of 1 Cor. (which see). It is contained in the Peshitta, Old Lat., Copt., and other oldest versions of the NT, as well as in the principal Gr. MSS. Of the latter it is complete in \aleph ABLS (the last uncollated). C lacks 2^b-3^a, 9^b-10¹⁵, 11²¹-13¹⁰. D^{msl} lacks 1¹⁻⁷, 17²⁷⁻³⁰ are supplied by a somewhat later hand (also 1²⁴⁻²⁷ in the Lat.); E^{msl} (copy of D) has these passages, but lacks 8²¹⁻²³, 11¹⁵⁻²⁵. F^{msl}, a copy of G, is lacking in 1¹⁻³¹⁹. G^{msl} lacks 1¹ $\delta\phi\omega\rho\iota\mu\epsilon\pi\iota\sigma\tau\epsilon\omega\varsigma$ 1^b, also 2¹⁶⁻²⁸. K contains the Epistle only to 10¹⁷. P lacks 2¹⁵-3⁵, 8²⁵-9¹¹, 11²²-12¹. Σ contains only 13¹⁴⁻¹⁵. (On the cursives, and on the authorities for the Old Lat., what was said on 1 Cor. may be repeated, with a further reference to Sanday-Headlam, p. lxxv).

Of textual phenomena we must notice the omission in G g, supported by a note in the Bodleian cursive 47, of the words $\epsilon\nu$ $\rho\acute{\omega}\mu\eta$, 17¹⁵. The omission tempts a comparison with the omission, by important authorities, of the analogous words in the address of EPHESIANS. But in this case there can be no question that the words $\epsilon\nu$ $\rho\acute{\omega}\mu\eta$ are original. The omission may, however, be due, as may also be the case with Ephesians, to the early circulation of our Epistle among other Churches with the omission of the definite references to Rome. This might be connected with the omission, in some early authorities, of chs. 15. 16 (see below). But this connexion would be much more certain if the authorities for the omission of $\epsilon\nu$ $\rho\acute{\omega}\mu\eta$ and of chs. 15. 16 were identical. This is not the case.

A more difficult question is that of the place of the doxology (16²⁵⁻²⁷). L and many cursives, with some other ancient authorities, place it at the end of ch. 14; AP and a few authorities repeat it at the end of 16; FG g Marcion omit it wholly, but G leaves a blank space at the end of ch. 14. (On D see Sanday-Headlam, p. lxxxix). But \aleph BCDE, some cursives, and most Western authorities, place it after 16 *only*. This is probably the earliest position; its omission by Marcion may be the source of all the variations, although, if there were good grounds for thinking that St. Paul himself issued two recensions of the Epistle, the resemblance of the language of the doxology to that of the captivity group of Epp. (on which, however, see Hort in *Lightf. Bibl. Essays*, p. 327) might warrant us in ascribing the doxology to his second recension. But here, again, the hypothesis in question is inadequately founded. It should be noted that G g, which omit $\epsilon\nu$ $\rho\acute{\omega}\mu\eta$, should, on this supposition, *insert* the doxology, which they, on the contrary, omit.

A far more complex question is raised by the omission, in some indirect but ancient witnesses to the text, of chs. 15. 16. These witnesses consist of (1) Marcion, as quoted by Orig.^{lat} supported by the language of Tertull. *adv. Marc.* v. 14. (2) The absence of quotations in Tert., Iren., Cyprian. (3) The capitulation in certain MSS of the Vulgate. (4) The fact that ALP, etc. (see above), place the doxology at the end of 14. Of these, number (2) is inconclusive as a mere argument from silence. The others require explanation. A further argument from the repeated benediction 16²⁰⁻²⁴ (TR) is shown by Sanday-Headlam to rest on no solid foundation. How, then, are we to explain the facts? The supposition that chs. 15. 16 are spurious (Baur) cannot stand in face of the close connexion between chs. 14 and 15¹⁻¹³, a governing fact in the whole question. The chapters are omitted by no

known MS, nor does the theory of their *partial* spuriousness (Lucht), i.e. of interpolations, find any support in the textual material. The supposition that our chapters are a combination of the endings of recensions of the Epistle addressed to several different Churches, 1-14 (or 1-11) being the part common to all recensions (Renan), offends against the governing fact mentioned above, and depends, moreover, upon an erroneous view (see above) of 16²⁰⁻²⁴. A plausible, but in reality equally untenable, modification of this view is that 16¹⁻²¹, or 16²⁻²¹, or 2¹⁵⁻¹⁶, originally formed part of a letter addressed to Ephesus, and became afterwards incorporated in our Epistle (first suggested in 1767 by Kegermann, substantially adopted by Ewald, Mangold, Reuss, Lucht, Holsten, Lipsius, Weiss, Weizsäcker, Farrar, etc.). Aquila and Priscilla, it is true, were last heard of in Ephesus (1 Co 16¹⁹), and are there later (2 Ti 4¹⁹); Epānetus is the 'first-fruits of Asia' (RV); and St. Paul must have had many friends in Ephesus, while he had never seen Rome. But the hypothesis does not account for the facts; on the contrary, it leaves ch. 15 wholly untouched. Again, considering the constant going and coming between Rome and the provinces, it would be very surprising that St. Paul should not have many acquaintances in Rome. Moreover, there is good inscriptional and other evidence connecting many of the names with Rome, and indeed with Roman Christians. (See Sanday-Headlam, notes on ch. 16). This is specially true of the households of ARISTOBULUS and NARCISSUS, of AMPLIATUS and of NEREUS (see the articles on these names). On the whole, with all deference to the distinguished scholars who have represented it, our conclusion must be that the case for transferring this section, without any textual ground, from its actual connexion to a lost Epistle to Ephesus, is not made out.

To return, then, to the general question of chs. 15. 16, and to the heads of evidence (1), (3), and (4), the questions to be considered are, *firstly*, What were Marcion's grounds for omitting the chapters? and, *secondly*, Does the fact that he did so sufficiently explain (3) and (4)? If Marcion omitted the chapters on grounds of *tradition*, the second question need not be asked, for a tradition older than Marcion would doubtless leave other traces; but if his omission was purely arbitrary, the question of his probable influence becomes important. That Marcion's text had considerable circulation and some influence in the West may be allowed. But this is hardly adequate as a hypothesis by itself to account for the facts; it does not march without a stick. The extra support required is furnished by the *assumption* that the text was adapted for Church use in certain localities by omitting the personal and less edifying conclusion. The existence of a known text—Marcion's—which lacked chs. 15. 16, suggested the adoption of 14²⁸ as the close of the shortened Epistle, and accordingly the doxology, which it was desired to retain, was added at that point. The answer to our second question, then, may be put thus: *Given* a demand for an edition of our Epistle with the closing section, excepting the doxology, omitted, the influence of Marcion's text was likely to suggest the exact point where the omission should begin. In other words, the heads of evidence (3) and (4)—we may perhaps add (2)—may be explained by (1). The *first* question, then, becomes one of probability. Was Marcion *likely* to omit the chapters on doctrinal grounds, or was he, on the other hand, *unlikely* to excise any matter without documentary authority? On this question the reader is as entitled to decide as the present writer.

The connexion between the question of chs. 15. 16 and the omission of $\epsilon\nu$ $\rho\acute{\omega}\mu\eta$ in 17¹⁵ is very

obscure. Sanday-Headlam conjecture that Marcion is responsible for the latter omission also; but there is no evidence that he omitted these words. But given the demand (see above) for an 'impersonal' edition, the words may have been struck out in some copies of such an edition either with or without the support of Marcion's text. That Marcion was interested in the addresses of St. Paul's Epp. we know from the case of EPHESIANS (which see, and cf. Smith's *DB*² p. 947).

LITERATURE.—On the ancient commentaries, Origen, Chrysostom, Theodoret, John Damasc., (Eumenius, Theophylact, Euthemius, Ambrosiaster, Pelagius, Hugh of St. Victor, Abelard, and Aquinas, see the excellent characterizations in Sanday-Headlam. Augustine thought profoundly over the Epistle to the Romans; his anti-Pelagian writings are in effect a commentary upon its most characteristic ideas. He began a formal commentary, but only reached the salutation (*Retract.* i. 25). Of more interest is the *Expositio quarundam quest. in Ep. ad Rom.* (Migne, *Pat. Lat.* xxxv. 2087), which is the result of his study of the Epistle as a presbyter (about A.D. 396) with some friends. We have here the transition from his earlier views of grace and free will, etc., to his more developed and characteristic conviction, formed under the influence of his studies of St. Paul (see Reuter, *August. Studien*, p. 7 ff.). The Biblical Commentary of Cornelius a Lapide (S. J., †1637) gathers up usefully much exegetical material from ancient and medieval Latin writers, including Augustine. On the commentaries of Colet (ed. Lupton, 1878), Luther (Preface to Melancthon's comm. 1523), Calvin (1539, 'by far the best of the commentators of the Reformation'), Beza (1594), Estius (1614-6), Hammond (1653), Locke (1705-7), Bengel (1742), Wetstein (1751-2), see Sanday-Headlam, who also give a useful list of modern commentaries. Among the more important of these are those of Fritzsche (1836-43), Meyer (indispensable; the later German ed. by Weiss), de Wette (1836 and foll.), Olshausen, Philippi (1886 and 1896), Jowett (1869, 1894, suggestive and inexact), Vaughan (1880, scholarly and admirable in illustration, less satisfactory on connexion of thought), Bisping, Maier (Roman Catholic, as also) Klotz (Laibach, 1880, terse and sensible), Godet (1879, 1883, admirable in general exposition and in biblical theology; among the best general commentaries), Oltramare (Geneva, 1881-2), J. A. Beet (1885, able, and always worth consulting), Otto (Glauchau, 1886), Lipsius (in *Handkommentar*, 1881, able and useful), Barmby (1890, in *Pulpit Commentary*), Moule (in *Expositor's Bible*, excellent popular exegesis, and a distinct advance on that in his *Camb. Bible for Schools*), Liddon (1893, *Explanatory Analysis*). Lightfoot's posthumous *Notes on Epistles of St. Paul* contain a precious fragment on Ro 1-7. The two volumes of Gore (1893-9) are popular, but based upon thoroughly scientific criticism and exegesis. At the head of all English commentaries, and pre-eminent among those in any language, are those of Gifford (1886, reprinted from the *Speaker's Commentary*, unrivalled for accuracy, both in scholarship and theology) and Sanday-Headlam (1895). The last named is one of the most complete and satisfactory commentaries extant on any of the books of the Bible. The present article owes more to it than to any one work on this Epistle. After it, the writer would wish to acknowledge special indebtedness to Gifford, Godet, Meyer-Weiss, and Lipsius.

The standard works on Biblical Theology should be consulted on the leading ideas of the Epistle. With specific reference to St. Paul, Baur's *Paulus* (part 2, ch. iii., which incorporates the substance of his earlier essays on the subject) should still be read, also Usteri's *P. Lehrbegriff* (1854), and Pfeiderer's highly suggestive *Paulinism*. Essays and studies on the theology of the Epistle are numerous. Among the more recent may be mentioned Headlam in *Expos. Times*, 1894, 1895; Beet in *Expos.* 1898; and some studies by the present writer, begun in *Expos.* 1899, but not as yet completed. On chs. 9-11, Beyer-schlag, *die Paul. Theodices*; Morison (1849, on ch. 9. In 1886 he published an exposition of ch. 3). The integrity of the Epistle is discussed (in addition to works cited, above, § viii.) in the earlier part of Mangold's *Römerbrief, u. s. w.*, and by Lightfoot and Hort in articles reprinted in Lightfoot's *Biblical Essays*. Hort's *Lectures on Romans and Ephesians* also deal with this and other introductory matters. The Eng. tr. of Meyer's commentary, that of Godet's *Introd. to St. Paul's Epistles* (Edinb. 1894) and the end of the Introduction on his commentary, may be referred to for additions to the above brief list. Works referred to in the body of the above article are not in all cases enumerated here.

A. ROBERTSON.

ROME.—The aim of this article is (1) to give an outline of the relations between Rome and the Jews during the period covered by the Scripture history; (2) to describe the general aspects and life of the city at the time when it was first brought into contact with Christianity; (3) to touch upon its associations with the names or writings of St. Paul, St. Peter, and St. John; and (4) with some of the minor characters mentioned in the NT.

1. The first specific mention of Rome in Jewish literature occurs incidentally in 1 Mac 1¹⁰, where reference is made to 'a sinful root, Antiochus Epiphanes, son of Antiochus the king, who had been an hostage at Rome.' Political relations of a somewhat indefinite character were established by Judas Maccabæus in B.C. 161. By that date Rome had gained a position of unquestioned supremacy. The power of Carthage, which carried with it the control of the West, was broken at Zama in B.C. 202; the defeat of Antiochus at Magnesia in B.C. 190 made Rome arbiter in the East. A graphic picture of the reputation which Rome had created for itself in the East is found in 1 Mac 8¹⁻¹⁶. It ascribes to the Romans some virtues in regard to which closer experience might have modified the judgment of Judas, and contains some inaccuracies in details, but is vivid and accurate in its spirit. The valour of the Romans, the terror with which they inspired their foes, the support which they gave to their allies, their victories over Spain, over Philip and Antiochus, the constitution of the Senate, the absence of all the outward insignia of royalty, their freedom from envy and emulation, are all set forth in words of laudation. On the strength of this conviction as to Roman power and policy, Judas sent Eupolemus the son of John, and Jason the son of Eleazar, to Rome with the view of establishing friendship and a treaty of alliance (1 Mac 8¹⁷). The object of Judas was to get rid of the Syrian yoke, and in accordance with its traditional policy Rome readily recognized the Jewish autonomy in order to cripple Syria; but though they mutually pledged themselves to furnish a contingent if required, and not to assist any common enemy with 'victuals, weapons, money, or ships,' the treaty seems to have led to no definite action by either party. About eighteen years later, in B.C. 143, Jonathan, the brother and successor of Judas, sent representatives to Rome to renew and confirm the former alliance (1 Mac 12^{1-3, 4}). In B.C. 139, Simon, the brother of Jonathan, despatched an embassy, of which Numenius was the head, to Rome, with a great shield of gold, a thousand pounds in weight (1 Mac 14²⁴). The Romans graciously received the costly gift and entered into a formal treaty with Simon. They intimated the fact of that alliance to all the powers with which they themselves were friendly, and called on them to hand over to the Jews any 'pestilent fellows,' i.e. any political refugees who had found an asylum with them. Details of the embassy of Numenius are given by Jos. (*Ant.* xiv. viii. 5), though by a blunder he assigns it to a later date. (For the literature on this embassy see Schürer, *HJP* i. i. 268). To this date is probably to be referred the obscure statement in Valerius Maximus (i. 3. 3), the authenticity of which is now generally acknowledged, that 'Cornelius Hispanus compelled the Jews, who had been trying to corrupt the Roman morals by the worship of Jupiter Sabazius (Jⁿ Zebaoth?), to go back to their own homes.' If the reference be correct, it would appear that by some of the suite of Numenius attempts at propaganda had been successfully made (see Reinach, *Textes relatifs au Judaïsme*, p. 259, note 3). Though we can point to no definite statement, it is probable that after this date many Jews found their way to Rome in pursuit of business (Grätz, *History of the Jews*, ii. 67; Berliner, *Gesch. d. Jud. in Rom*, p. 5).

After his capture of Jerusalem in B.C. 63, Pompey carried many Jewish prisoners to Rome as slaves. (See LIBERTINES). The great majority of them would seem to have been voluntarily manumitted by their masters or ransomed by their fellow-countrymen, for we find but a few years later that a strong Jewish community was in

existence dwelling on the other side of the Tiber in the quarter corresponding to the Trastevere of to-day. From its proximity to the wharves it was a suitable place for the trades which were carried on by the Jews, and the Jewish community rapidly increased in numbers and influence. In his defence of Valerius Flaccus—who was accused of appropriating the gold which had been sent by the Jews in Asia Minor towards the maintenance of the temple worship at Jerus.—in the year B.C. 59, Cicero makes many allusions which show that the Jews in Rome were a party worth conciliating. He speaks of their numbers, their unity, their influence in public gatherings. He pretends that he must speak in a whisper so that only the judges may hear, on the ground that there was no lack of persons ready to stir up the Jews against him and all the best men in the State (*pro Flacco*, c. 28). The very exaggeration of the scorn which he pours on their claim to be specially favoured of heaven (*ib.* c. 69) is a testimony to their growing strength, as well as an index of the alarm which the success of their proselytizing efforts had created. Julius Cæsar, perhaps from the idea that the Jews were specially fitted to be intermediaries between the East and the West (Rosenthal in Berliner, p. 17), treated the Jews throughout the empire with great generosity; and we read without astonishment that conspicuous among the foreign races in Rome in their sorrow over the death of Cæsar were the Jews, who, for nights in succession, visited his tomb (Suet. *Divus Julius*, c. 84). By the time of Augustus the Jewish population in Rome must have numbered many thousands. According to Jos. (*Ant.* xviii. ii. 1; *BJ* ii. vi. 1) more than 8000 Jews supported the embassy that came to Augustus with complaints against Archelaus. For a time no repressive measures were adopted; on the contrary, the Jews in Rome received special privileges in the form of a limited jurisdiction over their own adherents. The rulers of Palestine were often brought into close relations by friendship and alliance with members of the imperial household. Herod Agrippa I., e.g., was brought up at Rome along with Drusus the son of Tiberius (Jos. *Ant.* xviii. vi. 1). From allusions in the Roman Satirists (Juv. iii. 10–15), as well as from the evidence of the cemeteries (see Schürer), it is plain that the limitation to the Trastevere was not rigidly enforced, and soon disappeared. From a story in Jos. (*Ant.* xviii. iii. 5) it may be gathered that the success of their proselytism, especially among women in the higher classes, was the main ground for the coercive measures that were subsequently adopted. In A.D. 19, perhaps at the instigation of Sejanus, who according to Philo (*Leg. ad Gaium*, c. 24) was bitterly hostile to the Jews, 4000 Jews were banished to Sardinia, under the pretext of being sent to put down brigandage there, but not without a hope that they might be cut off by the notoriously unhealthy climate (Tac. *Ann.* ii. 85; Suet. *Tib.* 66). In the account of the embassy to Caligula in A.D. 40, we have a curious light thrown on the character of the emperor as well as on the attitude of the court to Jewish customs and beliefs (Philo, *Leg. ad Gaium*, 44–46). In A.D. 49 (or 52 according to some authorities), probably on account of the tumults created by the preaching of the gospel in the Jewish quarter (Suet. *Claud.* 25), Claudius issued an edict for the banishment of all the Jews from Rome.* Among those banished were Aquila and Priscilla, who went to Corinth, where they

came into contact with St. Paul (Ac 18²). But the decree of banishment was futile, for the Jews had now obtained a social and political influence that made repression difficult or impossible. 'The customs of that most accursed race,' says Seneca,—perhaps with an indirect reference to the influence of Poppæa on Nero (Jos. *Vita*, 3, *Ant.* xx. viii. 11),—'have spread to such an extent that they are kept in every land; the conquered have given laws to the conqueror' (Aug. *de Civ. Dei*, vi. 11). And yet 'we may be sure that the proud patricians, who, in their walks on the Aventine cast a glance on the other side of the river, never suspected that the future was being made ready in that mass of hovels which lay at the foot of the Janiculum' (Renan, *Hibbert Lecture*, p. 53).^{*} The destruction of Jerusalem in A.D. 70 is commemorated in the well-known Arch of Titus on the Via Sacra. The seven-branched candlestick, the golden table, and the silver trumpets, delineated on the Arch, were themselves placed in the Temple of Peace in A.D. 75, but fell a prey to Genseric, and were landed safely at Carthage in 455. In 535 Belisarius recaptured them, took them to Constantinople, and since then they have completely disappeared. But it is fairly certain that they cannot be, as is popularly imagined, in the bed of the Tiber.

2. When Christianity was first proclaimed in the Jewish quarter, Rome with its environs had far outgrown the old walls of Servius Tullius, and contained a population probably of 1½ millions (Friedländer, i. 23; Champagny, *Les Césars*, iv. 347–353; Renan, p. 53. Merivale, *Hist. of the Romans*, v. 58, estimates it at 700,000). Lauded by poets and orators as 'the queen of cities,' 'the home of the gods,' 'golden Rome,' 'the epitome of the world,' Rome even at the beginning of the Christian era was impressive mainly by reason of its great extent, and not in virtue of any distinctive beauty or grandeur. The movement begun by Augustus to make Rome worthy of the majesty of the empire, led to great changes, and to the building of many palatial mansions, of ornate temples (e.g. the Pantheon and the Temple of Apollo), and large basilicas for the transacting of banking and law, notably the Basilica Julia in the Forum commenced by Julius and completed by Augustus. Great aqueducts are associated with the names of Agrippa and the emperor Claudius, bringing the water then as now chiefly from the hills of Alba Longa, and making possible the life that centred around the *thermæ*, corresponding very closely to the club life of our own day. To what an extent this afterwards developed may be seen from the imposing remains of the Baths of Caracalla and of Diocletian. The patrician's day was divided between the forum and the *thermæ*. The Forum was now embellished on all sides; the Triumphal Arch of Tiberius spanned the lower part of the ascent to the Capitol; the palace of the Cæsars on the Palatine, 'with gilded battlements, conspicuous far,' looked worthy of an imperial city (see Merivale, v. 18–48; Conybeare and Howson, *St. Paul*, ii. 449–454). But notwithstanding all the changes that had been effected, down even to the great fire in A.D. 64, in the reign of Nero, Rome was built on no regular plan; its streets were narrow and dirty, the houses, several storeys high, were flimsily built

* Two of the catacombs are exclusively Jewish. One was discovered by Bosio on Monte Verde, and contained many slabs with the seven-branched candlestick inscribed, and one on which the word *CΥΝΑΓΩΓΗ* was plainly legible. The other was discovered in 1859 in the Villa Randinini on the Appian Way, about 2 miles out of Rome (see *Cimitero degli antichi Ebrei*, illustrato da Raffaele Garrucci, Roma, 1862). In it the candlestick, the dove, the olive branch and the dove are the favourite emblems. Many of the inscriptions have been removed to the Lateran Museum. There is no authority for the statement, sometimes made, that the Colosseum was erected by forced Jewish labour.

* The identification of the Christians with the Jews was not the result of a mistake. They were Jews, and the Christians were regarded simply as a sect, certainly by outsiders, and in all probability they so regarded themselves. The time of cleavage was not yet.

and often tumbling down. 'The vici,' says Merivale, 'were no better than lanes or alleys, and there were only two viæ, or paved ways, fit for the transport of heavy carriages, the Sacra and the Nova, in the central parts of the city.' (For a vivid picture of the shops and streets, see Martial, vii. 61). It was desolated by frequent fires; it was subject to earthquakes and inundations; fever, as was plainly indicated by the many altars dedicated to it, was never absent; the unhealthiness of the site manifested itself in the unhealthy pallor of the inhabitants. Yet from the vastness of its extent, the density of its crowds representative of every nationality, religion, and race, from its being the natural treasure-house of all that was valuable and curious in the empire, from its being the centre of political and intellectual life, from the elaborate amusements provided gratuitously for the inhabitants, it fascinated and drew to itself patriots as well as adventurers of all types. 'The rich man went to Rome to enjoy himself, the poor to beg; the new citizen to give his vote, the citizen who had been dispossessed to reclaim his rights.' The rhetorician from Asia, the Greek philosopher, the Chaldean astrologer, the magician from Egypt, the begging priest of Isis, all jostled each other in the struggle for existence in the metropolis (Champagny, i. 41; Strabo, v. iii. 8). The picture of Milton (*PR* iv. 36-68) furnishes a vivid if idealized representation of Rome as it would appear to St. Paul and his fellow-travellers as they came along the Via Appia from Puteoli (Pozzuoli), and passing through the Market of Appius and the Three Taverns (both as yet unidentified) entered the city through the Porta Capena, the Dripping Gate (*Madida*) of Martial and Juvenal (long since closed, but whose position was determined by the discovery in 1584 of the first milestone of the Via Appia, and since then confirmed by the discovery of the walls of the gate). These may now be seen in the cellar of the *Osteria della Porta Capena*. All Rome is historic ground and of special interest to the student of NT times, for the places associated with the names of the apostles and their friends and converts are in many instances still to be seen, in some few cases unchanged since apostolic times. They will be treated of under the respective names.

3. When and by whom the gospel was first proclaimed in Rome is uncertain. As sojourners from Rome were in Jerus. on the day of Pentecost, some of them may have been among the 3000 converts (Ac 2¹⁰, 41). St. Paul refers to Romans who were in Christ before him (Ro 16⁷). Many of the Jews who had been banished by the edict of Claudius were brought under the influence of St. Paul, and on returning to Rome swelled the ranks of the missionaries and converts there (Ac 18², 3, 18, Ro 16³, 7, 9, 12). Prisca and Aquila should be specially noted in this connexion. In A.D. 59 (or 58), when the Ep. to the Romans was written, there was in existence a strong Church, partly composed of Jews, partly of Gentiles. St. Paul had for many years cherished a strong desire and resolution to see Rome (Ac 19²¹, 25¹¹, Ro 1¹³⁻¹⁴). From the time of the Second Missionary Journey it had been quite clear to him that his mission was to the Roman Empire *qua* Empire, and all his subsequent movements are governed by this dominant idea. Hence he goes to Ephesus, the door of the East toward the West, afterwards to Rome, and we find him purposing to visit Spain, the great province of the West. There is much plausibility in the view that his purpose in appealing to Cæsar was to gain recognition for Christianity as a *religio licita* (cf. Ramsay, *St. Paul the Traveller*, p. 308); and he apparently succeeded for the time being, for after his first trial the emperor left Jews and Christians in peace.

About A.D. 61 he was brought to Rome as a prisoner. Nero had already begun to disappoint the promise of the early years of his reign, and had given way to his ungovernable savagery. For two years before his trial, St. Paul lived either in the prætorian barracks attached to the palace, or in the prætorian camp (but see p. 33*) in the N.E. of the city,—in a place in any case where, in spite of his bonds, he was brought into contact with the freedmen and slaves who formed part of the household of Nero (Ph 1¹³, 4²³); or in the house of the centurion, still to be seen beneath the church of S. Maria in Via Lata, at the junction of the Via Lata and the Corso (the Via Flaminia) (see Lewin, *Life and Epistles of St. Paul*, ii. 238, 239, and Appendix (I.) for a sketch and plan of the house).

There is no evidence beyond the name for the Scuola di S. Paolo underneath the church of S. Paolo alla Regola (i.e. *arenula*, from the sand deposited by the Tiber) near the modern Ghetto, but the underground chamber is unquestionably old. Neither do we know with certainty the spot where the trial of St. Paul took place. The *Prætorium* of Ph 1¹³ is the whole body of persons connected with the sitting in judgment, the supreme Imperial Court, doubtless in this case the Prefect or both Prefects of the Prætorian Guard, representing the emperor in his capacity as the fountain of justice, together with the assessors and high officers of the court' (see *St. Paul the Trav.* p. 35, and cf. art. *PRÆTORIUM*). The Mamertin dungeon or *Tullianum*, under the church of S. Giuseppe de' Falegnami, remains as it was in apostolic days, though the stairs leading to the lower dungeon are modern. The only entrance originally was through the hole in the roof. Here St. Peter and St. Paul are said to have been immured during St. Paul's second imprisonment. The outbreak of Nero's fury, which resulted in a renewal of hostilities against the Christians, led to the numerous martyrdoms in the garden of Nero (now partly covered by St. Peter's), where, amid sufferings of fiendish ingenuity, so many disciples sealed their testimony with their blood (Tac. *Ann.* xv. 44; Suet. *Nero*, 35; Renan, *Hibbert Lecture*, 70-95; Lightfoot, *St. Clement*, ii. 26, 27). This was in A.D. 64-65. About this time, or a little later, St. Paul suffered martyrdom by execution. He was led out of the city past the Pyramid of Caius Cestius, along the Via Ostiensis, thence along the Via Laurentina, to a spot near some springs, then known as *Aquæ Salvæ*, now called *Tre Fontane*, and there, being a Roman citizen, was beheaded. This fact gives point to his words in Ph 2⁸ 'obedient even unto death, yea, the death of the cross,' i.e. to a more degrading form of death than the apostle himself would have been allowed to suffer. The site is fixed partly by an unbroken tradition and partly by local evidence. It is a wild, desolate spot, almost uninhabitable through the prevalent malaria (the Trappist monks have of recent years redeemed it by planting eucalyptus), so that there would be everything against the invention of such a site for so important an event. This factor has very frequently to be borne in mind in judging of the likelihood or the reverse of a traditional site. Over the spot a memorial oratory was erected in the 5th cent., whose foundations were discovered in 1807 beneath the present church of S. Paolo alle Tre Fontane, erected in the 17th cent., together with historical inscriptions in Latin and Armenian' (Lanciani, *Pagan and Christian Rome*, p. 156). Lanciani also quotes an interesting fact confirmatory of the tradition that the apostle was beheaded under a stone pine. The Trappists were excavating in 1895 for the foundation of a water-tank behind the chapel, and found a mass of coins of Nero, together with several pine cones fossilized by age and earth pressure.

There is a continuous tradition, found first in Tertullian (*Scorp.* 15; *de Præscript.* 36) and in Caius of Rome (quoted by Eus. *HE* ii. xxv. 6, 7), and repeated in varying forms by later writers, to the effect that St. Paul was buried on the Via Ostia. Says Caius: 'But I can show you the trophies of the apostles. For if you will go to the Vatican, or to the Ostian road, you will find the trophies of those who have laid the foundation of this church.' So that about the beginning of the 3rd cent. the prevalent belief in Rome was that St. Paul was buried on the Via Ostia. The translation of his body, together with that of St. Peter, to the catacomb of St. Sebastian, to the spot called *Platonia*, occurred later, in A.D. 258, probably owing to the Valerian persecution. This seems to dispose of the ingenious theory of Mr. A. S. Barnes (*St. Peter and his Tomb in Rome*), that the apostles were buried first of all in the catacomb, and only removed to the Vatican and the Ostian Way after the persecution of Valerian had ceased, and therefore enables us to accept the earlier and more likely theory of de Rossi. The tradition is that a certain Roman matron named Lucina, a disciple of the apostle, begged the body and buried it in her own garden on the Ostian road, at the spot now marked by the basilica of S. Paolo fuori le mura. De Rossi has conjecturally identified (and the identification is accepted by Lanciani and others) Lucina with Pomponia Græcina, the wife of Aulus Plautus, the conqueror of Britain, of whom Tacitus (*Annal.* xiii. 32) records that she was accused of 'foreign superstition,' was tried by her husband, and acquitted. Recent investigations have made it very probable that she was a Christian. An inscription was discovered in the cemetery of St. Callistus, *ROMITONIOC ΓΡΗΚΕΙΝOC*. The

subsequent and varied history of the famous basilica need not be detailed here. Suffice it to say that within the walls of that most glorious fane, into which the kings of the earth poured their treasure after the fire of 1825, rests all that is mortal of the great apostle. The remains were enclosed by Constantine in a bronze sarcophagus, and Lanciani (*op. cit.* p. 157) relates that in 1891 he examined the grave so far as he then could. 'I found myself on a flat surface paved with slabs of marble, on one of which (placed negligently in a slanting direction) are engraved the words, PAVLO APOSTOLO MART. . . . This inscription belongs to the 4th cent., and is, it will be observed, dedicatory and not declaratory. It is possible that ere long more will be known of this tomb and of the garden in which it stood. The Italian Government is constructing a sewer from Rome to Ostia, and the excavations will include the garden of Lucina. E. Stevenson (since dead) has recorded in an article full of interest, 'Osservazioni sulla topografia della via Ostiense e sul cimitero ove fu sepolto l'apostolo S. Paolo' (*Nuovo Bollettino di Archeologia Cristiana*, Anno iii. n. 3, c. 4, 1897), all that is known about the tomb up to the time of writing, and the *Bollettino* will contain an account of any discoveries that are made during the progress of the engineering works. On the possibility of the bodies of St. Peter and St. Paul having been carried off by the Saracens in A.D. 846, see Lanciani, *Destruction of Ancient Rome*, p. 129 ff.

During his imprisonment St. Paul wrote the Ep. to Philemon, and the Ep. to the Churches in Philippi, Colossæ, and Ephesus. From Rome also was written the second Ep. to Timothy shortly before his martyrdom, in A.D. 67 (?). (For a discussion of questions connected with St. Paul's imprisonment, see PAUL, and cf. Ramsay, *Church in the Roman Empire*, and *St. Paul the Trav.*; for the constitution of the early Church at Rome, see ROMANS; cf. Lightfoot, *Philippians*², 1-27, 97-102; Hort, *Christian Ecclesia*).

The relation of St. Peter to Rome has been a matter of keen controversy. The general questions of St. Peter's presence and martyrdom in Rome have been fully discussed in the article PETER, and there is now an almost unanimous agreement among scholars that the apostle suffered martyrdom in the eternal city, the only point of difference being as to the date, some adhering to the earlier date, simultaneously with or shortly after the death of St. Paul, some (notably W. M. Ramsay and Swete, see *Church in Roman Empire*, p. 279; *St. Mark*, p. xviii) inclining to a later date, in the persecution of Domitian, but not later than that. What has been already said about the burial-place of St. Paul applies to that of St. Peter. His tomb in the Vatican Cemetery was well known in the days of Caius of Rome, and therefore anterior to the translation of the body to the catacomb of S. Sebastiano. This has been recently questioned in an able book (cited above) by Mr. A. S. Barnes—a work full of interest, in its later parts dealing with the site of the tomb in old and new St. Peter's, but vitiated in the earlier chapters by an insufficient review of evidence and many inaccuracies (see review by Ramsay in *Bookman*, September 1900). The site of the martyrdom is sometimes stated to have been where the obelisk now stands in the centre of the piazza; but this is inaccurate. The obelisk was moved when new St. Peter's was built, and the true site is marked by a slab with an inscription (worn, neglected, and needing renewal) to be found in the pavement of the courtyard behind the sacristy on the north side of the present basilica. The sites of the supposed parting of St. Peter and St. Paul, and of the *Domine quo vadis?* story may or may not be genuine. The chapels in both instances are modern. The archaeological evidence supporting the residence of St. Peter in Rome is strong. It should be borne in mind, however, that his residence there, if proved, does not carry with it the episcopate, nor, if it did, does that involve the further claims of supremacy and infallibility. If Ramsay is right and St. Peter did not die till the last quarter of the 1st cent., there is then room (though not at the period traditionally assigned to them) for the alleged twenty-five years' residence and work in Rome. Two spots are locally connected

with this tradition—the house of Prisca and the house of Pudens, on which see below.

The question as to the significance of Babylon in 1 P 5¹³ and in the Apoc. has already been discussed in a separate article. (See BABYLON IN NT, and add to the literature there given, Butcher, *The Church in Egypt*). At what date the name of Babylon came to be so used cannot be definitely determined; but it was a familiar designation in the 1st cent. of the Christian era. In 2 Es. (3¹ 15⁴³), which is now usually assigned to the age of Domitian, it is so used. In the *Sibylline Oracles*, v. 158—written about A.D. 80, or earlier, in the judgment of Ewald and Hilgenfeld—we find the words—

καὶ φλέξει πύργον τε βαθὺν καὶ τὴν Βαβυλῶνα
'Ἰταλίας γαίαν θ'.

In the Jer. Talm. (*Aboda zara*, c. 1) there is a curious passage to the effect that, on the day when Jeroboam set up the golden calves, Remus and Romulus built two huts at Rome. The story is repeated with variations in the Midrash Rabba (on Ca 1⁶), and it is said that the huts repeatedly fell down, until water brought from the Euphrates was mixed with the clay, and the huts thus made stable received the name רִמּוֹס בְּבֵלֶן (Cf. Otho, *Lex. Rabb.*).

The general opinion even among interpreters of opposite schools is that Babylon in the Apocalypse (14⁸ 16¹⁹ 17⁵ 18² 10. 21) must be understood as Rome. The reference to it as the seat of universal empire (17¹⁸), as the centre of a bloody persecution (17⁶), above all to the seven mountains (17⁹), shows that, whether we are to give a mystical sense or not to that which is signified, Babylon stands for Rome. As the city of the seven hills, Rome is lauded by Virgil, Horace, Ovid, and Claudian; it is so represented on coins; it is so designated in the *Sibyll.* (ii. 18, etc.); in the month of December it celebrated the feast of the *Septimontium*, and, if a statement of Tertullian is to be trusted, *Septimontium* was one of its many divinities (*ad Nationes*, ii. 15).

The question of the visit of St. John the apostle to Rome is one that is so far wrapped in obscurity. The first mention of it is in Tertullian (*de Pras. Har.* 30), who says: 'Ubi Apostolus Joannes posteaquam, in oleum igneum demersus, nihil passus est, in insulam relegatur.' The only other early notice of this event is found in the *Fragmenta Polycarpiana* (see Lightfoot, *Ignatius*), which is, however, both of uncertain authorship and date. The catena of which it forms a part was compiled by some writer later than Victor of Capua, 430-554 (Lightfoot, *op. cit.* iii. 420 ff.). This fragment runs thus: 'Idem ad hæc verba Christi: Calicem meum bibetis, etc. [Mt 20²³]. Per huiusmodi potum significat passionem, et Jacobum quidem novissimum martyrio consummandum, fratrem vero eius Joannem transiturum abeque martyrio, quamvis et afflictiones plurimas et exilia tolerarit, sed præparatam martyrio mentem Christum martyrem iudicavit. Nam apostolus Paulus, Quotidie, inquit, morior: cum impossibile sit quotidie mori hominem ea morte qua semel vita hæc finitur. Sed quoniam pro evangelio ad mortem lugiter erat præparatus, eo mori quotidie sub ea significatione testatus est. Legitur et in dolio ferventis olei pro nomine Christi beatus Joannes fuisse demersus.' The traditional site on which this confession of St. John took place is outside the Porta Latina (now closed). Hence the celebration in the Calendar of S. John ante Port. Latinæ. The church of S. Giovanni a Porta Latina was founded by Pope Adrian I. in 772, and the adjoining circular chapel of S. Giovanni in Oleo was erected so recently as 1509. But although there are no documentary records earlier than those cited, and no evidence for the existence of a shrine on this spot earlier than the 8th cent., yet it is hardly a place likely to have been chosen unless there were some reasons (lost to us now) for the selection. It is out of the way, near nowhere, and very inaccessible even to-day. So that there is no *a priori* ground for setting aside the traditional spot. Not without interest in the same connexion is the dedication of the cathedral of Rome (*omnium Urbis et Orbis Ecclesiarum mater et caput*) from about the 6th cent., 'to Christ the Saviour, and in honour of St. John the Baptist and St. John the Evangelist.' The earlier dedication was 'to Christ the Saviour' alone. It is difficult to resist the belief that probably at the time of the Neronian persecution, and for some cause and length of time as yet unknown to us, St. John did visit the city of the seven hills, and thence, perhaps, derived his conception of Nero as the Beast from (as Renan suggests, *L'Antichrist*, p. 175) seeing the emperor

'disguised as a wild beast, and in that disguise let loose from a cage, and personating the furies of a tiger or a panther.' Cf. *Suet. Nero*, 29.

4. Connected with the Apostolic Church in Rome there were many whose names are mentioned in the NT, and with whom associations remain in the city of to-day. Chief among these are PRISCA and AQUILA (which see). Plumptre claimed for them (*Biblical Studies*, p. 415 ff.) the honour of being the real founders of the Church of Rome. But certain it is that their house (Ro 16³) was one, if not the only one or the earliest, of the meeting-places of the primitive Church; and here St. Peter is said to have stayed, for some time at least, during his residence in Rome. The church of S. Prisca on the Aventine Hill marks the spot. The dedication to Prisca is older than the saint of the same name (Virgin and Martyr, commemorated in the Calendar on January 18th), whose body was placed there by Eutychus towards the end of the 3rd century. The original designation of the church is the *Titulus Priscæ*, and even in the 12th cent. it is known as the '*titulus beatorum Aquilæ et Priscæ*.' De Rossi has published accounts of two very remarkable discoveries made in the 18th cent. The original oratory was discovered in 1776 in a garden near the church. It was decorated with frescoes in which the symbol of the fish and the figures of the apostles were clearly discernible. No attention was paid to the discovery, and the only record of it is in 'a scrap of paper in Codex 9697 of the Bibliothèque Nationale in Paris, in which a man named Carrara speaks of having found a subterranean chapel near S. Prisca, decorated with paintings of the 4th cent. A copy of the frescoes seems to have been made at the time, but no trace of it has been found' (Lanciani's *Pagan and Christian Rome*). A few years later the ruins of an old Roman house were discovered close to the church, but oratory and house have alike now disappeared. Lanciani gives an account of part of this latter excavation, which is important. 'A bronze tablet was found, which had been offered to Gaius Marcus Pudens Cornelianus by the people of Clunia as a token of gratitude. . . . The tablet, dated A.D. 222, proves that the house of Aquila and Prisca in apostolic times had subsequently passed into the hands of a Cornelius Pudens; in other words, that the relations formed between the two families during the sojourn of the apostles had been faithfully maintained by their descendants. Their intimate connexion is also proved by the fact that Pudens, Pudentiana, Praxedes, and Prisca were all buried in the cemetery of Priscilla on the Via Salaria.' So that, in all probability, beside that lonely church on the Aventine must we look for the cradle of the infant Church of Rome.

The recently excavated house of Pudens on the Viminal Hill is thus connected with that just described. Pudens, mentioned in 2 Ti 4², in company with Linus and Claudia (see PUDENS), has been the subject of many conjectures (see Lightfoot, *Clement*, i. 76 ff., ii. 464; Farrar, *St. Paul*, p. 681), upon which Roman archaeology has thrown no light. The church, now called S. Pudentiana (a later ignorant change from the earlier name 'the church of Pudens'—*Ecclesia Pudentiana*), has existed in some form on the present site from very early times. Pius I. in the middle of the 2nd cent. granted to Pudentiana, Praxedes, and Timotheus, daughters and son of Pudens, the institution of a regular *titulus*, or parish, with a font for baptism. Here, too, were preserved some pieces of household furniture used by St. Peter during his stay. Part of this, the old wooden table on which the apostle is said to have celebrated the Lord's Supper, was given by Cardinal Wiseman (who was titular of the church)

to St. John Lateran. If it had been a stone altar or an elaborate piece of work, doubt would easily gather round it. But there is nothing *per se* against the genuineness of the relic. The excavation of the house is still proceeding.

Together with the house of Prisca and the house of Pudens, both genuine memorials of the apostolic age and closely connected with St. Peter and St. Paul, should be mentioned the house of Clement beneath the lower church of S. Clemente near the Colosseum (see Lightfoot, *Clement*, i. 91 ff.). This has been for many years flooded with water; but one of the present writers was privileged, by the kind permission of the authorities, to inspect it so far as possible this year (1900), and it is to be hoped that ere long it may be drained and once more opened to the archaeologist and the pilgrim. For its interest is that of the apostolic times, whatever view we may take of the personality of St. Clement and of his connexion with the Clement mentioned by St. Paul.

There remain to be noticed only the catacombs and other funeral memorials of Rome bearing on NT times. The inscriptions, frescoes, and monuments have been mostly removed to the Lateran and Capitoline museums, and can be there studied with the help of such works as de Rossi, Northcote (though now somewhat out of date), Witherow, *The Catacombs of Rome*, and Malleson and Tuke's *Handbook to Christian and Ecclesiastical Rome*, 3 vols. (the catacombs are dealt with in the first volume). The exploration of the columbarium of the empress Livia has led to the possible identification of some of the names in Ro 16 (see Lightfoot, *Philippians*, Excursus). See also NEREUS.

Monumental evidence also confirms the traditional friendship between Seneca and St. Paul. See Lanciani, *Pagan and Christian Rome*; Ramsay, *St. Paul the Traveller*, p. 353 ff.

Much still has to be done before our knowledge of Rome in the 1st cent. is anything like complete, and almost every day brings its news. The enthusiastic band of Italian scholars, headed by Lanciani and Marucchi and Baccelli, is working hard, and great things are expected from the newly founded British School in Rome. The *Bullettino* and the *Nuovo Bullettino* contain full records of all recent discoveries. Among the researches needing to be made are those concerning the burial of other apostles in Rome, in addition to those already named, e.g. St. Timothy (in St. Paul's outside the walls), St. Bartholomew, etc., and a scientific sifting of the evidence concerning many of the Eastern relics (such as the Santa Scala) and remains. In the case of the latter class the history is fairly clear from the time of Helena onwards, but before that, which is the crucial period, it is all vague and unsatisfactory.

Professor James Orr, in his *Neglected Factors in the Study of the Early Progress of Christianity* (1899), has suggested two fields of inquiry—first, into the actual numbers of Christians in the city in the 1st cent. (on this the evidence of the catacombs has yet to be examined fully, but the numbers appear to have been very much larger than is commonly supposed); and, secondly, into the social status of those who were drawn into the infant Church. He has shown very clearly that the poor were by no means the only members, and the evidence of houses like those of Pudens, Prisca, and Clement, of churches like that discovered this year (1900) on the very Palatine Hill itself (of as yet unknown date, but very early), all goes to show that then as now the gospel was universal in its power as well as in its claim, and that St. Paul's great *Apologia* in Romans for the 'wisdom' of God was addressed to the wise and learned as well as to the freedmen and slaves.

LITERATURE. — See, besides the works already mentioned, Schürer, *Die Gemeindeverfassung der Juden in Rom*, 1879, HJP i. i. 231, ii. 232 *et passim*; Berliner, *Gesch. d. JOHN PATRICK AND F. RELTON.

ROOF (רָאשׁ), perhaps from a root meaning 'to cover,' קָרַח [once, Gn 19⁸, tr^d 'roof,' lit. 'beam'], קָרַח ['roof of the mouth']; στῆγη).—The most convenient form of roof for domestic purposes in a dwelling-house is undoubtedly a flat one; but the form of roof from the earliest times has probably been governed by a variety of factors, of which the most important are the materials procurable near the spot and the climatic conditions.

In northern climates, where wood is plentiful and the snowfall is heavy, a high-pitched roof of thatch or shingle can be readily made, and is a necessity. All around the shores of the Mediterranean Sea, where there is no snow and slight rainfall, and where timber can be procured, the most convenient form of roof can be economically constructed, and that is a flat one of some substance impervious to water. In more tropical climates, where the rains are exceedingly heavy and sudden, and the houses are for the most part of wood, the roofs again are usually high-pitched, and of thatch or leaves. In countries, such as Chaldaea, where there is little or no wood, the storehouses and places where dryness is necessary are built with thick walls and vaults with flat roofs or masonry domes, and for the same reason the houses of modern Jerusalem are built with thick walls and domes. The houses otherwise in Assyria-Chaldaea are flat-roofed.

In Egypt, where timber is scarce, but where stone is plentiful, the roofs are usually flat, the roofs of the peasants' houses being usually lightly constructed, and resting on palm beams, while the temples and palaces were roofed with stone.

Probably from the earliest times the same forms of roof have obtained in the same parts of the world, except that local circumstances have here and there interfered. For the buildings of Nineveh and Babylon, as well as for Jerusalem, the cedars of Lebanon were made use of. In Jerusalem, in early days, the roofs were flat, and the scarcity of timber, necessitating domed roofs, appears to have been first felt after the siege of the Holy City by Titus. In early days in Greece the roofs were flat, and it was customary to walk upon them. But pointed roofs were also used. In Rome the *solaria*, properly places for basking in the sun, were terraces on the tops of houses. In the time of Seneca the Romans formed artificial gardens on the tops of their houses, which contained even fruit trees and fish ponds (Smith's *Dict. of Gr. and Rom. Ant.*, s. 'Domus'). Herodotus (ii. 95) says that the Egyptians slept on the roof in the marshy part of Lower Egypt.

Even the houses of the poor seem generally to have had their courtyards, at the back of which a structure was raised consisting of a single storey surmounted by a flat roof, to which access was given by a single staircase leading from the courtyard.

The flat roof seems to have been universal in Egypt; it added to the accommodation of the

house; it afforded a pleasant rendezvous for the family in the evening, where they enjoyed the view and the fresh breezes which spring up at sunset. At certain seasons they must have slept there. On the other hand, the granaries, barns, and storehouses are almost always dome-shaped.

The flat roof of the house had a parapet round it, and sometimes a light outer roof supported by slender columns of brilliantly painted wood (Perrot and Chipiez, i. 36).

Fergusson (*History of Architecture*, 110) gives an illustration of a three-storeyed dwelling in the Egyptians' own quaint style, 'the upper storey apparently being like those of the Assyrians, an open gallery supported by dwarf columns. In the centre is a staircase leading to the upper storey, and on the left hand an awning supported on wooden pillars, which seems to have been an indispensable part of all the better class of houses.' In the Yezidi House we see an exact reproduction in every essential respect of the style of building in the days of Sennacherib. Here we have the wooden pillars with bracket capitals, supporting a mass of timber intended to be covered with a thickness of earth sufficient to prevent the rain or heat penetrating to the dwelling. There is no reason to doubt that the houses of the humble classes were in former times similar to that here represented' (ib. 160). In speaking of the palace of Esarhaddon, Fergusson says (ib. 164), 'Had these buildings been constructed like those of the Egyptians, their remains would probably have been applied to other purposes long ago; but having been overwhelmed so early and forgotten, they have been preserved to our day: nor is it difficult to see how this has occurred. The pillars that supported the roof being of wood, probably of cedar, and the beams on the under side of the roof being of the same material, nothing was easier than to set them on fire. The fall of the roofs, which were probably composed, as at the present day, of 5 or 6 ft. of earth, that being requisite to keep out heat as well as wet, would probably suffice to bury the building up to the height of the sculpture. The gradual crumbling of the thick walls, consequent on their unprotected exposure to the atmosphere, would add 3 or 4 ft. to this; so that it is hardly too much to suppose that green grass might have been growing on the buried palaces of Nineveh before two or three years had elapsed from the time of their destruction and desolation. Whenever this had taken place, the mounds afforded far too tempting positions not to be speedily occupied by the villages of the natives.' We may here remark that the modest dwellings of the Egyptian fellah are often covered by vaults of frisé, that is to say, of compressed or kneaded clay. None of the ancient monuments of Egypt possess such vaults, which are of much less durability than those of stone or brick. We are, however, disposed to believe that they were used in ancient times (Perrot and Chipiez, i. 110).

The palaces of Babylon appear to have consisted of courtyards and long narrow chambers; and as stone was not readily obtained, the question of how they were roofed has occasioned much discussion. Diodorus (ii. 10) states that the hanging gardens of Babylon were supported by stone beams, 16 ft. long and 4 ft. wide; but Strabo (xvii. 1. 5) says they were supported by vaulted arcades. Sir H. Layard believed that there were only flat roofs at Nineveh similar to that of modern houses in Mosul and the neighbouring villages, and states that he never came upon the slightest trace of a vault, while in almost every room that he excavated he found wood ashes and carbonized timber. He suggests that the long and narrow

rooms were roofed with beams of palm or poplar, resting on the sunmit of the walls (Layard, *Nineveh*, ii. 256).

That flat roofs must have been extensively used is evident from the number of limestone roof rollers found by M. Place (*Ninivé*, i. 293) in his excavations in the ruins of buildings where they had fallen with the roofs; but Place as well as Perrot and Chipiez (i. 163) are of opinion that though the roofs were flat they were in many cases supported by brick vaults, side by side with other flat roofs of timber. Arches still standing in the city gates, and fragments of vaults found within the chambers of Sargon's palace at Khorsabad, give colour to this opinion. A vaulted storehouse for grain with a flat roof is shown in Wilkinson's *Ancient Egyptians* (vol. ii. p. 135).

Strabo (xv. 3. 18), quoting from some old authority on Susiana, states, 'In order to prevent the houses from becoming too hot, their roofs are covered with 2 cubits of earth, the weight of which compels them to make those dwellings long and narrow; because although they had only short beams, they had to have large rooms, so as to avoid being suffocated.'

What strikes one in considering the subject of roofs is the similarity of design in the countries north and south of Palestine (Assyria, Chaldaea, Egypt), the difference being due only to the material available. Wilkinson (ii. 115) says that the roofs of rooms of houses in Egypt were supported by rafters of the date tree, arranged close together, or more generally at intervals, with transverse layers of palm branches or planks. Many roofs were vaulted, and built, like the rest of the house, of crude brick. On the top of the house was a terrace, which served as well for a place of repose as for exercise during the heat; it was covered by a roof supported on columns; here they slept, using a mosquito net (Herod. ii. 95). The floors of the rooms were flat on the upper side, whether the rooms beneath were vaulted or supported on rafters. Strabo (xvii. 1. 37), in speaking of the labyrinth at Lake Mæris, tells us that the roofs of the dwellings here consisted of a single stone each, and that the covered ways throughout the whole range were roofed in the same manner with single slabs of stone of extraordinary size, without the admixture of timber or of any other material. 'On ascending the roof, which is not a great height, for it consists only of a single storey, there may be seen a field thus composed of stones. Descending again and looking into the aule, these may be seen in a line supported by twenty-seven pillars, each consisting of a single stone.' Perrot and Chipiez (i. 109) give examples of a complete system of construction, belonging exclusively to Egypt, for stone buildings with stone roofs. The interior of the building is divided up by rows of vertical supports or monoliths, on which rest architraves or stone beams, and across from architrave to architrave are placed long flat stones forming the roof. This, however, seems to have applied only to temples, the palaces as well as the houses of the people having been of very light construction, of wood or crude brick.

At Luxor, Karnak, and the Ramesseum, the temples are provided with staircases by which these flat roofs may be reached. These roofs seem to have been freely opened to the people, just as with us one is allowed to ascend domes and belfries for the sake of the view over the surrounding building and country.

The flat roofs of houses in the East have been used from the earliest times for a variety of domestic and even public purposes.—*For devotion and prayer*. St. Peter went up upon the housetop to pray about the sixth hour (Ac 10⁹). They

were used also for idolatrous purposes. There were altars on the top of the roof-chamber (רֹאשׁ) of Ahaz in Jerusalem (2 K 23¹²). They burned incense to Baal on the roofs of houses in Jerusalem (Jer 19¹³ 32²⁹); and there they also worshipped the host of heaven (Zeph 1⁵).—*For recreation and for sleep at night*. It is customary at the present day for the people (especially the old) to take exercise morning and evening on the roof of the house; and during the summer-time members of the family usually sleep on the roof, carrying their bedding up at night and down again in the morning. 'At night all sleep on the tops of their houses, their beds being spread upon their terraces, without any other covering over their heads than the vault of heaven. The poor seldom have a screen to keep them from the gaze of passengers' (Morin, *Persia*, 229). 'We supped on the top of the house for coolness, according to their custom, and lodged there likewise, in a sort of closet about 8 ft. square, of wicker-work, plastered round towards the bottom, but without any doors' (Pocock's *Travels*, ii. 6). Saul appears to have slept on the roof of Samuel's house in the unnamed city. 'And it came to pass, about the spring of the day, that Samuel called to Saul on the housetop, saying, Up, that I may send thee away' (1 S 9³⁰); 'David walked upon the roof of the king's house at Jerusalem, and from the roof saw a woman washing herself' (2 S 11³); 'Absalom spread a tent upon the top of the house' (2 S 16²²); 'Nebuchadnezzar walked upon the royal palace at Babylon' (Dn 4²⁹); 'Samuel communed with Saul upon the top of the house' (1 S 9³⁰); 'the people made themselves booths, every one upon the roof of his house' (Neh 8¹⁶).

They used the housetops to make their public lamentations, and in the villages to proclaim any news that required to be promulgated. As the houses had few windows opening to the streets, the people rushed to the roofs to look down upon any processions, and to view what was going on far and near. 'At the present time local governors in country districts cause their commands thus to be published. These proclamations are generally made in the evening, after the people have returned from their labours in the field; the public crier ascends the highest roof at hand, and lifts up his voice in a long-drawn call upon all faithful subjects to give ear and obey. He then proceeds to announce, in a set form, the will of their master, and to demand obedience thereto.' 'On their housetops, and in their broad places, every one howleth' (Is 15²²). 'On all the housetops of Moab, and in the streets thereof, there is lamentation' (Jer 48³⁸). 'Proclaim upon the housetops' (Mt 10²⁷, Lk 12³). Eusebius (*HE* ii. 23) tells us that 'the Pharisees, who had a design upon the life of St. James, bishop of Jerusalem, persuaded him to preach to the people, when assembled at the Passover, from the battlements of the temple, alluding to this custom of proclaiming from the housetop whatever was to be made known far and wide.'

The roof of the house in the East is used as is the backyard of European houses; linen and flax are dried there, also figs, apricots, raisins, and corn. 'The ordinary houses have no other place where the inmates can either see the sun, "smell the air," dry their clothes, set out their flower-pots, or do numberless other things essential to their health and comfort' (*Land and Book*, i. 49). Rahab the harlot brought the spies up to the roof of the house and hid them with the stalks of flax, which she had laid in order about the roof (Jos 2⁹).

The staircase from the roof leads down into the inner court (Mt 10²⁷ 24¹⁷, Lk 12³). Battlements or

a parapet were enjoined by the law, a very necessary precaution, to prevent loss of life from falling over (Dt 22²).

The manner in which Samson brought down the roof of the temple of Dagon (Jg 16), upon which about 3000 persons were assembled, by pulling down the two principal pillars, has not yet been satisfactorily ascertained. Shaw describes having seen several hundreds of people assembled, on the dey's palace in Algiers, to view an exhibition of wrestlers, and describes how the pulling down of the front or centre pillars would have been attended by a catastrophe similar to that which happened to the Philistines (Shaw, *Travels*, p. 283). Cf. further, Moore, *Judges*, ad loc.

The flat roofs in Syria at the present day are made as follows: Stout beams are first laid across the walls about 2 ft. apart; crosswise is laid tough brushwood, or, if that cannot be obtained, split wood with matting, and over it a mass of thorny bush in bundles; upon this is laid a plaster of mud or clay mortar, which is well pressed in, and over this a layer of earth 6 to 12 in. thick. This is plastered over with mud and straw as a protection against the rain. Each roof requires a little stone roller to be always ready—the handles of wood being movable, and used for all the rollers of the different roofs; periodically, and whenever the rain falls, the roller must be used to fill in the cracks and keep the roof compact. Constant care is required to avoid leakage (Pr 27¹⁵). During the PEF excavations at Jerusalem one of these roof rollers was found in the ancient aqueduct to the west of the temple, where it must have lain for quite 1800 years, showing that flat roofs at that time were in use at Jerusalem, though at the present day they are mostly domed roofs of stone, on account of the scarcity of timber. The uncovering of a roof (Mk 2¹) of this nature would not be a difficult matter. See HOUSE in vol. ii. p. 432^a.

For other points connected with the subject of this art. see BRICK, GATE, HOUSE, PAVEMENT, WALLS.

LITERATURE.—Wilkinson, *Anc. Egypt*; Fergusson, *Architecture*; Layard, *Nineveh*; Place, *Ninive*; Perrot and Chipiez, *Egypt*, also *Chaldæa and Assyria*; PEFST; Thomson, *The Land and the Book*. See also Marshall in *Expos.* March 1891, p. 218 f.; Ramsay, *Was Christ born at Bethlehem?*; E. A. Abbott, *Chue* (1900), p. 118 ff.; and the Comm. on Mk 24, Lk 5¹⁹.

C. WARREN.

ROOM.—1. *Space to stay in*: Gn 24²³ 'Is there room in thy father's house for us to lodge in?'; so 24^{23, 31} (all *דָּוָק*, from *דָּק* to rise up, stand; RV adds Is 5⁸ for same Heb., AV 'place'); Ps 31⁸ 'Thou hast set my feet in a large room' (*בְּחֵרֶם*, from *חָרַג* to be spacious; RV 'place'); Lk 27 'There was no room for them in the inn,' and 14²² 'Yet there is room' (both *רוֹמָס*); cf. Mal 3¹⁰ 'there shall not be room enough to receive it' (no Heb.), Mk 2² 'So that there was no room to receive them' (*ὥστε μὴ κέρι χωρεῖν*, RV 'so that there was no longer room for them'); Lk 12¹⁷ 'I have no room where to bestow my fruits' (*οὐκ ἔχω ποῦ*, RV 'I have not where'). In this sense is the phrase 'make room,' Gn 26²², Pr 18¹⁶ (both *בָּרַח*); to which RVm adds 2 Co 7² 'make room for us' (Gr. *χωρησατε ἡμῶς*, AV 'Receive us,' RV 'Open your hearts to us'). Similarly Ps 80⁹ 'Thou preparedst room before it' (no Heb.). Cf. Dt 33²⁰ Tind. 'Blessed is the rowmmaker Gad' (AV 'Blessed be he that enlargeth Gad'); and Milton, *PL* vii. 486—

'First crept

The parsimonious emmet, provident

Of future, in small room large heart enclosed.'

2. *A definite position to be occupied*: To 2⁴, Wis 13¹³ (both *ὁκνημα*); 1 Co 14¹⁶ 'he that occupieth the room of the unlearned' (*ὁ ἀναπληρῶν τὸν ῥῶνον τοῦ ἰδιώτου*, Vulg. *qui supplet locum idiotæ*). Cf. Melvill, *Diary*, 6, 'I durst na wayes waver or

mint away, bot stand stedfast in that room and station wher He haid placed me'; Calderwood, *Hist.* 128, 'Displacing of the Minister of Glasgow out of his room, which without reproach he hath occupied these many years.' This is the meaning of 'room' when in AV *πρωτοκλισία* is tr^d 'uppermost room' (Mt 23⁶ Mk 12²⁹, RV both 'chief place'), or 'chief room' (Lk 14⁷, RV 'chief seat,' 20⁴⁶, RV 'chief place'), or 'highest room' (Lk 14⁸, RV 'chief seat'). The Gr. word means the place of highest honour at table. See FOOD, vol. ii. p. 43^a. Cf. Knox, *Hist.* 380, 'But, said hee (turning his face towards the Room where such men as had so affirmed sate), if I bee not able to prove the Masse to bee the most abominable Idolatry that ever was used from the beginning of the world, I offer my selfe to suffer the punishment appointed by God to a false Preacher'; Lever, *Sermons*, 107, 'Then who can desyre a better master then the Lorde God or a higher rounge then a steward-shyppe in the house of Christ'; and Ps 63⁹ in metre—

'Who seek my soul to spill shall sink
Down to earth's lowest room.'

So in the frequent phrase 'in the room of' or 'in his room,' the Heb. being *מָקָם* (2 S 19¹³, 1 K 2²⁵ bis 5¹, 8²⁰, 2 K 15²³, 23³¹, 2 Ch 26¹; RV adds 2 K 14²¹ for AV 'instead of'); and the Gr. *ἀντὶ* (Mt 2²³). So Ac 24²⁷ 'Porcius Festus came into Felix' room' (*ἔλαβε διὰδοχον ὁ Φηλιξ Πόρκιον Φηστόν*, RV 'Felix was succeeded by Porcius Festus'). Cf. Melvill, *Diary*, 129, 'The Generall Assemblée commandit the Presbyterie of Edinbruche to keipe his room frie, and place nan thairin'; Calderwood, *Hist.* 110, 'It pertaines to the Office of a Christian Magistrate . . . to see that the Kirk be not invaded, nor hurt by false Teachers and Hirelings, nor the roomes thereof occupied by dumb doggs or idle bellies.' The plu. 'in their rooms' is found in 1 K 20²⁴ (RV 'room') and 1 Ch 4⁴¹ (RV 'stead'), Heb. in both places *בְּמִקְוֵי*. Cf. Dt 2²³ Tind. 'The Caphthoryms which came out of Caphthor destroyed them and dwelt in their rowmes.' This is the meaning in the phrase 'give room,' which has been changed into 'give place' in AV wherever it occurs in earlier VSS; thus Gal 2⁹ Tind. 'To whom we gave no rounge, no not for the space of an houre,' so Gen. NT 1557, but 1560 'gave not place.' Cf. Tindale, *Works*, i. 227, 'Dearly beloved, avenge not yourselves, but give room unto the wrath of God'; and Pent. (Prologue) 'Isaac when his welles which he had digged were taken from him, geveth rowme and resisteth not.'

3. The 'upper room' of Mk 14¹⁵, Lk 22¹⁴ (Gr. *ἀνδ-γαῖον*, TR *ἀνώγειον*), and of Ac 1¹³ (Gr. *ὑπερῶνον*, RV 'upper chamber') is a room in the upper storey of the house, 'a roof-chamber' (see Moore on Jg 3⁹; Driver, *Daniel*, p. 74; Thomson, *Land and Book*, ii. 634, 636 [with illustration]; and cf. HOUSE in vol. ii. p. 433^a). RV adds 1 Ch 28¹¹ (Heb. *הֵיכָל*, AV 'upper chamber').

4. In Gn 6¹⁴ it is said that Noah's ark had 'rooms' made in it. The Heb. (*קִנִּים*) is lit. 'nests,' and is usually understood to mean small divisions or cells.

J. HASTINGS.

ROSE (*רֹז*, *hābhazzeleth*, Ca 2¹, Is 35¹ RVm in both 'autumn crocus.'—Some have derived this word from *רָז* *bāzāl*, the same as the Arab. *baṣāl* = 'onion,' and secondarily 'bulb.' This theory rests on the supposition that the initial *ר* is a mistake for *ה*. Apart, however, from the fact that there is no critical support for this theory, it gains no probability from the ancient versions. The Syriac, for example, *hamzallāitā*, gives the *ה* also instead of *ר*. The Targum on Ca 2¹ explains *hābhazzeleth* by *רֹזִים* = *narcissus* (Celsius, *Hierob.* i. 489). An Assyrian word of similar

form, *habaillatu*, signifies a 'marsh plant or reed.' Notwithstanding the authority of Gesenius, Michaelis, and Rosenmüller, we are inclined to accept *narcissus* as the correct translation. Two species of this genus grow in Palestine and Syria, *N. Tazetta*, L., flowering from November to March, and *N. serotinus*, L., flowering in autumn. The former has larger and more sweetly scented flowers than the latter. They are of the familiar pattern, with a white perigonium, and yellow, cup-shaped crown. The scape bears from three to ten flowers. The mention of the 'narcissus of Sharon' in parallelism with the 'lily (*shōshannāh*) of the valleys' increases the probability that they are allied plants. *Shōshannāh* is doubtless generic, and may include various species of *Iris*, *Colechicum*, *Crocus*, *Pancratium*, *Ixiolirion*, *Tulipa*, *Fritillaria*, *Hyacinthus*, *Asphodeline*, etc. (see LILY), any or all of which would go well in a parallelism with *narcissus*. For the tr^a 'rose' we have only the authority of Ben Melech (Cels. *Hierob.* i. 488). The LXX *ἀνθος* and *κρίνον* give it no support.

The rose is mentioned in several places in the Apocrypha. Sirach speaks of *φύτρεν ῥόδου ἐν Ἱερικῶν*, 'a rose plant in Jericho' (24⁴, cf. 39¹³). Seven species of rose exist in Pal. and Syria—*Rosa lutea*, L., the Yellow Rose, which grows only in N. Syria; *R. glutinosa*, S. et S., and *R. Thureti*, Barnat et Gremli, both Alpine species; *R. canina*, L., the Dog Rose, a mountain species; *R. dumetorum*, Thuill., a species growing from Lebanon and Antilebanon northward; *R. Arabica*, Crep., a Sinaitic species; and *R. Phœnicea*, Boiss. The latter is almost universal. The present writer has not met with any of these species at Jericho, but the last might easily grow there in hedges. There is nothing in the context to prevent the 'rose plant in Jericho' being a cultivated one. It has nothing to do with the traditional 'rose of Jericho.' This is a low, annual Crucifer, *Anastatica hierochuntina*, L. The so-called rose in this case is the entire plant, which, after maturing, dries up, and its branches curl inward, forming a brown hemisphere, 3 to 4 in. broad. On placing the root in water, it absorbs moisture, and the dry branches expand, and spread open. It has no resemblance to a rose, except in its round contour. Roses are everywhere cultivated in Pal. and Syria, and passionately admired by the people. The name *Wardeh*=Rose, is a favourite girl's name in Arabic (cf. NT RHODA). One of the industries for which Damascus is noted is the distilling of rose-water and an essential oil (attar of roses), as well as the making of syrup of roses. Large plantations of rosebushes are to be seen there and in other parts of the country. G. E. POST.

ROSH (רֹשׁ).—1. A son, or, according to the LXX ('Pws), a grandson, of Benjamin, Gn 46²¹. The reading of MT עֲשֵׂה רֹאשׁ אֶחָד 'Ehi and Rosh, Muppm, should, however, probably be corrected after Nu 26³⁸ אֶחָד מֵרֹאשֵׁי 'Ahiram and Shupham' (cf. also 1 Ch 8⁴⁴). 2. In the title of Gog רֹאשׁ אֶחָד 'one' in Ezk 38²² 39¹ (RV 'prince of Rosh, Meshech, and Tubal'; AV and RVm 'chief prince of Meshech and Tubal'; AVm 'prince of the chief of Meshech and Tubal'). It is most probable that *Rosh* is here the name of a people or country, like MESHECH and TUBAL (so LXX ['Pws] and Symm. and Theod.). Its position, however, cannot be identified. Gesenius actually thought of the Russians, but this is impossible. Even the land of *Rāsh*, on the western border of Elam, which is mentioned in the cuneiform inscriptions (see Delitzsch, *Paradies*, 322), appears (see A. B. Davidson, *Ezekiel*, ad loc.) to lie too far east for the requirements of the prophecy. For further conjectures see the Commentaries of Bertholet and

Knaetzschmar, ad loc. Duhm, followed by Cheyne, finds this same רֹאשׁ concealed under the נֶקֶד ('bow') of Is 66¹⁹. J. A. SELBIE.

RUBY.—Three Heb. words, יָדָם, יָדָר, and יָדָם, are tr. 'ruby' in EV (text or margin), but it is doubtful whether this is the stone meant.

1. יָדָם is tr. 'ruby' in AVm and RVm at Ex 28¹⁷ 39¹⁰, Ezk 28¹². The text, in each case, has *sardius*, after the Vulg. *sardius* and the LXX *σάρδιος*. יָדָם (from יָדָם or יָדָם 'to be red') would obviously be a suitable name for any red stone. There is nothing in it to help us in fixing on the special kind of gem. A similar ambiguity attaches to the cognate Assyr. word *udamatu*, when used as a plant-name; all that Fried. Delitzsch (Assyr. *Handwörterbuch*, sub voce) feels justified in saying of it is that it is 'a plant, probably so called on account of its colour.' Pliny, too, presents the same kind of difficulty as we meet here; his method of naming stones according to their colours often leaves us uncertain which of them he has in view. Modern authorities are divided between the claims of the carnelian [Petrie makes it the red jasper; see art. STONES (PRECIOUS)] and the ruby to represent the Heb. יָדָם, the majority favouring the former. Two considerations are in favour of this view: by far the largest number of gems which have come down to us from antiquity are carnelians; and the יָדָם of Exodus was an engraved stone, whereas the ruby, on account of its hardness, was seldom engraved in ancient times.

2. יָדָר is tr. 'ruby' by RV at Is 54¹², Ezk 27¹⁶; AV has 'agate,' m. 'Heb. chrysoprase'; LXX has *λασπίς* (Is.) and *χορηδρ* (Ezek.) (from the common confusion of ר and ר; Vulg. *ia-pis* and *chodchod*). It is impossible to determine what the יָדָר was. The root from which the noun is derived probably means 'to sparkle.' But this would suit a carbuncle almost, if not quite, as well as a ruby.

3. At Job 28¹⁸, Pr 3¹⁵ [*Kethibh*, by a transcriber's mistake, יָדָם, 8¹¹ 20¹⁵ 31¹⁰, La 4⁷, AV and RV tr. 'rubies'; RVm has 'red coral or pearls,' except at La 4⁷, which has 'corals.' The LXX is very vague and fluctuating, using *λίθοι*, *λίθοι πολυτελείς*, *τὰ ἐσώτερα* (Job 28¹⁸); and the Vulg. is still more unhelpful, 'cunctis pretiosissimis,' 'cunctis opibus,' 'multitudo gemmarum,' 'de ultimis finibus,' 'de occultis,' and at La 4⁷ 'ebore antiquo.' (Toy, *Prov.* p. 72, appears to think that this last is due to a mistaken reading, יָדָם; but it is to be noted that at Ezk 27¹⁶ the Vulg. renders יָדָם by *dentes hebeninos*). Although יָדָם never occurs in a list of gems, the Heb. writers must have had a distinct class of stones in view. This is clear from La 4⁷: the colour of the human body could not be compared to that of precious stones in general. The same passage seems also to preclude the 'pearls' of our RVm. For if Carey (quoted by Delitzsch, *Job*, p. 370) had seen 'pearls of a slightly reddish tinge,' these are, at all events, not so common as to justify a comparison which would imply that pearls are usually red. The choice would appear to lie between 'ruby' and 'red coral.' And the decision depends on two considerations—the value and the colour of these two classes of objects. The passages in Job and Proverbs show that יָדָם were costly. 'The price of wisdom is above יָדָם.' Either rubies or coral would answer to this requirement. Rubies have always commanded a high price. Theophrastus speaks of quite a small *ἀσθαξ* as being worth forty gold staters. Benvenuto Cellini, in the 16th cent., states that a ruby of one carat was worth eight times as much as a diamond of the same weight. A fine ruby will still fetch more than a diamond of the same size. But red coral (*corallium rubrum*) has also always been held in high esteem. In ancient times it was

eagerly purchased in India. It finds a place in the *Lapidarium* of Marbodius. Good specimens continue to command a high price in China. The coral fisheries are a carefully regulated and highly important source of wealth on the Mediterranean coasts. On the second point—that of colour—the present writer is of opinion that the balance inclines in favour of the coral. Rubies are of too deep and fiery a hue to be compared at La 4⁷ to the red of even an Oriental's body, notwithstanding the fact that there are exceptional gems, such as the one King describes (*Antique Gems*, p. 250), 'of the most delicious cerise colour.' But coral is found of every shade—deep red, rose pink, flesh colour, and even milky white. There is no difficulty about the supposition that the Jews were familiar with it, for it was to be obtained from the coast of India and the Red Sea, as well as from the Mediterranean.

RUDDER.—See SHIPS AND BOATS.

RUDIMENT.—See ELEMENT.

RUE (ῥήγανος, *ruta*).—*Ruta graveolens*, L., the officinal rue, is a heavy-smelling, shrubby plant, of the order *Rutaceae*, 2 to 4 ft. high, with glandular-dotted, bi-pinnately parted leaves, and corymbose, yellow flowers. It is cultivated for its medicinal properties, which are antispasmodic and emmenagogue. It has been inferred from Lk 11¹² that it was one of the plants subject to tithe (but see Plummer, *ad loc.*). The indigenous rue of Pal. is *Ruta Chalcypensis*, L., the Aleppo rue, which differs but slightly from the officinal species.

G. E. POST.

RUFUS (Ῥούφος).—In Mk 15²¹ we are told that Simon of Cyrene, who bore our Lord's cross, was the father of Alexander and Rufus. In Ro 16¹³ St. Paul sends his salutation to Rufus, 'the chosen in the Lord, and his mother and mine.' The name, meaning 'red,' 'reddish,' was among the commonest of slave names. The mention of Simon as the father of Alexander and Rufus seems to imply that the two latter were known in the circles to which the Gospel was addressed. There is some evidence for thinking that St. Mark's Gospel was written in Rome; if this be so, then the same person may be referred to in both passages; but as the name was so common, this can be only a conjecture. 'Chosen in the Lord' implies some particular eminence as a Christian, and not merely one of the elect, which would not be any special distinction. By 'his mother and mine,' St. Paul means that the mother of Rufus had on some occasion shown to him the care of a mother, and that therefore he felt for her the affection of a son.

The name of Rufus was made use of largely in legendary history. He is introduced into the *Acts of Andrew* and of *Peter*. According to one account he was bishop of Thebes; according to another, bishop of Capua; according to another, bishop of Avignon. The last legend states that he travelled to Spain, founded the church at Tortosa, went over the Alps to Narbonne, and preached in Avignon. He appears to have been commemorated on the 12th, 14th, and 21st November.

A. C. HEADLAM.

RUG.—Jg 4¹⁸ RV and AVm. See MANTLE, No. 4.

RUHAMAH.—The second child (a daughter) of Gomer, Hosea's unfaithful wife, was called LO-RUHAMAH, 'unpitied,' Hos 1^{8, 9}, as a type of Israel, when, unpitied by Jahweh, she was to be given over to calamity. The opposite condition of things is expressed in Hos 2² [Eng. 2¹] 'Say ye unto your brethren, Ammi (i.e. 'my people,' in opposition to the name of the third child, LO-AMMI, 'not my people'), and to your sisters, Ruhamah' (Ῥῥῥῥῥ 'pitied,' LXX Ἐλεημένη). Similarly, when Jah-

weh's anger is turned away, He declares in v. 23 (22) 'and I will have mercy upon her that had not obtained mercy' (ἡ ἐλεημένη ἐθ-λό ῥῥῥῥῥῥῥῥ, LXX B καὶ ἀγαπήσω τὴν οὐκ ἡγαπημένην [AQ have ἐλεήσω for ἀγαπήσω, and ἡλεημένην for ἡγαπημένην, cf. Hort on 1 P 2¹⁰]).

J. A. SELBIE.

RULERS OF THE CITY is, at Ac 17^{6, 8}, the EV rendering of the Gr. πολιτάρχαι (on the various spelling πολιτ. see Tisch. NT⁷, Prol. p. 86, n. 2), as the special local title belonging to the magistrates in Thessalonica, before whose bar the Jews of that city, along with a mob of market-idlers, dragged Jason and other Christian converts, under a charge of hospitably receiving Paul and Silas, and of entertaining treasonable designs against the emperor. The word denotes 'rulers of the citizens,' who, as Thessalonica was a free city, had then the privilege of choosing their own rulers. The use of the term πολιτάρχης has been pointed out as an excellent illustration of the accuracy of St. Luke (e.g. by Alford and Knowling, *ad loc.*); for, while it is not employed in that form by classical authors, who use πολιάρχος and πολιτάρχος, the actual existence of the Lukan form at Thessalonica is vouched for by inscriptions discovered there, one of which (assigned to the time of Vespasian) mentions among the politarchs for the time being Sosipater, Secundus, and Gaius—names occurring also as those of companions of St. Paul (Boeckh, *CIG* 1967, quoted by Conybeare and Howson, and by Alford).

Much fresh light is thrown on this subject in a paper by Prof. Burton of Chicago, in the *American Journal of Theology* for July 1898, entitled 'The Politarchs,' in which he has carefully collected, and commented on, the inscriptions which attest the use of the noun πολιτάρχης or of the verb πολιτάρχειν. The following is a summary of his results:—There are seventeen inscriptions which attest the existence of the office of politarch in ancient cities, to which other two may be added, if we accept recent probable restorations. Eleven contain the verb, always in the present participle, and mostly in the genitive plural; seven contain the noun, giving in all eleven instances of it. There is itacistic variation between ε and ι in the second syllable of both noun and verb. While isolated examples occur from Thrace, Bithynia, the Bosphoran kingdom, and Egypt, no fewer than thirteen belong to Macedonia, and five of these without much doubt to Thessalonica itself. None have apparently been discovered from Greece proper, and there is no reason to believe that the office existed south of Macedonia. Its presence in the latter province so largely was probably due to Roman influence in its municipal organization. The five Thessalonian inscriptions extend from the beginning of the 1st to the middle of the 2nd cent. A.D. As regards number, Thessalonica had five politarchs in the reign of Augustus and six under Antoninus Pius and Marcus Aurelius. Burton gives a full bibliography, mentioning as the most recent book that of Dimitzas: 'Ἡ Μακεδονία ἐν λίθοις φεγγομένη καὶ μνημείοις σωζομένης,' 2 vols., Athens, 1896. WILLIAM P. DICKSON.

RULER(S) OF THE SYNAGOGUE.—See SYNA-GOGUE.

RUMAH (רמח; B קרומא, A ר'ומא).—The home of Pedaiah, the maternal grandfather of king Jehoiakim, 2 K 23³⁸. Josephus, in the parallel passage, *Ant.* x. v. 2, has Ἀβουμά, no doubt a copyist's error for Ἀρουμεά, which may be the ARUMAH of Jg 9⁴, which lay in the neighbourhood of Shechem. Another Rumah (in Galilee) is named in Jos. BJ III. vii. 21, which may have been the birthplace of Pedaiah (see Neubauer, *Géog. du Talm.* 203; Guérin, *Galilee*, i. 367 f.;

Buhl, *GAP* 220 f.), if we may suppose that *conubium* still subsisted between the Northern and Southern kingdoms.

The reading רומה in Jos 15⁵², although supported by the LXX (B 'Ρωμα, A 'Ρουμα), is probably a copyist's error. See DUMAH, No. 2. According to Jerome, there was a various reading, *Rumah* (i.e. Rome) for *Dumah* in Is 21¹¹, which is said also to have been found in a manuscript belonging to R. Meir.

RUNNERS.—See FOOTMAN, and GUARD, No. 2.

RUSH.—See REED.

RUTH (רוּת, LXX 'Ρουθ).—The heroine of the Bk. of Ruth. She was a Moabitess, the wife of Mahlon (Ru 4¹⁰) the son of Elimelech and Naomi who were residing in the land of Moab because of a famine in Judah (Ru 1^{1a}). By the time that the famine ceased, Elimelech and his two sons were dead. Naomi decided to return to her own land, and after she and her daughters-in-law had started she recommended them to stay in their native land and marry again. Ruth refused, and declared her intention that nothing short of death should part her from Naomi. They went on their way, and arrived at Bethlehem, much to the surprise of the inhabitants. It was the beginning of barley harvest. Elimelech's kinsman, Boaz, was one of the leading inhabitants of Bethlehem, and Ruth went to glean, and by chance entered a part of his field. Here Boaz noticed her and bade her remain in the same field, and praised her for the care she had taken of her mother-in-law. He invited her to share the meal of the reapers, and instructed his men to show her proper respect (ch. 2). Instigated by her mother, she introduced herself into his presence at night and claimed his protection. He was quite willing to give it to her, but there was a nearer kinsman who had prior rights to his, and he had to be reckoned with first. Boaz therefore sent Ruth home with a present for her mother, whilst he himself took the necessary steps to call upon the nearer kinsman to exercise or refuse to exercise his rights (ch. 3). He summoned him to his side at the gate of the city, with ten elders of the city as witnesses. He then called upon the nearest kinsman to buy or redeem Elimelech's portion of land. He refused to do this, because it involved his taking to wife Ruth the Moabitess, and passed on his rights to Boaz by drawing off his shoe and giving it to Boaz; for 'this was the manner of attestation in Israel.' The people in the gate were called upon as well as the elders to bear witness to the transaction, and invoked the blessing of God upon Boaz and Ruth (4¹⁻¹²). In this way they were married, and their firstborn son was called Obed, from whom were descended David and Christ (Ru 4^{13a}, cf. Mt 1³).

The name Ruth is of uncertain origin. It is to be noticed that her alleged descendant David entered into friendly relations with Moab (cf. 1 S 22^{3, 4}). The transaction recorded in this book is on the same lines as that legalized in Dt 25³⁻¹⁰, though not coming under that law (see Driver, *Deut.* 285). The actual selling of the land by Naomi comes nearer to the law of Lv 25³². Attempts have been made to assign the history to the days of Eglon (Jg 3¹²⁻³⁰), or the time of scarcity preceding Gideon's call (Jg 6^{3, 4}). See, further, next article.

H. A. REDPATH.

RUTH, BOOK OF.—This book, in which the history of Ruth (see preceding article) is narrated, is full of interest. It is an anonymous work, idyllic in its character, describing pastoral life among the Hebrews in a time of peace and order,

when old customs were kept up and carefully observed.

i. **THE DATE OF THE BOOK.**—This *must* be considerably later than the history, though how much later is a matter of controversy. The book looks back to 'the days when the judges ruled' (1¹), to a custom existing 'in former time in Israel' (4⁷), and carries the descent from Boaz down to David (4²²), unless, as some have with little probability thought, the last verses do not really belong to the book. But it claims no particular date for itself, though the style would lead us to assign it to a comparatively early one. The linguistic difficulties in the way of its being early have been discussed by Driver (*LOT* pp. 426, 427 [^{454, 455}]). The main argument for a post-exilic date, besides the linguistic one, is the way in which the customs of ch. 4 are treated as quite obsolete.

ii. **THE OBJECT OF THE BOOK.**—This may be described as twofold. (1) To introduce us to the family from which David was descended; and (2) to illustrate the marriage laws of the Israelites. The marriage of Ruth the Moabitess with Mahlon seems at first to run counter to the law as laid down in Dt 23^{3, 4}, and certainly in post-exilic times such a union was held to be unlawful (see Ezr 9^{1, 2}, Neh 10³²), but the law quoted says nothing about marriage, and differs in its terms from that of Dt 7³. Some of those who look upon this book as post-exilic have been tempted to regard it almost as a political pamphlet, and a protest against the action taken both by Ezra and Nehemiah.

iii. **PLACE IN THE CANON.**—In the Jewish Canon the Talmud (Bab. *Baba bathra* 14) places it first amongst the Hagiographa or third class of sacred writings immediately before the Psalms. In Hebrew Bibles it is one of the five Megillôth or rolls which were read in the Synagogue on five special days in the Jewish ecclesiastical year—Ruth being read at the Feast of Weeks. As this was the second of the five days, the Book of Ruth generally appears second in order; but in Spanish MSS and in one Bible of A.D. 1009 Ruth comes first (Buhl, *Canon of the OT*, i. § 10). The arrangement adopted in modern versions by which Ruth follows Judges goes back to the Vulgate and LXX, and also to Josephus.* Its position in them is due to its having been linked on to the Book of Judges by its first verse, and having been treated as an appendix to that book.

LITERATURE.—Commentaries of Metzger (1857), Keil and Delitzsch, Wright (1864), Bertheau (combined with *Judges*, 1883), Hummelauer (1888), Oettli (*Die gesch. Hagiog.*, Nördlingen, 1889), Wildeboer (*Kurzer Hdcom.*, 1898), Nowack (*Hdcom.*, 1900); cf. also Driver, *LOT* 426 ff. [^{454 ff.}]; Cornill, *Einleit.* 242 ff.; Wildeboer, *Lit. d. AT*, 341 ff.; Wellhausen-Bleek; Robertson in *Book by Book*, 75; W. R. Smith, art. 'Ruth' in *Encycl. Brit.* 9; see also the relevant sections in the works of Ryle, Wildeboer, and Buhl on the *Canon of OT*.

H. A. REDPATH.

RYE (רֹמֶשׁ *kussemeth*; רֵעָא, *δρυα*, *far*, *vicia*).—*Kussemeth* occurs three times in the Bible. Twice it is tr^d by AV 'rye' (Ex 9³², Is 28²⁵ m 'spelt'; RV in both passages 'spelt'). It is also tr^d in AV 'fitches' (Ezk 4⁹, AvM and RV 'spelt'). The LXX gives in the first and third of the above references *δρυα*, and in the second *ρεα*. *δρυα* may, and *ρεα* does, mean 'spelt,' which is the seed of *Triticum spelta*, L., a wild wheat. Notwithstanding the authority of the LXX, we think that *kussemeth* is the same as the Arab. *kirsanah*, commonly pronounced *kirsenneh*. This is a leguminous plant, *Vicia Ervilia*, L., near the lentil in its general aspect. It is an annual, with pinnate leaves of 8 to 12 pairs of oblong, retuse leaflets, and a tortuose

* The only way in which Josephus' reckoning of the books of the Bible as twenty-two can be accounted for is by supposing that he reckoned Judges and Ruth as one book.

a distance would, it is implied, be undertaken naturally only on a sabbath or new moon. Hos 2¹¹ ('And I will cause all her mirth to cease, her pilgrimages, her new moons, and her sabbaths, and all her stated [religious] seasons') implies that the sabbath, though it had a religious object (cf. Is 1¹³), was also an occasion of social relaxation: Am 8⁵ ('When will the new moon be gone, that we may sell corn? and the sabbath, that we may open out wheat?') shows that trade as well as field-labour was intermitted on it.

The passages quoted make it evident that in the 8th cent. B.C. the sabbath was regarded as sacred to J^h, and that it was marked by abstention from at least ordinary occupations. The first of these facts implies naturally in addition that some special sacrifices were offered on it—an inference which might also be drawn from the connexion in which it is mentioned in Is 1¹³. In later times, both the religious observances and also the abstention from labour were more fully defined and specialized. Jeremiah (17¹⁹⁻²⁷) has a prophecy relating to the sabbath: the people are solemnly charged by him, 'Bear no burden on the sabbath day, neither bring in by the gates of Jerusalem, nor carry forth a burden out of your houses, nor do any business; but hallow ye the sabbath day, as I commanded your fathers'; the command, it is added, had been imperfectly observed, but Jer. attaches to its observance now a promise of the permanence of the Davidic dynasty, and the safety of Jerusalem. Jer.'s authorship of this prophecy has been questioned by recent critics; but it is exactly in Jer.'s style: the high importance attached to the sabbath, even before Jer.'s time, is shown by the place which it holds in the Decalogue (to which Jer. plainly refers); and no doubt the prophet emphasized the sabbath, not simply for its own sake, but as a typical religious observance; it was an institution the observance or non-observance of which might be taken as a criterion of the general faithfulness or disloyalty of the nation.

In the 'Law of Holiness' (chiefly Lv 17-26), the individual laws in which, though their setting is later, may in many cases be as old as the 8th cent. or older (cf. vol. iii. pp. 69 f., 108^a), the observance of the sabbath is inculcated more than once ('Ye shall keep my sabbaths,' Lv 19²⁻³⁰ 26²), even under pain of death (Ex 31¹² [a fragment of H] 'verily ye shall keep my sabbaths, for it is a sign between me and you [i.e. a mark, or token, like circumcision (Gn 17¹¹), of your being my people] . . . to know that I am J^h which sanctifieth you. And ye shall keep the sabbath, for it is holy unto you; every one that profaneth it shall surely be put to death'); and Ezekiel (who elsewhere also shows himself to be strongly influenced by this body of laws: LOT 138-144 [6 145-152]) lays great stress upon it likewise: with evident reference to the language of H, he declares it to be an ancient ordinance of J^h (20¹² 'moreover I gave them my sabbaths to be a sign between me and them, to know that I am J^h which sanctifieth them,' v. 20 (I said) ' . . . and hallow my sabbaths'; cf., of the priests, 44²⁴), and reproaches the people with having defiantly 'profaned' it (20^{13, 16, 21, 24} 22⁸ 23³⁸), or 'hidden their eyes' from it (22²⁸). It is probable that at this time an increased significance began to be attached to the sabbath on account of its being one of the few distinctive institutions of Israel which could be observed in a foreign land. The same prophet in 45¹⁷ 46⁴ (cf. vv. 1-3) also gives directions—based, it may be presumed, upon existing usage—respecting the sacrifices to be offered every sabbath by the 'prince' on behalf of the nation in the restored temple, viz. six lambs and one ram as a burnt-offering, with accompanying

meal-offerings (the *daily* offering, according to Ezk 46¹², was to be one lamb, with an accompanying meal-offering).

The later exilic references to the sabbath are in a similar strain to the reference of Jeremiah. Its observance is the typical religious duty, and the test of general allegiance to J^h (Is 56^{2, 4, 6}); and a promise of restoration to Palestine is given to those Israelites who faithfully observe it, regarding it as a 'delight,' and refraining on J^h's 'holy day' from 'doing' their (ordinary) 'ways,' or 'finding' their own 'pleasure,' or 'speaking' [vain] 'words' (Is 58¹³): in Is 66²², also, it is pictured as being (in the restored Jerusalem) a weekly occasion of worship before J^h for 'all flesh' as the new moon would be analogously a monthly occasion.

In the legislation of P the regulations respecting the sabbath are further developed and systematized. Its institution is thrown back to the end of the week of Creation; God, it is said (Gn 2²), then 'blessed the seventh day and hallowed it,'—i.e. set it apart for holy uses, and attached blessings to its observance,—'because in it he desisted (נָחַ) from all his work (מְלָכָה 'business')' of creation: similarly in the motive, based upon the representation of P, attached in Ex. (20⁸) to the fourth commandment; and in Ex 31¹⁷ 'for in six days Jehovah made heaven and earth, and on the seventh day he desisted (נָחַ), and was refreshed (שָׁנַן),—as above, in 23¹².' In Ex 31¹²⁻¹⁷ the old law, derived from H, is supplemented by an addition (vv. 14b-17) emphasizing further the sanctity and permanence of the institution, and the penalty (death) for its non-observance: Ex 35¹⁻³ (an injunction prefixed to the account of the construction of the tabernacle) the directions contained in 31¹⁵ are repeated almost *verbatim* (v. 2), and in v. 3 the kindling of fire on the sabbath is prohibited; Lv 23³ it is to be observed (like certain other sacred seasons) by a 'holy convocation,' or religious gathering; Lv 24⁸ the shewbread is to be renewed every sabbath: Nu 15³²⁻³⁶ relates how a man found gathering sticks on the sabbath was by Divine direction stoned to death; Nu 28⁹ the special sacrifices for the sabbath are appointed, viz. double those offered on ordinary days (vv. 2-8), i.e. two male lambs for a burnt-offering in the morning, and two in the evening, with twice the usual meal- and drink-offerings. Lastly, in Ex 16²³⁻²⁹ the manna is stated to have been withheld on the sabbath, and given in double quantity on the previous day, in order to preserve the sanctity of the day; and the people are forbidden to leave their homes, and (indirectly) to bake or cook anything, on the sabbath.

In P the term *shabbāthōn* (RV 'solemn rest [properly, cessation]') is also used in connexion with the sabbath, viz. Ex 16²³ 'to-morrow is a *solemn rest*, a holy sabbath unto J^h': 31¹⁵ (cf. 36², Lv 23³) 'on the seventh day is a sabbath of *solemn rest* יוֹם נָחַ, holy unto J^h' (elsewhere *shabbāthōn* is used of New Year's day, Lv 23²⁴, of the first and eighth days of the Feast of Booths, Lv 23³⁶, and of the sabbatical year, Lv 25⁵; and 'sabbath of solemn rest' of the Day of Atonement, Lv 16²¹ 23^{32a} (cf. in v. 30 'sabbath' alone), and of the sabbatical year, Lv 25⁴ (?).—The term 'sabbath' is used also (Lv 25² *al.*) of the SABBATICAL YEAR. On Lv 23¹¹ 15 see WEEKS (FEAST OF).

In the history of the post-exilic period we read in Neh 10³¹ how the people, headed by Nehemiah, bound themselves, if foreigners offered wares or food for sale on the sabbath, not to buy of them; and in Neh 13¹⁵⁻²² how Neh., finding this obligation disregarded, and also other kinds of work done on the sabbath (treading wine-presses, lading animals with corn, bringing fruit and other wares into Jerus., and selling and buying them), remonstrated with the people, and had the gates of Jerus. closed on that day, in order that merchants and

packmen might not bring their 'burdens' (cf. Jer 17²¹) into the city. Allusions to the sacrifices offered on the sabbath occur in Neh 10³², 2 Ch 2⁴ 8¹³ 31².

It will be evident, from the preceding survey, that in the priestly Law the original character and objects of the sabbath have receded into the background, it has become more distinctly a purely ceremonial institution, and the regulations for its observance have been made more strict. It will appear in the sequel (iii.) how in a still later age these characteristics are all intensified.

ii. SPECULATIONS ON THE ORIGIN OF THE SABBATH.—It is not improbable that the sabbath is ultimately of Babylonian origin. In a lexicographical tablet (II Rawl. 32, l. 16) there occurs the equation—

um nûh libbi = *ša-bat-tum*,

or 'day of rest of the heart' (i.e. not, as was formerly supposed, a day of rest for man, but, as parallel occurrences of the same phrase show,* a day when the gods rested from their anger, a day for the pacification of a deity's anger)=sabbath. Further, in a religious calendar for two months (the second, or intercalary Elul, and Marcheshvan), which we possess,† prescribing duties for the king, the 7th, 14th, 19th,‡ 21st, and 28th days are entered as 'favourable day, evil day,' while the others are simply 'favourable' days. On the five specified days, the king is not, for instance, to eat food prepared by fire, not to put on royal dress or offer sacrifice, not to ride in his chariot, or hold court, not to seek an oracle, or even to invoke curses on his enemies: on the other hand, as soon as the day is over, he may offer a sacrifice which will be accepted. The days, it is evident, are viewed superstitiously: certain things are not to be done on them, in order to avoid arousing the jealousy or anger of the gods. The meaning of the expression 'favourable day, evil day' is that the day had an indeterminate character; it could become either the one or the other, according as the precautions laid down for its observance were attended to or not.§

Except in the passage quoted, *šabattum* is known at present to occur only (in the form *šabattim*) 2 or 3 times in syllabaries (Jensen, *ZA* iv. 274-8, *Z. f. Deutsche Wortforschung*, Sept. 1900, p. 153 (in an art. on the Week of seven days in Babylonia)): in the first of these syllabaries it corresponds to a Sumerian ideogram meaning to pacify; in the second (where Jensen contends that it occurs with the meaning to come to rest, be calmed, pacified) its occurrence is questioned by Jastrow, *AJTh* ii. 315 n.: in the third (*Z. f. D. Wortf.* 163) it corresponds strangely to the ideogram which means simply day, sun, light. The etymology of *šabattum* is uncertain. The verb *šabātu* is, in a lexicographical tablet, equated with *gamāru*, which means commonly (Deutsch, *HWB* p. 190) to bring to an end, complete, but which seems, to judge from two syllabaries (*Z. f. D. Wortf.* 153), to have signified also to pacify, appease; and Jensen, assuming that in the tablet *šabātu* is quoted with this exceptional meaning of *gamāru*, explains *šabattum*, *šabattim*, from it. It remains however, for the present, a difficulty that while in Heb. *šabbāth* is connected (apparently) with *šābath*, to desert, the Assy. verb *šabātu* means something different.

These facts make it at least a plausible conjecture that the Heb. sabbath (which was likewise primarily a day of restrictions) was derived ultimately from Babylonia, || or, as Jensen would prefer

* E.g. *širu nûh libbi*=psalm of propitiation (Jastrow, *AJTh*, vol. ii. p. 316).

† Jastrow, *Relig. of Bab. and Assy.* p. 376 ff.

‡ Perhaps the 7x7=49th day from the 1st of the preceding month—the month having 30 days.

§ The ancient Assyrians regarded the simplest and most ordinary occurrences as ominous of either good or evil (Jastrow, *Rel. of Bab. and Assy.* p. 355, etc.); and, in fact, there is a calendar in which every day in the year is marked as either fortunate or unfortunate for something or other (p. 379 ff.).

|| So Schrader, *KAT* on Gn 2³; Lotz, *Quaestiones de Hist. Sabb.* (1893) 67; Sayce, *HCM* 761, *EHH* 198 (where, however, the facts about the Bab. 'Sabbath' are overstated; for though, no doubt (Lotz, 68), *šabattum* might very naturally be the name of the 7th, 14th, etc., days of the two months referred to above, it is not, in any text at present known, applied to them actually); Gunkel, *Schöpf. u. Chaos* (1895), 155. Nor is there at present any evidence that a continuous succession of 'weeks,' each ending with a day marked by special observances, was a Bab. institution (Jensen, 154).

to say,* that the Heb. and Babylonian institutions had a common origin: though naturally, like other Heb. institutions which were not originally confined to Israel, it assumed among the Hebrews a new character, being stripped of its superstitious and heathen associations, and being made subservient to ethical and religious ends. It is not difficult to imagine how, under the influence of Israel's religion, a change of this kind might gradually be wrought, though (supposing the hypothesis to be a sound one) we have no information of the stages by which it was actually effected; Jastrow's endeavour (*AJTh*, vol. ii. pp. 321 ff., 332 ff., 345 ff.) to show that the Heb. sabbath had once (like the *um nûh libbi*) a propitiatory character, and even that the verb *šābath*, as applied to J, and *šabbāthōn*, expressed originally the ideas of ceasing from anger, being pacified, cannot be deemed convincing.

The sabbath, as a day of restriction, is an institution parallel to what is found among many early peoples, and indeed, as a survival from an earlier stage, among civilized peoples as well. The wide diffusion of periods of restriction makes it probable that they had their origin in simple ideas and social conditions. In all the cases known to us the restrictions are of the same general character—they refer to occupations, food, dress. Thus, besides the Babylonian institution, which has been already referred to, the Egyptians had a list of days, on which certain acts were prohibited (*AJTh*, ii. p. 350+). In Rome business was suspended during the *feriæ*; and on all *dies nefasti* courts of law and the comitia were closed. In the Hawaiian Islands, it was unlawful, on certain days, to light fires or to bathe; the king also at certain times withdrew into privacy, giving up his ordinary pursuits. In Borneo, work was forbidden on certain days in connexion with the harvest. The origin of such times of restriction is lost in antiquity: they come before us commonly as established customs, resting on precedent, and not supposed to need explanation. They may have arisen from various causes: thus in some cases observation would show that particular times were favourable or unfavourable to certain occupations; but very often they would be determined by superstitious or religious motives. The days thus fixed would gradually be tabulated and systematized; and when calendars had been constructed, particular days would come to be marked upon them as lucky or unlucky, and in some cases these would agree with definite phases of the moon. 'Such a calendar the Hebrews may have inherited, or may have received from Babylonia or from some other source': if they received it from Babylonia, they detached it from its connexion with the moon (fixing it for every seventh day, irrespectively of the days of the month), they generalized the abstinence associated with it, and, more than all, they transformed it into an agency, which, though, like other institutions, capable of abuse, has nevertheless, partly as observed by the Jews themselves, partly (see below) as forming the model of the Christian Sunday, operated on the whole with wonderful efficiency in maintaining the life of a pure and spiritual religion.‡

The question, which was formerly much debated, whether the sabbath was instituted at the close of the Creation, or whether it was a purely Mosaic ordinance, was already answered by Dr. Hessey (p. 135 ff.) in the latter sense; and in the light in which the early chapters of Gen. are at present regarded by scholars (cf. Cosmocony, and Ryle's *Early Narratives of Genesis*), the question itself has become irrelevant. It is plain that in Gn 2³ the sanctity of the seventh day of the week is

* *Z. f. D. Wortforschung*, 154.

† See also Maspero, *Dawn of Civilization*, 210-212; Wiedemann, *Relig. of Anc. Egypt*, 263 f.

‡ With the last paragraph cf. C. H. Toy, 'The earliest form of the Sabbath,' in *JBL*, 1899, pp. 191-193.

explained unhistorically, and antedated: instead of the sabbath, closing the week, being sacred, because on it God 'desisted' from His six days' work of creation, the work of creation was distributed among six days, followed by a day of rest, because the week, ended by the sabbath, existed already as an institution, and the writer (P) wished to adjust artificially the work of creation to it. In the Decalogue, 'Remember' may be interpreted quite naturally as signifying 'keep in mind' in the future (cf. Ex 13⁸, Dt 16³).

iii. THE SABBATH IN THE LATER JUDAISM AND THE NT.—There are not many allusions to the sabbath in the apocryphal books. It was naturally included amongst the distinctively Jewish institutions, which Antiochus Epiphanes sought (B.C. 168) to abolish (1 Mac 1³⁰⁻³², 2 Mac 6⁶). At the beginning of the Macc. uprising, the loyal Jews allowed themselves to be massacred in cold blood rather than profane the sabbath, even in self-defence (1 Mac 2³¹⁻³³): but in view of the consequences which persistence in such a course would obviously entail, Mattathias and his friends decided (vv. 39-41) to recognize defensive warfare as permissible on the sabbath (cf. 1 Mac 9³⁴⁻³⁵, 2 Mac 8²⁵⁻²⁸; also Jos. BJ II. xix. 2). The destruction of siege-works was not, however, considered allowable; and so Pompey was able to complete his mound against Jerus. on the sabbath (Jos. Ant. XIV. iv. 2). The unwillingness of the Jews to fight on the sabbath naturally became known to their enemies; and several instances are on record of attacks being planned for that day, and carried out successfully (Jos. c. Ap. i. 22 end; 2 Mac 5²⁵⁻²⁶, 15¹; Ant. XIII. xii. 4, XVIII. ix. 2). The Romans so far recognized the scruples entertained by the Jews with regard to bearing arms or travelling on the sabbath, as to release them from the obligation of military service (Jos. Ant. XIV. x. 11-19).

Allusions to the sabbath, generally more or less satirical, occur in the classical writers: by some of them it was supposed to be a day of mere idleness, by others that it was a fast. See Tac. Hist. v. 4; Sueton. Octav. 76; Juv. xiv. 96, 105 f.; Martial, iv. 4. 7; Persius, v. 179-184; Seneca, Epist. 95, 47 (lights not to be kindled on it).

By the Jewish legalists the OT regulations respecting the sabbath were developed and systematized to an extent which has made their rules on the subject a byword for extravagance and absurdity. Two entire treatises of the Mishna, *Shabbāth* and *Erūbin*, as well as parts of others, are devoted to provisions for the observance of the sabbath; and there are also long discussions on the subject, with quotations of the divergent opinions of different Rabbis, in the Gemara. We may mention some of the more simple and reasonable provisions first. As the Jewish day began at sunset in the evening, the sabbath lasted from sunset on what we should call Friday to sunset on Saturday; according to Jos. BJ IV. ix. 12, the beginning and end of the day were announced by trumpets from the temple. The afternoon of Friday was called the 'eve of the Sabbath' (ערב שבת), or the PREPARATION-DAY (παρασκευή), and no business was allowed to be begun on it which might extend into the sabbath. The sabbath was no fast-day (cf. Jth 8⁹): the second Isaiah had said that it should be regarded as a 'delight' (נִשְׂמֵחָה); and the Jews have always been careful not to divest it of this character. Three meals (cf. *Pe'ah* viii. 7; *Shabb.* xvi. 2), of the choicest available food (Edersh. ii. 52),* were accordingly prescribed for it, being laid ready before sunset on the Friday, and the lamp for the Sabbath being lighted at the same time. The Mishna adds minute regulations, as to how the meals, if necessary, were to be kept warm, without infringing the sanctity of the sabbath, as of course no fire might be kindled

(Ex 35³), or even attended to, on the day. The sabbath was regarded as set apart for religious exercises—both for private meditation and prayer, and also for public worship in the SYNAGOGUE (Mk 1²¹⁻²³ (Lk 4³¹⁻³³), 6² (Lk 4¹⁶), Lk 6¹³ 13¹⁰, Ac 13¹⁴, 27. 42. 44 15²¹ 17¹⁶, 18⁴), or other place of prayer (Ac 16¹³).

With regard to the more technical observance of the sabbath, the Mishna (*Shabb.* vii. 2) enumerates 39 principal classes† of prohibited actions, viz. sowing, ploughing, reaping, gathering into sheaves, threshing, winnowing, cleansing, grinding, sifting, kneading, baking; shearing wool, washing it, beating it, dyeing it, spinning it, making a warp of it, making two thrum-threads, weaving two threads, splitting two threads, tying, untying, sewing two stitches, tearing thread to sew two stitches; catching deer (game), killing, skinning, salting it, preparing its hide, scraping off its hair, cutting it up; writing two letters, erasing for the purpose of writing two letters; building, pulling down, extinguishing fire, kindling fire, beating with a hammer, and carrying from one property to another (add also *Bēza* v. 1, 2‡). The real 'micrology' of the Rabbis appears, however, not so much in this enumeration as such, as in the consideration of the cases in detail, the discussion what actions do or do not fall under the several classes named, and sometimes also in the casuistical evasion of a prohibition. A few specimens of the extraordinary refinements thus introduced must suffice. The prohibition to tie or untie a knot was too general, so it became necessary to define the species of knots referred to. It was accordingly laid down that a camel-driver's knot and a boatman's knot rendered the man who tied or untied them guilty; but R. Meir said, 'a knot which a man can untie with one hand only, he does not become guilty by untying.' A woman might, however, tie on various articles of dress, and also tie up skins of wine or oil, and pots of meat. A pail might be tied to a well by a band ('fascia'), but not by a rope (לֶמֶךְ). R. Jehudah laid down the rule that any knot might be lawfully tied which was not intended to be permanent (*Shabb.* xv. 1, 2). This rule is, in fact, the principle by which the commentators explain the distinctions that have been just quoted. The rest of the tractate is almost wholly occupied with the discussion of similar distinctions in other subjects.

The aim of the tractate *Erūbin* ('mixtures,' or 'connexions') is to alleviate the extreme rigour of some of the Rabb. enactments respecting the sabbath. The 39th of the list of prohibited actions quoted above was that of carrying from one property to another: but in this tractate it is explained how places might, by a legal fiction, be combined together, so that things might lawfully be carried from one into another: there was thus an *erūb*, or 'commixture,' of courts, of streets, and of limits: a number of houses opening into a common court were, for example, treated as one, by all the families before the sabbath depositing some food in the common court; or a number of narrow streets or blind alleys were converted into a 'private property,' by extending along them a wire or rope, or by laying a beam over the entrance. The limit of a 'sabbath-day's journey' (Ac 1¹²) was, according to

* On the sabbath as a day of spiritual edification, cf. also Jos. Ant. xvi. ii. 4 middle, c. Ap. ii. 17 end; Philo, ii. 168 end, 169, 197, 282, 680 (from Euseb. *Præp. Ev.* viii. vii. 9 f.).

† עֲשֵׂי תְּשֵׁי: derivative actions, or species of the principal classes named, were called מְלָכִים. Margoliouth (*Expos.* Nov. 1900, p. 330 ff.) cites from an unedited Persian MS. containing an account of the feasts and other observances of different nations by an author of the 11th cent., an enumeration of 38 forbidden acts, differing in many particulars from those mentioned in the Mishna, and including more directly some of those alluded to in the Gospels.

‡ See Wünsche, *Erläuterung* [see full title ad fin.], p. 148.

* The meal of which our Lord partook on a sabbath in the house of one of the 'rulers of the Pharisees' (Lk 14¹) would, we may be sure, be one of these sabbatical *epulae laetiores*.

the Rabbis, 2000 cubits;* but if, before the sabbath, a man deposited food for two meals at the boundary, he was considered to declare that place to be his domicile, and he was at liberty, when the sabbath came, to proceed 2000 cubits beyond it. However, it seems that such concessions were only granted for some serious and worthy purpose (Schechter, *ap. Montefiore, Hibb. Lect.* 562).

Naturally, there were cases in which higher considerations superseded these rules for the strict observance of the sabbath,—יוֹרֵן אֶת־הַשַּׁבָּת 'push aside the sabbath' is the expression used. The priests in the discharge of their duties in the temple—e.g. in preparing and offering the sacrifices appointed for the day—profaned the sabbath, and were 'guiltless' (Mt 12²).† And so the Mishna permits on the sabbath acts necessary for the sacrifice of the passover, though it carefully excludes those which are deemed unnecessary (*Pesāhim* vi. 1, 2). A Levite performing upon a stringed instrument on the sabbath in the temple (but not elsewhere), might, if his string broke, tie it up again, but he is forbidden to put in a new string (*Erubin* x. 13). A priest who hurts his finger may bind it up with reeds in the temple (though not elsewhere), but he is not permitted to press out the blood (*ib.* 14). Similarly circumcision was permitted, though not anything connected with it which could be prepared before (*Jn* 7²²; *Shabb.* xix.). In other cases humanitarian grounds superseded the sabbath. The general principle was that any 'doubt about life,' i.e. any doubt as to whether life was in danger, superseded the sabbath (שָׁלוֹם יוֹרֵה אֶת־הַשַּׁבָּת *Yōmā* viii. 6):‡ but, of course, the further question then arose, What did endanger life? Ailments supposed to be dangerous to life are mentioned, and treatments permitted or forbidden are enumerated; but, to our minds, the distinctions drawn are arbitrary and absurd, and the reasons alleged in support of them most trivial and insufficient. 'He who has the toothache must not rinse his teeth with vinegar [and spit it out again; for this would be to apply a medicine]; but he may wash them as usual [and swallow the vinegar, for this would be merely like taking food]. He who has pains in the loins may not anoint himself with wine and vinegar [which would be a medicinal application], but he may anoint himself with oil [acc. to the usual custom], though not with oil of roses [which, being costly, would certainly not be used, except as a medicine].' (*Shabb.* xiv. 4; the explanations, from the commentators, *ap. Surenh.*) A strain might not have cold water poured upon it, but it might be washed in the usual way (*xvii.* 6). With such feelings current on the subject, the hostility aroused by the cures wrought by our Lord on the sabbath (Mt 12¹³=Mk 3¹⁻⁵=Lk 6⁶⁻¹⁰, Lk 13¹⁰⁻¹⁷ 14¹⁻⁶, Jn 5⁵⁻¹⁶ 7²² 9¹⁴⁻¹⁶) is at once intelligible. It is also apparent why on a sabbath the sick were brought to Him to be healed after sunset (Mk 1³², see v. 2).

The disciples, in 'plucking' (Mt 12¹=Mk 2²³=Lk 6¹) and 'rubbing' (Lk 6^{1b}) the ears of corn on the sabbath, violated the day, according to Rabb.

* The distance is obtained by an essentially Rabbinical combination of Ex 16²⁹ 21¹³ and Jos. 34. See Lightfoot on Lk 24⁵⁰, who remarks drily on the process, 'sed artem disce fabricandi quiddibet ex quolibet'; and comp. further the next article.

† Cf. *Pesāhim* 65a (and elsewhere): שָׁלוֹם יוֹרֵה אֶת־הַשַּׁבָּת 'there is no sabbath-keeping in the sanctuary.'

‡ See in Wünsche (p. 151f.), from the Gemārā (*Yōmā* 85ab; cf. *Meḥilla* on Ex 31¹³, fol. 103b, ed. Friedmann), the biblical authority which 'Akiba and other Rabbis of the 2nd cent. sought to discover for this principle. The text which was deemed most conclusive was Lv 18⁵, where it is said of the statutes of the law that if a man does them, he will 'live by them,' and not that he will die by them. See, further, on the teaching and exegesis of early Rabbis on the subject of the sabbath, Bacher, *Die Agada der Tannaiten*, i. 72, 84f., 117, 191, 238, 290, 296ff., 363, 404, ii. 94f., 361, 362, 470, 510.

VOL. IV.—21

ideas, in two respects; for 'plucking' was a species of 'reaping,' and 'rubbing' of threshing (cf. Maimonides, *Hilchoth Shabbath* viii. 3, 'He who reaps even as little as a dry fig on the sabbath is guilty; and the plucker is a species (מְלִיץ) of reaper'; and Jerus. Talm. *Shabb.* 10a 'A woman rubbing the heads of wheat [is guilty], as being a threshler,' *ap. Edersl.* ii. 56; also Lightfoot, *H' rā Heb.* on Mt 12²). To lead an animal to water on the sabbath (Lk 13¹⁵) was allowable, provided it carried nothing that could be regarded as a 'burden'; water might even be drawn for it, and poured into a trough, so that it came and drank of its own accord; it might not, however, be brought and set before the beast (Lightf. *ad loc.*; *Erubin*, fol. 20b). But it is not permitted, at least in the Talmud, if an animal has fallen into a pit, or pool of water, to 'lay hold of it, and lift it out' (Mt 12¹; cf. Lk 14³): it is allowed, however, to supply it with food, or, if that be impossible, to bring mattresses and cushions for the purpose of helping it to come out of itself (*Shabb.* fol. 128b; Maim. *Shabb.* xxv. 26); it is possible, however, that in the time of Christ this prohibition had not yet been formulated. To make clay and apply it to the eye (Jn 9⁶⁻¹⁴) involved a breach, if not a double breach, of the sabbath-law: the Mishna (*Shabb.* xxiv. 3) lays it down that 'water may be poured on bran, but it must not be kneaded,' and the same rule might be naturally held to apply to clay: but the application of the clay to the eye was certainly not allowable: it was indeed permitted to apply wine to the outside of the eyelid (though not to put it inside the eye), but the application of saliva (which is mentioned, as it was deemed to possess curative properties) was altogether forbidden (*Shabb.* 108b; Maim. *Shabb.* xxi. 25; Lightfoot, *ad loc.*). Of course, to take up a bed (Jn 5¹⁰) was prohibited, being an act of 'carrying.'*

It is, however, only right to observe that, in spite of the rules and restrictions created by the Rabbis, the sabbath does not seem to have been felt practically to be a day of burden and gloom, to those living under them. 'The sabbath is celebrated by the very people who did observe it, in hundreds of hymns, which would fill volumes, as a day of rest and joy, of pleasure and delight, a day in which man enjoys some presentiment of the pure bliss and happiness which are stored up for the righteous in the world to come. To it such tender names were applied as the "Queen Sabbath," the "Bride Sabbath," and the "holy, dear, beloved Sabbath"' (Schechter, *JQR* iii. 763, or *ap. Montefiore, Hibb. Lect.* 507; cf. the hymns quoted by Abrahams, *Jewish Life in the Middle Ages*, 1896, pp. 133-137).

iv. SUMMARY.—It appears, from what has been said, that, so far as we can trace the sabbath back among the Hebrews, it was a day sacred to J^h, and also a day, presupposing the agricultural period, marked by cessation from labour in the house and in the field: it had thus essentially a philanthropic character, the duty enjoined on it, as Wellh. has said, being less that the Israelite should rest himself, than that he should give others rest. Whatever the sabbath may have been in its primitive form, we may feel sure that this philanthropic application of it is of Israelite origin. As sacred to J^h, religious observances,

* Cf. Schürer, ii. 393-400, 412-414. The tractates *Shabbāth* and *Erubin* are translated, in Sola and Raphael's *Eighteen Treatises of the Mishna* (1843), pp. 34-90; and, with copious notes, in Surenhusius' *Mishna* (1899), ii. 1-77, 78-134. There is also a pretty full abstract of *Shabbāth* in Edersheim, *Life and Times*, ii. 774ff.; and a separate ed. in Heb., with useful introd. and glossary, by H. L. Strack, l.p. 1890. See, further, the many Talm. passages tr. by Wetstein (*Noe. Tract.*) on Mt 12² 5.10, Lk 14¹ etc.; and comp. also W. H. Bennett, *The Mishnah as illustrating the Gospels*, 1884, p. 53f.

at first simple and rudimentary, afterwards such as would spring naturally out of a more educated and maturer religious feeling, were attached to it,—special sacrifices, gatherings for worship in the temple, private prayer and meditation, and ultimately services in the synagogues. On its practical side, it was essentially an institution 'made for man.' Its intention was to give a rest from laborious and engrossing occupations, and from the cares and anxieties of daily life, and at the same time to secure leisure for thoughts of God. The restrictions attached to it were meant to be interpreted in the spirit, not in the letter. It had not essentially an austere or rigorous character; it was never intended that actions demanded by duty, necessity, or benevolence should be proscribed on it. Its aim was rather to counteract the deadening influence, upon both body and soul, of never-interrupted daily toil, and of continuous absorption in secular pursuits. But as time went on, an anxious and ultimately a superstitious dread of profaning the sabbath asserted itself; the spiritual was subordinated to the formal, restrictions were multiplied, till at length those which were really important and reasonable were buried beneath a crowd of regulations of the pettiest description. The general attitude taken towards the sabbath by our Lord was, while accommodating Himself to such observances as were consistent with its real purpose (e.g. worshipping or teaching in the synagogue), or otherwise innocent (p. 320ⁿ), to free it from those adventitious accretions with which the 'tradition of the elders' had encrusted it. The sabbath, He emphatically declares (Mk 2²⁷), 'was made for man, not man for the sabbath.'* In particular, deeds of mercy were no infringement of its sanctity: it was 'lawful to do good on the sabbath day' (Mt 12¹²). Nor was the sabbath, as the Rabbis seemed to make it, an end in itself, for the sake of which men should be subjected to a number of needless and vexatious rules; it was a means to an end, the good of God's people, and this end was best promoted by a reasonable liberty in the interpretation of the statutes relating to it; the multiplication of rules tended really not to preserve its essential character, but to destroy it.

The injunction Mt 24²⁰ ('Pray ye that your flight be not in the winter, neither on a sabbath'; the clause is not in the || Mk 13¹⁹) rests probably upon the supposition either that the Christians addressed, being still resident in Judea, would not, at the time contemplated, have yet cast off their Jewish scruples, or (Hessey, p. 174 f.) that impediments would be thrown in the way of their flight by the Jews around them. Jn 5¹⁷ 'My Father worketh even until now (viz. without interruption), and I work,' bears upon the relation which—not an ordinary man, but—Christ Himself holds towards the sabbath: He does not by works of mercy break the sabbath any more than God the Father does by His sustaining providence, which operates continuously on the sabbath not less than on other days (cf. *Brishith R.* § 11; tr. Wünsche, 48; Bacher, i. 84 f., 288 f.).

The addition in the Cod. Bezae after Lk 6⁴ deserves also to be mentioned here: *τῇ αὐτῇ ἡμέρᾳ διακονοῦντες τινὰ ἰσχυροῦντο τοῦ σαββάτου ἵνα μὴ αὐτοῖς. Ἀνθρώποι, οὐ μὴ αἰδῶς τὸ πῶς, μακάριος ὁ οὐκ αἰδῶς, ὑποκαταρτὴς καὶ παραβάτης ὁ τοῦ νόμου.*

As regards the apostles, the sabbath is mentioned by St. Paul, directly in Col 2¹⁶. 'Let no man therefore judge you in meat, or in drink, or in respect of a feast day or a new moon, or a sabbath day, which are a shadow of the things to come (i.e. of the Christian dispensation); but the body is Christ's'; and inferentially in Gal 4⁹⁻¹¹, where the observance of 'days and months and times and years' is described as a return to the 'weak and beggarly elements,' and Ro 14⁵, where it is implied that it is a matter of indifference whether one day is esteemed above another, or

* In the discussion in *Yomā* 85b a somewhat similar principle ('the sabbath is delivered into your hands, not you into the hands of the sabbath') is deduced, by an essentially Rabbinical method, from the words of Ex 31¹⁴ ('it is holy for you'). The argument is attributed in *Mechilla* on Ex 31¹³ to R. Shimeon b. Menasya (c. 190 A.D.); cf. Bacher, *op. cit.* ii. 493.

whether every day is esteemed alike: 'let every man be persuaded in his own mind.' The meaning of these passages clearly is that the Jewish sabbath, like other Jewish ceremonial observances, as the distinction of clean and unclean foods, or Jewish sacred seasons, as new moons, feast-days, and sabbatical or jubile 'years,' was a matter of indifference to the Christian, and was abrogated under the Christian dispensation. The general teaching of the NT is thus, in Dr. Hessey's words, that 'the sabbath properly so called, the sabbath of the Jews, with everything connected with it as a positive ordinance, was swept away by Christianity' (Lect. v., *ad init.*).

The Fathers frequently compare the (Jewish) sabbath with Circumcision, treating it, like that, as a temporary ordinance, and pointing out that Abraham, for instance, was justified without observing it: e.g. Justin, *Tryph.* §§ 19, p. 236 E, 27, p. 245 B; Iren. iv. xvi. 2; Tertull. *adv. Jud.* c. 2 (Hessey, pp. 56 ff., 371 ff. [ed. 5, pp. 42 ff., 281 ff.]).

In He 4⁹ 'There remaineth therefore a sabbath rest (*σαββατισμός*) unto the people of God,' *sabbath rest* is used figuratively of the rest in God after death. The apostle has been arguing that it was God's purpose that some should enter into His 'rest' (*σαββατισμός*,—*ἡσυχία*, properly *place of rest*),—the 'rest' signified by the expression being in the original context (Ps 95¹¹; cf. Dt 12⁹⁻¹⁰) the rest of Canaan, and this being identified by the apostle—no doubt on account of the presence and fellowship of God implied in it—with the rest of God,—i.e. the 'rest' into which God entered after finishing His work of creation, and which He designs to be shared ultimately by all His faithful people; as Israel, through disobedience, failed to enter into that 'rest,' the promise still remains open for Christians. See more fully A. B. Davidson's *Comm.* (T. & T. Clark), pp. 90-101. The Rabbis also sometimes regarded the sabbath as foreshadowing the rest of the world to come: thus in the *Mishna* (redacted c. 200 A.D.), *Tamid* vii. 4 (= *Sopherim* xviii. 2), in the enumeration of the psalms which were sung by the Levites in the Temple, when the morning burnt-offering was offered (Delitzsch, *Psalm* 4 281 f.), it is said: 'On the sabbath, they recited the psalm (92) of which the title is "A Psalm, a song for the sabbath-day," i.e. a Psalm for the future (*לְיוֹמָא דְּלִבְרָא*), for the day (*נַר. lec.* for the age), which is all sabbath, and rest for life eternal (*לְיוֹמָא דְּלִבְרָא שְׁמִינִי יוֹמָא דְּלִבְרָא*). The same saying is quoted also often elsewhere, e.g. *Mechilla* on Ex 31¹³, *Rosh ha-shana* 31a (where, with the entire passage, it is attributed to R. Akiba [d. 135 A.D.]; cf. Bacher, i. 330); see also *Abot de R. Nathan*, fol. 3a bottom, ed. Schechter (with the note). But the passages cited by Schöttgen on He 4⁹ from Zohar, Yalkut Rubeni, and R. Samuel ben David, are very late,—the book Zohar being of the 13th cent., and the other two of the 17th cent.

The question of the relation of the 'Lord's Day' (Rev 1¹⁰), or Christian Sunday, to the Jewish sabbath, does not properly belong to the present article, and need therefore be only referred to briefly. The true view appears to be that the Sunday is not substituted for the Jewish sabbath; the sabbath is abolished; and the observance of the First Day of the week is an *analogous* institution, based on the consecration of that day by our Lord's Resurrection, sanctioned by apostolic usage (Ac 20⁷, 1 Co 16²), and accepted by the early Church,—the day being set apart for similar objects—rest from labour, and the service of God,—in a manner consonant with the higher and more spiritual teaching of Christ, and to be observed in the spirit of loyal Christian freedom, rather than by obedience to a system of precise statutes. Dr. Hessey has made it abundantly clear that during the first three Christian centuries the Lord's Day was never confounded with the sabbath, but carefully distinguished from it; and that it was only after the 3rd cent., and even then only gradually, that the Christian and the Jewish institutions were confused, and that tendencies towards 'Sabbatarianism' began. See, further, LORD'S DAY.

By early Christian writers, it may be worth noticing, the terms *σαββάτος* and *σαββατισμός* are not infrequently used in a fig. or spiritual sense of *abstinence from evil*: e.g. Justin, *Tryph.* § 12, 'The new law (of Christ) wills that you should keep sabbath perpetually'; i.e. a thief, etc., turn from sin, *καὶ σαββατίζετε τὰς τρυφὰς* (cf. Is 58¹³) *καὶ ἀληθινὰ σαββατίζετε*.

* On the opinion that this 'day' would be 1000 years, see Charles, *Book of the Secrets of Enoch*, on 381. 4; *Sanh.* 97a.

τοῦ θεοῦ. Similarly Clem. Al. *Strom.* iii. 15, § 99, p. 556 Potter, where 'that keepeth the sabbath' of Is 56⁴ is explained to signify κατὰ ἀρχὴν ἀμαρτανίας, and iv. 3, § 8, p. 568 (5 *καὶ οὐκ ἐστὶν τὸ σάββατον δι' ἀρχῆς καὶ οὐκ ἐστὶν ἀντιτίθετον*), Tertullian, *adv. Jud.* c. 4, and others: see Hessey, pp. 57 ff., 93, 96 (ed. 5, pp. 43 ff., 70, 72); Suicer, *Thec. Eccles.* 916, 918 f.; and cf. also Ep. Barnab. xv. 1, 6, 7. And this, no doubt, is the meaning of the expression in the second of the 'Sayings of Jesus,' discovered in 1897 at Oxyrhynchus, *λογίαι* 'Ιησοῦ, 'Εὰν μὴ ἠκούσῃτε τὸν λόγον [read τοῦ καὶ μου], οὐ μὴ ἔσχητε τὸν βασιλεὺς τοῦ θεοῦ καὶ οὐκ ἐστὶν τὸ σάββατον ἐκείνῳ τὸν κατὰ τὸν θεόν. The Christian's whole life is to be hallowed, as a sabbath, in the service of God. But it is difficult to think that Christ Himself can have used the expression in this metaphorical sense. See, further, *Expos. Times*, ix. 69; Harnack, *Über die jüngst entdeckten Sprüche Jesu*, 1897, pp. 9-12 (tr. in *Expos.* Nov. 1897, pp. 323-7); Lock and Sanday, *Two Lectures on the 'Sayings of Jesus'*, Oxf. 1897, pp. 7, 9, 19 f., 35 f.

SABBATH DAY'S JOURNEY (Talmudic סבתא דאורייתא).—An expression found but once in the Bible, Ac 1¹³ (σαββατου . . . ὁδόν), where the Mount of Olives is said to be a Sabbath day's journey from Jerusalem. The expression immediately suggests some well-known regulation fixing the distance which might be travelled on the Sabbath, and, by implication, defines this distance as between five and six furlongs; for, according to Josephus in his *Ant.* (xx. viii. 6), the Mount of Olives is five furlongs from Jerusalem, while in his *BJ* (v. ii. 3) it is stated to be six, the variation being perhaps due either to the fact that the distance lay between the two, or to the fact that the older Hebrew ell was rather shorter than the later one. What the text suggests is quite in harmony with extant Rabbinical regulations, which, therefore, in this case exhibit not merely (as they so often and so misleadingly do) what ought to be, but what actually was. Thus, in the Jerusalem Targum, the command in Ex 16²⁹ appears in the form, 'And let no man go walking from his place beyond 2000 ells on the seventh day'; and in the Targum on Ru 1¹² Naomi says to Ruth, 'We are commanded to keep Sabbaths and festivals, and not to walk beyond 2000 ells'; and this regulation is supplemented with many ritualistic details in the Mishna tractate *Erubin*. Occasional variations† from this generally accepted measurement‡—as, for example, the greater Sabbath day's journey of 2800 ells, the medium one of 2000, and the smaller one of 1800—are merely the freaks of individual Rabbis.

The evolution of the regulation can be traced with some approximation to certainty. The Rabbis seem first to have generalized the prohibition directed in Ex 16²⁹ against a man's 'going out of his place' on the Sabbath to gather the manna,

* See Levy, *NHWB*, s.v. סבתא (vol. iv. p. 637b).

† Nowack (*Lehrb. d. Heb. Archäol.* i. 202) gives as his opinion that the Sabbath journey probably corresponded to the Egyptian measure of 1000 double steps, and quotes from Zuckermann the tradition in the Talmud that it was 2000 steps, explaining the 2000 ells elsewhere by Zuckermann's statement that in the Talmud *ell* and *step* are quite commonly made the same; and the Sabbath journey (Nowack adds) is sometimes called *mil* (מיל)—that is, *mile*. Jerome has another measurement. In his *Epist. ad Algamam* *pueset.* x. we find: 'They are accustomed to answer and say, Barachias and Simeon and Hillel, our masters, have handed down to us that we should walk 2000 feet (*pedes*) on the Sabbath.'

‡ Origen (*de Principiis*, iv. 17) says that the Jews held 2000 ells (*διεξήκοντος πύχους*) to be each man's 'place' (*τοπος*) (on the Sabbath).

and then to have deduced the 2000 ells from the distance ordained (Jos 3⁴) to be between the people on the march and the ark in front of them; or, as some suppose, from the distance between the tabernacle in the wilderness and the outermost part of the camp; but, probably, the case of the tabernacle was only an imaginary Rabbinical inference from that of the ark. 'By the 'analogy' in the use of *mākōm*, 'place,' in Ex 16²⁹ and in Ex 21¹³—where the 'place' is a Levitical city of refuge with borders extending (it was affirmed) 2000 ells from the walls (Nu 35³)—the man's 'place' of Ex 16²⁹ became, in due course, the city in which he dwelt, together with its borders measuring 2000 ells straight out from the sides of the rectangle hypothetically constituting the city. (This measurement seems, from Nu 35³, with its 1000 ells, to have been an exegetical mistake: the 2000 ells apparently refer to each side of the larger rectangle circumscribing the borders). According to Ginsburg (Kitto's *Cyclop.*, art. 'Sabbath Day's Journey'), it was argued that 'if one who committed murder accidentally was allowed to undertake this journey of 2000 yards (ells?) on a Sabbath without violating the sanctity of the day, innocent people might do the same.' Compare also J. Lightfoot on Lk 24⁴⁰, and his quaint remark on the 'pleasant art [the Rabbis] have of working anything out of anything.'

This Rabbinical regulation, being obviously and often inconvenient, was not allowed seriously to hamper the movements of the Jews. They secured, legally, a wider freedom by a simple device, which was called the 'connexion of boundaries' or the 'amalgamation of distances.' If a man desired to travel more than 2000 ells on a particular Sabbath day he could adapt the law to his project by carrying, before that Sabbath began, to some point within the Sabbatical limit, food enough for two meals; he could then and there eat the one moiety and bury the other, and could thus establish a domicile (to use a modern expression, a 'place within the meaning of the Act'), from which he could date his journey on the coming Sabbath. Even this precaution was not *de rigueur*. He could, if he preferred, eye a tree or a wall at a distance of 2000 ells from the place of his actual abode and declare it his legal abode for the Sabbath—that is, his legal starting-point for his projected Sabbath journey, provided he used words sufficiently definite as to the tree or wall, and, as Schürer phrases it, 'did the thing thoroughly' (*HJP* II. ii. 122, quoting *Erubin*, iv. 7).

J. MASSIE.

SABBATICAL YEAR (including Jubile Year and Land Laws).—In this article several distinct topics are treated together, which are too closely related to one another to be dealt with separately without a good deal of overlapping. A clear summary statement of the position of the Sabbatical and Jubile years in the cycle of Hebrew sacred seasons will be found under the art. FEASTS AND FASTS.

The 7 years' period recurs at every stage of the legislation, but not always with identical provisions, or even with application to the same subject. The 50 years' term is first found in the Priestly Code, but it is applied to cases previously connected with the 7 years' period. Consequently it will be

* There is no necessary discrepancy between Lk 24⁴⁰ and Ac 112. In the former passage it is said that our Lord took out the disciples *τας τας* *Bethanias*, 'until they came within view of Bethany' (Blass, *NT Grammar*, 159 n. 4), which (Jn 11¹⁸) was 15 furlongs from Jerusalem. In the latter passage it is said that the disciples 'returned from the Mount called Olivet, which is nigh unto Jerusalem, a Sabbath day's journey off'—that is, from 5 to 6 furlongs. The Mount of Olives was a ridge about a mile long, and it is this and not Bethany whose distance is thus measured after Luke's manner (cf. 24⁴³), for the purpose of informing readers unacquainted with the locality. Bethany was on the south-east slope of the ridge, about a mile beyond the summit. It is unlikely that Luke intended to represent the Ascension as taking place either within or close to the village.

clearest to gather the whole material from the successive sources in such a form as to make comparison easy. Accordingly, the same letter is used to mark corresponding matter in the following paragraphs.

I. COMPARATIVE SUMMARY OF LAWS.—(i.) *The earliest Legislation*—E.—a. The 7 years' period is found in the Covenant Book Ex 23^{10a}, and among the Judgments Ex 21²⁻⁶ (cf. vol. i. p. 810).

b. In the former it is laid down as an obligation that every Hebrew owner of land should 'let it rest and lie fallow' in the 7th year. Hupfeld and Wellhausen apply this to the increase only, as though it was lawful to sow, but not to reap; but it is better, with Dillmann, Nowack, etc., to take it, as in our versions, as prescribing an entire cessation of all field work; for the two verbs in v. 11 'let drop (or 'release') and leave alone' (נָתַתָּ וְנָחָה), seem obviously in contrast to both verbs in v. 10 'sow' and 'gather.' The oliveyards and vineyards are to come under the same rule as the corn land, i.e. no work is to be done in them in the 7th year. The aim expressed is 'that the poor of thy people may eat.' And so stringent is the rule that, if all is not consumed by the poor, the remainder must not be garnered, but must be left for 'the beast of the field' to eat. It is not explicitly stated that the owner and his family were not to eat of the spontaneous growth of the fallow year, but the passage, taken by itself, rather suggests that they might not.

c. In Ex 21²⁻⁶ a 6 years' term is fixed as the normal period during which a Hebrew could be compelled to serve as a slave. In the 7th year he could demand his freedom (see, further, art. SERVANT, and the *Oxf. Hex.* i. 55).

d. Neither in connexion with the fallow for the land nor with the emancipation of the slave is there any clear indication that the 7 years' period was fixed, beginning and ending simultaneously all over the country. In the second case, of the slave, this hypothesis is practically ruled out as impracticable, and in the case of the fallow the natural interpretation of the language is that each owner would reckon the term independently of others, and indeed that different portions of his holding would lie fallow in different years, so that, e.g., if his corn land did not require his labour, he would still have his vines and olives to attend to, and *vice versa*. The analogy of the weekly sabbath is too precarious to be allowed much weight.

e. The earliest legislation has no laws as to the inheritance, sale, or redemption of land.

(ii.) *The Deuteronomic Code*—D.—a. The 7 years' period occurs twice in Dt 15, in vv. 1-3 and vv. 12-18, and a third time in 31¹⁰⁻¹³.

b. No mention is made of any custom of a periodical fallow, but an ordinance appears 15¹⁻³ for the first time (reflecting the life of times when the purely agricultural stage has been passed), which provides for the remission, or, as some hold, the suspension of debts due to a creditor from 'his neighbour and his brother,' though debts may be exacted 'of a foreigner.' The motive of the law is compassion for the poor and unfortunate among the Israelites. And the provision in 31¹⁰⁻¹³ that 'at the end of 7 years, in the set time of the year of release' (נָתַתָּ, from נָתַתָּ 'let drop' [RVm 'release'], Ex 23¹¹), in the 'Feast of Booths,' a public reading of the Deut. Law-book should take place, indicates that the sanction for the ordinance is to be found in the great principles of love to God and man reiterated in it.

c. A Hebrew slave (15¹²⁻¹⁸) may go free after serving for 6 years.

d. The period, in the last case, obviously begins with the entrance of the slave upon servitude; but in the former, it is clear, from the allusion to the 'proclaiming' of 'J''s release,' that the close of

each period is to be simultaneous over all the country, and to be publicly announced.

e. Except for the warnings against disturbing a neighbour's 'landmark' (19^{14 27¹⁷}), no Deuteronomic law bears on the ownership of land.

(iii.) *The Priestly Code*—P.—a. Not only is the 7 years' period found in this, the latest stratum of Hebrew legislation, but a 50 years' term is added to crown the calendar (Lv 25).

b. Every 7th year, and in addition every 50th year, is to be kept with strictness as a fallow year, the crops being neither sown at the beginning nor reaped at the close, the vines not pruned and the grapes not gathered. The idea must be that no storing, or systematic harvesting operations, was to go on, but not that the crops that might grow of themselves were to be left untouched, for it is added, 'the sabbath of the land shall be for food for you; for thee, and for thy servant and for thy maid, and for thy hired servant and for thy stranger that sojourn with thee; and for thy cattle, and for the beasts that are in thy land, shall all the increase thereof be for food.' So it was lawful to go into the fields and oliveyards and vineyards, and gather food as it might be wanted from the spontaneous yield of the land.

This view is maintained by Dillmann, Nowack, and the Jewish interpreters. Still it is strange that in vv. 20-22, where the problem of food supply is dealt with, no allusion is made to the right conferred in v. 22 (cf. v. 12). It might be conjectured that v. 22 was added to v. 20 to modify a stringency regarded as impracticable.

All mention of the poor has dropped out, and the ordinance is expressly based on the religious principle that the land, as well as the people, should keep Sabbath unto J'. Neither is the arrangement of Deuteronomy recalled for the remission of debts, though the prohibition of usury is repeated from Dt 23¹⁹.

c. A provision for emancipation of slaves occurs vv. 20-24, but in connexion with the jubile, in which year every Hebrew slave is to go free with his family. This can scarcely be in addition to, but rather in substitution for, the earlier provisions; for (1) if the law of emancipation at the 7th year was in force, it would be unnecessary to order it in the 50th; and (2) the later law in another point abrogates the earlier, as it prohibits lifelong bondage, and leaves no room for such a riveting of the ties of slavery as was involved in the archaic ceremony of the boring of the ear. Moreover, we find again the express mention of a religious principle as the motive for the law, viz. that all Israelites are J''s servants, and therefore cannot be permanently owned by another. V. 45^a, a new provision is also added, that a Hebrew enslaved to a 'stranger' (גֵּר) may be redeemed by a relative, the price varying with the distance of the jubile. Curiously, no such provision exists in the case of a Hebrew enslaved to a Hebrew.

d. The 7th year in Leviticus becomes for the first time a true sabbatical year, a season to be simultaneously observed as a fallow year in which no field work was to be done under a directly religious sanction. Moreover, the difficulties of such observance being apparent, doubters are encouraged (vv. 20-22) by an assurance of Providential aid in the shape of an unusually abundant yield in the 6th year. The produce is to be enough for 3 years, 'until the 9th year, until her fruits come in.' The reason is that, after the fallow of the 7th year, the ground is so hard that a second or third ploughing is necessary in the 8th year before sowing can take place, and consequently only the summer-sown crops of the 8th year come to anything, and they are not available for use till the beginning of the 9th year, the reckoning of the years being, of course, in this context from autumn to autumn.

It is not therefore necessary to reject 'until the 9th year,' as Dillm. proposes, on the ground that the '3 years' would naturally be the 6th, 7th, and 8th years, and that the allusion to the 9th year has been introduced because an editor referred the passage to the exceptional case of the 49th and 50th years when two fallow years followed one another, the 7th sabbatical year and the jubile year. Yet it is natural to conclude from the language of Lv 25, as Kalisch does, that the intention of the ordinance was that, after 7 sabbatical periods had passed, the 50th or jubile year should be intercalated as an additional fallow year, immediately after the 7th sabbatical year, and that a new sabbatical period should begin with the 51st year. This was also the view of the Jewish interpreters. But see, further, below II. (iv.).

e. The purchase and redemption of land is not alluded to in the earlier codes (but cf. Ezk 46^{17b} for allusion to some such custom), but is here treated with some fulness (vv. 8-10, 12-16, 22-34). The provisions may be enumerated as follows:—(1) The freehold of agricultural land could not be sold outright, for at the 50th or jubile year every piece sold returned to the owner or his representatives. The utmost that an owner desirous of selling could do was to grant a lease of the property, the term of the lease to expire at the next jubile, however near that might be. The purchaser only obtained the usufruct for the time being, and the price was to be regulated by the number of the crops due before the jubile. (2) In every case of a man being forced to sell part of his patrimony, it was the duty of his kinsman (v. 2^a) either, according to the ordinary interpretation, to redeem the land, i.e. from the purchaser (who is not named), or, according to the attractive theory put forth by Buhl (*AJTh* i. 738), to exercise a right of pre-emption. (3) If there was no kinsman to effect the *gē'ullah*, still, if the original owner at any time became rich enough, he could buy it back at the selling price, less the proportion belonging to the years since the sale (v. 25^a). (4) House property in a walled city might be sold outright without returning to the vendor at the jubile (v. 29^a); but he was given the right of redemption during the one year after the sale. (Maimonides and others mention a tradition that the term 'walled cities' is restricted to those that were such in Joshua's time). (5) House property in a village was subject to the provisions, see (1)–(3) above, attaching to agricultural land. (6) The Levitical possessions were subject to special provisions; (a) house property in their cities was to be saleable, as far as the leasehold value went, redeemable at any time, and restored at the jubile; and (b) the farm land round their cities was to be altogether unsaleable and inalienable. (7) The case of a field devoted to J^h is treated in Lv 27¹⁶⁻²⁴. The field was to be valued at once, and might be redeemed at that price, with a fifth added, up to the jubile, after which it passed to the priest. If the field had been already sold, then no redemption was possible, and the gift became effective and final at the jubile. If the field was not part of the donor's own patrimony, but a purchased (= leased) portion of another man's possession, then the gift could only involve the usufruct till the jubile, when the property returned to the original owner.

Summary.—Three stages may thus be distinguished. (1) In Exodus a 7th year fallow for the land and a 7 years' term for Hebrew slaves is required, without any simultaneous reckoning of either period throughout the country. (2) In Deuteronomy a simultaneous remission of debts replaces the fallow year, the term of service for slaves remaining the same. (3) In Leviticus a simultaneous 7th year fallow is ordered; remission of debts is dropped in favour of a general prohibition of usury; emancipation at the 50th year is all that remains of the 7 years' term of service; and a whole series of provisions is added on land and house property.

The Analysis of Lv 25.—That this chapter contains earlier and later elements is generally admitted. Dillmann, Kuenen,

and Nowack consider that there are no sure grounds on which to discriminate these. Driver and White ('Leviticus' in *SBOT*) treat the jubile for the land as original in the Holiness legislation (Ph), but ascribe to a later hand the extension to persons. Wellhausen thinks that the first draft placed the freeing of slaves and redemption of land in the 7th year, and, if Dillmann criticizes this reconstruction as involving an unworkable arrangement, Holzinger points out, on the other hand, that the priestly scribes were not always very practical. Another solution is offered in the *Oxford Hexateuch*, ii. 177, on Lv 25. It is there suggested that the regulations on the sabbath year, vv. 2-7, 12-22, belong to the first draft of Ph; that the block of material on the jubile, vv. 8-17, which now interrupts the former, is itself composite, as is shown (1) by the number of doublets, and (2) by the recurrence of phrases which recall Ph; that a second draft of Ph underlies this passage and also the remainder of the chapter; that in this second draft the emancipation of slaves and redemption of land, and possibly a 50 years' term, were included; and that the rest, embracing all the clauses in which the term 'jubile' occurs, is by a later priestly editor. Addis and Baentsch take a similar view. The blowing of the trumpets on the 10th day of the 7th month is thought by many to be a provision earlier than the appointment of the same day as the solemn day of atonement, so that v. 26 will be later than v. 24.

II. HISTORICAL CHARACTER.—(i.) *The Seventh Year Fallow.*—The custom of a periodical fallow is so common a feature in agricultural practice that we should almost require evidence to prove that there was nothing of the kind amongst the Hebrews from the beginning of their settled life; and the 7 years' period, which is still observed in Palestine and Syria, has every argument from analogy in favour of it. Moreover, the fact that the Covenant Book in Ex 23 is throughout directed to defining and regulating existing customs, and bears no mark of introducing any novelty (cf. the prob. allusion in Jer 17⁴ [Heb.]; see Driver, *Deut.* 174), weighs in the same scale. The silence of the earlier historical books must be regarded as entirely natural if the fallow was not simultaneously observed. It would not be a feature that would call for mention. It is otherwise with so serious an interruption of the common life as would be occasioned by the observance of the same year as a universal fallow year, so that all workers on the land would be keeping holiday for 12 months. Moreover, the tradition at the Exile explicitly denies the observance of the sabbath years in the pre-exilic times (2 Ch 36²¹, cf. Lv 26^{34f. 43}). In fact, the first historical reference to the sabbatical year as an institution within the range of practical politics is in Neh 10³¹, where it occurs among the items included in the covenant that was entered into at the prompting of Nehemiah. Even there the allusion is not quite certain. The language 'leave (שָׁקַט) = 'let lie fallow,' Ex 23¹¹) the seventh year, and the exaction of every debt,' recalls the law of the fallow in Exodus; but the clause is elliptical and far from explicit, and the following words, which recall Dt 15², make it doubtful whether the remission of debts in the 7th year is not the institution in view. It is not, in fact, till we reach the Greek period that we come upon undisputed references to the observance of the sabbatical year (Jos. *Ant.* xi. viii. 26): for Maccabean times, see 1 Mac 6^{40. 53}; Jos. *Ant.* xiii. viii. 1, xiv. x. 6, xv. i. 2; *BJ* i. ii. 4; and for the Herodian era, Jos. *Ant.* xiv. xvi. 2, xv. i. 2; Philo in Eus. *Præp. ad Ev.* viii. 7; and Tac. *Hist.* v. 4.

(ii.) *The Emancipation of Slaves at the Seventh Year.*—This is once referred to in Jer 34¹⁸,* where the custom is shown to be more honoured in the breach than in the observance, and to be most difficult to enforce. The postponement of liberation to the 50th year may be another witness to the same fact.

(iii.) *The Remission or Suspension of Debts.*—

* Note here the techn. phrase קָרָא לְדֹרֵךְ ('proclaim liberty'), vv. 8, 15, 17; also Is 61¹ of captives (cf. Ezk 46¹⁷ the 'year of דִּרְדֹר', either of the jubile, or of the year of emancipation of slaves), and Lv 25¹⁰ of the jubile. [S. E. D.]

Unless Neh 10³¹ refer to this, history is silent as to the observance of any such custom.

(iv.) *The Redemption of Real Property*.—That there was some provision in law or custom against alienating land is clear from the instance of Naboth, and the institution of the *ge'ullah*, Jer 32⁶, Ru 4. An obscure allusion in Ezk 7¹² may be taken in the same sense; and it is, of course, possible that the 'year of liberty' in Ezk 46¹⁷ refers to the 50th year as an institution already known. Neither is there anything impracticable in the provisions themselves. See for parallels among other nations, Maine, *Village Communities*, 81-88; *Early Hist. of Institutions*, 81 f., 100 ff.; von Maurer, *Dorferfassung*, i. 304 ff. This kind of tenure is known as the 'shifting severalty.' Strabo speaks of the Dalmatians redistributing land every 8 years, a practice which would support Wellhausen's theory that the term was originally 7 years and not 50. The denunciations of land-grabbing in Isaiah and Micah show that no such law was operative even if in existence. Moreover, no single undisputed historical allusion to the jubile exists, and the dating of the 3 sabbatical years that can be securely traced in B.C. 164-163, 38-37, and A.D. 68-69 leaves no room for the intercalation of the jubile year. For this reason, and because of the difficulty of the two fallow years in succession, the text has been strained to permit the identification of the 7th sabbatical year with the jubile year. The evidence from the literature is therefore rather against the jubile year having ever been historically observed. Neither is the anthropological evidence such as to rebut this presumption.

The term *jubile*.—Nowack gives a summary of interpretations, and refers to two essays by Kranold and Wolde (Gött. 1887) for a fuller account; but the *Oxf. Heb. Lex.* mentions only that which he selects as the best, and which is supported by the Targum on Ex 19¹³ and Jos 6⁵, and by Phœnician inscriptions, viz. *ḵḵ* = 'ram.' It is used both in combination, as Jos 6⁴, and alone, as Ex 19¹³, for a 'ram's horn,' and lastly stands as a designation of the 50th year, ushered in by trumpet blasts.

LITERATURE.—Treatises on Heb. Archaeology by Keil (Eng. tr. ii. 10-20), Nowack, and Benzinger; Ewald, *Antiquities*, 369-380; Schürer, *HJP* i. 1. 40 ff.; Dillm., *Driver-White*, Kallisch, Addis, Baentsch, and *Oxf. Heb. Lex.* on Lv 25; Mishna, *Roeh ha-shana* i. 1, *Shebi'ith* vi. 1, 2, 5, 6.

G. HARFORD-BATTERSBY.

SABBEUS (Σαββαῖος), 1 Es 9²⁴ = Shemaiah, Ezr 10³¹.

SABI (Β Τωβείτ, Α Σαβεί, AV Sami), 1 Es 5²⁸ = Shobai, Ezr 2⁴², Neh 7⁴⁵.

SABIAS (Σαβίας).—A chief of the Levites in the time of Josiah, 1 Es 1⁹, called in 2 Ch 35⁹ HASHABIAH.

SABIE (Β Σαβείη, Α Σαβίη, AV Sabi).—The children of Pohereth-hazzebaim (AV of Zebaim), Ezr 2⁶⁷, Neh 7⁵⁹, appear as 'the sons of Phacereth the sons of Sabie' in 1 Es 5²⁴.

SABTA (סבתא) or **SABTAH** (סבתה).—Son of Cush, Gn 10⁷ (Α Σαβαθά, 1 Ch 1⁹ (Β Σαβάρ, Α Σαβαθ, Luc. Σαββαθά). Glaser (*Skizze*, ii. 252) professes himself satisfied with the identification of this place with Dhu 'l-Sabtā, mentioned by the geographer Al-Bekri (i. 65), who quotes a line of an early poet, in which this is mentioned by the side of Al-Abatir, in the dwellings of the Banu Asad, probably in Yemamah. This identification is, however, of very small value; for the word *Sabtāu* means either 'a rock' or 'a desert,' and Dhu 'l-Sabtā therefore 'the place with the rock,' or 'the place with the desert,' whence it is not even certain that the poet quoted really meant it for a proper name. Moreover, there is no sign of such a place ever having been of importance. Hence the conjecture that it was to be identified with Sabat or

Sabbata in the Gulf of Adulis (Ptol. iv. vii. 8) is much more probable. Other conjectures made by ancient and modern scholars are given in Ges. *Thes.*, the *Oxf. Heb. Lex.*, and the Commentaries.

SABTECA (סבתקה, Sam. סבתקה).—Son of Cush, Gn 10⁷ (Α Σαβακάθ, Luc. Σαββακάθ), 1 Ch 1⁹ (Β Luc. Σαββακάθ, Α Σαββακάθ).—The identification of this place with Samydake in Carmania (Steph. Byz., ed. Westermann, p. 246), originally suggested by Bochart, has been renewed by Glaser (*Skizze*, ii. 252). There is, however, nothing in favour of this supposition, except the possibility that the genealogist may have been misled by the similarity of the name to Sabtah. Early critics guessed various places in Africa, while some have even supposed a person rather than a place to be meant. The termination *-ka* has an appearance of being Indo-Germanic, as also has the penultimate syllable. In that case the name probably meant 'sevenfold' (*saptaka*), Heptapolis. Some other conjectures are quoted by Gesenius, *Thes.*, and Dillm. *Gen. ad loc.*

D. S. MARGOLIOUTH.

SACAR (סַקַר 'hire,' 'reward' [cf. the name סַכַר ISSACHAR]).—1. The father of Ahiam, one of David's heroes, 1 Ch 11³⁵ (Β 'Αχάρ, Α Σαχάρ) = Sharar of 2 S 23³, where 'Sharar the (H)ararite' appears in B as 'Αρᾱ Σαράουρ' and in A as 'Αρᾱδ 'Αραουρ'. The reading of B here may have arisen, by transposition of letters, from a Heb. original סַקַר הַרָרִי, and the name *Sarar* should probably be read in both passages. 2. The eponym of a family of gatekeepers, 1 Ch 26⁴ (Β Σαχάρ, Α Σαχάρ).

J. A. SELBIE.

SACKBUT (סַקְבֻט Dn 3⁵, סַקְבֻט 37^{10, 15}; LXX and Theod. σαμβύκη, Vulg. *sambuca*, Wyc. 'sambuke,' Cov., Bish. 'shawmes,' Dou. 'doulcimer,' Gen., AV, RV 'sackbut').—The Gr. σαμβύκη (which Ges., Buhl, Driver, etc., believe to be derived from the Aram.) was a stringed instrument (see vol. iii. p. 461^a). The Vulg. *sambuca* is no doubt a translit. of the Gr.; but since *sambuca* may mean 'made of the elder-tree' (from *sambucus*, the elder-tree), the name came to be used for any stringed instrument made of that wood. In Eng. the 'sambuke' had the same general application. Thus Ascham, *Toxophilus*, 26, 'And whatsoever ye judge, this I am sure, that lutes, harps, all manner of pipes, barbitons, sambukes, with other instruments every one, which standeth by fine and quick fingering, be condemned of Aristotle, as not to be brought in and used among them which study for learning and virtue.'

The Geneva translators used the more precise 'sackbut' (possibly, however, from an impression that it was a form of the same word). But the 'sackbut' is unsuitable, for two reasons: it is a wind instrument ('a brass trumpet,' says Chappell, 'with a slide like a modern trombone'); and, whereas the σαμβύκη was particularly shrill, the sackbut had a deep note. Cf. Drayton, *Polyolbion*, iv. 365—

'The Hoboy, Sagbut deepe, Recorder, and the Flute';

and Bunyan, *PP* 235, 'He and his Fellows sound the Sackbut whose Notes are more doleful than the Notes of other Music are.' The origin of 'sackbut' is doubtful. Skeat traces it to the Spanish *sacar* to draw out, and *buche* a box, used familiarly of the belly, and thinks that Webster is right in suggesting that the name was given to the instrument because it exhausts one's wind in blowing! Middleton shows how it lent itself to punning, *Spanish Gypsy*, ii. 1—

'*Alt.*—You must not look to have your dinner served in with trumpets.

Car.—No, no, sack-butts will serve us.'

J. HASTINGS.

SACKCLOTH (שַׂק *sak*, σάκκος, *saccus*) was a coarse material woven from goats' and camels' hair, and hence of a dark colour, as we see from Rev 6¹² 'the sun became black as sackcloth of hair' (σάκκος τριχίνος); cf., for the colour, Is 50³, Sir 25¹⁷ 'her countenance darkeneth like sackcloth,' reading σάκκος with B; also קר 'a mourner,' lit. one who wears dark soiled garments (RS¹ 414, n. 2). A similar material was called by the Romans *cilicium* from being prepared from the hair of the black goats of Cilicia, hence Jerome's rendering *saccus cilicinus* (Rev 6¹²). From the fact that sacks were made of this coarse haircloth, J in Genesis (42^{20-27, 33}) uses שַׂק as a synonym of שֵׂמֶרֶת; hence through the medium of Greek and Latin our 'sack' and 'sackcloth,' though haircloth is the more appropriate rendering. It was also used for saddlecloths (Jos 9⁴).

From the analogy of the evolution of dress among the Egyptians—for which see Erman (*Egypt*, 200 ff., with numerous illustrations)—we may infer that the dress of the Hebrews was originally, as in Egypt, a scant loin-cloth of *sak*, tied in a knot in front. This continued to be the distinctive dress of slaves, captives, and such as wished to appeal to the pity of superiors (see the instructive episode 1 K 20^{10, 12}). To put on sackcloth is nearly always קָרַן 'to gird sackcloth' about the loins (*loc. c.*, Gn 37³⁴, 2 S 3³¹, and oft.; קָרַן alone, Is 32¹¹, Jl 1¹³); to take it off was originally נָשַׁן 'to undo [a knot]' (Ps 30¹¹, Is 20²). The linguistic evidence is thus entirely against the current idea that the sackcloth of the OT was worn in the form of a sack 'with an opening for the head, and side apertures for the arms.'

Religious usages are proverbially conservative, and Hebrew customs were no exception (see, e.g., Jos 5²⁰); hence it is not an unlikely supposition (Schwally, *Das Leben nach d. Tode*, 12 ff.) that the haircloth cincture continued to be regarded as the garment most suitable for religious ceremonies long after it had disappeared from ordinary use. This is at least more satisfactory than the usual explanation that the wish to mortify the flesh led to the use of sackcloth in the frequent instances where it is associated with fasting as an outward and visible expression of penitence, or in cases where confession and supplication are combined, as indeed is most frequently the case (1 K 21²⁷, Neh 9¹, Jon 3⁶, Jth 4^{10a}, etc.). In most cases, even when not expressly mentioned, there was the accompaniment of ashes (Dn 9¹, Mt 11², Lk 10¹³) or earth (Neh 9¹) upon the head. Hence the author of Baruch speaks of putting on 'sackcloth of prayer' (4³⁰; see Comm. for alternative rendering). The extravagances of Jon 3⁶, Jth 4¹⁰, where even the cattle are clothed in sackcloth, are scarcely historical. In the latter passage the altar, also, is similarly covered (Jth 4¹¹). That the sackcloth in such cases was usually worn next the skin (שַׂק־עַל־הָעוֹר)—originally, as we saw, it was the only garment—even by women (Is 32¹¹, Jth 9¹, 2 Mac 3¹⁸), seems beyond doubt (see 2 K 6³⁰, Job 16¹³, which are often wrongly, as we think, taken to be exceptional cases).

Fondness for 'the old paths,' and the desire to furnish an object-lesson in simplicity of dress, as of life, in the midst of increasing luxury, are doubtless the reason that haircloth was the characteristic material of a prophet's dress (Zec 13⁴ RV; cf. Rev 11³ προφητεύουσιν . . . περιβεβλημένοι σάκκους). Elijah was distinguished by a mantle of hair (2 K 1⁸ RVm). John the Baptist's only garment, like that of his prototype, was of camels' hair (Mt 3⁴, Mk 1⁶). Isaiah, on a particular occasion, wore even the primitive loin-cloth of *sak* (20²).

The universal use of this black haircloth (שַׂק) as the appropriate dress of those mourning for their

dead probably has its root in the circle of primitive thought above referred to—the intention being to do honour to the disembodied spirit (cf. Schwally, *op. cit.*). It was worn not only in cases of private mourning (Gn 37³⁴, 2 S 3³¹ and oft.), but in lamentations over public calamities (Am 8¹⁰, Jer 48³⁷, La 2¹⁰, 1 Mac 2¹⁴). Further, just as prayer in this garb might avert threatened private bereavement (Ps 35¹³), so might it avert—when combined with humility and penitence—a great national misfortune (Jer 6²⁶, Jl 1¹³, Jth 4¹²). Both ideas are frequently combined—mourning for past calamities and prayer for their speedy removal (1 Mac 3⁴⁷, 2 Mac 2²⁶, also Am 8¹⁰, and other passages cited).

A. R. S. KENNEDY.

SACRAMENTS.—The word *sacramentum* (*sacrare* = 'to dedicate') originally meant 'something set apart as sacred, consecrated, dedicated.' As a technical legal term it was used of the sum which the two parties to a suit deposited in *sacro*, and of which the winner of the suit recovered his part, while the loser forfeited his to the *ararium*. Hence it came to mean the suit itself, *causa controversia* (Smith, *Dict. of Gr. and Rom. Ant.* ii. p. 958). *Sacramentum* was also used actively of the 'thing which sets apart and devotes.' As a technical military term it designated either the 'preliminary engagement' entered into by recruits, or (much more often) the 'military oath of obedience' to the commander. Under the Empire the *sacramentum* which soldiers were obliged to take to their *imperator* was often taken by subjects, whether citizens or provincials, to the emperor (Tac. *Ann.* i. 7, 8), in recognition of his *proconsulare imperium* throughout the Empire. From Horace (*Od.* ii. xvii. 10) onwards it is sometimes used of any 'oath or solemn engagement.'

The first appearance of the word *sacramentum* in connexion with Christianity may be called accidental. It occurs in a familiar passage in the frequently quoted letter (*Ep.* 96) of the younger Pliny to the Emperor Trajan. It was stated of the Bithynian Christians *quod essent soliti stato die ante lucem convenire carmenque Christo quasi deo dicere secum invicem, seque sacramento non in scelus aliquod obstringere*. There is not much doubt that the witnesses whom Pliny quotes referred to the obligation under which every Christian lies to renounce the devil and all his works, and of which the public service of the Church reminds him. Possibly the service to which allusion is made contained an express renewal of the baptismal pledge. That Pliny uses the word *sacramentum* to express this obligation or pledge is no more than an interesting coincidence. It was a natural word to use; and neither *jusjurandum* nor *promissum* would have expressed the meaning better. Yet Lightfoot is inclined to think that it means 'sacrament' in the Christian sense, and that Pliny has here 'confused the two sacraments,' the wording pointing to the baptismal pledge, while the context about the early hour and the stated day points to the eucharist (*Epp. of S. Ignatius*, vol. i. p. 52). It may be doubted whether the word *sacramentum* had as yet acquired among Christians any specially Christian meaning; and it is improbable that the Bithynian Christians used the word in a technical sense, or that Pliny uses the word because they had done so. The word is his, not theirs; and he employs it in the ordinary classical sense.

As a Christian term, *sacramentum* makes its first appearance in the Old Latin and in Tertullian. Both in Lat-Vet. and Vulg. it is sometimes used to translate μυστήριον. Cod. Bob. (k) has it Mt 13¹¹; Cod. Palat. (e) Lk 8¹⁰; Cod. Clar. (h) Eph 1⁹ 3² 5³², 1 Ti 3⁹ 16, Ro 16²⁵; Vulg. has it Eph 1⁹ 3² (not 4⁹ 5³², Col 1²⁷ (not 28), 1 Ti 3¹⁶ (not 9), Rev 1²⁰ 17⁷ (not 8).

But the more common rendering of *μυστήριον* is *mysterium*; and sometimes in consecutive verses first one word is used and then the other. In OT *sacramentum* occurs Dn 2¹⁸. 30. 47 48, To 12⁷, Wis 2²⁴ 6²⁴, in all which places LXX has *μυστήριον*. But *mysterium* is also found, sometimes side by side with *sacramentum* (Dn 2¹⁸. 19. 23. 30), even in the same verse (47). Tertullian uses *sacramentum* as the rendering of *μυστήριον* in passages where Vulg. has *mysterium* (1 Co 13², Res. 23; 1 Co 14², adv. Marc. v. 15; Eph 6¹¹, adv. Marc. v. 18). It is his usual word.

Three elements seem to have been at work in determining the Christian use of the word: (1) the original passive sense, 'a thing set apart as sacred'; (2) the active sense, 'that which sets apart,' especially an oath or pledge of fidelity; (3) the Greek term *μυστήριον*, to which it was regarded as equivalent. It is obvious that all these ideas coalesce very well respecting those rites which have been called sacraments, especially baptism and the eucharist.

But in the first instance the use of the term was very much wider. It was used to designate not only religious rites, but doctrines and facts. Almost any external form, whether of word or action, which conveyed or symbolized a religious meaning might be called a *sacramentum*. It will be worth while to examine some of the passages in which the word occurs in Tertullian and Cyprian.

Tertullian, after pointing out that even the heathen recognize avoidance of the public shows as the mark of a Christian, remarks that the man who puts aside the mark of the faith plainly denies the faith. *Nemo in castra hostium transit . . . nisi destitutus signis et sacramentis principis sui* (de Spect. xxiv.). Again, with regard to God's prohibition of idolatry, he says: *Hinc sacramento militans ab hostibus provocor. Par sum illis, si illis manus dederō. Hoc defendendo depugno in acie, vulneror, concidor, occidor. Quis hunc militi suo exitum voluit, nisi qui tali sacramento eum consignavit* (Scorp. iv.)? In both these passages we have little more than the Roman military oath used metaphorically of the Christian's allegiance to God. In *Apol.* vii. we get a stage further, when he calls the horrible rite, of which Christians were often accused, in which a child was killed and eaten, *sacramentum infanticidii*. It is in this treatise that the use of the word is specially frequent. In contending that Judaism, and therefore Christianity, is far more ancient than heathenism, he says: *ipsa templa et oracula et sacra unius interim prophetae scrinium sæculis vincit, in quo videtur thesaurus collocatus totius Judaici sacramenti et inde jam nostri* (xix.); where *sacramentum* seems to mean 'revelation,' or 'religion,' or 'dispensation.' It has a similarly indefinite meaning in the challenge respecting Christian abstinence from heathen temples and nocturnal rites: *omnem hinc sacramenti nostri ordinem haurite, percussis ante tamen opinionibus falsis* (xv.). In the plural the word is used of the doctrines of the Christian faith. Whence, he asks, did pagan philosophy get its doctrine of future rewards and punishments? *Nonnisi de nostris sacramentis* (xlvii.). OT types he calls *figurarum sacramenta* (adv. Marc. v. 1). In the treatise *de Baptismo* we reach the more definite use of the term. It opens with the words, *Felix sacramentum aquæ nostræ, quia ablutis delictis pristinae cæcitatibus in vitam æternam liberamur*. And so also of the eucharist: *Proinde panis et calicis sacramento jam in evangelio probavimus corporis et sanguinis dominici veritatem adversus phantasma Marcionis* (adv. Marc. v. 8). And again of both sacraments: *ad sacramentum baptismatis et eucharistiae admittens* (ib. iv. 34).

Cyprian seems to have learned from his

'master' to use the word sometimes in its classical sense, sometimes with a vagueness which was possibly deliberate, sometimes quite definitely of baptism and the eucharist. Of Christian martyrdoms he says: *O quale illud fuit spectaculum Domini, quam sublime, quam magnum, quam Dei oculis sacramento ac devotione militis ejus acceptum* (Ep. x. 2). So of a supposed betrayal of the Christian faith, he says: *divinae militiæ sacramenta solvantur, castrorum celestium signa dedantur* (Ep. lxxiv. 8). He calls the Passover a *sacramentum* (de Cath. Eccles. unit.). But it is not easy to define its meaning when he speaks of *ecclesiæ veritas et evangelii ac sacramenti unitas* (Ep. liv. 1), or, again, of *veritatis jura et sacramenta* (Ep. lxxiii. 20). Comp. *sacramenta celestia* (Ep. lxxiv. 4), a phrase which he uses several times. He says that *totum fidei sacramentum in confessione Christi nominis esse digestum* (Ep. xxx. 3); and that the Lord's Prayer contains many and great *sacramenta* (de Dom. Orat. 9); where 'doctrine' seems to be the meaning. In baptism, water and the Spirit are each of them called a *sacramentum*; and, as distinct from heretical baptism, those who receive the Church's baptism *utroque sacramento nascuntur* (Ep. lxxiii. 21). Immediately afterwards he uses *baptismi sacramentum* of the whole rite. So also of the eucharist he says: *Item in sacerdote Melchisedech sacrificii dominici sacramentum prefiguratum videmus* (Ep. lxiii. 3). He calls the consecrated wine *sacramentum calicis* * (de Lapsis, xxv.); and he appears to call the whole rite *sacramentum crucis*, when he says, *de sacramento crucis et cibum sumis et potum* (de Zelo et Livore, xvii.). On Cyprian's use of *sacramentum*, see an important note by E. W. Watson in *Studia Biblica*, iv. p. 253.

Augustine says that the bread and wine *ideo dicuntur sacramenta, quia in eis aliud videtur, aliud intelligitur* (Serm. 272). And again that *Signa cum ad res divinas pertinent, sacramenta appellantur* (Ep. cxxxviii.). But there must be resemblance between the two: *si enim sacramenta quamdam similitudinem earum rerum quarum sacramenta sunt non haberent, omnino sacramenta non essent* (Ep. xcvi.). Sacraments are *verba visibilia, sacrosancta quidem, veruntamen mutabilia et temporalia* (con. Faustum, xix. 16). *Accedit verbum ad elementum et fit sacramentum, etiam ipsum tanquam visibile verbum* (in Joh. Tract. 80). In one place he enumerates baptism, unction, the eucharist, and imposition of hands as sacraments† (de Bapt. con. Don. v. 28); in another he asks, *Quis novit Dei omnia sacramenta? Quid ait Apostolus? Si sciero omnia sacramenta, si habeam omnem prophetiam* (Serm. ad Caesar. eccles. plebem, 3). This last passage is specially interesting, because in Vulg. the word is not used [though Aug. testifies that Old Lat. read *sacramenta*]; it has, *si habuero prophetiam et noverim mysteria omnia* (1 Co 13²).

The general outcome is on the whole this, that the word *sacramentum* had two main uses, one very vague, and the other fairly definite. On the one hand, it might be used of anything, whether word, statement, or fact, which expressed

* In harmony with this idea Rabanus Maurus (de Cler. institutione, i. 24, 31; Migne, Pat. Lat. cvii. 316) makes baptism, unction, the body, and the blood of the Lord to be four sacraments, expressly counting the body and the blood as two. Paschasius Radbertus is said to do the same; but he speaks of *sacramentum* (not -ta) *corporis et sanguinis* (de Corp. et Sang. Dom. iii. 2, 4; Migne, cxx. 1273).

† Similarly in a passage which was quoted almost verbatim at the beginning of Art. 26 (=25) in the Articles of 1553: *Sacramentis numero paucissimis, observatione facillimis, significatione præstantissimis, societatem novi populi colligavit* (Christus), *sicuti est baptismus Trinitatis nomine consecratus, communicatio corporis et sanguinis ipsius, et si quid aliud in scripturis canonicis commendatur* (Ep. 64; cf. de Doct. Chr. iii. 9).

or implied religious truth. On the other, it was applied to certain Christian rites, not fixed in number, but understood to be few, of which the chief were baptism and the eucharist. No rite had a better claim to be called a sacrament than these two, which fully realized the ideas connoted by the term, and were instituted by the Lord Himself. But there were other rites, mentioned in Scripture and sanctioned by the Church, to which the term might rightly be given; and the rite which was commonly placed side by side with these two as being of almost equal rank was unction or chrism, which is generally applicable to all Christians and has at least the authority of apostolic tradition.

The number three was no doubt attractive; but still more so the number seven; and it is remarkable that a list of seven sacraments does not seem to have been made earlier than the 12th cent., when first Gregory of Bergamo (*de Euchar.* 14), and then Peter Lombard (*Sent.* IV. ii. 1) fix on this limit. It was adopted by Thomas Aquinas and stereotyped by the Council of Trent. But it is neither scriptural nor logical. Our choice lies between two and an indefinite number.* Scripture plainly marks out two. They were instituted by Christ, and He Himself ordained the outward visible signs for them. In whatever sense Christ may be supposed to have instituted any of the other five,—confirmation, penance, unction, orders, and matrimony,—He ordered no special sign for them; and it is rash to say more than that they are among the more important of the many rites to which the name of sacrament may be given.† For a discussion of any one of the seven see the separate articles in the dictionaries. But with regard to matrimony it may be here pointed out that the Vulgate rendering of Eph 5² *sacramentum hoc magnum est*, had considerable influence in causing marriage to be regarded as a sacrament.

There is a difference between the two great sacraments of the Gospel, in that baptism may be received once only, and the eucharist daily. The one confers an indelible character; the other does not. The same difference divides the other five. Confirmation and orders resemble baptism. Once baptized, always baptized; once confirmed, always confirmed; once a priest, always a priest. No one may have these rites repeated for himself; nor is there any need of repetition. But penance and unction admit of repetition. Matrimony belongs partly to the one class and partly to the other. No repetition of the rite is admissible between the same two parties; but when death has removed one, the other is free to have the rite repeated. Augustine writes thus of baptism and orders: *utrumque enim sacramentum est; et quadam consecratione utrumque homini datur: illud, cum baptizatur, istud, cum ordinatur: ideoque in Catholica utrumque non licet iterari* (*Con. ep. Parmen.* ii. 28). With regard to matrimony he says that its benefits are threefold, *fides, proles, sacramentum*; and he explains the last, *ut conjugium non separetur, et dimissus aut dimissa nec causa prolis alteri conjugatur* (*de Gen. ix. 12: cf. con. Faust.* xix. 23; *de Nupt. et Concup.* i. 11). See, further, Harnack, *Hist. of Dogma* [Eng. tr.], vi. 201 ff.

* Hugo de St. Victore, following the Augustinian definition of a sacrament as *rei sacræ signum*, enumerates some twenty or thirty lesser sacraments, as the ritual use of holy water, of ashes, of palm-branches, of the paschal candle, of bells, and of curtains; also certain acts, as making the sign of the cross, bowing the head or the knee; and certain utterances, as *Domine vobiscum*, *Alleluia*, the recitation of the *De profundis*, the *Subtlate*, the Creed, etc. (*de Sacramentis*, II. ix. 1-9; Migne, *Pat. Lat.* clxxvi. 471).

† The anointing of a king, the washing of the saints' feet, and the salt given in certain Latin rites to catechumens, have all been called 'sacraments,' e.g. in the Gelasian Sacramentary is a prayer *ut hæc creatura salis in nomine Trinitatis efficiatur salutare sacramentum*.

The question, whether there were sacraments under the OT, is, like the question of the number of sacraments under the NT, to a large extent a question of definition. What is meant by a sacrament? Definitions which exclude all but baptism and the eucharist of course exclude all OT rites. But those who, with Augustine, regard sacraments as essential to the life of a religious community must allow sacraments to the Jewish Church. Yet if, as he holds, the sacramental character of marriage consists in its indissolubility, then marriage, which is a sacrament under the Christian dispensation, was not a sacrament under the Jewish, which allowed divorce. The sacrifices and other rites were sacraments to the Jews, necessary then, but superfluous now. The difference is this: *sacramenta Novi Testamenti dant salutem; sacramenta Veteris Testamenti promiserunt Salvatore. . . . Mutata sunt sacramenta; facta sunt faciliora, pauciora, salubriora, feliciora* (*in Ps. lxxiii.* 2). Both, however, tell of the passion and resurrection of Christ, the one by promising, the other by commemorating (*con. Faust.* xix. 16).

LITERATURE.—Juenin (French Oratorian), *Commentarius Historicus et Dogmaticus de Sacramentis*, Lyons, 1717; Chardon, *Histoire des Sacrements*, Paris, 1746; Hahn (Protestant), *Doctrinæ Romanæ de Numero Sacramentorum septenariorum historica*, Breslau, 1859, and *Die Lehre von den Sacramenten*, 1864. Most comm. on the XXXIX Articles discuss the question and quote literature; also most Theological Dictionaries.

A. SACRIFICE IN OT TIMES.

i. DEFINITION AND NAME.—The rites which are comprehended under the name of Sacrifice, while exhibiting many forms and embodying an equal complexity of ideas, yet display certain constant features which invest them with a character of unity. Four notes will serve to elucidate their place and function in distinction from other manifestations of the religious life.

(a) Sacrifice belongs to the class of specifically religious acts, known as cultus or worship, by which man seeks to draw near to God. When religion is permeated by intense moral earnestness, greater importance is ascribed to character and conduct than to worship, yet even in the perfectly ethical religion of Christianity the cultus has survived as at once a cherished privilege and a sacred obligation. In those religions in which the ethical interest is weak or absent, the paramount interest attaches to the appropriateness and impressiveness of the ceremonial approach to the Deity. And among the elements of the cultus, by the consent of antiquity, the rite of sacrifice excelled and overshadowed all other ordinances in the efficacy of its appeal to the object of worship.—(b) Sacrifice is distinguished from other ordinances of worship in that it takes the form of the rendering to God of a material oblation. The elements of worship are at bottom two—forms which express the condescension of God to man, and forms which express the appeal of man to God. Of these the first has its familiar example in the proclamation

of the word of God, the second in prayer. And with prayer sacrifice manifestly has a close affinity. To the universal religious instinct of antiquity, however, it seemed that the spiritual offering of aspiration and petition was lacking in weight and efficacy. There was therefore associated with it, and so prominently as to eclipse it, the sacred rite in which the worshippers made over to God or shared with Him material things of a kind which ministered to human wants.—(c) Sacrifice is distinguished from other acts in which material things are consecrated to the service of God by the circumstance that the sacrifice is consumed in the service. The spirit of religious devotion finds many ways of expressing itself—e.g. in the consecration of buildings for worship, in gifts of lands, in personal service, and to such acts the term sacrifice may be popularly extended; but in strict usage it is desirable to confine it to the class of oblations which not only spring from self-abnegation but also perish in the using.—(d) The effect of sacrifice, in the intention of the worshippers, is by pleasing the Deity to enjoy communion with Him, and through union with Him to gain deliverance from threatened evil and possession of coveted good. This formula roughly expresses the end of religion, and, in view of the ancient and commonly accorded position of sacrifice as the staple religious observance, it follows that communion with a Divine being, with the security involved in such communion, must also be the end generally contemplated in sacrificial practice.

In the definition of sacrifice, an attempt has usually been made to formulate the contemplated end more narrowly. 'A sacrifice properly so called,' to quote one of the older examples, 'is the solemn infliction of death on a living creature, generally by effusion of its blood, in a way of religious worship, and the presenting of this act to the Deity, as a supplication for the pardon of sin, and a supposed means of compensation for the insult and injury thereby offered to His majesty and government' (Pye Smith, *Sacrifice and Priesthood*, p. 3). The fault of this definition is that it is framed with reference to the single class of placular sacrifices, and further, that it makes the questionable assumption that the placular sacrifices consistently embodied the idea that the slaughter of the victim furnished a satisfaction to outraged Divine justice. Among writers of the anthropological school, on the other hand, the specific effect of sacrifice is often defined as being to remove from the worshipper restrictions or taboos, and to invest him with a character of sanctity. Its efficacy, in short, is conceived as being of a magical kind,—the persons or things hallowed being, as it were, charged with an energy of physical holiness, and thereby fitted to move and act in the religious sphere. In this sense the following definition has been given in a recent monograph:—'Sacrifice is a religious act which, by the consecration of a victim, modifies the condition of the moral agent who performs it, or of certain objects with which it is concerned' (Hubert et Mauss, *Essai sur le Sacr.* p. 41). Natural, however, and widely vouched for as is the idea that the victim imparts a character or an infection of sanctity, the interpretation of the *modus operandi* of the rite has fluctuated too widely to justify us in treating the above conception as vital to the idea of sacrifice. The only constant element has been the belief that, however operating, it pleased the object of worship and secured Divine favour.

Summing up, then, we define sacrifice as an act, belonging to the sphere of worship, in which a material oblation is presented to the Deity and consumed in His service, and which has as its object to secure through communion with a Divine being the boon of His favour.

The names used to describe the rite do not suggest a definition, but serve to emphasize certain of the elements which have been noted. *Sacrificium* indicates that it is an act within the sphere of holy things, or in the region of the cultus, while the appropriation of such a general term to the particular ordinance illustrates what has been said of its central position in pre-Christian worship. The group of words derived from *offerre* (oblation, offering, Germ. *Opfer*), connect themselves with the ritualistic act of the presentation of the victim, and also adumbrate the interpretation of sacrifice as a gift (cf. *προσφορά*). *θυσία* indicates that the typical form involved the slaughter of a victim.

Sacrifice is commonly referred to in OT by specifying the two leading varieties—viz. the Burnt-offering (חֹלֶבֶת), and the Sacrificial Feast (עֶדְוָה). There are, however, two terms, which have a generic as well as a specific meaning. The *קָדָשׁ* (a gift) was

used in the older period as inclusive both of bloody and unbloody offerings (Gn 4⁵), but in P and later prophetic literature it has been appropriated to the particular and subordinate class of cereal offerings (Lv 2). The generic term of the later period is קָרְבָּן (קרבי) bring near, present, Ezk 20³⁸ 40³, Lv 13¹⁰. Another term which comes near to a generic significance is זֶבַח, an offering made by fire. It is used not only of animal offerings, but of the cereal offering (Lv 21¹), and even of the shewbread which was not consumed by fire, but became the portion of the priests (24⁷⁻⁹). In NT *θυσία* is often used generically (Mt 9¹³, Mk 9⁴⁰ etc.). Elsewhere *θυσία* is bracketed with another term to give a comprehensive description of sacrifice—*δύναμις καὶ θυσίας* (unbloody and bloody offerings, He 5¹⁸), *θυσίας καὶ προσφορὰς* (the same in inverted order, He 10²). The idea is also expressed by enumerating four varieties (10⁴).

In AV the term 'sacrifice' is of frequent occurrence, being inserted into the title of many of the varieties of offering which have a special Heb. designation (see art. OFFERING). In RV the usual practice is to employ it only where the Heb. text has קָרְבָּן or a derivative, thus giving it the connotation of the sacrificial feast, while 'oblation' is appropriated to offerings of a different type. Exceptionally RV retains it as translation of קָדָשׁ (Ps 118²⁷), and of קָדָשׁ (141²). In NT it renders *θυσία* and *θύω*, and is sometimes distinguished from the 'offering' as the bloody from the unbloody.

ii. THE ORIGIN OF SACRIFICE.—The controversies in which this subject has been so fruitful have passed through two phases. In the earlier period the keenly debated issue was whether the institution was of Divine appointment, or merely devised by man as an instrument for satisfying the wants of his spiritual nature. In recent times the human origin has usually been assumed, but only as a fresh starting-point for the discussion of rival theories as to the significance originally attached to the rite, its primitive form, and the stages in the evolution of sacrificial ritual.

A. The theory that Sacrifice was instituted by Divine authority, while strongly contended for by many Reformed theologians, cannot be sustained even on the basis of the biblical narrative. The argument on which chief reliance was placed was that supplied in the account of Abel's sacrifice (Gn 4³⁻⁵), and the apostolic reference to the reason of its acceptance by God (He 11⁴). There is, it is admitted, no record of a Divine enactment, but Divine sanction was known to support it from the period of Abel's sacrifice; and the hint that by faith Abel offered a more acceptable sacrifice than Cain, it is held, justifies us in concluding upon a Divine origin. For faith necessarily implies that there must have been a previous revelation touching the ordinance: a positive enactment is presupposed as its object, since without such it must have been, not faith but superstition. But it is at least as natural a view of the matter that Abel's faith was a venture of trust called forth by a general assurance of the Divine holiness and mercy. The real spring, perhaps, of the zeal on this side of the controversy is disclosed in the argument that a human origin is precluded by the apostolic condemnation of will-worship (*θυσιοπροσκύνησις*, Col 2²³), i.e. of the usurpation by the creature of the Divine prerogative in the sphere of holy things. Concede that sacrifice, the distinctive feature of OT worship, was of human devising and yet acceptable to God, and it became impossible to make good against Roman, Lutheran, and Anglican practice that no festivals or rites were lawful unless expressly ordained in Scripture. As the force of this dogmatic prepossession has considerably abated, it is easy to admit that the 'will-worship' condemned by St. Paul did not include usages shaped by piety and discovered in experience to be for spiritual profit.

For a complete statement of the arguments for a Divine origin, with accompanying refutations, reference may be made to Spencer, *de Ratione et Origine Sacrificiorum*, iv. 2. The subject is also very fully discussed by Fairbairn (*Typology of Scripture*, i. 286 ff.), who advances the additional argument that in making for our first parents 'coats of skins' (Gn 3²¹) God prompted and authorized the rite which serves as a covering of the soul. His position is, however, a mediating one, as he holds that, assuming even that it was merely suggested by the self-revelation of God, and afterwards approved, its essentially Divine origin may, apart from a positive enactment, be maintained.

In later times the case for the human origin has been strengthened. Not only does J manifestly treat it as the natural, self-evident mode of worship, but P ignores its existence altogether in pre-Mosaic times. In view of this conflicting tradition, and still more because of modified conceptions as to the range of the authoritative in Scripture, there has been a growing indisposition to use the scriptural material as a basis for a dogmatic pronouncement. The theory of a Divine institution, it should be further said, stands or falls with the theory of a primitive revelation, and this theory has even in theological schools been very generally abandoned. The only sense in which the Divine origin can be held is that, by creating man for religion, God is the author of the institution in which the religious sentiment found ancient and universal expression.

B. The theories which ascribe to sacrifice a human origin may

here be briefly outlined, inasmuch as, while operating mainly with general anthropological material, they seek confirmation to some extent in the biblical sacrificial system. These theories may be best grasped in accordance with the views which they presuppose as to the primitive form of religion, and by which, it may be added, they must mainly be judged.

(1) In the first place, we meet with two theories which rest on the assumption that the religion of primitive man was a monotheism. Either by way of intuition, or as the result of reflexion on the world and man, it is supposed that the human mind had acquired a knowledge at least of the unity and of the cardinal attributes of God. Under the impression of this knowledge man may be supposed to have gone on to shape sacrificial rites, and that from either of two motives. (a) *The Expiatory theory* is to the effect that man, conscious of sin and of the punishment which it merits, substituted an animal victim which should endure the penalty due to himself, and so make his peace with God. This interpretation of the rite, it is true, has usually been identified with the advocacy of a Divine institution, but it at least holds its place in the popular mind—apart from any question of origin—as furnishing the explanation of the age-long searching after God through the ritual of the slaughtered victim and the smoking altar.—(b) *The Homage theory of Sacrifice* has been more favoured by those writers who regard the institution as a natural outgrowth from a primitive monotheism. On this view man was impelled to seek closer communion with God, not out of a sense of guilt, but rather out of a desire to acknowledge his dependence and profess his obedience. To give expression to these devout sentiments he fell back on the language which is more powerful than speech—the language of action (Warburton, *Dis. Leg.* iv. 4). 'To such men (Cain and Abel) there came thoughts of one who is ruling them as they rule the sheep, who in some strange way makes the seeds grow which they put into the ground. . . . How shall they confess Him, and manifest their subjection? Speech, thanksgiving are not the most childlike way of testifying homage. Acts go before words' (Maurice, *Sacrifice*, p. 6).

The fundamental objection to the above two theories is that they attribute to primitive man a theology which it is hard to associate with the childhood of the race. The Expiatory theory not only presupposes a primitive knowledge of God transcending the thoughts of childhood, but it credits man with a sense of sin, and with a valuation of death as the wages of sin, which belong to a later period of spiritual development. Moreover, the theory conflicts with the preponderantly joyous character of early sacrifice. The Homage theory is attractive to spiritual and philosophical minds when seeking a justification for sacrifice, but can hardly be supposed to have originated it.

(2) A second group of theories is connected with the assumption that the deities of primitive man were beings of a low anthropomorphic order—whether nature-spirits, or ancestral ghosts, or fetiches. From this point of view it naturally seems that the worshipper has somewhat to offer which his Deity needs and will gratefully accept. How man ministers to this need, and how his ministering proves effectual, may be conceived in various ways suggested by examination of the possible motives.

(a) *The Gift theory* has it that the offerings were viewed as presents, and that the offerer reckoned on their being received with pleasure and gratitude. A chief or a king is approached with gifts, and the gods expect the same. The currency of this interpretation in classical antiquity is vouched for by Cicero. 'Let not the impious dare to appease the gods with gifts. Let them hearken to Plato, who warns them that there can be no doubt of what God's disposition toward them will be, since even a good man will refuse to accept presents from the wicked' (*de Leg.* ii. 16). In the older literature it is maintained by Spencer, who thinks it self-evident that this was the idea cherished by man in his primitive simplicity (ii. 762). Tylor and Herbert Spencer, though differing as to the primitive object of worship, find the origin of sacrifice in the idea of a gift. According to the latter, 'the origin of the practice is to be found in the custom of leaving food and drink at the graves of the dead, and as the ancestral spirit rose to divine rank the refreshments placed for the dead developed into sacrifices' (*Principles of Sociology*, § 139 ff.). Among the older writers it was commonly held that such an account of the origin of sacrifice could not be accepted in view of the place which it fills in the system of revelation (Bähr, *Synbolik*, I. p. 276); but within the last generation it has come to be regarded as by no means axiomatic that value implies dignity of origin. A more forcible objection is that the blood, which figures so prominently in sacrificial ritual, can scarcely have been selected as a desirable gift. And this criticism is effective in so far as it compels the admission that the whole system of sacrifice has not been shaped by the idea of the gift. There is, besides, reason for holding that the fundamental conception, while akin to that already stated, is more definite and suggestive.

(b) *The Table-bond theory* exchanges the general conception of a gift for that of a meal of which the Deity partakes in company with the worshippers. The germ of the theory is to be found in Sykes, who traced the efficacy of sacrifice, which is commonly a joint-meal, to the fact that 'eating and drinking together were the known ordinary symbols of friendship, and were the usual rites of engaging in covenants and leagues' (*Nature of Sacrifices*, p. 75). On this view sacrifice has more virtue than a mere gift; it knits the god and the worshippers together by the bonds created by the interchange of hospitality. In the hands of W. R. Smith (*RS* p. 260 ff.) the theory was developed

by the addition that the Deity was united to the worshippers, not merely because of His gratification, but because a common meal physically unites those who partake of it. Whether this latter conception of the *modus operandi* of the meal be primitive is open to doubt, but in view of the materials and form of early sacrifice the conclusion seems irresistible that the original idea of the worshippers was to gratify their God, and strengthen their position in His favour, by joining with Him in the feast.

(c) *The theory of a materialistic sacramental communion* is a special development of the last. The hypothesis starts from the observation that at certain stages of civilization religion takes the form of animal-worship, or of the reverence for animals which are believed to share along with man in the Divine nature. At this stage, also, it happens that the sacred animal, which is commonly proscribed as food, is on solemn occasions made to furnish the material of a sacrificial meal. In other words, there is occasionally permitted what has been bluntly described as 'eating the god' (Frazer, *Golden Bough*). The motive for this is suggested by a widespread idea of physical virtue. In eating an animal or a human being the savage is supposed to incorporate 'not only the physical, but even the moral and intellectual qualities which were characteristic of that animal or man.' Similarly it was easy to believe that, if the Divine life resided in a group of sacred animals, a particle of the precious deposit would be distributed among all the recipients, and incorporated with their individual life (*RS* p. 313). As to whether we may regard as primitive the totemistic conception of the Divine-human affinity of animals, and of the assimilation of the Divine life through eating the totem, there is grave reason for doubt. The totemistic theory of the origin of worship has been widely propagated through the brilliant and learned monograph of W. R. Smith (*Journ. Philol.* ix. 75 ff.), and its fascinating exposition by Jevons (*Introduction to the History of Religion*, 1896); but the main body of English anthropologists refuse to regard it as primitive, while in France the hypothesis has been subjected to close and learned criticism (Marillier, 'La place du Totémisme dans l'évolution religieuse,' in *Rev. de l'Hist. des Religions*, 1897-98). Totemism seems most intelligible when viewed as formed under the play of savage thought or misconception, and as intruding upon and overrunning earlier forms of worship which found a god in nature or the spirits of men.

The theories above mentioned assume that sacrifice was directly called into existence by the religious idea. Another possibility is that the slaughtering of animals or men came to awaken awe and misgivings in the breast of the savage, and that he sought to reassure himself by a procedure which in vested such acts with a religious character and sanction.

Amid this mass of speculation the most certain conclusion seems to be that sacrifice originated in childlike ideas of God, and that the fundamental motive was to gratify Him by giving or sharing with Him a meal.

iii. SEMITIC SACRIFICE IN THE PRE-MOSAIC PERIOD.—For the period between the dim region of origins and the consolidation of Israel as a nation a certain amount of material is professedly contributed in the patriarchal narratives of J. The representation given is that sacrifice originated in the first family when the bloody offering of Abel was accepted (Gn 4th); that Noah offered burnt-offerings after his deliverance (8th); and that by Abraham and his line it was practised under a variety of forms and with some diversity of ritual. The chief occasions were times of meeting with God, and other solemn moments of life: the kinds of offering in vogue were the Peace-offering (Gn 31st), the Burnt-offering (22nd), the Covenant Sacrifice (15th), and the Libation (28th); the sacrificial material consisted of clean beasts and fowls (8th), especially cattle, goats, sheep, and pigeons (15th). Human sacrifice, it is made known to Abraham, is not required by God (22nd). It is also recognized that sacrifice is practised outside the pale of the chosen line (Ex 18th, cf. Nu 23rd).

That the kinds of sacrifice thus distinguished, the material of sacrifice, and other features, correspond to the usage of an early period in the history of Israel is quite certain; but the references do not carry us back to the earliest phases in the evolution of Semitic sacrifice. Between the primitive form of sacrifice and the comparatively complex and elevated cultus mirrored in these narratives there lies a course of development on which attention has been recently focussed owing to the researches of Wellhausen (*Reste arabischen Heidenthums*) and of W. R. Smith (*RS*). For the re-discovery of the stages and factors of this de-

velopment, reliance is placed on the survivals from heathen Arabia, on the vestiges of Phœnician and other Semitic cults, and especially on the gift of divination which wrests from the phenomena of the matured institution a confession as to the course of its earlier life-history. The special features of Smith's treatment are his insistence on the connexion of primitive sacrifice with totemism, and his scheme showing the derivation of the varieties of sacrifice from the alleged primitive form, while he also supplements Wellhausen's elucidation of the growth of sacrificial ritual and the progressive modification of sacrificial ideas. This reconstructed chapter of history may be outlined as follows :—

(a) *Evolution of the varieties of Semitic Sacrifice.*—The original point of departure, as we have already seen, is, according to Smith, the sacramental meal, at which an animal was devoured which was akin both to the god and his worshippers, and which in virtue of its sacred properties served as a cement to bind together in closer union the Divine and the human sharers of the repast (*RS²* 313). On this followed a process of differentiation, giving rise on the one hand to the Sacrificial Feast, on the other to the holocaust. The distinctions between the original sacramental meal and the Sacrificial Feast are two : the former occurs at rare intervals and the flesh is deemed most holy, the latter occurs frequently and the flesh is in use as an ordinary article of diet. The transition is explained on the one hand by the cessation of the belief in the affinity of animals to man, on the other by times of scarcity and a growing taste for animal food. Less obvious is it why the primitive sacrifice, which was essentially a joint-meal, should have developed along a second line into a holocaust. The nexus is supplied by the following train of speculation. So long as the victim was a sacred animal there was but one type of sacrifice—the sacramental meal. When totemistic modes of thought disappeared, and domestic animals supplied the sacrificial material, the victim, since it was no longer deemed to be kin, no longer fulfilled the condition necessary to unite the god and his worshippers. The only victim that fulfilled the condition of being akin to worshippers and worshipped was a human victim, and so on solemn occasions recourse was had to human sacrifices. The eating of human flesh was, however, repugnant to natural feeling, and the human victim was therefore offered as a holocaust. And, naturally enough, when an animal came to be substituted for a human victim the holocaust persisted as the appropriate form (*Lect. x.*). By this account the evolution is carried forward to the point represented in the beginnings of Hebrew history—where the Sacrificial Feast and the Burnt-offering exist side by side.

(b) *Development of Sacrificial Ritual.*—The oldest Semitic form of ritual, it is supposed, is preserved in a description by Nilus of a Saracen sacrifice. 'The camel chosen as the victim is bound upon a rude altar of stones piled together, and the leader of the band, after inflicting the first wound, in all haste drinks of the blood that rushes forth. Forthwith the whole company fall on the victim with their swords, hacking off pieces of the quivering flesh and devouring them raw, with such wild haste that in a short interval the entire camel, body and bones, skin, blood, and entrails, is wholly devoured' (*RS²* p. 338). In this savage rite we see the first stage of usages which were to undergo many modifications before reaching familiar shape.—(1) *The manipulation of the blood*, so important in sacrificial ritual, here begins in the form that the worshippers lap it as it flows, and the god's portion runs out upon the stones. Later the repulsive draught is eschewed, and they are content to be smeared with it—a portion being sprinkled for the god upon the altar or running into a gutter, while some is sprinkled upon the worshippers. This double sprinkling survived to historic times in the Covenant-sacrifice. Ordinarily, however, the whole of the blood was treated as the god's portion, and was conveyed to him on the altar in peace-offerings and burnt-offerings, and also in the later peculiar sacrifices.—(2) *Conveyance of other portions to the god.* Assuming that the above-mentioned rite is primitive, the god originally received nothing save a share of the effused blood. Gradually, however, other portions, as fat and entrails, were assigned to him, and the question emerged as to how they were to be conveyed to him. In the case of libations of blood or wine, they could be supposed to reach him by absorption in the ground, while fat was seen to melt, but the solid ingredients presented a difficulty. An early idea was to expose them, and allow them to reach their destination through being devoured by wild beasts. Next, the use of fire came in—originally, as Smith thinks, simply to get rid of the remnant portions, but afterwards as the means of carrying into the sphere of the gods the sublimated essence or the sweet savour of the meal. The usage in which, while the blood is poured out on the altar, the essence of the offering ascends in fire from the altar, is that which has been firmly established at the dawn of Hebrew history (Wellhausen, *op. cit.* 110 ff., 'Opfer u. Gaben' : *RS²* *Lect. ix.*).—(3) *Modifications of the human meal.* Like the drinking of the warm blood, the eating of the raw flesh had to yield in the course of time to more refined methods. With the appearance of the Burnt-offering it went partially out of use, while in the Sacrificial Feast it appears to have been at first boiled, at a later period roasted.—(4) *Growth*

of opinion as to the significance of Sacrifice. The primitive interpretation of the rite as cementing the religious relationship through the eating of the sacred animal disappeared when the people reached the pastoral stage, although the idea lingered that food of any kind had a uniting virtue, and the illicit mystic forms of cultus which continued to be practised to some extent embodied the original idea. A new interpretation gained ground with the rise of the institution of property. The worshipper now had somewhat whereof he was absolute disposer, not joint-trustee along with the Deity, and it had thus become possible for him to confer on the latter a favour by the bestowal of what the worshipper was personally entitled to enjoy. In this way the Gift theory, which is imbedded in so many terms of the sacrificial vocabulary, came into existence. The institution of property, in fact, from the first exercised an influence that on the whole has worked for religious deterioration. At a later stage the gift was understood to be in some sense a substitute for the worshipper.

The Wellhausen-Smith contribution to the evolutionary account of Semitic sacrifice is a brilliant piece of work which has profoundly influenced research in cognate fields. But the attractiveness of the ingenious combinations, supported as they are by vast and *recherché* erudition, necessitates a reminder of the extremely speculative and precarious character of many of the positions. The theory credited to Semitic heathenism in its primitive stage, as already pointed out, is highly problematical. The construction in question postulates the idea of a communion between the god and the worshippers due to their assimilating the same food, but it cannot be held to be proved that this natural enough idea sprang ultimately from a theory that the sacrifice was efficacious because the victim was akin to both. Further, if the god and his votaries were already kin, it is not clear that their union could be more closely cemented by eating an animal which imported into the union no more than was already found in it. As regards the genealogical scheme, while Smith makes the holocaust a late derivative, and by a complicated process, from the sacramental meal, the truth is that the two types are always found existing side by side—among the Phœnicians as well as among the Hebrews; and, so far as historical evidence goes, there is no strong reason for according priority to either (Hubert et Mauss, p. 32 ff.). A weakness of Smith's position is that his exposition of primitive Semitic ideas is largely based on late Arab practice; and the next stage must be to test his speculations by the results of the researches now being actively prosecuted in the older field of Babylonian and Assyrian worship (Zimmern, *Beiträge zur Kennt. der bab. Relig.*).

IV. SACRIFICE IN ANCIENT ISRAEL.—From the speculative field of prehistoric evolution we advance to the period which extends from the Exodus to the rise of the 8th cent. prophets. The question which encounters us on the threshold is whether, and to what extent, Moses organized a system of sacrificial worship. The Pentateuch, in its main body, represents the work of Moses in this department as epoch-making and final. The Priestly Narrative, in the first place, makes no mention of a use of sacrifice anterior to Moses, and thus suggests, not indeed that it was not previously practised, but that it had then no place in the religion of the chosen line, and that it had no Divine sanction. In the next place it ascribes to Moses, as the instrument of God, an elaborate code which precisely, and with an aspect of finality, determines 'the when, the where, the by whom, and in a very special manner the how' of sacrifice (Wellh. *Hist. Isr.* p. 52). But the representation is in both particulars unhistorical. The use of sacrifice in primitive Israel, antecedently more than probable, is vouched for by independent tradition. The promulgation by Moses of an elaborate sacrificial code, which treats ritualistic correctness of detail as of paramount importance, is in itself improbable, and is inconsistent with the highly flexible practice

under the Judges and the early monarchy, as well as with the prophetic conceptions of the nature of the Mosaic legislation (see below). It is indeed difficult to believe that Moses left no impress upon the forms of the religious life of the people which remembered him not only as emancipator, but as prophet (Dt 34¹⁰), and it may well be supposed that he stands for an early stage in the evolution of the institution which culminated in the system of the Priestly Code; but it would be a hopeless task to try to disengage the Mosaic element in the archaic usages which P certainly embodies. In these circumstances it is desirable to base the account of ancient Heb. sacrifice on another group of sources. Foremost among these is JE, whose patriarchal narratives illustrate a comparatively early cycle of ideas, and the Book of the Covenant (Ex 20³⁴⁻²³), which chronicles or corrects certain features of ritual practised down to the 9th century. In addition, great value attaches to the incidental references in Judges, in the books of Samuel, and in the early Prophets.

(1) *The Sacrificial material* consisted of the agricultural produce of Canaan, animal (Ex 22³⁰), cereal, and liquid (v. 20). The victims included—of large cattle, the old and young of the ox-kind; of small cattle, sheep and lambs, goats and kids. Of birds, the pigeon might be used in the Burnt-offering. Wild animals and fish, which figure in the Babylonian ritual, were not offered. The blood and the fat were specially appropriated to Jehovah, and of animal products presented to Him we hear of wool (Hos 2⁹), but not of the libation of milk. Meal, which was baked into cakes (Jg 6¹⁹, Am 5²), was the common form of the cereal offering. The valuable products of oil (Gn 23¹³, Mic 6⁷) and wine (1 S 1³⁴, Am 2⁹) were ingredients of the sacrificial meal, and were doubtless also offered in the form of a libation. The sacrificial material of the Carthaginians agrees with this, except that their code allowed many species of birds and also milk (CIS i. 237).

(2) *The varieties of sacrifice* were of two types—that in which the offering was wholly devoted to God, and that in which He received a portion and the worshippers feasted on the remainder. Of the former use the typical example is the Burnt-offering, of the latter the Sacrificial Feast (Ex 10²⁵ 18¹³ 20²⁴); but there are other kinds of offering that have to be described which bear distinct names either because of the peculiarity of the ritual, or of the special end which they were designed to serve.

(a) *The Sacrificial Feast* was probably the oldest form, was in early times by far the most common, and gave satisfaction to normal states of religious feeling.

The names by which this type of offering is distinguished in RV are *Sacrifice* and *Peace-offering*. 'Sacrifice' (זָבַח) is sometimes contrasted with the old generic name (זָבַח 1 S 2²⁹), but oftener with the Burnt-offering (Ex 10²⁵, 1 S 6¹⁵), and in both cases it is 'the general name for all sacrifices eaten at feasts' (Oxf. Heb. Lex. s. זָבַח). The sacrifice in the narrower sense is synonymous with the Peace-offering (שְׁלָמִים), which is similarly used to designate the division of offerings which were divided between God and man (Ex 20²⁴, Am 5²²). The original meaning of the שְׁלָמִים is obscure. The interpretation of our versions rendered by Peace-offering (LXX *θεῖον σιμῶν*) conceives it as the sacrifice offered when friendly relations existed towards God (שְׁלָמִים, 'to be whole or at one')—in contradistinction to the peculiar sacrifices which presupposed estrangement. *Heilsopfer* is somewhat similar in idea. An alternative rendering derives it from שָׁלַם 'to make whole,' 'make restitution,' in which case it would be originally an offering of reparation (*Erstattungsoffer*), and by an intelligible transition a payment of vows or thank-offering (Luther).

The occasion of the *Peace-offering* was some such event as prompts human beings to come together in a festive spirit. Even in the modern world the joyful event provokes demonstrations and rejoicings which are felt to have their fittest

culmination in the banquet, and the *Peace-offering* was simply the form taken by the festive banquet in an age thoroughly permeated by the religious spirit. The opportunity for such celebrations is given, not only in the life of the nation and of the community, but in that of the kindred stock and of the family. In the national life such occasions for rejoicing occurred in the successful conclusion of a campaign (1 S 11¹⁵, cf. Jg 16²²), in the cessation of a visitation of famine or pestilence (2 S 24³⁵), and in the accession of a king to his throne (1 K 1¹⁹). In the last case, and also at the dedication of the temple, the provision naturally was on the most magnificent scale (1 K 8⁶). The smaller unit of the local community had its special occasion for rejoicing in the events of the agricultural year: firstlings and first-fruits supplied the material of a sacrificial meal (Ex 22²⁹⁻³¹). The visit of a notable prophet to a town also suggested the recognition of the privilege by a sacrificial feast (1 S 16²). The sept or larger family professed and strengthened its kinship by an annual reunion which took the form of the sacred banquet (20⁶). Similarly, family religion found occasional expression in the pilgrimage of man and wife to a local sanctuary, where they ate and drank before the Lord (1 S 1³). Other events in this sphere which were similarly hallowed were the departure on a momentous journey (Gn 31⁵⁴), the arrival of a guest of consequence (18¹⁻⁹), the embarkation on a new career (1 K 19²¹). In general it served to keep alive the sense of dependence on God for protection and the natural blessings of life, while it had the social value of promoting the solidarity of the nation and of its component parts.

(1) *A course of preparation* was required before taking part in the sacred observance (1 S 16²). A period of continence was ordained (21⁵, cf. Ex 19¹⁰⁻¹⁴); and lustrations and a change of garments constituted the physical holiness which was deemed seemly and necessary in approaching the Deity (Gn 35², Ex 19¹⁰⁻¹²). Naturally, also, it was made the occasion for the display of finery and ornaments (Hos 2¹³). There was recognized, however, the necessity of a more spiritual preparation in which the heart was touched, or even renewed by God (1 S 10⁶). (2) *The ritual* necessarily varied with the material. In the case of the animal sacrifice, the blood and the fat were appropriated to God (1 S 2¹⁶), and were consumed on the altar. To lessen the temptation to sacrilege, it was provided that the fat should be given to God immediately after the slaughtering (Ex 23¹⁸). The accompanying offering consisted of unleavened bread (*ib.*). The remaining portions were divided between the priests and the offerers. The sin of the sons of Eli was that, instead of taking the share allowed by ancient custom, they dipped with a rapacious flesh-hook into the cauldron, and also that they encroached on the Divine portion by claiming their share before the fat had been conveyed to God (1 S 2¹²⁻¹⁵). At this stage the sacrificial flesh was boiled, and it is represented as an objectionable innovation that the priests demanded their portion raw with a view to its being roasted. The custom of boiling the flesh is also commemorated in the prohibition of seething a kid in its mother's milk (Ex 23¹⁹)—which probably had its origin, not so much in a feeling that the practice was of the nature of an outrage, as in heathen associations connected with the sacrificial use of milk. (3) *The religious efficacy* of the Sacrificial Feast was doubtless differently interpreted according to the degree of spiritual enlightenment. The popular idea probably was that God was entertained at a feast, in which He received His portion in the form of fire-food, and that the honour and gratification thus afforded Him rendered Him well disposed to the

worshippers. The offering would thus be considered efficacious as bringing the response which is naturally elicited by a gift or service. The command, 'none shall appear before me empty-handed' (Ex 23¹⁸ 34²⁰), suggests that the practice of approaching a monarch with gifts was regarded as typical of the approach to Jehovah with offerings. The use of *תָּבִיא* (gift) in a comprehensive sense points to the same interpretation. With this, doubtless, was also associated the conviction that by eating and drinking along with Jehovah friendly relations were both expressed and strengthened. That the sacred life-blood of the animal was conceived as cementing the union by constituting a physical tie is more problematical (Schultz, *JTh*, 1900, p. 269). But these interpretations were beginning to be challenged. The higher theology excluded the idea of God as a fellow-guest. A striking saying, ascribed to Samuel, declares offerings worthless without obedience (1 S 15²²).

(b) **The Burnt-offering**, *זֶבַח* (LXX *ἀναμίσχυμα*, *ἀναμίσχυσις*, *ἀναμίσχυμα*, *ἀναμίσχυσις*), 'that which ascends,' is so called either as that which is elevated to the altar (Knobel, Oehler, Nowack), or which ascends in flame (Bähr, Kell, Delitzsch). It is usually synonymous with 'the whole Burnt-offering,' though originally the distinction may have obtained that the portion of any bloody sacrifice consumed on the altar was designated the *זֶבַח*, while only the Burnt-offering consisting of an entire victim was a *זֶבַח* (Nowack, *Arch.* ii. 215).

If the bright side of human experience, which gives birth to joy and hope, had its characteristic rite in the Peace-offering, the Burnt-offering answered to the mood in which the predominant feeling is grief, apprehension, or awe. In certain situations, of course, there is a combination of joyousness and solemnity, of hope and fear—as at the coronation of a monarch, or the conclusion of a national covenant with God, and in such cases the double aspect has its expression in the combination of the two types of offering (1 S 10⁸, Ex 24⁶). But on occasions of extraordinary solemnity or gravity the Burnt-offering stood alone. The deliverance from the Flood, accompanied as it may be supposed to have been by overwhelming awe at the sweep of God's devastating judgment, was marked by the sacrifice of the Burnt-offering (Gn 8²⁰). Similarly on the occasion of a theophany, when the sense of privilege is overborne by the sense of danger in the presence of Jehovah, the Burnt-offering is the appropriate rite (Gn 22¹³, Jg 13¹⁶). At the beginning of a war, when the danger and the dubious issue are keenly realized, it alone bespeaks the Divine aid; nor does the leader of the host embark without this appointed service on his hazardous enterprise (Jg 6²⁶). It would even seem that in perplexity it was used with the divinatory purpose, which in Babylonia had been one of the principal uses (Jg 6^{17a}). When one was driven to extremity by the hatred of a powerful opponent, it might be offered in the hope of God interposing to change his heart (1 S 26¹⁹). In time of peril it might be promised by way of vow on condition of success (Jg 11). It has indeed been alleged that in periods of national calamity it was not offered—the idea being that this was useless so long as the wrath of Jehovah was fierce against king or people; but this view rests upon an incident in the life of David (2 S 24¹³) when acting under prophetic guidance, and cannot well be supposed to represent the prevalent belief. (1) *The sacrificial material* had consisted, from very early times, in one or other of the following: the ox-kind, the goat, the sheep, the turtle-dove, and the young pigeon (Gn 15⁹). (2) *The ritual* of the Burnt-offering exhibits survivals of ancient usage. Though the usual custom now was to slay the victim beside the altar, there are traces of an older practice of slaying it upon the altar (Gn 22⁹, cf.

1 S 14²³). The ritual of Gideon is peculiar: the flesh of the kid is boiled, it is then put in a basket along with unleavened cakes and placed on the altar, while the broth is poured either over it or on the ground (Jg 6^{19, 20}). The token of acceptance is its consumption by fire. In the later period the broth played no part, the flesh being consumed raw upon the altar.

(3) *The significance* of the Burnt-offering is suggested by what has been said of its occasions. Its object was to secure protection against threatened danger, success in the hazardous conflict, deliverance from the sore calamity; and if in some instances it has the appearance of a thank-offering after deliverance, the dominant thought may still have been that security was sought against a recurrence of the judgment. Further, it is clear that the idea was to ensure safety by performing an act which was acceptable to God, and thus dispose Him to maintain the worshippers' cause. The intention was not invariably to propitiate God in the sense of altering His attitude from hostility to clemency; the sacrifices of Abraham and of David are rendered when God is already at peace with them, but they were always at least propitiatory in the secondary sense that they were designed to prevent God from changing His attitude of clemency into an attitude of hostility. As to how they were supposed to influence God we cannot very confidently speak. The old Hebrew idea was that the food actually reached God in the form of the fragrant fire-distilled essence, and thus gratified Him as an agreeable gift (Gn 8²¹). In this point of view it was more efficacious than the Peace-offering, inasmuch as it paid to God greater honour, and made Him a more costly gift. The story of the sacrifice of Isaac suggests the theory that the animal was substituted for a human victim, but it does not say that Isaac was to die for Abraham, and it therefore does not involve the idea that the animal victim was understood to bear the penalty due to the sin of the offerer. On this view, the animal victim represented only the substitution of the less valuable for the more valuable gift. As in the case of the Peace-offering, it is certain that the reflexion which was rooted in the higher faith gradually worked its way to a nobler conception than that of gratifying God by the delights of a repast. Old forms of expression, such as 'sweet savour' and 'bread of God,' continued to be used even when it had come to be realized that the quality which pleased God was the piety which prepared the fire-food.

Human Sacrifices, of which OT contains some record, come under the category of the Burnt-offering. That they occurred in the heathen stage through which the progenitors of the Hebrews passed in prehistoric times, can hardly be questioned. The practice prevailed throughout Semitic heathendom; it is abundantly vouched for among the Arabs and the Carthaginians, and it was in use among the Moabites (2 K 8²⁷). The story of the sacrifice of Isaac (Gn 22¹³) clearly implies that the custom had been deeply rooted in the past; the history of Jephthah furnishes an indubitable instance from the period of the Judges (Jg 11^{34a}); and its persistence down to a late period may be collected from various prophetic references (Mic 6⁷, Jer 7³¹, Ezk 20²⁶ 23²⁷). The main point in dispute is whether 'human sacrifices' were an essential element of the Mosaic cultus' (Ghiliany), or whether they 'were excluded from the legitimate worship of Jehovah' (Oehler). The argument for the legitimacy of the practice would be considerably stronger if we could regard as human sacrifices the slaying of Zebah and Zalmunna by Gideon (Jg 8^{18a}), and of Agag by Samuel (1 S 15³³, cf. 2 S 21⁹); but these acts may be assigned to the different category of executions. In the case of Jephthah it is hard to suppose that he expected other than a human being to come forth to meet him, and the most that can be said is that the narrative seems to recognize in the issue a merited punishment. The manifest moral of the sacrifice of Isaac is that the practice was 'an alien element repudiated by conscious Jahwism' (Holzinger on Gn 22¹⁴). As to the commandment of Ex 22²⁸,—'the firstborn of thy sons shalt thou give unto me,'—it is an exegetical possibility that the words point to human sacrifice; but as a normal demand of OT religion, and indeed of any sane religion, it is inconceivable (see art. *PRIESTS AND LEVITES*, p. 70^b).

(c) *The Covenant-sacrifice* is closely related to the Peace-offering, although it may be considered to be intermediate between the 777 and the 721. The peculiarity lies partly in the specific object, which is to seal a compact, partly in the ritual. According to antique practice the formation of a covenant or an alliance was sealed by a variety of rites. One form is the sprinkling of each party with the other's blood, or the commingling of the blood of both by smearing it upon stones. In a second form animal blood is employed. Another is the partition of a carcass, with the passage of the covenanting parties between the divided parts. Of the latter custom there is an evident trace in 1 S 17. After being chosen as king, Saul 'took a yoke of oxen and cut them in pieces, and sent them throughout all the borders of Israel.' In the text it is interpreted as a threat of a like fate being visited upon rebels; but the form, which is reminiscent of the passage through a sundered victim, rather conveys an invitation to the tribes to join with him in a covenant. The form is also recognizable in the ritual employed in God's covenant with Abraham (Gn 15). A heifer, a ram, and a she-goat are sundered in twain; and after nightfall a flaming torch, which clearly represents God in its action, passes between the divided pieces. Another noteworthy feature of the narrative is that at first birds of prey descend upon the carcass and are driven away—not improbably a deliberate repudiation of the ancient practice of exposing the god's portion to be consumed by wild creatures (v. 11). The second important instance of the Covenant-sacrifice connects itself with the usage of cementing an alliance by an interchange of blood. At the making of the covenant between Jehovah and His emancipated people, Burnt-offerings and Peace-offerings are sacrificed; and in connexion with the burnt-offering, as it would seem, Moses pours half of the blood upon the altar for God, while the other half is sprinkled on the people (Ex 24.8). In this type of sacrifice a different idea from that of propitiating God by a gift is clearly preserved—that, viz., of the establishment of communion of life through assimilation of the same blood.

(d) *Vegetable offerings* were later in origin, and in less repute, but must have formed an important division of the offerings at the sanctuaries. Meal, baked into cakes, was doubtless a common form of offering (Jg 619, 1 S 134). The most interesting example of this class is the SHEWERERAD (שְׁוֹרֵרָד, אֶרְבֵּי יִשְׂרָאֵל, אֶרְבֵּי יִשְׂרָאֵל, אֶרְבֵּי יִשְׂרָאֵל) (Ex 25.20, cf. Lv 24.5). This offering, even as regards the number of the loaves, is anticipated in the far older Babylonian ritual (Zimmer, *Beiträge*). The ritual in the first stage followed the method of exposure—the bread being laid out on a table in the sanctuary; but the Divine portion is conveyed to the Deity in the end by being allotted to the priests. The vegetable offerings, it should be added, were often associated with animal offerings. The Book of the Covenant prohibits the use of leavened bread in connexion with the Sacrificial Feast (Ex 23.18).

(e) *The Libation* was originally a libation of blood, possibly at a later stage of milk and of water (1 S 74, 2 S 23.16 preserve a recollection of the latter), but in the historical period the chief material is oil, which also naturally went along with the cereal offerings. The rarity of the mention of the libation of wine, which was certainly in use, is not improbably connected with the incongruity to more elevated thought of the idea of offering to God a festal banquet, and also with official opposition to the excesses to which the prominence of this element led (1 S 114). There could not be wanting an instinct that the libation of wine was most in harmony with the unethical genius of heathendom.

V. THE PROPHETS AS REFORMERS OF SACRIFICIAL WORSHIP.—The sacrificial system of ancient Israel was the result of a long and complex formative process. A remote heathen past supplied the rudimentary forms, and these had undergone modification under the influence of a progressive civilization, and of the early stages of a gradual revelation. The system of ordinances thus historically given was now to be subjected to a testing ordeal. The knowledge of God and of His will, which had been conveyed through His dealings with Israel, and which had been understood in essence by Moses, attained to great clearness and consistency in the consciousness of the 8th century prophets; and, possessed as they were by this knowledge, they were compelled to examine in its light the past and the future of the people, and to sit in judgment on all the present doings of the house of Israel. In particular, they could not but ask whether the sacrificial cult, which to popular thinking was all but coextensive with religion, was needed and justified in view of the better knowledge of God. As a fact this was a subject which bulked largely in their teaching; it supplied the occasion of much of their strongest invective; and so unqualified was their denunciation that it is a debatable question whether they proposed the abolition of all sacrificial worship, or only its reform.

That the religious ideal of the prophets involved the abolition of sacrifice, as affirmed by various modern writers, is a thesis which rests on a partial view of the evidence. 'Their opposition to sacrifice,' says Kayser, 'was founded on principle, and the real significance of their language is: "No offering, but love and right knowledge of God" (*Alttest. Theol.* p. 156). This, it is held, is the natural sense of a group of passages which represent God as declining offerings, as sated with them, and even loathing them. 'To what purpose is the multitude of your sacrifices to me? I delight not in the blood of bullocks, or of lambs, or of he-goats. Bring no more vain oblations' (Is 11.21, cf. Am 5.22, Hos 6.6, Mic 6.6). But such expressions may as naturally be understood of a conditional as of an absolute rejection of sacrifice. The people addressed was a sinful nation, persisting in its sins, and the repudiation of offerings at its hand by no means implied that sacrifice would be equally unacceptable at the hand of a penitent and regenerate people (cf. Smend, *Alttest. Theol.* p. 168). And the view that the repudiation is merely conditional is borne out by hints that accompany the more extensive prophetic prospects. Thus, Hosea looks forward to the cessation of sacrifice as a national punishment or calamity (34.91); Isaiah predicts that the Egyptians will bring sacrifices and oblation to Jehovah (12.21), while Jeremiah very emphatically includes sacrifices in the purified worship of the future (33.16, 17.26). In short, those who regard the prophets as abolitionists make a mistake which is common in studying polemics—viz. of misconceiving an attack on abuses as an attack on the institution which they have infected.

A second argument adduced is that the prophets lay great stress on the fact that in the Mosaic period sacrifice was neither rendered nor ordained (Am 5.22, Jer 7.22), whereby they are supposed to claim for a policy of abolition the sanction of a sacred period of antiquity. These remarkable passages are of great weight in the controversy as to the Mosaic contribution to sacrificial legislation, but in the present connexion they are not convincing. That Israel did not sacrifice during its wanderings (Am 5.22) was not necessarily an argument for cessation, but might equally have in view to win the people to a doctrine which certainly was included in the prophetic programme—viz. that the place of sacrifice in worship was not the all-important, or even pre-eminent, one that was commonly supposed.

The prophetic programme of reform in this field embraced both sacrificial practice and sacrificial theory. (1) Among the practical reforms the foremost place belonged to (a) *the prohibition of heathen sacrifices*—i.e. those offered to other gods, to idols (Hos 11, Jer 11.13), to the dead (Ps 106.28), and to sacred animals (Ezk 8.10). In connexion with these the practice of kissing the idol is noticed (Hos 13.3). To the class of heathen sacrifices we may also refer those mystic rites in which the victim was an unclean or repulsive creature (the swine Is 65.4, the mouse 66.17), and which may have been an underground survival from a very early cult (*RS* p. 357 ff.). (b) *The prohibition of certain kinds of sacrifice* is also enforced—notably human sacrifices (Ezk 20.31). It is, moreover, difficult to resist the impression, in view of the disparaging references to the number and costliness of the offerings (Is 1.11, Mic 6.7, Am 4.4, Ezk 20.28), that the school preferred fewer kinds and greater simplicity. In particular, antagonism to the Sacrificial Feast is strongly suggested by (c) *condemnation of the excesses which connected themselves with the sacrificial cult*. The sacrifices of this type naturally gave occasion for revelry, and even for drunken and licentious orgies (Hos 4.13, Am 2.7), and thus an institution conceived to honour God became a main instrument in promoting a national corruption, which called down the vengeance of Heaven. While, therefore, we cannot regard the prophets as against sacrifice in principle, it is at least a probable view, in consideration of the organic connexion of the sacrificial meal with the indulgence of fleshly lusts, that they meant to discountenance the Peace-offering as the main source of evil, and laboured to enhance the credit of those other varieties which precluded its characteristic temptations.

(2) It was, however, on the theoretical side that the prophetic protest went deepest, and most loudly challenged the existing order. (a) It demanded a revision of the popular estimate of the place of the cultus in religion, and in a minor degree of the place of sacrifice in the cultus. The current

conception was that religious ordinances were the grand means of pleasing God, and to this the prophets sharply opposed the doctrine that in God's view ceremonies are unimportant in comparison with morality. Latent in Mosaism, this view found striking expression in a saying already quoted—'to obey is better than sacrifice, and to hearken than the fat of rams,' 1 S 15²². It is the main burden of the prophecy of Amos, and finds its classic expression in the 'what doth the Lord require of thee?' of Micah (6^{8a}, cf. Hos 6⁶, Pr 17¹ 21³). The secondary importance of the cultus, in fact, was the obvious consequence of the soteriology of the prophets. According to their teaching it was only on condition of righteousness, after backsliding on condition of repentance and amendment, that the Divine favour could be ensured; failing the fulfilment of this condition, ceremonial religion only provoked the Divine anger; and it was therefore out of the question to treat the two as of co-ordinate rank. And, further, even within the sphere of the cultus it is not granted that it is the all-important form of 'service.' Hosea attaches high importance to the teaching function of the priests (4⁹), while in more than one passage preference is manifestly exhibited for the exercises of prayer ('calves of the lips,' Hos 14²) and for sacred song (Ps 27⁹).

(b) *The significance of sacrifice* for the prophets remains to be considered. With the cultus thus depreciated, and the pre-eminence of sacrifice in the cultus challenged, in what sense was it possible to maintain its efficacy? After what has been already said, it is inconceivable that they supposed it to be acceptable to God in the capacity of a gift. The God who claimed the whole life for duty was not likely to be influenced by a present or a meal. And from the point of view of their high theology the Gift-theory fell to the ground as untenable, even ridiculous. In the first place, God did not experience the wants which the offerings supplied; in the second place, even if He did, the offerings were already God's property, not man's to present (condensed in Ps 50¹⁰). If sacrifice had any efficacy at all, it needed another explanation for those who had realized the true God. This it possessed as a vehicle for the expression of the sentiments, and for the revelation of the spirit of the life, of those who sincerely served or sought God. Its efficacy, in short, was neither more nor less than that of prayer, which, on its part, is of value not as an act considered in itself, but in virtue of the aspirations and the sincerity which find voice in it. That in the prophetic valuation the function of sacrifice was identical with that of prayer, cannot indeed be conclusively proved, but it is the view which best harmonizes with their religious theory; and it derives confirmation from several considerations. In the patriarchal narratives, which embody a measure of the prophetic spirit, it is usually associated closely with the prayer of adoration and petition, suggesting that the spoken word serves the purpose of making the action articulate. In the case of the sacrifice of Abel, again, the ground of acceptance manifestly was the disposition of the worshipper, which disposition prayer equally with sacrifice would have served to bring to expression. Especially significant is the fact that in certain passages the offering of words is demanded (Hos 14²)—the implication being that they served the same purpose as sacrifice in making the appeal of prayer to God, and that they were preferable in that they were less likely to foster evil practices and to encourage superstition.

The Deuteronomic Reformation made the influence of the prophetic school to tell along another line

on the development of the sacrificial system. The suppression of the local sanctuaries, and the consolidation of worship in Jerusalem, which had its spring in prophetic inspiration, had far-reaching consequences. One immediate consequence was to detach sacrifice from the everyday life of the people, and to reduce it in the main to an element in the worship in which national religion found expression. Naturally also the Sacrificial Feast ceased to be as practicable as when it had been observed in their several districts by the smaller units of the family and the clan, and it tended to give place to the type of the holocaust in which the people looked on at the consumption of the offerings in the service of God, whether directly or by His priests. With the decay of the Sacrificial Feast, moreover, the spirit of worship was altered—the joy of the table being swallowed up in a deepening sense of the solemnity of the collective worship, and of the more imposing rites to which it gave prominence (Wellh. *Proleg.* Eng. tr. p. 78 ff.; Nowack, *Arch.* ii.).

Sacrifice in Deuteronomy.—While in general Deut. reflects the prophetic doctrine of the superiority of morality to ceremony, it is far from representing the abolitionist standpoint ascribed to Amos. Its list of offerings includes burnt-offerings, peace-offerings, heave-offerings, votive-offerings, free-will offerings, first-fruits, while it prohibits human sacrifices (18¹⁰), the drinking of blood (12²³), hair-offerings and mutilations (14¹). Among its leading interests are to conserve somewhat of the joyous character of sacrifice in spite of the centralization of worship (12⁷), and to ensure a sufficient portion to the priests from the sacrifices.—In the case of animal offerings the shoulder, two cheeks, and the maw (12⁹). The animal victim, it is also emphasized, must be without blemish (17¹). The sacrifice in expiation of an uncertain murder (21⁹) is interesting for its peculiar ritual, manifestly antique, while it is obviously excepted from the centralization of the worship.

vi. THE SACRIFICIAL SYSTEM OF THE PRIESTLY CODE.—With the downfall of the kingdom of Judah, involving the destruction of the Temple and the deportation of the people, Hosea's prediction of the cessation of sacrificial worship was fulfilled. Whatever relief individuals might thereafter find in recurrence to simple forms of offering, or by conforming to heathenism, the nation as such, broken as it was and dispersed, was deprived of the stated means of communion with God. Yet the visitation which had thus overwhelmed Judah, and reduced its institutions to ruins, was not interpreted by its religious leaders as a Divine condemnation of its system of worship. The writings of Ezekiel bear testimony to the hopes of a great prophet touching the restoration of the Temple and its solemn ordinances. The priests who escaped into exile carried with them a minute knowledge of the Temple services, possibly also written summaries of the rules that had governed the elaborate system of offerings and ritual; and it may well be believed that, ere the Temple with its solemn rites faded from living memory, it was realized to be a pious duty to compile a faithful record of the ancient sanctities and glories. Cherished as a monument of the past, this record naturally became, in the prospect of a new national existence, the basis of a practical religious programme. The dream of restoring the old worship on the old sacred ground, in a second Temple of Jerusalem, was one which must have irresistibly appealed to the pious exile. But restoration did not preclude adaptation and amendment. Novel circumstances, foreign impressions, deeper reflexion, required that the legacy from the past should be handled with freedom as well as with piety. The result of the two factors—obscure as was the process—was the Priestly Code, which was adopted as authoritative at the Reformation under Ezra, c. 444, and which thenceforward regulated Jewish worship and gave its characteristic note to Jewish religion. The sacrificial system described in this

code (Leviticus, Ex 25-31, 35-40, Nu 1-10, 15-19, 25-36) we have now to analyze.

1. *Forms of Sacrifice.*—The arrangement of the complicated enactments of the code has been attempted in different ways, but the more satisfactory method is to adopt as the leading clue the distinction of kinds and varieties. The classification of the Levitical sacrifices may, however, be carried out from different points of view.

The main principle of division has been sought in the distinction of the *subjects* on behalf of whom sacrifices were offered.

It is on this principle that Maimonides bases his interesting and instructive summary of the sacrificial laws (*Prafatio in quintam Miana partem*, iii. 1 ff.). The varieties, he premises, may all be reduced to four groups—the Sin-offering, the Guilt-offering, the Burnt-offering, and the Peace-offering; and the victims were of five species—sheep, cattle, goats, young pigeons, and turtle-doves. In reference to the subjects, his classification (slightly transposed) is as follows:—

1. Sacrifices offered on behalf of the whole congregation:—(a) in the exercise of its ordinary religious duty, under a stated ritual, and tied to stated occasions (Sabbath, New Moon, Feasts); (b) on the occasion of some collective or public transgression.

2. Sacrifices offered on behalf of the individual:—(a) in virtue of his connexion with the theocratic community as an official or ordinary member, e.g. the Passover; (b) on a special occasion—e.g. a sin of word or deed, a bodily accident, a misfortune in business, the end of a fixed period, the obligation of a vow.

The Levitical sacrifices have also been classified with reference to the different *ends* which they served in the approach to the Deity.

The usual division from this point of view is into *honorifics*, designed to render due homage to God, and *piacular* or *expiatory*, designed to make atonement for sin—to which, since W. R. Smith's work, it has been usual to add sacrifices of *communion*. The distinction which Oehler lays at the basis of his discussion is expressed by him (*Theology of OT*, Eng. tr. p. 423) as follows:—'We refer the four kinds of offering to two higher classes—those which assume that the covenant relation is on the whole undisturbed (Peace-offerings), and those that are meant to do away with a disturbance which has entered into this relation, and again to restore the right relation (of the people or of separate individuals) to God' (Burnt-, Sin-, and Guilt-offerings).

The division founded on the distinctions of the sacrificial *material*—animal, vegetable, or liquid—is the most obvious, and may be followed here as of adequate importance, while not prejudging the difficult question of the purpose of sacrifice.

(i.) *Animal sacrifices* are by far the most important, and in P it appears that a re-valuation has taken place of the two ancient types. The Peace-offering of which the worshippers claimed a large share is overshadowed by the Burnt-offering, with which are now associated two kindred sacrifices—the Sin-offering and the Guilt-offering, falling to God and His ministers.

(a) *The Burnt-offering* (עֹלָה Lv 1, Ex 29:38-41, Nu 28:37, Lv 6:8), which stands at the head of the group, owes its position to the fact that its purpose was the most general, that the victims were of pre-eminent value, and that at this stage it was regarded as most perfectly embodying the sacrificial idea (Knobel-Dillmann on Lv 13). (1) *The victims* were the ox-kind, sheep, goats, turtle-doves, or young pigeons,—in the case of the animals it was prescribed that the victim should be a male, as the more valuable, and without blemish (13, for a list of blemishes cf. 22:27). (2) *The ritual* to be observed includes the following points in the case of the animal victims:—(a) *Action of the offerer*—imposition of hands (Lv 14), slaughter of the victim at the door of the tabernacle, to the north of the altar (vv. 3, 11), flaying and cutting up the carcass (v. 9), washing of the entrails and legs (v. 9). (b) *Action of the priest*—manipulation of the blood which is sprinkled about the altar (v. 9), disposition of the pieces upon the wood of the altar (v. 9), burning the offering (v. 9). The dove was killed by the priest, and its crop and feathers were flung aside as unsuitable (v. 14). In the above ritual the occasion presupposed is a private sacrifice, which might be rendered as the result of a vow or spontaneously (22:18). (3) *The occasions* of this sacrifice were in the main connected with the collective worship, of which it formed the chief element. The daily services of the temple consisted of the continual Burnt-offering (עֹלָה עֹלָה), wherein a he-lamb was offered every

morning and evening, accompanied by cereal oblations and by libations (Ex 30:38, Nu 28:1-5). On holy days it was celebrated on a magnified scale: on the Sabbath two pairs of lambs were offered (Nu 28:9, 10); at the New Moon, at the Passover, and at the Feast of Weeks it consisted of two bullocks, a ram, and seven he-lambs, with corresponding increase of the concomitant offerings (v. 11).—*The purpose of the Burnt-offering* may be so far understood from its use as the constant element in the organized worship of the community. It was not connected with any particular form of transgression, but was appropriate as the means of approach to God of a people, or of individual persons, sensible of God's majesty and holiness, and of their standing in His sight. The effects are described from three points of view—that it is a 'savour of rest-giving' (i.e. acceptable) to God (עֹלָה לַיהוָה Lv 19), that it surrounds the worshipper with a 'covering' (עֹלָה עָלָיו 14), and that it cleanses from ceremonial impurity (14:30). On this point see PROPITIATION, § 4.

The later period of the monarchy was a period of national calamities, culminating in ruin and exile, which were interpreted by the prophets as a judgment upon national sin. Under these conditions there was naturally a strong disposition to strengthen the nation's interest with Jehovah by the multiplication of solemn sacrifices, and during the Exile future safety might well seem to lie in the development of the system of bloody sacrifices. It is thus that the fact has been plausibly accounted for that two kinds of sacrifice, which occur only in name in the earlier history, figure in Ezekiel somewhat prominently, while in P they almost rival in importance the Burnt-offering. These are the Sin-offering and the Guilt-offering (AV Trespass-offering).

(b) *The Sin-offering* (חַטָּאת, LXX (v) *ἁμαρτία* or *ἁμαρτίας*) is mentioned 2 K 12:17, but there signifies presents or fines paid to the priests. In Ezekiel the special occasions on which it is prescribed are the dedication of the altar (43:36), the annual cleansing of the sanctuary (45:17-19), the consecration of prince and people on festal occasions, including Passover week (45:22, 23), and the return of a priest to duty after purification (44:2). In the ritual the outstanding features are the sprinkling of the blood of the victim on the doorposts of the temple (45:18) and on the four horns of the altar (45:20), and the burning of the carcass without the sanctuary (v. 21). The regulations of P may be thus summarized:—(1) *Beneficiaries and appropriate victims*. For a ruler the suitable offering was a he-goat (Lv 4:26), for an ordinary person a she-goat (4:26), a ewe-lamb (4:26), a turtle dove or young pigeon (5:7), or a cereal offering (5:11); for priests (4:9), Levites at their installation (Nu 8:5), and for the whole congregation (Lv 4:14), a bullock, for the latter also a he-goat (Nu 15:24). On the Day of Atonement a bullock was offered for the high priest, and two he-goats for the congregation (Lv 16:24). (2) *The ritual* included the following acts: (a) imposition of hands, and slaughter of the victim by the offerer (4:4) or the representatives of the congregation (v. 16); (b) manipulation of the blood, which was sprinkled before the veil, smeared on the horns of the altar, and poured out at the base (v. 7); (c) disposal of the carcass, whereof the choice and fat portions were burnt on the altar, while the skin, entrails, and (in some cases) the ordinary flesh were burned without the camp (v. 8). The remaining flesh was not burnt, but fell to the priests, when the offering did not concern themselves (6:13 10:16). (3) *The object of the sacrifice* is otherwise conceived than in Ezekiel. With the latter it mainly appears as a service of consecration for holy places, in P it is designed for the 'covering' of minor offences (Lv 5:1-9), the removal of ceremonial uncleanness (12:8, 85), and atonement for sins of ignorance (7:17, 42:22, 27). By the last it might be understood, either that the wrong-doer was ignorant of the law, or that he acted in forgetfulness of the law. (4) As to the effect of the sacrifice, it is declared that a 'covering' takes place and the sin is forgiven (42:36, 37).

(c) *The Guilt-offering*, AV Trespass-offering (עֲוֹן [LXX *ἁμαρτία*, *ἁμαρτίας*, *ἁμαρτίας*, *ἁμαρτίας*], 'offence', then reparation made for the same), occurs in this general sense in the older history (1 S 6:3, 2 K 12:17). The allusions to it in Ezekiel are incidental, and show that in his time it had already gained a footing, and that its special character was generally understood (40:39 42:13 44:29 46:20).—*The occasion of the Guilt-offering*, according to P, is unwitting trespass against the ordinances of God, in respect either of holy things (Lv 5:10) or of the rights of property (6:1). The special feature of the regulations is that reparation is demanded for the trespass, with the addition of a fine, one-fifth of the value of the thing to be restored, which goes to the priest (6:10). Where the injury is a private wrong, restitution is made to the injured party, failing whom or his heirs it goes to the priest (Nu 5:8).—*The victim* is usually a ram (5:8), and the ritual is similar to that of the Sin-offering (Lv 77). The 'covering' of the trespass and the forgiveness of the offender follow upon the acceptance of the offering (6:7).

The distinction of the Sin-offering and the Guilt-offering has been felt to be a matter of some diffi-

culty, aggravated by the fact that the latter was principally supposed to be in view in Lv 51-53. The principal views which have been held are—(1) that the Sin-offering was for sins of omission, the Guilt-offering for sins of commission; (2) that the former operated objectively by averting punishment, the latter subjectively by appeasing the conscience; (3) that the former was offered because of open, the latter because of secret sins. Unmistakably, however, the specific feature of the Guilt-offering is the preliminary act of restitution; and its occasion would thus seem to be those cases where the sin which had been committed allowed of an act of reparation. The Sin-offering was required in cases where the harm done could not be undone or measured. The designation of the suffering Servant as a Guilt-offering (Is 53¹⁰, not 'offering for sin') indicates that the highest degree of efficacy was ascribed to this form of offering.

In the ritual of the Day of Atonement the bloody sacrifices were combined in an impressive way, and invested with peculiar features.

(d) **The Peace-offering** (לֶחֶם חֵלֶב וְשֶׁמֶן, LXX *ἀσπονδία* [*thor.ia*, *aspongia*]) is brought under fixed regulations. In Lv 711² three varieties are distinguished—(1) *thank-offerings* (לֶחֶם תְּנִיחָה), (2) *votive offerings* (לֶחֶם זֶבַח), and (3) *free-will offerings* (לֶחֶם חֵלֶב וְשֶׁמֶן). The view of Hengstenberg, that the thank-offering is an alternative generic name, equivalent to peace-offering, and that the votive offering and the free-will offering are the species, is inconsistent with the fact that a different treatment of the sacrificial flesh is prescribed for (1) as compared with (2) and (3). As to the distinction of the three varieties, the most satisfactory explanation is that which interprets the thank-offering as a response to experienced acts of Divine goodness, while the votive offering and the free-will offering are connected with expectation of benefit and supplicatory prayer. The first, in short, was contemplated only after blessings received, while the last two were decided on when some special blessing was still awaited at the hand of God. The supplicatory pair, again, were distinguished in this way, that the free-will offering was presented in support of the prayer, while the votive offering was promised as conditional on the granting of the boon. 'The latter did not need to be presented if the prayer was not granted, the former had already been presented, even if the request continued unfulfilled' (Kurtz, *Sac. Worship*, Eng. tr. p. 262).—(a) *The victims* are the same as in the holocaust—oxen, sheep, and goats, but not pigeons. It was accompanied by a cereal offering mingled with oil (Lv 712). In view of the less solemn character of this offering, the regulations as to quality are relaxed: the female animal is allowed as well as the more valuable male (Lv 36), and for the free-will offering the principle of the unblemished character is not rigidly insisted on (2223). (b) *The ritual* corresponded in its first stages with that of the Burnt-offering and the Guilt-offering. The imposition of hands, the killing of the victim, and the sprinkling of blood upon the altar are common to it with the holocausts. (c) *The distribution of the sacrifice* includes God's portion—consisting of fat pieces (322), the priest's portion—consisting of the breast (707) and the right fore-leg (730, 32), while the worshipper received the residue. The parts assigned to the priest were handled in a peculiar way, on account of which they are described as the breast of the wave-offering, and the thigh of the heave-offering (Ex 292). The ceremony of the *wave-offering* (תְּנִיחָה, תִּנְיָ) consisted in moving the portion backwards and forwards in the line of the altar, with a motion somewhat similar to that of a saw (Is 101). 'The swinging in a forward direction,' says Oehler, 'was a declaration in action that it properly belonged to Him; whilst the movement back again denoted that God on His part returned the gift, and assigned it as His own present to the priest' (Le. ii. 6). The handling of the *heave-offering* (חֵלֶב) is interpreted in a similar way by Kurtz, following the Jewish tradition, as a symbolical act, whereby the offering was presented to God by being lifted upward (Le. p. 269 ff.); but according to most moderns heaving was not an act of worship, but only the preliminary act of detaching a portion from the rest of the carcass for consecration (see ORVET, § 5). In any case it is certain that the mode of viewing the waving must soon have extended to the heaving, and made it equally a religious ceremony and a vehicle of ideas of consecration. The breast which was waved fell to Aaron and his sons (Lv 731), the heave-shoulder to the officiating priest (733). (d) *The portion of the worshippers* was enjoyed at a sacrificial meal. In the case of the thank-offering the whole had to be consumed on the day of the sacrifice (Lv 713), while the feast furnished by the two other varieties might be extended over the second day (v. 16). At the end of the fixed time the remnants were burned with fire without the camp. (e) *The effect* of the Peace-offering is only referred to in a general way: it is a 'savour of rest-giving' unto the Lord, i.e. acceptable to God (Lv 32).

On a review of the regulations which have thus been sketched, it appears that the following distinctions may be drawn:—(1) In respect of destination, the Peace-offering stands by itself as a sacrificial meal, while the remaining three are conveyed entire to God or to God and His ministers. (2) In respect of ritual, certain acts are common to all—the imposition of hands, the sprinkling of blood on the altar, the burning of the fat portions, but the other portions are either burned on the altar (Burnt-offering) or outside the sanctuary (Sin-offering and Guilt-offering). (3) In respect of occasion, two were elements of normal public worship (Burnt-offering and Peace-offering), two presupposed exceptional relations between God on the one hand and the community or the individual on the other (Sin-offering and Guilt-offering). It is indeed too much to say that in connexion with the former the sacrificer always stood upon the ground of salvation, in connexion with the latter he had fallen from a state of grace. The use of the Sin-offering in the matter of the consecration of temple buildings and furniture does not suggest the rupture of covenant relations, nor does it appear that the sacrificer of a Guilt-offering had fallen from a state of grace more surely than any ordinary member of the community. He was probably a man of unusual sanctity and tenderness of conscience, and the point was, not that his sin was particularly heinous, but only that it was particularly definite. Moreover, it was only on the assumption that he was still 'in a state of grace' that he was allowed to sacrifice at all: for the sins which led God to cast men off no sacrifice was accepted. The view, in short, that there were two classes of sacrifices contemplating respectively the pardoned and the unpardoned is much less tenable than the view that all four were at one in contemplating the community as being in a state of guilt, and requiring to be constantly reconciled to God. They have, in fact, become—not excepting the Peace-offering in its later interpretation—piacular sacrifices which dispose God to mercy, procure the forgiveness of sin, and avert punishment. Behind this lies the question as to the ground of its efficacy, or the *modus operandi*, which in view of its importance will be treated in a separate section.

(ii.) *Vegetable offerings* consisted of the produce of the tilled field and of the vineyard, but not of garden-herbs or the fruits of the orchard. They were sometimes an accompaniment of the bloody sacrifice, sometimes independent.

The Meal- (AV Meat-) offering (vol. iii. p. 309) (מִנְחָה, P, LXX *θυσία*) was a preparation of flour and other ingredients. In the older practice the quantities probably varied, and features of the later practice which have been noted are the fixing of the measure (Ex 46 7, 11, 14), the prohibition of leavened bread and honey (Lv 211), and the substitution for ordinary meal of a fine sort of flour (Wellh. *l.c.* p. 441). (1) Among the *independent Meal-offerings* we place the list in Lv 2, although it has been strongly contended, chiefly on dogmatic grounds, that a bleeding sacrifice is presupposed as a basis (see review of opinions in Kurtz, p. 304 ff.). (a) *Varities* are distinguished according to the different processes used in preparing the flour, viz. kneading it with oil, baking it in an oven, a baking-pan, or a frying-pan, and bruising ears of corn. (b) *Other ingredients* added were, in all cases salt (213), in most cases oil, in one case incense (v. 15). Under stress of poverty a cereal oblation might also be presented as a Sin-offering, but without oil or incense (5116). (c) *The ritual* resembled that of the Sin-offering so far as consistent with the difference of material—a portion being consumed by fire on the altar, while the remainder fell to the priests (Lv 614²). (d) *The effects* of covering sin, and delivering from its consequences, are ascribed to it in common with the Sin-offering (614, but see PROPTIATION, § 11 g). Special effects which are attributed to it are such as the insurance of the reliability of the trial by ordeal (Nu 5116), where oil and incense are excluded.

(2) As a concomitant of the animal sacrifices the Meal-offering had a prominent place in the sacrificial system. It was indeed laid down that no Burnt-offering or Peace-offering was legitimate without the cereal oblation (Nu 15, 28, 29). In the public worship of common days and festivals it bore a stated propor-

tion to the number and material of the burnt-offerings (Nu 15¹⁸). Occasions where the material and the ritual undergo modification are the consecration of the priests (Lv 8²⁶), the presentation of a thank-offering (7¹²), and the sacrifices of the Nazirite (Nu 6¹⁷).

The *Shewbread* is regulated by a minute ritual (Lv 24^{5ff.}), specifying the material, the number and size of the cakes, the manner of their arrangement on the table, and the use of incense (v. 7). The sacrosanct character of the offering, of which part fell to the priests, is emphasized, and it seems to have the special significance of recalling to God the terms of His covenant (v. 7). See, further, art. *SHEWBREAD*.

(iii.) *Drink-offerings and Incense-offerings*.—The libation (קִרְבָּן, LXX σπονδή) appears at this stage only as an accompaniment or element of another kind of offering.

We have already met with oil as an ingredient of sacrificial cakes. Ezek. (46²⁵, 46¹⁴) and P (Numb.) fix the quantity, though with variations, required in consideration of the number and quality of the victims. Neither in this case nor in that of wine (Nu 18) is anything said of the manipulation of the Drink-offering. The oil was probably used in part for kneading, in part treated as a libation. The wine was probably poured into a gutter, whence it drained into the ground.

On the *Incense-offering* (קִרְבָּן, LXX θυμίαμα, מִקְטָר קִרְבָּן) see art. *INCENSE*; and on other forms which would fall to be noticed here, see *FIRST-FRUIITS*, *TITHES*, and art. *PRIESTS AND LEVITES*, *passim*.

2. *The Efficacy of the Bloody Sacrifices* is of such importance, and has figured so largely in the history of theology, as to call for separate treatment. The questions that have to be discussed are two—(1) the nature of the benefits which were conceived to flow from the sacrificial worship; (2) the manner in which the offerings were conceived to operate so as to procure the desiderated boons.

(1) *The Benefits procured by sacrifice*.—These fall into two classes, which, to our thinking, are very clearly distinguished. In one group of cases the purpose is the cancelling of guilt, in the other the removal of ceremonial uncleanness. In other words, sacrifice has both a moral and a physical occasion.

(a) *The Expiation of guilt* is the leading purpose of the Levitical sacrifices. Their office is to cover or make atonement for sin. The word employed to describe this specific effect is קָפַר. This efficacy is connected with all four kinds of principal offerings: the objects of the covering are persons and sins, the covering takes place before God, and it stands in a specially close relation to the sprinkling of the blood and the burning of the sacrificial flesh (Lv 1⁴ etc.). The view that the main purpose of the Levitical sacrifices was the obliteration of guilt has, however, been traversed by Ritschl, who finds the necessity for the covering, not in the moral but in the natural attributes of God, not in the sinfulness but in the creaturely condition of man (*Lehre von der Rechtfertigung u. Versöhnung*, Bd. ii.).

קָפַר, originally to cover, then to expiate—either as pleasing God by covering His table, or by hiding from His sight (cf. old Babylonian sacrificial term *kippuru*, 'to wash away, atone,' Zimmern, *op. cit.*, Vorwort). But from what, according to Ritschl, does sacrifice hide? Throughout the OT there is evidence for the belief that to see or meet with God involved destruction (Gn 32³⁰ Jacob, Jg 6²² Gideon, 13²² Manoah), and this being so it was necessary to take measures for self-protection. This was found in sacrifice. 'From the majesty of God *per se* the destruction follows of those who come before His face as perishable creatures—provided that their life is not preserved of divine grace' (p. 203 ff.). To the common view, which makes the sacrifice an atonement for sin, Ritschl objects that it is incredible that God would have prescribed for His covenant people a system which presupposed that they were to be permanently under His wrath. But we have no analysis of the consciousness of those witnessing a theophany which makes it clear that it was the mere presence of God, not of God as holy, that led the Israelite to expect death. In the later period at all events, when the holiness of God and the prevalence and heinousness of sin had been so profoundly realized, it is impossible to doubt that what invested the approach to God with its character of peril was above all the consciousness of the contrast between Divine holiness and human guilt. The strength

of this penitential feeling no doubt varied in the case of different offerings, as well as with different worshippers, but it could never be wholly absent from the educated theocratic conscience. See, further, art. *PROPITIATION*, esp. § 17.

(b) *Purification from physical uncleanness*, as a condition of re-entering the religious life of the community, is also an important function of sacrifice. The circumstances constituting this ceremonial uncleanness are mainly three—participation in the processes of sexual life, contact with a corpse, and recovery from leprosy.

(a) As regards the first category, there were degrees of uncleanness, and the major degree, which entailed a sacrificial purification, attached only to morbid sexual conditions and to the position of a woman after child-bearing (Lv 15, 12^{2ff.}). The sacrifices prescribed for the purification of a mother were a lamb for a Burnt-offering and a dove for a Sin-offering.

(b) The defilement diffused by a *dead body* was intense, long-sustained, and removed in a peculiar way (Nu 19¹⁶, 18, 31¹⁹).

The *Sacrifice of the Red Heifer* (Nu 19^{1ff.}), which was appropriated to purify from this form of defilement, presents certain curious features of ritual. The victim is a red heifer without spot (v. 2). The use of the blood is confined to sprinkling seven times towards the sanctuary. With the Sin-offering it has a certain affinity, but in this case the whole of the carcass—skin, flesh, blood, and dung, mixed with fragrant ingredients—is burned without the camp. The extraordinary feature of the offering, however, is that the main purpose is the procuring and reservation of the ashes (v. 9). These gave its virtue to the holy water which was sprinkled on the third day on those contaminated by the neighbourhood of the dead, and this procured them purification on the seventh day (v. 12). For a discussion of the symbolism see Kurtz, p. 422 ff.; for the evolutionary aspect, *RS²* pp. 351, 354, 376. See, further, art. *RED HEIFER*.

(c) The recovery of a *leper* was marked by two series of rites (Lv 14¹⁻³²). In the first stage one bird was killed over a vessel of running water, and another, after being dipped in the coloured water, was allowed to escape (vv. 5, 7). In the second stage the man offered a Guilt-offering, a Sin-offering, and a Burnt-offering (vv. 13, 31)—with the peculiar provision that blood from the Guilt-offering was smeared on the right ear, the right thumb, and the right great toe of the offerer (v. 14). The same rite was observed for the purification of houses infected in some such way as is typified to us by 'dry-rot' (14^{35ff.}; see art. *LEPROSY*).

In the matter of these purificatory rites, two outstanding facts have to be explained—the temporary isolation of persons and families under certain physical or pathological conditions, and the association of sacrifices of an expiatory kind with their readmission to the life of the community. The temporary isolation has its manifest explanation in a regard to the health of the community, which recognized permanent sources of danger in the sexual life as well as in leprosy and the death-bed. Less apparent is it why the same kinds of sacrifice which expiated guilt should have been required in connexion with events with no moral complexion—such as the natural calamity of disease, and the joyous event of birth. But the matter becomes partially intelligible when we recall the doctrine, widely operative in OT, as to the strictly retributive character of natural evils. When sickness was interpreted as a judgment because of open or secret sin, when death, especially premature or sudden death, was similarly construed, the obvious procedure was to approach God with a remembrance of the procuring cause, and to make atonement for the guilt. Nor is it difficult to bring child-bearing within the same sphere of ideas. The pangs of child-birth were naturally regarded from this standpoint as penal: in J they were interpreted as a punishment expressly inflicted because of woman's share in the primal sin (Gn 3¹⁶); and it is quite intelligible that on restoration to the fellowship of her people the mother's sacrifice should be directed to cancel the guilt in which her sufferings were believed to have their spring. See, further, art. *UNCLEAN, UNCLEANNESS*.

(c) *The Consecration of persons and things for sacred uses* appears as a further prominent function of the Levitical Sacrifices. The ceremonies at the consecration of the priests have been discussed elsewhere (see *PRIESTS AND LEVITES*, pp. 70 f., 83).

The consecration of the temple-furniture by means of sacrifice, esp. the Sin-offering, is a prominent feature in the ordinances of Ezekiel (43^{25ff.}). In Exodus minute instructions are given as to the consecration of the tabernacle in all its parts by means of holy oil (30^{22ff.}, 40¹⁻¹⁵, cf. Lv 8^{10, 11}). The idea of giving to a building and to its furniture the character of physical holiness was certainly antique, and even yet maintains its ground in opposition to the view that the only character which consecration can confer on material objects is reservation for religious uses. It had its

roots in the conception that God is merely a visitor on earth, and that He can only appear in those places which have been detached from the earthly sphere, and which have acquired certain of the characters of His heavenly home (Jn 4^{30, 21}).

(2) *The Sacrificial Theory of the Levitical legislation.*—The theory has been the subject of keen and prolonged controversy. That the sacrificial worship was ordained as a means of grace, and indeed as a condition of pardon and communion, is evident; but we have further to ask what was the precise function ascribed to sacrifice in the legal economy. And at this stage, it may be confidently premised, the sacrificial theory has shed the anthropopathic ideas which operated in the earlier ages. If the ritual embodied forms and phrases descending from the period of religious childhood, the crude ideas which first shaped them had been outgrown and forgotten. The theology of the prophets had too deeply saturated the religious thought of Israel to make it possible for any but an elevated doctrine to gain official recognition. The gift-theory of Spencer, as Bähr observed, is involved in insurmountable difficulties if the attempt is made to prove its vitality and persistence in an age whose consciousness was dominated by the unity and spirituality of God (*Symbolik*, ii. 275). Equally does the same objection press against the view that the sacrifice may still have been construed as a gratifying meal; while it is generally admitted that the theory of a communion physically mediated by the sacrificial feast, whatever part it may have previously played, was now quite outside the horizon of Israel's religious teachers. Another theory, which has also had some vogue, may be summarily set aside as belonging to a plane of thought incompatible with the deeply religious spirit of the Pentateuch. This is the view which reduces the system to the level of police regulations by interpreting the sacrifices as essentially fines, and as primarily designed to punish and check wrongdoing. The explanations of the Levitical sacrificial theory which have so far survived in the controversial struggle operate with higher forms of thought. These explanations vary not a little in detail, but substantially they may be reduced to three types according as they seek to elucidate the subject with the help of the three Christian categories of substitutionary satisfaction, prayer, and sacrament. In addition, there is a widely diffused opinion that either no sacrificial theory is propounded, or that it is not consistently carried through in the later legislation.

(i.) *The theory of a Penal Substitution* is entitled to precedence, not only on historical grounds, but also because of the *prima facie* support which it has in the biblical evidence. The salient points of the theory may be summarized as follows—(1) as a sinner the offerer was under the wrath of God, and his life was forfeited; (2) by a gracious provision he was permitted to substitute an immaculate victim, to which his guilt was transferred, and which was put to death in his stead; (3) the vicarious death of the victim was accepted by God, who, on the ground of the satisfaction offered Him, received the worshipper to peace and fellowship. As to a fourth point—wherein the ground of the satisfaction lay—opinion has differed within the school. The usual Protestant view has been that the ultimate ground of the sinner's acceptance was the sacrifice of Christ which the victims typified, and even that reflective minds might have risen at the OT stage to a realization of this real ground of forgiveness with which their typical ritual brought them into touch. Others held that the sacrifices had *per se* a true expiatory efficacy in relation to the sins of the offerers (see Outram, p. 248 ff.; Fairbairn, ii. p. 304).

The essential feature of this theory, then, is that the death of the animal victim was of the nature of a vicarious punishment—i.e. 'some evil inflicted on one party in order to expiate the guilt of another, in the sense of delivering the guilty from punishment, and procuring the forgiveness of sin' (Outram, *ib.*). The evidence on which chief reliance is placed is contained in the ritual of the Day of Atonement (see AZAZEL). In this ceremony it is distinctly stated that the high priest confesses the iniquities of the children of Israel over the scapegoat, that the goat carries their iniquities away into the desert, and that he who lets the goat go incurs defilement (Lv 16^{20, 21}). In the case of the Sin-offering there is a similar contamination conveyed by the victim (v. 23), and, although the transference of guilt is not expressly mentioned, it is argued that this offering is clearly governed by the same ideas. Further, it is contended that the acts common to the ritual of all of the bloody sacrifices are expressions of the substitutionary idea. (a) The immaculate quality of the victim fitted it to take the place of the guilty; (b) the imposition of hands had the significance of setting it apart as a substitute, or imputing to it the sinner's guilt, or both; (c) the slaughter of the victim was the carrying out of the penal substitution; (d) the sprinkling of the blood on the altar attested to God that an animal had been slain as an atoning sacrifice; (e) the consumption by fire had the significance, on the older view, of the consignment of the substitute to eternal fire,—on the newer, of bringing the transaction before the mind of God (Kurtz, pp. 123-149; Fairbairn, ii. p. 302 ff.; Cave, p. 123 ff.). In the judgment of most modern scholars, the theory in question is untenable, and for the following reasons: (α) the death of the victim cannot have been vicarious, since sacrifice was not allowed for sins which merited death (Nu 15³⁰), only for venial transgressions; (β) a cereal offering might also atone (Lv 5¹¹⁻¹³), and in this case there could be no idea of a penal substitution; (γ) the victim was slain by the offerer, but on the theory in question should have been put to death by the priest as God's representative; (δ) the assumption that the imposition of hands involved a transmission of guilt is inconsistent, not only with other references to this practice, but with the fact that the sacrificial flesh was treated as most holy, and might be eaten by the priest; (ε) the central act of the sacrifice was, not the act of slaughtering, but the manipulation of the blood, which was viewed as the seat of the animal soul, or as a life which was presented to God (Dillmann, *Alttest. Theol.* p. 468. On the Imposition of Hands, see Driver's note in *Priesthood and Sacrifice*, p. 89).

Of the above arguments, at least (α), (γ), and (δ) are of undeniable weight; but how much do they prove? Simply this, that the idea of penal substitution is not one which has been consistently transfused throughout the entire sacrificial system. The various kinds of animal sacrifice, with their common element of ritual, are certainly not the creation of one man, or of one school, by whom they were shaped with a single eye to making them the vehicle of a particular sacrificial theory. The sacrificial system of P clearly embodies a large inheritance of forms and usages which had been created by earlier modes of thought, and the legislators did not feel called upon to recast every rite in a spirit of doctrinaire consistency. But when this has been said the possibility still remains that the sacrificial forms of most recent growth, and the most likely therefore to reveal the ideas of the compilers, embody the idea of propitiation through penal substitution. In the case of the sacrifice on the Day of Atonement, as we have seen, there is a transference of guilt, and the conclusion is drawn that the flesh becomes unclean; in the case of the Sin-offering as much is suggested; and it is a reasonable view that the interpretation thus given was meant to supply a key to the less articulate language of the other bloody sacrifices. The *locus classicus*, Lv 17¹¹, is not sufficiently definite to serve as a ground for rejecting the view. Moreover, the presuppositions of such a sacrificial theory were already recognized in OT religion. That sin is universally prevalent, that it provokes the Divine anger, and that its due recompense is suffering and death, had long been axiomatic in the higher teaching, and had been impressed upon the popular mind by numerous examples of public and private judgments. Further, the prophets had been wont to describe the judgments of God upon the nations as sacrifices, and it was a familiar enough idea that the consummated sacrifice was one in which the vengeance of God was fully wreaked upon a people in the carnage of a battlefield, or in the atrocities of the sacked city.

On the prophetic view, indeed, as has been maintained, there were only two possible modes of Divine reaction against sin—viz. the execution of the destroying purpose, or forgiveness on the ground of repentance and reformation. But there was a third possible development of thought. The sacrificial system was maintained, and even grew in honour, and it was an obvious reflexion that, in place of the consummated sacrifice of destruction spoken of by the prophets, God accepted as a surrogate the sacrifice of animal victims. That the idea of substitution was already familiar appears from Gn 22¹³ (offering of a ram in place of Isaac), and at a late stage the vicarious idea is used to explain the sufferings of the righteous Servant of Jehovah (Is 53). And given the doctrine that sin entailed death, and that one being might suffer in room of another, it was a highly natural, if not an inevitable step, to go on to suppose that the rite of sacrifice combined the two ideas, and that the slain victim bore the penalty due to the sinner.

(ii.) *The Prayer-theory* may serve to designate the group of interpretations which rest on the fundamental idea that the efficacy attached to sacrifice was due to the fact that it symbolized the religious sentiments which are the condition of acceptance with God. While on the former view the victim is held to take the place of the offerer in bearing the doom which he has merited, on this view it is held to be the mere vehicle for the expression of his devout sentiments and longings. The purpose of the sacrifice, as with prayer, is to serve as an index of what is in the worshipper's heart, and its virtue is exhausted in bringing this before God. Further, as prayer is of various kinds, so different writers have given to sacrifice varying interpretations corresponding to these kinds: by Philo, e.g., it is construed as chiefly expressive of spiritual aspiration, corresponding to the prayer of supplication; for Bähr it has the function of expressing hatred of sin and self-surrender to God, corresponding to the prayer of confession and supplication; while Maurice also emphasizes the note which corresponds to the prayer of adoration.

The views of Bähr, though he adopts a different rubric, belong to this type. He finds the key of the system in Lv 17¹¹—'the soul placing itself at the disposal of God in order to receive the gift of true life in sanctification' (p. 211). From this point of view the ritual undergoes a new interpretation. A valuable and unblemished victim is selected as symbolical of the excellence and purity to which the offerer aspires; the death is necessary only in order to procure a life which may be offered to God; the sprinkling of the altar is the presentation of the life, still resident in the blood, to God. A simpler version of the theory is given by Oehler, who emphasizes the vital point in saying that 'the self-surrender of the person sacrificing was accomplished vicariously in the offering' (p. 682); and the discussions of Maurice centre round the same idea (p. 67 ff., 'The Legal Sacrifices'). Schultz holds that the Priestly Code was strongly dominated by the teaching of the prophets, and that the significance of all kinds of offerings was simply that which belongs to genuine worship. The Burnt-offerings and the Peace-offerings were a mode of adoration, while 'the ground of purification in the Sin-offering (and the Guilt-offering) is that God accepts the sacrifice, and that man in this offering, enjoined by God as the embodied prayer of a penitent, expresses his confession, his regret, his petition for forgiveness' (*Amer. Journ. Theol.* 1900, p. 316).

The exegetical arguments by which this view has been supported are of no great cogency. Lv 17¹¹, on which Bähr places such reliance, is at the most a contribution, though this doubtfully, to the view that the atoning element was the pure life which was offered, not the death through which it passed. In any case it does not give expression to the characteristic idea of the symbolical theory. 'It is never said in any manner of circumlocution that the blood of the animal slain atones for the offerer by symbolically representing the soul of the offerer' (Cave, p. 250). The inarticulate evidence of the ritual is no more favourable. It is true that it can be so interpreted as to fall

in with the theory, but no part of the rites or appended commentary speaks so strongly for the theory as do the sacrifices of atonement for the idea of vicarious punishment. A further objection which has been pressed by Kurtz and others is, that it is alien to the spirit of revealed religion as the religion of grace, inasmuch as it grounds the acceptance of the sinner upon his own worthiness, or at least on the worth of his sentiments and resolutions. This, however, is indecisive: to say that prayer alone is efficacious is not to say that it is meritorious. Weightier is the objection, that on the Prayer-theory correct ritual could not claim the paramount importance which it possesses in the Priestly Code. Further, the view could never be popular that sacrifice had no efficacy other than that of a vehicle for the expression of the spirit of worship; and the Priestly Code, which has all the character of a popular religion, may well be supposed to have taken account of the common need, and to have supplemented the spiritualized thought of the prophets on the subject of sacrifice with a theory which made the offering an objective, an independent, and as such a deeply efficacious ground of obtaining or preserving the favour of God.

(iii.) *The Sacramental idea* has also been widely used to elucidate the sacrificial theory of the Pentateuch. But to describe the sacrifices as of the nature of sacraments does not supply a definite theory as to the real questions at issue. The category called in to explain the problem is itself ambiguous, and when it has been accepted it has still to be explained whether the efficacy of a sacrament is understood in the Roman or the Zwinglian sense, or in accordance with an intermediate type of doctrine.

Thus a Protestant theologian claims for the sacrifices that they possess the sacramental notes; they were signs of spiritual realities: they not only represented but sealed and applied spiritual blessings, and their efficacy was proportioned to faith (Scott, *Sacrifice*, p. 288). Similarly, a Roman Catholic divine teaches that there were certain Mosaic ceremonies to which something of a sacramental character attached, notably the Passover, which corresponded to the Eucharist, the purificatory rites, which corresponded to the sacrament of penance, and the consecratory sacrifices, which corresponded to the sacrament of ordination (Hunter, *Dogmat. Theol.* iii. 172). But this means only that they have agreed to use the same name, not that they are at one as to the theory of the *modus operandi*—which is the point in dispute—of the OT sacrifices. That the use of the sacramental rubric, so far from introducing us to a definite theory, rather serves to obscure the issues, appears from the fact that it is adopted by writers who differ *toto cœlo* as to the rationale of sacrifice. 'The acceptance of the sacrifice by Jehovah,' says Bähr, 'and His gift of sanctification to the worshipper, gives to the sacrifice the character of a sacramental act' (ii. p. 211). At the same time Cave, who devotes considerable space to the refutation of Bähr's distinctive positions, discusses the nature, the method, the extent, and the efficacy of the Mosaic atonement under a title which affirms that the Mosaic sacrifices had 'a sacramental significance' (p. 138 ff.). Yet again the sacramental title has been claimed by Robertson Smith for the idea, which is not alleged to be consciously present in the Priestly Code, that the union of the worshippers with their God was cemented by the physical bond of a common meal.

Reasons might, indeed, be given for resting satisfied with the Sacramental interpretation—as that it does justice to the element of mystery, or that it contributes a formula in which those may rest who think the controversy fruitless. But an independent theory it is not, and when closely examined is found to branch off either into the Prayer-theory, or into some modification of the doctrine of an objective atonement, which has its chief illustration in the theory of penal substitution.

(iv.) There remains the view that *no sacrificial theory underlay the Levitical code*. The earlier ideas, which attached themselves to the efficacy of a gift or of a uniting meal, had been discredited in the course of religious progress, and the legislation, it is supposed, had nothing definite to put in their place.

'A precise answer to the question how the sacrificial worship influenced God, men were unable to give.' What was certain was that it was of Divine appointment; for the rest it was a mystery. 'When, in the blood of the Sin-offering, the tie between God and His people was renewed, what was felt was the weird influence of the incomprehensible' (Smend, p. 324).

The impression made by the code, however, rather is that the matter was so well understood as not to require explanation, than that it was so mysterious as to be incapable of explanation (cf. Lv 17¹¹). It seems, besides, improbable, in view of the share that the mind invariably claims in religion, and of the fact that every preceding phase had its accompaniment of illuminating idea, that at the culminating stage thought abnegated its function, and took refuge in the category of mystery. More likely is it that the step deemed by Holtzmann inevitable at a later stage was already taken, and that the chaos of confused ideas resulting from the discredit of old views was averted by the assertion of the substitutionary idea—'the most external, indeed, but also the simplest, the most generally intelligible, and the readiest answer, to the question as to the nature of expiation' (*Neutest. Theol.* i. p. 68).

vii. SACRIFICE IN JUDAISTIC PRACTICE AND DOCTRINE.—The authority of the Pentateuch ensured for its sacrificial legislation a prominent place in the religious life of the Jewish people subsequent to the Exile. By the destruction of the Second Temple, a revolutionary blow was subsequently struck at the sacrificial system, inasmuch as offerings could no longer be presented at the place and in the manner appointed by God. In the necessarily brief sketch of this part of the subject, we confine our attention to the two points of outstanding interest—the theory of sacrifice prevalent in the Jewish schools before the rise of Christianity, and the way in which Judaistic thought, after the destruction of Jerusalem, accommodated itself to the suspension of its sacrificial cult.

1. *The old Jewish theory of sacrifice*, could we be confident of recovering it, would possess priceless interest as helping to elucidate the sacrificial ideas of those who, like St. Paul, passed through the school of the synagogue. Unfortunately, the date of the material collected by Weber (*Jüd. Theol.* 38 ff.), and utilized by Pfeleiderer and Holtzmann, is somewhat uncertain; and it is always open to doubt whether a dictum is not a product of later Talmudic reflexion. The ideas and tendencies most satisfactorily vouched for may be thus summarized:—

(a) Sacrificial worship was not regarded as of pre-eminent importance, but was co-ordinated, as a condition of pleasing God, with knowledge of the Law, and with the performance of good deeds. That a higher valuation of sacrifice did not obtain was due partly to prophetic influence, partly to the later developments of the religious life. The temple had now its complement and competitor in the synagogue, which was the sphere of the larger part of religious activity, as being the ordinary place of worship; and, as the exposition of Scripture and tradition was the most prominent element in the worship of the synagogue, the Rabbi and the scribe tended to overshadow the priest in popular estimation. Thus a dictum ascribed to the period of the Second Temple has it that an ignorant high priest is inferior to the wise man, even though the latter be a 'bastard' (Weber, p. 38).

(b) Recognition is accorded to a class of acts serving a function similar to animal sacrifices, but belonging to a higher order. To this category belong the merits of the forefathers. The merits of Abraham, in particular, served to cover the sins of his posterity. Suffering especially had expiatory quality. By penal and disciplinary sufferings, and above all by death, atonement was made for sin. A much higher degree of efficacy attached to the sufferings and death of the righteous, as foreshadowed in Is 53. The death of the righteous is expressly compared, in point of efficacy, to the Day of Atonement (*Pesikta*, 174b). The trial of Abraham, the lamentations of Jeremiah, all the dolor of the prophets, and all the anguish of the martyrs, constituted a ground for the forgiveness of sin in Israel. Even the penal sufferings inflicted by God upon the Egyptians and other hereditary foes of Israel have the character of a ransom for the chosen people (*Weber*, p. 326 ff.; cf. *Holtzmann, Neutest. Theol.* i. p. 64 ff.).

(c) Interpretation of sacrifice in the sense of substitution. The rise of ideas of substitution with imputation of guilt and merit has been indicated in the previous section. If, as is probable, these were already associated with the sacrificial system, it can be readily understood how they were extended to explain the merits and the sufferings of the fathers. If, on the other hand, they originated independently, it cannot be doubted that at this period they profoundly influenced the sacrificial theory. From the belief in the vicariousness of the death of the righteous, it was an easy, an inevitable transition, to belief in the substitution of the animal victim. The idea of penal substitution supplied an intelligible popular answer to the question, which could not fail to be raised, as to why and how sacrifice procured the favour of God; and although express statements of the idea are few (2 Mac 7³⁷, 4 Mac 6²⁹), the evidence points to this mode of thought having become current. 'Everything pressed towards the assumption that the offering of a life, substituted for sinners according to God's appointment, cancelled the death penalty which they had incurred, and that consequently the offered blood of the sacrificial victims expiated sin as a surrogate for the life of the guilty' (*Holtzmann*, p. 68). The Philonic interpretation of sacrifice as symbolic of self-sacrifice was too philosophical and gave too little religious assurance for general acceptance.

During the period in question, the sacrificial regulations were observed with the utmost scrupulosity, and with all due pomp and solemnity. But at the same time a process was going on which was loosening the hold of sacrifice upon the Jewish mind, and in which the conviction was already finding half-articulate expression, that it was not a complete provision, and even that it was not vital to the communion of the people with God. Had no such loosening taken place, it is difficult to conceive how faith in God could have survived the blow which at one and the same time robbed the Jews of their fatherland and their organized national worship. A living belief in the necessity would naturally have issued, when sacrifice became impossible, in apostasy to heathenism.

Of sacrificial practice at the close of the period some glimpses are given in NT. Allusion is made to the sacrifice of the minor Burnt-offering at the presentation of Jesus (Lk 2²⁴), the sacrifice of the Passover (Mk 14¹⁹), the union in sacrifice of a Galilean group (Lk 13¹), the offering after recovery from leprosy (Mt 8⁹), the votive offering (Ac 21²⁰), and money offerings (Lk 21⁴). Josephus gives a somewhat minute account of the sacrificial system for the information of the Gentile world (*Ant. passim*), leaving the impression that it was thoroughly normative for contemporary practice. The intermission of the sacrifices offered for Caesar's prosperity marked the beginning of the Jewish war (*BJ* ii. xvii. 2). The seizure by John of the store of wine and oil, used in the Burnt-offerings, and their distribution among the multitude, made the Roman conquest, he thinks, only a merited counterpart of the doom of Sodom (v. xlii. 6).

2. *Readjustment of Judaistic thought with the cessation of sacrifice*.—To the new conditions created by the destruction of the Temple, theology accommodated itself by the theory that other observances were accepted as a substitute for sacrificial worship. The study of the Law took the place of the rites of the altar, and even took over the characteristic designation of the latter (מִשְׁכָּן). The knowledge of the Law, it was taught, was more valuable in the sight of God than the continual Burnt-offering, and even than the building of the sanctuary (*Megilla* 3b, 16b). In particular, it was held that the duty of offering the legal sacrifices had been superseded by the duty of studying the laws relating to the subject (*Pesikta* 60b). The other observance which is treated as an equivalent for the abolished service is Prayer, in accordance with which a parallelism was worked out between the order of the daily sacrifices and the order of daily prayers, and also between the varieties of sacrifice and the different kinds of prayer (*Weber*, p. 38 ff.).

It was also natural that the idea of the merits of the righteous, especially of pious sufferers, should continue to gain in significance and emphasis. The destruction of Jerusalem comprehended an unparalleled tale of horrors, and involved in suffering and death many innocent and right-

eous persons; and it might well be believed that this was a consummated sacrifice whereby full atonement had been made for national sin (Weber, p. 323 f.).

B. THE SACRIFICIAL DOCTRINE OF NT.

It is open to question whether in an undisturbed course of development sacrifice would have maintained its place in the religion either of the Jewish or of the Græco-Roman world. On the one hand, it possessed many features which justified its position as the central religious rite—it lent itself to imposing ceremonial, it was peculiarly fitted to thrill the physical nature of the worshippers, it satisfied the instinct which prompts men to give to God what costs them something, it supplied an external ground of confidence, and it was hallowed by its immemorial antiquity. But, on the other hand, it was menaced by more than one factor in the higher civilization of the ancient world. On the æsthetic side there must have been some considerable feeling to the effect that the public slaughter of cattle, especially with such accompaniments as were observed at Roman festivals, could not be retained in a period of advancing refinement as the appropriate form of worship. Still more, the conceptions of God prevalent in the Stoic and Platonic schools raised the question as to whether animal offerings were really acceptable to God, while the scepticism of others turned upon the system the shafts of ridicule. The Jewish Church, in its turn, contained within it, in the prophetic teaching, a set of principles which at least involved the conclusion that sacrifice was unnecessary, from which it was no long step to the position that it should be discontinued. But, whatever the issue might have been in the natural progress of refinement and theological reflexion, the question was settled both for the Jewish and the Gentile world by two extraordinary events. The destruction of Jerusalem, as we have seen, brought about the abolition of sacrifice in one way, and in another Christianity destroyed the system in the name of a higher fulfilment.

I. NT APPRECIATION OF THE OT SACRIFICES.—The teaching of Jesus on this subject, as recorded in the Synoptic report, has two outstanding features: (1) the recognition of the Divine authority of the sacrificial law, and of its binding character upon the Jews; (2) the accentuation of the prophetic doctrine of the pre-eminence of the moral over the ceremonial. He assumes that His hearers offer sacrifice (Mt 5²³), and He enjoins a recovered leper to make the offering required in the Law (8⁴). Did He Himself join in the sacrificial worship? He whose presentation as an infant was accompanied by a Burnt-offering, whose death was preceded by the celebration of the Passover, and who made it a maxim to conform to the laws of the Jewish Church even when knowing Himself unbound by them, certainly did not hold aloof from the temple-worship of which sacrifice was the central act. With equal certainty we may assume that it was only as an element of collective worship that sacrifice was used by Him. But, while at this stage sanctioning sacrifice, He adopts the saying of Hosea that 'God will have mercy and not sacrifice' (Mt 9¹³ 12⁷), and accounts the scribe who gives a similar valuation as not far from the kingdom of God (Mk 12³⁴). The second prophetic axiom, that sacrifice is worthless with unrepented sin in the background, finds utterance in Mt 5²³⁻²⁴. Had this been all the evidence, it could have been held, and with greater confidence than in the case of the prophets, that Jesus contemplated the continuance of sacrifice as a subordinate element in the religious life. The abolition is involved in the announcement of the establishment of a new covenant (Mt 26²⁸, Mk 14²⁴; Lk 22²⁰), with the implication of the disappearance of the old economy and all its sacrifices.

The direct references of St. Paul to the subject are not numerous. The observance of the sacrificial law was still maintained to some extent among the Jewish Christians, and the apostle on one occasion associated himself with four men who went through a purification ending in offering (Ac 21²⁶). In 1 Co 10¹⁸ he speaks as if the purpose and significance of one kind of sacrifice were well understood: "we are dedicated to establish communion or fellowship with God, it might be with demons, and of the worshippers one with another, through the medium of the sacrificial meal. The principal aspect in which the OT sacrifices presented themselves to Him was the typical. In themselves they belonged to the beggarly elements, but they pointed forward to a satisfying and enduring ground of reconciliation with God.

The Epistle to the Hebrews contains an express and full discussion of OT sacrifice. As kinds it distinguishes gifts and sacrifices—i.e. unbloody and bloody offerings, and regards the sacrifices of the Day of Atonement as the crown of the system. The purpose was deliverance from sin (5¹), the beneficiaries were priests and people, but the contemplated end was not fully attained. That they were ineffectual for the purpose in hand was proved from the restricted scope of their claim ('sins of ignorance,' 9⁷), from the imperfections and burdened consciences of the worshippers (10²⁻³), from the necessity of the repetition of the offerings (v. 2), and from explicit declarations of God (v. 3). The conclusion is that they accomplished only a bodily or ceremonial purification (9¹³), and that, as merely typical of a real salvation, they were a transitory provision (10¹). In so far as blessing flowed from them in the old dispensation it was attached to the faith accompanying them (11⁴).

In general we should distinguish two stages in the thought of the apostles on this subject. In the pre-Christian stage they had believed in the full efficacy of the Levitical sacrifices, and in the Christian they regarded them as chiefly valuable because of their witness to their own inadequacy, and to the complementary work of Christ.

ii. THE PERFECT SACRIFICE OF THE NEW COVENANT.—It was, then, axiomatic for the NT writers that the system of OT sacrifices had been abolished by Christ. This conclusion was not, however, founded on the belief that sacrifice was a superfluous rite, but on the conviction that the OT sacrifices, which had possessed some value relative to their time, had been superseded by a sacrifice of a nobler nature and of absolutely certain efficacy. This was the sacrifice offered up by Christ. In the NT doctrine of Christ's sacrifice, now, we may distinguish five points, on three of which the testimony is unmistakable, while the other two are left in some obscurity. The points on which the teaching is clear are (1) the sacrificial character of Christ's death, (2) the blessings which proceed and flow from it, (3) the conditions on which these are appropriated. The debatable ground is reached when it is attempted to fix the NT conception of (4) the nature or material of Christ's offering, and (5) the manner in which it operated towards God as the procuring cause of the blessings of redemption.

(1) *The interpretation of Christ's death as a sacrifice* is imbedded in every important type of the NT teaching (Ritschl, ii. p. 161; Cave, p. 284). The silence of St. James and St. Jude raises no presumption against the idea being part of the common stock of Apostolic doctrine. It has been denied that St. Paul adopts the category (Schmidt, *Die paul. Christologie*, p. 84), but the denial rests on dogmatic rather than on exegetical grounds (Ritschl, ii. p. 161). The interpretation was given by Jesus in connecting His death with the Sinaitic sacrifice of the Covenant (Mt 26²⁸, Mk 14²⁴, 1 Co 11²⁵), and it is expanded and presented by the apostles under various points of view.

The evidence for the Apostolic construction is as follows:—(a) It is expressly stated that Christ was offered as a sacrifice—*σπασμένη* (Eph 5², He 9¹⁴), *θυμία* (Eph 5², He 9²⁶). (b) A saving efficacy is ascribed to the blood or the cross of Christ, and in these cases the thought clearly points to the forms of the altar (Ro 3²⁵ 5⁹, 1 Co 10¹⁶, Eph 17¹³, Col 1¹⁰, He 9¹² 14, 1 P 12¹⁹, 1 Jn 17⁵⁶, Rev 1⁵). (c) The correspondence is worked out between Christ's death and the different OT sacrifices—esp. the Sin-offering (Ro 8³, He 13¹¹, 1 P 3¹⁸), the Covenant-sacrifice (He 9¹⁸⁻²⁰), the sacrifices of the Day of Atonement (He 21⁷ 9²⁶), and the Passover (1 Co 5⁷). (d) The distinctive acts of the OT sacrificial ritual are shown to have been repeated in the experience of Christ—the slaying of the immaculate victim (Rev 5⁶ 13⁸), the sprinkling of the blood, both in the sanctuary as in the sin-offering (He 9¹³⁻¹⁴) and upon the people as in the Covenant-sacrifice (1 P 1²), and the destruction of the victim, as in the case of the Sin-offering, without the gate (He 13¹⁵) (Ritschl, ii. p. 157 ff.; Sanday-Headlam, *Romans*, v. 91). (e) The specific effect of sacrifice—expiation or pardon of sin—being ascribed to Christ's death, points in the same direction (ib.).

Nor for the apostolic age was the description of Christ's death as a sacrifice of the nature of a mere illustration. The apostles held it to be a sacrifice

in the most literal sense of the word, and it is not difficult to appreciate various reasons why they clung to, and even gloried in, this interpretation of the death. It was not merely that they received it with the impress of Christ's own authority. It provided them with their best defence against a popular calumny: without altar and offering Christianity lent colour to the suspicion that it was at bottom irreligious if not atheistic, and the one effective means of removing the natural prejudice was to show that it embodied the doctrine of a literal and necessary sacrifice. Further, it solved to their own minds the speculative difficulty arising out of the death of Christ. Judged by acknowledged canons, His crucifixion had the aspect of a retributive judgment,—at the least, of a repudiation of His mission by God; but this explanation, in view of their faith in Christ and the event of the resurrection, was an impossibility. On the other hand, it was not intellectually satisfying to treat it as a mere mystery, and to point to the fact that it had been foretold by the prophets. The needed intellectual relief was found in bringing it under the category of the victim-death which God had of old appointed, not as the punishment of the victim's sin, but as a means of blessing to others. Above all, the sacrificial interpretation met a religious want—the need, all but universally felt, of a ground of confidence external to self on which to rest in approaching the majesty and holiness of God.

(2) *The benefits procured by Christ's sacrifice* are coextensive with the blessings of the gospel, and may be distinguished as primary and derivative. The primary effects are that it sets man in a new relation, on the one hand to God, on the other to sin. By St. Paul special prominence is given to the new relationship which it establishes between God and the sinner; on this ground the sinner is justified or accepted as righteous (*δικαιώσις*, Ro 3²⁴⁻²⁵), adopted (*υιοθεσία*, 8¹⁵), and placed on a footing of reconciliation (*καταλλαγή*, 5¹¹). Elsewhere the emphasis is laid rather on its efficacy in procuring the forgiveness of sin, i.e. in saving from the penal consequences which otherwise the curse of the broken law inevitably entails. It is upon this aspect that Christ fastens our attention in speaking of His Covenant-sacrifice (*ἀφέναι τῶν ἁμαρτιῶν*, Mt 26²⁸); the idea of cancelling guilt, of which a vital moment is liability to punishment, is associated with Christ's sacrifice in He 2¹⁷, 1 Jn 2¹ (*ἀλσκαθεῖν* with *ἁμαρτίας* as object, and so 'to expiate'); and the redemption series of terms (*λύτρον*, *ἀπολύτρωσις*, *ἐξαγοράζειν*), while comprehensive of all the aspects of spiritual deliverance in Christ, has special reference to emancipation from the curse of sin or its merited penalties (Eph 1⁷, Col 1¹⁴). Upon these fundamental boons of peace with God and forgiveness follow, in the order of grace, the gifts of the Spirit as the energy of sanctification (Gal 5²²), and as the spring of boundless consolations—viz. peace, joy, hope, assurance, with their fruits (Ro 5²), while the consummation is reached in the heavenly inheritance that is the meet portion of the sons of God (Ro 8¹⁷). In brief, the sacrifice of Christ is represented as the ground of all filial communion with God, as the condition of pardon, as the source of all noble endeavour and true comfort in the life which now is, and as our one warrant for confidence as to the world to come.

(3) *The conditions on which the blessings are procured*, on which the hypothetical becomes actual, are REPENTANCE (*μετάνοια*) and FAITH (*πίστις*). As to the necessity of these conditions the NT writers speak with one voice. Even St. James must have considered faith of vital importance, since otherwise he need not have become a Christian

at all. The one question in regard to which the teaching is somewhat fluid is as to the precise object of the faith which unlocks the treasury of redemption. In Hebrews the conception is very general—the object is God and His promises. In the Pauline theology it is brought into the most intimate connexion with Christ, and includes belief in Him as Messiah, crucified Saviour, and risen Lord (Ro 4²⁴ 10⁹, 1 Th 4¹⁴), issuing in union with the crucified and exalted Christ in trust and self-surrender (Gal 2²⁰).

(4) *The nature of Christ's offering*, and (5) *The mode of its operation*, are two questions which are so closely inter-connected that they may best be discussed in conjunction. So far we have been dealing with the facts of the Atonement as to which the biblical teaching is full and express. These data are, to adopt an old formula—the disease, sin; the remedy, Christ's sacrifice; the application of the remedy, salvation here and hereafter on the ground of repentance and faith. But the medical analogy suggests that the remedy may cure the disease, while yet it may be obscure to the patient wherein precisely the virtue of the curative agent lay, and how it affected his system so as to overcome the disease. Similarly, theology has its questionings, which the NT teaching does not unmistakably answer, as to the precise 'what' of Christ's offering, and as to 'the principle on which the forgiveness of sins is connected with its sacrificial quality' (Ritschl, ii. p. 185).

(a) The references of Christ to His own death, while representing it as conditioning the highest blessings, do not elucidate the connexion between the work and its effects.

The passage in which Christ speaks of Himself as come 'to give his life a ransom for many' (Mk 10⁴²⁻⁴⁵, Mt 20²⁸), has been supposed to contain *in nuce* the solution of the problems of the Atonement. A ransom implies captives (sinners), a hostile power which holds them in thrall (God as the representative and vindicator of the outraged moral law), operation of the ransom (the death of Christ accepted as a substitute for that of sinners), specific effect (deliverance of sinners from the penalties of sin). This elaboration has, however, been challenged at almost every point. It is maintained by Ritschl that the key-word of the passage is erroneously rendered 'ransom,' that as the equivalent of *ῥῆν* it has the significance of a protective covering, and that the way in which it operates to protect us is by stimulating us to self-denying imitation of Christ (*Recht*, u. Vers. ii. 85). Wendt adheres to the ransom idea, but maintains that the specific effect is to deliver from bondage to suffering and death, and that it accomplishes this by teaching us to adopt Christ's sanguine valuation of these evils (*Lehrs Jeru*, ii. 237). According to Beyschlag, the evil from which it was to emancipate was worldly ambition and similar forms of sin, which could not survive the ruin of earthly hopes in the tragedy of the Cross (*Neutest. Theol.* i. 153). The error of this group of interpretations lies in disconnecting Christ's death from the immediate specific effect of expiation or the forgiveness of sin, while the older interpretation unduly exploited the metaphor. All that the passage teaches is that the death of Christ was the means of effecting a redemption from sin (*ἁμαρτίας*) which accrues to the benefit of many. The institution of the Lord's Supper supplies an important reference to our Lord's death:—'This is my blood of the new Covenant, which is shed for many' (Mk 14²⁴); 'this cup is the new Covenant in my blood' (1 Co 11²⁵), to which St. Matthew adds the definition of the specific effect—'for the remission of sins' (26²⁸). These words are important as comparing the death of Christ to the Covenant-sacrifice which accompanied the giving of the Law at Sinai (Ex 24²⁻⁸), and as suggesting that it resembles the latter in its operation and effect. As to the effect of both sacrifices there is not much room for doubt. The Covenant-sacrifice of Sinai ratified the legal covenant between God and His people, the Covenant-sacrifice of Calvary established the Covenant of grace foretold in Jer 31³¹, in which the cardinal boon, as specified in St. Matthew's addition, is the remission of sins. As to the manner of its efficacy we are hampered by the uncertainty as to how the sprinkling of the people with blood in the Sinaitic sacrifice operated, or was understood to have operated, in establishing the Old Covenant. According to the traditional view, the blood of the animal victims, slain in room of the guilty people, and sprinkled on them, was accepted as atoning for their guilt, and hallowed them for entrance on their new relation with God. Again, it has been supposed that the fundamental idea was that the victim represented the two parties in the Covenant, and the killing of it meant that so far as the Covenant was concerned they had no longer will or life, i.e. the Covenant was immutable

(Westcott, *Hebrews*, p. 301). Yet again it has been interpreted as of the nature of a honorific gift which as such was acceptable to God (Wendt, *op. cit.* II. 237). And once more, recurring to the evolutionary account, we might utilize the idea that by sharing the blood God and His people were knit into a close physical union and communion. Corresponding to these accounts the sacrifice of Christ would be necessarily interpreted as efficacious as a penal substitution, as an act declaratory of the immutability of God's gracious purpose, as an acceptable gift of perfect obedience, and as a sacramental act uniting God and man. It thus appears that the conception of the death as a Covenant-sacrifice does not itself yield a theory, but only supplies a form which can be utilized to illustrate a theory otherwise grounded. Probably Christ's meaning was simpler than any that has been specified, viz. that it was God's plan to seal a covenant by a sacrifice, and that, like the Old, the New Covenant, which provided for the remission of sins, had a sign of its origin and validity in the shedding and sprinkling of blood.

(b) The *Pauline Epistles* bring us closer to the familiar theological issues. In view of his speculative interests, it is antecedently probable that St. Paul had reflected on the problems which have proved so fascinating to later Christian thought, while his rabbinical training must have left a deposit of answers to similar questions touching OT sacrifice. As a fact, he makes a large contribution to a theory of the Atonement.

(a) The element of Christ's sacrifice to which decisive importance attaches is the death upon the cross. So vital is this that the gospel may be summarily described as the message of the cross (1 Co 1¹⁸). It is in the death of the Son (Ro 8³¹), in His cross, in the blood of His cross (Col 1²⁰), that the procuring cause is found of the blessings of redemption. It is obviously true that St. Paul recognizes other elements without which the death would have had no significance. Especially does it derive its value from the dignity of the person of Him who was Messiah, declared to be the Son of God in the resurrection, and who is now exalted (Ro 1⁴, Col 1¹⁴). But it was not simply as obedient (Ro 5¹⁹, Ph 2⁸), it was as the obedient One who was slain, and whose blood was spilt, that He had power and prevailed (Ro 3²⁵). 'It is upon the moment of death that the grounding of salvation is exclusively concentrated' (Holzmann, *Neutest. Theol.* II. p. 111).

(5) The sacrifice of Christ had the significance of the death of an innocent victim in the room of the guilty. It is vain to deny that St. Paul freely employs the category of substitution, involving the conception of the imputation or transference of moral qualities. He does not, indeed, expressly say that Christ died in our stead (*ἀντί*): the phrase is 'on our behalf' (*ὑπὲρ*, Ro 5⁸, 1 Th 5¹⁰ etc.), or 'on account of our sins' (*ὑπὲρ*, Ro 4²⁵; *ὑπὲρ*, 1 Co 15³). But the idea of an exchange of parts as betwixt Christ and man is unmistakable. Christ suffers death, which is the penalty of our sins, not of His own; man is the recipient of a righteousness which he has not built up, but which is won for him by Christ (2 Co 5²¹). From his reference to Christ as a means of propitiation (*ἀπαλῆσις*, Ro 3²⁵) it is probable that the apostle conceived of Christ as expiating guilt through the vicarious endurance of its characteristic penalty. It does not, indeed, follow that he conceived of Christ as becoming the object of the Father's wrath, and construed the cross as having the quality of a punishment inflicted upon Christ and recognized as such, or the content of an equivalent of the misery of the lost (Pfeiderer, *Paulinismus*, p. 92 ff.).

(7) The necessity of Christ's sacrifice had its ground in the Divine justice. The economy of grace, which includes the Atonement, is indeed derived, as its ultimate spring, from the love of God (Ro 5¹⁰ 5²¹ 39); but the justice of God had a voice in the shaping and developing of the economy. The atoning sacrifice was necessary in order 'that God might be just' as well as 'the justifier of them that believe' (Ro 3²⁶). But this answer only opens up new vistas of questionings. Why was Christ's vicarious death demanded by God in virtue of His justice? We may safely say that neither the Grotian theory—to prevent the spread of sinful disorder by an example of punishment, nor even the orthodox view—because Divine justice by its very nature insists on punishment or satisfaction, lay within the apostle's horizon. The ground of the necessity was something more positive, viz. that God, whose word could not be broken, had enacted and provided in Scripture that sin would be punished with death. According to Pfeiderer, this is one of the instances of the contradictions of Paulinism. The Law, which the apostle pronounced to be temporary and now abrogated, is here utilized to lay the foundation of the doctrine of the Atonement (*op. cit.* p. 103). But the proclamation of death as the wages of sin is not confined to the Law; it goes back to the patriarchal and earlier times (Gn 3⁹), in which St. Paul always recognized an anticipation of the religious conditions of the age of the gospel.

(3) The sacrificial death of Christ was an event which broke the power of sin as the dominant principle of humanity. It does not exhaust St. Paul's teaching as to the mode of its efficacy to say that, on the ground of the sacrifice, God accepts and sanctifies the sinner. He also teaches that in the death of Christ there took place a death of mankind to sin, 'If one died for all, then all died' (2 Co 5¹⁴, cf. Ro 8³). Humanity

was then in a manner comprehended in Him, and, although the realization was to be partial and gradual, contemporaneously with His death it died in principle to the old order in which the flesh held the nobler elements in thrall. Christ routed sin in the sphere of human nature, and a new humanity was thus potentially created. While insufficiently recognizing the forensic aspect of Christ's work, Weizsäcker justly observes: 'it consists not only with his doctrine of the Person of Christ, but also with the several modes of thought of the great apostle, that Christ's work in death appears to him under this highest view-point of the destruction of a world and its power through a higher power and order, and that this distinction should take place in its own province, so that flesh is vanquished in the flesh, law through law, death through death' (*Apost. Zeitalt.* p. 140).

(c) The *Epistle to the Hebrews*, though dealing very fully with the sacrifice of Christ, chiefly dwells on its parallelism to the Levitical sacrifices in respect of the ritualistic acts of the manipulation of the blood, and its superiority as regards its range and efficacy. There are, however, two points at which it propounds or develops a reflexion which is of far-reaching importance in the field of speculation. The first relates to the question as to the precise nature of Christ's offering, or the element which gave it its atoning value. In common with the apostles, the writer fixes our attention closely on the event of the bodily death as that which constitutes Christ the sin-bearer (9²⁶) and the instrument of our sanctification (10¹⁰). But behind this lay the question wherein the sacrificial value of the death consisted. Was the material of the sacrifice the sum of the physical anguish, and of the accompanying distress of spirit, which immediately preceded death, and especially of the agony, the humiliation, and the dissolution of the final event? Or was it the spirit of self-sacrificing love which prompted Jesus to lay down His life? In other words, was the sacrifice of Christ efficacious in virtue of its quality of a suffering unto death, or in virtue of its quality of an obedience unto death? Already St. Paul, in whose scheme of thought it was of vital consequence that Christ suffered the physical consequences due to human sin, had given expression to the thought that an element of fundamental value was the obedience of Christ. That we are justified by His blood, and that we are justified by His obedience, are parallel conceptions (Ro 5¹²). This conception, which with St. Paul comes in somewhat incidentally, is very directly stated in He 10⁵: 'Sacrifices and offerings and whole burnt-offerings and sacrifices for sin thou wouldst not; then hath he said, Lo, I am come to do thy will' (vv. 5-9). Here the contrast between the Levitical sacrifices and the sacrifice of Christ is developed in a peculiarly suggestive way. It does not consist in this, that in the former case animal victims are slain, in the latter a victim of pre-eminent dignity, but in the circumstance that in the one case the offering is a material, in the other a spiritual oblation.

The second important passage is that in which the writer develops the parallel to the action of the high priest in the sanctuary on the Day of Atonement. Even as the high priest entered the Holy of Holies, bearing with him sacrificial blood, which he offered for himself and the people (9⁷), so Christ entered heavenly places 'through his own blood,' or to present His sacrifice before God (9¹¹ v. 13). From this representation it would appear that the vital moment of the sacrificial act was the presentation of His blood. And as it may be maintained that the object in presenting the blood was, not to bring into God's presence evidence of the consummation of the death, but to offer that which the OT described as the seat of life, it would follow that the quality of satisfying God attached to Christ's offering of a stainless soul or a perfected obedience. The issue may be more sharply defined thus: Was the satisfaction rendered by Christ the death to which He voluntarily submitted, or was

it the lifelong obedience which found in the death its last and most signal expression? To many minds the thought embodied in the second alternative has brought welcome intellectual relief. For the hard saying that God could be satisfied only by the death of His Son it substitutes the reasonable and even natural idea that the filial obedience manifested in the whole life of Jesus—in His inner life, and His ministry of teaching and beneficence, as well as in His faithfulness unto death—constituted the offering with which God was well pleased, and which brought humanity into a new relation to God.

While suggesting the higher conception of the nature of Christ's offering, the Epistle does not free itself from the idea that the physical event of death came into account as something additional to the obedience. It accepts the principle that 'apart from shedding of blood there is no remission' (9²²), and indeed knows nothing of a sacrifice which does not involve suffering and death as an essential element of it (9²⁶). The following utterance seems to come near to the eventual teaching of the Epistle. 'It has been said that Christ's perfect sacrifice is wholly inward, of the heart. But is it not essential to sacrifice that it should be the outward act by which the inward intention is realized, is pledged, is sealed? The inward self-dedication only becomes sacrificial when it has discovered the appropriate offering by which it can verify itself. Only through attaining this expression, in outward realization, does the language of sacrifice apply to it' (Scott Holland in *Priesthood and Sacrifice*, p. 85).

(d) In the *Johannine writings* the centre of gravity shifts from the Atonement to the Incarnation. In the Pauline theology the capital theme is the sinner's acceptance and pardon on the ground of Christ's atoning sacrifice; in the *Johannine* it is the possession of eternal life in intimate and vitalizing union with the Word made flesh. The keynote of the one is reconciliation,—of the other, communion. It is indeed a difference of emphasis, not of inclusion and exclusion. As St. Paul also experienced and chronicled the inspiration and spiritual energy enjoyed in mystic communion with the exalted Christ, so the *Johannine writings* also embody numerous references to the importance of Christ's sacrificial death. They preserve the Baptist's testimony to Christ as the lamb-victim, whether the Paschal lamb or the suffering Servant of Jehovah (Is 53¹¹), that takes away the sin of the world (Jn 1²⁹); His work is paralleled, as in Hebrews, to that of the high priest on the Day of Atonement (17¹⁹); and His death, which is conceived as a Sin-offering, has manifestly expiatory value (*ἱλασμός περὶ ἁμαρτιῶν*, 1 Jn 2²; cf. 4¹⁰). But the group of ideas connected with the Atonement is felt to be accepted and reproduced as part of the common stock of Christian beliefs, rather than to have been assimilated and developed under the progressive guidance of the Spirit of truth.

It has sometimes been affirmed that St. John unfolds a new theory of redemption. Not by dying, but by shedding abroad a revelation of God and true life from His Divine-human person, did Christ come to drive away darkness and sin (cf. Holtzmann, ii. 474). In other words, his soteriological theory was Greek—that sin is ignorance, and its remedy light. But his being possessed with the marvel of the Incarnation was not incompatible with the loyal acceptance which he intimates of the general belief as to the significance of Christ's death. In Roman Catholic and Anglican theology there is a similar insistence on the pre-eminence of the Incarnation dogma, coupled with a certain reserve, but assuredly no want of faith, in regard to the Atonement.

Such being the perspective of the *Johannine* theology, there is not much ground for expecting answers to questions raised in the theory of the Atonement. It accentuates by preference moral aspects of the Atonement, but without entitling us to infer that Christ's sacrifice only influences God indirectly through the change which it previously produces in believers. As examples of its moral influence may be noted that in the Capernaum discourse Christ views His death as the preliminary to giving His flesh for the life of the

world (6⁵¹), and that at a later period it is spoken of as destined to exercise an irresistible magnetism (12³²). But that its influence was not in the first instance merely subjective, appears from the fact that it is represented as a transaction in which Satan joined issue in decisive conflict, was beaten back, and in consequence was shorn of his power (16¹¹ 12³¹). And with this direct transcendental effect clearly predicated, it becomes the more probable that in the *Johannine* teaching the sacrifice of Christ, when likened to an expiatory or propitiatory sacrifice, was understood to have an effect upon God unconditioned by its after-fruits in human experience.

To sum up, we find that the NT writers are unanimous and distinct as to the saving significance of Christ's sacrifice, as to the blessings which flow from it, and as to the conditions on which these are appropriated. As regards the precise nature of the offering, and its mode of working, our Lord says nothing definite. St. Paul certainly holds the satisfaction of Divine justice through a vicarious death; the Ep. to the Hebrews emphasizes the germinal thought that the offering was the obedience or spiritual perfection of Christ; St. John's record chiefly confines itself to its moral bearings. Upon the points in question, indeed, they have more to teach if we could handle the key. To their thinking, and to that of their readers, these points were elucidated by describing Christ's death as a sacrifice, especially a Sin-offering; but, as we cannot say with confidence what was the accepted theory of the significance of sacrifice, the elucidation has in its turn become a problem. From this condition of mingled certainty and uncertainty several inferences may fairly be drawn. In the first place, it may be surmised that the sacrificial category, while emphasizing certain vital aspects, was inadequate to the expression of the full significance of the work of Christ, and that the old sacrificial doctrine was providentially left in obscurity at those points where it was least adequate. In close connexion with this it may also be suggested that there was a design not to bind up the work of Christ so intimately with the interpretation of an obsolescent institution as to prevent its receiving fresh illumination from other fields of human life. From this would follow, further, a commission to theology not to regard itself as bound by the fragmentary NT data for a theory of the Atonement, but to reinterpret by its own thought the nature, the grounds of the necessity, and the mode of efficacy of the sacrifice of Christ. In the exercise of this commission modern theology has very generally become penetrated by the conviction that the sacrifice of Christ is too narrowly interpreted of His death, and that the atoning efficacy attaches to the whole life, in which active and passive obedience are interwoven as warp and woof. Meanwhile the uncertainty which attaches to certain stages of the process only throws into bolder relief the apostolic certitude as to the fact that God was in Christ reconciling the world to Himself.

iii. THE SACRIFICES OF THE CHRISTIAN LIFE. —The NT doctrine is that Christ offered a sacrifice which established peace with God, and which procures the forgiveness of sins. But with this the conception of offering was not wholly detached from the sphere of human service; on the contrary, a place is reserved for human offerings of a complementary or secondary kind.

(a) The graces and the activities of the Christian life have a sacrificial character. In the Prophets it was a frequent thought that the forms and expressions of the devout life—the broken spirit, the voice of adoration and aspiration—were

sacrifices of peculiar value; and such spiritual exercises continued to be described as oblations. The NT doctrine of the priesthood of believers also involved the idea that they had somewhat to offer. The material of such offerings is the Christian personality (Ro 15¹⁶, cf. Jude 24), or the body regarded as the instrument of Christian service (Ro 12¹), or the exercises and activities of the Christian life (1 P 2⁵), including prayer (He 13¹⁵), beneficent deeds (v. 16), money gifts (Ph 4¹⁸), or the graces in which service has its spring (faith, Ph 2¹⁷) (Cave, p. 406 ff., who treats this subject very fully and suggestively). The immediate effect attributed to these offerings is that they are pleasing to God (Ro 12¹), are to Him as the odour of a sweet smell (Ph 4¹⁸).

But the further question arises whether God, as pleased with these sacrifices, and on the ground of the offerings, bestows upon the Christian any special corresponding blessing. It may safely be said that they are not regarded as expiatory: only faith comes into account as connected with the forgiveness of sin, and then as the mere condition of obtaining the boon of which the real ground is the sacrifice of Christ. But certain of the offerings specified have at least a purificatory virtue—faith which overcomes the world, and hope which purifies. As regards forms of Christian service, it is antecedently probable that they were regarded as procuring certain benefits. To call an act a sacrifice, was clearly to imply that a benefit followed; and to say that God was well pleased, was equally to imply that He would practically manifest His approbation. From the NT standpoint, indeed, the motive for rendering spiritual sacrifices is gratitude to God for His inexpressible magnanimity; but it does not thence follow that they do not receive a rich Divine recognition. In the parable of the Unjust Steward it is taught that wealth might be so used as to procure an abundant entrance into the everlasting habitations (Lk 16¹²), and it is no unfamiliar thought of the apostle of grace that God will specially reward the work and labour of love.

But what is the precise nature of the Divine response to the offerings of service? The current reply is that in the present it takes the form of inward enrichment and growth in grace, and that in the world to come it will be manifested in a distinction of degrees of glory. But it may be doubted if this exhausts the NT conception of the efficacy of the secondary sacrifices. The life that utters itself in the forms of sacrifice would appear to evoke a response additional to strengthening grace, which is of the nature of a special providential discipline or blessing, and which, resting on the individual or even the house, makes generally for their protection and well-being (Mt 6³³). So St. Paul, after specifying the acceptable sacrifices of the Philipians, concludes that God will supply all their need (Phil 4¹⁹).

An *expiatory character* might appear to be ascribed to one class of spiritual sacrifices, viz. the sufferings of the saints. 'I rejoice in my sufferings on your behalf,' says the apostle, 'and fill up what is lacking of the afflictions of Christ in my flesh on behalf of his body, which is the Church' (Col 1²⁴). By some Rom. Cath. exegeses it has been argued that the afflictions of the saints are regarded as combined with the passion of Christ to constitute the satisfaction on the ground of which God pardons sin. But while the apostle affirms that his sufferings are for the good of the Church, he does not say that it is as propitiatory, and the mode of conveying benefit may well have been that, by the apostolic example of patient obedience, the body was edified. But how do they fill up what was lacking of Christ's sufferings? The idea may either be that the apostle desired to approximate to the standard of Christ's sufferings (Weiss), or that he desired to endure his share of the sufferings which Christ, through His Church-body, has yet to suffer (Alford, *in loc.*). See also Lightfoot and Abbott.

(b) The worship of the Church embodies a sacrificial element; but this is not to be identified with the Eucharist, nor can the latter be scripturally in-

terpreted as having the character of a propitiatory sacrifice. To say that worship is sacrificial is to repeat what has already been said of the NT spiritual sacrifices. The faith and hope and love which find expression in praise and prayer, the money gifts which are devoted to the work of Christ, are declared by the apostles to have this character. Specially is the celebration of the sacrament of the Lord's Supper, evoking, as it does, faith and hope and the sentiment of gratitude, the occasion of the presentation of spiritual offerings. The special question is whether the Eucharist is a sacrifice in a peculiar specific sense, and if so, what is its precise character and efficacy. The question as to whether it may be called a sacrifice is not of vital importance. It may easily be brought within the compass of our working definition. 'In a certain loose sense the Lord's Supper may be called a sacrifice, inasmuch as it was deliberately associated by its founder with the sacrificial rites of the OT' (Cave, p. 439). The really important issues are raised by the Roman doctrine, which interprets it as continuous with the atoning sacrifice of Christ, and as therefore possessing a propitiatory character.

'By the consecration of the bread and of the wine a conversion is made of the whole substance of the bread into the substance of the body of Christ our Lord, and of the whole substance of the wine into the substance of His blood' (Dec. Conc. Trident. Sess. xiii. cap. 4). 'Forasmuch as, in this Divine sacrifice, which is celebrated in the Mass, that same Christ is contained and immolated in an unbloody manner who once offered Himself in a bloody manner on the altar of the Cross, the holy Synod teaches that this sacrifice is truly propitiatory, and that by means thereof this is effected—that we obtain mercy and find grace if we draw nigh contrite and penitent,' etc. (Twenty-second sess. cap. 2). 'Wherefore, not only for the sins, etc., of the faithful who are living, but also for those who are departed in Christ, and not yet fully purified, it is rightly offered (ib.). At the same time, it is held that propitiation is not the only, or even the principal, fruit (canon 5 of thirteenth sess.).

It would be out of place to develop the general objections to this view, which involves the grave religious defect of suggesting that salvation rests on an incomplete and therefore insecure foundation. The relevant objections are that the tenet of transubstantiation, which is the presupposition of the theory, has no scriptural warrant, while the interpretation of the Eucharist as a perpetual propitiatory offering is inconsistent with the NT teaching that the sacrifice of Christ was expiatory, and was offered once for all (Ro 6¹⁰, He 7²⁷ 9¹² 26-28 10¹⁰ 12 14, 1 P 3¹⁸).

According to a modified view, the Eucharist is a perpetuation of Christ's sacrifice, but not of the propitiatory sacrifice which He offered on Calvary. Attention is here transferred to the sacrifice which Christ presented, and continues to present, in the heavenly sanctuary (He 8¹⁻²), and it is maintained that in the Eucharist the Church presents an offering which is organically connected with the ceaseless offering of her Head.

'The offering of our Heavenly High Priest,' to quote an important statement of this view, 'includes in it a present and eternal offering of His life in heaven.' But the duty of the Church is to repeat and represent the life of her Head in another and higher world; and in the Eucharist she 'appropriates and reproduces the priestly offering of Him in whom she lives. As our Lord's offering of Himself never ends or can end, so in that offering His people, organically united to Him, one with Him, must be offered, and must offer themselves; and this they do in the expressive and touching symbols of the Eucharist' (Milligan, *Heavenly Priesthood*, p. 206).

On this view, then, the Eucharist is a sacrifice which not only represents, but also, as a consequence or Christ's union with the Church, forms a part of the offering made by Christ to God. It is commended on the ground that it satisfies the legitimate demand for a perpetual oblation which is unscripturally ministered to in the sacri-

fice of the Mass. But the scriptural evidence is in conflict with its cardinal positions. The offering of Christ, which is the ground of our salvation, was, according to passages already quoted, one which does not need to be repeated, and we are therefore forced to seek it within the compass of Christ's earthly life—either in His death or in His obedience unto death. It is said, indeed, that that which is unchangeable and everlasting is not repeated, but it is hardly disputable that what was present to the mind of the writer to the Hebrews was the contrast of the ever-renewed to the completed, not to the never-ending offering. Nor was it declared in the words of institution that the special purpose of the Eucharist was to furnish the Church with an ordinance which should be a counterpart, and even a part, of the activities of Christ's heavenly priesthood. Rather is it brought into close relation with the obedience unto death which preceded His entrance into glory.

On the whole, it may be concluded that, while the Eucharist, more than other means of grace, has the form of a sacrifice, it is at bottom, like them, only the occasion of sacrifice, i.e. of the presentation to God of spiritual offerings. Whether the outward act be prayer, or praise, or the Eucharist, the offerings therein rendered to God are the faith, the penitence, and the self-surrender to which it gives expression, and which are sustained by the rite.

The Typology of Sacrifice, which has been incidentally touched on, requires more direct consideration at the close of this study, in which we have seen the sacrificial worship of the earlier dispensation disappear in the sacrifices of the New Covenant. From the typological point of view, the Levitical sacrifices come under the category of prediction. They differed from the predictions proper in form,—being enshrined not in word but in institution and rite,—but they served the same end of testifying beforehand to the person, the life, and the work of Christ, and to the contents and conditions of His salvation. In the older works the study of sacrifice as prediction and fulfilment was assiduously prosecuted as at once affording the deepest gratification to the believer, and furnishing a weapon of distinct apologetic value. In labouring at this task, Christian piety gave free play to fancy, and every feature of the OT ritual became eloquent of the unspeakable riches of Christ. Dogmatic prepossessions also supervened to dominate the discussion; and, while the Romanist discovered in the Levitical system a foreshadowing and corroboration of the distinctive sacerdotal and sacramentarian tenets of his communion, the Protestant found in it an equally good witness for every fundamental article of the evangelical system of doctrine (Fairbairn, *Typology of Scripture*).

The luminous and thorough monograph of Principal Cave is distinguished, in its treatment of the typical aspect of sacrifice, by great sobriety of judgment. A type is defined as an enacted prophecy, and three essential notes are distinguished: it adumbrates something; it adumbrates some future thing, and it is specially designed by God to adumbrate that future thing (p. 158). The sacrificial practice he divides into two branches—that which was concerned with atonement, and that which was concerned with the presentation of the offering. And to these types respectively correspond, as their antitypes, the death of Christ and our spiritual sacrifices. 'The atonement by blood has its antitype in the atonement made by Jesus. In the activities and passivities of the Christian life are to be found the antitype of the Mosaic injunctions other than those concerning the methods of atonement, the high priesthood, and the tabernacle' (p. 410, cf. 406 ff.).

The precedent for treating the OT sacrifices typologically, i.e. as predictive in character and design, is set in the NT. As certainly as reliance is placed on fulfilments of OT verbal predictions is use made of antitypal fulfilments to

attest the Messiahship and the redemptive mission of Jesus. But while the OT sacrifices are thus accorded the dignity of OT predictions, they must also share in the consequences of the altered view as to the precise nature and scope of prophecy viewed as prediction. What has become increasingly clear is that OT prophecy does not consist of chapters of detailed history written before the event. Prophetism was in essence faith in God as the righteous Governor of the world and the gracious Guardian of His people, and on the basis of this faith it cherished a confident expectation of the realization on earth of a kingdom of righteousness by the instrumentality of a divinely commissioned King, who should through suffering establish His dominion (Bruce, *Apolog.* p. 257 ff.). Similarly, the typical element in the Levitical code cannot be regarded as coextensive with its multifarious forms and ritualistic acts. The Pentateuchal code of sacrifice is not a mystical version of the Christian religion, whose every form and rite was shaped by a design to show forth the story of our Lord's passion, or to elucidate the 'activities and the passivities' of the Christian life. The witness which it bears to Christ is less voluminous, but not necessarily less weighty. The OT sacrifices expressed a need which Christ satisfies, and embodied a faith which Christ justifies. The need to which they gave utterance was that felt by the human heart for some ground of religious confidence external to itself; and this, which the animal victim only seemed to supply, is fully met in the Christian conviction that sin is forgiven, in some real deep sense, for Christ's sake. The faith which they declared was that God had provided a means by which man could enter into communion with God, and the great expectation which they expressed has its realization in the filial relations with God into which the Christian is brought by Christ. Yet once more, the institution embodied the conviction, which was also a prediction, that the sovereign boon of union with God is not won without labour and cost. The victim was slain, the offerer denied himself for God. And this principle only attained to a fuller and deeper realization when, on the one hand, Christ died that He might bring men to God and reign in human hearts; and when, on the other, it was seen that self-sacrifice is the ritual of the lives that He moulds.

LITERATURE.—מִשְׁחָה סֵדֶר קֶרֶם (*Rerum sanctarum ordo*), esp. נִדְחִים (*de Sacrificiis*), ed. Surenhusius, vol. iii., Amsterdam, 1702; Philo, *de Victimis* (Yonge's tr. 1855, vol. iii.); Outram, *de Sacrificiis*, London, 1877; Spencer, *de legibus Hebræorum ritualibus* (lib. iii. 'de ratione et origine Sacrificiorum'), Cantab. 1727; Sykes, *Essay on the Nature, etc., of Sacrifices*, London, 1748; Davison, *Origin and Extent of Primitive Sacrifice*, London, 1825; Bähr, *Symbolik des Mosaischen Cultus*, Heidelberg, 1837; Kurtz, *Der AT Opfercultus* (Eng. tr.), Edin. 1885; Oehler, *Theol. des AT* (Eng. tr.), Edin. 1882; Fairbairn, *The Typology of Scripture*, Edin. 1847; Cave, *Script. SADDUCEES.—

- i. Origin and History of the Sadducees.
- ii. Derivation of the name 'Sadducees.'
- iii. Their opposition to the Pharisees.
 - (a) Controversies as to the Law: (1) Criminal Law, (2) questions of Ritual, (3) the Feast.
 - (b) Doctrinal differences: (1) as to the resurrection of the body, and future retribution; (2) as to the existence of angels and spirits; (3) as to 'fate' and free will, and Divine providence.
- iv. The Sadducees and Jesus.

i. ORIGIN AND HISTORY OF THE SADDUCEES (cf. art. PHARISEES, § i.).—The Sadducees were the spiritual descendants of the priestly party in Jerusalem, which, towards the close of the Greek period of Israel's history, was anxious to Hellenize the Palestinian Jews. The Maccabean rising (see art. MACCABEES), which was caused by the attempt of Antiochus Epiphanes to accomplish this by violence, taught these Hellenizers the folly of tampering with the national religion; while the success of Judas Maccabæus and his brothers in asserting the nation's political independence deprived them of office and power. Their descendants, however, speedily accommodated themselves to the new order of things, which was in many respects after their mind. The Maccabean rising had ended otherwise than was hoped when it began. In the course of the struggle for national independence the Maccabee brothers were compelled to enter into alliances with foreign princes, to receive honours and dignities from them, and in general to maintain their cause by the use of purely secular means. The Jewish State which they set up was not essentially different from the secular States around them. This led to a new development of parties among the Jews. The HASIDÆANS, who had withdrawn from the struggle with the Syrians, when religious freedom was granted, grew both in numbers and in strictness, and came to be known as the *Pharisees*. Their great concern was, not that the nation should be politically independent, but that it should be secured against the intrusion of all foreign elements by the most scrupulous observance of the Law. And they now found themselves face to face, not with foreign rulers, but with native princes, who, while thoroughly orthodox in the faith, were indifferent to what they conceived to be the interests of religion, and from whom they accordingly became increasingly estranged.

The successors of the Hellenizers, on the other hand, were in full sympathy with the secular policy of the Hasmonæan princes, and, unlike the Pharisees, took no exception to the illegitimacy of their high priesthood. They entered the service of the new princes as soldiers and diplomatists, and, drawing around them the leading adherents of the new dynasty, formed the party, to which was given their family name of Zadokites or *Sadducees*. Taught by experience, this party made no violent attempts to introduce Greek customs; but they were a purely political party: their main interest was in the Jewish State as an independent State, and not, like that of the Pharisees, in the legal

purity of the Jews as a religious community. The tension between the Hasmonæans and the Pharisees at last became so keen that John Hyrcanus broke decisively with the latter, and openly proclaimed himself on the side of the Sadducees.

From their first appearance in history as a distinct party (during the reign of John Hyrcanus, B.C. 135-105), the Sadducees were the devoted adherents of the Hasmonæan princes. Under Aristobulus I. and Alexander Jannæus, the immediate successors of John Hyrcanus, their party was supreme. Under Alexandra Salome the Pharisees were for a short time in possession of power; but when Aristobulus II. became king the Sadducees once more came to the front. They supported him in his conflict with Hyrcanus II., Antipater, and the Romans, and they also stood by him and his two sons, Alexander and Antigonus, in their attempts to restore the Hasmonæan dynasty. But the day of their political power was now past. Their numbers were also considerably reduced. When Pompey captured Jerusalem (B.C. 63) he executed many of their leaders, as did also Herod (B.C. 37). Herod further diminished their influence by appointing and removing high priests according to his own pleasure, and by filling the Sanhedrin with his own creatures. When Judæa, after the deposition of Archelaus, came under the direct rule of the Romans, the Sadducees, who now included the families raised to the dignity of the high priesthood by Herod, again attained a measure of power through their preponderance in the Sanhedrin, to which the Romans committed the internal government of the country, reserving to themselves, however, not only the control of all military matters and the levying of customs, but also the confirmation and execution of all capital sentences. Matters remained thus down to the troubled days that preceded the destruction of Jerusalem, except during the short reign of Agrippa I. (A.D. 41-44), who favoured the Pharisees. But the latter were the real possessors of power; for, in order to render themselves tolerable to the people, the Sadducees were compelled to act in most matters in accordance with Pharisaic principles. And when Jerusalem was destroyed and Israel ceased to exist as a nation, they speedily disappeared entirely from history.

According to Josephus (*Ant.* xiii. x. 6, xviii. i. 4), the Sadducees were a small minority of the Jews, which included only the rich and those of the highest dignity. This is almost equivalent to identifying them with the priestly aristocracy and their adherents. During the second half of the Persian and the whole of the Greek domination of Israel, the high priests were the civil as well as the religious heads of the Jewish community in Judæa, and, theirs being the only hereditary office among the Jews since the downfall of the Davidic monarchy, they and their families formed a kind of sacerdotal nobility (cf. *Jos. Vita*, i). We are expressly told in Josephus (*Ant.* xx. ix. 1) and in *Ac* 5:17 (cf. 4:13¹⁶), that in NT times some at least of the high priests were Sadducees. It was these chief priests with their families and adherents that formed the Sadducean party. This party, however, was not a priestly party in the sense that the priests generally necessarily belonged to it: some of these (e.g. Josephus, *Vita*, 11; see also *Vita*, 39; Taylor's *Sayings of the Jewish Fathers*², ii. 10, iii. 2) were Pharisees (cf. *Jn* 1:19-24). Nor did it, as a rule, stand up for the special interests of the priests. The opposition between the Pharisees and the Sadducees was not an opposition between the strict legalists and the priests, but between the former and the chief priests and their adherents (cf. Schürer, *GJV*³ ii. 406 f.).

ii. DERIVATION OF THE NAME 'SADDUCEES.'—The name 'Sadducees' (צדוקים, sing. צדוק, *Saddoukaïos*) is now almost universally derived from the proper name *Zadok*. The derivation, favoured by many of the Fathers and by a few moderns (e.g. Derenbourg, Stanley, and Edersheim), from the adj. צדק, according to which the Sadducees were the *righteous*, so called either because, in opposition to the Pharisees, they adhered to the written law, or because of their severity as judges,

must be abandoned, owing to the impossibility of accounting for the change of *i* into *u* (see especially Montet, *Essai sur les origines des partis saducéen et pharisien*, 53 ff.). From which Zadok, however, did they derive their name? According to *Abath de Rabbi Nathan*, from a disciple of Antigonus of Socho.

*Antigonus of Socho received from Shime'on ha-Caddiq. He used to say, Be not as slaves that serve the Rab on the terms of receiving recompense; but be as slaves that serve the Rab not on the terms of receiving recompense; and let the fear of Heaven be upon you; that your reward may be doubled for the time to come. Antigonus of Socho had two disciples, who repeated his words; and they repeated them to (their) disciples, and their disciples to their disciples. They arose and refined after them, and said, What did our fathers imagine, in saying that a labourer might do work all the day and not receive his reward at evening? Nay, but if our fathers knew that there was the world to come, and that there was a revival of the dead, they would not have spoken thus. They arose and separated from the Torah; and two sects were formed from them, *Qadukin* and *Baitusim*; *Qadukin* after the name of Qadok, *Baitusim* after the name of Baithos' (Taylor, *l.c.* 112f.).

This legend, though adopted by Ewald (*GVI*² iv. 357), is of no historical value. It is first found in a document of late origin; it is plainly wrong in what it says of the Boethusians, who derived their name from Boethus, the father of Simon, whose daughter, Mariamne, Herod married, and whom he raised to the high priesthood (*Ant.* xv. ix. 3; cf. xvii. iv. 2, xviii. v. 1, xix. vi. 2); it is also mistaken in asserting that the Sadducees rejected the Law, and in making the denial of a resurrection of the dead their primary and fundamental characteristic. We must therefore either derive the name 'Sadducee' from an unknown Zadok, an influential member or head of the party at an epoch which it is impossible to determine (Montet, *l.c.* 59), or from Zadok, who was priest in Jerusalem in the days of David and Solomon (1 K. 18. 28. 32²⁷, 33²⁸; cf. 4¹, 1 Ch 23²²), and whose descendants held the same office down to the Exile. The latter derivation is generally regarded, not indeed as thoroughly established, but as the most probable. In his ideal picture of the future theocracy, Ezekiel (40⁶ 43¹⁹ 44¹⁸ 48¹¹; in all these passages the LXX has the form *Σαδδούκ*) admits only the 'sons of Zadok' to the right of officiating as priests in the new temple at Jerusalem. Though after the return from the Exile this rule was not strictly carried out, the 'sons of Zadok' formed the main body of the post-exilic priesthood; and more especially it was from among them that the chief priests down to the close of the Greek period were drawn (see art. PRIESTS AND LEVITES, p. 96²). In the absence, therefore, of more specific information, it is assumed that the family name 'Zadokites' or 'Sadducees' was given, probably by their enemies, to the sacerdotal aristocratic party, which included not only the chief families of the legitimate line, but also the adherents of the Hasmonæan princes, and, in NT times, the families raised to the high priestly dignity by Herod and his successors.*

This derivation of the name 'Sadducees' is not inconsistent with what we know of the behaviour of many of these 'sons of Zadok.' As early as the time of Ezra and Nehemiah, not only did many of the common priests intermarry with the Gentiles among whom they lived (Ezr 9²), but Eliashib, the high priest, and members of his family, entered freely into alliances with the neighbouring aris-

tocracy and with the Persian officials (Neh 13^{10. 28}). They were evidently more concerned for their own privileges than for the reformation so dear to the heart of Ezra and Nehemiah. The position of the high priests as civil heads, under the Persian or Greek governors, of the community in Judæa, almost inevitably led to their gradual secularization. They were necessarily brought into close contact with their Gentile rulers; and their political interests tended to thrust their religious interests into the background. There were doubtless some of these high priests who remembered what was due to their position as the servants of Jehovah, but the temptation to forget must have been very great. Towards the close of the Greek period many of the chief priestly families were entirely secularized; they felt no interest in what was distinctively characteristic of the Jewish religion; for the sake of their own personal enjoyment and advancement they were willing, and indeed eager, to adopt the manners and customs of their Gentile masters. 'The high priests regarded their sacred office only as a pedestal of worldly power' (Wellhausen, *JG*² 248). There is nothing, therefore, improbable in the supposition that the aristocratic priestly party, whose interests were mainly political, and of which they formed from the beginning a considerable part, came to be known by their family name.

iii. THEIR OPPOSITION TO THE PHARISEES.—Though the Sadducees were the priestly nobility and the Pharisees were drawn mainly from the ranks of the common people, the opposition between them was not a mere opposition between two different classes of society. Nor was it merely a question as to the laxer or stricter interpretation and observance of the Law. It was an opposition of principles, of dispositions, and of theories of life (Wellhausen, *l.c.* 295). The Pharisees were, in their own peculiar way, intensely religious; their great desire was to mould their fellow-countrymen into a 'holy' nation by means of the Law; they looked forward to a future, in which their hopes were sure to be realized, and could therefore meanwhile endure the foreign dominion, provided it allowed them perfect religious freedom. The Sadducees, on the other hand, were largely indifferent to religion, except in so far as it was a matter of custom; their great care was for the State as a purely secular State; they were satisfied with the present, so far as it permitted them to live in comfort and splendour. The acute opposition between the two parties first manifested itself in the political sphere, in the struggle for power during the reign of John Hyrcanus and his successors. When the Hasmonæan dynasty fell, the animosity still continued; but to a large extent it necessarily ceased to be political, and concentrated itself upon questions as to the Law, matters of ritual, and doctrine.

(a) *Controversies as to the Law.*—The Sadducees refused to acknowledge the binding force of the oral law, the 'tradition of the elders' (Mt 15², Mk 7³), to which the Pharisees attached supreme importance. They held that only the written law of Moses was binding (*Ant.* xiii. x. 6, xviii. i. 4); and although, as judges, and in order to maintain their position against the Pharisees, they must have had their own exegetical tradition, they did not regard themselves as absolutely bound even by it; they held it praiseworthy to dispute with their teachers (*Ant.* xviii. i. 4). It is incorrect, however, to represent them as acknowledging only the Pentateuch and as rejecting the rest of the OT. They also doubtless agreed with the Pharisees on many points settled by the oral law; only, unlike the Pharisees, they did not regard it as binding (cf. Taylor, *Sayings of Jewish Fathers*², p. 115).

* It is not claimed for this derivation of the name 'Sadducee,' which was first suggested by Geiger, that it is more than probable. Montet (*l.c.* 51f.) argues against it that there is not a single trace in post-exilic literature of this close connexion between the Sadducees and the Zadokites, and that this unanimous silence is fatal to the hypothesis. Kuenen, whom he cites (p. 59f.) as holding substantially his own view, afterwards changed his opinion. 'The name "Sadducees," which the priestly nobility of Jerusalem received later, I now also identify with Zadokites. In the not unjustifiable reaction against Geiger's exaggeration I went too far' (*Gesammelte Abhandlungen zur Biblischen Wissenschaft*, 496).

In addition to, and partly in consequence of, this fundamental difference between the two parties, there were differences as to individual legal questions. (1) *Criminal Law*. As judges, the Sadducees were more severe than the Pharisees (*Ant.* xi. ix. 1; cf. xiii. x. 6). They interpreted literally the *lex talionis* (Ex 21²⁴, Dt 19²¹), whereas the Pharisees mitigated its severity by accepting as punishment a money payment. They also interpreted literally Dt 25⁹ ('spit in his face'); the Pharisees said it was enough to spit before the offending person. As regards Ex 21²⁸, 30^f, they went beyond the requirement of the Law in exacting compensation not only for the damage done by one's ox or ass, but also for that done by one's servants. They were less severe, however, than the Pharisees in punishing false witnesses. According to Dt 19¹⁶, a false witness was to suffer the punishment which he hoped to see inflicted on the person falsely accused by him. The Sadducees held that this punishment should be inflicted on him only if the falsely accused person had been punished; the Pharisees demanded his punishment, provided sentence had been pronounced on the accused, whether the sentence was executed or not.

(2) *Questions of Ritual*. The Pharisees laid the greatest stress on the cleanness of the vessels used, and on the various actions being performed in due succession and with strict legal correctness. According to them, all the vessels of the temple had to be purified at the close of each feast; the scriptures were so precious that they could be written only on the skins of clean animals, and any one who touched the sacred rolls was thereby rendered unclean; in accordance with Lv 16¹³ they insisted, in opposition to the Sadducees, that on the Day of Atonement the high priest should not kindle the incense till after he had entered the Holy of Holies; at a Feast of Tabernacles, Alexander Jannæus was attacked by the people, the majority of whom by that time favoured the Pharisees, because, as high priest, he poured the water of libation upon the ground beside the altar, instead of upon the altar. The Sadducees scoffed at the Pharisaic laws relating to purity: according to Pharisaic principles, the sacred writings were less pure than the books of Homer, contact with which did not defile; the Pharisees, it was said, would even sprinkle the sun in the heavens with lustral water. So far as they laid stress on Levitical purity, it was apparently in the interest of the priesthood. They insisted that the red heifer, from whose ashes the lustral water was prepared (Nu 19¹⁻¹⁰), should be burned only by priests who had been thoroughly cleansed from all possible defilement, whereas the Pharisees laid more stress on the act performed by the priest than on the priest himself, whom they even tried to defile by contact with themselves. The Pharisees demanded that the cost of the daily sacrifice, which was offered on behalf of the whole people, should be defrayed out of the temple treasury; while the Sadducees maintained that, the treasure in the temple being in a manner their property, the sacrificial victims should be provided from the free-will offerings of the individuals who took part in the sacrifice.

(3) *As to the Feasts*, the two parties differed in the manner of fixing the date of Pentecost. According to Lv 23¹¹⁻¹⁵ seven full weeks had to be counted from 'the morrow after the sabbath' upon which the priest waved the sheaf of first-fruits before the Lord. The Pharisees followed the traditional interpretation (e.g. in the LXX, *ad loc.*; cf. *Ant.* iii. x. 5), that the 'sabbath' meant the first day of the feast, and that consequently Pentecost might fall on any day of the week. The Sadducees (or rather, according to Schürer, *l.c.* 413, the Boethusians, a variety of the Sadducees) held that the 'sabbath' meant the weekly sabbath, and that therefore Pentecost always fell on the first day of the week. They naturally also refused to acknowledge as binding the tradition of the fathers as to the way of observing the sabbath.*

(b) *Doctrinal differences*. —(1) According to the NT (Mt 22²³, Mk 12¹⁸, Lk 20²⁷, Ac 4¹⁻² 23⁸) and Josephus, the Sadducees denied the *resurrection of the body*, to which Josephus adds that they denied also *future rewards and punishments*, and even maintained that the soul perishes with the body (*Ant.* xviii. i. 3f.; *BJ* II. viii. 14). The doctrines of a bodily resurrection and of future retribution in the later Jewish sense are not found, till late, in the OT; but it teaches a shadowy existence of souls in Sheol. In opposition to the Pharisees, therefore, the Sadducees held substantially the old Hebrew view, save (if Josephus is to be trusted) as regards continued existence after death. (2) According to Ac 23⁸ they also denied the *existence of angels and spirits*, i.e. of a world of supermundane spirits. Seeing that they accepted the OT, it is difficult to understand their position on this subject. It was probably due to their general indifference to religion and to the rationalistic temper which led to the extreme limit in opposition to the angelology of their adversaries. (3) According to Josephus (*BJ* II. viii. 14; *Ant.* XIII. v. 9) the Sadducees denied 'fate' altogether; it was impossible

for God to commit or to foresee anything evil; the doing of good or evil was left entirely to man's *free choice*; man was the master of his own destiny and the sole author of his own happiness or misery. The Pharisees, on the other hand, made everything dependent on 'fate' and God; still they did not teach an absolute fatalism; it had pleased God that there should be 'a mixture' of the Divine and human elements; there was a co-operation of God in all human actions, good and evil, but the doing of good or evil was to a large extent in man's power (*BJ* II. viii. 14; *Ant.* XVIII. i. 3, XIII. v. 9). Properly understood, the real difference between the Pharisees and Sadducees seems to have amounted to this: that the former accentuated God's preordination, the latter man's free-will; and that, while the Pharisees admitted only a partial influence of the human element on what happened, or the co-operation of the human with the Divine, the Sadducees denied all absolute preordination, and made man's choice of evil or good, with its consequences of misery or happiness, to depend entirely on the exercise of free-will and self-determination' (Edersheim, *The Life and Times of Jesus the Messiah*, i. 316f.). Though Josephus is our only authority for the denial of Divine providence on the part of the Sadducees, there is no good reason to question his substantial accuracy. They felt no need of a Divine providence, but relied entirely on their own resources. 'They claimed nothing from God, nor He from them' (Wellhausen, *l.c.* 295).

iv. *THE SADDUCEES AND JESUS*.—In the NT the Sadducees are mentioned by name only in Mt 37¹⁻⁶ 11² (in the parallel passage, Mk 8¹¹, they are not mentioned), 22²³⁻³⁴, Mk 12¹⁸, Lk 20²⁷, Ac 4¹⁻⁵ 23⁶⁻⁸. They are not mentioned by name in St. John's Gospel, where, however, we find the expression 'chief priests and Pharisees' (7²², 48¹ 47⁵⁷ 18²) instead of the 'Pharisees and Sadducees' of Mt and Mk. It was only towards the close of His life that our Saviour came into open conflict with them. They had little influence with the people, especially in religious matters; His criticism was therefore mainly directed against the Pharisees and scribes, the supreme religious authorities, although, according to Mt 16¹¹, He also warned His disciples against the leaven of the Sadducees, meaning, probably, their utterly secular spirit. They, on their part, seem to have ignored Him, until, by driving the money-changers out of the temple (Mt 21¹², Mk 11¹⁵, Lk 19⁴⁵), He interfered with the prerogatives of the Sanhedrin. His acceptance of the Messianic title 'son of David' also filled them with indignation against Him (Mt 21¹⁵). They accordingly joined the scribes and Pharisees in opposition to Him, and sought to destroy Him (Mk 11¹⁸, Lk 19⁴⁷), first, however, attempting to discredit Him in the eyes of the people, and to bring down upon Him the vengeance of the Romans, by their questions as to His authority, as to the resurrection, and as to the lawfulness of paying tribute to Caesar (Mt 21²³, 22²³, Mk 11²⁷, 12¹³, Lk 20¹² 19²⁷; cf. Jn 11⁴⁷ 57). In the Sanhedrin that tried Him they probably formed the majority, and the 'chief priests,' who presided, belonged to their party. The ostensible ground on which they condemned Him was His claim to be the Messiah; this was blasphemy against God, for which they decreed Him worthy of death (Mt 26⁶⁵, Mk 14⁶¹, Lk 22⁶⁶). But the Sadducees, at least, were doubtless even more influenced by the fear that a Messianic movement led by Jesus might have disastrous political consequences (cf. Jn 11⁴⁷).

After our Lord's Ascension they persisted in their opposition to Him in the person of His disciples (Ac 4¹⁵ 5¹⁷ 23¹²). We are not informed that any of them joined the infant Church; for, as we have

* For a full account of these controversies see Montet, *l.c.* 236 ff., where the authorities are given; also Schürer, *l.c.* 412 ff.

seen, the priests, a great company of whom were obedient to the faith (Ac 6⁷), were not necessarily of their party. According to Josephus (*Ant.* xx. ix. 1) they were also responsible for the death of James, the 'brother' of our Lord.

LITERATURE.—See literature at end of art. PHARISEES.

D. EATON.

SADDUK (B *Σαδδούκος*, A *Σάδδουκος*, AV Sadduc), 1 Es 8².—Zadok the high priest, ancestor of Ezra (cf. Ezr 7²).

SADOC.—1. (*Sadoch*) An ancestor of Esdras, 2 Es 1¹=ZADOK of Ezr 7². 2. (*Σαδώκ*) A descendant of Zerubbabel and ancestor of Jesus, Mt 1⁴.

SAFFRON (קֶרְכֹּם *karkôm*, κρόκος, *crocus*).—*Kürküm*, the Arab. form of *karkôm*, is defined in the Arab. dictionaries by *zafarân*, from which the Eng. word *saffron* is derived. Three sorts of plants are known in Arab. by the name *zafarân*:—(1) The genus *Colchicum*, of the order *Liliaceae*. The three styles of the species of this genus are long, and often orange-coloured, but are not used in medicine or cookery. The corn and seeds are medicinal. (2) *Carthamus tinctorius*, L., the Safflower or Bastard Saffron. This is an annual plant of the order *Compositae*, 3–5 ft. high, having a head of orange-coloured flowerets as large as a walnut. These flowerets are employed for the same purposes as the true saffron, and, being much cheaper, they are used to adulterate the more costly commodity. They are also used in dyeing. The safflower is cultivated in large quantities near Damascus. (3) The genus *Crocus*, of the order *Iridaceae*, of which there are eight species in Palestine and Syria, besides the cultivated *C. sativus*, L. The orange-coloured styles and dissected stigmas of all the species of this genus are collected and dried, and used as a colouring material and aromatic in the preparation of food, esp. to impart a yellow tinge to boiled rice. They were formerly employed in medicine as an antispasmodic and emmenagogue. The most abundant of the wild species of *crocus* is *C. cancellatus*, Herb. Bot. The corms of this are edible, and are collected in considerable quantities, and sold in the streets of Damascus and other Oriental cities. They have a flavour somewhat like that of the chestnut. *Zafarân* is familiarly used for all the above-named plants. On the other hand, *kürküm* is not commonly used for any. It is the classical name for the *crocus* alone, but not confined to any one species. In the only passage in which *karkôm* occurs (Ca 4¹⁴), i.e. among a list of cultivated garden aromatics, it prob. refers to *C. sativus*, L.

G. E. POST.

SAHIDIC VERSION.—See EGYPTIAN VERSIONS, vol. i. p. 639^b.

SAINT.—This stands in AV for two Heb. words. 1. קָדוֹשׁ (Aram. ܩܕܝܫ in Daniel): (a) of *men*, Dt 33⁹, Ps 16³ 34⁹ 106¹⁰, Hos 11¹² † [elsewhere and usually tr. 'holy'; see HOLINESS]; (b) of *angels* (a usage now obsolete), Dt 33², Job 5¹ 15¹⁵, Ps 89⁶ 7, Zec 14⁵, Dn 8¹³; cf. Jude 14 and prob. 1 Th 3¹³ † [RV in all except last 'holy one(s)'; see Driver on Dn 8¹³]. 2. קֹדֶשׁ 1 S 2²⁶, 2 Ch 6⁴, Pr 2⁸ + 16 t. in Psalms [also tr. 'godly', 'holy', 'merciful'; see, more fully, Driver, *Par. Psalter*, 443 f.]. Both these words, with few exceptions (קֹדֶשׁ in Ps 4³ 12¹ 16¹⁰ (?) 32⁸ 86², Mic 7², 1 S 2²⁹ (?), Pr 2², Dt 33⁸; קָדוֹשׁ in Ps 106¹⁰, but this is hardly an exception), are used in the plural or with a collective noun, i.e. of a class. Neither in the OT nor NT is it usual for a righteous man to be called individually 'a saint' or 'the saint.' The reason of this is that a man's standing in relation to God was not regarded as one of isolated conse-

cration or holiness, but as something attaching to him as member of a larger whole, to which the covenant relation in the first instance belonged. In the OT this larger unit was Israel, the holy nation; in the NT the Church, the holy nucleus of redeemed humanity. 'The saints'—'the saints of the Most High,' 'the people of the saints,' or most fully 'the people of the saints of the Most High' (Dn 7¹⁸. 22. 25. 27 824)—were the members of a holy community, consecrated to a holy life as defined by the covenant on which the relation depends. Such, then, is the general notion expressed by the words קֹדֶשׁ and קָדוֹשׁ, and their LXX and NT equivalents, ἅγιοι and ὁσίοι. But there are further distinctions which have to be noted.

'Ἄγιοι and ὁσίοι. While קֹדֶשׁ is rendered in the LXX by ἅγιοι, קָדוֹשׁ appears as ὁσίοι. The specific idea of the former is 'the consecrated,' or those in religious covenant with God; of the latter, 'the godly' or 'pious,' those dutiful to the religious relation. While ἅγιος is a very rare word in classical Greek, and was perhaps for that very reason chosen by the LXX, to the exclusion of the usual term ἱερός—so compromised by its use in pagan religion—ὁσίος, on the other hand, largely retains its classical meaning. Thus Plato (*Gorg.* p. 507b) says, *οἱ μὲν ἀνθρώποι τὰ ἀρετικὰ πρῶτον διακρίναι πρᾶτται, οἱ δὲ θεοὶ ὁσίοι*; and elsewhere he makes *δικαιοσύνη* the generic and *ὁσίοι* the specific term (cf. also Xen. *Anab.* ii. vi. 25). Accordingly, in the OT, it is objective sanctity that is expressed by *ἅγιος* (= *ἁγιασμένος* = *ἁγιάσας αὐτοῦ* in Dt 33²; cf. Ezr 5²⁶ *ἡμῶν ἅγιοι τῷ κυρίῳ*); whereas subjective sanctity—response in feeling and conduct to God's קָדוֹשׁ, or graciousness—is usually emphasized in the use of *ὁσίος* (= *ἁγιασμένοι τὸν κύριον* in Ps 96⁹, where we have also *ἐκλέξατο κύριος τὰς ψυχὰς τῶν ὁσίων αὐτοῦ*, cf. 97¹⁰: *σοὶ μὲν ὁσίου ἐπιμύθησεν, καὶ μὲν ἀνδρὸς ἐπὶ τοῦ κυρίου, καὶ μὲν ἐκλεκτοῦ ἐκλεκτοῦ ἐστίν*, 2 S 22²⁶ = Ps 138⁸, and cf. Dt 33²). Of course the gracious conduct of 'the godly' is but a realization of the idea of their relation as God's 'consecrated ones'; but it is this their conduct, in dutiful loyalty to the Covenant shown in habitual act, that marks them *ὁσίοι* (as in Ps 50⁵ *ἐνταλάσσει αὐτῶν τοὺς ὁσίοις αὐτοῦ, τοὺς διατιθεμένους τὸν διαθήκεν αὐτοῦ τοῖς ὁσίοις*). This agrees with the fact that ὁσίοι sometimes renders words like קָדוֹשׁ, קֹדֶשׁ, ὁσ, ὁσῶν; and that its normal equivalent קָדוֹשׁ is also rendered by ἱερός (Jer 31², of God), ἁγίος (Mic 7²), ἁγιασμένος (Pr 2⁸); while קֹדֶשׁ is paraphrased by *ἁγίασεν* in 2 Ch 6⁴. Further, *ἁγίος* is used only of persons; and here one remembers the title *Häddin*, by which the godly called themselves in Maccabean days; see art. *HABIDJANS*. The opposite holds of *ἅγιος*, in which the stress falls on the covenant relation, though at times not without suggestions, in the context, of the practical loyalty thereto of those thus described. These distinctions and contrasts also persist fairly constantly through the later parts of the LXX, including the Psalms of Solomon.

When we reach the NT, the striking thing is the total disappearance of *ὁσίοι* as a title of God's own people. In a substantival sense *ὁσίοι* is used only of Jesus as Messiah, and that after Ps 16¹⁰ (Ac 2²⁷ 13³⁵). On the other hand, the prerogative phrase for members of the sacred Society of Israel, *οἱ ἅγιοι*, is transferred to the members of Christ's Ecclesia, as consecrated to the Messianic Kingdom in keeping with the holy calling of God. It was, in all probability, the overshadowing sense of the privilege of such a status, and of the Divine action as bringing it about, that caused the objective side to obtain such exclusive emphasis as to prevent the term expressive of human devoutness (*οἱ ὁσίοι*) from emerging as before. Christians stood as men called out or sanctified by electing grace (*ἐκλεκτοὶ τοῦ θεοῦ*, Col 3¹²; cf. Eph 1⁴ *κλητοὶ ἅγιοι*, 1 Co 1², Ro 1⁷), their sainthood determined by their relation to Christ as believers (*ἅγιοι κ. πιστοὶ ἐν Χριστῷ*, Eph 1¹, Col 1²; cf. *ἐν τοῖς ἡγιασμένοις πιστεῖ τῇ εἰς ἐμέ*, Ac 26¹⁸), on the basis of His sacrificial death (He 10¹⁰. 14), which inaugurated the New Covenant (v. 29).

'Saints by effectual calling' is thus the primary sense of 'the saints.' But in all a new spirit or a renewed heart is assumed to exist, the subjective response quickened by the message of so great redemption. All the justified are 'saints,' and as such are marked by true 'repentance from dead works and faith towards God.' But faith towards God in Christ involves devotion to an obedient

walk after Christ's example, 'as becometh saints' (Eph 5²); and to this practical aspect of saintship attention is growingly directed as time goes on. St. Paul is constantly calling on his converts to commit themselves, once for all, to conduct 'worthy of the Lord unto all pleasing' (Col 1¹⁰). St. Peter keeps before his readers the obligation of saintliness, after the pattern of the Holy Father, and in remembrance of the superlative cost of their initial redemption from their former vain manner of life (1 P 1¹⁵⁻²¹); and he refers women to the example of 'the holy women' in the OT (3⁶). In the Apocalypse we read of 'the patience of the saints, those who keep God's precepts and the faith of Jesus' (14¹²); and are told that 'the fine linen is the righteous deeds (δικαιώματα) of the saints' (19⁸). And indeed this expectation that fundamental consecration will appear in conduct and character, is a necessary corollary of the belief that the believer as such was 'sealed' a member of the Messianic community by the Holy Spirit. Here lay the significance of Christian baptism (1 Co 6¹¹); and St. Paul at least built his whole theory of sanctification upon the abiding presence of the Holy Spirit in the 'saint' as the immanent principle of his new life (Ro 8⁴⁻¹⁴, 1 Th 4⁷⁻⁸). It is by His energy that the regenerate will wars its warfare against the flesh and attains fuller life (8¹³); it is in virtue of His indwelling that the saint shall enjoy the final redemption of his whole man, including release from the bondage of bodily corruption (8¹⁴⁻²³); and the animating impulse of the very life of prayer, whereby saints overcome, and realize full manhood in Christ (Eph 4¹⁻¹⁵), is still the self-same Holy Spirit (Ro 8²⁶⁻²⁷, Eph 3¹⁶⁻¹⁷, 4³⁰⁻⁶). See SANCTIFICATION.

LITERATURE.—The material is collected in Trench, *Synonymy of the NT*, and in Cremer, *Bib.-Theol. Lex.*, s. *ἀγιος* and *ἅγιος*.

J. V. BARTLET.

SALAMIEL.—An ancestor of Judith, Jth 8¹ (BA Σαλαμιήλ, & Σαλαμιήλ). See SHELUMIEL.

SALAMIS (Σαλαμίς; *Salamis*), the first place visited by Paul and Barnabas on the first missionary journey (Ac 13⁹), was, as early as the 6th cent. B.C., one of the most important Greek towns of Cyprus. Under the Persians, it was the seat of one of the many Greek princes of the island; and in Roman times it was a flourishing mercantile town, from which the eastern half of Cyprus was governed. Having been overthrown by an earthquake in the reign of Constantine, it was rebuilt by Constantius, and under the name of Constantia became the capital of Cyprus. From A.D. 367-403 the bishop of Constantia was Epiphanius.

Under the Roman empire the Jews were very numerous in Cyprus; and there must have been a large colony of them at Salamis, with several synagogues. They were no doubt attracted by the facilities for trade afforded by the fine harbour of Salamis, and the farming of the copper mines of Cyprus to Herod the Great (Jos. Ant. XVI. iv. 5). The word was preached in Cyprus soon after the martyrdom of Stephen (Ac 11¹⁹⁻²⁰), and amongst the early converts was Mnason (Ac 21¹⁶). Barnabas was a Cypriote (Ac 4³⁶), and so possibly was John Mark, who accompanied Paul and Barnabas to Cyprus. During the suppression of the insurrection of the Jews in the reign of Hadrian, Salamis suffered greatly, and was almost deserted.

Salamis stood on the seashore at the eastern end of the great fertile plain—Salamina—which stretches westward for many miles between two ranges of mountains. Its harbour was good, and from it the rich products of Cyprus were shipped to Seleucia and the Syrian coast. The harbour is now filled with sand and overgrown with thorns and thistles; and a few broken columns and frag-

ments of mural masonry alone remain to mark the greatness of the ancient city. The site is about 3 miles from the modern *Famagusta*, and not far from it is the Greek monastery of St. Barnabas.

C. W. WILSON.

SALASADAI.—An ancestor of Judith, Jth 8¹ (B Σαρασαδαι, A Σαλασαδαι, & Σαρισαδαι).

SALATHIEL.—1. The father of Zerubbabel, 1 Es 5²⁻⁴⁸, 6² (Σαλαθιήλ, and so in the genealogies of Mt 1¹² and Lk 3²⁷). See SHEALTIEL and ZERUBABEL. 2. Another name of Esdras, 2 Es 3¹ (*Salathiel*).

SALECAH (סַלְכָה; Ἀσέλχά, Σελχά, Σελχά, Ελχά, Ἀχά; *Salecha*, *Salacha*; AV *Salcah*, in Dt 3¹⁰ *Salchah*).—Salecah, one of the cities of Og (Jos 12⁹), was on the eastern boundary of Bashan, to which the kingdom of Og extended (Dt 3¹⁰, Jos 13¹¹). Though not specially mentioned, it must have been included in 'all the kingdom of Og, king of Bashan,' which was given to the half tribe of Manasseh (Jos 13³⁰). But in 1 Ch 5¹¹ the children of Gad are said to have dwelt 'in the land of Bashan unto Salecah.'

Salecah was held by the Nabateans under king Aretas (B.C. 9-A.D. 40), whose coins have been found in the ruins. It was an important place in Roman times, and was specially sacred to Allat, the mother of the gods. It is identical with the present *Salkhad*—the *Sarkhad* of Abulfeda, who mentions its numerous vineyards, and the *Selcath* of William of Tyre, in whose day it was a strong fortress. The town occupies a commanding position a little south of the last spurs of *Jebel Haurán*, at the point where the great eastern road, that led from Gadara to the Persian Gulf, entered the desert. In the town, now occupied by Druses, there are many of the ancient houses—some almost perfect. The water-supply was, and still is, derived from rain water collected in reservoirs and cisterns. A conical volcanic hill rises to a height of over 300 ft. above the town, and in its crater stands the castle. It was built, or rebuilt, by the Romans, and must afterwards have been restored by the Arabs or the Seljuk Turks, for at the time of the Crusades it was an important fortress. From it the old Roman road can be seen running straight as an arrow over the plain towards Bosra and Gadara, and eastward as it enters the desert on its way to the Persian Gulf (Porter, *Giant Cities of Bashan*, p. 75; Heber-Percy, *A Visit to Bashan and Argob*).

C. W. WILSON.

SALEM (Σάλημος, AV *Salum*), 1 Es 8⁸=Shallum, an ancestor of Ezra (cf. Ezr 7²); called also SALEMAS (?), 2 Es 1¹.

SALEM (סָלֵם, i.e. *Shalem*; Σαλήμ; *Salem*).—1. A place of which Melchizedek was king (Gn 14¹⁸, He 7¹⁻²). It was, apparently, near a broad open valley (*ēmek*), called 'the vale of Shaveh,' or 'the king's vale' (Gn 14¹⁷). Various positions have been assigned to Salem. Josephus and the Jewish commentators identified the town with Jerusalem, and believed Salem to be the ancient name of that city (Jos. Ant. I. x. 2, BJ VI. x.; Onkelos and all the Targg.). This was also the opinion of the early Christians, for Jerome (*Qu. in Gen.*) writes of Melchizedek as 'king of Salem, which was the old name of Jerusalem,' and he alludes to the same belief in *Ep. lxxiii. ad Ev.* § 2. (See also Eus. *Onom.* Ἱεροσολήμ). Jerome himself, however, identified Salem with a place called *Salumias*, in the Jordan Valley, 8 miles south of Scythopolis, where the ruins of the palace of Melchizedek were shown (*Ep. lxxiii. ad Ev.* § 7; *Onom. s.* 'Salem,' 'Aenon'). At this spot there is now an artificial mound (*tell*), and on it the tomb of *Sheikh Salim*. In a frag-

ment preserved by Eusebius (*Præp. Ev.* ix. 22) the meeting of Abram and Melchizedek is said to have taken place in 'Ar-Garizin, that is, Mt. Gerizim. This is probably a tradition derived from the belief, current in the times of Eusebius and Jerome, that Shechem was the Shalem (AV, RVm) of Gn 33¹⁸ (*Onom. s.* 'Salem,' 'Sichen'). This view was advocated by Dean Stanley (*S. and P.* 250). The Samaritan tradition places Salem at *Sálím*, east of *Náblus*. Bochart (*Phaleg* ii.) and Ewald (*Gesch.* i. 410) supposed Salem to have been east of Jordan, between Damascus and Sodom.

The most probable view is that Salem was Jerusalem. The arguments in its favour are:—that Jerus. is so called in Ps 76² (see below); that Salem as the residence of a priest-king must have been an important and well-known city, and that, if it be not Jerusalem, it is only once mentioned in the OT; the similarity of the names of the two kings Melchizedek and Adonizedek (Jos 10¹, if this and not Adonibezek is the correct reading, see ADONIZEDEK); and the parallel drawn between Melchizedek and the king of the line of David ruling at Jerusalem (Ps 110⁴). In the Tel el-Amarna tablets, which are earlier than the conquest of Palestine by Joshua, Jerusalem appears as *Uru-salim*, that is, according to Sayce [but this interpretation is extremely doubtful], the city of the god Salim, or god of peace. It may be added that Abram's route on his return from Damascus to Hebron might well have passed through Jerus., and that the vale of Shaveh may have been the broad open head of the valley of Hinnom before it contracts and becomes a ravine (*gai*). See, further, Dillm. on Gn 14¹⁷; Sayce, *HCM* 295 ff., *EHH* 28; Hommel, *AHT* 201.

2. (*ἐν εἰρήνῃ*; in peace) There is a general agreement that in Ps 76² 'Salem' is Jerusalem. Each of the two names Salem and Zion indicates Jerusalem as the special seat of Divine worship, as Judah and Israel each stand for the whole nation in Ps 76¹ 114².

3. The valley of Salem (*τὸν αὐλῶνα Σαλήμ*) is mentioned (Jth 4⁴) as one of the places to which the people of Judah sent messengers on the approach of Holofernes. Reland suggests (*Pal. p.* 977) that the original Heb. reading was *שַׁלְמָה* (= *eis αὐλῶνα eis Σαλήμ*, 'into the plain to Salem,' that is, into the Jordan Valley (*Αὐλῶν*) to Salem), and that the Greek translators rendered without the repeated *eis*. The place was very possibly that called *Salumias* by Jerome (see above), which was situated not far from the point at which the ancient road from Bethshean to Shechem left the plain of the Jordan and entered the hills.

4. In Jer 41[48]⁵ the LXX (B) reads Salem for Shiloh. This Salem, if the reading be correct, must have been near Shechem, and possibly at *Sálím* to the east of *Náblus*.

C. W. WILSON.

SALEMAS (*Salame, Salemas*, AV *Sadamias*), 2 Es 1¹=Shallum, an ancestor of Ezra (cf. Ezr 7²); called also Salem, 1 Es 8¹. There is some doubt as to the nominative of this name in 2 Esdras. It occurs in the genitive, for which Dr. James reads in the text *Salame*, with note 'Salemas A.'

SALIM (*Σαλειμ*; *Salim*).—A town or village named (Jn 3²³) to indicate the position of *Ænon*,—the 'springs' in which John was baptizing,—and, presumably, a well-known place. It was on the west side of Jordan (cf. Jn 3²⁶ with 1²⁸ and 10⁴⁰), but its site has not yet been determined. Various identifications have been suggested.

(1) Eusebius and Jerome (*Onom. s.* 'Ænon') state that in their day *Ænon* was shown 8 miles south of Scythopolis, near Salim (*Salumias*), and the Jordan. This Salim is now, apparently, *Tell*

Ridhghah (see SALEM), not far from which is a group of fine springs that answer well to the 'many waters' of *Ænon*. It has been objected to this site that, as it was in Samaria, the Jews would not have gone to it to be baptized. But it is probable, from its position, that *Salumias* was in the district of Scythopolis—a town of Decapolis, with a large population of Jews noted for their strict performance of all religious observances. See, further, Westcott on Jn 3²³.

(2) Robinson (*BRP* iii. 333) and Conder (*Tent-Work*, i. 91) have proposed *Sálím*, east of *Náblus*; but this place is 4 miles from the springs identified with *Ænon*, and separated from them by a range of hills. It is, too, in the heart of Samaria, and not far from Shechem.

(3) Barclay (*City of the Great King*, 558–570) identifies *Ænon* with the copious springs in *Wády Fáraah*, to the N.E. of Jerusalem, and is of opinion that Salim was in the *Wády Suleim* near *Anáta* (Anathoth).

(4) Büsching identifies Salim with *Ain Karim*, the traditional birthplace of St. John.

(5) Alford (*Gr. Test.* Jn 3²³) and Riehm (*HWB*, s. 'Salim') suppose Salim and *Ænon* to be Shilhim (LXX *Σελείμ*) and Ain in the Negeb (Jos 15³²). But these two places in the southernmost parts of Judah, as yet unidentified, seem to be too far removed from what is known of the scene of the Baptist's labours.

C. W. WILSON.

SALIMOTH (B *Σαλειμῶθ*, A *Ἀσσαλιμῶθ*, due to a wrong division of syllables in the names *Bari* | *ασαλειμῶθ*, AV *Assalimoth*), 1 Es 8³⁶. Called *Shelomith*, Ezr 8⁹.

SALLAI (שָׁלַי).—1. The eponym of a Benjamite family which settled at Jerusalem after the Return, Neh 11⁸ (Σηλαί). 2. The name of a priestly family, Neh 12²⁰ (B⁹ A om., *Σαλλαί*), called in v. 7 *Sallu*.

SALLU.—1. The eponym of a Benjamite family which settled at Jerusalem after the Return, 1 Ch 9⁷ (שָׁלַי; B *Σαλώμ*, A *Σαλώ*), Neh 11⁷ (שָׁלַי; B *Σηλώ*, *Σαλώμ*). 2. The name of a priestly family, Neh 12²⁷ (שָׁלַי; B⁹ A om., *Σαλουαί*), called in v. 20 *Sallai*.

SALLUMUS (Σάλλουμος), 1 Es 9²⁵=Shallum, Ezr 10²⁴; called *Salum*, 1 Es 5²⁸.

SALMA.—See SALMON.

SALMAI (שָׁלַמַי).—The eponym of a family of Nethinim, Neh 7¹⁶ (B *Σαλαμει*, A *Σελμει*, *Σαμαει*), called in Ezr 2⁴⁶ *Shalmal* (Kēṣē שָׁלַמַי; *Kethibh* שָׁלַמַי followed by AV text *Shalmal*; B *Σαμαάν*, A *Σελαμί*), and in 1 Es 5³⁰ SUBAL.

SALMANASAR (*Salmanasar*).—2 Es 13⁴⁰=SHALMANESER (which see).

SALMON, or **SALMA** (שָׁלֹמֹן Ru 4²¹, שָׁלֹמֹן Ru 4²⁰, שָׁלֹמֹן 1 Ch 2¹¹ vs. 51, 54, LXX *Σαλμών* Ru B, 1 Ch 2¹¹ A; *Σαλμών* Ru A, 1 Ch 2¹¹ B; *Σαλωμών* 1 Ch 2¹¹, 14; NT *Σαλμών* with variant *Σαλά* (K⁹ B Aeth.) in Lk 3³²).—The father of Boaz and son of Nahshon of the tribe of Judah (Ru 4²⁰, 21), and therefore in the direct line of the ancestry of our Lord (Mt 1⁴, Lk 3³²). If the *Salma* of 1 Ch 2¹¹, 54 is the same person, he was the 'father' or 'founder' of Bethlehem, but it is to be noticed that that *Salma* is reckoned as one of the sons of Caleb the son of Hur.* From Mt 1⁵ we learn that Salmon married Rahab. The *Salma* of 1 Ch 2¹¹ had many descend-

* This cannot mean in any case that *Salma* was literally a son of Caleb.

ants,—Bethlehem and the Netophathites, Atroth-beth-Joab, and half of the Manahathites, the Zorites,—but the text of the verse seems to have been corrupted. Some have wished to distinguish between Salma and Salmon, in order to lengthen the genealogy, but it is scarcely to be conceived that a different person is intended in the two consecutive verses of Ruth (4^{20, 21}). As to the genealogy of Christ, Eusebius (*HE* ii. 7) asserts quite distinctly that genealogical tables of various families, such as that of David, were in existence up to the time of the Herods. That this is possible may be gathered from the care exercised at the time of the return from the Babylonish captivity about noting those who 'could not show their fathers' houses, and their seed, whether they were of Israel' (*Ezr* 2⁶¹, cf. *Neh* 7⁶¹).

H. A. REDPATH.

SALMONE (Σαλμών; *Salmon*).—The name of a promontory at the N.E. end of Crete, now *Cape Sidero*, on which stood a temple of Athene. The Alexandrian ship in which St. Paul sailed from Myra for Italy, after reaching Cnidus with difficulty, met the full force of the N.W. wind, and could not continue her voyage on the direct track, which passed close to the southern points of Mores. The captain, consequently, determined to alter her course and, when off (*κατά*) Salmone (*Ac* 27⁷), to work his way westward under the lee of Crete. The arguments in favour of a N.W. wind, and its influence on the course of the ship, are well stated by Smith of Jordanhill (*Voyage and Shipwreck of St. Paul*, p. 35).

C. W. WILSON.

SALOAS (Β Σάλας, Α Σαλίας, AV Talsas, from the Ald.), 1 Es 9²=Elasah, *Ezr* 10².

SALOM.—A Greek form (Σαλώμ) of the name SHALLUM (שָׁלֹמ). Its only application in EV is to Salom, the father of Hilkiah, *Bar* 1⁷.

SALOME (Σαλώμη).—1. The daughter of Herodias, Mt 14³⁻⁶, Mk 6¹⁷⁻²²; see *HEROD*, vol. ii. pp. 355, 360. 2. A woman present at the crucifixion, Mk 15⁴⁰, and afterwards a visitor at the sepulchre, Mk 16¹. The comparison of the former passage with Mt 27⁵⁶ leaves little doubt that she was also the wife of Zebedee, and, if so, she figures in the incident of Mt 2³⁰⁻²³. Nothing else is known of her, though there are many conjectures, of which the principal is that she was a sister of Mary, the mother of Jesus. In support of that view may be cited a reading of the Peshitta version of Jn 19²⁵ (cf. also the Jerus. Syr. lectionary), and a presumptive unlikelihood, on account of the similarity of the names, that Mary the wife of Clopas was a sister of the mother of Jesus. James and John would thus be the cousins of Jesus, and the silence of the NT as to so close a relationship becomes significant. 'Many other women' were present at the crucifixion, Mk 15⁴¹; and amongst these unnamed disciples must probably be sought the sister of Mary, the identification with Salome being precarious in the extreme, and sustained by no real evidence. See, further, art. *MARY*, vol. iii. p. 278 f.

R. W. MOSS.

SALT (מֶלַח, ἅλας, ἅλις).—This mineral (sodium chloride) is in such general use as a condiment to food amongst all civilized nations that it has become a necessity; and undoubtedly it is beneficial in the animal economy as an antiseptic, and a preventive to the development of intestinal worms. Even wild animals feel its necessity as well as domestic cattle; and it is well known that in former times when the bison roamed in immense herds over the plains of North America they made long journeys to the 'salt-licks,' or salinas, for

the purpose of licking the ground coated with this mineral. Salt of commerce is one of the most abundant of substances, and is found to a greater or less extent in nearly all countries, especially in England, Germany, Switzerland, and the Austrian Alps; in India, both in the salt range of the Punjab and in the great salt lake of Sambur in Rajputana; in China, and in N. America. In Europe and the British Isles its chief source is the Triassic formation. It is also the most abundant saline ingredient in the waters of the ocean* and of most salt lakes. On the coasts of Spain, Italy, and some other countries, salt of commerce is largely extracted from the oceanic waters by evaporation. Salt is found also in the waters of nearly all rivers.

The chief source of salt in Palestine is, and always has been, the terraced hill, called *Khashm Usdum*, on the south-western shore of the Dead Sea (which see); and this trade is still carried on by the Arabs. Here a cliff of solid rock-salt from 30 to 60 ft. high,† capped by white marl, extends for a distance of nearly 7 miles along the shore of the lake, and affords an inexhaustible supply; while salt is also obtained from pits dug into the sand or slime of the shore, into which the waters of the Dead Sea are admitted and then allowed to evaporate. The abundance of salt was of the greatest use to the Israelites, not only for domestic purposes, but for use in the sacrifices of the temple (*1v* 2¹³, *Ezr* 6⁹, *Mk* 9⁴⁹); and so Antiochus the Great, as a reward for the alliance of the Jews in his wars with Ptolemy Philopator, bestowed upon them gifts for their sacrifices, of wine, oil, and other articles, amongst which were 375 medimni of salt.‡ Cf. *Ezk* 47¹¹ (*RVm*), where, in the prophetic description of the ideal future, after the Dead Sea as a whole has been sweetened, the marshes are still reserved for the production of salt.

Salt trade was extensively carried on in ancient times along the caravan routes in Syria, Palestine, and Northern Africa. One of the chief of these was the route from the ports of Phœnicia to the Persian Gulf through Palmyra. The Phœnicians manufactured salt by evaporation from sea-water, and used it for salting fish.

Emblematic Uses of the Term.—Owing to its purifying, sustaining, and antiseptic qualities, salt became an emblem of fidelity and friendship amongst Eastern nations. To have 'eaten of his salt,' and thus partaken of his hospitality, was (and still is) regarded by the Arabs as a token or pledge of eternal amity. So in the Bible it is used as an emblem of the Covenant ('a covenant of salt') between J^h and His people (*Nu* 18¹⁹, 2 *Ch* 13⁵). In memorable language our Lord applies the expression to His disciples: 'Ye are the salt of the earth' (*Mt* 5¹³). Again He says: 'Salt is good; but if the salt have lost its saltiness, wherewith will ye season it?' and He concludes with the injunction: 'Have salt in yourselves, and have peace one with another' (*Mk* 9⁵⁰).

Excess of saltiness in the ground produces sterility; hence a salt-land becomes emblematic of barrenness and desolation (*Dt* 29²³, *Jer* 17⁶, *Zeph* 2¹¹); and a city when destroyed was sown with salt, in token that it was never again to be restored. Thus it happened in the case of Shechem when captured by Abimelech (*Jg* 9⁴⁵).

E. HULL.

SALT, CITY OF (צֶרֶת הַמֶּלַח).—This was one of the cities which fell to the lot of the tribe of Judah, and was situated in the wilderness of

* In the proportion of 28 to 29 grammes per litre.

† Hull, *Mount Seir*, ch. xiv. p. 129; Lartet, *Voyage d'Exploration de la Mer Morte: Tristram, Land of Israel*, 328.

‡ *Jos. Ant.* xii. iii. 3. Revenue was raised by a tax on salt, the remission of which was offered the Jews by Demetrius, king of Syria; *ib.* xiii. ii. 3.

Beth-arabah (Jos 15¹¹, ²³). It was also not far from En-gedi, the site of which we know; hence it may be inferred to have occupied some position on the western shore of the Dead Sea, between En-gedi and *Khashm Usdum* (the salt mountain. See art. SALT). E. HULL.

SALT SEA.—See DEAD SEA.

SALT, VALLEY OF (חֶלְקֵי מֶלַח).—The scene of memorable victories of David, or of Abishai his lieutenant, over the Edomites (2 S 8¹³, 1 Ch 18¹²),* and at a later period of Amaziah over the same hereditary enemies of Judah (2 K 14⁷, 2 Ch 25¹¹). The position of this valley can scarcely be a matter for doubt, both on account of its historical associations as related in the above passages, and from the position of the salt mountain, *Khashm Usdum*, which rises from the western shore of the Dead Sea. The accounts of the battles would lead to the inference that the position was some valley lying between Jerusalem and Edom of which Petra (Sela) was the capital; and the name indicates the proximity of either the salt mountain or the salt sea. Both the inferences are satisfied by identifying the Valley of Salt with the plain extending from the southern end of the Dead Sea to the foot of the cliffs (the ascent of 'Akrabbim), † which cross the valley from side to side and form the southern margin of the Ghor. This plain is of sufficient extent to be the battleground for large armies. See arts. ARABAH and DEAD SEA. E. HULL.

SALTWORT (Job 30⁴ RV).—See MALLOWS.

SALU (סָלֻ).—The father of Zimri the Simeonite chief who was slain, along with the Midianitish woman, by Phinehas, Nu 25¹⁴ (B Σαλμών, A Σαλώ, Luc. Σαλώμ), 1 Mac 2²⁸ (Σαλώμ, hence AV Salom).

SALUM (A Σαλούμ, B om.), 1 Es 5²⁸ = Shallum, the head of a family of porters (cf. Ezr 2⁴²). Called Sallumus, 1 Es 9²⁸.

SALUTATION (NT δσπασμός; 'salute' in OT is expressed by בָּרַךְ [lit. 'bless'] or שָׁאַל לְשָׁלוֹם [lit. 'ask for the peace of'], in NT by δσπάσθαι [also tr. in AV 'greet']].—In the modern East some word or act of salutation accompanies all social intercourse, the phrases and gestures being modified according to the occasion and the relationship of the parties. It is against all the courtesies of Oriental life to deliver any message, ask information, or pass to any matter of business, without some form of salutation by which inquiry is made after each other's welfare, and goodwill is expressed. Thus a traveller seeking direction from a peasant by the roadside must first hail him by expressing a wish that his toil may bring an ample reward. Similarly, a purchaser on entering a shop, before mentioning what he wants or engaging in the usual sword-play about the price, must salute the merchant with the wish that the day may prove one of blessing and profit. Remoteness from cities and centres of civilization does not mean ignorance of such etiquette, as the Bedawin of the desert excel in this politeness. No inferiority of position is allowed to excuse the omission of such courtesy: the beggar at the door expects a salutation along with the copper or piece of bread, and, if refused

charity, claims that he shall at least be dismissed with a recommendation to the Divine care. Something of formal dignity mingles also with the daily salutations in the family. Some of the chief occasions of salutation are: the birth of a son, a marriage, the meeting of relatives away from home, the return of a friend from a journey, the appeals of the street beggar. Salutations are also offered to the host after partaking of refreshments, upon meeting a fellow-traveller on the road, and on visits of respect to ecclesiastical or government officials.

Oriental salutation, ancient and modern, owes much of its originating motive and distinctiveness of character to the following facts of Oriental life:—

(1) *The strong sense of personal dignity among Orientals.*—In Job 29 there is an enumeration of the elements of Oriental greatness, and a description of the happiness of the man who is met on every side by the reverence, obedience, and loving gratitude of those to whom he has been a benefactor. The same sense of dignity implies a quick recognition of affront, and a strong feeling of indignation when the claim to respect is repudiated. Hence the complaint over the cessation of the wonted reverence in Job 30. The narrative in the Bk. of Esther turns upon the salutation that Mordecai refused to Haman. Christ's Oriental hearers would be deeply stirred by the appeal of the affronted guest (Lk 7⁴⁴⁻⁴⁵), and by the list of indignities heaped upon the neglected king (Mt 23⁴²⁻⁴³). The ancient sculptures and paintings of Assyria and Egypt show the forms of prostration in which gods and kings were saluted and supplicated. Similar formalities are mentioned in the Bible as being employed in ordinary social life (Gn 32¹⁷⁻²⁰ 33³, 1 S 23²³⁻²⁴). The usual salute of reverence is that of standing erect. Thus children rise to salute their parents (Pr 31²⁸); and in the village, when the men are gathered in a room on the occasion of a marriage or funeral, it is customary for all to rise and stand whenever a member of the village or a visitor from the neighbourhood enters the room. There is a weird allusion to this custom in Is 14⁹. The most impressive form of salutation is to kneel, and clasp and kiss the feet. This is done when some favour is sought or influence solicited on behalf of oneself or a friend (2 K 4³⁷). When words fail, and there are no more tears to shed, this oratory of silent helplessness seems to say, 'Cast me not away from thy presence' (Ps 51¹⁷). It is the power of weakness over strength through the confession of weakness.

(2) *The comfort derived from physical health, peace of mind, and family affection.*—With Orientals the summit is always more pleasant than the ascent; work is undertaken in order to the attainment of rest rather than rest enjoyed in order to the renewal of labour. When anything urgent or important has to be done, the early morning is chosen, so that, if possible, rest of mind may be recovered before the evening (Gn 22⁷, Jer 7²⁸). An Arabic proverb says, 'It is better to have bad news in the morning than news of any kind in the evening.' Hence a fulness of meaning, a sense of needed comfort, in the salutation of peace (שָׁלוֹם *shalôm*, εἰρήνη), implying both the safety of Divine protection and the restfulness of human friendship (Gn 26^{29, 31} 44¹⁷, Ex 4¹⁸, Nu 6²⁶, Jg 18⁶, 1 S 1¹⁷ 20³³ 25^{6, 33} 29⁷, 1 Ch 12¹⁸, Mk 5³⁴). The question of giving and receiving this salutation of peace was one of grave importance to travellers meeting strangers on the road. If the strangers were enemies, they would also be aliens in religion, and unable to call down the blessing of their god upon those who were under the protection of another. Even at the present day, Moslems, Jews,

* Both these passages, judging by the context, evidently refer to the same event, but in the former it is 'the Syrians' who are vanquished, in the latter it is 'the Edomites.' As it is extremely improbable that the Syrians should have been encountered at the southern extremity of the Dead Sea, we must suppose that the latter is the correct account, and that the former is an error due to transcription. (See Driver, *Sam.* 217 f.)

† *Akrabbim* = 'scorpions,' which are found under the stones at this place.

and Christians shrink from bestowing upon each other the salutation of peace. To the Moslem especially it seems heterodox to wish peace to the infidel, and an impertinence to be thus saluted by him. These limitations are left behind in Mt 5⁴⁷. Hence the directness of the question, 'Art thou for us, or for our adversaries?' (Jos 5¹³), and the anxious inquiry, 'Is it peace?' (2 K 9¹⁷⁻²²). Hence also the abhorrence of deceitful salutation (Ps 28³, Jer 6¹⁴ 8¹¹, Ezk 13¹⁰). The ordinary hail of travellers on the road is the old formula mentioned in Ps 118²⁶, Mt 21⁹ 23³⁹, 'Blessed is he that cometh.' Among relatives and familiar friends the form of salutation after an interval of separation is to kiss on both cheeks, or on each side of the neck. It is the kiss of brotherly love, and is frequently referred to in Scripture (Gn 27²⁷ 29¹¹, 31²⁶ 33⁴, Ex 4²⁷, Ps 85¹⁰; cf. Ro 16¹⁶, 1 Co 16²⁰, 2 Co 13¹³, 'Salute one another with a holy kiss,' similarly 1 Th 5²⁸, 'Salute all the brethren with a holy kiss,' and 1 P 5¹⁴, 'Salute one another with a kiss of love'). In the case of children saluting their parents, scholars their teachers, and servants their masters, the custom is to stand, and, bowing down, to kiss the hand. In Oriental letters the opening sentence frequently begins with the expression, 'After kissing your hands,' as a token of respect. This reverential salutation of kissing the hands is always given to priests, rabbis, and sheikhs of religion. It was the salutation claimed by the Pharisees (Mk 12³⁹). Absalom changed the salutation of respect to that of equal friendship (2 S 15⁶). There prevails at the present time a compromise of courtesy by which one seizes the hand of a friend in order to give the kiss of veneration, but the other defeats the design by quickly withdrawing his hand as soon as his fingers have been touched. See art. KISS.

In Bible instances of salutation, where one person falls upon the neck of another, the Heb. word for 'neck' (צָוָר *zavār*) is used in the dual [probably not plural] as indicating the two sides that are kissed (Gn 27¹⁶ 33⁴ 45¹⁴ 46²⁹, Ca 4⁹).

In Oriental salutation great attention is paid to asking after each other's health and general welfare, in the course of a call of courtesy or on an occasion of meeting. It is exceedingly trying to a Western, who craves some exchange of thought, to have to answer these repeated inquiries after his health, more especially as every such inquiry begins another circulating decimal of devout commonplaces. It is owing to the prominence given to this matter that the visit of salutation in the Bible is often described as a health-inquiry (1 S 10¹ 17²² 30²¹ RV gives the more general 'salute' instead of 'ask of welfare' in 1 Ch 18¹⁰). The union of reverence and affection in salutation is exemplified in Ex 18⁷, 1 S 20¹, 2 S 14³². The salutation of bowing and kissing was employed in the worship of Baal (Job 31²⁷, 1 K 19¹⁸).

The injunction, 'Salute no man by the way' (2 K 4²⁹, Lk 10⁴), referred to the inevitable delay imposed by common courtesy in asking and answering formal inquiries as to health, family, etc. The special responsibility of one sent by another is recognized by the Orientals, and the messenger is saved from the charge of rudeness by a proverb which says, 'The messenger has only to deliver his message.'

(3) *The deep-seated conviction that both blessing and cursing in salutation tend to work out their fulfilment.*—It was of importance to give or to withhold the salutation of peace. The salutation at parting took the form of a benediction (Ru 1¹⁰ 14, 1 S 20², 2 S 19³⁸), and consequently the same word might mean 'rejoice' or 'farewell' (Ph 4⁴). This form of salutation is exemplified in rich fulness at the close of the Pauline Epistles. When Christ said that the 'peace' He gave was not after the

custom of the world, He referred to the emptiness that had come to mark salutations that once expressed a precise meaning and a sincere desire (Lk 24³⁸, Jn 14²⁷ 20¹⁹). The disciples were told that when they went forth in His name, and invoked the Divine blessing on a house, and were refused admittance and hospitality, then the blessing returned to those who had uttered it. It was their introduction to what has since become a familiar law in the Christian service, that whatever is forfeited for the Lord is found in Him.

G. M. MACKIE.

SALVATION, SAVIOUR.—The purpose of this art. is to give a general survey of the doctrine of salvation as developed within the period covered by the Biblical writings. Of necessity the subject stands in close relations with others treated in the Dictionary, and the reader is therefore recommended to consult, in addition to special articles on such subjects as FAITH, MEDIATOR, REDEEMER, RANSOM, PAROUSIA, etc., the general articles on GOD, HOLY SPIRIT, JESUS CHRIST, MESSIAH, KINGDOM OF GOD, and ESCHATOLOGY. It will be the aim of this article, as far as possible, to avoid unnecessary repetition, and, passing over points of detail, to confine itself to a bird's-eye view of the doctrine as a whole.

- i. The Words.
- ii. The Idea (in general).
- iii. History of the Idea.
 1. In the Old Testament.
 2. Between the Testaments.
 3. In the Teaching of Jesus.
 4. In the New Testament: (a) in general; (b) St. Paul; (c) St. John.
- iv. Systematic Statement.
 1. Nature of Salvation: (a) temporal and spiritual; (b) individual and social; (c) present and future.
 2. Conditions of Salvation: (a) on the Divine side; (b) on the human side.
 3. Extent of Salvation: (a) in this life; (b) in the life to come; (c) in the universe.

i. **THE WORDS.**—'Salvation' is in OT tr. of a number of words, the principal of which are: שָׁמַר, שָׁמַר, or שָׁמַר, שָׁמַר (only Ps 68²⁰ RV 'deliverances'), שָׁמַר, from the stem שָׁמַר (lit. 'to be broad, spacious'; only found in Niphal and Hiphil, the latter with the meaning 'deliver'); in the NT it is tr. of σωτηρία, from σώω 'to save' (less frequently of τὸ σωτήριον, neut. of the adj. σωτήριος; e.g. Lk 23³⁵, Ac 28²⁸, Eph 6¹⁷; cf. Tit 2¹¹ ἡ χάρις τοῦ θεοῦ σωτήριος, 'the grace of God bringing salvation'). Other words translated 'save' in our VSS are in OT יָצַק and יָצַק (Piel and Hiphil of יָצַק 'to live,' with the meaning 'to keep living,' 'to save alive'; so Gn 12¹³ 19¹⁹ 45⁷ [RV] 50²⁰, Ex 1¹⁷ 18, Nu 22³³ 31¹⁵, Dt 20¹⁶, Jos 2¹³ 6², Jg 8¹⁹ 21¹⁴, 1 K 18²⁵ 20²¹, 2 K 7⁴, Ezk 13¹⁸ 19, and esp. Ezk 3¹⁸ 18²⁷, where the reference is to escape from penalty through repentance); יָצַק (lit. 'to snatch away,' with meaning 'deliver,' by which it is usually rendered both in AV and RV; e.g. 1 S 12²¹ and often. The tr. 'save' occurs in AV only 2 S 19⁹). יָצַק (Piel of unused יָצַק 'to slip away,' 'to escape,' with meaning 'to let or cause to escape,' hence 'to deliver'; 1 S 19¹¹, 2 S 19⁹, 1 K 1¹³, Job 20²⁰, Jer 48⁶, and 2 S 19⁹ RV, Jer 51⁶ 40); יָצַק (lit. 'to keep,' 'to preserve'; Job 2⁹, RV 'spare'). In NT the word 'save' is usually the translation of σώω, but the compound διασώω is rendered 'save' in three instances (Lk 7³ RV, where AV renders 'heal,' Ac 27⁴³, 1 P 3²⁰, cf. Ac 23²⁴ 'to bring safe'; elsewhere 'escape' Ac 27⁴⁴ 28¹, or 'make whole' Mt 14³⁶), and the same is true in one case (2 P 2⁵ AV) of φυλάσσω (lit. 'to guard,' 'to preserve,' so RV). The phrase περιποίησις ψυχῆς in He 10³⁹ is rendered 'saving of the soul' in both versions.

'Saviour' is the tr. in OT of the Hiph. ptep. (שָׁמַר) of שָׁמַר (so Jg 3⁹ 15, Is 19²⁰ 43¹, and often); in NT and LXX of σωτήρ, from σώω.

ii. THE IDEA.—The root idea in salvation is *deliverance*. In every case some danger or evil is presupposed, in rescue from which salvation consists. Since in primitive times one of the greatest dangers to be feared is defeat in battle, salvation is often used in OT in the sense of 'victory' (e.g. Ex 15², 1 S 11¹³ RV 'deliverance,' 19¹ RV 'victory,' Ps 20⁵ RVm 'victory'), and successful warriors are called 'saviours' (e.g. Jg 3^{9, 15}, Neh 9²⁷). But this is only one modification of a much broader usage. Men are said to be saved from trouble (Ps 34⁸, Is 33², Jer 14⁸ 30⁷; cf. 1 S 10¹⁸, Ps 107^{13, 19}), enemies (2 S 3¹⁸), violence (2 S 22³, Ps 59² 'bloodthirsty men'), reproach (Ps 57³), exile (Ps 106⁴⁷, Jer 30¹⁰ 46²⁷, Zec 8⁷), death (Ps 6⁴, cf. v. 8), sin (Ezk 36²⁹, cf. Ps 130⁸, Mt 12¹). Since all deliverance comes from God, He is frequently spoken of as 'Saviour' (so esp. in Deutero-Isaiah 43^{3, 11} 45^{16, 21} 49²⁶ 60¹⁶ 63⁸; but also Jer 14⁸, Hos 13⁴, 2 S 22³, Ps 106²¹). The name 'Saviour' is often applied to God in the Apocrypha (e.g. Ad. Est 15², Bar 4²³, Jth 9¹, Wis 16⁷, Sir 51¹, 1 Mac 4²⁰; cf. 3 Mac 6^{29, 39} 7¹⁸, Ps-Sol 37⁸ 89¹⁶ 17³). It is less frequent in NT, being found only in Lk 1⁴⁷, 1 Ti 1²³ 4¹⁰, Tit 1³ 2¹⁰, Jude 20. Elsewhere in NT the title is applied only to Jesus Christ (so Lk 2¹¹ and often). With the growth of the Messianic idea we find the tendency to use the words 'save' and 'salvation' in a technical theological sense of the deliverance to be brought in with the Messianic age (e.g. Jer 23⁶) or at the last day (Is 25⁹). This usage, which is common in the Apocalyptic literature (e.g. Enoch 62¹³ 90¹⁰, Apoc. Bar 68³, 2 Es 8³; cf. Ps-Sol 10⁹ 12⁷), reappears in NT in such passages as Mt 10²² 24^{13, 22} and parall., Ro 11²⁶ 13¹¹, 1 Co 3¹⁵, 2 Ti 4¹⁸ RV, He 9²⁸, 1 P 1^{5, 9, 10}. The word is still used, however, in NT as in OT, in the wider sense of deliverance from trouble (so Ja 5¹⁰ of the healing of the sick, and often in the Gospels). With the deepening sense of moral evil, 'salvation' acquires a more profound ethical and spiritual meaning. It includes deliverance from sin itself as well as from the various evils which are the consequence of sin, and so comes to stand, in the spiritual realm as well as in the temporal, for a present experience as well as for a future expectation. The growth of this deeper meaning will become apparent as we pass to a brief review of the history.

iii. HISTORY OF THE IDEA.—

The Sources.—In the present state of Biblical criticism, any attempt to trace the development of a theological conception must be provisional. As a part of general history, the history of doctrine is dependent for its sources upon the results reached in the wider discipline, and the uncertainty which still obtains as to the date and authorship of many OT passages (e.g. Psalms) hinders the theologian in his attempt at constructive statement. On the other hand, the student of doctrine has an advantage over the general historian. For there is an inner logic of ideas which is quite independent of time and place. And it is often possible by the aid of this logic to trace the origin and development of conceptions, even where external evidence as to their history is lacking or uncertain. In the present article the general results of Biblical criticism are presupposed. It is assumed that the idea of salvation has had a history, the broad outlines of which we can trace, and that the record of this history is preserved for us in the Biblical writings, which, together with the contemporaneous Apocryphal and Pseud-epigraphical literature, constitute our sources. In what follows we shall give the different steps in the development of the idea in their natural order, even if the particular passages which illustrate a special usage be themselves of later or of uncertain date.

1. *In the Old Testament.*—The most signal instance of the Divine salvation in the early history of Israel, and the one which made the deepest impression on the national memory, was the deliverance from Egypt. The prophetic historian in the Pentateuch (J) relates with triumph how 'J' saved Israel that day out of the hand of the Egyptians; and Israel saw the Egyptians dead upon 'the seashore' (Ex 14³⁰). The same glorious deliverance is celebrated in Ps 106 (cf. esp. vv. 7, 8, 10).

In these passages we have the simplest meaning of 'salvation.' It is deliverance from present danger or trouble, more especially from defeat in battle. J' is the Saviour of Israel, because He is the one from whom such deliverance comes. 'J' is my strength and my song; sings the author of the Song of Moses (Ex 15²), 'and he is become my salvation.' And the context makes clear the sense in which this salvation is to be understood. 'J' is a man of war, J' is his name' (v. 3, cf. the title *J' Sabaoth*, 'J' of Hosts,' i.e. according to what is probably the best interpretation, J' the God of the armies of Israel). The use of 'salvation' in this sense of victory in battle is frequent in the OT, esp. in the historical books. In the time of the judges J' raised up 'saviours' in the persons of Othniel (Jg 3⁹) and of Ehud (3¹⁵). He sent Gideon to save Israel (6^{14, 15}, cf. vv. 36, 37), and required him to reduce his force to 300 men, lest Israel should say, 'mine own hand hath saved me' (7²). In the time of their distress at Aphek the people send in haste to fetch the ark from Shiloh, 'that it may come among us and save us out of the hand of our enemies' (1 S 4⁸). With the growth of the national life the importance of such deliverance increases. J' made Saul to be king that he might save the people from the Philistines (1 S 9¹⁶), and the same is true of David after him (2 S 3¹⁸ 'By the hand of . . . David I will save . . . Israel out of the hand of the Philistines and out of the hand of all their enemies'; cf. also 2 K 14²⁷). This view of J' as the Saviour of Israel in battle finds classic expression in the Deuteronomic code (Dt 20³⁻⁴): 'And it shall be, when ye come nigh unto the battle, that the priest shall approach and speak unto the people, and shall say unto them, Hear, O Israel, ye draw nigh this day unto battle against your enemies: let not your heart faint; fear not, nor tremble, neither be ye affrighted at them; for J' your God is he that goeth with you, to fight for you against your enemies, to save you.'

Side by side with this view of 'salvation' as victory in battle, goes the wider conception of it as deliverance from trouble. J' not only delivers His people from their enemies (2 S 3¹⁸), but from all their calamities and distresses (1 S 10¹⁹, cf. Ps 107¹³). He saves the poor man who cries to Him out of all his troubles (Ps 34⁸, cf. 37²⁹). His salvation brings with it not merely deliverance, but security and prosperity. This close connexion with prosperity is clearly brought out in such a passage as Ps 118²⁴ 'Save now, we beseech thee, O J'. O J' . . . send now prosperity' (cf. Ps 106⁴ 'O visit me with thy salvation: that I may see the prosperity of thy chosen'). In more than one instance the Hebrew words usually translated 'salvation' are rightly rendered in EV 'welfare' (e.g. Job 30¹⁵ נַחֲמָה) or 'safety' (i.e. security, cf. Job 5^{4, 11}, Pr 11¹⁴ נַחֲמָה). Especially common is this connotation in connexion with the eschatological use of the word. Cf. Is 61¹⁰ 'I will greatly rejoice in J', my soul shall be joyful in my God; for he hath clothed me with garments of salvation, he hath covered me with the robe of righteousness.' The salvation in which the redeemed Israel is here represented as rejoicing is the good time of safety and prosperity to be ushered in with the Messianic age. But this is already to anticipate the next meaning.

Thus far we have considered salvation as deliverance from present evil. The conception is both temporal and material. But with the rise of Messianic prophecy* we note a new development. The conception of salvation is still more

* The word 'Messianic' is here used in its broadest sense, to include the doctrine of a future Divine deliverance in all its forms, whether or not it involves the belief in a Messianic king of David's line.

or less external. It involves victory in battle, the defeat of enemies, and worldly prosperity. But this victory is not looked for in the present. There is a preceding judgment to take place, in which unfaithful Israel shall receive from J' the just recompense of her sins. Only after this impending judgment, and then only for the faithful remnant, will J' show Himself as Saviour. We have thus the beginnings of the use of the word in an eschatological sense, as one of the features of the Messianic age. The prominence of the conception varies greatly in the different prophets. In some it is almost overshadowed by the message of doom. In others it is a hope which burns bright and clear. Often judgment and salvation go hand in hand, as in such a passage as Is 35⁴ 'Your God will come with vengeance . . . he will come and save you.' The Messianic salvation is the theme of many of the Psalms (e.g. 53⁶ 'Oh that the salvation of Israel were come out of Zion! When God bringeth back the captivity of his people, then let Jacob rejoice and let Israel be glad.' Cf. 147 69²⁵, 106⁴⁷ 133¹⁶). Especially common is the use of the word in the eschatological sense in the later portions of Isaiah (e.g. 25⁹ 45¹³ 17 46¹³ 49⁶, 51⁸ 56¹ 61¹⁰ 62¹¹). From the prophets it passes over into the Apocalyptic books (e.g. Ps-Sol 10⁹ and often), and reappears in the NT with deepened ethical and spiritual meaning.

Looking more closely at the content of this future salvation, we find that it has many features in common with the salvation already experienced in the past. It is still a time of victory over enemies, of worldly prosperity and joy. But there is a new element which enters into the conception through the experiences of the Exile. Whatever else the future salvation may bring with it, it involves restoration from captivity. Thus Jeremiah, looking forward to the day when God 'will raise up unto David a righteous branch, who 'shall reign as King and deal wisely and shall execute judgment and justice in the land,' goes on to say that 'in his days Judah shall be saved and Israel shall dwell safely. . . . They shall no more say, As J' liveth, which brought up the children of Israel out of Egypt; but as J' liveth, which brought up and which led the seed of the house of Israel out of the north country, and from all the countries whither I have driven them; and they shall dwell in their own land' (Jer 23⁵⁻⁸; cf. 307⁹⁻¹⁸ 'Behold, I will turn again the captivity of Jacob's tents,' 31¹¹, and esp. 46²⁷ 'Fear not thou, O Jacob my servant, neither be dismayed, O Israel. For, lo, I will save thee from afar, and thy seed from the land of their captivity; and Jacob shall return, and shall be quiet and at ease, and none shall make him afraid'). So Ezekiel looks for a day when God shall save His distressed flock, and gather them under one shepherd, even His servant David (34²²⁻²⁴). And Zechariah confidently expects the time when God shall save His people 'from the East country and from the West country,' and shall 'bring them, and they shall dwell in the midst of Jerusalem' (87⁸, cf. Is 62²⁰). The return from captivity is the theme of the Psalmist's prayer (106⁴⁷, cf. 53⁶); and in the little hymn which forms the appendix of Is 11 the returned exiles are represented as praising God for His deliverance, and drawing water with joy out of the wells of salvation (12³).

But the Jerusalem to which the exiles return is not to be in all respects the same as the old. We have emphasized the external features in the Messianic ideal. But we shall greatly misconceive the nature of Israel's hope if we regard it as purely external. The revelation of God's holiness had been too clearly apprehended by the prophets to make them content with any ideal which was not ethical. As the condition of enjoying the future salvation is repentance on Israel's part (Is 1¹⁹⁻²⁰), so it includes as one of its chief elements the righteousness of the nation (Jer 31³⁴⁻³⁴). The Messianic age is to be a time of justice and judgment and of the pure worship of God. When the Messiah comes, he will be not merely a faithful shepherd (Ezk 34²³) but a just judge (Is 11³⁻⁴), binding up the broken-hearted, setting at liberty the captives, righting the wronged (Is 61¹), but at the same time punishing the guilty (Is 11⁴ 61²); in short, realizing the ethical ideal, the failure to attain which had been the cause of all Israel's misfortunes. In the great eschatological passages in prophet and psalmist alike, salvation and righteousness go hand in hand (Is 45⁸ 17 46¹³ 51⁸ 61¹⁰, cf. Ps 24⁵ 71¹⁸ 132⁹, 16).

Such being in general the nature of the Messianic salvation, how widely shall we conceive its extent? In many passages indeed the prophetic vision seems bounded by Israel. The old oppressors are to be destroyed in the great judgment of the Day of J' (Is 13. 34. 63¹⁻⁶, Ezk 38. 30, esp. 39¹, Zeph 2¹⁵), or, if they survive at all, it is as captives, holding the same menial position which they had once imposed upon Israel (Jl 3⁶, cf. Is 61⁶). Elsewhere, however, the prophetic horizon broadens, and we have the prediction of a day when the knowledge

and service of J' shall be shared by those who hitherto have known Him not. Jerusalem is to be the scene not only of a universal dominion, but of a universal worship (Mic 4¹⁻⁴, cf. Is 22⁴, Is 60. 66¹⁸⁻²¹, Ps 68¹⁻²³, Zec 8²²⁻²² 1416¹⁷). Nay, the time is coming when the Divine worship shall not be confined to Jerusalem. The author of Is 19 associates Egypt and Assyria with Israel as worshippers of the one true God. 'In that day shall there be an altar to J' in the midst of the land of Egypt, and a pillar at the border thereof to J'. And it shall be for a sign and for a witness unto J' of hosts in the land of Egypt; for they shall cry unto J' because of the oppressors, and he shall send them a saviour and a defender, and he shall deliver them. And J' shall be known to Egypt, and the Egyptians shall know J' in that day' (vv. 19-21, cf. Zeph 3⁹ 10, Ps 87). This conception of a salvation wider than Israel culminates in the great passage Is 49⁶. Here we have the sublime conception of Israel not merely as the recipient but as the minister of the Divine salvation. 'And now saith J' that formed me from the womb to be his servant to bring Jacob again to him and that Israel be gathered unto him . . . yea, he saith, It is too light a thing that thou shouldst be my servant to raise up the tribes of Jacob and to restore the preserved of Israel; I will also give thee for a light to the Gentiles that thou mayest be my salvation unto the end of the earth' (cf. Is 45²¹⁻²⁴ 55¹⁻⁵).

Two features of the prophetic teaching still need special mention, as bearing on the development of the doctrine of salvation. The first is the growing transcendence of the conception; the second, the increasing stress laid upon the individual.

In the earlier prophets the Messianic ideal is essentially earthly. Jeremiah, for example, looks for the re-establishment of the Davidic monarchy, and the restoration of conditions more glorious indeed, but essentially the same as those which preceded the Exile (Jer 23³ 30⁹ 33¹⁷⁻²²). But with the lapse of time we note the tendency to magnify the contrast between the Messianic age and that which it succeeds. The hope of Isaiah (ch. 11) of a renewed nature is taken up by his successors and developed with a great wealth of detail. In the Messianic age the wilderness and the solitary place shall be glad, and the desert shall rejoice and blossom as the rose (Is 35¹). 'The wolf and the lamb shall feed together, and the lion shall eat straw like the ox' (65¹). The voice of weeping shall no more be heard in Jerusalem (65¹⁹). There shall be no more darkness or gloom, for the uncertain luminaries of earth shall be superseded by a Divine light (60¹⁹, 20); the years of life shall be greatly extended (25⁸); and those Israelites who have passed away in the gloom and despair of the Exile shall rise from their graves to share with their brethren in the Messianic glory (26¹⁹, Dn 12³).

It is not always easy to tell how far the passages which speak of a renewed nature are to be taken literally, and how far they are merely symbolical of the great fertility and prosperity of the Messianic age. But, whatever may be true of individual cases, there can be no doubt that the passages cited prepared the way for that transcendent view of the future which is characteristic of many of the Apocalyptic books. The prophetic hope seemed too great to be realized under existing conditions, and hence could be ushered in only by a complete transformation of the present order of things. The clearest anticipation of this new point of view is given by the unknown author of the last chapters of Isaiah in his doctrine of new heavens and a new earth (65¹⁷, cf. 66²²). Where such a viewpoint obtains, the Day of J' no longer has its significance, as in the older prophets, as ushering in a new stage of this world's history. It marks the division between two worlds or ages, separating the present period of probation and distress from the final age of fruition and judgment which is to be the scene of Israel's 'everlasting salvation' (Is 45¹⁷, Cf. Dn 7¹⁴; Targum on Gn 49¹⁸ (quoted by Cremer, s.v. *עוֹלָם*): 'My soul waiteth not for the salvation of Gideon the son of Joas, for that is temporal, nor for the salvation of Samson, for it is passing, but for the salvation of the Messiah, the son of David, which through thy word thou hast promised to bring to thy people, the sons of Israel, for this redemption my soul waiteth; for thy redemption, O Jehovah, is an everlasting redemption').

The second feature which demands notice is the increasing stress laid upon the individual. In the earlier history of Israel the conception of salvation had been primarily national, but with the destruction of the nation the attention of the prophets was directed more and more from the people as a

whole to the units which composed it. Jeremiah, and still more Ezekiel, are the prophets of this growing individualism, which appears clearly in such passages as Jer 31²⁻³⁰, Ezk 18. No small part of Messiah's work consists in righting the wrongs of the oppressed, and re-establishing the widow and the fatherless in the rights of which they have been defrauded (Ps 72⁴⁻¹³, Is 11³, 46¹⁻³). Under Him, as under a faithful shepherd, all those who have been faithful to J^c during the period of Israel's misfortunes shall be gathered together to form a new commonwealth in which righteousness shall be the controlling feature (Ezk 34, cf. Is 60²¹). This conception of God as the Saviour of the individual finds expression in the Wisdom literature (e.g. Job 5¹⁸⁻²², 26¹, Pr 20²²), and in many of the Psalms. J^c is the deliverer of the weak and the needy (109²¹, cf. 18²⁷, 72⁴⁻¹³), the Saviour of the meek (76⁹, 149¹, cf. Job 22²⁹), and of all that put their trust in Him (86², cf. 88¹). The poor man cried, and J^c heard him, and saved him out of all his troubles (34⁵). He saves the upright (37³⁹⁻⁴⁰), and such as be of a contrite spirit (34¹⁸). He hears the cry of them that fear Him, and fulfils their desire (145¹⁹). Whatever may be the true interpretation of many of the later Psalms, there can be no doubt that their tone was much influenced by this growing individualism. There is a sense of intimacy in relation to God, a confidence, a joy in trust in Him which can only be thus explained. Out of their own experiences in personal communion with God the writers have gained an insight into His tenderness and love which they transfer in thought to the nation. It is no accident that later ages have given an individualistic interpretation to psalms whose reference is clearly national. And if we do right, with many recent interpreters, to understand the suffering servant of Deutero-Isaiah, of Israel the nation, it was surely through some personal experience of affliction gladly borne for another's good that the prophet was raised to his sublime interpretation of the meaning of his people's deeper sufferings.

The crown of this individualism is reached in the doctrine of the resurrection, which unites in an unexpected way the conceptions of individual and of national salvation. In most of the OT, salvation is a conception which has meaning only for this life. There is indeed an existence after death, but it is gloomy and uneventful, without experience of God's mercy and grace. 'In death there is no remembrance of thee (God): in Sheol who shall give thee thanks?' (Ps 6⁵). This earth is the scene of God's salvation, whether present or future; and even the glories of the Messianic age unroll themselves upon this platform, and will be enjoyed by those only who may be alive when the promised deliverance comes.

But with the growing sense of God's greatness and power came the conception that even the realm of the dead was under His control, and that the righteous who had died in distress might still hope after death to see the salvation of God. This hope, which appears in sporadic utterances in the Psalms (e.g. 49¹⁵, 73²⁴⁻²⁵), and finds classic expression in Job 19²⁵⁻²⁷ ('I know that my vindicator liveth,' etc.), culminates in the doctrine of individual resurrection, which meets us for the first time in Is 26¹⁹, and is repeated in Dn 12¹⁻³.

But this growing individualism had a still more important consequence than in extending the range of the Divine salvation. It materially modified the idea of its nature. The conception of salvation with which we have thus far been dealing is, for all its ethical features, more or less external. It is deliverance from the consequences of sin rather than from sin itself. The prophets call upon men to repent and forsake their sins, that

they may become worthy to receive the promised salvation. But with the deepening moral sense there comes the insight that even for repentance itself Divine help is needed, and the cry arises to God for a deliverance which shall include not merely the consequences of sin, but the very sin which has caused them. This new insight finds expression in such a prayer as that of the 51st Psalm: 'Create in me a clean heart, O God; and renew a firm spirit within me. Cast me not away from thy presence; and take not thy Holy Spirit from me. Restore unto me the joy of thy salvation; and uphold me with a willing spirit' (vv. 10-12). Here the salvation for which the Psalmist prays includes deliverance from sin as one of its elements (cf. Ps 130⁷⁻⁸, 'O Israel, hope in J^c: for with J^c there is loving-kindness, and with him is plenteous redemption. And he shall redeem Israel from all his iniquities'; cf. Ps 39⁹, 79⁹). It is the prophets of individualism, Jeremiah and Ezekiel, who give clearest expression to this idea of salvation as deliverance from sin. 'Behold, the days come, saith J^c, that I will make a new covenant with the house of Israel. . . . But this is the covenant which I will make. . . . I will put my law in their inward parts, and in their heart will I write it; and I will be their God, and they shall be my people. And they shall teach no more every man his neighbour, and every man his brother, saying, Know J^c: for all men shall know me, from the least of them unto the greatest of them, saith J^c; for I will forgive their iniquity, and their sin will I remember no more' (Jer 31³¹⁻³⁴, cf. 33³). 'And I will sprinkle clean water upon you, and ye shall be clean: from all your filthiness, and from all your idols, will I cleanse you. A new heart also will I give you, and a new spirit will I put within you: and I will take away the stony heart out of your flesh, and I will give you an heart of flesh. And I will put my spirit within you, and cause you to walk in my statutes, and ye shall keep my judgments, and do them. . . . and I will save you from all your uncleanness' (Ezk 36²⁵⁻²⁹, cf. 37²³). Here we have a conception of salvation which goes deeper than any external deliverance. The great prophet of the Exile carries on the same line of thought. To him the chief blessing of the Messianic age is the forgiveness of sins. It is not Israel whose righteousness deserves the salvation of J^c, but J^c who goes out after His erring children, to forgive and redeem them for His name's sake (Is 43²¹⁻²⁵; cf. 44²², 33²²⁻²⁴, 64⁶⁻⁹, 65¹⁻³, Zec 3⁹, 13¹). In such passages we have a direct preparation for the profound conception of the NT.

2. *Between the Testaments.*—In the Apocalyptic and Pseudepigraphical literature of the Jews we find a further development of the tendencies already noted in the OT. Extending over a period of some three centuries, its earlier portion contemporaneous with the later parts of the OT, its later (e.g. Apoc. Baruch, 2 Esdras) with the NT, it bridges the gap between the two in thought as well as in time. This is especially true in connexion with our doctrine. In not a few places indeed 'salvation' is still used in the sense of present deliverance (e.g. Jth 8¹, Ep. of Jer 36). In general, however, the use of the word is eschatological. The expected salvation is that of the Messianic age, which, with the lapse of time, is conceived of in more and more transcendent manner. Where the earlier conception of an earthly kingdom still survives, it is usually in the form of a millennium or preliminary period of blessedness, preceding the final triumph which takes place in the other world. Side by side with this growing transcendence we note a further development of individualism. Not only has the

doctrine of the resurrection become a familiar article of faith, but the doctrine of rewards and punishments is extended to the period immediately after death. In some cases the hope of individual reward is associated with large expectations of the triumph of Israel, or extends even beyond this to take in the conversion of the Gentiles. In other cases (as in 2 Esdras) the writer despairs even of the conversion of Israel, and is fain to console himself with the thought that the righteous at least, even if few in number, shall at the last receive a glorious reward. Amid such a wealth and variety of material, we must confine our quotations to a few typical passages, referring the reader for fuller information on points of detail to the books which deal specially with the subject (see Literature at end of article).

In the Apocalyptic picture of the Messianic kingdom, the old and the new, the material and the spiritual, are blended in startling and unexpected combinations. Sometimes we seem to be breathing the atmosphere of the old prophets; at others we are repelled by the artificiality and unreality of the conception. Thus in the earliest portion of the Book of Enoch (1-36, dated by Charles B.C. 170) the picture of the future is crassly material. At the resurrection, the righteous eat of the tree of life (25⁴⁻⁶), and as a result enjoy patriarchal lives (5⁹ 25⁹). The scene of the Messianic kingdom is a purified earth (10⁷ 16³), with Jerusalem for its centre (25³). The blessings of the kingdom, in which the 'converted Gentiles share' (10²¹), are of a sensuous nature. The powers of nature are increased indefinitely. Thus the righteous will beget 1000 children (10¹⁷); of all the seed that is sown each measure will bear 10,000 grains, and each measure of olives will yield ten presses of oil (10¹⁹, cf. Apoc. Bar 29⁶, and note of Charles, p. 54). The author of the Psalms of Solomon (B.C. 70-40), on the other hand, emphasizes the ethical features of the kingdom. He looks for a Messianic king of the lineage of David who shall break in pieces them that rule unjustly (17²⁴). He will be a righteous king, and taught of God (17²⁰), pure from sin, so that he may rule a mighty people (17⁴¹). 'He shall purge Jerusalem, and make it holy even as it was in the days of old' (17³³). 'He shall not suffer iniquity to lodge in their midst; and none that knoweth wickedness shall dwell with them' (17²⁹). In both of these books the earth is the scene of the Messianic Kingdom and Jerusalem its centre. Elsewhere, however (e.g. Enoch 82-90, 91-104, 37-70, Assumption of Moses, Apoc. Baruch), we have a more transcendent view of the future. Thus the author of Enoch 82-90 sees a new Jerusalem taking the place of the old (90^{28, 29}) and becoming the centre of a new community in which all the members shall be transformed into the image of the righteous Messiah (90³⁸). The author of Enoch 91-104 takes up the prophetic thought of a new heaven and a new earth, but develops it on the former side only (91¹⁶). It is not earth but heaven which is to be the abode of the redeemed (104²). 'Be hopeful,' he cries to his despondent readers, 'for aforesome ye were put to shame through ills and affliction; but soon ye will shine as the stars of heaven, ye will shine and ye will be seen, and the portals of heaven will be opened to you. . . . Be hopeful and cast not away your hope; for ye will have great joy as the angels of heaven. . . . And now fear not, ye righteous, when ye see the sinners growing strong and prospering in their ways, and be not like unto them, and have no companionship with them, but keep afar from their violence; for ye will become companions of the hosts of heaven' (104^{2, 4, 6}). Here we have the sharpest possible contrast between this world and

that which is to come. The salvation of which the writer speaks has become purely other-worldly. A similar view-point meets us in the Assumption of Moses (cf. esp. 10^{8, 9}) and in the Slavonic Enoch (Paradise as the abode of the righteous; cf. 8, 9, 42^{3, 5} 61³ 65¹⁰), as well as in portions of the Apocalypse of Baruch (21¹⁹ 44⁹⁻¹⁵ 51⁵ 85).

The most striking example of this transcendent conception of salvation is found in the Similitudes of the Book of Enoch (37-70; Charles, B.C. 94-84). In this remarkable writing, which in many respects anticipates most clearly the NT conception of the glorified Christ, the Messiah is conceived of as a strictly supernatural being. Clothed with wisdom and righteousness, he sits on the throne of his glory (45³) to judge all living beings, whether men or angels (49⁴ 51² 55⁴ 62³). By the word of his mouth he slays the wicked (62²). Heaven and earth are transformed (45^{4, 5}) and made fit for the dwelling of the redeemed community, whose members, clothed with life (62¹⁶), resplendent with light (39⁷), with faces shining with joy (51⁵), become angels in heaven (51⁴), and dwell in closest communion with their redeemer (62¹⁴), in the glory of his eternal kingdom (49²).

This passage is specially interesting because it puts the Messianic Kingdom in the world to come. The author knows only one salvation, even the eternal salvation of the new world. In other books, however, we have a different conception. The Messiah's Kingdom, which is of temporary duration, belongs to this world, not to the next. Thus the author of Enoch 91-104 looks for a millennial kingdom of three world-weeks preceding the transformation of nature which ushers in the new world (93²⁻¹⁰). The same idea reappears in the Slavonic Enoch, Baruch, and 2 Esdras. For details see MILLENNIUM, where references and quotations are given. Doubtless this idea was the result of a compromise between the earlier and simpler view of salvation which placed it upon this earth, and that later and more transcendent conception whose growth we have been tracing. Whatever its origin, it was an idea which had wide currency, meeting us not only in Jewish but in early Christian literature as well, and being represented, within the NT itself, by the Millennium of the Apocalypse.

Side by side with this growing transcendence we note a further development of the individualistic tendency. This appears most clearly in connexion with the life after death. The doctrine of the resurrection, which in Isaiah and Daniel is applied to some men only, is further extended. While the older sceptical tendency still survives in Sadduceism, the belief in a universal resurrection wins more and more adherents. With this change the character of the conception alters. Instead of exhausting its significance in connexion with the Messianic Kingdom as the means of entrance for the righteous upon joys which they could not otherwise enjoy, it becomes the channel of universal retribution. As the righteous rise to be blessed, so the wicked are raised that they may receive the recompense of their sins (beginnings in Dn 12²; cf. also Enoch 22¹¹ 51^{1, 2}, Apoc. Bar 30²⁻⁵ 50, 51, 2 Es 7³²⁻³⁷; yet note that in many places resurrection is still only of the righteous, e.g. Enoch 90³³ 91¹⁰ 92³ 100⁵, Ps-Sol 3¹⁶ 14²², 15¹³⁶; cf. on this whole subject Wendt, *Lehre Jesu*, ii. 45-49).

But the moralization of the life after death does not stop here. It extends also to the intermediate state. Little by little, Sheol loses its aspect of colourless monotony. It becomes the scene of preliminary rewards and punishments. It has its compartments where the wicked are kept separate from the righteous—the former in great pain, waiting the eternal judgment; the latter in a bright spot, where there is a spring of water (Enoch 22^{9, 11}; yet note that punishment is only for those who have died and been buried 'without incurring judgment in their lifetime,' 10). In the Similitudes the elect are represented as dwelling in the garden of life (61¹², cf. 70⁴ 60⁸ 'the garden where the elect and righteous dwell, where my grandfather was taken up, the seventh from Adam'; 60²² 'the garden of the righteous'; 77³ 'the garden of righteousness'). This place of preliminary blessedness, at first tenanted only by Enoch and Elijah, afterwards by all the right-

eous (cf. 60⁸), develops into the Paradise of NT times; see PARADISE. Thus side by side with the preliminary blessedness of the millennial kingdom we have the righteous enjoying foretastes of salvation in the life immediately after death.

The effect of this new view of the life after death was inevitably to diminish the relative importance of the final salvation. In those writings which, under Greek influence, developed the idea of immortality (i.e. Philo, Wisdom, 4 Maccabees), the doctrine of an intermediate state falls away altogether, and souls are represented as entering upon their final award at death (cf. Wis 3:1-4 47-11, cf. v. 14, 4 Mac 13:16 53¹⁸²³). Even where this is not the case, as in Slavonic Enoch, we find the tendency more and more to spiritualize the earlier conceptions. Resurrection is no longer a return to earthly conditions, but, as in 1 Corinthians, the putting on of a new organism fitted to the life of the heavenly kingdom (Enoch 22⁸⁻¹⁰). Paradise is no longer the abode of the righteous in the intermediate state, from which they are raised to enter a higher state of blessedness, but the place of their eternal habitation (Apoc. Bar 51¹¹, 2 Es 8²²). Sheol is more and more identified with Gehenna as the place of final punishment of the wicked (Enoch 56⁸ 63¹⁰ 99¹¹ 103⁷, 2 Es 8³³), and loses its character as an intermediate abode of righteous and wicked alike. Thus more and more we note the tendency, which can be paralleled in Christian history, to break down the middle wall between the intermediate and final states, and to make death the real dividing line in human destiny.

A further evidence of the growing individualism is to be found in the definite abandonment, in certain quarters, of the hope of national restoration which had formed so prominent a feature of the prophetic anticipation. This appears most clearly in such late books as Apoc. Baruch and 2 Esdras.* In the earlier literature the national ideal still survives, and in many passages (e.g. Ps-Sol 17) finds beautiful expression. Even the hope of Gentile participation in the promised salvation is not without its representation (e.g. Enoch 102¹ 90³⁰, Ps-Sol 17:31-35). It could not be otherwise with a people whose daily study had been the prophetic literature. But as time goes on and the kingdom does not come, we find men more and more losing sight of the larger aspects of the Divine salvation, and concentrating their thoughts upon the fate of individuals. The present world is abandoned to hopeless corruption (cf. Apoc. Bar 15⁸ 21¹³), and the world to come belongs to the righteous, and to them alone (cf. Apoc. Bar 15⁸ 24¹⁻², and esp. 2 Es 74⁷⁻¹¹). When the seer laments the sorrows of the wicked, and the small number of those who shall finally be saved, he is bidden to look away from them, and to consider the righteous, for whom alone God cares. 'For I will rejoice over the few that shall be saved, inasmuch as these are they that have made my glory now to prevail, and of whom my name is named. And I will not grieve over the multitude of them that perish; for these are they which are now like unto vapour and are become as flame and smoke; they are set on fire and burn hotly and are quenched' (2 Es 7⁶⁰⁻⁶¹ Charles' tr. in *Eschatology*, p. 292). Here we have the individualistic theodicy in its most extreme form.

No doubt this growing individualism had its good side. Within the OT itself we have already seen how it deepened the moral insight, and heightened the sense of personal responsibility. We find in the period in question the same stress

* It seems probable that both of these books in their present form are of composite authorship, the earlier portions, written before the destruction of Jerusalem, retaining the national Messianic hope, the later having definitely abandoned it. For the evidence in detail see Charles' edition of *Baruch*, and his *Eschatology*, p. 283 ff.

on individual righteousness. But, on the other hand, we note also the tendency to conceive the whole matter of salvation in a more or less external and legal way. Salvation is the reward which God has promised to those who faithfully keep His law. The more difficult the achievement the greater God's delight in the result. This is specially apparent in the later books (cf. Apoc. Bar 51⁷). But those who have been saved by their works and to whom the law has been now a hope, and understanding an expectation, and wisdom a confidence, to them wonders will appear in their time'; 14⁷, with Charles' note; 2 Es 97⁸. 'And every one that shall be saved, and that shall be able to escape by his works and by faith whereby ye have believed, shall be preserved from the said perils, and shall see my salvation in my land and within my borders: for I have sanctified them for me from the beginning'; cf. 77⁸⁻³³). Here we find ourselves in that very atmosphere of work-righteousness which culminates in the Talmud, and against which the Gospel came as a protest.

Summing up the conceptions of salvation which we have met thus far, we find that they are four: (1) salvation in this life, in the sense of deliverance from present danger or trouble, especially from defeat in battle; (2) the salvation of the Messianic Kingdom, to be enjoyed by all the righteous who may be alive at the time, as well as by the risen saints; (3) salvation after death, in the sense of a preliminary foretaste, by the righteous, of the enjoyment of the age to come; (4) the final salvation of the heavenly world, when the present earth has been destroyed, and the period of corruption has come to an end. These different conceptions live on side by side, modifying one another in various ways, shading off into one another by almost imperceptible degrees, the old not displaced by the new, but transformed by it, and that in such subtle and gradual ways that it is often impossible to trace the separate steps of the process. Into such a world of thought, confused, changeable, yet rich with germs of fruitful and inspiring life, Jesus came with His Gospel of salvation.

3. *In the teaching of Jesus.*—The word 'salvation' (*σωτηρια*) is only twice used by Jesus—once in the conversation with Zacchæus (Lk 19⁹ 'To-day is salvation come to this house'), and again in the interview with the woman of Samaria (Jn 4⁴² 'Salvation is from the Jews'). But the verb *σωζειν* occurs frequently in His teaching. Often it is used to denote physical healing (e.g. Mt 9²², Mk 3⁴ 5²⁴ 10³², Lk 6⁹ 8⁴⁸⁻⁵⁰ 17¹⁹ 18⁴²). Elsewhere it has a broader meaning. Not to mention the well-known passages in John (5³⁴ 10⁹ 12⁴⁷), He spoke of Himself as come 'to seek and to save that which was lost' (Lk 19¹⁰, cf. Mt 18¹¹, Lk 9³⁶, both omitted by RV). Of the sinful woman who washed His feet in Simon's house He declared that her faith had saved her (Lk 7⁵⁰), and in more than one passage concerning the future of His Kingdom He uses the word *σωσω* in the same eschatological sense with which we are already familiar (Mt 10²² 24¹³⁻²³, cf. Mk 13¹³⁻²⁰). Salvation is indeed only the reverse side of that Gospel of the Kingdom which was the burden of His preaching. The two ideas may be used interchangeably, as appears from such passages as Mt 19²⁴⁻²⁵, Mk 10²⁵⁻²⁶, Lk 8¹⁰⁻¹² 13²³⁻²⁸. If, then, we would understand Jesus' view of salvation, we must take our departure from His idea of the Kingdom.

But here we find ourselves involved in difficulties growing out of the criticism of the sources. These centre mainly about two points—(1) the relation of Jesus' teaching to that of His contemporaries; (2) the relation of His teaching to that of His successors.

(1) We have already noted the purely transcendent and eschatological form which the idea of the Kingdom had assumed

in contemporary Judaism. The question arises how far Jesus felt Himself in sympathy with this view. There are passages in the Synoptics, especially in the so-called Apocalypse of Jesus (Mk 13 and parall.), which have marked points of resemblance to the contemporary Apocalypses. The Kingdom is spoken of as purely future—a miraculous state to be ushered in by the Parousia of Jesus, and involving a sudden and complete transformation of the present order of things (cf. Mk 8³⁸ 91, Mt 19²⁸, Lk 20³⁵ 36). What shall we think of these passages? Do they represent the genuine teaching of Jesus? and if so, are we to think of Him, with many recent scholars, as holding a point of view essentially the same as that of His contemporaries? or, following Weissenbach, Wendt, and others, are we to regard these apocalyptic elements as later additions, derived from Jewish or Jewish-Christian sources, and therefore to be disregarded? or, finally, is it possible, without recourse to the theory of interpolation, so to interpret Jesus' eschatological teaching as to show its harmony with the deeper and more spiritual views elsewhere expressed? This is one class of questions now being actively discussed, a full answer to which seems necessary before it is possible adequately to set forth Jesus' doctrine of salvation.

(2) The other class of questions leads us into the criticism of the Fourth Gospel. Here it is the absence of the idea of the Kingdom which is most striking. In place of the Kingdom, the great gift which Jesus brings is eternal life, which is represented, not, as in the Synoptics, as a blessing to be enjoyed in the future (Mk 10³⁰), but as a present possession (5²⁴ 6⁴⁰ 47. 53). When we hear the Christ of the Fourth Gospel saying, 'He that believeth hath eternal life' (6⁴⁷), we seem to be in a different world from that of the eschatological discourses of the Synoptics. It is the world of a St. Paul, who says, 'If any man is in Christ, he is a new creature' (2 Co 5¹⁷); of a St. John, who writes, 'Whosoever shall confess that Jesus is the Son of God, God abideth in him and he in God' (1 Jn 4¹⁵). Are we to believe that the same Christ spoke Mt 23 and Jn 14-16; and if so, how is their teaching to be reconciled?

Fortunately, we are not shut up for our view of Jesus' doctrine of salvation to the settlement of either of these disputed questions. There are enough perfectly plain and undisputed passages—apart from these—to give us a clear view of His central teaching. Possibly we may find, if we take our stand upon this more certain ground, that before we have finished we shall have gained light which will help us in the solution of the more difficult problems.

If we would understand our Lord's doctrine of salvation in its epoch-making significance, we must consider its relation to the views of His contemporaries. While it is true that Jesus fed His spirit upon the writings of the OT prophets, and drew thence many truths which His contemporaries had forgotten, it is no less true that He was also a man of His own time, and that His teaching was influenced, not merely negatively but positively, by the development whose main lines we have traced. We may illustrate this by a reference to the two points most prominent in the contemporary view of the kingdom—(a) its transcendence, and (b) its individualism.

(a) We are often tempted, because of the familiar human features in Jesus' teaching, to overlook its transcendent elements. Yet there can be no doubt that our Lord's conception of the Kingdom is distinctly supermundane. Whatever may be the origin of the phrase, 'Kingdom of heaven,' found only in the first evangelist, it cannot be denied that the idea was characteristic of Jesus. The Kingdom of which He is the Messiah belongs to a different and higher order from that which at present obtains. Its blessings are not earthly but heavenly. The evidence for this may be found in all parts of His teaching (cf. His promise, to the persecuted disciples, of reward in heaven, Mt 5¹², cf. Lk 10³⁰ 'rejoice that your names are written in heaven'; the command to lay up treasures in heaven, Mt 6²⁰, cf. Mt 19²¹, Mk 10²¹, Lk 12³¹ 16¹¹; the parable of the Unjust Steward, Lk 16¹⁻¹³; the indifference which He showed Himself, and which He recommended to His disciples, with reference to this world's goods, Mt 6¹⁹; the answer to the Sadducees about the resurrection, Lk 20³⁴⁻³⁶; the answer to Pilate, Jn 18³⁶ 'My Kingdom is not of this world'; as well as such distinctly eschatological passages as Mt 24³⁰ 26⁶⁴). In view of such utterances, sharply contrasting the Kingdom, as belonging to the heavenly world, with all that is earthly, there can be no doubt that Jesus' conception stood in many respects closer to the tran-

scendent views of His contemporaries than to the more earthly ideals of the earlier prophets.

And yet it is at this very point that the originality of Jesus' teaching is most clearly apparent. To the Jews of His day the transcendence of the Kingdom meant its removal from all contact with present life. Just because their ideal was essentially worldly, involving the hope of earthly triumph and prosperity, did they despair of its realization under existing conditions, and refer it wholly to the future. To Jesus, on the other hand, the Kingdom was in a true sense present already (Mt 12²⁸, Lk 11¹⁹, cf. Lk 10¹⁸, and comments of Holtzmann, *Neutest. Theol.* i. pp. 217, 218; Lk 17²⁰ 21 'The Kingdom of God is within you,' or, 'in your midst'; also the references to those who are already in the Kingdom, Mt 11¹¹, cf. Lk 7²⁸, Mk 10¹⁸, cf. Lk 18¹⁶ 17, Mt 23¹³, and esp. the parables of the Kingdom which represent it as a growth from small beginnings—so the sower, tares, mustard seed, leaven (Mt 13 and parall.), and esp. the seed growing secretly, Mk 4²⁶⁻²⁹). Its transcendence is the transcendence of a higher spiritual order (Holtzmann, *l.c.* p. 190), which, so far from being inconsistent with earthly conditions, is destined to be realized in and through them. Thus Jesus instructs His disciples to pray for the doing of God's will on earth as it is in heaven (Mt 6¹⁰), and declares that wherever men show the qualities and practise the traits which are characteristic of the heavenly world, there the Kingdom is present in germ (compare Mk 10¹⁴ with Mt 18⁴).

The explanation of this change is to be found in Jesus' view of God. At no point had contemporary Judaism departed further from the doctrine of the OT. The idea of J' as a living God, actively interested in human affairs, had given place to a conception purely transcendent. God was thought of as a being remote, inaccessible, mysterious, living in a distant and heavenly world, to be approached only through the mediation of the ceremonial law. In place of this purely transcendent being, Jesus proclaimed a loving Father, profoundly concerned in all that affects His children, watching their affairs with a tender interest, infinitely wise and great indeed, yet infinitely condescending, more ready to give good gifts than earthly fathers to their children (Mt 7¹¹), having a care for His universe so minute and detailed that not a sparrow falls to the ground without His notice (Mt 10²⁹). To Jesus, as to His contemporaries, God was supremely holy; but, unlike them, He did not hesitate to proclaim this holy God as the model for men's imitation (Mt 5⁴⁸). To Him this world was God's world, and hence, in spite of all its sin and misery, adapted to be the scene of the realization of His heavenly kingdom. It is in view of such conceptions of the relation of God and man that we must understand Jesus' teaching concerning salvation.

To be saved, according to our Lord, means simply to enter upon a life fitted to the children of such a Father—a life whose marks are righteousness, brotherly love, and, above all, trustful dependence upon God; a life only fully to be realized in the future, when the redeemed shall be released from earthly limitations, and enter the new conditions of the resurrection life (Lk 20³⁴⁻³⁶), yet in a true sense possible even now for all those who, like Him, have learned to know God as their Father, and, through the life of self-denying service, have entered upon a blessedness which no earthly trial or misfortune can disturb.

So we find Jesus speaking of salvation as a present experience. To the sinful woman in the house of Simon He declares that her faith hath saved her, and bids her go in peace (Lk 7⁵⁰). To Zacchaeus He says that this day is salvation come

to his house (Lk 19⁹). Even in the midst of this present life, with its sorrows and persecutions, the children of the Kingdom are constantly receiving good gifts from their heavenly Father (Mt 7¹¹). However much they may have given up they receive an hundredfold more (Mk 10³⁰). Through prayer they enter into daily communion with God, and receive the strength and help they need. They have the assurance that no evil can befall them when they put their trust in Him (Mt 6³¹⁻³⁴). For the earthly fellowship which they have sacrificed they receive a spiritual fellowship which is far more satisfying (Mk 10³⁰⁻³³). From the bondage of the ceremonial law, with its intolerable yoke, they have entered upon the service of a Master whose burden is light (Mt 11³⁰). In the healing of the sick, and especially in the casting out of demons, which is a mark of their Master's ministry, they see the breaking down of Satan's kingdom, and the beginnings, even on earth, of the era of blessedness which is characteristic of the Kingdom of God (Lk 11²⁰⁻²¹).

It is in view of such a conception that we must understand Jesus' teaching in the eschatological discourses. Whatever may be our solution of the critical difficulties involved (for a full discussion see PAROUSIA), we may without hesitation reject the view of those who see in Jesus' teaching simply the echo of the ideas of contemporary Judaism. Our Lord's view of the Kingdom is so far eschatological that the complete fulfilment of the ideal which He preaches belongs to the future. But the ideal itself, as essentially moral and spiritual, has a present as well as a future application. To Jesus the hope of the Parousia meant the introduction of no new kind of salvation, but only the complete victory of the principles which He had illustrated in His own life, and whose embodiment, imperfect and yet real, in the little band of men whom He had gathered about Him, constituted the beginning of His Kingdom. It is indeed in its combination of present and future elements that the originality of Jesus' doctrine of salvation consists. Wendt has well expressed this in his *Teaching of Jesus* when he says that 'the epoch-making advance made by Jesus in His idea of salvation beyond that of the Psalmists and Prophets, as well as of the Jews of His time, consisted in the fact that He not only conceived the supreme ideal of salvation as purely supermundane and supersensuous,—a heavenly, not an earthly ideal,—but also that because of this determination of the ideal He gained a new view of the present world and of the earthly life—a view according to which it is possible for the devout to have even here and now, not merely a certain hope of salvation in the future, but also genuine experiences of salvation in the present' (ii. p. 137, Eng. tr., which, however, gives an inadequate rendering of the original, i. p. 241; cf. the whole passage).

In view of such considerations, the Johannine conception of eternal life as a present possession seems no longer foreign to Jesus' teaching. Whatever may be the ultimate decision of criticism as to the origin of the discourses in which the phrase occurs, there can be no doubt that the idea is one which accords well with what we learn from other sources of our Lord's doctrine of salvation. Wendt argues strongly for its genuineness on the ground that it is needed to account for the presence of similar ideas in the apostolic age (*Lehre Jesu*, ii. p. 198). But, even apart from this, some such conception seems required from what we know of Jesus Himself. Holtzmann is certainly not a critic who can be charged with any leaning to conservative views. Yet, speaking of the Synoptic teaching concerning eternal life 'as gift and good of the future age,' he writes (*Neutest. Theol.* i. 222): 'Yet it (i.e. eternal life) is not thought of as a merely formal definition which can be filled up with any content which the imagination may choose to give it. On the contrary, it is a possession of the present, already well known, which has been projected into the future.' The highest and most intense feeling of existence—a feeling of incomparable power and richness of content (*unvergleichlich kraft- und gehaltvolles Daseinsgefühl*) without the slightest trace of twilight or mortality, of dull, hollow finiteness,—this is Jesus' conception of life and blessedness. Such a thought could be entertained only by one who Himself possessed the thing. In this sense He must have already borne the Kingdom of God as an inner good within Himself, must have known it as already present on the ground of His own experience. And not only so; but wherever His Gospel is preached in the world, wherever the Spirit of God is manifest either in miraculous power or in the hearts of men, wherever, in the sense of the parables, seeds spring up and fruits ripen, there also—with the righteousness which makes out the content of the Kingdom—the Kingdom itself is already present.'

(b) But we shall not fully understand the originality of Jesus' doctrine of salvation until we have considered it at the other point where it is most natural to compare it with that of His contemporaries, i.e. its individualism. We have already

studied the growth of the individualistic tendency in the later Judaism, and seen its effects in subordinating the conception of national to that of individual righteousness, and in extending the doctrine of retribution from this life to that after death. Here, too, we find points of contact in Jesus' teaching. He also insists strongly upon the necessity of individual righteousness. Most of His time is spent in dealing with individual men, and the conditions which He lays down for entrance to His Kingdom are such that each man must fulfil them for himself. So in His view of the life after death Jesus accepts the results of the intermediate development. Sheol has altogether lost its character of colourless monotony. Death involves no interruption in the communion of the individual with God. Abraham, Isaac, and Jacob are even now enjoying a resurrection life with God (Lk 20³⁷⁻³⁸); Lazarus passes at once from this world into Abraham's bosom (Lk 16²²); and to the dying thief on the cross the promise is made that this day he shall be with his Master in Paradise (Lk 23⁴³).

And yet it is just in His dealing with individual men that the contrast of Jesus' view of salvation to that of His contemporaries is most apparent. To the Pharisees of His day salvation was the reward of righteousness. And the righteous man was he who perfectly conformed his life to the requirements of the ceremonial law. It is difficult for us to appreciate the nature of these demands not only upon a man's good-will, but upon his time and upon his means. As Holtzmann has well shown (*l.c.* i. 132 ff.), it was impossible for a man of moderate means to be righteous in the full legal sense, without sacrificing all hope of worldly prosperity. A rich man might indeed keep the law. A few less blessed with this world's goods—the so called 'poor' of the later Jewish literature—had the courage to make the needed sacrifice. For the most part men felt the burden too heavy, and were content to live as they could, without part in the hopes and ideals of their religious teachers, despised by them as sinners and outcasts, without share in the Divine favour or interest in the Divine salvation. (Cf. Jn 7⁴⁰ 'This multitude which knoweth not the law are accursed,' and especially 2 Es 7^{51. 52. 53-61}).

It was exactly to this company of outcasts, the poor and despised in Israel, that Jesus directed His preaching (Lk 4^{18. 19}, Mt 11⁵, Lk 7²²; cf. the beatitudes of the Sermon on the Mount, Mt 5³⁻¹¹ and parall. Lk 6²⁰⁻²³). He said of Himself that He was come to seek and to save the lost (Lk 19¹⁰). He called sinners to repentance (Mk 2¹⁷, Mt 9¹³, Lk 5²⁷). He declared that there is more joy in heaven over one sinner that repenteth than over ninety and nine just persons that need no repentance (Lk 15^{7. 10}). He ate and drank with publicans and sinners (Mk 2¹⁶), and declared to the self-righteous Pharisees that the publicans and harlots were entering into the Kingdom of heaven before them (Mt 21³¹). He swept away the burdensome requirements of the ceremonial law, and invited men to the service of a Master whose yoke was easy and whose burden was light (Mt 11^{28. 30}). He made the conditions of entrance to His kingdom humility, trustfulness, the childlike spirit (Mt 5^{3. 4}). In place of a God who cared only for a spiritual aristocracy, whose pleasure it was to make hard conditions that He might increase the value of the few who were saved (2 Es 7^{54. 62}), He proclaimed a compassionate and loving Father, willing to receive back the returning prodigal upon the first evidence of repentance (Lk 15²⁰). He revived the forgotten prophetic doctrine of the Divine forgiveness, and made the chief blessing of His Kingdom to consist in the remission of sins (Mt 26²⁸, cf. Mk 2¹⁰).

This is the explanation of the universalism of Jesus. A Gospel for the sinful knows no race limitations. A Messiah who felt Himself specially sent to the lost sheep of the house of Israel (Mt 15²⁴), Jew though He might be, could not turn away from humble penitence, wherever found. The Samaritan (Jn 4⁷, Lk 17¹⁶; cf. 10³⁵), the Syro-phenician (Mk 7²⁶), even the Roman (Mt 8¹⁰), shared His blessing and His praise. The teaching of the Fourth Gospel concerning the other sheep not of the Jewish fold (10¹⁶), and the hour when men shall no longer worship the Father either in Jerusalem or on Mt. Gerizim (4²¹), is the legitimate outcome of the principles on which Jesus regularly acted. The Messiah of the Jews showed Himself to be in very truth the Saviour of the world.

There is still another point in which the teaching of Jesus differs radically from that of His contemporaries: this is in the emphasis He lays on the principle of service. Here the individualism of which we have spoken receives its needed complement. Men are saved one by one, each for himself; but they are saved that they may serve. As members of the Kingdom, it is their duty and their privilege to minister to one another's needs. Freely forgiven by the heavenly Father, they also are to forgive one another (Mt 18²¹⁻³⁵). He that would be greatest in the Kingdom of Christ must show himself servant of all (Lk 22²⁶, cf. Jn 13¹⁴). He that would save his life must be willing to lose it (Mt 16²⁵, Mk 8³⁵, Lk 9²⁴; cf. 17³³). We unduly limit this sentence if we understand it simply of the conditions of entrance to the Kingdom. It expresses the law of the Kingdom all the way through, the law, namely, of self-realization through self-sacrifice.

In this connexion we find our Lord reviving another forgotten OT truth. When the great prophet of the Exile first proclaimed the doctrine of salvation through the vicarious sacrifice of the good, he found few hearers (cf. Is 53¹ 'Who hath believed our report?'). The connexion of salvation with prosperity had been too long and too close to make the new teaching intelligible. In the succeeding centuries it fell altogether into the background. Our Lord reasserts it, and applies it to Himself. He compares Himself to the good shepherd who lays down his life for the sheep (Jn 10¹¹). He declares that He is come to give His life a ransom for many (Mk 10⁴⁵). He compares His death to a covenant sacrifice, sealing the new relationship between His disciples and God (Mt 26²⁸). The crucifixion and rejection which seemed to His disciples to mark the failure of His mission had no such meaning to Him. They were but a necessary step in His redeeming work. The reproachful word of His enemies had a deeper meaning than they knew. He saved others; Himself He could not save (Mt 27⁴², Lk 23³⁵, Mk 15³⁰). And the principles which He applies to Himself He extends also to His disciples. Looking forward to their approaching persecutions, He bids them not be dismayed, since if they would enter into His glory they must drink His cup (Mt 20²², cf. 5¹⁰⁻¹²). Thus suffering and death, which in earlier times had seemed the direct opposite of salvation, are shown by our Lord to have a necessary part to play in bringing it about.

Summing up our Lord's teaching concerning salvation, we may say that it is deliverance from sin through entrance upon a new Divine life. The marks of this life are humility, brotherly service, and filial dependence upon God. In the practice of these traits consists the righteousness of the Kingdom, and in their experience its blessedness. This new Divine life, which is mediated not merely by the teaching and example of Christ but by His sufferings and death, begins here, continues un-

broken in the life after death, and will be finally consummated at the Parousia, when the principles of Christ shall be everywhere accepted, and the will of God be done on earth even as it is done in heaven.

4. *In the New Testament.*—The salvation brought by Jesus is the theme of the entire apostolic age. Wherever we turn in the NT, whether it be Acts, Hebrews, St. Paul or St. John, we are conscious of a note of confidence and triumph, as of men possessing a supreme good, in which they not only themselves rejoice, but which they are anxious to share with others. More significant than any change in doctrine is this consciousness of salvation as a glorious fact, dominating and transforming life. None the less it is true that on this common basis we note differences of conception. Not all the disciples grasped the teaching of Jesus with equal clearness. In not a few parts of the NT we find survivals of earlier Jewish ideas and sympathies (e.g. Ac 1⁵, Rev 7⁴⁻⁸ etc.). So the degree of theological development varies greatly (cf. the speeches in Acts with Romans). Under the circumstances there is need of discrimination. We shall begin our treatment with a brief survey of the common features of the apostolic teaching, and then pass on to describe the more distinctly theological views of St. Paul and St. John.

(a) *In general.*—The central theme of the apostolic preaching is the proclamation of Jesus as Saviour. Cf. Ac 5^{30, 31} 'The God of our fathers raised up Jesus, whom ye slew, hanging him on a tree. Him did God exalt to be a Prince and a Saviour, to give repentance to Israel, and remission of sins' (cf. Mt 1²¹, Jn 3¹⁷, Ac 2²¹ 4¹² 13²⁶ 15¹¹, Eph 5²³, Ph 3²⁰, 2 Ti 1¹⁰, Tit 1⁴ 2¹³ 3⁶, 2 P 1¹¹ 1²⁰ 3^{2, 18}, 1 Jn 4¹⁴, He 2¹⁰ Jesus as author of salvation). 'Salvation' has become a technical term which sums up all the blessings brought by the Gospel (cf. Eph 1¹² 'the Gospel of your salvation'; 1 Co 15^{1, 2} 'the Gospel . . . by which ye are saved'; Ac 13²⁶ 'the word of this salvation'; cf. v. 47 16¹⁷ 'the way of salvation'; 28²⁸, Ro 1¹⁶ 'the power of God unto salvation'; 10¹⁰ 'confession unto salvation'; 11¹¹, 2 Co 7¹⁰ 'repentance unto salvation'; 2 Ti 3¹⁵ 'able to make wise unto salvation'; He 6⁹ 'things that accompany salvation'; Jude 3 'our common salvation'; Tit 2¹¹ 'the grace of God, bringing salvation'; cf. 1 Ti 2^{3, 4} 'God . . . who would have all men to be saved, and come to a knowledge of the truth'). In contrast to all previous deliverances of God (He 1^{1, 2}), the fulfilment of that for which the OT prophets looked (1 P 1¹⁰⁻¹²), the earnest of the age which is even now at the door (Ac 2^{16, 17} the pouring out of the Spirit as fulfilment of the prophecy of Joel), is the great deliverance which God has wrought through His Son. Jesus is not only Saviour; He is the only Saviour. The stone which the builders set at nought has been made head of the corner (Ac 4¹¹). 'And in none other is there salvation; for neither is there any other name under heaven that is given among men, wherein we must be saved' (Ac 4¹²).

In strict conformity with the teaching of Jesus, salvation is represented primarily as deliverance from sin. Our Lord is called *Jesus* because He 'shall save his people from their sins' (Mt 1²¹). He 'came into the world to save sinners' (1 Ti 1¹⁵). The blessings of His kingdom are repentance (Ac 5¹¹ 11¹⁸, cf. 20²¹) and remission of sins (Ac 2³⁸, cf. 3¹⁹ 5³¹ 10⁴³ 13³⁸ 26¹⁸, and esp. 3²⁸ 'Unto you first God, having raised up his Servant, sent him to bless you, in turning away every one of you from your iniquities'). So the Apocalypse begins with a song of praise 'unto him that loveth us, and loosed us from our sins by his blood' (1⁵). As death is the consequence and penalty of sin, salvation is at the same time deliverance from death

(He 5⁷, cf. 2¹⁴, Ja 5²⁰, cf. 4¹² 'he who is able to save and to destroy'; 2 Ti 1¹⁰ 'our Saviour Jesus Christ, who abolished death, and brought life and incorruption to light through the Gospel'), and from the wrath of God, of which death is the judicial consequence (cf. Ro 5⁹ with 1²¹). More particularly with reference to the individual, in contrast to the cosmic salvation taught by St. Paul (Ro 8²¹), it is called salvation of the soul (1 P 1⁹, 10, Ja 1²¹, He 10³⁹). In its wider relations it is a salvation of the world (Jn 3¹⁷, 1 Jn 4¹⁴).

Common also to the entire NT is the stress laid upon the sufferings and death of Christ as mediating salvation. The cross which had been such a staggering blow to the disciples' faith at the first (Lk 24^{20, 21}), and which still remained a stumbling-block to Jews and foolishness to Greeks (1 Co 1²³), is now seen to have a necessary part to play in Christ's saving work (He 2^{9ff}, 5^{8, 9}, 12², 1 Co 1¹⁸, 1 P 1^{18, 19}, Rev 1⁵, Ac 2^{24, 20, 28}, Lk 24²⁶), and is interpreted in the light of Is 53 (Ac 8³², 1 P 2²¹⁻²⁴). Cf. also the title 'lamb' in Rev 5^{6, 9}, 7^{9, 10}) as the fulfilment of prophecy (Lk 24²⁷, Ac 3¹⁸, 1 Co 15³). As a result of this new view of Christ's death, we find the NT writers without exception rising to a new conception of the meaning of suffering (Ac 5⁴¹, 9¹⁶, 2 Co 1⁶, Ph 1^{18, 28}, He 5⁹, 13¹³, 1 P 1⁷, Ja 1², Rev 7¹⁴), and applying to their own experiences of sorrow and temptation a standard which they have learned from Jesus Christ (1 P 2²¹, He 13¹³, 2 Co 1⁶, 4⁸⁻¹¹; cf. 1 Co 4¹⁰⁻¹³, Col 1²⁴).

If we compare the NT teaching as a whole with that of Jesus, we note a greater stress upon the eschatological element. This is true not only of the Apocalypse and of the early discourses in the Acts, where the Parousia is the centre of interest (cf. Ac 5^{20, 21}), but also of such writings as James (cf. 5⁸ with 1¹²), Hebrews, and 1 Peter, as well as the Epistles of St. Paul (cf. esp. Thess. and 1 Co 15). In Hebrews the word 'salvation' is used in a purely eschatological sense (e.g. He 9²⁸ 'Christ, having been once offered up to bear the sins of many, shall appear a second time, apart from sin, to them that wait for him, unto salvation'; cf. 1¹⁴, 2³, 2¹⁰, 5⁹, 6²). The same is frequently the case in 1 Peter (e.g. 1^{9, 10}, 1¹⁰ 'a salvation ready to be revealed at the last time,' 'the end of your faith, even the salvation of your souls,' but cf. 3²¹), and in the letters of St. Paul (e.g. Ro 13¹¹ 'Now is salvation nearer to us than when we believed'; cf. 5¹⁰, 1 Co 3¹⁵, 5⁸, 2 Ti 4¹⁸). The early Christians, almost without exception, felt themselves living at the end of the ages (1 Co 10¹¹), and looked at any moment for the return of their Master to set up His heavenly Kingdom (see PAROUSIA). Doubtless the resurrection experiences had much to do with this. The revelation of Jesus in glory, the assurance that He was even now sitting at the right hand of the Father, tended to emphasize the transcendent elements in His teaching, and to magnify the contrast between this present evil age and that which was to come. Thus St. Peter in Acts urges his hearers to save themselves from this crooked generation (Ac 2⁴⁰), and St. Paul declares that if in this world only Christians have hope in Christ, they are of all men most pitiable (1 Co 15¹⁹). The contrast in both these passages, unlike that involved in the Johannine doctrine of the world, of which we shall speak presently, is a temporal one. The time of present distress is set over against that of future glory. At the great day of the Parousia, which is impending, there is to be a transformation of the universe (Ro 8²¹, 1 Co 7³¹), new heavens and a new earth (Rev 21¹), and believers, with their risen brethren who have gone before (1 Th 4¹⁵), shall be clothed with heavenly bodies (1 Co 15⁴⁷⁻⁴⁹), and enter upon an existence adapted—as the present cannot be—to the enjoyment and practice of the spiritual life (Ro 8²⁴, cf. v. 11).

It is at this point that we note the closest contact with the ideas of contemporary Judaism. Coming to Christianity from an atmosphere charged with the hope of earthly, even if of superhuman, prosperity, it was impossible but that the disciples should show some traces of their early training. The letters of St. Paul show us what a struggle it took before Christianity freed itself from the yoke of Jewish legalism. Not dissimilar was the relation to the eschatological ideas of Judaism. The thoughts of the early Christians clothed themselves naturally in imagery taken from the Jewish apocalyptic books. They looked for a heavenly Jerusalem (Rev 21^{2ff}, cf. also He 12²², Gal 4²⁶), with its streets of gold and its gates of pearl, and did not resign without a struggle the hope of a millennial Kingdom on earth anticipating and preparing the way for the joys of the heavenly Kingdom (see MILLENNIUM). The Apocalypse introduces us most deeply into this world of Jewish-Christian thought, which, however, has left its traces in other books of the NT (e.g. 2 P, Jude), and is not wholly absent even from him who did the most to overcome it—the Apostle Paul (e.g. Gal 4²⁶, 2 Co 2³).

And yet it is easy to exaggerate the extent of this influence. In spite of all the points of contact with Judaism, the early

Christians lived in a new world. To them as to their Master salvation was a new life (Ac 2²⁸, cf. 3¹⁵, 11¹⁵), entered upon by repentance and faith. It was a life of forgiven sin, of filial trust, of brotherly service, of present communion with Christ. If the full enjoyment of the promised salvation still lay in the future, they were yet not without experience of Christ's present blessing and help. In the miracles of healing and deliverance which characterized the opening days of the Church (Ac 3¹⁰); above all, in the presence and power of the Holy Ghost (Ac 2¹⁶, 4³¹, 10⁴⁴), they saw the pledge of their Saviour's power and rule. The sanctification without which no man shall see the Lord (He 12¹⁴) was not only the ideal, but to a large extent a characteristic of their daily living. The social joys of the Kingdom were anticipated in daily communion with the brethren (Ac 2^{46, 47}). Thus the life experiences of the early Christians, even as revealed in such books as Acts, are truer to the teaching of their Master than a superficial study of the use of such theological terms as 'salvation' and 'kingdom' would seem to indicate. Much more shall we find this the case when we pass to the more developed conceptions of St. Paul and St. John.

(b) *St. Paul.*—We have already touched upon the points which the teaching of St. Paul shares with the rest of the NT—the conception of salvation as deliverance from sin, the emphasis upon the mediation of Jesus, and especially upon the significance of His death, the importance given to the eschatological element, the Jewish dress in which many of his ideas are clothed. Some interpreters have indeed carried the relation to Judaism so far as to contend that St. Paul was a chiliast, distinguishing, on the ground of 1 Co 15^{23, 24}, an earlier resurrection of believers from the later and general resurrection (see PAROUSIA). But this view cannot be successfully maintained. So far as the resurrection is concerned, St. Paul's ideas are as far as possible removed from the crass materialism which characterized the thought of many of his contemporaries (cf. 1 Co 15⁵⁷ 'That which thou sowest, thou sowest not that body that shall be,' etc.), and the salvation of the Parousia, which, unlike the coming in Rev 19, introduces the final blessedness of the saints, is only the working out to their full completion of principles and forces already active in this present life. Indeed the conception of salvation as a present experience is characteristic of all St. Paul's teaching, and gives it its chief significance.

To appreciate St. Paul's doctrine of salvation, we must set it against the background of his view of the *flesh*. Whatever be the exact interpretation given to the term; whether, with Holsten, it be understood metaphysically, as implying, on St. Paul's part, a dualistic view of the universe, or, with most interpreters, be regarded simply as the synonym for corrupt human nature, there can be no doubt that, to St. Paul, mankind as a whole is the prey of a power of evil which it cannot resist, and from which it is unable to escape. From Adam downwards all men have sinned, and come short of the glory of God (Ro 3²³). Being sinful, they are exposed to the curse of the law, and to the death which is the inevitable consequence and penalty of broken law. The glory of Christ's salvation consists in the fact that it delivers man from this sinful flesh, and so at the same time from the law which is its judge, and the death which is its penal consequence.

Thus salvation, while a single process, involves different elements, and may be looked at from different points of view. In the first place (or, to be more accurate, in the last place), it involves deliverance from death. To St. Paul, as to the other apostles, salvation is so far an eschatological conception, that its full effects will be apparent only at the Parousia. In that great day, when the terrors of the Divine wrath shall be revealed from heaven 'upon every soul of man that worketh evil' (Ro 2⁹, cf. 1¹⁸), Christians shall be safe. The Parousia, which to others is a day of death (2 Th 1⁹ 'who shall suffer punishment, even eternal destruction from the face of the Lord and from the glory of his might'), is to usher them into the pres-

ence of their long-expected Saviour. With the risen saints, who have died before them, they shall be caught up to meet the Lord in the air (1 Th 4¹⁷), and, freed from the last trace of the flesh which has hitherto hampered them (1 Co 15⁵⁰⁻⁵²), shall enter into the joys of His heavenly kingdom. It is this glorious experience—still in the future—to which St. Paul refers when he uses salvation as an eschatological term (e.g. Ro 13¹¹).

But salvation is not merely deliverance from future punishment. It includes also freedom from sin as a present power. Indeed it is this present deliverance which alone makes the future possible. Through union with Christ, the believer has become a new creature (2 Co 5¹⁷). He has died to sin (Ro 6³), crucified the flesh, with the passions and the lusts thereof (Gal 5²⁴), and entered upon a new spiritual life of righteousness, peace, and joy (Ro 14¹⁷). Already he is a saved man (Ro 8²⁴, 1 Co 1¹⁸, 2 Co 2¹⁵), reconciled with God (Ro 5¹), claiming and receiving the privileges of a son (Ro 8¹⁴⁻¹⁶), rejoicing in daily experiences of a Father's grace, knowing how to glory even in tribulations (Ro 5³), since he has learned that all things work together for good to them that love God (Ro 8²⁸). No doubt he still has his conflict with evil. But the conflict is no longer a discouraging one. Whereas he once felt himself the slave of the flesh, sold under sin (Ro 7¹⁴), now he knows himself to be its master. The law of the spirit of life in Christ Jesus has made him free from the law of sin and of death (Ro 8²). And the day is coming when, through the transformation of his body, he shall be freed from whatever defiling contact still remains (Ro 8²⁹).

Being freed from sin, the Christian is also free from law. Law has authority only over the sinner; but the man who through union with Christ has entered upon a new life in the spirit is free from law (Ro 6¹⁴ 7⁶ 10⁴). He is not only delivered from the fear of its punishment, but—what is more important—he has exchanged the bondage of its requirements for the freedom of the new man in Christ Jesus (Col 2¹⁴, Gal 5¹³⁻¹⁸). In place of the spirit of fear he has received the spirit of adoption, whereby he cries, 'Abba, Father' (Ro 8¹⁵). Knowing himself to be heir of all things, he refuses to be entangled again with the beggarly rudiments of ritual prescription under which he was once held in bondage (Gal 4³⁻⁹, Col 2²⁰). As a Christian he lives on a higher plane, and breathes a different atmosphere from that of work-righteousness, however earnest (Ro 3²⁰⁻²¹, Gal 3⁷). Thus the break with legalism, practically begun by Jesus' teaching concerning the childlike spirit, is theoretically completed by the Pauline doctrine of a justification or righteousness by faith instead of by works.

With the mention of faith we touch the heart of St. Paul's doctrine of salvation. We are saved by faith. And faith, to St. Paul, means more than belief. It is more even than trust. It is an act of the will by which the believer so lays hold upon Christ that he actually becomes partaker of His risen and triumphant life (Eph 3⁷, Gal 3²⁶⁻²⁷, Ro 11²⁰, Col 2¹¹⁻¹² 3⁴; cf. McGiffert, *Apostolic Age*, pp. 141, 142). For the Christ whom St. Paul knows as mediator of salvation is more than man, even the best of men; more even than the Jewish Messiah, great as are his prerogatives. He is a pre-existent Divine Being, coming into the world from a higher realm, and imparting to those who are subject to the law of sin and death the new spiritual vitality without which deliverance is hopeless.

This doctrine of Christ as the incarnation of a pre-existent Divine Being, which is common to St. Paul, the writer to the Hebrews, and St. John, gave Christianity its chief point of contact with contemporary Greek thought, and formed the

bridge by which men naturally passed from the latter to the former. But with all recognition of the points of similarity between the Logos doctrine of the Alexandrian philosophers and the NT teaching concerning the pre-existent Christ there is one point of difference, whose importance cannot be over-estimated. The interest of the one is cosmological; it grows out of a desire to understand the world. The interest of the other is soteriological; it springs from the need of deliverance from sin. To St. Paul, helpless under the burden of the flesh, finding that, when he would do good, evil is present with him, seeking in vain for a deliverer from his intolerable bondage,—to St. Paul, we repeat, the significance of the heavenly Man, revealed to him in the experience of the Daniascus road, consists in the fact that He is a life-giving spirit (1 Co 15⁴⁵).

We are ready now to understand the significance of the death of Christ. It is the means by which He gains the victory over the flesh and enters upon the new resurrection life. No merely forensic conception can do justice to St. Paul's thought at this point. It is not a matter primarily of guilt or of penalty. In sin he sees a power of evil, working out its own deadly and inevitable fruits. Christ took to Himself this sinful flesh, and let it work out upon Himself its natural consequences. He submitted to death, which is the rightful wages of sin, in its most aggravated and shocking form. In the striking words of Gal 3¹³ He became 'a curse for us: for it is written, Cursed is every one that hangeth on a tree.' But the death, which to an ordinary man would have ended everything, was to Him simply the door through which He passed into the higher life of the heavenly Kingdom. Being sinless, it was impossible for Him to be holden of death. Rising from the grave in newness of life, He opens the way for like escape to all who through faith in Him become partakers of His Divine and heavenly life.

No one can understand the Pauline doctrine of salvation who does not conceive it primarily as present union with the Divine and glorified Christ. What our Lord has once done on the great theatre of the universe, that each individual Christian is to repeat on the lesser stage of his earthly life. He, too, must die to sin (Ro 6²) and rise to righteousness (Ro 6⁵). He, too, must share the sufferings of Christ (Col 1²⁴), and sit with Him in heavenly places (Eph 2⁶). The life which he lives is to be no longer his, but that of the Christ who liveth in him (Gal 2²⁰). Old things have passed away, and all things are become new (2 Co 5¹⁷). Thus already here and now the Christian anticipates the blessings, whose full realization remains for the Parousia. Nothing can separate him from the love of Christ—neither death nor life, nor angels nor principalities, nor things present nor things to come (Ro 8³⁸⁻³⁹). If he die before the Parousia, it matters not. Though to live be Christ, to die is gain, for dying means departing to be with Christ, which is very far better (Ph 1²³, cf. 2 Co 5⁸ 'absent from the body, at home with the Lord').

It is clear that from such a point of view the significance of the Parousia is very different from that which it has in Jewish-Christian thought. To St. Paul it is not necessary to wait until the Second Coming before one can enjoy the salvation of Christ. His greatest blessing has been given already. The Spirit who shall one day quicken our mortal bodies already dwells within us as a transforming power (Ro 8¹¹), and the redemption of the body for which we still groan (Ro 8²³) will only give free play to spiritual forces, with the working of which we are already familiar. Thus we see that here also, as well as in his doctrine of righteousness by faith, the teaching of the apostle is true to the new insight of the Master.

Two points still need brief mention before we leave the Pauline teaching. These are: (a) The emphasis which he lays on the social side of salvation; (b) his doctrine of a cosmic salvation.

(a) Nothing is more striking, in view of the intense personal independence of St. Paul, than the stress which he lays upon the social side of salvation. This comes out most clearly in his doctrine of the Church—a conception which takes the place in his teaching of the present Kingdom of the parables. Through union with Christ a man is not only joined to his Master as an individual, but becomes a member of His body, the Church (Eph 1²³). The new Divine life which he enjoys is shared by his brothers and sisters of the Christian family. The gifts which he receives are for the purpose of ministering to their necessities

(Eph 4¹¹⁻¹³). If he suffers, they suffer with him (1 Co 12²⁶); if he is honoured, they are partakers of his joy (1 Co 12²⁶). The end of all is the building up of the Christian community in the knowledge and love of Christ (Eph 4¹³⁻¹⁶), and the reward for which the apostle looks at the Parousia is the presence of his converts among the company of the redeemed, spiritually fitted, because of his ministry, to enter upon the enjoyment of the heavenly kingdom (1 Th 2¹⁹, cf. 1 Co 1¹⁴).

It is not strange that, holding such views, we see the apostle looking upon all history as a training school for the Divine salvation (Ro 9-11), and hoping for the day when even his fellow-Israelites, who have thus far turned a deaf ear to the message of the Gospel, shall repent and become partakers of its blessings (Ro 11²⁶).

(8) But the apostle's view reaches out beyond this earth, and takes in the universe as a whole. He sees the whole creation groaning and travailing together in pain until now, waiting till it be delivered from the bondage of corruption into the liberty of the glory of the children of God (Ro 8²¹). He looks upon Christ as the mediator of a salvation truly cosmic, and declares that it is God's purpose 'through him to reconcile all things unto himself, whether things upon the earth or things in the heavens' (Col 1²⁰, cf. Eph 1¹⁰). Thus, according to St. Paul, the salvation in which we here share is only part of a great world process whose end shall be a universe redeemed (cf. 1 Co 15²⁸).

The teaching of St. Paul had a profound influence upon his contemporaries. We see its effect most clearly in 1 Peter, which, in spite of the emphasis it lays upon the future (1 P 1⁹), has the conception of salvation as a present experience (3²¹, cf. also 1²³ 2¹⁶ 4¹). And yet it is easy to overestimate it. Other influences were at work in the early Church. The legal conception of religion which characterized the Jew was reinforced by similar conceptions which had their origin on Gentile soil. The view of salvation as freedom from law through the possession of a present spiritual life was not fully adopted even by many who in other respects were profoundly influenced by St. Paul. The letter to the Hebrews is a case in point. Here, as we have seen, the point of view is almost wholly eschatological. Salvation is conceived as a reward promised to those who remain faithful under their present trials, and faith, instead of being vital union with a present Christ, is simply the assurance that God will keep His word (He 11¹). In this respect the letter to the Hebrews is typical of the future. When we study the Christianity of the Fathers we find the Gospel often presented as a new law, and salvation, which is wholly future, is the reward promised by God to those who keep it. The doctrine of a mystic union with Christ through faith tends more and more to fall into the background, only to be revived in a sacramentarian form, foreign to the Pauline teaching. This fact must be borne in mind if we would appreciate the full significance of the Johannine conception of salvation.

(c) *St. John*.—We have already referred to the problem raised by the passages in the Fourth Gospel which speak of eternal life as a present possession, and given reasons for believing that they truly represent the teaching of Jesus. But however much we may be convinced of the historic foundation of the discourses, there can be no doubt that, in their present form at least, they show traces of the reflexion of the evangelist. The connexion between the Gospel and the Epistle is too close to be overlooked. This connexion is evident in thought as well as in language. In both we have a single conception, clear-cut, uniform, consistent. We have to do with a form of teaching which may be contrasted with other parts of the NT as belonging to a distinct type. In presenting the Johannine teaching, therefore, we follow most recent scholars in using both Gospel and Epistles as sources.

In St. John the conception of salvation as a present spiritual experience reaches its culmination. There are indeed traces of the more common eschatological conception, esp. in the First Epistle (e.g. 2¹⁸⁻²⁰ 3² 4¹⁷; cf. Jn 5²⁸ 6⁴⁴ 21²²), but they

hold a comparatively subordinate place. Salvation is represented, as in the Synoptics, as eternal life. But for this life a man need not wait till the Parousia. It is already the possession of all who believe on Christ. He that hears Christ's word, and believeth Him that sent Him, 'hath eternal life, and cometh not into judgment, but hath passed out of death into life' (5²⁴; cf. vv. 39, 40 3³⁶, 1 Jn 4¹⁶ 5¹²). Christ is represented as the bread of life (6⁴⁸), of which, if a man eat, he shall live for ever (v. 51). He is the resurrection and the life (11²⁵), and whosoever liveth and believeth on Him shall never die (11²⁶). Cf. also the passages which speak of regeneration (Jn 3³, 1 Jn 3⁹ 5¹).

When we look more closely into the nature of this new life, we find that it has two main characteristics: it is a life of spiritual insight and of holy affection. These are indicated by the two words 'light' and 'love.'

Like St. Paul, St. John makes the sharpest possible contrast between the sinful world without Christ and the new spiritual society brought into existence by His redemption. To St. John, as to St. Paul, the whole world lieth in the evil one (1 Jn 5¹⁹), and the greatest need of man is to be delivered from the bondage of sin (Jn 8³⁴⁻³⁶). But to St. John the characteristic mark of this sinful state is ignorance, and the remedy which is needed is knowledge. It is the truth which must make men free (Jn 8³², cf. 8³⁴). The world lies in darkness (12). It does not know God and His Christ. It does not apprehend, and therefore will not receive, His message. Into such a world the Logos comes, as light. His influence is as wide as humanity (12). In the fullness of time He becomes flesh and dwells among men (1¹⁴), and they behold His glory, as of the Only-begotten from the Father, full of grace and truth (1¹⁴). He declares the God whom no man hath seen at any time (1¹⁸). Nay, more, in His own person He clearly manifests Him; for He that hath seen Him hath seen the Father (14⁹). He is the light of the world (8¹² 9⁵ 12⁴⁶), and the condemnation of men consists in the fact that when light was come into the world, they loved darkness better than light, because their works were evil (8¹², cf. 12³⁶), 'sons of light' as a synonym for the saved). For this is eternal life, to know God, who is Himself light (1 Jn 1⁹), and Jesus Christ whom He has sent (1⁷, cf. 1 Jn 5²⁰).

But the redeemed life is not merely a life of knowledge. It is also a life of love. God is love (1 Jn 4⁸) as well as light, and every one that loveth is begotten of God and knoweth God (1 Jn 4⁷). The clearest proof of the passage of the disciples from death to life is the presence of a loving spirit (1 Jn 3¹⁴, cf. Jn 13³⁴). 'He that saith he is in the light, and hateth his brother, is in the darkness even until now.' He that loveth his brother abideth in the light, and there is none occasion of stumbling in him' (1 Jn 2⁹⁻¹⁰). The intimacy of the relationships into which men enter through the Christian life is often emphasized. They are children of God (1 Jn 3¹⁻²). They are Christ's dear friends, to whom, unlike those who are merely servants, He makes known all that He has heard of His Father (Jn 15¹⁵). The one commandment which He lays upon them is that they should love one another, even as He has loved them (13³⁴, cf. 15¹⁷).

The secret of this new life of light and love is union with Christ. He is the vine, of which the disciples are branches (Jn 15¹⁻⁵). He is the heavenly bread upon which they feed (6⁵³⁻⁵⁸). From Him comes that water of life which, when once received, never faileth, but becomes in each man a well of water, springing up unto eternal life (4¹⁴, cf. 6³⁶). He is the good shepherd who lays down His life for the sheep (10¹¹); the grain of wheat, which, falling into the ground in apparent death, springs up to bear much fruit (12²⁴). Nor is this mediatorial work confined to His earthly life. If He leaves the disciples at death, it is to return by the Holy Spirit (14¹⁶⁻¹⁸), the Paraclete, who shall institute a yet more intimate relation than that which has gone before (16⁷⁻¹² 12¹³), bringing to remembrance the things of Christ (14²⁶, cf. 16¹⁴), leading the disciples, as they are able to bear it, into all the truth (16¹³, cf. 1 Jn 5⁷), becoming the bond through which Christ and the Father are united to them in a communion that shall know no end (cf. 14²³ with 16¹⁷⁻²¹, 22, 1 Jn 3³⁴).

If we compare St. John's view of the mediatorial work of Christ with that of St. Paul, we note many points of similarity. To both Christ comes into the world from a pre-existent heavenly life. To both He is the power through whom sin is

overcome, and the redeemed introduced into the spiritual Kingdom of righteousness, of peace, and of joy. In both, His mediatorial work is universal in its extent (cf. Jn 13 'all things were made through him'; 19 'the light which lighteth every man'; 1016 'other sheep . . . not of this fold'; 1233 'I, if I be lifted up, will draw all men unto myself'; 442 'Saviour of the world'). And yet there is a difference of emphasis. St. Paul lays chief stress upon the death of Christ. The earthly life is passed over lightly. Attention is focussed upon the great tragedy of the cross, from which the conquering Saviour issues victorious in the resurrection. To St. John, the death is only an incident in the saving work. It is the incarnation as such which is redemptive. Christ enters into the world as light, and His mere appearance carries with it redeeming or condemning power. To as many as received Him, to them gave He the right to become children of God (119). Those, on the other hand, who believe not, are condemned already by the mere fact of their unbelief (318). St. Paul, for all his stress upon present salvation, is a man of historic sense, quick to apprehend, and apt to state, the contrast between the present period of affliction and the glories still to be revealed at the Parousia. To the mystic intuition of St. John, time relations fade away, and we face two contrasted eternities—the world of light and of darkness, of righteousness and of sin, of love and of hate. Against this background of absolute realities there is no longer any place for the apprehension of relative values. Whoever is begotten of God sinneth not (1 Jn 518, cf. 35). They that reject Christ are children of the devil, who from the beginning was a liar and murderer even as they (842-44). Here the Pauline dualism is carried to the extremest point. The progress, the variety, the shading by which the latter is relieved, are here blotted out in the clear white light of eternity.

Yet the very sharpness of the presentation is the means of reviving forgotten truths. In the rarefied atmosphere of the Johannine Gospel, all traces of Jewish nationalism and materialism vanish. Salvation is indeed conceived as a transcendent good, but, as in the case of Jesus Himself, the transcendence is that of a higher spiritual order. One does not need to wait for the future to enjoy it. Here and now men may become partakers of light and life, of righteousness and love, of peace and joy. The Parousia is conceived less as a single event than as a continuous process (cf. PAROUSIA). Resurrection and judgment are present experiences. Even while in the world, the disciples may enter upon a life which is not of the world. The prayer of the Master is not that they may be taken out of the world, but that they may be kept from the evil (1715).

We have thus completed our historical survey of the Biblical doctrine of salvation. We have seen how through the centuries the conception has been deepened and enriched, as the more external and material elements have more and more given place to those which are moral and spiritual. We have noted the transformation wrought by the life and teaching of Jesus, and seen the central place assigned to His person and work in the thought and experience of His disciples. Amid all varieties of statement—in spite of many survivals of earlier and less spiritual ideas—we have marked the persistence of certain permanent features which warrant us in speaking of a Biblical idea of salvation. It remains to gather these together, and to exhibit them in their relations both to one another and to those which are more transient. This will be the aim of our concluding section.

iv. SYSTEMATIC STATEMENT.—In presenting the Biblical conception of salvation as a whole we have to consider (1) its nature, (2) its conditions, (3) its extent.

1. *Nature of salvation.*—We have seen that in every case the fundamental idea in salvation is deliverance. Our opening statement is as true of the profound utterances of a St. Paul or a St. John as of the simplest passages in the OT, that 'in every case some danger or evil is presupposed, in rescue from which salvation consists.' If, then, we would understand the Biblical conception as a whole, we must recognize clearly what is the great evil from which, according to its teaching, man needs to be delivered. That evil is death. No other term is comprehensive enough to unite the various elements in the Biblical teaching. From the first lines of the OT to the last chapter of the NT, salvation stands for that Divine activity by which God preserves or enriches the life of His children, by delivering them from the multiform dangers and evils which threaten its destruction. The content of the conception varies indeed with

the deepening apprehension of what true life means. The dangers become less external, more spiritual; less transient, more permanent; less local, more universal, but the underlying thought abides. We may illustrate at once the permanent elements in the idea and those that are transient by considering the contrast between (a) the temporal and the spiritual; (b) the individual and the social; (c) the present and the future.

(a) *Salvation as temporal and spiritual.*—In the earlier portions of the OT 'life' is used in the familiar sense of animal existence. 'Death' means physical destruction, with the loss of all that that entails. When a man dies, he loses everything worth having—home and friends, health and strength, national relationships and responsibilities, the privileges of Divine worship and of Divine communion. We misrepresent the OT conception of Sheol when we speak of the shadowy existence in the under-world as life after death. In the gloomy monotony of the grave the vigour and vitality which gave joy to life are lost. Man exists, indeed, but it is with 'a negative existence, a weakened edition of his former self; his faculties dormant, without strength, memory, consciousness, knowledge, or the energy of any affection. . . . The colour is gone from everything; a washed-out copy is all that is left' (Salmond, *Immortality*⁴ (1901), p. 163). It is not strange that, where this view obtains, the great evil to be feared is physical death (Ps 64⁵), and the supreme blessing to be coveted a long life (Ps 91¹⁶). The Divine salvation is found in deliverance from all that threatens or impairs life, all that weakens its vigour or vitality—violence, oppression, captivity, calamity, troubles, and distresses of every kind. The great blessing which God gives is prosperity—a long life and a full one, with one's wife a fruitful vine, and one's children as olive plants about the table (Ps 128). Greatest of all evils to be feared is defeat in battle, since in the stern days with which we have to do it carries with it the loss of all that men count dear, both for the individual and for the nation.

But with the deepening of the moral insight we note the rise of a deeper conception. Life is seen to involve more than outward prosperity. It has an inner spiritual meaning. A man lives, in the full meaning of the word, only when he enters into communion with God in righteousness and love. From this point of view the great evil to be feared is not physical but moral. It is sin which destroys the communion between a man and his Maker. From sin therefore, first of all, a man needs to be delivered. We have seen how this truth comes to expression in the latter portions of the OT. Jesus puts it in the forefront of His teaching, and it has been the distinct note of the Christian Gospel ever since. Salvation is primarily deliverance from sin. It is the restoration of the interrupted communion between the Father and His children through the creation in the latter of a new spiritual life. Once dead in trespasses and sins, they are made alive again through union with the living Christ. Thus it is still death from which men need to be delivered, but it is a death which is spiritual, not physical.

One mark of the contrast between the two views is found in the changed estimate of suffering. To most of the OT, suffering is purely evil. It is a mark of that destruction and decay from which man needs to be delivered. To the NT, it has become a means through which man may enter into a more abundant life. The Christian glories in his weakness. He 'takes pleasure . . . in injuries . . . in persecutions, in distresses, for Christ's sake,' knowing that when he is weak, then is he strong (2 Co 12⁹⁻¹⁰).

And yet we must not exaggerate the contrast. We misrepresent the NT teaching if we limit the blessings of the Gospel to the spiritual realm. The outer world as well as the inner is the scene of God's rule. The common physical blessings are not to be despised. Christ healed the sick as well as preached to the poor. The Father whom He proclaimed knows that His children need earthly bread as well as the bread from heaven. St. Paul, for all his contrast between flesh and spirit, recognizes the lawfulness of the physical appetites. The abstinence which he practises and recommends is out of regard for others' consciences, not because of any inherent evil in flesh and wine (Ro 14, cf. 1 Ti 4⁴). The physical universe is the scene and instrument of spiritual training. The body is a temple of the Holy Ghost (1 Co 6¹⁹). And, however great the change in the future, it is to no disembodied existence that he looks forward, but to a life in which the physical organism, now tainted by sin, shall be exchanged for a new body better adapted for the spiritual life (1 Co 15^{38a}). Nothing is more characteristic of the Biblical view of the future, NT as well as OT, than the extent to which it pictures the heavenly life in imagery suggested by the earthly. The heavenly city, the marriage feast, the many mansions, the tree of life, the crystal river,—these form the setting for spiritual joys. The last scene is not the destruction of the universe, but its transformation and redemption (Ro 8²¹).

(b) *Salvation as individual and social.*—In the earlier portions of the OT, the subject of the Divine salvation is Israel the nation. It is characteristic of primitive society that it has small regard for the individual as such. It is the tribe, the clan, the nation which is the centre of the religious as of the social life. So markedly is this the case that the action of Ruth in leaving her own people to follow her mother-in-law Naomi to Canaan is the cause of wonder, and is made the theme of an entire book. It is only natural, therefore, that we should find the interest of the Biblical writers centring in the fortunes of the people as a whole rather than in the units which compose it. Even where the outlook broadens, and the prophetic vision takes in other peoples, the point of view is still national. It is Egypt and Assyria whom the prophet sees standing with Israel as recipients of the Divine salvation, to whom, as to Israel, J^h applies the endearing title, 'my people' (Is 19^{24, 25}). Where this point of view obtains, it is impossible to rise to any true universalism. For a universal religion must be founded in the nature of man as such, and for this there is needed a profound sense of the worth of the individual.

We have seen how this sense awakens in Jeremiah and Ezekiel; how it is deepened by the experiences of the Exile and the Restoration. We have noted the tender and beautiful utterances in which it finds expression in the Psalms, and seen how its later development tended to follow the lines of legal conformity rather than of the filial spirit. The individualism of the Apocalyptic books is the individualism of the law-court or the market-place rather than of the family. Its language is that of bargain and sale, of reward and punishment. There is indeed no theoretical objection to the reception of the Gentiles, if they will adopt the ceremonial law and become Jews. But there is the immense practical difficulty of a condition laid upon strangers which even the children have not been able to bear. If the salvation of God is really to become a universal good, some deeper foundation must be found than that of ceremonial law. It must be grounded in conditions that are vital, not legal.

Such a foundation Jesus laid in His teaching

concerning the childlike spirit. Reviving the old prophetic teaching concerning the forgiveness of sins through the mercy and love of God, He laid a basis for His Gospel as broad as humanity. Men are not servants, with whom God deals on terms of law, but sons, whom He is willing to receive, whenever they turn to Him in penitence and faith. Thus the Gospel of Jesus is founded in an intense sense of the worth of the individual. In the family each child has his peculiar place. To Jesus, salvation means the bringing back of the child who has been wandering in the far country into the plenty and peace of the Father's home.

And yet the Gospel of Jesus is a social Gospel. It is a Kingdom which He preaches, not a collection of individuals. His teaching differs from that of His predecessors only in that He makes the conditions of entrance broader, simpler, more catholic—in a word, more human. Whether or not He used the word Church in Mt 16¹⁸, there can be no doubt that He intended to found a society which should body forth to the world the principles for which He stood. In this respect the Pauline doctrine of the Church is the legitimate outgrowth of the teaching of Jesus concerning the Kingdom. In the Christian life none liveth to himself and no one dieth to himself (Ro 14⁷). The sacramental sign which marks the separation of the believer from the world marks also his entrance into the Christian brotherhood, and the feast by which he shows forth the death of Christ until He come is eaten with his fellow-disciples as a communion meal. The social character of the Christian life is indicated in a thousand unexpected ways, but perhaps nowhere more beautifully than in the Pauline word about the Parousia in 1 Th 4^{13, 18}. 'We that are alive, that are left unto the coming of the Lord, shall in no wise precede them that are fallen asleep . . . wherefore comfort one another with these words.'

(c) *Salvation as present and future.*—We have seen that the earliest conception of salvation is present deliverance. This must be the case if death ends all. If God do not save while life lasts, He cannot save at all. The conception of national salvation does indeed open the way for a wider perspective. The life of the nation is longer than that of the individual, and God may delay His deliverance more than a single generation and still be in time. Yet the point of view is fundamentally the same. If God's succour is not to be in vain, it must come before the nation utterly perishes. There must be at least a remnant to carry on the national life, a shoot left in the old stock, which may spring up to newness of life (cf. Is 6¹³).

Yet the experiences of later Jewish history made this contact between present and future increasingly difficult to maintain. The old national prestige seemed gone, never to return. More and more, men despaired of present deliverance and concentrated their thoughts upon the future. The very barrenness of their present experience, the very absence of all evidence of God's present interest and help, served but to enlarge their expectations for the distant day when J^h should at last make bare His arm to help. What if individuals died? what if Israel as a nation should perish? God was able even to raise the dead. Some day He would stir the dry bones, and the nation would rise to newness of life (Ezk 37). Nay, He would call back from their graves the very individuals who had passed away, that they might share the joys of the final triumph (Is 26¹⁹, Dn 12²). Thus more and more the conception of salvation becomes eschatological and transcendent. The gap between present and future widens. Between the present time of distress, without experi-

ence of God's redeeming grace, and the future age which brings His great deliverance, there is a great gulf fixed.

This gulf Jesus bridged with His Gospel of a present Kingdom. He restored the older conception of a living God, able and willing to help His children in their daily need. But He saw that the great need was spiritual, not temporal. Conceiving of salvation as deliverance from sin, He taught that such deliverance was possible here and now. Prophet and psalmist before Him had had their intimations of a communion with God possible even in the midst of present trouble and distress. He made this communion a familiar experience. Devout spirits even within the OT, finding outward prosperity too little, had prayed for a clean heart and a contrite spirit; He showed how this prayer could be answered. The influence of the Master is apparent in the new view-point of the disciples. To the Christian believer, whatever his thought of the future, salvation is a present experience, introducing a man into a fellowship with God which no earthly sorrow or misfortune—not even death itself—can interrupt.

And yet here, again, we must beware of exaggeration. However great the emphasis on present deliverance, to Christianity, as to Judaism before it, salvation has its future meaning. We have noted the eschatological element in Jesus' own teaching. We have seen it repeated in that of His disciples. It is present in St. Paul; it is not absent even from St. John. He, too, rejoicing in communion with a present Christ, looks forward to a day when He shall be yet more fully manifested, and believers, seeing Him as He is, shall be transformed into His image (1 Jn 3^d). The very preciousness of the present experience, the very exaltation of the spiritual standard, serve but to deepen the longing for the day when all that now impedes the progress of Christ's Kingdom shall be done away, and God be all in all.

2. *Conditions of salvation.*—These may be considered on the Divine side and on the human.

(a) *On the Divine side.*—The ultimate cause of salvation is the Divine mercy. This is the uniform teaching of OT and NT. Whether in the simpler meaning of victory in battle or the more profound conception of spiritual regeneration, salvation is undeserved. God does not treat the Israelites according to their merits, but according to the riches of His grace. They were not more in number than other peoples when He chose them for His own, and delivered them from their captivity in Egypt (Dt 7th). For His name's sake He saved them, that He might make His mighty power known (Ps 106th, cf. Jer 14th). When they forsook Him and wandered from Him, He did not give them up. His love endured in spite of their unfaithfulness (Hosea). He was inquired of by them that asked not for Him, found of them that sought Him not. He spread out His hands all the day unto a rebellious people (Is 65th). Even His judgments are a mark of His love (Am 3^d). Not only the deliverance from enemies, but the repentance which makes it possible is His gift (Ps 51st).

The same conception reappears in the NT. God is not the stern creditor exacting the uttermost farthing, but the loving Father, forgiving His erring children; more ready to give good gifts than earthly parents to their children. The disciples did not choose Christ, but He chose them and appointed them that they should go and bear fruit, and that their fruit should abide (Jn 15th). The more profound and spiritual the conception of salvation, the deeper the conviction that it is undeserved. 'By grace have ye been saved through faith; and that not of yourselves: it is the gift of God' (Eph 2nd).

In many passages indeed, esp. in OT, the Divine mercy is represented as an arbitrary thing. Not only is the deliverance of God contrasted as purely miraculous with all human instrumentalities (cf. 1 S 14th 'no restraint to J' to save by many or by few'; Is 59th 'J's hand is not shortened that it cannot save'; 1 S 17th 'J' saveth not with sword and spear'; Hos 1st salvation by J' contrasted with salvation by bow or by sword, or by battle, etc.; cf. Ex 14th the deliverance from Egypt; Jg 7th the defeat of the Midianites by Gideon; Ps 33rd 44th 57th), but it often seems dependent upon moods of the Divine feeling which man cannot fathom. There are times when J' may be approached; there are others when no man may draw nigh to Him (Ps 32nd, cf. Is 55th). When the great waters overflow, prayer cannot reach Him (Ps 32nd). At such a time the part of wisdom is to wait patiently until His anger be past. But on the whole we find an increasing emphasis upon the permanent character of God's saving purpose. It belongs to God's nature to show mercy. However Israel may change, His purpose towards Israel changes not. So we find increasing recognition of God's use of means. When He would deliver His people from the Philistines or the Midianites, He raises up some man to be their saviour. Even the experiences which seem outside of His control are not really so. The Assyrian boasts of his defeat of Syria and Samaria, saying, 'By the strength of my hand I have done it, and by my wisdom' (Is 10th), and knows not that he is but the rod of J's anger, in whose hand as a staff is His indignation (10th). This broadening view of the Divine Providence becomes strictly universal in the NT. Nothing can separate from the love of Christ (Ro 8th). All things without exception work together for good to them who are called according to God's purpose (Ro 8th). History is a mighty drama, in which each event fills its appointed place, preparing the way for that dispensation of the fulness of the times in which it is God's purpose to sum up all things in Christ (Eph 1st). Even the groanings of the creation in its present distress are but the travail throes of the new universe, that shall be, when the sons of God shall be revealed (Ro 8th).

Among the instruments appointed by God to mediate His salvation, the Jewish law, with its sacrificial system, holds an important place. Through its precepts men were trained in purity and holiness, and in its sacrifices they saw a pledge of God's forgiveness and mercy. To the contemporaries of our Lord it seemed a finality, and the salvation of the Messianic age would but serve to introduce on a larger scale the worship and sacrifices of the heavenly Jerusalem. Christians, following their Master, recognized the law as a Divine institution, but to them its authority was temporary. It was a tutor to bring men to Christ; but after Christ was come it was no longer needed. Its significance might be variously conceived. To the writer to the Hebrews, it had a positive value, as typifying the higher righteousness and the more perfect Atonement of the Gospel. To St. Paul, its significance is chiefly negative. It reveals the futility of any merely legal righteousness, and points men to the better salvation revealed by Christ.

With Christ we reach the centre of the Biblical doctrine of salvation. He is the Saviour *par excellence*, the true Mediator between God and man, the fulfilment of all the promises, the realization of all the hopes of the earlier dispensation. Two distinct lines of preparation meet in Him. There is the hope of the Messiah, a human deliverer through whom God has promised to deliver His people, and to set up on earth His long deferred

kingdom. There is also the expectation of a special intervention of *J'* Himself; the coming of a day when He shall leave His heavenly dwelling-place and take up His abode in the midst of His people, superseding the lesser radiance of sun and moon and stars by the light and glory of His presence. Jesus is at once Jewish Messiah and God incarnate; Son of Mary, and the Word made flesh.

This is not the place to trace the development of the NT doctrine of Christ (see art. JESUS CHRIST). It is sufficient to say that it runs parallel with the deepening conception of salvation. In Jewish-Christian circles, where the thought of salvation is still framed on the older lines of an external deliverance, it is the Messianic thought which is most prominent. Jesus is a man, approved of God unto men, by mighty works and wonders and signs which God did by Him (Ac 2²²), crucified according to the Scriptures (Ac 3¹⁸), raised from the dead (Ac 2²⁴), and now waiting in heaven till the time of the restoration of all things (Ac 3²¹). To St. Paul and St. John, with their deeper conception of salvation as a new spiritual life of righteousness and love, Jesus is a pre-existent Divine being, coming into the world from a higher realm as a quickening and life-giving principle to all who have been made one with Him by faith.

The contrast between these two views may be illustrated in connexion with the view of Christ's death. To the Jewish-Christians, with their more external conception of salvation, it is an arbitrary appointment of God, the necessity of which they recognize, but which they cannot understand. Christ died that the Scripture might be fulfilled. To St. Paul and St. John, the death is a necessary step in that great process through which evil is overcome and the Christian believer made partaker of Christ's risen and glorified life. That we may become like Him and share His nature, it was necessary that He should become like us and share our nature. He must suffer death with us, that we may be raised to life with Him.

The conception of salvation as a new Divine life finds clearest expression in the doctrine of the HOLY SPIRIT (which see). Here, too, we trace a development from the conception of the Spirit as the energy of God coming upon men to fit them for special work in connexion with the Divine kingdom (e.g. Jg 11²² 13²⁵ 14⁶), to that which sees in Him the immanent God, entering into the life of men through regeneration (Jn 3⁶), creating in them a higher life of holiness and love (Gal 5²²), dwelling within them as an inner spiritual principle (Ro 8⁹), uniting them with God and with Christ (Ro 8⁹⁻¹⁰), leading them into truth (Jn 16¹³), sanctifying them (Ro 15¹⁶), making intercession for them (Ro 8²⁶), more and more transforming them into the image of their Master (Ro 8²⁹), and at last raising them from the grave through the transformation of their mortal bodies into the new glory of the resurrection life (Ro 8³¹). Where such a view is held, it is easy to see how futile is any thought of human merit. The aspirations which rise toward God, the graces which fit us for His fellowship, are the work of the Spirit. The very life which we live is not our own. It is the gift of God, who worketh within us both to will and to do of His good pleasure (Eph 2⁸⁻⁹, Ph 2¹³).

(b) *On the human side.*—Yet it would be a mistake to conclude that the Bible knows no human conditions of salvation. The same St. Paul who lays such stress on the Divine activity in salvation urges his readers to work out their own salvation with fear and trembling (Ph 2¹²). As on the Divine side salvation is a new life created in man, so on the human side it is a life which manifests itself in certain distinctive activities. These may be summed up under the three heads of—(a) repentance, (β) faith, (γ) obedience.

(a) The first and indispensable condition of salvation is *repentance* (which see), by which is meant not merely sorrow for sin, but actual forsaking of sin and turning to righteousness. This is as necessary for deliverance from Assyrian oppression as for entrance upon the new life of Christ's Kingdom. God may indeed save men from their sins, but He cannot save them in their sins.

We have already noted the deepening estimate of this grace, and seen how from a mere condition of salvation, which a man can achieve for himself without God's help, it comes to be an element in salvation itself—the first step in the process whose end is perfect holiness.

(β) *Faith.*—The obverse of repentance is *faith* (which see). Man turns from sin to God, and the means by which he lays hold of the Divine deliverance is faith. Saving faith in the Biblical sense is always more than belief (Ja 2¹⁹). It involves an act of the will, and issues in obedience. Yet on this common ground we note a difference of conception. In much of the Bible faith means trust in God's word, together with the activities which follow it. Its object is God's promise rather than His person. Abraham had faith in God—that is, he trusted His promise—and 'he went out, not knowing whither he went' (He 11⁸). Because of this trust, he shall one day receive his reward; but this reward lies still in the future (He 11¹³⁻³⁹). This is the sense in which faith is used in Hebrews. To St. Paul, on the other hand, faith has a deeper meaning. It is the means of obtaining a present blessing, not a future one. Its object is a person, not a promise. By faith a man lays hold upon Christ as his Saviour, becomes one with Him, partakes of His heavenly life, shares His righteousness, and rises with Him into His eternal Kingdom. It is thus a comprehensive term, which covers the entire human side of that experience whose Divine side is the working of the Holy Spirit.

(γ) But repentance and faith are alike vain, save as they issue in *obedience* (which see). This is the all-embracing Biblical virtue. Man's relation to God is such that his righteousness must take this form. The particular content may vary with the growth of the Divine revelation. In OT, for instance, it includes the faithful observance of the ceremonial law with its prescriptions of ritual and sacrifice. Yet even in OT these are subordinate to the eternal principles of justice and mercy (cf. Mic 6⁶⁻⁸). In the NT the law has been done away. The only sacrifice required is the spiritual sacrifice of prayer and praise (He 13¹⁵), the offering up of the person in life-service to God (Ro 12¹). The burdensome prescriptions of the Levitical ritual have given place to Christ's new commandment of love. Yet this love is no vague or indefinite virtue. It shows itself in the willing acceptance of God's fullest revelation; in discipleship of Christ and membership in His Kingdom. Beginning with faith, it manifests itself in all the social virtues. It rejoices to minister to the needy and oppressed. It does not disdain the gatherings of the saints for prayer and praise, and it finds its public marks in the sacramental signs of baptism and the Eucharist, by which the believer's membership in the body of Christ is openly showed forth.

3. *Extent of salvation.*—It remains to consider the extent of salvation. Here our study has shown a constant enlargement in man's conception of the sweep of God's purpose. We may illustrate this in connexion (a) with the present life; (b) with the life after death; (c) with the universe as a whole.

(a) *Salvation in this life.*—We have already noted the growing universalism of the Biblical teaching. At first it is Israel alone for whom God cares. He is *J'*'s dearly beloved son. Other nations are but God's servants, instruments in His hand through which He accomplishes His saving purpose for Israel. Then the Gentiles also share the blessings of the Messianic deliverance, but it is only by becoming subject to Israel, and adopting the Jewish law and worship. Yet even in OT there are gleams of a conception more truly

catholic. To Isaiah, Egypt and Assyria as well as Israel are chosen of God. The foundation for a true universalism is laid in the prophetic doctrine of the worth of the individual. Jesus makes the conditions of entrance to His Kingdom purely moral and spiritual—repentance, trust, humility, obedience, the childlike spirit. Where these are present, there is a son of God, whether he observe the ceremonial law or not. The practical universalism of Jesus is theoretically completed in the Pauline doctrine of the abrogation of the Jewish law. This was the natural consequence of the new view of redemption. When salvation is regarded as a new Divine life, it is impossible not to recognize the Christianity of those who have received the Holy Spirit, even if they have not been circumcised (Ac 10⁴⁴⁻⁴⁸). To the freedom of the Divine Spirit, like that of the wind, blowing where it listeth, no man may venture to set bounds. The salvation of Israel is still the centre of hope and prayer (Ro 9¹), but it is only as part of a process which is as wide as humanity.

With the widening horizon, we note a corresponding change in the depth of the conception. Salvation becomes not only a broader, but a more intensive term; less external, more spiritual; less local, more permanent. It not only affects more men, but it affects them more profoundly. Its subject is the whole man. It reaches soul as well as body. It delivers from sin as well as from suffering. It not only removes causes of evil; it creates forces of good. As nothing is too large, so nothing is too small to fall within the range of its activity. Life and death, things present and things to come, are alike subject to the control of that Christ who is able to save to the uttermost.

This double growth may be well illustrated in connexion with the doctrine of election. At first the Divine choice centres in Israel the nation, or in those heroes or prophets whom God has set apart for special service in connexion with the national deliverance. Then other nations are included in the Divine plan. God chooses Egypt as well as Israel. Cyrus the Persian is His servant, set apart to do a special work in the execution of His redemptive purpose. To the broader view-point of the NT, with its juster estimate of the worth of the individual, election is no longer confined to a few. All Christians are elect, called to be saints (Ro 1⁶) according to the Divine purpose. And as the range of the Divine choice widens, so its content deepens. Christians are elect unto salvation (2 Th 2¹³), with all the richness of meaning which the Christian revelation has put into the word. The object of the Divine choice is not merely deliverance from future punishment. Men are called to the Christian life as a whole, with its good works (Eph 2¹⁰), its joys and graces, its brotherly service, its missionary zeal, its willingness to spend and be spent, yes, if need be, even to be cast away (Ro 9³), if thereby others may be saved. Thus the individualism of the NT doctrine of election, so far from being a narrowing of the conception, is rather a mark of its true universalism.

(b) *In the life after death.*—With the expansion of the conception of salvation in this life, we find the Biblical outlook reaching across the grave, and taking in the life after death. Nothing is a more striking witness to the strength and richness of the Hebrew conception of God than the way in which it succeeded in transforming the pagan conception of Sheol which at the first the Israelites had shared with their contemporaries. We have already traced the steps in this moralization of the life after death, and need not repeat them here. From a gloomy, passionless, joyless existence, Sheol becomes the scene of God's presence and power. It has its garden of life, where the righteous await contentedly the greater joys of the resurrection. Christianity further emphasizes and enriches this conception. Whatever new elements Christ has brought into the thought of God and His salvation are carried over into the life immediately after death. Christ's activity is not merely confined to the living. In the spirit He preaches even in the realm of the dead (1 P 2¹⁹). The shifting and uncertain imagery through

which the human imagination had endeavoured to picture the nature of 'that undiscovered country' is now reinforced or superseded by a definite conception. To die means to depart and to be with Christ (Ph 1²³); to enter into the Father's home, where the elder brother has gone before to prepare a place and a welcome for each returning traveller (Jn 14²). Whatever the joys still remaining at the Parousia, they are not different in kind from those upon the experience of which one enters immediately after death. The highest blessedness of heaven will consist in communion with Christ. 'It is not yet made manifest what we shall be. We know that if he shall be manifested, we shall be like him, for we shall see him even as he is' (1 Jn 3²).

(c) The Biblical doctrine of salvation reaches its climax in the conception of a *redemption of the universe*. Foreshadowed in the OT doctrine of new heavens and a new earth, developed in the period between the Testaments in extravagant and non-spiritual forms, it remains an element in the Biblical conception to the last. It is not God's purpose merely to save men out of the world, but to save the world. Whatever is hopelessly evil—whether in nature, man, or spirit—shall at last be utterly destroyed. No foe will longer remain to dispute the authority of Christ or mar the glories of His eternal Kingdom. The last enemy to be destroyed is death (1 Co 15²⁶). Not till then will Christ's saving work be finished, and He restore to the Father the power given to Him, that in the redeemed universe God may be all in all (1 Co 15²⁸). This doctrine of a cosmic salvation, wrought out most fully by St. Paul, but implied also in other parts of the NT, has three main elements: (1) the redemption of physical nature with its destruction of suffering and death; (2) the redemption of mankind with its destruction of sin; (3) the redemption of the angelic world with its destruction of the spiritual forces which now oppose the Kingdom of God. Thus in terms naturally suggested by the thought of his day, but with a vigour and breadth of conception worthy of the largest generalizations of our modern science, the apostle presents the work of Christ in its unity as one great process, running through the ages, reaching out to take in the uttermost bounds of space, penetrating to the profoundest depths of spiritual experience in order to bind together all things in earth and heaven in one universal purpose of salvation (Eph 1, Col 1).

LITERATURE.—The Literature, which is voluminous, is widely scattered, all the more important Commentaries, as well as works on Biblical Theology, contributing directly or indirectly to the subject. For monographs on special phases of the doctrine the reader is referred to the literature given in the special articles on ESCHATOLOGY, FAITH, JUSTIFICATION, PAROUSIA, RANSOM, REDEMPTION, etc. Here only a general survey can be given.

On Salvation in general, cf. Cremer, *Bib.-Theol. Lex.* s. *salvatio, salvus, salvare*; M'Clintock-Strong, art. 'Saviour' and 'Salvation'; Herzog, *RE³*, art. 'Heil' and 'Erlösung'; Ritschl, *Rechtfertigung und Versöhnung*, vol. II.; Kähler, 'Zur Lehre von der Versöhnung,' in *Dogmatische Zeitfragen*, II. 1898; Gess, *Christi Person und Werk* (1870); Thomasius, *Christi Person und Werk* (1886); Briggs, 'The Biblical Doctrine of Salvation,' in *Church Union*, N.Y., Jan. 1897.

On the doctrine of Salvation in OT, cf. the Biblical Theologies, esp. Schultz, 5th ed. (p. 562 ff.), Dillmann (p. 411 ff.), Riehm, Smend, Kayser-Marti, Piepenbring (Eng. tr. p. 207 ff.); Briggs, *Messianic Prophecy*; Duhm, *Theologie der Propheten* (1875); Adeney, *The Hebrew Utopia* (1870).

On the period between the Testaments, cf. Gfrörer, *Jahrhundert des Heils*, II., esp. chs. 8-10; Drummond, *Jewish Messiah* (1877); Stanton, *Jewish and Christian Messiah*; Schürer, *HJP*; Weber, *Jüdische Theologie* 2, 1897. Much information may also be obtained from the notes in Charles' editions of Enoch, Secrets of Enoch, Apocalypse of Baruch, and Assumption of Moses, as well as from his *Eschatology, Hebrew, Jewish, and Christian*, 1890.

On the NT doctrine, besides the Biblical Theologies of Weiss, Beyschlag, Reuss, Bovon, Stevens, Gould, and esp. Holtzmann, cf. Klaiher, *Neutest. Lehre von der Sünde und Erlösung* (1836); Wendt, *Lehre Jesu*; Horton, *Teaching of Jesus*; Gilbert,

Revelation of Jesus (1899); Pfeiderer, *Paulinismus* 2; McGiffert, *Apostolic Age*; Briggs, *Messiah of the Gospels, Messiah of the Apostles*; Stevens, *Pauline Theology, Johannine Theology*; Everett, *Gospel of Paul* (1893); du Rose, *Soteriology of the NT* (1932); Ménégoz, *La Théologie de L'Épître aux Hébreux* (1894), *Le Péché et la Rédemption d'après St. Paul* (1882); Nösgen, *Geschichte der NT Offenbarung* (il. p. 300 ff.); Cone, *The Gospel and its earliest interpretations* (1893); Baldensperger, *Selbstbewusstsein Jesu* 2 (1892); Titius, *Die Neutest. Lehre von der Seligkeit* (1895); Ménégoz, 'Le Salut d'après l'enseignement de Jésus-Christ,' in *Rev. Chrét.* 1899, ix. pp. 401-421; W. Bousset, *Jesu Predigt in ihrem Gegensatz zum Judentum* (1892); Harnack, *Das Wesen des Christentums* (1900; Eng. tr. 1901).

On special points in connexion with the doctrine, cf. the various monographs on the Kingdom of God by Schnedermann, Schmoller, Issel, J. Weiss, Bruce, Boardman, Toy (*Judaism and Christianity*, pp. 303-371); Schmidt, *Die paulin. Christol. in ihrem Zusammenhang mit der Heilslehre des Apostels dargestellt* (1870); Cremer, *Die paulin. Rechtfertigungslehre im Zusammenhang ihrer gesch. Voraussetzungen* (1900); Wernle, *Der Christ und die Sünde bei Paulus* (1897); Rabisch, *Eschatologie des Paulus* (1893); Teichmann, *Die paulin. Vorstellungen von Auferstehung und Gericht, und ihre Beziehung zur jüd. Apokalypstik* (1896); Schlatter, *Der Glaube im NT* 2 (1895), 'Der biblische Begriff der Gnade' (*Schrift und Geschichte*, pp. 177-217); Biehm, *Der Begriff der Sühne im AT* (1877); Kühl, *Die Heilsbedeutung des Todes Christi* (1890); Seeberg, *Der Tod Christi in seiner Bedeutung für die Erlösung* (1895); E. Cremer, *Die stellvertretende Bedeutung des Todes Christi* (1892); Cave, *Scriptural Doctrine of Sacrifice* 2 (1890); Gunkel, *Die Wirkungen des Heiligen Geistes* (1888); Weinel, *Die Wirkungen des Geistes und der Geister* (1899); M'C. Edgar, *The Gospel of a Risen Saviour* (1892); Milligan, *The Resurrection of our Lord* (1881); Salmond, *The Christian Doctrine of Immortality*, 4th ed. 1901; Schwally, *Das Leben nach dem Tode* (1892); Charles, *Eschatology, Hebrew, Jewish, and Christian* (1899).

W. ADAMS BROWN.

SAMAIAS (Σαμαίας).—1. Shemaiah, one of the chiefs of the Levites in Josiah's reign, 1 Es 1⁹ (cf. 2 Ch 35⁹). 2. 1 Es 8³⁰=Shemaiah, of the sons of Adonikam, Ezr 8¹³.

SAMARIA.—1. (שֶׁמֶרֹן, that is, *Shōmērōn*, 'watch-mountain'; Σαμαρεία, Σεμερών, Σουερώ, Σουμρώ, Σουμωρώ; Jos. *Ant.* VIII. xii. 5), Σαμαρείη; Euseb. (*Onom.*), Σεμρώ; *Samaria*) The capital of the kingdom of Israel. The Assyrian, *Samirina* (Ins. of Tiglath-pileser III., Sargon, etc.), and the Greek and Latin forms of the name, come from the Aramaic שֶׁמֶרֹן. A characteristic derivation of the name is given, in 1 K 16²⁴ (RV, cf. Jos. *Ant.* VIII. xii. 5), where we are told that Samaria was built by Omri who bought the 'hill of Samaria' from Shemer, and, having fortified it, called the name of the city that he built Shomerōn (*Samaria*) after Shemer. (See discussion of etymology by Stade in *ZATW* v. 165 ff.)

Commanding the roads from Shechem northwards to Esdraelon, and westwards to the coast, and situated within easy reach of the Mediterranean, no better site could have been selected for the fortified capital of the Northern kingdom. The hill ('mountain of Samaria' Am 4¹ 6¹, Sir 50²⁰) rises from 300 to 400 feet above the bed of a broad fertile valley (perhaps the 'field of Samaria' Ob 1⁹ RV), and is isolated on all sides but the east, where it is connected with the hills ('mountains of Samaria' Am 3⁹, Jer 31⁶) by a low narrow saddle. On three sides it is surrounded and overlooked by hills clothed with olive and vine, but they are beyond the range of catapult and bow, and so were not a source of danger. On the fourth side the hills are low, and the view over them to the west, with the blue waters of the Mediterranean in the distance, is one of exceptional beauty. This charm of position, in a rich 'fat' valley, bordered by vine-clad hills, formed part of that 'glorious beauty' which made Samaria the 'crown of pride of the drunkards of Ephraim' (Is 28¹⁻⁴).

From the 7th year of Omri, Samaria was the capital ('the head of Ephraim' Is 7⁹, 'Samaria and her daughters' Ezk 16²⁵), and residence of the kings of Israel (1 K 16²⁵ 20²³ 21¹⁻¹⁸ 22²¹, 2 K 1³ 3¹ 6¹⁰ 13¹ 10¹⁴ 14²⁵ 15⁹ 13¹⁴ 17²³ 27¹⁷, Is 7⁹ 10⁹, Hos 10⁷); and it was also their burial-place (1 K 16²⁸ 22²⁷, 2 K 10³³ 13⁹ 14¹⁶). Samaria is on this account mentioned

with or compared with the capital of the Southern kingdom (2 K 21¹³, Is 10¹⁰ 11, Ezk 16²¹ 23⁴, Am 6¹, Mic 1¹⁻⁵), which was to share its fate. Ezekiel calls it 'the sister' (16²⁵ 23³³), and the 'elder sister' of Jerus. (16⁴⁶). The city was surrounded with strong walls (*Ant.* VIII. xiv. 1), and beautified by the kings of Israel. There was a fortified palace, 'the castle of the king's house' (2 K 15²⁵ RV), with a 'roof-chamber' (2 K 1²). This probably stood on the top of the hill, and near or connected with it may have been the ivory palace built by Ahab (1 K 22³⁹). There was a Syrian quarter in Samaria (1 K 20²⁴); and a city gate (1 K 22¹⁰, 2 K 7¹ 18²⁰, 2 Ch 18⁹) and pool (1 K 22³⁸) are mentioned.

At Samaria, Ahab received a visit from Jehoshaphat, and, at the entrance of the gate, the two kings sat to hear the prophecy of Micaiah (1 K 22¹⁰, 2 Ch 18² 9). There the 70 sons of Ahab were slain (2 K 10¹⁻⁷); there Jehu destroyed all that remained unto Ahab (2 K 10¹² 17); and there, according to one account (2 Ch 22⁹, cf. 2 K 9²⁷), Ahaziah was killed. It was to Samaria that Joash, after the capture of Jerus., brought the vessels for the service of the temple, and the treasures of the king's house (2 K 14¹⁴, 2 Ch 25²⁴); and that Pekah, at least according to 2 Ch 28⁸ 2¹⁵, returned at the head of his army, laden with the spoil of Judah, and accompanied by a long train of captive Jews, who were afterwards released.

Samaria became the religious as well as the political centre of the Northern kingdom. The marriage of Ahab with Jezebel, and the consequent close alliance between the usurping dynasties of Israel and Phœnicia, led to the establishment of the Phœnician worship on a large scale in the capital. Ahab caused a temple and altar to be erected to Baal (1 K 16²⁴; *Ant.* IX. vi. 6), and made the Asherah (1 K 16²³, 2 K 13⁶ RV). The temple, which was probably of great size, contained 'pillars of Baal,' apparently of wood, which were torn down and burned, and a 'pillar of Baal,' possibly a stone pillar with an effigy of the god on one of its faces, which was broken down when Jehu destroyed the temple after slaughtering the prophets of Baal (2 K 3² 10²¹ 25-27 [in v. 25 read prob. with Klost. אֲדִיטִי *adytium* for עִיר 'city']]). The Phœnician rites were celebrated with great splendour, and Jezebel, who had slain the prophets of the LORD (1 K 18¹³), fed 450 prophets of Baal and 400 prophets of the Asherah at her table (1 K 18¹⁹ RV). The idolatrous worship was strongly opposed by the prophets of J^h, some of whom worked and preached in the city. Elisha had a fixed residence in it (2 K 2²⁵ 5³ 6²², cf. v. 24), and Hosea probably prophesied there. Isaiah (10⁹ 11 36¹⁹) alludes to the idols, graven images, and gods of Samaria; Hosea (7¹ 8³⁻⁸ 10⁹), to its wickedness, and to the calf-worship which existed side by side with the worship of Baal; Amos (8¹⁴), to its sin; and Isaiah (8⁴ 9⁹), Hosea (13⁶), Amos (3¹²), Micah (1⁶) foretell the penalties that it would have to suffer for the sins of its people. Jeremiah (23¹³) mentions the prophets of Baal, and Ezekiel (23⁴) can find no fitter symbol for the city than Oholah the harlot.

Soon after Samaria was built, it was probably besieged by Benhadad I., who forced Omri to make 'streets' in the city for the Syrians (1 K 20²⁴). During Ahab's reign it successfully resisted a siege by Benhadad II. (1 K 20²¹; *Ant.* VIII. xiv. 1, 2). In the reign of Jehoram, after a minor expedition had been thwarted by Elisha (2 K 6¹⁹ 20; *Ant.* IX. iv. 3), the city was again besieged by Benhadad. On this occasion the garrison and townsmen were reduced to the last extremity (2 K 6²⁴ 26), when a panic seized the Syrian army and the siege was raised (2 K 7¹⁻¹⁰; *Ant.* IX. iv. 4, 5). In the 7th year of Hoshea, Samaria was besieged by Shalmaneser, but it was actually taken, B.C. 722, by his succes-

sor Sargon after the siege had lasted three years (2 K 17^{5,6} 18^{9,10,24}, cf. 21¹³; *Ant.* ix. xiv. 1; *Inscriptions of Sargon*). The Northern kingdom fell with its capital, and the people were transplanted by the conqueror; but the city was not completely destroyed (Jer 41⁵). Two years later it rose, in alliance with Hamath, Arpad, and Damascus, against the Assyrians; but the rising collapsed on the overthrow of the king of Hamath (see *Inscriptions*). The transplanted Jews were replaced by foreign colonists (2 K 17²⁴, Ezr 4¹⁰) under Assyrian governors, of one of whom the name, Nabu-achi-shu, has been preserved (III. Rawlinson, 34, col. ii. 94 f.). In B.C. 331 Samaria submitted to Alexander, who killed many of its inhabitants, and replaced them by Macedonian colonists. Later it was dismantled by Ptolemy Lagi, afterwards rebuilt, and again destroyed by Demetrius Poliorcetes. The walls must soon have been restored, for it was a 'very strong city' when taken by John Hyrcanus, B.C. 120, after a year's siege (*Ant.* xiii. x. 2, 3; *BJ* i. ii. 7). Hyrcanus is said to have completely destroyed the city by 'bringing streams to drown it'; but this can refer only to that portion of it which lay at the foot of the hill. Samaria was rebuilt by Pompey, who made it a free city, and attached it to the government of Syria (*Ant.* xiv. iv. 4; *BJ* i. vii. 7); and it was further restored and strengthened by Gabinius (*Ant.* xiv. v. 3; *BJ* i. viii. 4). Herod, in pursuance of his commercial policy, which was based on intercourse with the West, and of his plan of covering the country with strongholds garrisoned by Gentile soldiers devoted to his interests, made Samaria a strong fortress. He embellished it, built a temple of great size and magnificence, and settled it with veterans from his army and people from the neighbourhood (*Ant.* xv. viii. 5; *BJ* i. xxi. 2). The city, which is said at this time to have had a circumference of 2½ miles, was re-named Sebaste (Augusta) in honour of Augustus, who had given it to Herod (*Ant.* xv. vii. 3); and this name has survived in the modern *Sebastieh*. At Samaria Herod entertained Agrippa; there he killed his wife Mariamne, and there also he strangled his sons (*Ant.* xv. vii. 5-7, xvi. ii. 1, xi. 7). During the Jewish revolt, Samaria and Herod's soldiers, called *Sebastenes*, went over to the Romans (*Ant.* xvii. x. 3, 9; *BJ* ii. iii. 4, iv. 3, xii. 5). Many authorities suppose that the gospel was preached in Samaria (Ac 8^{9,14}); but it is possible that some town in the district of Samaria, of which the name is not specified, is intended (note the absence in v. 6 of the def. art. in some MSS). Septimius Severus made Samaria a *Colonia*, but it rapidly declined as Shechem (Neapolis) rose to importance, and in the 4th cent. it was already a small town (Euseb. *Onom.*). It was an Episcopal see, and its bishops attended the Councils of Nicæa, Constantinople, and Chalcedon, and the Synod of Jerusalem (A.D. 536). According to Jerome it was the burial-place of Elisha, Obadiah, and St. John the Baptist (*Ep. ad Marcellam*, *Com. ad Obad.*), and their tombs were shown to pilgrims in the Middle Ages. The Crusaders established a Latin bishopric in Samaria.

The modern village of *Sebastieh* lies at the E. end of the terraced hill of Samaria, which is now partially cultivated and in places covered with olive groves. The old city wall can be traced for most of its course, following irregularly the contour of the hill, and there are remains of the west gate. From this gate a street 50 ft. wide, and lined with columns, of which many still stand, ran along the S. side of the hill to a gate on the E., which has disappeared. To the W. of the village are the columns of a large buried temple; towards the S.W. the columns of a smaller temple;

and in a hollow at the foot of the N.E. side of the hill are several shafts of columns that formed part of a quadrangle, perhaps a hippodrome, 622 ft. long and 190 ft. wide. Close to the site of the E. gate are the ruins of the fine cathedral church of St. John, built between A.D. 1150 and 1180, over the traditional tomb of St. John the Baptist. In the neighbourhood of the village are two fine springs, *Ain Hârim* and *Ain Kefr Rûma*, from which small streams flow for a short distance. These streams are, apparently, those utilized by Hyrcanus to undermine the lower portion of the city. (Stanley, *S. and P.* 243-246; G. A. Smith, *HGH* pp. 346-349; *PEF Mem.* ii. 160, 211-215; Guérin, *Samarie*, ii. 188, etc.).

2. SAMARIA (ἡ Σαμαρεία; *Samaria*) mentioned in 1 Mac 5⁶⁶ cannot be the well-known Samaria, and is apparently an error. The place intended seems to be *Marisa* (Marishah, now *Kh. Mer'ash* near *Beit Jibrin*), a reading found in an ancient Latin version. See Josephus, *Ant.* xii. viii. 6, and 2 Mac 12²⁶. C. W. WILSON.

SAMARIA, TERRITORY OF (ἡ Σαμαρείης χώρα, Σαμαρεία, Σαμαρία; Jos. χώρα Σαμαρείων; *Samaria*).—At an early period the name of the city was applied to the kingdom of the ten tribes, and as the limits of that kingdom varied (2 K 10^{32,33} 15²³, 1 Ch 5²⁶), so did those of the territory called Samaria. Thus the 'king of Samaria' (2 K 1³, Hos 10⁷) is the king, and the 'cities of Samaria' (1 K 13³², 2 K 17^{24,26} 23¹⁹) the cities, of the Northern kingdom; and the 'mountains of Samaria' (Jer 31⁶, Am 3⁹) is simply another term for the hill-country of Ephraim (AV Mt. Ephraim). The name Samaria is used in its extended sense in 1 K 18², 2 K 17²³ 23¹³, 2 Ch 25¹³, Ezr 4¹⁷, Neh 4², Am 3¹².

In the Apocrypha (1 Es 21^{6,28}, Jth 1⁹ 4⁴, 1 Mac 31¹⁰ 5⁶⁶ 10^{30,38} 11^{23,24}, 2 Mac 15¹) and in NT (Lk 17¹¹, Jn 4^{4,5,7,9}, Ac 1⁸ 8^{1,9,21}) the name Samaria denotes the central of the three districts—Judæa, Samaria, and Galilee—into which the country west of Jordan was divided. According to Josephus (*BJ* iii. iii. 1, 4, 5), Samaria was bounded on the north by Galilee and the territory of the free city of Scythopolis, its most northerly village being *Ginæa* (*Jenin*), in the great plain of Esdraelon. It extended S. to the toparchy of Acrabatta, *Akrâbeh*, and the villages of Anath, *Kh. Aina*, and Borceos, *Berkit*, which were about 15 Roman miles S. of Shechem, and belonged to Judæa. In the Jordan Valley the boundary ran N. of Sartaba, *Kh. Surtaba* (Mishna, *Rosh hash-shana*, ii. 3); and on the west to the N. of Antipatris (Talm. Bab. *Gittin*, 76a). It was separated from the sea on the W. by the coast district of Judæa, which stretched N. to Ptolemais (*BJ* iii. iii. 5).

Samaria is a land of hills and valleys, with here and there upland plains of great fertility. Carmel and other hills are partially clothed with dense thickets, and, in places, remnants of former forests can still be seen. In the plains and open valleys the rich soil yields abundant harvests of wheat, oats, and maize, whilst on the terraced hillsides the fig, the olive, and the vine bring forth their fruit in due season. Josephus says truly (*BJ* iii. iii. 4) that the country was fruitful and well wooded; it abounded in wild fruit and in that produced by cultivation; its water was good, and in consequence of the excellence of its grass the cattle yielded more milk than elsewhere.

Samaria is an open country, and was always at the mercy of hostile invaders. It seems to have offered little resistance to Joshua, and, after the conquest, Canaanites, Midianites, Syrians, Assyrians, Greeks, and Romans overran it with comparative ease. No great battle was fought within its

limits, and the stirring episodes of mountain warfare, so frequent in Judæa, are unknown to its annals. On the other hand, it is remarkable for the number of fortified towns or 'strong places' that guarded its approaches. The open character of Samaria facilitated communication. Great highways of commerce passed through it, and chariots were used at a very early period. Amongst the trade routes were that from the coast, through the remarkable pass between Ebal and Gerizim, to the districts east of Jordan; and those from the Maritime Plain across the hills to Megiddo (*Lejjûn*), and En-gannim (*Jenin*), and thence to Bashan and Damascus. To these well-travelled roads was due in great measure the close connexion that has always existed between Samaria and the trans-Jordanic regions, and the readiness with which the Jews of the district succumbed to the influence of the surrounding paganism.

After the Assyrians had conquered the kingdom of the ten tribes, they carried away the people to Assyria, and brought men from 'Babylon, and from Cuthah, and from Avva, and from Hamath and Sepharvaim,' and placed them in the 'cities of Samaria' (2 K 17²⁴⁻²⁶; *Ant.* ix. xiv. 1). At a later date, during the reigns of Esar-haddon and Assur-bani-pal (Osnapper, RV), the number of Assyrian colonists in Samaria was largely increased (*Ezr* 4^{1-2, 10}). In 2 K 17²⁹ these colonists are termed 'Samaritans.' Josephus says (*Ant.* ix. xiv. 3, x. ix. 7, xi. iv. 4) that they were called Cuthæans in Hebrew, from Cuthah, the city of their origin, and Samaritans in Greek, from the country to which they were removed; and he regarded the Samaritans of his day as their descendants. The Cuthæans and others brought their national gods with them, an act which was believed to have brought on them the vengeance of the God of the land. One of the captive Jewish priests was consequently sent to teach them 'how they should fear the LORD.' The result appears to have been that they adopted the Jewish ritual, but combined the worship of J^h with that of their graven images (2 K 17²⁹⁻⁴¹; *Ant.* ix. xiv. 3). Possibly, many of their high places and altars were destroyed during the reforms of Josiah (2 K 23¹⁹, 2 Ch 34⁶).

The Captivity freed the Jews from their old sin of idolatry, and intensified the exclusiveness of the Jewish character. When, therefore, the Jews returned from Babylon, and the Samaritans offered to assist them in rebuilding the walls and temple at Jerusalem, the proffered aid was refused, and the Jews excluded the Samaritans from all participation in their worship. Quarrels naturally arose, and led to a mutual enmity between the two peoples, which was marked by frequent outbursts of active hostility. The Samaritans were generally the aggressors. They attempted to prevent the rebuilding of Jerusalem (*Ezr* 4⁷⁻²⁴, *Neh* 4⁷⁻¹²; *Ant.* xi. iv. 4); seized Jewish lands, and carried Jews off as slaves (*Ant.* xii. iv. 1). On one occasion they brought the bodies of dead men into the cloisters of the temple (*Ant.* xviii. ii. 2), and on another they killed Galileans who were passing through Samaria on the way to Jerusalem. This last outburst gave rise to disputes, which were referred to Rome for settlement (*Ant.* xx. vi. 1-3; *BJ* ii. xii. 3-7). The Samaritans were always ready to claim kinship with the Jews when the latter were prosperous (*Ant.* ix. xiv. 3, xi. viii. 6); but at other times they repudiated the relationship, and acknowledged their Assyrian origin (*Ezr* 4²; *Ant.* xi. iv. 3, 9, xii. v. 5). The feeling of the Jews towards their enemies is indicated by the term of reproach, 'Thou art a Samaritan, and hast a devil' (*Jn* 8⁴⁸); by the words of Jesus son of Sirach (*Sir* 50²⁰⁻²⁶); and

the mutual hostility explains Christ's command to His disciples not to enter into any city of the Samaritans (*Mt* 10⁶).

Samaria, after its conquest by Assyria, was ruled by Assyrian, Babylonian, and Persian governors until Syria and Palestine fell to Alexander after the battle of Issus. The Samaritans hastened to proffer aid to the conqueror, and in return were granted, according to Josephus, permission to build a temple on Mt. Gerizim (*Ant.* xi. viii. 4, 6, xiii. iii. 4, ix. 1). In this temple, which, more probably, however, was built by Sanballat during the time of Nehemiah, the Samaritans offered sacrifices after the manner of the Jews. But when Antiochus iv. Epiphanes took Jerus. and desecrated the temple, they were quite ready to address him as god, and ask his permission to call their place of worship the temple of Zeus Hellenius (*Ant.* xii. v. 5). After having more than once changed hands during the struggle between Alexander's successors, Samaria was given by Antiochus iii. the Great, as part of the dower of his daughter Cleopatra, to Ptolemy v. Epiphanes (*Ant.* xii. iv. 1). During the reign of the latter's successor, Ptolemy vi. Philometor, the Samaritan colony in Egypt, which owed its origin to the settlement of Samaritans serving in Alexander's army (*Ant.* xi. viii. 6), and to the removal of Samaritans from Palestine to Egypt by Ptolemy i. Soter (*Ant.* xii. i. 1), maintained, in controversy with the Alexandrian Jews, that according to the laws of Moses the temple was to be built on Gerizim and not at Jerus. (*Ant.* xiii. iii. 4). Samaria was conquered by John Hyrcanus, who destroyed the temple on Gerizim (*BJ* i. ii. 6, 7); and, after passing to the Romans when Pompey intervened in the quarrel between Hyrcanus ii. and his brother, it was given to Herod by Augustus (*Ant.* xv. vii. 3). On Herod's death it was granted to his son Archelaus (*Ant.* xvii. xi. 4; *BJ* ii. vi. 3); but, on his banishment, it was added to the province of Syria (*Ant.* xvii. xiii. 5; *BJ* ii. viii. 1). In the time of Pilate a large number of Samaritans were killed when on their way to Gerizim, and to Pilate's action on this occasion Josephus ascribes his recall (*Ant.* xviii. iv. 1, 2).

In the days of our Lord the Samaritans formed an important element in the population; and though they probably had a strong admixture of Jewish blood in their veins (2 K 23¹⁹⁻²⁰, 2 Ch 34⁶, *Ezr* 6²¹, *Jn* 4¹²; *Ant.* x. iv. 5), they had not lost their distinctive character as aliens by descent (*Lk* 17¹⁸, cf. 10²⁹⁻³⁷), and apparently in religion (*Jn* 4²²). The gospel appears to have been first preached to the Samaritans by Philip, and with some measure of success (*Ac* 8⁵⁻²⁶). But it cannot have been very generally accepted, for the Samaritans more than once came into collision with the Roman emperors and the Christians. Vespasian quelled a threatened rising by slaying 11,600 of them on Mt. Gerizim (*BJ* iii. vii. 32); and they were so severely punished by Zeno and Justinian for murdering Christians and destroying churches, that they never afterwards recovered. Benjamin of Tudela, A.D. 1163, found 'Cuthæans, who observe the Mosaic law only, and are called Samaritans,' at Nâblus, Caesarea, Ascalon, and Damascus (*Early Travels*, p. 81). They are now represented by a few families at Nâblus.

LITERATURE.—Conder, *Tent-Work*, i. 80-109; Stanley, *Sinai and Palestine*, 229-248; G. A. Smith, *HGH* 321-343; Guérin, *Samarie*; Schürer, *HJP* i. i. 190 f., 280, ii. i. 5-8; Baedeker-Socin, *Pal.* 226 ff.; Buhl, *GAP*, 207. C. W. WILSON.

SAMATUS (Σάματος), 1 Es 9³⁴.—One of the sons of Ezora, corresponding to Shemariah or Shallum in *Ezr* 10⁴¹⁻⁴².

SAMECH (ס).—The fifteenth letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 15th part, each verse of which begins with this letter. In this Dictionary it is transliterated by *ṣ*.

SAMELLIUS (B Σαμελλιος, A Σεμ- Σεβ-; AV Semellius), 1 Es 2¹⁶. 17. 28. 30 = Shimshai the scribe, cf. Ezr 4⁸ etc.

SAMEUS (B Θαμαίος, A Σαμαίος; AV Sameius).—Of the sons of Emmer (1 Es 9²¹), answering to Shemaiah, of the sons of Harim, Ezr 10²¹.

SAMGAR-NEBO (נְבֻזַּנְדָּר).—An officer of Nebuchadnezzar, who, according to the MT of Jer 39 [Gr. 46]³, took his seat, along with other princes, in the middle gate of Jerusalem after the Chaldean army had forced its way into the city. If the name (LXX BΣ Σαμαγάθ, A Εισσαμαγάθ) is to be accepted, it may be = *Samgir-Nabu*, 'be gracious, O Nebo' (Schrader, *COT* ii. 109).^{*} The text has in any case suffered corruption, as is evident, apart from other considerations, from the multitude of variant readings exhibited (cf. Swete, *OT in Greek, ad loc.*) by the LXX. If we retain the name Samgar-nebo, we ought perhaps to drop the first 'Nergal-sharezer,' and read: 'Samgar-nebo the Sar-sechim [a title as yet unexplained], Nebushazban the Rab-saris [cf. v. 13] and Nergal-sharezer the Rab-mag' (so Sayce in art. NERGAL-SHAREZER above). Another course is to reject (with Giesebrecht) the name Samgar-nebo entirely, taking סגנ as a dittography of סר, and joining נְבֻזַּנְדָּר to the following, נְבֻזַּרְדִּים thus = נְבֻזַּרְדִּים of v. 13. It must be confessed that the means are not yet at our disposal for pronouncing with confidence on the true text. See, for another expedient, art. SARSECHIM. J. A. SELLIE.

SAMLAH (שִׁלְחָה).—An Edomite king, described as 'of Masrekah' (which see), Gn 36³⁶. (B d'ist, A Σαλαμά, D Σαμαλά) = 1 Ch 1⁴⁷. (B om., A Σαμαά).

SAMMUS (Σαμμοῦς, B Σεμμοῦ), 1 Es 9²³ = Shema, Neh 8⁴.

SAMOS (Σάμος), one of the most important islands in the Ægean, is separated from the coast of Ionia by the narrow straits in which the Greeks met the Persian fleet and won the decisive victory of Mycale, B.C. 479. It was the centre of Ionian luxury, art, and science; and, from the moment when it became a member of the Ionic confederacy to the time when it was deprived of its freedom by Vespasian, its history is full of interest. In B.C. 84 it was united to the province of Asia, and in B.C. 17 it was made a free city by Augustus. This was the political status when St. Paul, after passing Chios, touched at Samos (Ac 20¹⁵ RV) on his return from his third missionary journey. There were many Jewish residents on the island (1 Mac 15²³), who obtained numerous privileges when Marcus Agrippa and Herod visited Samos. The latter also made presents to the Samians (*Ant.* xvi. ii. 2, 4; *BJ* i. xxi. 11). Descriptions of the island and its history will be found in Tournefort, *Voyage de Levante*, ii. 103 etc.; Ross, *Reise auf die griech. Inseln*, ii. 139 etc.; Murray, *Handbook to Asia Minor*, etc. pp. 359-361. C. W. WILSON.

SAMOTHRACE (Σαμοθράκη, i.e. the Thracian Samos).—An island of considerable size in the Ægean Sea, to the south of the coast of Thrace, and north-west from the city of Troas. St. Paul

^{*} On the similarity of the names *Samgar* and *Samgar* see Moore, *Judges*, 106.

and his companions, sailing from Troas, made a straight run, without tacking (see RHEGIUM), across the sea to Samothrace (Ac 16¹¹); and the next day they sailed north to NEAPOLIS, on the Thracian coast, which, according to Pliny (*Nat. Hist.* iv. 23), was about 38 miles from the island, though the actual distance is hardly more than about 20 miles. At the northern end of the island was the town, called by the same name; and here, doubtless, it was that the ship which carried St. Paul cast anchor for the night. Ac 20⁶, also, probably implies that the ship anchored for a night at Samothrace; but no details are recorded. There was no good harbour at any point round the island, which therefore was difficult of approach (*importuosissima omnium*, as Pliny says); but the ancient Greek sailors always liked to anchor for the night, if convenient or possible (Ac 20¹⁴. 15).

Samothrace is a mountainous island; and in the view from the Trojan coast it forms a huge mass behind and towering over the intermediate island of Imbros. Its summit rises to 5240 ft.; and there Homer describes the sea-god Poseidon taking his seat to survey the battle before Troy. In a similar way the island of Samos on the coast of Ionia forms a huge mass rising boldly out of the sea; and the common name Samos is probably due, not to colonization from one to the other, nor to common stock in the inhabitants, but to the character of the islands, each in the distance looking like a single huge mountain.^{*}

Samothrace, being unsuited for a trading centre by its harbourless nature, played little part in Greek history. Its only importance is due to the cult of the mysterious goas called *Cabiri*, who were said to have been worshipped by the original Pelasgian inhabitants of the island (Herod. ii. 51). The Mysteries of the Cabiri rivalled those of Eleusis in reputation and attractiveness during the later centuries of Greek history; and Philip of Macedon was initiated at Samothrace.

W. M. RAMSAY.

SAMPSAMES (ΣV Σαμψάμης, which is followed by AV and RV; A Σαμψάκης; Lat. *VSS Lampsacus*).—One of the places to which the Romans are said to have written in favour of the Jews, 1 Mac 15². It is usually identified with *Samsun*, a seaport town on the Black Sea, between Sinope and Trebizond (cf. Ramsay, *Hist. Geog. of Asia Minor*, 273).

SAMSON.—

- viii. Mythological traces.

Literature.

i. **THE NAME.**—The pronunciation *Samson* is derived from the Vulgate, which follows the LXX Σαμψών, using a vowel older than the *i* of the Heb. שִׁמְשׁוֹן *Shimshôn*. The name is not to be derived from שָׁם, or שָׁנָה, or שָׁנָה 'serve' (cf. Moore on Jg 13²⁴), but is formed from שָׁנָה 'sun' by means of the denominating ending -ן; a diminutive sense = 'little sun' (cf. the Arab. name *Shumais* in Noldeke, *ZDMG* xl. p. 166) is less probable than a derivation with the sense 'sunny', 'sun's man' (cf. Ges. - Kautzsch, *Gram.* § 86 f. g.). It is natural to think of the Danite city BETH-SHEMESH, which was not far from Samson's birthplace. The name Samson is confined in the OT to the judge (but cf. שִׁמְשׁוֹן *Shimshai*, Ezr 4⁸. 17. 13), and is found nowhere but in Jg 13-16, which have him for

^{*} Constantine Porphy. (iii. p. 41, Bonn ed.), Eustathius, and Strabo (pp. 346, 457) say that Σαμῶς meant 'hill'; and the name was common in the Greek world.

their subject (the Syr. and LXX Luc. wrongly introduce him in 1 S 12¹¹). The same thing is true of the name of his father MANOAH (מָנוֹחַ 'rest,' 'resting-place'), Jg 13²⁵. 16²¹; but after the Captivity the inhabitants of Zorah, Samson's native town, are called (1 Ch 2²⁴⁻²⁵) MANAHE-THITES (מָנַחִיטִים), a circumstance which might imply that Manoah was the *heros eponymos* of a Danite clan, and was only afterwards assigned as father to the judge Samson (cf. the case of JEPHTHAH in Jg 11¹).

ii. THE NARRATIVE.—

Ch. 13. The barren wife of the Danite Manoah of Zorah has a vision of the angel of Jahweh in the form of a man, who promises to her a son who from his mother's womb is to be a 'consecrated one' to God (מִנְיָר מְלִירִים, see NAZIRITE), and who is to make a commencement of freeing the people from the Philistine yoke. Therefore his mother is to abstain from all intoxicating liquors and guard against everything that defiles; no razor is to come upon the head of the child. At Manoah's prayer the angel appears a second time, and repeats his instructions. Only after he ascends in the flame of the offering presented to Jahweh and disappears, do Manoah and his wife recognize who had been their guest. The boy, when born, is named Samson, and grows up under the blessing of Jahweh.

Ch. 14. Arrived at manhood, Samson, not without opposition from his parents, makes choice of a Philistine girl at Timnah to be his wife. On his way there he kills a lion, and on his return journey eats of the honey which he finds in the carcass. At the wedding feast he makes this the subject of a riddle for the young men, and, when his young wife coaxes him into telling her the solution and betrays it to them, he leaves her in ill humour.

Ch. 15. Having recovered himself, Samson will visit his wife in her parents' house, but finds that she has been given by her father to another. In revenge he destroys the ripe harvest fields of the Philistines by foxes with burning brands. The Philistines retaliate by burning his wife and all her house, an act which Samson again avenges by slaughtering many of them (vv. 1-5). Having made his escape to the territory of Judah, which, however, owned the Philistine suzerainty, he allows himself, on their menaces, to be handed over by the inhabitants bound, but bursts his bonds and slays a thousand Philistines with the jawbone of an ass. The wearied Samson is revived by Jahweh by means of a spring flowing from the jawbone (vv. 9-10).

Ch. 16. While Samson is visiting a harlot at Gaza he is betrayed, and his enemies think to seize him in the morning. But he catches up the folding-doors of the city gate, posts and all, and carries them to the top of a mountain by Hebron (vv. 1-3). His paramour, DEZULAH, in the Vale of Sorek is bribed by the Philistines to deliver him over to them: three times he deceives her as to the source of his strength, and bursts the bonds wherewith she has bound him. At last he confesses that his strength lies in his God-consecrated hair, and after he has been shaved while asleep he falls defenceless into the hands of the Philistines. The latter put out his eyes and set him to slaves' work in the prison at Gaza (vv. 4-22). At the festival in honour of their god DAGON, the conquered foe is to be exhibited as a spectacle to the assembled people. But with the new growth of his hair the blind man feels his strength return, and after praying to Jahweh he pulls down the pillars of the house in which the Philistines are assembled, so that they all perish along with himself in the ruins. His body is buried by his relatives in the family sepulchre. His judgeship had lasted twenty years (vv. 23-31).

iii. THE SOURCES.—Of all the narratives in the Book of Judges, that about Samson is the only one that is not composed from the two ancient sources which supplied the material of the book—in all probability the Judæan source (J) and the Ephraimitic (E). The attempt to distinguish two sources throughout has only once been made, and that superficially, by von Ortenberg, but cannot be regarded as successful. On the other hand, it has been rightly recognized by van Doorninck (1879) and Stade (1884) that ch. 14 has undergone extensive revision, and Böhme (1885) has proved the same for ch. 13. In both chapters the aim of this revision is religious; the whole personality of Samson is meant to be brought under the religious point of view more than is the case in the particular narratives. Böhme has shown at the same time that ch. 13 bears marks of the source J, and thus the whole Samson history will have to be assigned to this source. That E has no share in it is explained by the circumstance that for the Ephraimitic source the judge who 'began to deliver Israel out of the hands of the Philistines' (13³) was

not Samson but Samuel (1 S 7³⁵). Whether the Samson history, whose scene was the neighbourhood of Judah, had only a local importance such as to prevent its being made use of by E, or whether that history was too repugnant to its theocratic character (cf. Eb. Schrader, who calls E 'the theocratic narrator'), in any case Samuel takes the place of Samson completely in E (1 S 1-7; cf. esp. the birth story in 1 S 1 with Jg 13), whereas in J Samuel plays no part at all as judge and military commander.

But if the Samson story is derived from only one source, yet, apart from the above-mentioned revision, it is not on that account a literary unity in all its parts. On the contrary, the various anecdotes about Samson were originally related separately and only afterwards collected and arranged. Later than any of them, we may assume, is the story of his birth (ch. 13), just as is the case with almost all ancient heroes, even those of them who otherwise appear in the clearest light of history.

Samson is included by the Deuteronomistic redaction, to which the Book of Judges owes its shape, amongst the 'great judges'; but this, it appears, was not done without a considerable amount of weeding out. The concluding formula of the Deuteronomistic redaction as to the duration of Samson's judgeship appears already at the end of ch. 15 (v. 20), and is then repeated in 16³¹. This should in all likelihood be explained on the ground that R^D closed his history of Samson with ch. 15, and did not admit ch. 16 into his Book of Judges. The reason is easily discovered. Down to the close of ch. 15 Samson is the husband of one wife, and love to her along with love to his native land is the motive of all his actions. But in ch. 16 he appears as the slave of sensual passion, caught in the toils of a succession of paramours, to the last of whom he even betrays the secret of the Divine strength that animated him. If this itself must have appeared to the mind of R^D quite unworthy of a God-called judge (cf. 2¹⁶. 18¹), his fate also was an unfitting one, namely that he should end his life as prisoner and slave of the unbelievers. Hence R^D excluded ch. 16 in the same way as ch. 9 (the story of Abimelech). He was indifferent to the circumstance that thus the account of Samson's death disappeared; neither is there any mention of the death of Barak or of Deborah, and only a supplementary allusion to that of Ehud (4¹). It was not till the last redaction of Judges that ch. 16 was once more united with the preceding chapters, but the first concluding formula (15²⁰) was still piously allowed to remain. How much of the minor alterations of the old text is to be attributed to this last redaction, cannot be determined.

iv. THE HISTORICAL BACKGROUND.—The tribe of Dan, to which Samson belongs, possessed not only one tribal territory, but two,—the one west of Jerusalem, situated between Benjamin and Judah; the other in the extreme north, at the lower sources of the Jordan, bordering upon the territory of Naphtali. Samson comes from the southern territory; his native town Zorah (זֹרָה), one of the principal places belonging to the tribe (Jos 19⁴¹, Jg 18²⁵. 11, cf. also Neh 11³⁰), still bears the same name at the present day. It lies on the northern slope of the fertile *Wady es-Surar*, through which the railway from Jaffa to Jerusalem now runs, opposite the ancient Bethshemesh (cf. G. A. Smith, *HGHL* 218f.). But the question is, whether Samson lived (or is supposed to have lived) *before* or *after* the emigration of the 600 Danites who founded the northern settlement of the tribe. The history of this expedition is given summarily in Jg 18²⁴ (to be supplemented by Jos 19⁴⁷ [LXX]), and in full detail in

Jg 17. 18. Since the account of it in the last-mentioned two chapters is preceded by the story of Samson, one might be disposed at first to decide for the former of the above alternatives. But it must not be forgotten that chs. 17-21 are appendices to the Book of Judges, and that their present position tells us nothing about their order in time. When the 600 Danites struck off to the north, their tribe was still contending for its independence, although with little prospect of being able to assert it. The braver and more resolute members of the tribe having taken their departure, the remnant will have abandoned all further struggle and rested content that their foreign lords should leave them in possession of the soil, probably upon condition of paying tribute. But this is the condition of things which we meet with in the story of Samson. The Philistines have penetrated far into the Shephelah, Timnah (the modern *Tibne* only 4 or 5 miles S.W. of *Ṣor'a*) belongs to them. Between them and the Danites there is no state of war, but unrestricted intercourse, *conubium* and *commercium*—nay, the whole life of the Danites appears to gravitate towards the Philistine cities. The power is entirely in the hands of the Philistines: when Samson gets into trouble with them, his native town cannot shelter him. But even the territory of Judah, to which he flees, offers no security, for it, too, is subject to the Philistines, as its inhabitants (Jg 15¹¹) expressly affirm as a fact generally recognized. Samson's own demeanour is not at all that of an enthusiast for political independence and deliverer of his people from the Philistine yoke. He belongs, on the contrary, to that class amongst his countrymen who are disposed to modern and liberal ideas, and who have no scruple about entering into relations with the Philistines and even connecting themselves with them by marriage. This strange conduct is already excused and explained in Jg 14⁴ as being in obedience to a Divine commission, in order that Samson might find an opportunity of damaging the Philistines. But this verse does not belong to the oldest form of the narrative, and is actually contradicted by other passages. Samson himself offers to the Judahites (15¹¹) the excuse that he had not attacked the Philistines, but simply requited the wrong done to him by them. And in precisely the same fashion he always asserts his innocence to himself and to his enemies (cf. 15^{3, 7}): if they would only leave him in peace, they should be safe from him, so he thinks at least. In the case of all his exploits, then, we have to do not with conscious attempts to deliver Israel, but only with the involuntary uprising of a subject people against the alien and unloved oppressor, with little 'pin-pricks,' each of which is regarded as a heroic deed and greeted with malicious joy. But ten hot-blooded and foolhardy Samsons would not have been able to loosen the chains of Israel's bondage. This was only accomplished when the Philistines, who had ventured to attack the kernel of the Isr. territory, were, after some initial successes (1 S 4), completely beaten by the uprising of Mt. Ephraim (1 S 13) and afterwards of all Israel under the leadership of Saul and David, and driven back within their own narrow territory. By means of these wars Samson's home became once more free, and a permanent possession of Israel. The Samson stories are probably intended, then, to be understood as belonging to the period which immediately preceded the Philistine war of 1 S 4, and are thus, apart from the appendices Jg 17-21, in the right place. That implies at the same time that the tradition, at first oral, embodying them must also go back to the same period. In a later age there was no possibility of their arising.

v. HISTORICAL IMPORTANCE.—According to the scheme of the Book of Judges as its programme is set down by the Deuteronomic redactor in Jg 2^{11a}, Samson was 'raised up' by Jahweh to be 'judge' over all the children of Israel, in order to deliver them from the rule of the Philistines, to which Jahweh had given them over on account of their unfaithfulness (cf. 13¹). We saw that in the case of Samson there can be no mention of such deliverance, and just as little of an activity on behalf of, or any judgeship over, the whole of Israel. What we are told of him, at all events, claims nothing more than quite a local importance. We need not wonder, then, that R¹⁰ left out ch. 16 (see above), but only that he allowed Samson to pass as a 'judge' at all. But this may be explained as due to the example set in the pre-Deuteronomic Book of Judges, the work of R¹² (cf. Budde, *Kurzer Hdcom.* x ff., xv f.). The rank of a divinely-sent judge could not be henceforward taken from Samson. His credentials rest especially on ch. 13, the Divine promise and wonderful accomplishment of his birth. We shall have to regard the whole of this chapter as a later addition to the particular Samson narratives which were gathered from the mouth of the people and lie before us in chs. 14-16. As a literary composition, however, that chapter need not be more recent than these others. It is worthy of note that even it still confines the historical importance of Samson within very narrow limits. All that is said of him in v. 5 is that 'he shall begin to deliver Israel out of the hand of the Philistines.'

vi. SIGNIFICANCE FOR THE HISTORY OF RELIGION.—The glaring contradiction between the Divine call of Samson and his far from exemplary manner of life caused much racking of the brains and much offence to the older theologians. A correct judgment of his personality is possible only when, on the one hand, we leave out of view the Christian standard of morality, and when, on the other, we take into account that Samson was originally not a religious but a popular hero. Still there remains even in the oldest strata of the narratives one religious trait, and it is this which has made it possible to represent him as under theocratic enlightenment. Any endowment beyond the ordinary human standard, or any conduct quite opposed to what is otherwise recognized as the character of a person, is explained in antiquity, and so also in the OT, as due to a superhuman being, a spirit, having taken up its abode in the person. On this account all who are mentally deranged are supposed to be the dwelling-place of a spirit, by whom they are possessed. In this way also the superhuman strength of Samson is explained; and as the Philistines, the enemies of Israel, suffer through his deeds, the spirit which works through him is the spirit of Jahweh, the God of Israel. The last verse of ch. 13 notes the first occasion upon which the spirit of Jahweh moves him, without telling us how this working showed itself. In 14^{6, 19} 15¹⁴ 'the spirit of Jahweh came upon him' to enable him to perform the greatest feats of strength. It is noteworthy, however, that this expression is wanting in 14⁶. This appears to point to a different way of viewing the matter, and, as this same way entirely dominates ch. 16, it may be regarded as the more original. According to Samson's own statement in 16¹⁷, which is confirmed by vv. 20, 23, his strength is not a new thing every time, imparted at the moment of need through his being filled with the Divine spirit, but is a constant possession, connected with the hair of his head, on which no razor comes, because from his mother's womb he has been a consecrated one of God, a Nazirite (נָזִיר).

The Nazirite is a religious institution of undoubtedly the highest antiquity; it is named as early as Am 2:11, along with prophecy, as one of the special blessings which Jahweh has bestowed upon His people. At the same time it persisted in Israel down to the days when Israel's religion had undergone a great spiritualizing, for not only do we find it in Nu 6 in the legislation of the post-exilic period as a firmly established sacred usage, but we meet with its practice in Jerusalem at the temple even in the time of the Apostle Paul (Ac 21:23). But in the OT Samson is the only Nazirite we encounter; for the consecration of Samuel is of quite a different character, and the words 'and there shall no razor come upon his head' in 1 S 11 certainly do not belong to the original text. From the story of Samson, now, we can gather that the essence of the Nazirite vow consisted simply in allowing the hair to grow. At the expiry of the period fixed for the vow the hair was shorn by the priest and cast into the sacrificial flame (Nu 6:18, Ac 21:24). Even Samson's lifelong Nazirite (Jg 13:7) can scarcely be understood as implying that he is to carry his hair with him down to the grave, but rather that he has it shorn from time to time, and each time consecrates the shorn hair to Jahweh. But, as the Nazirite bears the God-consecrated offering upon his head, he naturally requires to keep his body, which ministers nourishment also to the hair, pure from everything that is repugnant to the Deity. The regulations on this subject will undergo change and enlargement with the times; the prohibition of wine (including, no doubt, all intoxicating liquors) belongs certainly to the oldest state of things, and is witnessed to already in Am 2:12. An intoxicated man is possessed by another spirit which disputes God's authority. Samson, indeed, does not impress us as one who practised self-restraint in any direction; his taking food from the carcass of the lion (Jg 14:8) is directly opposed to the enactments of Nu 6:24, for the term 'dead body' there certainly includes *a potiori* the carcasses of animals. But from these contradictions between the Samson story and the Nazirite law we can only conclude that the story does not proceed throughout on the presupposition of his being under a Nazirite vow. The contradictions must have been early observed, and this explains why what was wanting in the case of Samson himself, namely abstinence from wine and from unclean food, is compensated for in 13:14 by attributing this abstinence to his mother for the period of her pregnancy.

According to ch. 16, Samson's strength resides in the unshorn hair of his head, a belief which in the case of the Nazirite is explained by the consecration in virtue of which Jahweh Himself dwells in the hair consecrated to Him. Amos, too, appears to attribute special powers to the Nazirites (2:11), but what is the nature of these we are not told. But the notion that some mysterious power resides in the hair, apart even from such special consecration, is extraordinarily widespread. A large collection of facts directly connected with supposed active and passive bodily powers may be found in J. G. Frazer, *The Golden Bough*, iii. 380 f. The Sunda Isles of the present day contribute much material to this collection, but so also does Europe of the Middle Ages, especially in the matter of processes against witches. The reader may note also what is said in the same work (l. 370 ff., cf. also p. 81) about letting the hair grow, and about the dangers connected with the cutting of it. The fear of these rises to such a pitch that, for instance, the chief of the Nanosi upon the Fiji Islands, every time he had his hair cut, had to devour a man, in order to ward off the dangers which threatened him. We have therefore to do here with convictions diffused over the whole world, and which certainly go back to very early times. Even in Israel they must have been much older than the religion of Jahweh, but they were brought within its scope in the form of the Nazirite. From the story of Samson and from Am 2:11 we may infer with some probability that Israel was conscious that the blessing of the Nazirite gave them an advantage over the Philistines and the Canaanites; and if that is so, we must hold that the Nazirite was established in Israel prior to the conquest of Canaan.

vii. SIGNIFICANCE FOR THE HISTORY OF CIVILIZATION.—The story of Samson is specially important from this point of view. Above all, we see from it that the ideal of the country hero was exactly the same in Israel then as it is at the present day. The lion of a village must be first in success with the female sex, first in bodily strength, courage, and fondness for brawling, and first in mother wit. Samson displays the last-named quality in his riddle (ch. 14), in his ever-varied devices against the Philistines, and in the witty fashion in which he ever anew deceives Delilah. Veracity by no means belongs to the list of virtues of the country hero, and as little does faithfulness in love. Excess, or at least enormous capacity in eating and in drinking strong liquors, is amongst the things that may almost be taken for granted. It is strange enough that this trait is not strikingly displayed in Samson. Who knows whether from

* How large a part was played by the hair-offering in the life of ancient peoples, especially of the Semites, may be learned from W. B. Smith, *KS* 2 325-334, cf. also p. 482 ff.

the store of legends that circulated regarding him there may not have been dropped this or that portion dealing with the subject in question? As to the matter of his enormous bodily strength, every village, or at least every shire, has still its Samson, whose displays of strength, as recorded in popular stories, speedily go, without the calling in of any superhuman causes, beyond what is possible for man. Many of our readers, especially those who have been brought up in the country, will be able to substantiate what we have said. Such conditions of life, which we can still detect everywhere, are the earliest soil of the Samson stories; everything else is only secondary.

We have, further, in ch. 14 a graphic description of the wedding festivities in ancient Israel, the only one which has come down to us. We see from it that on such occasions the proceedings were essentially the same as in the modern East, and, in some important points, even the same as at our own Jewish weddings. There is a seven days' feast (v. 17), above all with plenty of eating and drinking of wine (נָשַׁח), in which the whole community takes part. The thirty companions (v. 11), with their head, who is probably meant in 14:20 and 15:2, are the conductors of the bride (cf. the 'sixty valiant men' of Solomon in Ca 3:7, and the 'friend of the bridegroom' in Jn 3:29). They would have to defray the expenses of the wedding, as is still the custom in Syrian villages. Samson and the young wife would, as is also the custom there, be called 'king' and 'queen' during the seven days (cf. Budde, *Kurzer Hdcom.* xvii. p. xvii f.). Samson's riddle is only a small part of the amusements of all kinds—songs, dances, games, stories—with which the seven days were filled up.

Although, however, the practices at Samson's wedding are the same as are usual elsewhere, the same cannot be said of the character of the marriage itself. From 15:1c it is plain that the young wife did not go after the marriage to Zorah to Samson's house, but remained in the house of her parents at Timnah. And even if this might appear to be explained on the ground that Samson, according to 14:19b, parted from her in anger instead of personally accompanying her in stately procession to Zorah (cf. 14:1), there is not the slightest hint in 15:1c that he purposed subsequently to take her home to Zorah, but only that he meant to visit her in her parents' house. Nor does the kid which he takes with him appear to be an extraordinary present for a special purpose, such as to make up for his anger of 14:19, but seems rather to belong to the visit as such. If all this be so, then we have to do with that peculiar ancient form of marriage to which W. R. Smith (*Kinship and Marriage in early Arabia*, pp. 70-76) gave the name *sadika* marriage. It answers to the ancient social institution of the matriarchate, under which the wife remains with her relations, the husband visits her there, the children belong to the tribe and the family of the mother. One-sided dissolution of such a marriage and the contracting of another (cf. Jg 15:2) by the woman is also witnessed to amongst the Arabs (l.c. p. 65). If Samson's marriage is to be understood in this way, this does not of course imply that at the time when these stories took their rise all marriages in Israel were of the *sadika* type. But we learn again from the ancient Arabic materials collected by W. R. Smith, that, even when the later form of marriage had come to prevail, such *sadika* marriages were still contracted when the ordinary marriage was not possible, as, for instance, between members of hostile tribes (l.c. p. 71 f.). This may be the explanation in the case before us, where a man belonging to the territory of Israel, which was subject to the Philistines, seeks in marriage a girl of the ruling people. We should perhaps adopt a similar interpretation when it is said that Gideon had a concubine in Shechem (Jg 8:31), which still belonged to the Canaanites; and when Abimelech, her son, speaks of himself as a Shechemite and not as an Israelite (9:2). If any one thinks it worth while, he may, upon the ground of this ancient social custom, view more mildly even Samson's relation to Delilah in 16:4. It is surprising indeed that at such a marriage the festivities described in ch. 13 should be the same as at the marriages which constitute the man the possessor (נָשַׁח) of the woman; but it may well be that different points of view have here become confused.

viii. MYTHOLOGICAL TRACES.—Samson's extraordinary strength, which he displays in a number of feats, led even in olden times to a comparison of him with Hercules, and recently such comparisons have gone the length of vain attempts to count up exactly twelve exploits of Samson. After it came

to be recognized or believed that the Hercules legend is a solar myth, many in our own century proceeded to take the story of Samson also as a sun-myth, and to interpret it so in detail. The derivation of the name שמש from שפף tells indeed rather against than in favour of this view, for it is not the way with a nature-myth to borrow or even to derive the name of its hero from the cosmical object which it describes. The derivation from *Beth-shemesh* is a much more natural one. But such mythical explanations are not capable of being refuted in detail, because the elements with which they operate are so simple that any one so disposed may find them in any history, and for the most part in opposite ways. At all events, the strength of Samson requires no such explanation; on the contrary, it is explicable, as we saw, by considerations drawn, on the one hand, from the history of civilization, and on the other from religion. And it is equally certain that none of the narrators of the story is conscious that he is handing on a myth; the features of the contemporary history and civilization are very clearly marked. This does not prevent the supposition that mythical traits may have found their way into these popular narratives. Undoubtedly a *topological* [Gunkel, *Genesis*, p. xv, incorrectly gives this the name 'geological'] motive for a legend appears at work in 15¹⁷, where the name 'Height of the Jawbone' is to be explained. It is quite remarkable, too, that the fire-brand foxes (15¹⁴) recur in Ovid (*Fasti*, iv. 679 ff.) in the Roman cultus, and are explained (*ib.* 701 ff.) by the act of a mischievous boy which exactly resembles the act of Samson. But, in this instance at all events, we have not to do with a solar myth; the reader may be reminded how in Poitou 'the spirit of the corn appears to be conceived in the shape of a fox' (Frazer, *l.c.* ii. 283; cf. the whole chapter entitled 'The corn-spirit'). The attempt to give a continuous mythological interpretation of the story of Samson is therefore to be abandoned, although there are various points in it besides the above which may profitably be examined from this point of view.

LITERATURE.—The Comm. on *Judges*, esp. those of Moore, in *Internat. Crit. Com.* 1895; Budde in *Kurzer Hdkom.* 1897; Nowack in *Hdkom.* 1900; and the authorities cited in these. The older literature will be found in Winer's excellent art. 'Simson' in his *RWB* 3, 1848. K. BUDDÉ.

SAMUEL (שמואל, Σαμουήλ).—The meaning 'name of God,' which is now generally accepted, is the only one that can be upheld on philological grounds. The author of the early history of Samuel obviously connects the name with the circumstances of Samuel's birth as if שמואל = שאל (1²⁰ 'and she called his name Samuel, saying, Because I have asked him of the Lord'); but it is impossible to regard this explanation as giving the actual derivation of the name. As is not infrequently the case in the OT, 'the writer merely expresses an assonance, not an etymology, i.e. the name שמואל recalled to his mind the word שאל asked, though in no sense derived from it' (Driver, *Text of Sam.* p. 13 f.). The derivation 'heard of God' (לֹא שָׁמַע) is also etymologically improbable.*

The history of Samuel as set forth in the first Book that bears his name contains so many dis-

crepancies not only as regards the history of the period, but also as regards Samuel's character and position, that it is impossible to assign it to a single author. These inconsistencies can be explained only on the theory that we have two accounts of the history of Samuel, which have been combined by a later editor (see following article). In order, therefore, to obtain a clear conception of the life and work of Samuel, it is necessary to treat the two sources separately.

In the earlier of the two documents from which the Books of Samuel are mainly compiled, Samuel first appears in connexion with the election of Saul as king at Gilgal (9^{1f.}). He is there described as 'a man of God' (9⁶), or, more accurately, as a *seer* (שֵׁנִי) as opposed to מְנַבֵּא, a prophet, (9⁹), living in the land of Zuph (probably in the hill-country of Ephraim). The narrative opens somewhat abruptly with the story of Saul's search for the asses of his father. After three days' search Saul is on the point of returning homewards, when he is urged by his servant to consult the man of God living in that district (it is not until v. 15 that we learn his name). Saul's objection, that the seer will certainly expect a present, is met by the servant producing the fourth part of a shekel. They accordingly enter the city and inquire for the seer, whom they meet on his way to the high place. The meeting, however, was no accidental one, for Samuel had been divinely prepared on the previous day for the coming of the Benjamite stranger, and had been instructed to anoint him to be prince over Israel; for, said Jehovah, 'he shall save my people out of the hands of the Philistines.' Samuel accordingly invites Saul to the sacrificial meal, at which a place had been reserved for him, and on the following morning privately anoints him, and informs him at the same time of his Divine mission to deliver Israel from its oppressors. He adds, further, three signs by which Saul may prove the truth of his words, and bids him do as occasion serves him when these have been fulfilled. The signs are fulfilled, and shortly after Saul's return to his father's house the occasion foretold by Samuel presents itself in connexion with the siege of Jabesh-gilead by Nahash the Ammonite. Saul's prompt and successful action in relieving the besieged city arouses the enthusiasm of his countrymen, who crown him king at Gilgal.

The comparatively subordinate position occupied by Samuel, according to this older narrative, and the limited extent of his influence on the affairs of the nation, stand in striking contrast to the traditional view of his life and work. He is here represented as the seer of a small town, who is consulted in matters of difficulty and perplexity by the inhabitants of the district in which he lives, and who is in charge of the local shrine: beyond this district he is unknown to the rest of Israel. Further, his chief claim to fame lies in the fact that on one occasion only he is chosen by Jehovah as His instrument in carrying out His plans for the deliverance of Israel. Lastly, it is noticeable that he has no voice in the establishment of the monarchy; his interest in the matter apparently ceases with the performance of his part in anointing Saul; nor does he appear to have been consulted in the actual election of the king. It cannot, however, be doubted that this older document has been preserved to us only in a very fragmentary form; and we may infer with considerable probability that it originally contained a longer and fuller account of the life and work of Samuel, which was passed over by the editor in favour of the (from his point of view) more satisfactory account preserved in the later document. The explanation of this selection is furnished by the later document, which is obviously coloured by the views and conceptions of a later age, and as such approximates more closely to the standpoint of the editor who combined the two narratives. It remains, therefore, to examine the narrative of the later document, and to estimate how far we can utilize it for the purpose of supplementing the earlier account.

The later narrative commences with the birth of Samuel, and relates how Hannah, the barren wife of Elkanah, on the occasion of the yearly feast made a solemn vow to the Lord that if He would look upon her affliction and give her a man child, she would dedicate him to the service of the sanctuary. Samuel is born in answer to her prayer, and in due time handed over to the care of Eli, the aged priest at Shiloh. His childhood is thus spent within the precincts of the ancient Israelite shrine,

* In a recent article on 'The Name of Samuel and the Stem שָׁמַע' (*JBL*, vol. xix. pt. i.), M. Jastrow, jr., maintains that the first element (שָׁמַע) of the compound name *Shemuel* should be rendered 'offspring' rather than 'name,' on the analogy of the Assyrian *shumu*, which occurs frequently in the former sense in proper names (*Nebu-shum-ukin*, *Bel-shum-ugur*, etc.): he explains Samuel therefore as 'son of God,' and compares the correlative *Abiel*. There is, however, no evidence to show that the Heb. שָׁמַע ever bore this meaning: the passages cited by Jastrow in favour of it readily admit of the usual signification.

where 'he ministered to the LORD before Eli the priest' (21), and 'grew in favour both with the LORD and also with men' (29b). But the sons of Eli, who in the natural course of events would have succeeded their father, proved unworthy of their sacred office, and provoked the wrath of Jehovah by their abuse of their priestly privileges. In consequence of their sin the destruction of the house of Eli is decreed by Jehovah, who announces His purpose to the youthful Samuel in a vision of the night. The favour of Jehovah, however, which is openly displayed towards the latter, makes it apparent that he has been chosen to succeed to the priestly office, and all Israel recognized 'that he was established to be a prophet of the LORD': for through his agency the word of the LORD was revealed to all Israel (32-41a). In the history of the defeat of Israel at Aphek, and of the capture and restoration of the ark by the Philistines (42-71), there is no mention of Samuel, who is suddenly re-introduced some time after the return of the ark, in the character of a 'judge,' rather than in that of a 'prophet' or 'priest' (72c). Like a second Moses, he is represented as exhorting the people to turn from their idolatrous practices and to serve Jehovah alone. The people hearken to his words, and in order to confirm their resolution he summons a national assembly at Mizpah, where they make public confession of their sins. The purpose of this gathering, however, is misunderstood by the Philistines, who at once collect their forces to meet what appears to them as a national uprising. Dismayed by the approach of their hereditary enemies, the Israelites beseech Samuel to intercede with Jehovah on their behalf. In answer to Samuel's prayer, Jehovah sends a violent thunderstorm, which scatters the Philistines, and renders them an easy prey to the pursuing Israelites. To commemorate their deliverance, Samuel sets up a great stone and calls the name of it Eben-ezer, or 'stone of help.' According to the writer, this victory marks the downfall of the Philistine domination; for from that time onwards the Philistines 'came no more within the border of Israel,' while the cities 'which they had taken from Israel were restored from Ekron even unto Gath' (74). In the peaceful times that followed, Samuel is represented as administering justice throughout Israel by means of a yearly circuit of the chief sanctuaries on the west of Jordan—Beth-el, Gilgal, and Mizpah. As his years increase, he naturally associates his sons with himself in the office of judge; but, like the sons of Eli, they 'walked not in the ways' of their father. For this reason, and also because they desire 'to be like all the nations,' the people demand that a king should be set over them. Their request is viewed with disfavour by Samuel, who plainly regards it as an act of rebellion against Jehovah. But, in compliance with the Divine command, he first sets clearly before them the treatment they may expect at the hands of a king, and then, as they still persist in their demand, takes steps to grant it. For this purpose he once more summons the people to Mizpah, and, after pointing out their ingratitude, directs that lots should be cast for the king: the choice falls on Saul the son of Kish, of the tribe of Benjamin (821). Samuel now realizes that his life's work is at an end, and in a solemn farewell speech he first bids the people attest the justice of his rule, and then, by means of a brief survey of the national history, warns them against disobeying the word of Jehovah. His exhortation is rendered the more impressive by a miraculous thunderstorm, which frightens the people into a confession of their sin in asking for a king. Their fears are allayed by Samuel, who assures them of Jehovah's favour if they will serve Him truly.

The election of Saul as king, and the consequent establishment of the monarchy, seem to form a fitting conclusion to the work of the last Israelite 'judge'; but the last days of Samuel were destined to be embittered by the foolish action of the king whom he had been chiefly instrumental in appointing. In accordance with the command of Jehovah as announced by Samuel, Saul wages a war of extermination against the Amalekites, but, in deference to the wishes of his people, spares Agag the king and the best of the spoil. Samuel is divinely informed of the king's action, and openly taxes him with disobeying the commands of Jehovah. Saul seeks to palliate his offence, but Samuel ignores his excuses and announces his rejection. He thereupon confesses his sin, and begs for forgiveness; but Samuel merely reiterates his sentence, interpreting the rending of his cloak by Saul as a sign that the latter's kingdom has been 'rent' from him. In response, however, to Saul's appeal, he consents to honour him once more before the people by joining with him in the worship of Jehovah. He then lays Agag with his own hands, and departs to his house at Ramah. This incident marks the close of Samuel's public life; for 'he came no more to see Saul until the day of his death,' but remained in seclusion at Ramah (see art. RAMAH), where he died and was buried.

The above sketch of the contents of the later document shows clearly that the writer regarded Samuel as exercising a far wider sphere of influence than the unknown seer of the earlier narrative. The position, indeed, which he assigns to Samuel is that of a second Moses, who rules over the people as the representative of Jehovah, and whose mission it is to win the people from their apostasy to the service of the only true God. Further, he depicts him as exercising the office of a 'judge' (in the sense in which that term is employed in the pre-

Deuteronomic Book of Judges (2^d-16th)), and delivering Israel from the hands of their Philistine oppressors: thus Israel's desire for a king can only be explained as an act of rebellion against Jehovah.

The contrast between the two representations of Samuel is very marked, and at first sight it would appear as if the one must necessarily exclude the other. But though there can be no doubt as to the greater historical value of the earlier narrative, which bears all the marks of a high antiquity, it by no means follows that the later narrative must be rejected as unhistorical. For it must be remembered (1) that the later is not founded on, but is clearly *independent* of, the earlier narrative; and (2) that the view which is taken of the standpoint of the later author does not of necessity affect the general truth of his narrative. Hence, though the earlier narrative contains no account of Samuel's childhood, of his connexion with Eli at Shiloh, and of his intercession on behalf of the people, we have no grounds for regarding these *facts* as other than historical. It cannot be doubted, however, that the *form* in which they have been preserved to us has been largely coloured by the later 'prophetic' point of view. Interpreted by this later standpoint, the establishment of the monarchy, or rather the election of David's predecessor as king, has little to recommend it, and is not unnaturally described as one of many acts of apostasy on the part of ancient Israel. For the purpose of this narrative, it must be remembered, is *religious*; and it does not lie within the writer's scope to estimate the importance of this event in the *political* history of the nation. His interest rather centres in the person of Samuel the prophet, and there is on this account a marked tendency to magnify his office and to overestimate his influence. The extent to which this tendency has affected the narrative is illustrated in a very striking manner by the story of Samuel's intercession on behalf of the people at Mizpah (72nd). That Samuel did intercede for the people may be inferred from Jer 15¹; but that his intercession was followed by the subjugation of the Philistines (74) cannot be reconciled with the subsequent history (see the account of Saul's campaign against the Philistines 13th-14th, and especially 14⁸² 'and there was sore war against the Philistines all the days of Saul'). In like manner, we may conclude that the representation of Samuel as a 'prophet,' and his aversion to the monarchy, reflect the point of view of a later age, and have but little foundation in fact. Looking back over the past history of Israel, the writer clearly regards Samuel as the last of the old order of judges, and also as the forerunner of the new order of prophets. That his estimate in the main is a correct one cannot be denied: it is clear, however, that it has largely influenced his portrayal of Samuel's life and work.

In conclusion, it may be pointed out that the account of the anointing of David by Samuel (16¹⁻¹³), and the second explanation of the proverb, 'Is Saul also among the prophets?' (19¹⁸⁻²⁴), can only be regarded as late and unhistorical (see below, p. 386 f.). They illustrate that tendency to increase the importance of the heroes of the nation, and to connect them with the beginnings of later institutions, which in later times became especially characteristic of Jewish writings.

J. F. STENNING.

SAMUEL, I. AND II.—

- i. Title.
- ii. Contents.
- iii. Sources and Date.
- iv. Analysis.
- Literature.

i. TITLE.—The two Books of Samuel, like the two Books of Kings, formed originally in the

Hebrew Canon a single book called *Samuel*.* The LXX translators, however, regarded the Book of Samuel and the Book of Kings as a complete history of the two kingdoms of Israel and Judah, and divided them into four books, which they entitled 'Books of the kingdoms' (*Βιβλία βασιλειῶν*). The same division was followed by Jerome in the Vulgate, but the title was changed to 'Books of the Kings' (*Libri Regum*). The compromise which now obtains in printed Hebrew Bibles, viz. the division of the books into four in accordance with the LXX and Vulgate, and the retention of the Hebrew titles for each pair, was first adopted in Daniel Bomberg's printed edition of 1516.

The selection of the title is due to the fact that the opening chapters deal mainly with the history of Samuel, who still plays an important rôle in those that follow: the prominent part taken by him in the establishment of the monarchy may also have contributed to the choice of his name for the history of the period which is chiefly concerned with the reigns of Saul and David.

ii. CONTENTS.—In their present form the two Books of Samuel fall most naturally into four main sections: (a) I 1-15 Samuel and the establishment of the monarchy; (b) I 16-II 8 Saul and David; (c) II 9-20 David; (d) II 21-24 an Appendix. That this arrangement corresponds to the intention of a later editor is made evident by the three concluding summaries by which the various stages of the narratives are marked off, viz. I 14⁷⁻¹⁵, II 8 (of which 3²⁻⁵ 5¹⁶⁻¹⁸ originally formed part), and II 20²³⁻²⁶. Since, however, I 15 (the rejection of Saul and of his kingdom) was clearly intended to conclude the history of Saul's reign, it seems better to attach that chapter to the first, rather than to treat it as introductory to the second section.

The four main sections admit of the following subdivisions, which bring out more clearly the course of the history which they contain:—

- (a) I 1-15 From the birth of Samuel till the rejection of Saul.
 - (1) 1-7¹ Samuel's birth and childhood and the misdeeds of the house of Eli; Samuel succeeds to the office of Eli (1-4^{1*}): the downfall of the latter's house, and the capture of the ark by the Philistines (4¹⁸⁻⁷).
 - (2) 7²⁻¹⁵ Samuel as judge over Israel delivers them from their Philistine oppressors: in answer to the request of the people (ch. 8), and through the agency of Samuel (ch. 9¹), Saul after defeating the Ammonites (ch. 11) is made king. Samuel lays down his office (ch. 12), and Saul carries on a successful war with the Philistines (chs. 13, 14). After defeating Amalek, Saul is informed by Samuel that Jehovah has rejected him because of his disobedience, and will give his kingdom to another (ch. 15).
- (b) I 16-II 8 From the first appearance of David till he is firmly established on the throne of Israel and Judah.
 - (1) I 16-31 History of David during the reign of Saul. He is secretly anointed by Samuel, and enters the service of Saul (ch. 16). By his success as a warrior he endears himself both to the royal family and to the people, but excites the jealousy of the king, whose attempts on his life compel him to flee from the court (17-22). Saul tries in vain to capture David at the head of his band of outlaws (23-26). The latter finally becomes a vassal of the Philistine king (chs. 27, 29, 30), while Saul is once more engaged in war with the Philistines, and, after a vain attempt to obtain a Divine oracle (ch. 28), perishes with his sons at the battle of Mt. Gilboa (ch. 31).
 - (2) II 1-8 David's lament over Saul and Jonathan (ch. 1). In the civil war which ensues between David and the house of Saul, the former proves victorious, and finally becomes king over Israel and Judah (2-5⁵). He captures Jerusalem, and succeeds in throwing off the Philistine yoke (ch. 5). The ark

is brought to the capital (ch. 6), and the permanency of the Davidic dynasty assured (ch. 7). Concluding summary of David's reign (ch. 8).

(c) II 9-20 Further history of David's reign.

(1) 9-12 David's kindness to Meribbaal, the son of Jonathan (ch. 9): the war with Ammon, and David's great sin (10-12).

(2) 13-20 Absalom's rebellion (13-19), and the revolt of Sheba (ch. 20).

(d) II 21-24 The Appendix, consisting of—

(1) historical incidents: the Gibeonites and the house of Saul (21¹⁻¹⁴); exploits and lists of David's heroes (21¹⁵⁻²² 23²⁸⁻³⁹); the census (ch. 24).

(2) poetical fragments: a psalm of David (ch. 22), and David's 'Last Words' (23¹⁻⁷).

The history set forth in these books extends roughly over a period of a hundred years, during which Israel gradually emerged from the condition of national disintegration and anarchy, described in the Book of Judges, and acquired a definite national existence. The establishment of the monarchy was at once the external sign of the union which was effected between the hitherto scattered tribes, and the means by which it was brought about. Hence the main interest of the history naturally centres round the persons of Samuel, Saul, and David, who were the principal agents in the work of consolidating the kingdom.

iii. SOURCES AND DATE.—The Books of Samuel in their present form afford a striking illustration of the methods of Hebrew composition. An examination of their contents at once reveals the fact that their author, after the manner of Hebrew historians, has made use of previously existing documents, which, though covering the same ground, yet present the materials at their disposal in very different forms. The principle which he has followed in the compilation of his work is very similar to that with which we are already acquainted in those parts of the HEXATEUCH where J and E have been united by a later editor (R^{JE}) into a composite whole. In the present case we have also two narratives which together form the main bulk of the history. These narratives, however, are so obviously *independent* of one another, and so clearly distinguished by their different *point of view*, that there is now considerable unanimity among critics with regard to their respective contents. Moreover, throughout the main section of the Books of Samuel, the editor or redactor has made but little effort to harmonize the varying accounts of the incidents which he relates, and has contented himself, for the most part, with reproducing in a twofold form the leading events in the history of Saul and David. Hence arises that *duplication of incidents* which is especially characteristic of the composition of the greater part of the history from I 7-II 8. Thus we find *two independent* accounts of the choice of Saul as king and of his rejection. In like manner the compiler has preserved to us a double account of David's introduction to Saul, and of his flight from court; of the sparing of Saul's life by David, and of the latter's flight to the Philistines; and, lastly, of the death of Saul.

In nearly all these cases (to which others might be added) both accounts have been preserved almost entire, and the redactor has not attempted to connect them by other than the slightest of links: in a few instances, however, he would seem to have shortened or condensed the one narrative while transcribing the other in full; in no case has he welded the two together in such a manner as to render analysis impossible.

It remains, therefore, to investigate these two sources, and to consider their probable origin and source. In this connexion our chief if not our only guide is the *difference in point of view*; but this, as we have said, is so clearly marked that we have no difficulty in determining the relative ages of the two narratives. On the one hand, in what

* This is shown by the presence of the concluding notes of the Massora at the end of 2 Samuel. Further, Origen, who is cited by Eusebius (*HE* vi. 25), attests the same fact: *βασιλεὺς πρῶτον, δεύτερον, παρ' αὐτοῖς τῶν Σαμουὴλ, ὁ θεολόγος*; and, similarly, Jerome (*Prod. Gal.*) mentions *Samuel, quem nos regnorum primum et secundum dicimus*, as the third of the prophetic books.

we may provisionally call the *older* narrative, we have a simple, straightforward history, which, from its graphic style, and its vivid description, as well as from its *religious* conceptions, manifestly belongs to a period of great antiquity. In other words, we have a natural representation of the state of society and of religion which existed in the early days of the monarchy, closely akin to that which we find in the earlier portions of the Book of Judges. The *later* narrative throughout is obviously coloured by the religious teaching of a later age, and the standard by which the various incidents are judged is that of a period subsequent to the prophetic teaching of the 8th century.

Kuenen (*Hist.-Krit. Einleitung*, I. ii. p. 46 f.) and Wellhausen (*Composition*, p. 238 f.), who are followed, at least as regards 1 S 7. 8. 10^{17a}. 12, by Löhr, held that this later narrative was derived from a Deuteronomistic source; but Cornill and Budde have shown conclusively that it is marked, at any rate in part, by a close affinity to E. The great similarity of this narrative, both in language and style, to the E of the Hexateuch, has led these critics to regard it as a continuation of that source. Budde, indeed, goes further, and assigns the earlier narrative to the older source J, supposing that the two sources were welded together by R^{JE}, and afterwards edited by a Deuteronomistic redactor. Antecedently, no doubt, this theory, which presupposes that the Hexateuchal sources J and E did not cease with the conquest of Canaan, but continued the history down to a later date, if not to their own day, has much to commend it (see Moore, *Judges*, p. xxv f.), but a closer examination of the resemblances between these two narratives and the Hexateuchal sources does not establish their identity.

The question at issue may be briefly described as follows:—Excluding for the time being 2 S 9-24 (see *Analysis*), we find that the main bulk of the history contained in 1 S 1¹⁻² S 8 has been preserved in a double series of narratives, which practically cover the same ground. These two narratives are obviously independent of one another, and are clearly distinguished by their *point of view*, and in part also by their *literary style*. The latter feature, however, is more especially prominent in the first incident (the election of Saul, 7-12), which is preserved in common by both narratives. Here, as Cornill and Budde have shown (see, however, Löhr, p. xxii f.), the later narrative (7. 8. 10^{17a}. 12) presents noticeable affinities with E, and has accordingly been assigned by them to that source. But it is to be noted (1) that this resemblance to E is by no means so strongly marked in the latter portions of the history, which present the same point of view, and clearly belong to the same source as ch. 7 f.; and (2) that the affinity does not exclude non-Elohistic features, notably the aversion of Samuel to the monarchy. Budde, to a certain extent, evades the latter difficulty by assigning the larger portion of the later narrative to a later recension of E (E₂), which, as he rightly recognizes, has been largely influenced by the prophetic teaching of the 8th cent., more especially by Hosea. It is clear that both Cornill and Budde go too far in *identifying* the later narrative with E. That it is nearly related to E in language and thought cannot be denied, but at the most we can only conjecture that its author (or authors, for in the later narrative we can distinguish certainly two hands) belonged to the school of E, and that in writing the histories of Saul and David he was animated by a similar spirit and similar ideas. Budde's identification of the older narrative with J is closely connected with his view of the source of the later narrative. The points of contact are not so strongly marked; but if we are right in

regarding the later narrative as the work of a follower of E, we may assume with considerable probability that the older narrative was composed by a writer belonging to the school of J.

The older narrative may be assigned approximately to the 9th cent., while the earlier stratum of E (Budde's E₁), which, though old, yet treats the history from a more subjective standpoint, dates probably from the following century. The later stratum (or strata) of E (E₂) has, as we have seen, been influenced by the teaching of the prophets of the 8th cent., and will belong to the end of the 8th or to the beginning of the 7th cent. As in the Hexateuch and in Judges, these sources were combined and welded together by a later editor (R^{JE}), who has, however, carried out his work in a less thorough manner. His work is in any case prior to the reforms of Josiah (B.C. 621) and to the influence of Deuteronomy, and must be placed in the 7th cent. The present form of the Books of Samuel is largely due to an author of the Deuteronomistic school, whose hand may be clearly traced in the concluding summaries (I 14¹⁷⁻²¹, II 8), and in various chronological notices (I 7² 13¹, II 21^{10a}. 11 5⁴. 8). To him also we probably owe I 2²⁷⁻²⁸ and II 7, while he has expanded other passages (mainly belonging to E₁) which lent themselves to this treatment, e.g. I 3. 12, II 8. 12^{10f}. Lastly, he appears to have omitted II 9-20 as incompatible with his view of the history (compare the very similar action in the Book of Judges *), though these chapters undoubtedly belong to the older narrative of J. The older work of J^E, however, was not entirely superseded by the later recension; hence a later editor of the 5th or 4th cent. was able to utilize the earlier form of the two books, and, as might be expected, restored those parts of J^E which D had excluded. He not improbably also transposed II 3²⁻³ 5¹³⁻¹⁶ from their original position after II 8⁴. The obviously late insertions I 16¹⁻¹³ 17¹². 13 19¹²⁻²⁴ 21¹¹⁻¹⁶ may have been added at this time, or possibly even later. Finally, the Appendix (II 21-24), a collection of miscellaneous fragments belonging to different periods, and the Song of Hannah (I 2¹⁻¹⁰), were added after the separation of the Books of Samuel from the Books of Kings.

Though we do not accept Budde's identification of the older and later narratives with J and E of the Hexateuch, we have retained these symbols as representing approximately the age and characteristics of the two sources from which the history of these books is derived. Apart from minor interpolations and additions, the parts belonging to the respective sources are as follows:—

- J I 9¹⁻¹⁰. 9-16 11¹⁻¹¹. 15 13^{1-7a}. 15b-18 14¹⁻⁴⁶. 22 16¹⁴⁻²³ 18⁵. 6 (partly). 11. 20-30 20¹⁻¹⁰. 18-30. 42b 22¹⁻⁴. 6-18. 20-23 23^{1-14a} 26. 27. 29-31, II 1¹⁻⁴. 11. 12. 17-27 21¹⁻⁹. 10b. 12-32 3. 4. 5¹⁻³. 6-10. 17-25 6. 9-11. 12¹⁻⁹. 13-31 13¹ 20²².
- J₂ I 10⁸ 13^{7b-18a}. 19-22.
- E I 1¹⁻²⁸ 21^{1-22a}. 23-28 3^{1-41a} (all E₂) 4^{1b-7} 7²⁻⁸ 12^{10a}. 10¹⁷⁻²⁴ (E₂) 12. (E₂) 15²⁻³⁴ 17¹⁻¹¹. 14-55 18¹⁻⁴. 13-19 19¹. 4-6. 8-17 21¹⁻⁹ 22¹⁹ 23¹⁹⁻²⁴ 25. 23, II 1⁶⁻¹⁰. 13-16 7.
- R^{JE} I 10²⁵⁻²⁷ 11¹²⁻¹⁴ 15¹ 18^{21b} 19². 3. 7 20¹¹⁻¹⁷. 40-42a 22¹⁰ (last cl.) 23^{14b-18} 24¹⁶ (in part) 20-22, II 1⁵.
- R^D I 4¹⁸ (last cl.) 7² (in part) 13¹ 14²⁷⁻³¹ 23⁵. II 21^{10a}. 11 5⁴. 8 (based in part on older materials) 12¹⁰⁻¹².
- Additions of the latest editor, I 4¹⁵. 22 6^{11b}. 15. 17. 18. 19 (the larger number) 11^{5b} 15⁴ (last ed.) 24¹⁴ 30⁵, II 3³⁰ 5⁴ (last cl.) 7b. 8b 15²⁴ (in part) 20²³⁻²⁵.

* The Deuteronomistic redactor of the Book of Judges omitted 11-20 9. 17-21, perhaps also ch. 16 (see SAMSON, p. 378b).

Latest additions, I 21¹⁰⁻¹², 22^b 16¹⁻¹³ 17^{12, 13} 19¹⁸⁻²⁴ 21¹⁰⁻¹² 22^b, II 14²⁸, and the Appendix 21-24.

iv. ANALYSIS.—(a) I 1-15.—From the birth of Samuel to the rejection of Saul.

(1) 1^{1-4a} (E₂). Early history of Samuel, including the history of Eli and his house, and the announcement of its downfall.

These chapters serve as an introduction to 41-71, and appear to be somewhat later than that section. From their representation (1) of Samuel and his office, and (2) of Israel's subjection to the Philistines, it is clear that they both belong to E, though probably to different strata. The Song of Hannah (21-10) is undoubtedly a very late addition; (a) the Song is probably a triumphal ode composed on the occasion of some national success (vv. 4, 10); (b) there is no special reference to the circumstances of Hannah—the fact of its being attributed to her is due probably to a misconception of the metaphor employed in v. 5^b; (c) a comparison with the LXX text of 21^{1a} (= Heb. 12^{ab}) shows that the Song was inserted at a different place in that version (see Driver on 1 S 12⁸). Another insertion is 22^b (from and how that); it is out of place after vv. 12-17, and is omitted by the LXX (note the use of הָיָה instead of הָיָה). The announcement of the anonymous prophet (27-30) cannot also in its present form belong to the original narrative: (a) the text, especially of vv. 31-33 (LXX omits v. 31^b and 32^a), is in great disorder and unintelligible; (b) the establishment of the monarchy is presupposed v. 30; (c) v. 30 clearly dates from the period after Josiah's reformation, and presupposes the central sanctuary at Jerusalem (Oort, *ThT* xviii. p. 309 f.); (d) the 'faithful priest' of v. 30 is not Samuel, as we might expect from ch. 3, but Zadok, who superseded Abiathar, the grandson of Eli, under Solomon (1 K 2²⁶). The passage, which has obviously been expanded by the Deuteronomist editor, probably foretold the destruction of Eli's house, and the succession of Samuel.

(2) 41^b-71 (E). The defeat of Israel by the Philistines at Aphek and its results, viz. the death of Eli and the capture of the ark; further history of the ark and its restoration.

In these chapters, which form a closely connected whole, it is noticeable (1) that the main interest centres in the history of the ark; (2) that Samuel is never even mentioned; (3) that the destruction of the house of Eli, which forms the real sequel to 1^{1-4a}, is treated merely as a side issue of the defeat. On these grounds it has been argued with some force that this section is independent of the chapters that precede; the latter were probably added with a view to supplementing the undoubtedly old account of the fall of the house of Eli, and of the capture of the ark. The original beginning of the section (41^b) is to be restored from the LXX (καὶ ἐγένετο ἐν ταῖς ἡμέραις ἐκείναις καὶ συνέβησαν αὐτοῖς ἀλλήλοισι τὰς πόλεις αὐτῶν Ἰερμὴλ); 41^b 18 (last clause) and 22 are rejected by most critics as redactional glosses. For the additions of the LXX in 56⁶¹, and its various readings in 64⁶, see Driver, *Heb. Text of Sam.* p. 47 f.; unless we accept the readings of the LXX, 6^a (to the land) must be rejected as a gloss; while 11^b (from with the mice) 18. 17. 18^a (to villages) 19 (five thousand men) will likewise be later insertions.

(3) 73-17 (E₂). Samuel as judge; the rout of the Philistines at Mizpah; summary of Samuel's judicial activity.

The position here occupied by Samuel is that of a judge (שֹׁפֵט), in the sense in which that term is used in the pre-Deuteronomist Book of Judges (26-163¹; see Moore, *Judges*, p. xxiii.). At his command the people put away their 'strange gods,' and assemble for repentance and fasting at Mizpah; in answer to his prayers on their behalf, the Philistines are miraculously defeated; and so complete is their defeat, that 'they came no more within the borders of Israel.' The section thus gives a similar representation of the position of Samuel and of Israel's political condition to that of the later (E₂) of the two accounts of the choice of Saul as king (8. 1017-34 12), to which it serves as an introduction. To BD is probably to be assigned the chronological note (for it was 20 years) in v. 3, the name Ebenezer in v. 12, and the statement as to Samuel's judicial work in v. 18. Ebenezer, as we know from 41⁵¹, was the scene of not Israel's victory, but of its defeat. For the linguistic resemblances to the redaction of Judges, see Driver, *LOT* p. 177 f. It seems probable that the present section has been inserted here in place of an earlier account; for, as Driver points out (ib. p. 174), 'the existing narrative does not explain (1) how the Philistines reached Gibeah (10⁶ etc.) and secured the ascendancy implied (131^{9f}), or (2) how Shiloh suddenly disappears from history, and the priesthood located there reappears shortly afterwards at Nob (ch. 22). That some signal disaster befell Shiloh may be inferred with certainty from the allusion in Jer 714 26⁶ (cf. Ps 78^{9f}). See art. SHILOH.

(4) 8-12. The twofold account of Saul as king.

The older narrative of J (91-101^b, 27^b (LXX)-111. 15) describes how Saul, the son of Kish, of the tribe of

Benjamin, in his search for his father's asses, is persuaded by his servant to consult a seer living in the district to which they had wandered. The seer is none other than Samuel, who had previously been warned by Jehovah to expect the Benjamite stranger; and had been instructed to anoint him as king, that he might deliver Israel from the Philistines: 'For,' says Jehovah, 'I have seen the oppression of my people (LXX), because their cry has come unto me' (91⁶). On the following day Samuel anoints Saul, and assures him of his Divine call by means of three signs: he further bids him do as occasion serves him after the fulfilment of the signs; for God is with him (10⁷). About a month later (10^{27b} LXX), the town of Jabesh-gilead is besieged by Nahash the Ammonite, and messengers are despatched 'unto all the borders of Israel' to obtain assistance. In the course of their journey they reach Gibeah in Benjamin, and there, as elsewhere, make known their errand. On learning the sad plight of his countrymen, Saul is at once seized with the spirit of God, and promptly takes measures to relieve the besieged city. By means of a forced march he surprises the Ammonites, and delivers Jabesh-gilead and is thereupon installed as king at Gilgal (11¹⁵).

The narrative of E (E₂) (8. 1017-34 12) offers a very different explanation of the manner in which Saul became king. After the signal defeat of the Philistines, described in ch. 7, Samuel continues to judge Israel in peace and quietness until compelled by old age to delegate his authority to his sons. But the latter prove unworthy of their high office, and the people therefore demand that a king should be set over them after the manner of the neighbouring nations. The request is viewed with disfavour by Samuel, who characterizes it as rebellion against Jehovah. At the bidding of Jehovah, however, he first sets before the people 'the manner of the king that shall reign over them' (ch. 8), and then proceeds to carry out the election of a king by lot at Mizpah (1017-21). The account concludes with the farewell speech of Samuel, in which he solemnly lays down his office, and hands over the reins of government to Saul (ch. 12).

The two narratives which are here combined are thus not only complete in themselves and independent of one another, but also mutually contradictory. In the earlier narrative (1) Samuel is a seer living in a certain district, who is unknown to the rest of Israel; (2) he is employed as the instrument of Jehovah's purpose on one occasion only; after his interview with Saul everything is left to the working of the Divine spirit in the latter; (3) Israel is oppressed by the Philistines, and cries to Jehovah for a deliverer (91⁶); (4) the establishment of the monarchy is the means chosen by Jehovah for the deliverance of His people: Samuel's attitude towards it is merely that of an on-looker. In contrast to this representation we find in the later narrative (1) that Samuel is the judge of all Israel, who rules over the people as the representative of Jehovah; (2) that in accordance with this position he hands over the reins of government to the newly-elected king; (3) that the external condition of Israel is entirely favourable: the Philistines had been finally subdued by Samuel (ch. 7); (4) that the request for a king is regarded as an act of apostasy: it is due to the desire to be like other nations, and is displeasing both to Jehovah and to Samuel.

The redactor has made but little effort to reconcile these conflicting accounts, but his hand may be traced in 10^{23-27a} and 1112-14, according to which the ceremony at Gilgal is represented as a renewal of Saul's former election at Mizpah: 10^{23b} 24^a refer back to ch. 8, and place Saul once more at Gibeah, while vv. 23^b.

* In the narrative of J it is noticeable that the name of the town in which Samuel the seer lived is never mentioned. It is probable (so Budde, but see above, p. 198^a) that the name was omitted just because it was not Ramah, the house of Samuel the judge (717 etc.). Since also the identity of Samuel with the seer is not made clear till 91⁴, it seems probable that the redactor has omitted a notice which both introduced Samuel and made known the name of his native town. In E there is no account of the anointing of Saul (cf. 12³ 'his anointing'); this was probably omitted because of the already existing account in J (101). The narrative probably also contained some notice of the confirmation of the choice of Saul as king after 10²⁴, which was omitted by the redactor in view of 1314 15.

77a with their sequel in 1112-14 are intended to explain why Saul is not recognized as king in ch. 11, and why it was necessary to *renew* the kingdom. But the warriors 'whose hearts God had touched,' and who accompanied Saul to his home, presumably as a bodyguard, do not appear in ch. 11. Again, the 'sons of worthlessness' who refuse to acknowledge Saul, and by their action, according to the view of the redactor, prevent him from assuming the kingly office, are apparently so few in number that they can be threatened with death in 1112-13; yet it is presumably on their account that the election of Saul requires confirmation. Further, these verses conflict also with the later narrative of E; for 'the manner of the kingdom' (102^a) is obviously the same as 'the manner of the king' (52^a 11), and not, as the redactor evidently implies, a codified system of laws to be observed by people and king alike. Lastly, the present position of Samuel's resignation (ch. 12), which would naturally follow after 102^a, may also be ascribed to the redactor. Minor additions due to the same hand are 82^b 92^b 'from his shoulders and upward he was higher than any of the people' (introduced from 102^b), and the explanatory note 92^c on 102^a see ch. 13. The linguistic resemblances of the later of these two narratives, partly with E (esp. Jos 24), partly with the redaction of Judges, are very marked (see Driver, *LOT* p. 177 f.). With this agrees the strong disapproval of the monarchy, which, as Budde has shown, is expressed in language that has many affinities with Hosea (see Budde, *Richter u. Sam.* p. 184 f.). That the narrative is, however, pre-Deuteronic, is shown (1) by the manner in which the author of Dt 1714-20 (the law of the king) is influenced by this narrative (see Driver, *Deut.* p. 213), and (2) by the reference in Jer 151 to Samuel's *intercession* on behalf of the people—a fact which is recorded only in chs. 7 and 12. Traces of Deuteronomic expansion are to be found in 129 (אֲנִיכִים), v. 11 (אֲנִיכִים), v. 14 (אֲנִיכִים), to the Deuteronomic redactor must also be assigned the mention of Samuel by himself (121), and the mention of the invasion of Nahash (121^a) as the motive for the demand for a king; this disagrees with 84^c, and further presupposes a knowledge of the earlier narrative (ch. 11). The similarity both in *language* and in *point of view* between the later of these two narratives (E) and the redaction of the Book of Judges has been already referred to, and shown to agree with the probable origin of that narrative. Both works are pre-Deuteronomic, and interpret history from the point of view of Hosea and the prophets rather than from that of Jeremiah and the Deuteronomist: the formula which is especially characteristic of Judges (cf. Jg 127 102^a etc.) is applied to Eli (41^b), and in a modified form to Samuel (71^b), while the use of the word 'judge' is entirely analogous to its sense in Judges. Further, as Moore (*Judges*, p. xlii f.) has pointed out, 'Samuel's speech (ch. 12), which contains a retrospect of the period of the Judges (vv. 7-11), and solemn words of warning for the future under the newly-established kingdom, is precisely the conclusion which we desire for the book of the Histories of the Judges, corresponding admirably to the parting discourse of Joshua (Jos 24) at the close of the period of the conquest' (so Graf, *Gesch. Büch.* p. 97 f., Budde, Driver). We may thus assume with considerable probability that these chapters originally formed part of E's history of the Judges, and that they were afterwards excerpted by RJE as forming a suitable introduction to the history of the monarchy.

(5) 13. 14 (J with the exception of 137^b-15a. 19-22 (J₂) 147-51 (R^p)). Saul's struggle with the Philistines. These chapters describe the revolt of the Israelites under Saul against their Philistine oppressors. The signal for revolt is given by Jonathan, who destroys the pillar (?) of the Philistines at Gibeah (see GIBEAH); the Philistines, who had doubtless heard of Saul's election as king, at once assemble their forces at Michmash on the N. side of the Wady Suweinft over against Geba (see GEBa and GIBEAH). Alarmed by the size of the Philistine army, the followers of Saul, who had retreated to Gibeah, gradually melt away until only six hundred are left (131^b); the Philistines in the meantime overrun the country in three directions. Jonathan once more takes the initiative, and by a bold stroke succeeds in overcoming the Philistine garrison at Michmash (141-14). This success is at once followed by a general attack in which Saul completes the rout of the Philistines. Jonathan unwittingly disobeys the command of his father by eating food, and is with difficulty rescued by the people from death. Apparently Saul was not in a position to follow up his victory, but suffered the Philistines to retreat to their own land (v. 46). The section concludes with the remark that 'there was sore war against the Philistines all the days of Saul.'

These chapters form the continuation of the earlier narrative (J) contained in 91-101^a 2:7-111^a 15, showing how Saul carried out the object for which he was appointed (91^b). That they do

not form the *immediate* sequel of those chapters is evident. From the description of Saul in ch. 91^c we should not expect to find him described as the father of a full-grown warrior such as Jonathan is here represented to be, and, further, the introduction of Jonathan (152) is very sudden. Presumably, therefore, the redactor has omitted the intervening narrative (possibly in favour of ch. 12), unless we suppose, with Kuenen (*Oncl.* 2 p. 51), that he has here incorporated a still earlier account of Saul's campaign. To the Deuteronomic redactor must be assigned the chronological notice in 131 (LXX omits) and the concluding summary of Saul's reign 147-51. In form the latter passage displays a marked resemblance to the framework of Judges, and, as its *contents* show, is clearly a late insertion. The victories (LXX) here ascribed to Saul (v. 47) are borrowed from the similar summary of David's reign in 2 S 8: apart from the campaign against Nahash (ch. 11) and against the Amalekites (ch. 15), Saul's reign was spent in constant warfare with the Philistines. In the view of RD the account of Saul's reign finishes here, and is followed by that of the history of David. The most probable view of the account of Saul's rejection preserved in 102 137^b-15a is that of Budde and H. P. Smith (*Samuel*, p. xxi), who regard it as a later addition inserted in the narrative of J before the union of J and E. On the one hand, the verses cannot belong to the original narrative: for (1) 102 interrupts 107 and 9, and the proper sequel of 137^a is 131^b; (2) they do not agree with the facts narrated. The command to wait seven days (109) is clearly inconsistent with the exhortation of 107; nor does the narrative of 137^a in any way establish Saul's disobedience, seeing that he waited the prescribed number of days. Again, after 131-7 we expect to find some account of Saul's retreat from Michmash to Gibeah, rather than an interview with Samuel at Gilgal, necessitating a journey to and from that place, for which there would be but little opportunity ('to Gilgal' in v. 4 is no doubt an addition, cf. 7a, 15a (LXX)). On the other hand, according to the view of the interpolator, the meeting of Samuel and Saul, described in 138^a, is the *first* after 109; hence we may conclude, with Wellhausen (*Hist.* 257 f.), that these verses are earlier than 1112-14, i.e. than the union of J and E. 139-22 may be assigned to the same hand as vv. 7-15: they interrupt the connexion, and appear to be somewhat exaggerated; the text is very corrupt.

(6) Ch. 15 (E). The rejection of Saul. The new king is bidden by Samuel to exterminate the Amalekites; but he and the people spare Agag the king and the best of the spoil, and Samuel is therefore commanded to announce to him the Divine sentence of rejection. The king endeavours to minimize his fault, but in vain. The sentence is pronounced, and Samuel himself slays the Amalekite king.

The chapter clearly forms the sequel of 7. 8. 101^a 12, describing the test to which Saul was subjected, and his failure to endure it. Samuel once more appears as the representative of Jehovah, to whose word the king has to submit, while the style and language display a close affinity with the later narrative. It cannot, however, be denied that this chapter, as opposed to 7 ff., is characterized by a somewhat different *tone*: the author, in presenting his account of Saul's rejection, has made it subservient to the prophetic lesson (Jer 72-80) which he wishes to inculcate, viz. that obedience is better than sacrifice. This desire to explain how Saul, who had been Divinely chosen, could be rejected by Jehovah, has, it would seem, led him to reconstruct and expand the narrative in a form which is scarcely consonant with the actual facts (note 'the theoretical motives assigned for the expedition vv. 2-5, and the supreme importance attached to the *principle* actuating Saul in his conduct of it v. 102^c,' Driver, *LOT* p. 178). But, though we cannot accept his treatment of the subject, there is no reason to doubt the genuineness of his facts, viz. the campaign against Amalek, the sacrifice of Agag, and the breach between Samuel and Saul. The view expressed by Wellhausen and others, that this chapter holds 'an intermediate position between the two streams of narrative already considered,' is true only to the extent that it is to be assigned to the early stratum of E (Budde's E₁). The reference to the anointing of Saul by Samuel is probably due to the redactor, and cannot be adduced as proving that the writer of ch. 15 was acquainted with 91 etc.

(b) I 16-II 8. Saul and David.

(1) 161-185. David's introduction to Saul.

The anointing of David by Samuel at the house of his father 161-13 (a late addition); J's narrative of David's introduction to Saul (161^a-23); E's account of the same (17-185).

At first sight the section 161-13, of which 1712-13 is probably a fragment, would seem, like 171^c, to belong to the series E, but a comparison of these two sections shows that the former is not presupposed by the latter: according to 1714 Jesse has only four sons, in 161^a he has eight; again, 1734 makes it evident that David's brothers had no knowledge of his having been anointed (compare also the later history of David's persecution by Saul, in which Saul alone is regarded as the anointed of Jehovah). On the other hand, the influence of 171^c is apparent in 1611-13 (cf. 1742) as well as in the general point of view. Further, the

incident is hardly consistent in itself; Samuel's fear of Saul does not agree with the character of the latter as portrayed in ch. 15, and he so far forgets it in v. 6^a as to speak openly of his mission; similarly, the sacrifice, which he alleges as the cause of his coming, is never performed. The suggestion of Budde, that the section is an unskilful imitation of 10^{14c}, inserted for the purpose of showing that David also was Divinely consecrated, is probably correct (cf. Wellh. *Hid.* p. 269 f.); to the same hand is probably due the gloss 16¹⁹ (מִן הַצֹּאֲנִים which is with the sheep).

In the earlier narrative of David's introduction to Saul he is described as a skilful musician, as 'a mighty man of valour, and a man of war, and prudent in speech, and a comely person, and the Lord is with him' (16¹⁸); he is invited by Saul to his court that he may drive away the 'evil spirit from the Lord' by his playing, and is given the office of king's armour-bearer.

According to the later narrative, during one of the many engagements with the Philistines, the army of Israel is defied for forty days by the giant Goliath of Gath. Despite Saul's promises, no one will venture to engage the Philistine in single combat, until David, the youngest son of Jesse, a Bethlehemite, who had been sent from the sheepfold on an errand to his brethren in the army, expresses his willingness to accept his challenge. Saul at first seeks to dissuade him on the score of his youth, but afterwards gives his consent, and offers the loan of his armour. After a vain attempt to wear the armour, David goes forth to the encounter armed only with his shepherd's sling. It is not until the combat has been brought to a successful conclusion that Saul, on inquiry, ascertains the parentage of the youthful hero; Jonathan, the king's son, is seized with a great affection for the shepherd lad, while the king insists on his remaining at court (17-18^b).

It is impossible to reconcile these two accounts, which differ in every essential feature. In the earlier account David is of mature age, an experienced warrior, and a player of some renown; he is brought to court on account of his musical skill, and is attached to Saul's person as his armour-bearer; lastly, Saul is well acquainted with his parentage. In the later account David is but a shepherd lad, unused to warlike weapons; he attracts Saul's attention by his bravery in meeting Goliath; Saul does not learn his name and parentage until after the duel. The phenomenon is the same as that which confronts us in chs. 7-12. Here RJE has attempted to harmonize the two narratives by 17^{18a} ('now David went to and fro from Saul'), which does not agree with 16^{14c} (according to which David receives a permanent office at court), nor with 17^{17c} (which describes him as living at Bethlehem with his father).

It is, however, noticeable that in the LXX (B) 17¹²⁻³¹ 38b, 41. 48b. 50. 52-18^a are omitted. Wellhausen formerly held that this shorter text was the more original, and this view is still maintained by Cornill, Stade, W. R. Smith, and H. P. Smith; but most critics agree 'that the translators—or more probably, perhaps, the scribe of the Heb. MS used by them—omitted the verses in question from harmonistic motives, without, however, entirely securing the end desired' (Driver, *Heb. Text of Samuel*, p. 116; similarly Wellhausen and Cheyne). Thus, according to 17¹³, David is still but a youth (not the full-grown warrior of 16¹⁸), while vv. 34^c describe him as a shepherd lad, unacquainted with the use of armour (as opposed to 16^{21b}). Further, it is inconceivable that discrepancies such as those described above should have been introduced into the text after the union of J and E, nor do the style and language of the sections omitted by the LXX support a late date.

The shorter, simpler account of David's introduction to Saul given in J (16¹⁴⁻²⁸) is obviously more in accordance with the actual facts; it forms a fitting sequel to 14²², and aptly illustrates the statement 'that whenever Saul saw any mighty man, or any valiant man, he took him unto him.' The account preserved in E seems to be derived rather from popular tradition than from actual history; for we learn from 2 S 21¹⁹ that not David but Elhanan slew 'Goliath the Gittite, the staff of whose spear was like a weaver's beam.' Later tradition, therefore, has transferred the exploit of the warrior to his royal master; the reading of 1 Ch 20⁵ is clearly due to a harmonizer (see Driver, *Samuel*, p. 272).

(2) 18³⁻³⁰ (J and E combined). David's life at Saul's court, and Saul's growing jealousy of him.

It is clear that in this section also we have two accounts combined, though it is not easy to distinguish the various parts. The narrative as a whole seems drawn from the older source,

* By its omissions B removes the difficulties caused by (1) David's residence in Bethlehem, and (2) Saul's ignorance of David's name and parentage.

and forms the continuation of 16^{14c}. David is here represented as a well-known warrior and leader, and not as the youthful hero of 17¹⁶. The song (v. 7) was probably treated by both sources as the immediate cause of Saul's jealousy, but, whereas the second introduction in v. 6^a (when David returned from the slaughter of the Philistine) connects it with the Goliath incident, we require some further exploit as the occasion of the song in the older narrative; probably the first introduction in v. 6^a (as they came) is a fragment of this notice. Vv. 9-11, the evil spirit from God, connects these verses with 16^{14c}; but vv. 13-16 and vv. 17-19 must be assigned to the later narrative. In vv. 13-16 we have a parallel account to that of v. 6^a (belonging to the older narrative), while vv. 17-19 clearly refer back to 17²⁸, according to which Saul was bound to receive David into his family; this is ignored by the older narrative, vv. 30-36, which knows nothing of David's betrothal to Merab (cf. v. 23, where David seems to regard an alliance with the royal family as beyond the bounds of possibility). Further, since the later narrative must have contained an account of David's marriage with Michal, it is probable that the redactor has treated his sources more freely than usual, and omitted part of E's narrative; v. 21^b is obviously an attempt on his part to harmonize the two accounts of David's betrothal.

The LXX (B) makes considerable omissions in this chapter also, viz. vv. 5. 6a. 8b. 10. 11. 12b. 17-19. 21b. 26b. 28b, and the majority of critics accept this shorter version as representing the original text (Wellh., Kuenen, Driver). As Driver (*Notes on Sam.* p. 120 f.) points out, 'the sequence of events is clearer; and the gradual growth of Saul's enmity towards David is distinctly marked' (cf. vv. 12a. 15. 24); further, the section then forms a connected whole, and nearly all the additional passages in the MT admit of satisfactory explanation. The fact, however, that throughout this portion of the Books of Samuel we are confronted with two accounts of the same incidents, makes it more probable that the LXX omissions here, as in ch. 17, are due to a harmonizer; further, we may argue (with Budde) that it is inconsistent to reject the (unsuccessful) recension of the LXX in ch. 17, and to adopt its more successful attempt in ch. 18. (For a fuller statement see Driver.)

(3) 19 (E). 20 (J). Outbreak of Saul's hostility towards David; David's flight.

Later account of Jonathan's intervention on behalf of his friend (19¹⁻⁷); the spear-throwing (vv. 8-10); with the assistance of his wife Michal, David escapes from his house (vv. 11-17); David's flight to Ramah (vv. 18-24); earlier account of Jonathan's intervention (20¹⁻⁴²).

These two chapters consist of several short sections, in which are set forth various incidents illustrating Saul's enmity towards David on the one hand, and on the other the affection displayed towards him by Jonathan and Michal. The redactor has apparently expanded the account of E in 19²⁻⁷, which are inconsistent in themselves, and are clearly influenced by the fuller account of J in ch. 20. Vv. 8-10 give E's account of the spear-throwing, which differs but little from that of J in 18^{10c}; vv. 11-17 have been rejected by Wellhausen, Stade, and Cornill on the ground of internal improbability, but the passage both in language and tone bears all the marks of E, and forms a suitable continuation of what precedes (for another view see H. P. Smith, *Samuel*, p. 173 f.). Vv. 18-24, which offer a second explanation of the proverb, Is Saul also among the prophets? are rejected by nearly all critics as a late interpolation, similar to that in 16¹³. The grounds for this view are, briefly, (1) that an entirely different and, as it would seem, more genuine account has been already given in 10^{10c}; (2) that David would most naturally flee southwards to Nob (cf. 21), and not to Ramah in the north; (3) according to 15³⁵ a further meeting between Saul and Samuel is excluded. (1) is decisive against these verses belonging to the earlier narrative, while (2) and (3) equally exclude E as their source, though the position occupied by Samuel, as well as the place (Ramah), seem to argue for that narrative; the words 'from Naioth in Ramah' (20^{1a}) naturally form part of the preceding account. Ch. 20 describes at length the attempt made by Jonathan to reconcile his father to David, and the means by which he informed the latter of the failure of his efforts. The section, which is obviously old and historical, is probably a duplicate of 19¹⁻⁷, by which it has been displaced; for (1) the situation is the same as that of 19¹, and (2) David would not require further proof of Saul's hostility after the unmistakable evidence of 19^{10c}. These difficulties, it is true, admit to a certain extent of explanation (cf. Driver, *LOT* p. 180), but the recurrence of duplicate accounts throughout 1 Samuel renders it probable that we have here a further example of the same phenomenon.

The text is evidently in great disorder, and the passage has probably been considerably expanded by the redactor. Wellhausen is no doubt right in regarding the sign of the arrow as part of the original narrative. This sign, however, would exclude any meeting or conversation between David and Jonathan. Hence we must regard vv. 40-42 (to for error) as redactional. Further, vv. 11-17 interrupt the main course of the narrative, and reverse the relative positions of Jonathan and David, the latter being regarded as the undoubted successor of Saul; they are probably therefore to be assigned to the redactor (Budde and Kittel ascribe all vv. 9-17 to the same hand).

(4) 21 (E). 22 (J). David flees to Nob, where he is received by Ahimelech, who gives him the shew-

bread, and the sword of Goliath (21¹⁻⁹). [David flees to Achish, king of Gath, vv. 10-15]. David takes refuge in the stronghold (read *צִיְהוֹן* at v. 4) of Adullam, whence he sends his parents to Moab (22¹⁻⁴); massacre of the priests at Nob; escape of Abiathar (22⁶⁻²³).

With the exception of 21¹⁰⁻¹⁵, the two chapters seem to connect quite naturally. But a closer examination makes it plain that the sequel (ch. 22) of the incident narrated in 21¹⁰⁻¹⁵ belongs to a different source. (1) Doeg the Edomite is differently described in 22⁹; (2) in ch. 22 emphasis is laid on the fact that Ahimelech had 'inquired of God' on behalf of David (v. 14f.); 21¹⁷ ignores this fact, and lays more stress on the sacred character of the bread given to David and his followers. Of the two accounts the earlier is that contained in 22⁹⁻²³. The later account, of which only part is given in 21⁹⁻¹⁵, doubtless contained some record of the massacre of the priests at Nob; probably Budde is right in regarding 22⁹, which interrupts the connexion, as part of this later account. To the redactor may be assigned 22^{10b} (Goliath's sword) and 'and a sword' in v. 18. The section 21¹⁰⁻¹⁵ interrupts the main narrative, and presupposes 16¹⁻¹³ and 19¹⁸⁻²⁴ (Wellh., Budde); like those passages, it must be regarded as a late insertion. Probably it was designed to take the place of ch. 27 f., and was afterwards retained alongside of it (Kuenen, Budde); to the same hand we must also assign 22⁹ (the prophet Gad, cf. 2 S 24¹¹).

(5) 23-27 (J 23¹⁻¹⁴ 26. 27; E 23¹⁹⁻²⁴ 25). David as an outlaw.

David delivers Keilah from the Philistines; then, warned by the oracle, leaves the city before it is besieged by Saul (23¹⁻¹³); he then takes refuge in the wilderness of Ziph, where he is visited by Jonathan (vv. 14-18); the Ziphites inform Saul of his whereabouts, and the latter seeks to capture him (vv. 19-24); tidings of a Philistine invasion give David a temporary respite from Saul (vv. 25-29), who on his return continues the pursuit, and on this occasion falls into David's hands. David, however, spares the king's life, and, in the dialogue that follows, the latter admits that David is more righteous than he is (ch. 24). The incident of Nabal, the wealthy sheepowner of Carmel (ch. 25), separates the two accounts of the sparing of Saul's life by David; for it is generally admitted that ch. 26 merely gives another version of the same occurrence which is narrated in 23¹⁹⁻²⁴. As a last resource, David enters the service of Achish, king of Gath, by whom he is assigned Ziklag as a residence; thence he makes a series of raids against the tribes dwelling in the Negeb of Judah, etc. (ch. 27).

The agreement between the two stories narrated in 23¹⁹⁻²⁴ 24 and ch. 26 in regard to (1) Saul's pursuit of David in the wilderness; (2) the sparing of Saul's life; and (3) the dialogue that ensues, is so great that we can only regard them as different versions of the same incident. The variations only affect the details, and are such as might easily have arisen in two independent narratives. Moreover, as Driver (*LOT* p. 181) points out, 'if the occasion of ch. 26 was a different one from that of 23¹⁹⁻²⁴, it is singular that it contains no allusion, on either David's part or Saul's, to David's having spared Saul's life before.'

Of the two accounts the earlier and more original is undoubtedly that contained in ch. 26 (Kuenen, Wellh., Driver, Stade, H. P. Smith, Löhr). The arguments in favour of this view are clearly stated by Löhr (*Sam.* p. xlv) as follows:—(1) the detailed information supplied as to (a) David's companions (26⁶, contrast 'David and his men,' 24²⁶), and (b) Saul and his camp (26⁷); (2) the manner in which Saul falls into David's hands; and more especially the old religious conception underlying 26¹⁹. To these we may add (3) the shorter and more genuine reply of Saul (26²¹⁻²⁵), which appears in a more expanded form in 24¹⁷⁻²¹. Budde, however, who is followed by Cornill, Cheyne, and Kittel, solely on the ground of *linguistic* evidence, contends for the later origin of ch. 26; but the expressions cited by him are not sufficiently characteristic to outweigh the arguments given above; further, he ignores the characteristic *עֲרִיבָה* (26¹³, cf. Gn 21¹⁵); see Löhr, *Sam.* p. xlv; H. P. Smith, *Sam.* p. 230).

The first section of ch. 23 (vv. 1-13) carries on 22⁹ and belongs to the earlier narrative. V. 6 is obviously out of place after v. 3, and is probably a gloss designed to introduce v. 9b, while the first question in v. 11 is repeated by error from v. 12.

V. 14 properly forms the commencement of ch. 25 (or, according to the view of Budde, etc., of 23^{19c}). Vv. 14b-18 (the interview between Jonathan and David) are clearly a redactional insertion, similar to 20¹¹⁻¹⁷ 40-43. To the redactor must also be assigned 23^{19b} ('in the wood, in the hill of Hachilah, which is on the south of the desert'), which is inconsistent with v. 22,

and the phrase 24¹⁶ (*and Saul said, Is this my son David?*) added from 26¹⁷ for harmonistic purposes.

23²²⁻²⁵, which have no parallel in the earlier narrative (ch. 26), contain a local tradition explaining the origin of the name *Sela-hammaleketh* (prob. = 'The rock of divisions').

The order of 24¹⁻⁷ is apparently at fault; and Gaupp, followed by Cornill and Budde, would rearrange the verses as follows: 4a. 6. 7a. 4b. 5. 7b. Possibly the disorder has arisen by interpolation (H. P. Smith, p. 217 f.), and we should omit vv. 4a. 6 (the incident of the skirt). 24¹³ is omitted by Wellh. and Budde as a gloss: the latter also regards vv. 30-32a as due to the redactor.

The notice of the death and burial of Samuel (25^{1a}) is clearly a redactional insertion borrowed from 26^{3a}; it is out of place here. The rest of the chapter connects naturally with 23²⁵, and fills up the interval of time required by that verse: it is probable, therefore, that the earlier narrative also contained some account of the incident narrated in 23²⁵⁻²⁸. The present position of ch. 25 is doubtless due to the desire to separate the two accounts (23¹⁹⁻²³ 24. 26). 25²⁸⁻³¹ have probably been expanded by the writer from the point of view of his later knowledge.

27¹ David's decision to take refuge with the Philistines follows quite naturally after ch. 26, and the whole chapter clearly belongs to the earlier narrative with 23¹⁻¹⁴ 25. 26: with this agrees its silence as regards any previous visit of David to Gath (21¹⁰⁻¹⁵), and the oracle of 22⁹.

(6) 28 (E). 29. 30 (J). The Philistines prepare for battle with Israel (28¹⁻³); Saul being unable to obtain a Divine oracle, seeks out a woman with a familiar spirit at Endor, who conjures up Samuel (28⁷⁻²⁵); in spite of the confidence expressed by Achish, the other Philistine leaders mistrust David's loyalty, and insist on his dismissal (29¹⁻¹¹). On his return to Ziklag, David finds that his city has been sacked by the Amalekites; he hastens in pursuit, and recovers all that the Amalekites had taken: the rest of the booty is equally divided among his men, part being sent as a present to 'the elders of Judah' (ch. 30).

28¹⁻² carry on the narrative of ch. 27, which is continued in chs. 29 and 30. 28³⁻⁵ are usually regarded as out of place. According to 28⁴ the Philistines are already at Shunem (in the plain of Jezreel); but in 29¹ they are assembled at Aphek in the Sharon valley, and only advance to Jezreel in v. 11; similarly the Israelites in 29⁴ are encamped by the spring which is in Jezreel, and presumably only fall back on Gilboa before the advance of the Philistines; whereas in 28⁴ they are encamped at Gilboa.

Budde (who is followed as regards the order by Driver) solves the difficulty by placing 28³⁻⁵ after chs. 29. 30. He further assigns the incident to the same source (J) as the rest of the section, arguing (1) that Samuel is here represented as a seer (21¹), and not as a judge or prophet; (2) that the general contents of the passage agree with the earlier representation, and (3) that it has many points of contact with ch. 14: the undoubted reference in vv. 17-18a (to Philistines) to ch. 15 he regards as a redactional insertion. Budde's theory, however, fails to give any reason for the present order of these chapters, which admits of a perfectly simple explanation, if we assign 28³⁻⁵ to the later narrative. In that case the historical introduction in 28⁴ will be parallel to and independent of the similar notices in 28¹⁻² 29¹⁻¹¹, and the section as a whole will form the sequel to ch. 15 (Wellh., H. P. Smith). On this view we might retain vv. 17-18a (with H. P. Smith), but they are more probably to be regarded as a redactional expansion, suggested by v. 16, which points back to 16^{23b-25} (see Löhr, p. xlix). As in the case of ch. 15 (Saul's war of extermination against the Amalekites), a genuine historical incident has been utilized for the purpose of inculcating a moral lesson from the prophetic standpoint.

(7) I 31-II 1 (J, except II 16-10. 13-16). Death of Saul.

The defeat of Israel on Mt. Gilboa and the death of Saul and his three sons (31¹⁻⁷). The Philistines carry off the bodies of Saul and his sons to Beth-shan, whence they are removed by the inhabitants of Jabesh-gilead (vv. 8-13). The news of the death of Saul and Jonathan is conveyed to David at Ziklag by a fugitive Amalekite, who describes how he slew Saul (2 S 1¹⁻¹⁰). David fasts till evening, and then orders the execution of the Amalekite because he had slain 'the Lord's anointed' (vv. 11-16). The lament of David over Saul and Jonathan (vv. 17-27).

These chapters contain a double account of the death of Saul. The earlier narrative (J) describes how Saul in despair commits suicide after his armour-bearer has refused to slay him (I 31-II 14); in the later narrative (E) a wandering Amalekite slays him at his request while he is suffering from cramp (or giddiness), though unwounded (II 15-16). It has been conjectured by those who regard the two chapters as belonging to the same source, that the account of the Amalekite is untrue;

but this conflicts with the whole narrative of 16-18, which conveys no hint of such being the case. It is probable, as Budde infers from 410, that David himself slew the fugitive who brought him the tidings of Saul's death. This latter passage (410) knows nothing of the reason assigned for the execution of the messenger in 16-18, viz. the fact that he had laid hands on 'the Lord's anointed.'

Ch. 31 has been excerpted, with slight variations, by the compiler of Chronicles (1 Ch 10), who has in part preserved a purer text (see Driver, *Notes on Sam.* p. 176f.). Budde regards II 16 as a redactional insertion, introducing the later narrative; vv. 11, 12 belong probably to the earlier narrative; they are out of place in their present context.

II 17-27 the lament of David is avowedly taken from the Book of Jashar (so Jos 10:12-14, 1 K 8:26 (LXX)), but there is no reason to doubt David's authorship (on the text see Driver, *Notes*, p. 180f.).

(8) 2-4 (J). The struggle between the house of Saul and the house of David.

David is anointed king of Judah at Hebron (21-4): he thanks the men of Jabesh-gilead for their kindly action in recovering the bodies of Saul and his sons, and at the same time informs them of his coronation (vv. 5-7). Meantime Ishbaal, the sole remaining son of Saul, is set on the throne of Israel at Mahanaim by Abner, the captain of the host (vv. 8-11): then follows the encounter between the troops of Joab and Abner at Gibeon, which results in the defeat of the men of Israel; in his flight Abner is pursued by Asahel, Joab's brother, whom he slays; Asahel's death puts an end to the pursuit (vv. 12-30). The downfall of the house of Saul is caused by the rupture between Ishbaal and Abner: the latter makes a league with David, to whom he restores his wife Michal; and he further promises to bring all Israel unto him. Abner, however, is treacherously slain by Joab in revenge for the death of Asahel, and is mourned by David and all the people (ch. 3). The assassination of Ishbaal, and the execution of his murderers (ch. 4).

These chapters continue the earlier narrative of I 31 and II 11-4, the conclusion of which is probably lost. 210a (to two years)¹¹ (=52) are obviously insertions; they interrupt the narrative, and are doubtless part of the chronological scheme of the Deuteronomist editor. 32-6 (a notice of David's family at Hebron) are out of place, and belong properly after 8:14. v. 1 is continued by v. 6a, v. 6a concealing the insertion. V. 30 is omitted by all critics as a later interpolation. 41 is certainly interpolated; probably v. 40 should be placed after 30 (Wellh., Budde).

(9) 51-813 (J, except ch. 7 (E)). David as king of all Israel.

After the death of Ishbaal, David is acknowledged as king by all the tribes of Israel (51-3). He captures the Jebusite city Jerusalem; takes up his residence there, and fortifies it (6-10). Hiram, king of Tyre, aids him in building his palace (11-12). [Notice of David's family (13-16)]. The Philistines hear that David has been anointed king over Israel, and immediately attack him, but are twice defeated (17-20). The removal of the ark from Baale-judah (= Kiriath-jearim) to Jerusalem is checked by the untoward death of Uzzah: the ark is therefore left at the house of Obed-edom (61-10). After an interval of three months it is brought up to the city of David in solemn procession, in which David takes part: his action is derided by Michal, who is therefore cursed with barrenness (11-20). David proposes to build a house for Jehovah, but is informed by Nathan that this honour is reserved for his son (71-17). David's prayer (vv. 18-29). A summary of the wars waged by David (81-14): his judicial activity (v. 15); and a list of his officers (vv. 16-18).

It is obvious that the war with the Philistines (517-20) follows immediately after vv. 1-3, which contain a twofold introduction, viz. vv. 1, 2 and v. 3. The intervening sections (vv. 4-16) are clearly misplaced: vv. 4, 5 (cf. 1 K 21) are omitted by the Chronicler, and are premature: vv. 6-9 the account of the capture of Jerusalem is undoubtedly old and genuine, but the text is unfortunately very corrupt; Budde would place it after 61: vv. 11, 12 probably belong to the latter part of David's reign, if they are not an addition from 1 K 5 (see S. A. Cook, *AJSL* xvi, 3, p. 151): vv. 13-16 should be placed like 32-6 after 8:14. It is prob-

able that the account given in vv. 17-20 should be supplemented by the details supplied in 21:16-22 23:9-30 (see below). That vv. 17-20 do not connect with vv. 4-16 is shown by the different use of the term 'the hold' (חֲזָקָה) in vv. 9 and 17: the use of this term here and in 23:14 supports S. A. Cook's theory (*AJSL* p. 154 f.), that David's encounter with the Philistines preceded the incidents in chs. 2-4, and belong to the period 'when he had no army (צָבָא) or host (חֲזָקָה), as chs. 8 and 10, but was accompanied only by his "men" or "servants" (521 21:16 17:20). 61, according to Budde, must have introduced some warlike incident, and he therefore prefixes it to 56:12: the rest of the chapter is old and genuine, though possibly it has been expanded in parts. Ch. 7 is admittedly later than chs. 5 and 6, with which it is clearly connected: the section, it is true, displays certain resemblances both in thought and expression to Deuteronomy, but these are not strongly pronounced; and from the nature of its contents the chapter would easily lend itself to theocratic expansions. Kuenen assigns the chapter to a post-Deuteronomist source on the ground of vv. 13, 22, 23, 24; but 16 is omitted by the Chronicler (1 Ch 17:1); v. 13 is certainly due to the Deuteronomist editor, and vv. 23-24, from their general character, may well be an expansion. Probably, therefore, Budde is right in assigning the chapter to E.

Ch. 8 forms the concluding survey to the history of David (cf. 1 S 14:46-51 at the end of the history of Saul): in its present form the chapter represents the work of the Deuteronomist editor, who seems, however, to have made use of the older sources. The wars are first noticed: with the Philistines (v. 1), with the Moabites (v. 2), with the Arameans and their allies (vv. 3-8); then follows an account of the homage paid by the king of Hamath (vv. 9, 10); [the spoil dedicated by David to Jehovah (vv. 11, 12)]; the subjugation of Edom (RV *Syria*) (vv. 13-14). The notices of David's family at Hebron (32-6) and at Jerusalem (513-16) should be inserted here (Wellh., Budde): Budde would also insert 54-5 (RD). The chapter concludes with an account of David's administration (v. 15), and a list of his officers (vv. 16-18).

A fuller account of the two campaigns against the Arameans is preserved in ch. 10, which has been condensed and slightly altered by RD in vv. 3-8: he has also inserted vv. 9, 10 here, transferring them from the end of ch. 10 (see below), to which vv. 13 and 14 properly belong (cf. the similar conclusion 60 and 14b). Vv. 11, 12 are probably a late insertion. It is remarkable that in ch. 10 the victories over the Arameans form but two episodes in the war with Ammon; yet this war is ignored in ch. 8, and in its stead (v. 2) the subjugation of Moab is described. This fact is not mentioned elsewhere, and seems inconsistent with I 22:36: it is far from improbable, therefore, that Moab has been substituted for Ammon in 52 (Budde).

(c) II 9-20 (J) [and 1 K 1. 2]. Life at David's court, or the history of the succession to David's throne.

The events narrated in these chapters are closely connected with, and mutually dependent on, one another: they are further distinguished by unity of plan and conception. The story of Meribbaal (ch. 9) explains the action of Ziba (161-4) and the speech of the former (19:24-30): 101-111 with 12:26-31 explain how David became acquainted with Bathsheba, and how he compassed the death of Uriah, while the whole section chs. 10-12 forms the necessary introduction to the final choice of David's successor in 1 K 1. 2. The narrative throughout, by its lifelike touches and its minuteness of detail, as well as by its bright and flowing style, betrays its early origin, and must have been composed soon after the events which it describes.

(1) 91-12. David on inquiry learns of the existence of Meribbaal (MEPHIBOSHETH), the lame son of Jonathan: for Jonathan's sake he deals kindly with his son, and retains him at court; Saul's estates are restored to his grandson, and Ziba, Saul's servant, appointed to look after them.

Budde would place ch. 24 and 21:1-19 before this chapter, on the ground that the incident narrated in 21:12 is presupposed in ch. 9 and 16:17 19:28, and that the census (ch. 24) would naturally take place soon after David's accession. It is difficult, however, on this theory, to explain the present position of 21:14 and 24, and, as Wellhausen has pointed out, the popular and legendary character of these chapters is very different from that of chs. 9-20 (for a fuller discussion of this point see on chs. 21-24). More probable is Budde's view, that 44b should be placed after v. 3.

(2) 10-12. Owing to the insult offered to his ambassadors, war breaks out between David and Ammon: the latter call in the Arameans to their aid, and prepare to defend their capital. Joab, with the pick of the troops, attacks and defeats the Arameans, while the rest of the army under

Abishai successfully engage the Ammonites (10¹⁻¹⁴). Once more the Aramaeans, under Hadadezer, assemble against Israel, but are again defeated, this time by David himself; Joab is then sent to besiege the Ammonite capital (10¹⁵⁻¹¹; see RABBAH). David remains at Jerusalem, where he commits adultery with Bathsheba, the wife of Uriah the Hittite, one of his warriors. After a vain attempt to conceal the sin, he sends a letter to Joab instructing him to bring about the death of Uriah: his orders are carried out, and David then marries Bathsheba, who bears him a son (ch. 11). The prophet Nathan awakens David to a sense of his guilt by means of a parable, and announces the Divine punishment: the child of Bathsheba dies despite David's penitence; but another son (Solomon) is born (12¹⁻²⁰). Meantime the siege of Iabba has been drawing to a close, and David in person commands the final assault: the chapter ends with an account of the spoil, and of the punishment inflicted on the inhabitants (12²⁶⁻³¹).

Except in the speeches of Nathan, which have probably been expanded, the narrative appears to have been preserved in its original form: after 11²² we must restore the longer text of the LXX (see Driver, *Text of Sam.* p. 224) in accordance with vv. 19-21: 12¹⁰⁻¹² are probably due to the Deuteronomistic editor, who regarded all the misfortunes of David's house as resulting from his great sin, while the phrase, 'the house of the Lord,' in v. 20, seems an anachronism. With regard to the relation of 10¹⁻¹¹ and 12²⁰⁻³¹ to ch. 8, it is noticeable that (1) according to 10¹⁶ the Ammonites hire the services of the Aramaeans of Beth-rehob and Zobah, the king of Maacah, and the men of Tob: in 8²⁻⁴ the Ammonites are not mentioned, and there is only an obscure notice of a victory over the Aramaeans; (2) in 8² Hadadezer of Beth-rehob (for son of Rehob) is mentioned by name as leader of the Aramaeans: in 10¹⁶ his name is given so abruptly (v. 16) that he must, as Budde conjectures, have been mentioned earlier in the original narrative; (3) both accounts describe a second campaign: in 8² the Aramaeans of Damascus, in 10¹⁶ those 'that were beyond the River' came to the assistance of their countrymen. Budde conjectures very plausibly that when the detailed account 10¹⁻¹¹ was appended, the editor attempted to make the two narratives dissimilar: to this end he omitted the name of Hadadezer in 10¹⁶, and substituted Damascus for 'beyond the River' in 8². By these means he was able to transfer the notices of Tou's homage (8⁹⁻¹⁰) and of the Edomite war (8¹³⁻¹⁴) from the end of ch. 10 to their present position.

(3) 13-20. The rebellion of Absalom, its cause and effects. Amnon, David's firstborn, and presumably his successor, is murdered by command of Absalom for the violation of his half-sister Tamar: Absalom takes refuge with his maternal grandfather the king of Geshur (ch. 13). Joab, by the help of the wise woman of Tekoa, induces the king to consent to Absalom's return: the latter in his turn coerces Joab into bringing about a meeting between himself and the king, which results in the reconciliation of father and son (ch. 14). Absalom now schemes to win the people to his side, and thus secure the throne, and finally sets up the standard of revolt at Hebron. David at once flees eastward from Jerusalem, accompanied by his bodyguard and Ittai the Gittite: he sends back Zadok and Abiathar with the ark to the capital, and arranges that tidings should be brought to him by their two sons: he further persuades Hushai to return, that he may defeat the counsel of Ahithophel (ch. 15). In his flight David learns from Ziba of the disaffection of Meribbaal, and submits to the insults of Shimei the Benjamite (16¹⁻¹⁴). Meantime Absalom, following the advice of Ahithophel, takes possession of his father's harem (16¹⁵⁻²³). The same adviser further counsels the immediate pursuit of David, but Absalom declares in favour of the waiting policy advised by Hushai (17¹⁻¹⁴). The news of his decision is conveyed to David by the two sons of the priests, at the risk of their lives: he at once withdraws across Jordan, and is met at Mahanaim by rich Gileadites with ample supplies for his army (vv. 15-29). Absalom, who has already crossed the Jordan, is confronted

at Mahanaim by David's army under Joab, Abishai, and Ittai. In the battle that ensues David's forces are completely victorious: Absalom in his flight is slain by order of Joab, in direct disobedience to David's command (18¹⁻¹⁸): then follows a graphic description of the manner in which the news was conveyed to David (vv. 19-23). The death of Absalom plunges David into profound grief, from which he is only with great difficulty aroused by Joab: public opinion and the politic message of David to the men of Judah are the chief factors in bringing about the king's return (19¹⁻¹⁵). At the passage of the Jordan Shimei asks for pardon and is forgiven; Meribbaal explains how he had been slandered by Ziba; and, lastly, the aged Barzillai refuses the king's invitation to himself, but asks his favour for his son Chinkham (vv. 16-39). The men of Israel are envious of the favour shown to the men of Judah, and a quarrel breaks out (vv. 40-43). In consequence of this dispute Sheba the Bichrite stirs up Israel to revolt against David. Amasa, the newly-appointed commander, fails to muster the men of Judah quickly enough, and Abishai (or, perhaps, Joab, see art. JOAB in vol. ii. p. 659 note) is sent with all the available troops to stamp out the rebellion. Amasa meets the royal forces by the way, and is treacherously slain by Joab: the two brothers then pursue Sheba northwards to Abel of Beth-maacah, where he is slain, and his head handed over to Joab: the chapter concludes with a repetition of the list of officers given in 8¹⁶ (ch. 20).

In this section there are but few passages whose origin has been called in question by the critics: 13¹⁸ (to *apparelled*) is probably a misplaced gloss (Wellh.) to v. 19: it interrupts the connexion between vv. 17 and 18¹; at the end of the chapter the right order of the verses is clearly 37, 37a, 38b, 39, 38a being due to the scribe. 14²⁸ is rejected by most as a later addition; Budde omits all vv. 23-27. 15²⁴ appears to have been worked over by a Deuteronomistic redactor: 'and all the Levites with him' is certainly due to him, while the phrase 'and Abiathar went up' is out of place. Abiathar must originally have been mentioned alongside of Zadok (cf. v. 29): the textual difficulty in v. 37 may also be due to the same cause (Budde reads, 'See, do thou and Abiathar return'; Wellh., 'unto [Zadok] the high priest, do thou return, etc.'). 18¹⁸ (*for he said to remembrance*) conflicts with 14²⁷, and must be rejected as an interpolation, unless with Budde we omit 14²⁷. Lastly, 20²³⁻²⁶ are repeated with some variations from 8¹⁶, or more probably (see H. P. Smith, *Sam.* p. 327 f.) are original here, and were borrowed by the compiler of ch. 8 for his concluding panegyric. It seems very probable (as Budde suggests) that the author of ch. 8 omitted the following chapters (9-20), because, from his point of view, the family history which they contained did not redound to David's credit, and that they were afterwards restored by a later editor.

The unity of chs. 9-20 (see above) has been admitted by nearly all commentators and critics (Kuenen, Wellhausen, Driver, Budde, Cornill, Kittel, Lohr, etc.), with the exception of Thénius (*Comm.* 2 p. xlii), who rejected ch. 9 (the incident of Meribbaal) and 10¹⁻¹¹ 12²⁰⁻³¹ (the Ammonite war) as later redactional additions to the history of David; but, as we have shown above, these sections are necessary to and presupposed by the following narrative. This theory, however, has been revived, in a different form, by S. A. Cook in his analysis of 2 Samuel (*AJSJL (Hebraica)*, p. 155 f.). According to the latter's view, ch. 9 is related to 18 20¹⁶, and is therefore to be ascribed to an Ephraimite source: while 'the story of David's sin with Bathsheba and the birth of Solomon (11²⁻¹²)' has been inserted in the account of a war against Rabbath-ammon of which it was originally independent. He further argues that this war with Ammon should follow, and not precede, the events recorded in chs. 13-20, chiefly on the ground that David's flight to and hospitable reception at Mahanaim * are impossible after the sanguinary war recorded (10¹⁻¹¹); and places it at the end of David's reign. Absalom's rebellion, he contends, was probably confined to Judah (see Sayce, *Early Hist. of the Hebrews*, p. 429 f.),—the leading men (Amasa and Ahithophel) were both Judeans, and the centre of revolt was at Hebron, the old Judean capital,—and followed shortly after David had settled in Jerusalem: in like manner the extent of Sheba's revolt, which was really limited to the Bichrites (20¹⁴ LXX), has been exaggerated so as to include all Israel, and then appended to Absalom's rebellion. As the result of his investigation Cook concludes: '(1) that the union of Judah and Israel under one king did not occur at any early date in David's reign, and (2) that the narratives in 2 Samuel which presuppose any close re-

* Cook ingeniously emends 17²⁷ 'and Shobi the son of Nahash' (שׁוֹבִי בֶן נָחָשׁ) to 'and Nahash, etc., brought' (וְנָחָשׁ בֶּן שׁוֹבִי), thus supplying (according to his view of the chronology) a motive for David's embassy in 10¹⁶.

relationship between Judah and Israel (or Benjamin) previous to this union are due to a redactor (HJE?), and, in several cases at least, seem to be derived from an Ephraimite source.

The evidence, however, on which these conclusions are based is obtained in many cases by a very subjective treatment of the text, and cannot be said to outweigh the general impression conveyed by chs. 9-20 as a whole. It is probable that Cook is right in certain cases (especially in the story of Abithophel 16²⁰⁻¹⁷) in tracing the difficulties of the narrative to the combination of two sources; but he certainly goes too far when he condemns all the interviews recorded, viz. those with Ziba, Meribbaal, Shimei, and Barzilai, as the work of the redactor.

(d) 21-24. The Appendix.

These four chapters contain a number of heterogeneous fragments, viz.: (a) the famine in Israel expiated by the death of the sons of Saul at the hands of the Gibeonites (21¹⁻¹⁴); (b) a series of exploits against the Philistines (21¹⁵⁻²²); (c) David's Hymn of Triumph after the defeat of his enemies (ch. 22 = Ps 18); (d) David's 'Last Words' (23¹⁻⁷); (e) further exploits against the Philistines, and list of David's heroes (23⁸⁻²⁹); (f) David's census of the people, and its result (ch. 24).

These chapters interrupt the main narrative of chs. 9-20, which is continued in 1 K 1-2, and must therefore have been inserted in their present position after the division of the Books of Samuel and Kings. It is noticeable that (f) is closely related in style and manner to (a); 24¹ clearly continues 21¹⁴, while both narratives have a similar conclusion (21^{14b} 24^{26b}). The two narratives were apparently first separated by (b) and (c), the contents of which are very similar, and between these again were inserted the two Psalms chs. 22 and 23¹⁻⁷.

The incident narrated in 21¹⁵ evidently belongs to the beginning of David's reign, and seems to be alluded to by Shimei (16⁷⁻⁸) and Meribbaal (19²⁹), but is entirely ignored by ch. 9. Ch. 24 is very similar to 21¹⁻¹⁴, of which it is clearly the sequel: in each case the Divine wrath is kindled against the people owing to the action of the king, and they are punished with a plague, vv. 10 and 17 (David's repentance and his prayer) are out of place, and may have been inserted later: Budde arranges the verses as follows: 10, 11b, 12, 12b, 11a, 12a, 13a, 14, 13, 16a, 17, 16b. He (see above) assigns both sections to J, and places them before ch. 9: on his view ch. 24 should precede 21¹⁻¹⁴, and he therefore omits 24^{1a} as a Deuteronomistic gloss; 21^{2b} he assigns to the redactor, and rejects 21⁷ as a late insertion caused by the displacement of the passage. He suggests that the gloomy nature of their contents caused the sections to be removed by the compiler, and that they were afterwards added by the editor. The character of these and of the other sections is, however, very different from that of chs. 9-20, with which they exhibit no affinity: hence, though 21¹⁻¹⁴ and ch. 24 undoubtedly contain old traditions, we can only conjecture that they were added by a later hand after the completion of the main narrative. 21¹⁵⁻²² and 23⁸⁻²⁹ likewise contain old material, and belong to the early period of David's reign (see 57³²⁻³³): possibly they may be derived from the register of the 'recorder,' as Driver suggests (*LOT* pp. 153, 157). Budde, who regards them as part of the original narrative, places them after 52¹: his transposition of 23^{12-17a} to the end of the chapter is probably correct. The two Psalms chs. 22 (= Ps 18) and 23¹⁻⁷ (David's 'Last Words') are admittedly later additions to the book. The Davidic authorship of ch. 22 has been maintained by Ewald, Hitzig, etc., but the internal evidence points to a later author. The 'Last Words' of David are obviously out of place; the majority of critics agree that they are the work of a later hand: the text is in parts very corrupt.

SANAAS (B Σανά, A Σανάς; AV Annaas, 1 Es 5²⁸).—The sons of Sanaas returned from captivity under Zerubbabel to the number of 3330 (B 3:301). In Ezr 2³⁵, Neh 7⁸⁸ they are called the children of Sanaah. In Neh 3⁸ the name has the article Hassenah. The numbers given are 3030 (Ezr.), 3930 (Neh.).

SANABASSAR, SANABASSARUS.—See SHESH-BAZZAR.

SANASIB (B Σαναβίς, A Σαναβίς), 1 Es 5²⁴.—The sons of Jeddu the son of Jesus are mentioned as priests who returned 'among the sons of Sanasib' with Zerubbabel. The name is omitted in the parallel Ezr 2³⁵; the Vulg. probably preserves the correct form *Eliashib*.

SANBALLAT (Σανβαλλάτ, Σαναβαλλάτ, *Sanballat*).—The name is Assyrian. *Sin-ballidh*, 'the Moon-god has vivified.' Sanballat is called a Horonite (Neh 2^{10, 19} 13²⁸), but the locality meant is uncertain: for conjectures as to it see art. HORONITE. He seems to have held some office in Samaria (Neh 4²) when Nehemiah arrived in Jerus., and, along with Tobiah the Ammonite and Geshem the Arabian, was bitterly opposed to Nehemiah, and did his best to thwart his endeavours to rebuild the walls of the Jewish capital. There was a party inside Jerus. itself which was equally opposed to the Tirshatha, and conspired with Sanballat to hinder Nehemiah by spurious prophecies and other means (Neh 6). One of the party was the high priest Eliashib, whose grandson had married Sanballat's daughter (Neh 13²⁸).

Josephus (*Ant.* XI. vii. 2) transports Sanballat from the reign of Artaxerxes Longimanus to that of Darius Codomannus, the last king of Persia, whose officer he is said to have been in Samaria. His daughter Nikasô was married to Manasseh, the brother of the high priest Jaddua. Manasseh, being threatened with expulsion from the priesthood unless he divorced his wife, fled to Sanballat, who suggested that he should become the high priest of a rival temple on Mt. Gerizim, and promised to secure for him the protection of Darius. Just at this time, however, the invasion of Persia by Alexander the Great took place; Sanballat went over to the conqueror with 7000 men, and induced him to allow the temple on Mount Gerizim to be built. Manasseh became its first high priest, and soon afterwards Sanballat died. The whole story seems to be derived from some apocryphal Jewish account of the origin of the Samaritan temple.

A. H. SAYCE.

****SANCTIFICATION.**—Of the three words for 'holiness' based on the adjective ἅγιος, one only is here really in question, viz. ἁγιασμός. The other two, ἁγιασθήναι, the abstract quality (*sanctitudo*), and ἁγιότης, the same concretely and subjectively conceived as a personal quality (*sanctitas*), fall naturally under HOLINESS. But ἁγιασμός, like 'sanctification,' connotes *state*, and that not as native to its subject, but as the outcome of action or process.

There is no need to deal separately and at length with the cognate verbs ἁγιάζειν, ἁγιάζειν. The essential ideas involved have already been discussed under HOLINESS; while what they have to contribute to the idea of sanctification as a process will appear incidentally in the body of this article. In general, however, it may be said (1) that ἁγιάζειν is late Greek and biblical (ἁγιάζειν being classical), and has meanings determined by the several senses of ἅγιος, but all springing from 'to consecrate,' 'to render sacrosanct or appropriated to Divine use' (in contrast to 'profane' or 'open to common use'); whereas the more classical ἁγιάζειν means 'to render pure' (no longer 'unclean,' or hateful in God's sight). (2) Each verb passes through a ritual stage of meaning to reach an ethical or spiritual one. In the case of ἁγιάζειν the two are clearly distinguishable, as in Jn 11⁶⁵, Ac 21^{24, 26} 24¹⁸ on the one hand, and Ja 4⁸, 1 P 1²², 1 Jn 3¹ on the other. But there is little even in the latter series

of passages on which to base a doctrine of sanctification. In the case of *ἀγιάζειν* (for Heb. see HOLINESS IN OT, *ad init.* note) the senses are more varied and complex. It means (a) to render sacrosanct by ritual methods appointed by God (Ex 28³ 30²⁸, Mt 23¹⁷, 19, He 9¹⁸; cf. 1 Co 7¹⁴), or simply by act of the Divine will (Jer 1⁸, Jn 10³³); (b) to hallow ethically, the human spirit or will being directly concerned; (c) to realize the state of ethical devotion to the Divine in concrete conduct (Jn 17¹⁹, Rev 22¹¹; cf. Mt 6⁹). The second sense, ethical hallowing, has two subdivisions, viz. (i.) vicarious or sacrificial, e.g. He 10¹⁰, 29 13¹², cf. 2¹¹ 10¹⁴, Eph 5²⁴, and (ii.) intrinsic, as in Jn 17¹⁷, 19, cf. 1 P 1², 22, Ac 20⁸² (26¹⁸), 1 Co 6¹¹, Ro 15¹⁶. Intrinsic hallowing itself is either initial, as in 1 Co 6¹¹, Ac 26¹⁸, or mature, as in 1 Th 5²². In all forms the determinative part is played by the Divine (Jn 10³⁶ 17¹⁷, 19, He 10¹⁰), yet the human factor is fully recognized (Jn 17¹⁹ *ἀγιάζω ἑμαυτὸν*, cf. *ἀγιάζειν* of man in Ja 4⁸, 1 P 1²², 1 Jn 3³). The working out of these two, and the element of process involved, will appear in the detailed exposition of *ἀγιασμός* which follows.

 Literature.

A. *ἈΓΙΑΣΜΟΣ*.—(i.) *Its use outside the NT*.—The form of the word, indeed, suggests that emphasis should lie on the process involved. But its actual usage, which is perhaps exclusively Biblical and patristic, does not bear this out. It is true that the LXX shows traces of the active sense; as in Jg 17³, where A has *ἀγιάσω ἡγίασα* for *ἀγιάζονσα ἡγίασα* of B; Sir 7³¹ *θυσίαν ἀγιασμοῦ κ. κωπάρχην* ('the sacrifice of hallowing' being parallel to 'first-fruits'); Ezk 45⁴ *ἔσται αὐτοῖς (τοῖς λεπεύουσιν) τόπος εἰς οἶκους ἀφωρισμένους τῷ ἀγιασμῷ αὐτῶν*; 2 Mac 2¹⁷ *τὸ βασίλειον κ. τὸ λεράτευμα κ. τὸν ἀγιασμόν*, the covenanted prerogatives of Israel, and 14⁸³; *ἀγία παντὸς ἀγιασμοῦ Κύριε, διατήρησον εἰς αἰῶνα ἀμύαντον τόνδε τὸν προσφάτως κεκαθερισμένον οἶκον*. But in Am 2¹¹ *ἐλαβον ἐκ τῶν υἱῶν ὑμῶν εἰς προφήτας, κ. ἐκ τῶν νεανίσκων ὑμῶν εἰς ἀγιασμένον* (? = 'a hallowed thing,' where the Heb. has 'for Nazirites'), the passive sense seems to prevail (cf. 3 Mac 2¹⁸ *τὸν οἶκον τοῦ ἀγιασμοῦ*, 'the House of Sanctification,' contrasted with idol-houses; perhaps also Sir 17¹⁰ *ἔνομα ἀγιασμοῦ αἰνέουσιν*, on the analogy of Mt 6⁹ *ἀγιασθήτω τὸ ὄνομα σου*. So of Messiah it is said, in Ps-Sol 17³⁸, that 'he shall cleanse Jerusalem with (a state of) sanctification (*ἐν ἀγιασμῷ*), as it was even at the first.' Similarly in the earliest patristic usage; as in 1st Ep. of Clem. xxx. 2, where, as gifts of God, are named *ζωὴ ἐν ἀθανασίᾳ, λαμπρότης ἐν δικαιοσύνῃ . . . ἐγκράτεια ἐν ἀγιασμῷ*, and xxx. 1, *ἀγία* (var. *lec. ἀγίου*) *ὅν μερὶς ὑπάρχοντες ποιήσωμεν τὰ τοῦ ἀγιασμοῦ πάντα, φεύγοντες καταλαλίδας, κ.τ.λ.* Hence the idea of sanctification as a quality or state sometimes attaches to *ἀγιασμός*, even outside the NT;* while in the NT it will be found to be the prevailing thought in one form or another.

(ii.) *Its NT usage*.—In St. Paul the word occurs eight times, in five distinct passages. In the earliest of these, 1 Th 4³ 4⁷, it means a state of practical or realized consecration to God's will, conduct conformed to the ideal attitude or standing of the Christian, as 'in Christ.' Such a state is the essence of God's will for man; and it is

defined, in one connexion, as the 'state of abstinence (*ἀπέχεσθαι*) from fornication,' the ability of a man to possess (see art. POSSESS) his own vessel in a condition of hallowedness and honour, in contrast to one of lustful passion. For 'God called us not on a basis of unchastity, but in (the status of) hallowedness' (*οὐ . . . ἐπὶ ἀκαθαρσίᾳ ἀλλ' ἐν ἀγιασμῷ*). Similarly in 2 Th 2¹³ he says that Christians were chosen of God 'in (the status of) hallowedness due to the Spirit, and faith based on the Truth' (*ἐν ἀγ. πνεύματος κ. πίστει ἀληθείας*)—where none would doubt that 'faith' means a state of soul. This divinely-determined state is set forth in other but kindred terms, as one wherein the soul is 'sealed' by the Holy Spirit (2 Co 1²², Eph 1¹³) as something devoted to God. This idea is adopted in 1 P 1², along with explicit mention of the objective or sacrificial basis of man's consecration, 'the blood of Christ'—the aspect emphasized in Hebrews (9¹⁰ 14²⁸; cf. 2¹¹). In another passage St. Paul himself refers to this more objective side of the state of hallowedness, when, in 1 Co 1³, he calls Christ as crucified (v. 23) God's 'wisdom' or secret as regards 'righteousness (justification) and sanctification and redemption.' Here the thought is not of sanctification as a process, but as a status into which a man is brought by God's act on condition of faith; as is seen from 1 Co 6¹¹ 'Ye were washed clean, ye were sanctified, ye were justified in (virtue of) the name of our Lord Jesus Christ, and in (virtue of) the Spirit of our God.' Every Christian as such has been put into a virtual or implicit state of cleanness from his sinful past and consecration to God's holy ends, in the same experience of faith which ushers him into the state of justification. These are, indeed, but different aspects of one and the same spiritual fact, and are produced by the same Divine means, both objective and subjective.

The like thought, under the different metaphors of death to sin and life unto God, corresponding to Christ's cross and resurrection, reappears in Ro 6. 'He that hath died hath been justified from sin' (v. 1); 'be reckoning yourselves to be dead indeed unto sin (purification), but living unto God (consecration) in Christ Jesus' (v. 11). So saying, St. Paul passes to the practical consequences of the new attitude to sin and to God implied in spiritual union with Christ on the part of the justified. Status or attitude of soul must express itself in moral habit. As formerly it had been lawlessness that had expressed itself through the man's actions, so now he is to let righteousness sway him, with a state of hallowed action as issue (*εἰς ἀγιασμόν*, vv. 19, 22). Accordingly, the same apostle teaches, in 1 Ti 2¹⁵, that an abiding state of faith, love, and hallowedness of living must characterize the Christian. And the like is taught in He 12¹⁴, which alludes to the pursuit of peace with all men and of the holy habit of living (*ἀγιασμός*) befitting fellowship with God. In all these cases no stress falls upon process as entering into the state in question; though in some there is a suggestion of it, in the notion of habit or state to be realized in conduct. The idea is that of constant reaffirmation of the underlying attitude of consecration to God's will and ends. But, so far, there is no suggestion of progress; rather of maintenance (see 1 Ti 2¹⁵) of a sound attitude or condition. Progressive sanctification, a growth from less to more, whether in purity or range, is not contemplated in the word *ἀγιασμός* itself. Yet it is embraced in the scope of apostolic teaching, as we see when we proceed to examine other references to the subject of the Christian life.

B. SANCTIFICATION AS TAUGHT IN THE NT.—

(a) *By Christ*.—Christ's own teaching on this subject is too ideal or timeless to yield definite results

* Thus Eusebius on 1 Th 3¹³ says, *τοῦτο ἀληθῶς ἀγιασμός, τὸ παντὸς ῥύπου καθαρὸν εἶναι*.

as to the conditions imposed by human frailty upon the realization of Divine sonship. 'Ye shall be perfect as your heavenly Father is perfect' (Mt 5⁴⁸), is the standard at once of obligation and possibility. But it stands, like the Mosaic precept of which it seems to be the equivalent, 'Ye shall be holy, for I am holy' (Dt 18¹³), unconditioned by any *how* or *when*.

(b) *St. Paul*.—Accordingly it is to St. Paul, the great exponent of the gospel from the experimental or appropriative side, that we have to look for the fullest account of the matter. There is a state possible to Christians, corresponding to the ideal of their calling, in which they can be described as 'unblameable in holiness' (ἀμώπτους ἐν ἁγιασμῷ), and into which they may be brought by the grace of God in this life. Therein they stand hallowed through and through (ὁλοτελείς), every part of their being (ὁλόκληρον τὸ πνεῦμα κ. ἡ ψυχὴ κ. τὸ σῶμα) abiding by grace in a condition fit to bear the scrutiny of their Lord's presence without rebuke (ἀμώπτως ἐν τῇ παρουσίᾳ τοῦ Κυρίου ἡμῶν Ἰησοῦ Χρ. τηρηθείη). Such is the teaching of 1 Th 3¹³ 5²³. The fidelity of God to His purpose in calling men to be Christians is pledged to this achievement (5²⁴), though there is no definite time, as measured from the initial hallowing of the spirit in conversion, at which it must needs be accomplished. God, who begins the good work in the soul, also continues to work at its perfecting (ἐπιτελεῖν), right up to the day of Jesus Christ (Ph 1⁶); and yet, ere that day dawns, Christians may become already 'pure in purpose' (εἰλικρινεῖς = Christ's καθαροὶ τῇ καρδίᾳ) and void of offence, and so remain 'until the day of Christ' (1¹⁰). It is this state of realized sanctification of conduct or 'walk,' so as to 'please God,' that St. Paul has constantly in view in exhorting his converts to holy living (e.g. 1 Th 4¹). This is what he means, at times, by his use of ἁγιασμός. But the conception needs to be carefully guarded and explained by other aspects of his thought. Thus (1) it represents a growth in holiness rather than into holiness out of something else; (2) it is conceived as realizable by a definitive act of faith—claiming and appropriating its rightful experience by an act of will informed by the living energy of the Holy Spirit—rather than as the cumulative result of a slow, instinctive process after conversion; (3) it is not the same as absolute moral perfection or consummation (τελειοῦσθαι), but is rather the prerequisite to its more rapid and steady realization.

(1) St. Paul (like the NT as a whole) bases the Christian life on an initial and most radical hallowing of the spirit or inmost seat of personality, implicit in justifying faith; and it is in consequence of this that the Christian is styled 'regenerate.' Thus the prime spring of life is renewed; the root impulse or attitude of the *ego* is changed and hallowed; and so the whole man can be regarded as virtually consecrated to God. The outward hallowing of the 'walk' or conduct proceeds on the basis and in the power of this hallowed 'inner man' of the heart. From the first this 'inner man' enjoys the salvation of which consecration to God's will and ends is one aspect. But this salvation needs to work outwards, through the spheres of man's life more closely bound up with his sensuous nature and its false egoism (σάρξ)—the man as ψυχικός, possessed of a number of faculties not yet adjusted to God's ends, but often biased rather towards selfhood. The whole man, spirit, soul, and body, has to be leavened. This is what St. Paul means when bidding the Philippians 'work out' into realization (κατεργάζεσθε) 'their own salvation,' a salvation already possessed in principle, relying upon the in-working of God for ability so to do (Ph 2¹²). The end of such actualizing of the partly latent salvation is the image of Christ, just set forth in majestic and moving terms. Conformity to the image of God's Son is the hope of the Christian's calling (Ro 8²⁹), that whereunto tends the intercession of the Holy Spirit immanent in the human spirit (v. 26^c). Not until this has been realized in fulness can sanctification become perfection; and St. Paul himself repudiates all claim to having attained to this (Ph 3¹²). Yet in the very same context he ranges himself with the class of 'mature' believers (τελείοι, 3¹⁴), whose settled purpose it is to reach that goal, and for whom the one great rule is, 'walk according to the full extent of your present ideal, and nothing less.' In such

persons, as in himself (1 Co 4⁴), he assumes an habitual enjoyment of a good conscience, the absence of a sense of yielding to sin. Such is the sanctification of Christian maturity, the type of life belonging to those already 'spiritual' as distinguished from 'babes in Christ' (1 Co 3¹). The latter are still largely determined by nature, in contrast to grace (σάρκιοι), by 'the flesh,' in its conflict with 'the Spirit' (σπῆρικοί, cf. Gal 5¹⁷). They have not yet come to realize their own position, its dangers, and the resources at hand in the Spirit, in obedience to whose impulse they are bidden consciously to walk (Gal 5¹⁶ πνεύματι περιπατεῖτε καὶ ἐπιθυμίαν σαρκὸς οὐ μὴ τελήσῃτε). To such St. Paul says in remonstrance: 'If it be to the Spirit that you are fain to trace any true life you possess, why do ye not habitually walk in conscious reliance upon His promptings, but rather follow promiscuously the first instinct—whatever that may be, whether of flesh or Spirit? The principle of either sort of action is still within; yet if you yield yourselves definitively to the Spirit, and wait on His illumination, as He reveals the things of Christ, the flesh will be practically neutralized and not affect your walk, which shall then be ever "in the Spirit," relative to your degree of enlightenment' (Gal 5¹⁶ 25-26).

(2) This conscious self-consecration to the indwelling Spirit, to carry out God's will alone under His prompting, and so to bear only 'the fruit of the Spirit' (Gal 5²²), is set forth under various figures, but is uniformly represented as a single act—whether of breaking definitely with sinful habits, or of self-devotion to the Divine sway. 'Let us (once for all) cleanse ourselves (καθαρίσωμεν ἑαυτοὺς) from all pollution of flesh and spirit, perfecting holiness (ἐπιτελοῦντες ἁγιασμὸν) in the fear of God' (2 Co 7¹). 'I beseech you . . . to present (παράσθησαι) your bodies a living sacrifice, hallowed, acceptable to God, as your spiritual service; and undergo, not a process of conformity to this age, but of transformation in mental renewal, that ye may prove what the will of God is—that good and acceptable and perfect will' (Ro 12¹). Here the process of gradual conformity to God's will is represented as following upon a definite self-surrender, in which the virtual or ideal relation to God, implied in trustful acceptance of Christ as 'righteousness and sanctification' to the sinful soul, is consciously realized and reaffirmed. As united to Christ by faith, Christians had 'died to sin,' and their 'old man' (old moral personality) was crucified with Him (Gal 5²⁴) and virtually 'put off'; coincidentally they had been 'raised together with Christ,' in the power of a new moral personality, and had virtually 'put on the new man' which is in process of renewal unto full insight after the image of Him that created him' (Ro 6²⁻¹⁰, Col 3⁹⁻¹¹, Eph 4²²⁻²⁴). But to this, their virtual state, many needed to be awakened, in order to put themselves consciously into the line of the Divine will and working, and no longer ignore the Holy Spirit's inward striving to work out, in realized acts, the consecrated attitude of their inmost being. And such awakening and real consecration—such arming for the fray—was rather a thing of definite decision (expressed by aorists, Ro 13¹⁴, Col 1¹⁰, Eph 6¹¹ 12-16) than of vaguely protracted process (expressed by presents).

(3) But such definitive self-surrender is no prelude to a life of effortless passivity. The true attitude once definitively assumed, it is to be reaffirmed in a lifelong process of conscious acts of obedience, the grounds, bearing, and issues of which are now appreciated (Eph 6¹⁰ 18). No longer will it be marked by frequent 'grieving of the Spirit,' who has 'sealed' the soul for final redemption, but by a 'filling with the Spirit' (Eph 4³⁰ 5¹⁸). In such a process the Christian is 'consummating holiness' (ἐπιτελὼν ἁγιασμὸν), being hallowed in fresh ranks of his powers, even as Christ could say, 'For their sakes I hallow myself, that they themselves also may be hallowed by (the) truth' (Jn 17¹⁹ 17). Such hallowing has no necessary connexion with purification from sin, but only with realization of the possibilities of devotion to God's will in love. It was here that St. Paul felt himself not yet to have attained or to have been brought to perfection.

(c) *The Epistle to the Hebrews*.—It was probably of this positive holiness, resulting from deepened consecration, that the writer to the Hebrews was thinking when he spoke of the Divine discipline of suffering as meant to issue in participation in the Father's holiness (12¹⁰). But, on the whole, the objective aspect of sanctification, that of a true covenant-relation established by the offering of the Son's holy will in His life-blood, prevails in this Epistle. In it cleansing, consecration, and perfection* (9¹³ 10¹⁰ 14), all refer to the initial status of the believer (so Ac 26¹⁸, cf. 20³²), as one of perfect access to the Father through the perfect sacrifice of the Mediator. The present participle, οἱ ἁγιαζόμενοι, does not refer to progressive sanctification, but expresses a constantly growing class, and so is equivalent to οἱ ἅγιοι (2¹¹ 10¹⁴).

(d) *St. Peter*.—We have seen already how his use of ἐν ἁγιασμῷ πνεύματος refers to the initial consecration wrought and sealed by the Spirit. Similarly in 1 P 1²² τὰς ψυχὰς ὑμῶν ἡγνικότες ἐν τῷ

* He 6¹ ἐπὶ τὴν τελειότητα φερόμεθα is only a seeming exception; for it refers to knowledge, not to personal character.

ὁ πακοῦ τῆς ἀληθείας εἰς φιλαδελφίαν ἀνυπόκριτον, ἐκ καρδίας ἀλλήλους ἀγαπήσατε ἐκτενῶς, ἀναγεγεννημένοι, κ.τ.λ., the perfect ἡγνικότες (like ἀναγεγεννημένοι), 'refers back to the initial act of consecration, of which their acceptance of baptism was the outward sign. The working out of this . . . remained' (Hort); and it is represented as something to be taken in hand once for all (aorist). With this accords the other pertinent passage, 1 P 1^{12f}, though it has but little theoretic significance. Hort takes its imperative, 'become ye holy' (ἁγιοί . . . γενήθητε), to refer to manifestation, not to essence. The thought is, 'show yourselves holy, as you are,' 'show forth in your converse with others the holiness that attaches to your standing as consecrated by the Spirit's touch.' So, too, in 2 P 1^{4f} believers are conceived to be, through the fulfilment of the precious promises of the gospel, 'sharers in (the) Divine nature,' and separate or hallowed from the corruption of worldly desire. But progress is still requisite in order to ensure the final fruition of their calling and election. They are called diligently to add to their faith virtue, insight, self-control, patience, piety, brotherly affection, and, to crown all, love. These are regarded as fruit, tokens of true knowledge of Christ. Their absence argues dull vision of things divine, and a forgetfulness of a man's initial cleansing from his old sins. Here the fact of progress in the experimental realization of the Divine life within is implied, but little or no theory of its rationale is given. Akin to this, in its practical point of view, seem the words in Rev 22¹¹ ὁ ἅγιος ἁγιασθήτω ἔτι: for parallelism with ὁ δίκαιος δικαιοσύνην ποιηράτω ἔτι tends to fix its meaning as 'let the saint still (once more) act as a saint.'

(c) *St. John*.—In St. John we meet the idea that the regenerate, in virtue of the Divine seed abiding in them, cannot sin habitually (1 Jn 3⁹ 5^{4, 18}, cf. 3⁶). But a progressive purification of life, on the model of Christ's purity and as the conscience is enlightened, is taught (πᾶς ὁ ἔχων τὴν ἐλπίδα ταύτην ἐπ' αὐτῷ ἀρνίσει ἐαυτὸν καθὼς ἐκεῖνος ἅγιός ἐστιν, 3⁸). It does not, however, seem to imply actual sin as a condition of purification: for St. John writes, that his readers may not fall into any single act of sin (ἵνα μὴ ἀμάρτητε, 2¹). If, then, a man walk in the light of a good conscience illumined by the gospel, it is possible to have unembarrassed fellowship with God, on the abiding basis of the cleansing effected by the atoning blood of Jesus (1⁷)—and that in spite of the presence of sin as a latent force within the soul (1⁸ ἀμαρτίαν ἔχειν). The initial consecration which brings free access (the *παρησία* of He 10¹⁹) suffices to neutralize sin, in the sense of a nature prone to sin; while the power of the Divine seed may avail, on condition of the will's abiding in Christ, to ward off actual sin, and that indefinitely. Meantime sanctification, in the sense of the effacing of old evil habits and self-consecration to new forms of love, will go forward uninterruptedly on the model of Christ's purity (1 Jn 3⁸).

C. CONNECTED SUMMARY.—In Biblical religion, as elsewhere, the religious conception of holiness precedes the ethical; the idea of special relation to God and His service antedates the idea of intrinsic human goodness. The former is at first conceived as a matter of ritual duly performed, which places the worshipper in a state of objective sanctity. At a certain stage, however, the Divine will became defined in terms largely concerned with morality: henceforth the religious relation or state of holiness could be measured and tested by obedience to such divinely sanctioned forms of human conduct. And as moral action was felt to derive its value from internal volition, religious holiness lost something of its strictly objective character,

and became bound up with the subjective state of man's heart or volition. This is the stage, roughly speaking, to which the prophets brought the idea of sanctification in Israel. As, moreover, any striking result in the direction of the Divine will was traced to the action of the Divine Spirit, the loyalty of heart found in Israel was traced to the Spirit of Holiness proceeding from Jehovah. It does not seem, however, that even in the prophets the piety and morality of the ordinary individual were directly traced back to the Spirit. The first suggestion of this profound idea may be found in Ps 51, where the taking away of God's Holy Spirit seems to be regarded as precluding the possibility of the 'clean heart' or 'steadfast spirit,' for which the psalmist supplicates. Yet in one special instance, that of Messiah Himself, the spiritual qualities which mark His consecrated life are traced to the action of the Spirit of Jehovah, Is 11². When we add that an ethical sense by this time attached to holiness in God, and was thence transferred to the holiness incumbent upon His worshippers ('Be ye holy, for I am holy'), we have already all the rudiments of a doctrine of sanctification such as emerges in the NT under the creative influence of Jesus the Christ.

The decisive advance, whereby each individual is sealed as a hallowed member of God's new Israel, appears as early as St. Peter's address on the Day of Pentecost; and not long after, the same apostle sees in the gift of the Spirit to Gentile believers the token of their hallowing also unto God's kingdom. But there is little or no sign that any one before St. Paul saw in the Spirit the very principle of the consecrated life in Christians, alike in its inception and in its development. His thought here was bound up with another most distinctive conception, viz. the mystical indwelling of Christ as the essence of the believer's life. How closely these twin ideas were related may be seen in the great passage, Eph 3¹⁶⁻¹⁹, in which he treats the strengthening of the inner man by the Holy Spirit as the condition of Christ's indwelling, in such wise that the believer is filled with His love, and so with the very fullness of God (cf. Jn 14-17). Here we notice, in passing, that the tenses employed point to the possibility of such an experience being attained at a definite stage subsequent to conversion. It answers to that more conscious and deliberate self-surrender to God's sanctifying grace which we have already recognized, on its human side, in such passages as Ro 12¹. But we observe in particular the fact that love seems to be to St. Paul (cf. 1 Co 13, Eph 1⁴, Col 3¹⁴), as to St. John, the all-inclusive ethical equivalent of personal holiness, as a state well-pleasing unto God, and indeed participation in His own essential life ('unto all the fullness of God,' cf. 2 P 1^{4, 7}).

Thus sanctification begins subjectively as faith (cf. Ac 26¹⁸), or trustful self-abandonment to God's revealed will; and ends as love. Attitude passes into character, the soul becoming assimilated to its object, the God to whom it is consecrated. This means that Justification, which involves regeneration, is implicit Sanctification; and actual Sanctification means the subjective attitude of the justified become explicit in moral life. Of the relation between the Divine and human factors active in sanctification as a process the NT gives no formal theory—any more than in the case of Faith itself, on which Sanctification, no less than Justification, is made to turn. It, too, begins and ends in faith: St. Paul might well have written ὁ ἅγιος ἐκ πίστεως ἵσταται. But the reality of each factor is strongly affirmed. Man is urged to 'work out' the grace within; yet with an awful sense that God Himself is already at work, prompting

and animating, and so in utter reliance on His mighty initiative. A moral conflict there is, a struggle that taxes the nerves of the soul and exercises all its vigilance; but it is a conflict of *faith* (1 Ti 6¹²), conducted in reliance upon Divine resources (Christ, and the Holy Spirit ever taking of His things and inspiring the soul), not in self-sufficiency (see Gal 2²⁰ in contrast to Ro 10²⁷ 7⁸⁻⁹ 3²⁷). The normal, and not only the intermittent, issue of such a conflict may be victory, and that without prescribed limit. Failure is due to imperfection of receptivity, intermittent 'abiding.' Yet, where this is understood, failure but strengthens for fuller victory, by deepening the sense of dependence; 'for when I am weak, then am I strong' (2 Co 12¹⁰).

LITERATURE.—The general literature is much the same as for REGENERATION, the sections in Martensen's *Dogmatics* being specially good and suggestive. Much bearing on our topic will also be found in books on the Holy Spirit, e.g. Kuyper, *The Work of the Holy Spirit* (Eng. trans. 1900), and works there cited. Among older treatises, Marshall's *Gospel Mystery of Sanctification* (1690) is a classic. The Methodist doctrine of Holiness as 'Christian Perfection' or 'Perfect Love' has created quite a literature of its own. And in recent times a large literature has arisen, devoted to the experimental side of the subject as placed in relief by the so-called 'Holiness Movement,' of which 'Perfectionism' is one special phase. But such literature is not, as a rule, marked by much exegetical precision, and is apt to confuse the Biblical and dogmatic standpoints. The most scholarly books of this type are those of Prof. H. C. G. Moule of Cambridge, e.g. *Thoughts on Christian Sanctity and Outlines of Christian Doctrine*. There is a pamphlet by J. A. Beet, entitled 'Holiness,' as understood by the Writers of the Bible' (1880), which examines the passages bearing on Sanctification in a careful and scholarly way. But in few books, save formal Biblical Theologies, is sufficient account taken of the standpoint and emphasis of the several Biblical writers, and in general of the psychological conditions involved in reducing their experimental language to theory.

J. V. BARTLET.

SANCTUARY.—The ideas underlying 'sanctuary,' a sacred or 'holy place' (שֶׁבִּיחַ, שֶׁבִּיחַ—the former, however, is rarely, the latter never, used in OT of the local sanctuaries, for which the Canaanite term שֶׁבִּיחַ is regularly employed*), form part of the larger group of ideas associated with 'holy,' 'holiness,' etc., which have been analyzed and discussed in their manifold applications in the article HOLINESS IN OT (vol. ii., see esp. p. 396*). In dealing with early Semitic religion, the term 'sanctuary' is used in a wider and a narrower application. On the one hand, the whole territory in which a particular deity is worshipped was in a sense his sanctuary; in this sense Canaan, 'JH's land' (Hos 9³), is also His house (8¹ 9¹³) and a 'holy land' (Zeph 3¹¹). On the other hand, in every such territory there were particular spots which were regarded as the favourite haunts of the god, at which he had manifested his power in the past, and was supposed to be still peculiarly accessible to his worshippers. Such primitive sanctuaries consisted of imposing natural objects—in particular, mountains, springs of water with the fertile spots around them, a wide-spreading tree with the ground beneath its shade, or more arbitrarily selected spots associated with visible manifestations of the deity (theophanies). When the Hebrews entered Palestine they found the land thickly studded with such local sanctuaries, each of them a centre of Canaanite worship. As the country gradually came under their control, its sacred places became *ipso facto* sanctuaries of the national God, Jahweh. Only a few typical examples can be mentioned here,† reference being made once for all to the special articles on the places named.

* That 'sanctuary' (*mikdāsh*) and 'high place' (*dāmāh*) are synonymous in the older literature is evident from Am 7⁹ and Is 16¹². Cf. Ezk 20²⁸, where 'high hill' also appears as a synonym of 'high place.'

† A German scholar, Freiherr von Gall, has recently investigated over one hundred, E. and W. of the Jordan, in his monograph on ancient Israelite sanctuaries (*Altisrael. Kultstätten*, 1898).

(a) Comparatively limited in number are the instances where *springs* and *wells* are attested as the sites of sanctuaries in our extant literature. The best known are the ancient sanctuary of BEERSHEBA, associated by tradition with Abraham (Gn 21⁸) and Isaac (26³⁵), and retaining its sanctity to a late date (see below); KADESH (שֶׁבִּיחַ 'holy place'), also named En-mishpat or Judgment-spring (147), and BEER-LAHAI-ROI (167-14). GIHON, the modern Virgin's fountain, on the west side of the Kidron ravine, was the site of Solomon's consecration, and therefore a sanctuary of repute (1 K 13³⁸); his rival Adonijah assembled his friends by another sacred spot, 'the Serpent stone' (ZOELETH), which was by En-rogel, the fuller's spring (1 K 19).

(b) More numerous were the *sacred trees*, which played an important part in the religion of the heathen Semites, and are still objects of veneration among the fellahin of Syria, as the pieces of cloth hung on their branches and the fragments of broken pottery underneath amply testify. Abraham's first altar on the soil of Canaan was raised beneath the shade of the terebinth of MOREH (Gn 12⁷ 13¹⁸) at 'the place of Shechem,' an eloquent witness to the extreme antiquity of this oracular sanctuary. Here were buried the objectionable images of Jacob's household (35⁴); and the same tree, no doubt, is associated with Joshua (Jos 24²⁶) and Abimelech (Jg 16). Of equal antiquity was another sanctuary, the terebinth of MAMRE at Hebron (Gn 13¹⁸). These tree-sanctuaries, indeed, figure with peculiar frequency in the legends of the patriarchs—a fact which is to be interpreted as implying their existence long before the Hebrew conquest. Besides those already noted at Shechem and Hebron, others are found at Beersheba (Gn 21²³), at a spot near Bethel (85⁸), and, from a later period, at Ophrah (Jg 41¹¹ 34). The fact that justice was uniformly dispensed under religious sanction and protection implies the presence of a sanctuary at the palm of Deborah (Jg 4⁵)—by several recent scholars identified with the 'oak of weeping' (see ALLON-BACHTI of Gn 38[—] and at Gibeah, where, according to the better Greek text, Saul sat under the tamarisk 'at the high place' (see p. 197b note), apparently to administer justice. Under the monarchy, indeed, these tree-sanctuaries were multiplied indefinitely, as we learn from the vigorous polemics of the later prophets against the 'altars upon every high hill, in all the tops of the mountains, and under every green tree and under every thick oak, the place where they did offer sweet savour to all their idols' (Ezk 6¹³; cf. Dt 12², Jer 2²⁰ and often, Is 57⁵). For the sacred pole or 'asherah,' which some authorities regard as a substitute for the living tree, see ASHERAH, vol. i. p. 165.

(c) The special sanctity of *mountains* and *high hills* was a widespread belief, not confined to the Semites, in the ancient world. The earliest sanctuary of which we have any historical, as distinguished from legendary, record in OT is the mountain sanctuary of HOREH-SINAI, 'the mountain of God' (Ex 31, cf. 1 K 15⁸). HERMON, as its name implies, was invested with similar sanctity. Within the limits of Canaan the names of CARMEL (1 K 15²³), the opposing peaks of EBAL and GERIZIM, TABOR (Hos 51), and the Mt. of OLIVES (2 S 15³²) at once suggest themselves. These, after all, are insignificant in number compared with the innumerable 'high places' or *dāmāh* with which the land was studded (see HIGH PLACE, vol. ii. p. 381, for ample ref.). Down to the 7th cent. B.C. the religious customs of the Hebrews required that every town and village should have its local sanctuary, just as in Christian lands every parish has its church. From the interesting narrative 1 S 912ff. 105 we learn that these sanctuaries were situated on the nearest commanding eminence. Where no such eminence was available, the sanctuary, it has been supposed, was erected upon an artificial mound (cf. Jer. 31, 2 K 17⁹). The usual type, however, of the artificial sanctuary, that is, a sanctuary created by human hands to mark the site of a special Divine manifestation, was the sacred pillar or *mazzēbah* or the sacred stone circle (שֶׁבִּיחַ) or cromlech (see, for details, PILLAR, vol. iii., and cf. ALTAR, vol. i. p. 75).

Several of the above-mentioned sanctuaries had a more than local reputation. Those of greatest repute in the Northern Kingdom were Bethel, the chief 'royal sanctuary' (שֶׁבִּיחַ, AV 'the king's chapel,' Am 7¹³), with its companion sanctuary Dan; Gilgal (Am 4⁴, Hos 4¹⁵ etc.); and the far distant Beersheba (Am 5⁸ 814). A favourite sanctuary was at Gibeon, 'the great high place' (1 K 34^{ff}), where Solomon's inaugural sacrifices were offered. In the period from the conquest to the building of the temple, the presence of the ark gave a special sanctity to the place of its location. Thus there can be no doubt that SHILOH was the principal sanctuary in the time of the judges; a special temple (שֶׁבִּיחַ) was built for the greater safety of the ark, with the house of Eli as its ministrant priests. Hence the annual religious festival at Shiloh was one of exceptional importance (Jg 21¹⁹, 1 S 13²¹). Whether the important sanctuary at NOB was contemporary with that at Shiloh is uncertain;

* We do not include here the graves of the Hebrew patriarchs and heroes, since it is still a moot point to what extent, if at all, these were places of worship for their descendants.

the first mention of it occurs after the destruction of the latter (1 S 21¹⁸), but this may be accidental. All the sacred places of the South, however, were soon eclipsed by the royal sanctuary at Jerusalem, raised on the spot consecrated by the theophany at the threshing-floor of Araunah (2 S 24^{18, 25}, 2 Ch 3¹).

Round these ancient shrines centred the religious life of the Hebrews in early times. Hither they flocked as the annual festivals came round, at the recurring new moons and sabbaths, to offer their tithes, their first-fruits, and their sacrifices. Unfortunately, we can only partially reconstruct either the equipment of these sanctuaries or the ceremonies which characterized the worship of antiquity, with its sacrificial meal and the joyous intercourse of the sacral community. Without unnecessarily repeating the facts already given in the article *HIGH PLACE* (§ iv. vol. ii. p. 382), we may note the indispensable altar with its almost universal adjuncts, the sacred pillar (*mazzēbah*) and the sacred pole (*ashērah*), the hall (מִזְבֵּחַ 1 S 9²²) or halls in which the sacrificial feast was held, a temple or shrine (בֵּית 1 K 12³¹ and elsewhere) for the protection of the sacred images which formed part of the equipment of some sanctuaries at least, such as the mysterious EPHOD and the almost equally mysterious TERAPHIM (see commentaries on Hos 3⁴).

PLAN OF HIGH PLACE, PETRA.

The recent discovery of what must have been the royal sanctuary of Edom, close to the ruins of Petra, affords very material aid in the reconstruction above desiderated. Near the summit of a mountain overlooking Petra* were found two rock-

cut 'obelisk-like columns,' about 18 ft. in height, and some 100 ft. apart, clearly the *mazzēbahs* of OT. On the actual summit was a large court, 47 ft. by 20, hewn in the rock to the depth in parts of 18 in., and approached from below by a stair cut in the rock. Near the centre of the court sufficient rock has been left to form a raised platform 5 ft. by 2½, and 4 in. in height. It has been suggested that here the worshipper stood whose victim was being offered, the rest of the worshippers standing in the surrounding court. On the west of the latter, facing the raised platform, stands the altar, 9 ft. by 6, in height 3 ft., cut free on all sides from the surrounding rock, and furnished on the side towards the court with a short flight of four steps. On the topmost step, which is considerably the largest, stood the officiating priest. In the centre of the upper surface of the altar a rectangular depression has been hewn out to serve as the altar-hearth. Immediately to the south of the altar, and approached from it by steps, the rock presents a flat surface with two large 'circular and concentric' cups hewn out with vertical sides, the larger 3 ft. 10 in., the smaller 1 ft. 5 in. in diameter. Here the sacrifices may have been prepared, as a conduit leading from the lower cup seems to have served to carry away the blood of the victims. For further details reference must be made to the articles cited, both of which are illustrated by photographs and drawings.

From the time when the Hebrews served themselves heirs to the sanctuaries of Canaan, the worship of J^h was there celebrated for several centuries with the full approval of Israel's religious guides (see 1 S 7¹⁷, 1 K 3¹⁸ and oft.). Such local worship is alone contemplated in the oldest Hebrew legislation ('in every place where I record my name I will come unto thee and I will bless thee,' Ex 20²⁴). But by this multiplicity of sanctuaries the religion of J^h was exposed to two great dangers, against which the prophets of the 8th century repeatedly utter the most solemn warnings. In the first place, there was an ever-increasing admixture of heathen Canaanite elements with the purer and more spiritual elements of the true Hebrew cultus, until Hosea could truthfully declare that the worship of J^h had practically degenerated into idolatry (13²) and its ministrants into idol-priests (see CHEMARIM). In the second place, the native religion, with its multiplicity of local Baalim, exerted a baneful influence on the Mosaic doctrine of the unity of J^h. The Northern Kingdom came to an end before a reformation could be effected. In the South, thanks to the unique position of its royal sanctuary and the comparative purity of the cultus as there practised, this twofold danger was not felt to quite the same extent. Yet the destruction of Samaria, the strongest possible proof of the Divine commission of her prophets, could not fail to make a profound impression on the best religious spirits of the South, while, at the same time, the greatly enhanced importance of the temple at Jerusalem would gradually tend to diminish the popularity and prestige of the local sanctuaries. Whether Hezekiah really made the attempt at centralization with which he is credited (2 K 18⁴) must be left an open question. The reform, at the best, was shortlived. Not till the far-reaching reformation of Josiah, under the immediate inspiration of Deuteronomy (B.C. 622-621), were effective measures taken for the destruction of the local sanctuaries and the deportation of their priests to Jerusalem (2 K 23). The losses as well as the gains of so drastic a measure of reform have been set forth under the article *HIGH PLACE* (with which compare DEUTERONOMY, JOSIAH). In the Priestly document (P) the battle has long been won, and scarcely an echo remains. The law and practice of one central sanctuary are transferred to the period of the desert wanderings (see TABERNACLE), an unhistorical presentation of the religious history of the Hebrews which dominates the whole subsequent literature, and has prevailed to our own day.

In what has been said up to this point, the purely religious aspect of the ancient sanctuaries has been properly kept in the foreground. But, in early times at least, these sanctuaries were also the seats of justice (*θέμεις*), of which their priests

* The following is based on an article by Professor Robinson of Chicago (who, though not the first to visit the site, was the first to realize its importance, April 1900), entitled 'The High Place at Petra in Edom,' in the *Biblical World*, Jan. 1901; and on an earlier article by Professor Ives Curtiss (who visited the site in July 1900) in *PEFSt*, Oct. 1900.

were the administrators. In general, where the consuetudinary law of the clan or tribe proved inadequate, a fresh *torah* or Divine and authoritative decision was sought from *J''*'s representatives at the nearest sanctuary of repute. The extant law-codes, further, make provision for the interposition in specified cases of the priests of the local sanctuaries in their judicial capacity—whence their peculiar title *Elohim* (see *לֵוִיִּם* in *Oxf. Heb. Lex.*), though some of the passages in question (Ex. 21⁶ 22² [Heb. 7¹]; cf. 18¹⁵, 1 S 2²⁵) are of doubtful interpretation. More explicit are the recommendations of Deut. regulating the procedure of the supreme court at the central sanctuary (Dt 17⁹). Passing from the law-codes to the history, we find, as has been pointed out above, repeated evidence of the leaders of the people dispensing justice at the various sanctuaries, e.g. Moses at En-mishpat or Kadesh (see LAW IN OT, vol. iii. p. 67*), Deborah, Samuel,—whose circuit included Bethel, Gilgal, and Mizpah, all notable sanctuaries (1 S 7¹⁶),—and Saul (reft. above).

Every primitive sanctuary, further, in virtue of its inviolability as the abode of deity, was an asylum or place of refuge. This right of asylum is expressly recognized in the oldest legislation, only cases of premeditated murder being excluded (Ex 21¹³ 14; see GOEL, vol. ii. p. 223 f.; ALTAR, vol. i. p. 77*). The later institution of cities of refuge (see REFUGE) was the necessary corollary of the destruction of the local sanctuaries.

For the so-called 'shekel of the sanctuary,' see MONEY (vol. iii. p. 422). A. R. S. KENNEDY.

SAND (חֵלֶם *hēlem*) consists of an aggregate of incoherent grains of silex, generally mixed with others of different mineral substances, such as mica, felspar, and gems. It was a familiar object with writers of the Bible, and is therefore used emblematically, the expression 'as the sand which is by the seashore' being found in several passages Gn 22⁷, Jos 11⁴, 1 S 13⁵, 1 K 4²⁰ etc.). The reference is to the line of sandhills along the coast of the Mediterranean (see SEA (GREAT)) and Lower Egypt (Ex 2¹²).

In the following passages the word is used to represent—(1) *Numberlessness, vastness*: the descendants of Abraham (Gn 22⁷, Jer 33²², Ro 9², He 11¹²); the store of corn gathered by Joseph in Egypt (Gn 41⁴⁹); the nations of Canaan (Jos 11⁴); the Philistines (1 S 13⁵); the Israelites (2 S 17¹¹, 1 K 4²⁰, Is 10²² 48¹⁹); the captives of the Chaldeans (Hab 1⁹); Solomon's largeness of heart, i.e. wisdom (1 K 4²⁹ [Heb. 5⁹]); (2) *heaviness* (Job 6⁸, Pr 27³); (3) *an insecure foundation* (Mt 7²⁸).

Literature.

i. THE NAME AND ITS HISTORY.—*Sanhedrin* (i.e. *συνέδριον*) was the name applied to the highest court of justice and supreme council at Jerusalem, and in a wider sense also to lower courts of justice. In the Jewish tradition-literature this designation, borrowed from the Greek, alternates with the post-biblical Heb. בית דין *Aram.* בית דין. The Hebrew-

Aramaic form סנהדרין (we find also the punctuation סנהדרין) sprang from the Greek word, the aspiration of the second vowel (from *ἔδρα*) becoming audible and being transcribed with ה. The ending -ון was pronounced as a monosyllable, with elision of the ο, as in other words with the same ending (cf. *σῖς* = *παλάτιον*, i.e. *palatium*). The word, however, is found written also without ה (see Levy, *Wörterb. z. den Targumim*, ii. 175; *NHWB* iii. 553b). From סנהדרין, which sounded like a Semitic plural, there was even formed a sing. form סנהדרין, which is met with not infrequently. Both forms were treated as feminines. From סנהדרין was formed the plur. סנהדרין.

Owing to the character of the ancient traditions embodied in the Talmudic literature, it cannot be gathered from these when the employment of the Greek word began. In the halachic tradition it makes its appearance as completely naturalized and belonging to the ancient vocabulary of this tradition. The first historical statement in which Josephus employs the word *συνέδριον* has regard to the procedure of the Roman governor of Syria, Gabinius, who abrogated the constitution of the country of the Jews, and divided the latter into five districts, each with a *synedrion* at its head (*Ant.* XIV. v. 4). One of these *synedria* had its seat at Jerusalem, and was of exactly the same rank as the others. But it is not likely that the name first took root on this occasion (B.C. 57), and in consequence of the action of Gabinius. For if the term was first employed in his decree degrading the supreme council of Jerusalem, it would surely not have been retained when, a few years afterwards, the Sanhedrin at Jerusalem regained its dignity; nor, if it had had so hateful an origin, would it have gained the popularity which is conspicuous in its employment in the national tradition, and especially in that connected with religious legislation. But a direct proof of the earlier origin of our loan-word may be drawn from the Alexandrian translation of the OT. In the LXX version of the Book of Proverbs *συνέδριον* is used pretty frequently: so in 15¹⁷ to reproduce סר in the sense of 'deliberative assembly' (cf. also 11¹⁸ and 3²², likewise Jer 15¹⁷). In 26²⁶ נקרה is rendered by *ἐν συνέδριον*. But specially striking are the renderings of 22¹⁰ and 31²⁴. In the former of these passages the translator read יושב בית דין for יושב בית, and rendered accordingly *ἔσαν γὰρ καθίσαντες ἐν συνέδριον*, where, however, *συνέδριον* is, as in the language of the Palestinian schools, equivalent to בית דין. In the other passage the second half of the verse is rendered *ἡκούσα δὲ καθίσαντες ἐν συνέδριον μετὰ τῶν γερόντων κατοικῶν τῆς γῆς*. The addition *ἐν συνέδριον* is plainly occasioned by the mention of the 'elders' of the land, for the members of the Sanhedrin are called *ἡγῆται* (*πρεσβύτεροι*), and the Sanhedrin itself (see below) also bears the title *γερονσία*.—Now we do not know when the Book of Proverbs was translated into Greek, but in all probability it is included among the 'other books,' besides the Pentateuch and the Prophets, whose translation into Greek is mentioned in the Prologue to Sirach. In that case the Greek translation of Proverbs would have been in existence as early as B.C. 130, and *συνέδριον* had been then for a long time the common property of the Jewish school speech, into which it must have found its way at the era of the Græco-Syrian supremacy.

ii. ORIGIN AND HISTORY OF THE INSTITUTION.

—1. It might be assumed beforehand that the institution which received the Greek title *συνέδριον* in the 2nd cent. B.C. had also an existence of some kind during the earlier centuries of the second temple. It has been suggested that the GREAT SYNAGOGUE (בית הכנסת הגדול), which in the school tradition (see *Aboth* i. 1) forms the connect-

ing link between the last of the Prophets and the first teachers of the Law who are named in the Greek period, was nothing else than the supreme council of Jerusalem, afterwards called the Sanhedrin. But it is to be noted as a fact that the school tradition itself understands by נסר הנדירה not an institution persisting for centuries, but that extremely important assembly held under Ezra and Nehemiah (Neh 8-10), which was called the 'great,' just as 1 Mac 14²⁸ gives the name συναγωγή μεγάλη to the assembly which nominated Simon hereditary prince and high priest. Of course it is possible that the supreme council of Jerusalem was thought of as the continuation of that great assembly, or, rather, that the great assembly was thought of as the supreme council, the Sanhedrin of the period between the last of the Prophets and the beginning of the Greek domination. Such a conception would make its way all the more readily, seeing that later tradition contracted this period to a few decades. It would also explain the circumstance that in the Roll of Fasts (*Megillat Taanith*) the Sanhedrin is called נסר (= נסר) in the passage cited below. An actual trace of the highest court of justice as it existed in Jerusalem at the close of the Persian period should perhaps be discovered in the description of the college of judges which, according to 2 Ch 19⁸, king Jehoshaphat instituted at Jerusalem, and whose functions are specified, having regard to Dt 17⁸. In this description the Chronicler had before his mind's eye the institution as it existed in Jerusalem in his own day.

2. In the records relating to the Greek period we find the supreme council of Jerusalem bearing the designation *γενοῦσα*. It is so named by Antiochus the Great (c. 200 B.C.) at the head of the leading classes of the Jews who are freed from all imposts and taxes (Jos. *Ant.* XII. iii. 3). Antiochus v., in a letter to the Jewish people (B.C. 161), offers greetings τῇ γενομένῃ τῶν Ἰουδαίων (2 Mac 11²⁷). Elsewhere, too, in the narratives of the Maccabæan era there is mention of the *γενοῦσα*, or we find the first place assigned to the 'elders' (οἱ πρεσβύτεροι) of Israel (cf. Schürer, *G.J.V.* ii. 192 [*HJP* II. i. 167]). In the Talmudic tradition the Sanhedrin of the Hasmonæan period is called בית דין של חשמונאי 'house of justice of the Hasmonæans' (*Aboda zara* 36b; *Sanhed.* 82a). Its history coincides partially with the history of the conflicts between the PHARISEES and SADDUCEES. When John Hyrcanus, towards the end of his reign, shook himself loose from the Pharisees and declared their enactments to be without force (Jos. *Ant.* XVI. xi. 1), he is not likely to have accomplished this without having expelled the Pharisaic members from the Sanhedrin. There came thus into being a 'Sadducean Sanhedrin' (סנהדרין של סדוקים; cf. בית דין של סדוקים of Bab. *Sanhed.* 52b), as it is called in a valuable tradition preserved in § 10 of the Roll of Fasts (*Megillat Taanith*) which is of importance for the history of the Sanhedrin. Here it is said that on the 28th of the month Tebet : יריבא נכסרמא קל : ריבא, i.e. 'the assembly constituted itself according to the law,' or 'the assembly sat for judgment.' According to the accompanying gloss, which rests beyond doubt on historical tradition, this event, whose memory was thus perpetuated by an anniversary, took place in the reign of Jannæus, and consisted in the expulsion of the Sadducean members from the Sanhedrin, and in the constitution of a new Sanhedrin, whose deliberations were conducted on Pharisaic principles, under the leadership of Simon ben Shetach. But this victory of the Pharisees was soon followed by the bitterest conflicts, between them and Alexander Jannæus, and by the consequent supremacy of the Sadducees in the Sanhedrin, which, however, had to yield

in turn to that of the Pharisees under Jannæus' successor Salome Alexandra.

In the brothers' quarrel amongst the sons of Alexandra, the Sanhedrin must again have played its rôle. This strife led to the intervention of Rome, and not long afterwards to the above-mentioned degradation of the Sanhedrin by Gabinius. This degradation, however, was only transient, and soon we find the Sanhedrin sitting in judgment upon Herod the young son of Antipater (*Ant.* XIV. ix. 4). This memorable judicial sitting was destined to be fateful for the Sanhedrin, those who took part in it falling victims to the bloody revenge of Herod when he came to power (*ib.*). The institution itself Herod allowed to continue. He even utilized the Sanhedrin to get sentence of death passed upon the aged Hyrcanus (*Ant.* XV. vi. 3).

3. During the period of the Roman procurators, which was interrupted for a few years (A.D. 41-44) by the reign of Agrippa I., the Sanhedrin continued to be the supreme authority of the Jewish people. It appears as such in the NT narratives of the trial of Jesus (Mt 26⁵⁷, Mk 14⁵⁵ 15¹, Lk 22⁶⁶, Jn 11⁴⁷), as well as on other occasions in the early days of Christianity (Ac 4¹⁵ 5^{22ff.} 6^{12ff.} 22³⁰ 23^{1ff.} 24²⁰). Jesus Himself once (Mt 5²) names the Sanhedrin as the tribunal called on to give judgment in the case of capital offences. In Josephus' record of the events that occurred in the times of the last procurators and during the war against Rome, the Sanhedrin is mentioned sometimes as συνέδριον and sometimes as βουλή. Or he speaks, as is almost his uniform practice in his autobiography, of the κοινὸν τῶν Ἰεροσολυμιτῶν (*Vita* 12. 13. 38. 49. 70), or, shortly, τὸ κοινόν (*ib.* 52. 60), meaning by this especially the Sanhedrin. It was the latter that during the first years of the war with Rome guided affairs and organized the struggle. But when the Zealots seized the reins of power in the besieged Jerusalem, they no doubt put the Sanhedrin aside. In order to procure a sentence of death upon a man who had incurred their displeasure, the Zealots assembled *ad hoc* a tribunal of 70, in which Josephus (*BJ* IV. v. 4) sees a caricature of the regular court. Amongst the traditions relating to the melancholy events connected with the fall of the Jewish State, we read not only of the destruction of the Temple but of the 'cessation of the Sanhedrin' (*Sota* ix. end; *Echa rabbathi* on La 5¹⁶). 'With it,' we are told, 'ceased the joyous song of the feasts.'

4. As the Jewish people itself, immediately after the destruction of Jerusalem, began a new life in Palestine under new conditions, so also the Sanhedrin of Jerusalem experienced a kind of resurrection. At Jabneh (Jamnia) an assembly of teachers of the Law constituted itself and regarded itself as the continuation of the Great Sanhedrin. In the first instance a university or academy, but then an assembly which deliberated, which interpreted the laws of the Jewish religion, and thus became really a legislative and judicial body,—this new Sanhedrin, as constituted at Jamnia, had many points of close contact with the old council of Jerusalem. And when Jamnia ceased to be the central point of Jewish scribism, the Sanhedrin migrated—so the tradition expressed it (*Hosh hashana* 31a b, upon the authority of R. Jochanan, † 279)—to other places, till it settled down at Tiberias. This notion of the persistence of the Sanhedrin even after the destruction of Jerusalem, and of its continuance in the high schools of Palestine, has largely influenced the traditions about the Sanhedrin. What was true of the new institution was transferred to the ancient one, and the historical picture of the latter was thus essentially changed. Yet it may be assumed, on

the other hand, that faithful adherence to tradition about the ancient Sanhedrin secured the retention in the new body of many peculiarities of the institution as it had existed in its last decades. In this way even the statements about the Sanhedrin preserved in Tannaite tradition and in halachic theory may be treated as historical evidence. It is hard, to be sure, to bring this evidence into harmony with the statements of Josephus and the NT, but all the same it is to these first-named witnesses that we owe our acquaintance with most of the features in the picture we are to draw of the character and activity of the Sanhedrin.

5. In distinction from the lesser courts of justice which were found in all the cities of the Jews' country, the Sanhedrin at Jerusalem was called the Great Sanhedrin (סנהדרין גולה or סנהדרין גולה, the same as גולה). The Mishna (*Sanhed.* i. 6) says on this point: 'There was a great Sanhedrin of 71 members and a little Sanhedrin of 23.' According to the Tannaite Jose b. Chalaftha, well known as a chronologist and a source of historical information, there were in Jerusalem itself, besides the Great Sanhedrin, other two little *synedria*. This statement, which is coupled with information about the activity of the Sanhedrin (Tosefta, *Chagiga* ii. 9, and *Sanhed.* vii. 1; Jerus. *Sanhed.* 19c; Bab. *Sanhed.* 88b), agrees with the anonymous statement of the Mishna (*Sanhed.* xi. 2) and the Sifrê (on Dt 17^s § 152).

iii. PLACE OF MEETING.—The seats of the two lesser courts of justice of Jerusalem are specified in the above passages as, respectively, 'the entrance of the Temple mount' [in one version 'the Temple mount'], and 'the entrance of the Temple court' [in one version 'of the Chêl,' *Middoth* ii. 3]. The legend of the destruction of Jerusalem (*Echa rab.* Procem. n. 23, *ib.* on La 2^d and 4th; *Kohel.* rab. on Ec 3¹⁶; Bab. *Gittin* 57b) also speaks of the great and the little Sanhedrin.—As the seat of the Great Sanhedrin, the Tannaite tradition (besides the above-cited passages, see Mishna, *Peah* ii. 6, *Eduyoth* vii. 4) names 'the Hall of Hewn Stone' (לשכת הנוי), which, according to *Middoth* v. 4, was on the south side of the great court. This hall served the priests also for the disposing by lot of their functions (Mishna, *Tamid* ii. end; Tosefta, *Yoma* ii. 10; Bab. *Yoma* 25a), and as the place for the recitation of the *Shema* (*Tamid* iv. end).

According to a *baraita* of the Bab. Talmud (*Yoma* 25a) the 'Hall of Hewn Stone' was in the form of a 'great basilica.' But this statement may have arisen from the description of the basilica at Alexandria in which the Sanhedrin there held its sittings (Tos. *Sukka* iv. 6; Bab. *Sukka* 58b). Abayi, a Bab. Amora of the 4th cent., inferred from the statements about the use of the Hall of Hewn Stone, that the latter lay half on sacred ground and half outside it. In any case the Hall must be thought of as within the Temple area, and the view of Schürer (*GHF* II. 811) that לשכת הנוי means the *thesaurus* and לשכת הנוי the hall by the *Xystus*, and that the latter is identical with the *boula* mentioned by Josephus (*BJ* v. iv. 2), cannot hold ground. Josephus gives in this passage the situation of the place where the 'council' (Sanhedrin) held its sittings during the last years of the Jewish State. But, according to a tradition which is to be regarded as in its kernel true, during the last years of Jerusalem the sittings of the Sanhedrin were no longer held in the Hall of Hewn Stone, but were removed from it to a place called the 'trade hall' (לשכת המכירה, *var. loc. plur.* לשכת המכירות 'trade halls'), and from there again to 'Jerusalem' (*Shabbath* 15a; *Rosh hashana* 31a; *Sanhed.* 41a; *Aboda sera* 8b). According to this authority the last sittings of the Sanhedrin were held outside the Temple area, in the city itself, and it is to this situation that Josephus' words about the *boula* in the neighborhood of the *thesaurus* refer.

iv. COMPOSITION OF THE COURT.—1. The Great Sanhedrin consisted, according to the above-cited testimony of the Mishna, of 71 members. It is called on that account סנהדרין של שבעים ואחד (*Shebuoth* ii. 2), or סנהדרין של שבעים ואחד (Jose b. Chalaftha, *l.c.*; cf. also Mishna, *Sanhed.* i. 5; Tos. *Sanhed.* iii. 4).

The derivation of this number from that of the 70 elders of Nu 11¹⁶, which with Moses amounted to 71, appears to be old (Mishna, *Sanhed.* i. 6; Sifrê on *Numbers*, § 92). It is questionable whether it was this derivation that determined the number of members, or whether the number already established found its sanction by thus going back to the Bible narrative. According to the above-cited statement about the basilica of Alexandria, there was in that city also a Sanhedrin of 71 members. The same number was retained at Jamnia, for, as Simon b. Azzai (before A.D. 150) relates, there were 72 elders present, when Eleazar b. Azarja was associated with Gamaliel II. as president (Mishna, *Zebachim* i. 3; *Yadaim* iii. 5, iv. 2), *i.e.* one more than the usual number. An isolated tradition, from Jehudah b. Ilai, fixes the total membership at 70 (Mishna, *Sanhed.* i. 6; Tos. *Sanhed.* iii. 9), and the Great Sanhedrin is called accordingly סנהדרין של שבעים (Sifrê on *Numbers*, § 92). Josephus likewise chose 70 of the elders of the land to constitute the supreme authority in the province of Galilee, which had been assigned to him (*BJ* II. xx. v); and in the same way the court set up by the Zealots (see above, ii. 3) numbered 70 members. The vacillation of our authorities between the numbers 70 and 71 is no doubt due to the circumstance that the president might be regarded as belonging to the total number or not.

2. We have no positive information as to who composed the Sanhedrin. The halachic tradition on this point must be regarded as theory, derived only in part from the actual condition of things. The members of the Sanhedrin were called זקנים 'elders' (= *πρεσβύτεροι*), a name which gained its special sense from the fact that the Sanhedrin was regarded as an institution set up by Moses when he nominated the 70 elders (Nu 11). It is members of the Sanhedrin that are meant when it is said that the preparing of the high priest for his functions on the Day of Atonement is to be attended to by זקנים כותבי כותב (Yoma i. 3, 5). Again, זקן is doubtless to be taken in its special sense of member of the Sanhedrin, when the epithet זקן is applied to Shammai, Hillel, and Hillel's grandson Gamaliel I. In the NT the members of the Sanhedrin (*πρεσβύτεροι*, or *πρεσ. τοῦ λαοῦ*) are often named along with the chief priests (*ἀρχιερεῖς*) and the scribes (*γραμματεῖς*), for the membership of the Sanhedrin was recruited from these two leading classes (Schürer, *l.c.* p. 200). Josephus, in whose writings the Sanhedrin is frequently called *βουλή*, also calls its members *βουλευται* (*BJ* II. xvii. 1). This designation probably accounts for one of the halls of the Temple being called לשכת הנוי 'hall of the *βουλευται*.'

The same hall afterwards bore the name סנהדרין 'hall of the *πρόεδροι*' (Mishna, *Yoma* i. 1). This last title, which has been handed down by the Tannaite Jehudah b. Ilai (Bab. *Yoma* 8b), is quite worthy of credit, and it supports the suggestion of Schürer that by the *πρόεδροι* should be understood the highest in rank of the members of the Sanhedrin, the 'first ten' of whom we hear under the procurator Festus (*Ant.* xx. viii. 11, *τοὺς πρώτους δέκα*; cf. Schürer, *l.c.* p. 201 f.). Upon the above-cited authority of Judah b. Ilai we are told that the *πρόεδροι* were changed every twelve months, so that the rank of 'first ten' was enjoyed by different members of the Sanhedrin every year. If we, further, take into account that the institution of the *πρόεδροι* was of late origin, we can readily understand how the above change of name for the hall also came into use. The circumstance that the 'hall of the *πρόεδροι*' was the private residence of the high priest is not difficult to explain, considering the relation of the high priest to the Sanhedrin. The *βουλευται*, afterwards the *πρόεδροι*, may have assembled in the house of the high priest (cf. Mt 26⁷, Mk 14⁵⁸) before taking their places in the public sitting of the Sanhedrin.

3. Of distinctions of rank within the Sanhedrin we hear nothing, apart from the above-mentioned conjecture. Neither are we aware on what principle the members were nominated or how the Sanhedrin filled up vacancies in its number. Only

two, divergent, statements have come down to us regarding the latter point, and of these one can refer only to the period preceding the destruction of Jerusalem, whereas the other has in view rather the school of Jannia and its successors. The first statement is found in the above-named narrative of Jose b. Chalafta, and in an anonymous precept of the Tosefta (*Shekalim*, end), according to which a seat in the Sanhedrin is the last step in the career of judge. Any one who distinguished himself as a judge in his place of residence was advanced to be a member first of the one, then of the other, of the two lesser *synedria* at Jerusalem, and was chosen finally to be a member of the Great Sanhedrin. According to the other statement (*Mishna, Sanhed. iv. 4; Tos. Sanhed. viii. 2*), in front of the members of the Sanhedrin sat in three rows the non-ordained scribes, and from among these any vacancies in the membership were filled up, the requisite number being chosen and ordained according to a fixed order. It is plain that these two accounts of the filling up of vacancies relate to different periods of time. In the first, which has in view the period before the destruction of Jerusalem, there is no mention at all of the ordination of the new members, but we find the expression *רוֹשֵׁי*, which means 'cause to sit,' implying simply that the new member had a seat assigned him in the Sanhedrin. This is quite intelligible, for, according to the view we are considering, those who became members of the Sanhedrin had previously officiated in the lower courts, and were thus ordained already.

4. As to the qualifications for membership in the Sanhedrin, the oft-cited narrative of Jose b. Chalafta gives a list of the personal qualities which the candidate for this high rank must possess. He had to be learned (*רוֹכֵן*), humble (*גָּנִי*; *Bab. Sanhed. 88a* *כָּךְ* *שָׁמַל*), popular with his fellow-men (*רַחֵם* *נִחָם* *רֵיבֵן*). In the different versions of the passage there are yet further moral qualities specified. In the ancient exposition of Nu 11¹³ (*Sifrē*, § 92) it is inferred from the word *אִישׁ* ('man') that the members must be perfect men: learned, courageous, strong, and modest. Jochanan, the Palestinian Amora of the 3rd cent., states the qualifications of a member of the Sanhedrin thus: tall stature, learning, dignified bearing, advanced age. Further, in order to be able to meet the demands of his office, he must be acquainted with foreign languages and initiated into the mysteries of the art of magic (*Bab. Sanhed. 17b*).

As the high court of justice described in 2 Ch 15⁹ consisted of 'Levites, priests, and heads of Israelitish families,' so in the ancient exposition of Dt 17⁹ (*Sifrē*, *ad loc.*, § 15 *ad init.*) it is stated that the court dealing with law cases must have priests and Levites amongst its members, but that even without these it might be legitimately composed. A rule of the Mishna (*Kiddushin iv. 5*) is to the effect that an inquiry as to purity of family descent is not to be carried beyond the Sanhedrin, since no one can be a member of it whose origin is not unquestionable. It is actually described in another rule (*Sanhed. iv. 2*) that judges in criminal cases, including therefore members of the Sanhedrin, are to be only priests, Levites, or Israelites whose daughters may be married by priests.

v. THE PRESIDENT OF THE SANHEDRIN.—1. On this point the tradition-literature contains statements which it is difficult or impossible to reconcile with the reports of Josephus and the NT. The last are meagre, indeed, and do not give a distinct picture of the method of procedure in the Sanhedrin and of the action of its president. But from Josephus we learn that in B.C. 47 the Hasmonæan high priest and prince Hyrcanus II. called the Sanhedrin together and directed the procedure in the case of Herod (*Ant. XIV. ix. 4 f.*), and that in A.D. 62 the Sadducean high priest Ananus II. summoned the Sanhedrin, in order to have some sentences of death passed (*ib. XX. ix. 1*). At the

trial of Jesus, the high priest Caiaphas appears at the head of the Sanhedrin (Mt 26⁶⁷), as does the high priest Ananias at the trial of St. Paul (Ac 24¹). Of such a function belonging to the high priest (cf. also 2 Ch 19¹¹) there is not the slightest trace in the tradition-literature. On the contrary, it is assumed as an axiom that the Sanhedrin had its own president, making up the number of members to 71 (see above). The simplest designation of the president is *רֹאשׁ בֵּית דִּין* 'head of the house of justice' (*Rosh hashana ii. 7, iv. 4*), which in the later haggadic literature is represented by *ראש של סנהדרין* (*Pesikta rabbathi*, c. xi. p. 43b). ראשי סנהדרין (*Tanchuma*, ed. Buber, i. 175), ראשי סנהדרין (*Esther rab. on 13^a*). But the title that must be regarded as peculiar to the president is *אב בית דין* 'father of the house of justice.' As head of the supreme court, the *'Ab Bêth Din* is once named after the king (*Yoma vii. 5*), once after the 'prince' (*Taanith ii. 1*), by which last title is meant the head of the State, who, after the usage of the Pentateuch and especially of Ezekiel, is frequently called in the halachic literature *נָשִׂא* 'prince'; once it is expressly said, with allusion to Lv 4²², *ואמר הנשיא והרמל* (*Horayoth iii. 3*). Now, remarkably enough, the same word *נָשִׂא* became the title of the president of the Sanhedrin. The sitting arrangements of the Sanhedrin are thus described (*Tos. Sanhed. viii. 1; Jerus. Sanhed. 19c*): 'The Sanhedrin sat in a semicircle [lit. 'like the half of a circular threshing-floor']; in the middle sat the *Nasi*, and the elders [*i.e.* the members of the Sanhedrin] sat upon his right hand and upon his left.' This statement appears to relate to the Sanhedrin of Jamnia, for it is followed immediately by the reminiscences of a teacher of the Law regarding that Sanhedrin. Eleazar b. Zadok reports: 'When R. Gamaliel [Gamaliel II.] held the presidency at Jamnia, my father and another sat to the right, the others to the left.'

2. It is not till the post-Hadrianic era that the *'Ab Bêth Din* appears side by side with the *Nasi* as joint-president. Jochanan († 279) records—doubtless on the basis of trustworthy tradition—that R. Simon b. Gamaliel (the son of Gamaliel II.) was *Nasi*, while R. Nathan was *'Ab Bêth Din* (*Bab. Horayoth 13b*). This double presidency, to designate which the two titles of the president of the Sanhedrin are utilized, is carried back, in a quite isolated notice of the Mishna (*Chagiga ii. 2*), to the time when the Temple still existed. We are told there of a controversy about a religious law which went on for five generations, always between two teachers of the Law. The five pairs of teachers named (the last pair being Hillel and Shammai) are the same who, according to the Mishna (*Aboth i. 1*), were the bearers of the tradition, and who are once (*Peah ii. 5*) summarily designated, as such, *הַזֵּה הַזֵּה* 'the Pairs.' That these pairs were the most noted teachers of their time, the Pharisaic heads of the schools of the 2nd and 1st cent. B.C., is known to us also from other traditions about most of them. But the above notice, according to which the first of the pairs was always *Nasi* and the second *'Ab Bêth Din*, must be regarded as a transferring of later relations to early times. If 'pair' had the meaning attributed to it by the author of the notice, it would be incomprehensible, apart from anything else, why the series of pairs came to an end with Hillel and Shammai. Nevertheless, the 'Pairs' belonged to the leading members of the Sanhedrin, as is witnessed in the case, for instance, of Simon b. Shetach, from other quarters. One of the pairs, Shemayah and Abtalion, is mentioned also by Josephus as belonging to the Sanhedrin (*Ant. xv. i. 1*, where they appear as Pollion and Sameas).

3. Yet another transference of later relations to

early times took place with respect to the title *Nasi*. This title, which from the second half of the 2nd cent. A.D. onwards had become hereditary, was also attributed to the forefathers of its hereditary bearers. It was said (Bab. *Shabbath* 15a) that Hillel, his son Simon, Simon's son Gamaliel, and Gamaliel's son Simon, held the position of *Nasi* during the last century of the second Temple (B.C. 30–A.D. 70); and the appointment of Hillel to be *Nasi*, i.e. president of the Sanhedrin, is described in a narrative emanating from the Tannaite period (Tos. *Pesachim* iv. end; Jerus. *Pesach.* 33a; Bab. *Pesach.* 66a). Both this narrative and the above chronological notice, apart from the title *Nasi*, have a historical foundation. For, although we hear nothing elsewhere of Hillel's son, we know that Hillel himself, as well as his grandson Gamaliel I. and his great-grandson Simon b. Gamaliel I., were amongst the leading men in Jerusalem. The last named was one of the directors of the war against the Romans, as we learn from Josephus (*BJ* iv. iii. 9; *Vita*, 38), who, moreover, mentions that he was descended from an illustrious family. Hillel and Gamaliel I. are known not only as notable scribes, but also as the founders of institutions and enactments, which prove that they must have played a leading rôle in the supreme court, the Sanhedrin. That Gamaliel I., at whose feet Saul of Tarsus, the future Apostle Paul, sat as a pupil (Ac 22¹), took the lead in the Sanhedrin, may be seen from the well-known narrative of Ac 5³⁴⁻³⁹. Of course, all this does not prove that Hillel and his successors were presidents of the Sanhedrin. The statements of Josephus and the NT about the presidency of the high priest are too definite to be got over. But, on the other hand, we may not summarily reject the supposition that in a body, composed for the most part of scribes and called on to decide questions which demanded an expert acquaintance with the Law, the heads of the scribal body took the first place side by side with the high priests, who were only exceptionally scribes as well, and that perhaps the Pharisaic heads of schools were even formally invested with a certain rank in the Sanhedrin, approaching closely to that of president.

In this way, as a matter of fact, the title 'father of the house of justice' (*Ab Beth Din*) may, as has been held by many investigators, have been in use even at a time when the president proper of the Sanhedrin was still the high priest. On closer consideration one cannot escape the impression that neither at the time of the Hasmonæan high priests nor at that of the high priests appointed by Herod and by the Roman procurators, could the Sanhedrin have been without a guidance not identical with the presidency of the high priest. The school traditions regarding the position held by the Pharisaic school heads in the Sanhedrin possess thus a kernel of historical truth, even if they are adapted to later conditions and artificially constructed.

4. Another question is how the term *Nasi*, which is used for the head of the State, could come to be the title of the president of the Sanhedrin. Two hypotheses are possible. (a) The title may go back to the time when the high priest who as such presided over the Sanhedrin was also actually prince (*Nṣṣ*) or head of the State, i.e. to the time of the Hasmonæan rulers. Or (b) the title 'prince' may have been given, after the destruction of Jerusalem, to the president of the Sanhedrin at Jamnia, Gamaliel II., in order, as it were, that at least in the naming of the head of the highest authority which had arisen from the ruins of the national independence, there might be preserved a symbol of that independence. The second hypothesis is the more likely, because the first would imply that the title *Nasi* continued unused during more than a whole century until it was revived in the way indicated in the second explanation, after the fall of Jerusalem.

5. The assumption of the title *Nasi* by Gamaliel II.

and then by his son Simon was probably connected with the belief that the family of Hillel was descended from the Davidic royal house. There was thus coupled with the title in an esoteric kind of way a recollection of the former princes of the house of David. It was not till the time of Gamaliel II.'s grandson Jehudah I., who was called *Nasi kar' êloxḥr*, that the title became the official designation of the head, recognized even by the Roman government, of the Jews in Palestine, i.e. of their patriarch. Its meaning as president of the Sanhedrin then fell into the second place.

vi. FUNCTIONS AND PROCEDURE.—1. The Great Sanhedrin at Jerusalem was primarily the supreme court of justice, which had either the sole right of judgment in certain specially important matters, or was appealed to on questions upon which the lower courts were unable to come to a decision. As to this last point, we learn from the oft-cited report of Jose b. Chalaftha (Tos. *Sanhed.* vii. 1 and parall.) the following: 'When the first competent tribunal failed to come to a finding, the litigant, accompanied by the most distinguished member of this court, betook himself to Jerusalem to submit his case in the first place to the two lesser *synedria* (see above). If neither of these could come to a decision, the question came for final judgment before the Great Sanhedrin.' There can be no doubt that a kernel of historical truth underlies this description of the train of judicial procedure (see also Mishna, *Sanhed.* xi. 2).—In regard to cases reserved for the sole competence of the Great Sanhedrin, the Mishna (*Sanhed.* i. 5) enumerates the following points upon which only the 'tribunal of the seventy-one' was entitled to judge and pronounce a verdict: (1) A process affecting a tribe; (2) the process against a false prophet; (3) a process affecting the high priest; (4) the sending out of the army to a non-compulsory war; (5) the extension of the city of Jerusalem; (6) the extension of the Temple courts; (7) the appointment of *synedria* over the tribes; (8) the judging of a city which had lapsed into idolatry (see Dt 13^{15ff.}). With reference to the fourth point, it is enacted also amongst the decrees affecting the king, that the latter is to lead the army out to war only upon the authority of a decision of the Great Sanhedrin (Mishna, *Sanhed.* ii. 4). The eight points bear, indeed, a theoretical stamp, and even presuppose the continued existence of the tribes (the first of them has for background the narrative of Jg 20 f.); but, on the other hand, they witness that, even in halachic theory, the Great Sanhedrin figures not merely as a court of justice, but also as the body that was called on to give decisions in State matters and which exercised administrative authority, in the fashion exhibited to us by the statements and narratives, meagre as they are, contained in other sources. A Tannaite rule (Tos. *Sanhed.* iii. 4) prescribes that the installation of a king and of a high priest is to belong only to the tribunal of the seventy-one.

2. Cases affecting life and death came, according to the Mishna (*Sanhed.* i. 4), before the little Sanhedrin (of 23 members). As a matter of fact, in important instances the Great Sanhedrin was called together to pronounce judgment. According to a Tannaite tradition (Jerus. *Sanhed.* 18a, 24b), the right of judging in matters of life and death was taken from Israel (i.e. from the Jewish courts) forty years before the destruction of the Temple. 'Forty' here is a round number and unhistorical, but the circumstance related by this tradition and confirmed by the Gospel accounts of the trial of Jesus is historical, and is connected with the restrictions imposed on the competence of the Jewish courts, and of the Great Sanhedrin in particular, in the time of the Roman procurators.

3. The decisions of the Great Sanhedrin 'from which went forth direction for all Israel,' were of inviolable force, and binding upon all teachers of the Law and all judges. Any one of these who gave a judgment in opposition to its decrees was called a 'rebellious elder' (וְקַטְוֵר), and was condemned by the Great Sanhedrin (*Sanhed.* xi. 2-4). The rules for dealing with occasional errors of the Sanhedrin in giving decisions or in interpreting the Law are casuistically exhibited in the first chapter of the Mishnic tract *Horayoth*.

4. The Great Sanhedrin of Jerusalem sat in the Hall of Hewn Stone (see above, iii.). According to the report of Jose b. Chalaftha, it held its sittings from the time of the offering of the daily morning sacrifice till that of the evening sacrifice (*Tos. Sanhed.* vii. 1, and parall.). On the Sabbath and on feast days no sittings were held, but the members of the Sanhedrin assembled in the school situated on the temple mount (*ib.*; in *Bab. Sanhed.* 88b, instead of the 'school' בית הדין כבודי it is the place called *Chêl*, where at other times [see above, iii.] one of the two lesser *synedria* held its sittings). The members of the Sanhedrin sat in a semicircle, that they might see one another while deliberating (*Mishna, Sanhed.* iv. 2; *Tos. Sanhed.* viii. 1). 'Two clerks of court (ספרי הדין) stood before them, the one to the right and the other to the left, and took down the words of those who gave their voice for acquittal and of those who were for condemnation' (*Mishna, Sanhed.* iv. 2). According to Jehudah b. Ilai (*ib.*) there were three clerks: one took down the votes for acquittal, one those for condemnation, while the third took down both (in order to check the lists of the other two). In the report of Jose b. Chalaftha it is said that, when a question came before the Great Sanhedrin, and the reply could not be given on the ground of a tradition, it was decided by the votes of the majority. As to the mode of deliberating and voting and the distinctions which were observed according to the nature of the subject under consideration, tradition contains a multitude of rules which, it may safely be inferred, are based upon the actual praxis of the Great Sanhedrin of Jerusalem. Some of these rules may be cited:—In questions of civil right and in those affecting the Ceremonial Law, the taking of the vote began with the principal member of the Sanhedrin; in judgments affecting life and death it began 'at the side,' i.e. with the younger members, in order that their vote might not be influenced by that of the leaders (*Mishna, Sanhed.* iv. 2; *Tos. Sanhed.* vii. 2). For a judgment affecting life and death an attendance of at least 23 members was required. If the result of the vote showed a majority of only one for 'guilty,' the court had to be increased by two successively till the number of 71 was reached. Only when the full number was present, was a majority of one (30 votes against 35) sufficient to procure a condemnation (*Mishna, Sanhed.* iv. 5).

vii. LATEST HISTORY OF THE SANHEDRIN.—The Great Sanhedrin of Jerusalem, as we have already said, revived, after the fall of Jerusalem, in the schools of Palestine. The activity of the college of scribes, in which the tradition of the Pharisaic schools was perpetuated and underwent vigorous development, attached itself to the work of the defunct supreme court of Jerusalem, and it strengthened its authority by adopting the name and the constitution of the Great Sanhedrin. Down to the 5th cent., i.e. down to the cessation of the office of patriarch or Nasi, which was hereditary in the house of Hillel, there existed in the Holy Land an institution which could be regarded as a continuation of the Great Sanhedrin. After Babylon became the one centre of Jewish learning

in the time of the Gaons, the name 'Sanhedrin' was given to the most eminent members of the so-called *Kalla* assemblies, the 70 scholars who sat in the first seven rows and who at all events were chosen upon a fixed principle.

Even recent times have witnessed a revival of the name of the ancient Sanhedrin. In the year 1807, at the summons of Napoleon I. there met in Paris an assembly of representatives of Judaism, which at the invitation of the Emperor himself took the name 'Sanhedrin,' and constituted itself upon the traditional model of the Great Sanhedrin of Jerusalem. Apart from a few declarations as to the relation of the Jewish religion to State law and of Jews to non-Jews, this assembly has left no permanent traces.

LITERATURE.—In all accounts of Jewish history at the time of the second temple, as well as in the Histories of NT times, the Sanhedrin is treated of in more or less detail. The sources are the writings of Josephus and the NT on the one hand, and the Jewish tradition-literature on the other. Amongst the latter the name *Sanhedrin* is attached to the tracts of the *Mishna* and *Tosefta* dealing with justice and its administration, as well as to the corresponding tracts of the *Jerus.* and *Bab. Talmuds*. Of the Literature cited by Schürer (*GVF* ii. 188 f.) the following works and treatises, dealing specially with the Sanhedrin, may be selected for mention: Seiden, *de Synedriis et Praefectura juridica veterum Ebraeorum*, Lond. 1660-66; Sachs, 'Ueber die Zeit der Entstehung des Synhedrins' (in *Frankel's Zeitschrift*, 1845, pp. 801-812); Levy, 'Die Praesidentur im Synedrium' (in *Frankel's Monatsschrift*, 1855); Langen, 'Das jüdische Synedrium und die römische Procuratur in Judäa' (in *Tübinger Theologische Quartalschrift*, 1862, pp. 411-468); Kuenen, 'Ueber die Zusammensetzung des Sanhedrin' (*Gesam. Abhandl. s. bibl. Wissensch.*, Budde's tr. pp. 49-51); D. Hoffmann, 'Der oberste Gerichtshof in der Stadt des Heiligtums' (*Programm des Rabbiner-Seminares zu Berlin für 1871-72*); Jelski, *Die innere Einrichtung des grossen Synedrions zu Jerusalem und ihre Fortsetzung im späteren palästinensischen Lehrhause bis zur Zeit des R. Jehuda ha-Nasi*, Breslau, 1894. Not mentioned by Schürer is a work in Hebrew by the well-known Jakob Reifmann, entitled סנהדרין (61 pages), published at Berditschew in 1898. W. BACHER.

SANSANNAH (סַנְסַנָּה; B Σανσάνα, A Σανσάνα; *Sansenna*).—A town in the Negeb (RV 'the South') allotted to Judah (Jos 15²¹). It is not mentioned amongst the towns in the Negeb that belonged to Simeon. But, comparing the list in Jos 15²¹ with the parallel lists in Jos 19⁶ and 1 Ch 4²¹, it will be seen that its place is taken in the one case by Hazar-susah, and in the other by Hazar-susim. There is no indication of its position, a question upon which authorities differ. Tristram identifies it with *Beit Susin* on the road from Gaza to Egypt; Schwarz (*Heil. Land*, p. 72), with *Simsim* on a height N.E. of Gaza; and Guérin, (with *Sûsieh*, E.N.E. of *es-Semû'a* (Esh-temoa). C. W. WILSON.

SAPH (סַפ; B Σάφ, A Σεφ), called in Chronicles **Sippal** (סִפַּל; B Σαφόρ, A Σεφθ).—One of four Philistine champions of whom it is related that they were born to the giant in Gath, and that they were slain by David's heroes (2 S 21¹⁸, 1 Ch 20⁴). There is no difficulty in supposing that he was a son of the Goliath whom David slew, but it is perhaps more natural to understand the term 'the giant' as a collective, making him merely of the same giant stock with Goliath. See GIANT. W. J. BEECHER.

SAPHAT.—1. (B Σαφά, A Σαφά, AV Sabat) 1 Es 5²⁴. His sons are named among the sons of Solomon's servants who returned with Zerubbabel. There is no corresponding name in the lists of Ezr and Neh. 2. (B* om., A Σαφάτ, Babb ms 'Ασάφ) 1 Es 5⁹=Shephatiah, Ezr 2⁴.

SAPHATIAS (B Σοφορίας, A om.), 1 Es 8²⁴=Shephatiah (cf. Ezr 8²); called Saphat in 5⁹.

SAPHUTHI (B Σαφουθι, A Σαφουθι, AV Sapheth),

1 Es 5²³ = Shephathiah, one of the sons of Solomon's servants, Ezr 2²⁷.

SAPPHIRA (Σαφειρα).—The wife of Ananias. She fell dead, like her husband, at the rebuke of St. Peter, Ac 5¹². See ANANIAS, No. 7.

SAPPHIRE (Heb. שַׁפִּיר, LXX σάφειρος, Vulg. *sapphirus*) is mentioned eleven times in the OT, once in the Apocr. (To 13¹⁶), and once in the NT (Rev 21¹⁹). It is one of the stones in the high priest's breastplate (Ex 28¹⁸ 39¹¹), and one of the foundations of the New Jerusalem (Rev 21¹⁹), the latter thought arising, no doubt, from Is 54¹¹. It was of considerable value (Job 28¹⁶, Ezk 28¹³). From it was fashioned the throne of Ezekiel's visions (Ezk 1²⁶ 10¹; cf. also Ex 24¹⁰, where the pavement under the feet of the God of Israel is of 'sapphire'). The consistency with which the VSS adhere to a uniform transliteration of the name is remarkable; Ezk 28¹³ is no exception, for although שַׁפִּיר is here seventh in order, and σάφειρος fifth, this is due to the Greek following the arrangement of Ex 28¹³.

The etymology of the Heb. word throws no light on the nature of the stone. Probably שַׁפִּיר is Semitic, but neither of the roots שִׁפ or שִׁפִּי tells us anything as to colour or structure. It is, however, difficult to believe that a sapphire was one of the gems in the high priest's breastplate, for this stone is not easy to engrave, the diamond being the only stone that will scratch it. A similar objection might be brought against the *lapis lazuli* [Petrie's identification in STONES (PRECIOUS)], which was not deemed very suitable for engraving because of the hard points in it. But the objection has not quite so much force in this case; the *lapis lazuli* was sometimes engraved. And there are good reasons for thinking that this is the stone referred to in the Bible. Theophrastus (*Lap.* 23) evidently has in view the deep-blue mineral which is 'usually mottled with white, and contains gold-like specks of iron pyrites,' when he describes the σάφειρος, ὡς περ χρυσοπαστος. Pliny (*HN* 37, 119), writing of the *cyanos*, states: *inest ei aliquando et aureus pulvis qualis sappiris*; by the *sappiris* he clearly means the *lapis lazuli*. And if we identify it with the Heb. שַׁפִּיר, the requirements of all the biblical passages will be fairly met.

Two varieties of *lapis lazuli*, a natural and an artificial, were known to the ancients. The former came from Cyprus and Scythia, and was 'a silicate and sulphate of calcium, sodium, and aluminium.' The latter was made in Egypt: it was an alkaline silicate, coloured deep-blue with carbonate of copper; scarabs and signets were made of it, and it was used as a pigment.

If the sapphire of our Bibles does not correspond with the gem now known by this name, it yet remains probable that this gem is once mentioned. RVm suggests *sapphire* in place of *jacinth* (δάκρυθος) in Rev 21²⁰. Middleton (*Engraved Gems*, p. 132) and King (*Antique Gems*, p. 46) are in favour of the identification. Pliny (*HN* 37, 125) seems at first sight to be against it, for he writes of the *fulgur violaceus* of the *hyacinthos*; but his view is not really adverse, for the less valuable sapphires are amethyst by artificial light. King (pp. 51, 399) quotes the lines of Marbodius as recognizing with astonishing clearness, considering his date, the fact that sapphires, rubies, and Oriental topazes are all of them varieties of the same mineral, namely, the hyacinth—

Three various kinds the skilled as *Hyacinths* name,
Varying in colour and unlike in fame:
One, like pomegranate flowers, a fiery blaze;
And one the yellow citron's hue displays.
One charms with pale blue the gazer's eye
Like the mild tint that decks the northern sky.*

The best sapphires are now obtained from Ceylon. The Greeks wore these stones as jewels. A few engraved ones have survived, mainly from the age of imperial Rome, but the gem was too hard to be much used for this purpose. Cf. art. JACINTH in vol. ii. J. TAYLOR.

SARABIAS (Σαραβίας), 1 Es 9⁴⁸ = Sherebiah, Neh 8⁷.

SARAH, also (to Gn 17¹⁸) **SARAI** ('Sarah' means 'princess,' 1 K 11³ *al.*; the meaning of 'Sarai' is doubtful: perhaps [Olsh. *Lehrb.* § 110; Nöldeke, *ZDMG*, 1886, p. 183, 1888, p. 484; König, *Lehrb.* ii. 1, 427] it is an older form of 'Sarah,' formed with the unusual fem. term. -ay). *—1. The wife of Abraham, first mentioned in Gn 11²⁹ (J). Sarai's parentage is not given: according to 20¹² (E), she was Abraham's half-sister, the daughter of his father, but not the daughter of his mother.† The incidents of her life have already been narrated at some length in connexion with ABRAHAM, HAGAR, ISAAC, and ISHMAEL; so that a *résumé* will be sufficient here. Sarai accompanied Abraham into Canaan (12⁵), and went down with him into Egypt (12¹⁰⁻²⁰: J): it was on this occasion that, fearing lest her beauty might indirectly cost him his life, Abraham passed her off as his sister, and, being admired before the Pharaoh by his courtiers, she was sent for and taken into his palace. This was in accordance with the custom, described as still prevalent among Oriental princes, of arbitrarily selecting beautiful women to be added to their harems.‡ Abraham's timidity and want of candour might have involved him in serious consequences; but the Pharaoh contented himself with rebuking him for his untruthfulness, and appointing an escort to conduct both him and Sarai out of the country (v. 20; cf. 18¹⁶ 31⁷).

From 12⁴, compared with 17¹⁷, it appears that Sarai was at this time at least 65 years of age; and it has often been wondered why Abraham should have been in alarm on the ground stated, and why the Pharaoh should have been attracted by her beauty. The difficulty disappears when it is remembered that the statements about Sarai's age belong to a different document (P) from the one (J) which narrates the visit to Egypt: the author of the latter evidently pictured Sarai as still a young woman. (Cf. for similar cases elsewhere in Genesis, vol. ii. pp. 484 (No. 3), 503^b, 532^b).

Sarai is next mentioned in ch. 16 (J, except vv. 1^a, 3, 18^c). Being barren (cf. 11³⁰), she induces Abraham to take her handmaid Hagar as a concubine; but when she finds that Hagar 'despises' her, she passionately and unjustly casts the blame upon her husband: 'The wrong done to me be upon thee; J" judge between me and thee.' Abraham, however, declines to interfere; and bids Sarai herself deal with Hagar as she pleases. Her harsh treatment of her handmaid compels Hagar to take flight; and only the voice of J's angel induces her to return, and 'submit' herself to her mistress (see, more fully, HAGAR and ISHMAEL).

In the existing text of Genesis, the promise of a son for Sarai is first distinctly given in ch. 17 (P), vv. 18-21. Her name is changed to *Sarah* (v. 18); she is to be blessed, and a son is to be born to her;

* Found in certain words in the cognate languages. See Olsh. and König, *Ucc.*; Nöld. *Syr. Gr.* § 83; Wright, *Arab. Gram.* i. § 296, *Comp. Gram.* 138; Dillm. *Aeth. Gram.* 127c (cf. § 120b §); Barth, *Nominalbildung*, 385. Sayce's doubts (*HCM* 179) are unfounded. The explanation (Jerome and older scholars) 'my princess' is philologically impossible. The LXX gives for Sarai Σαρα, and for Sarah Σαρα.

† Cf. MARRIAGE, vol. iii. p. 267^b; W. R. Smith, *Kinship*, 162 f. The tradition (Jos. Ant. i. vi. 5, *al.*) that she was the same person as ISCAH has no probability: it can only be reconciled artificially with 20¹²; and had the writer of 11²⁹ identified Sarai with Iscah, he would certainly have worded the verse differently.

‡ There is an incident quoted by Ebers in the 'Tale of the Two Brothers' which partly illustrates this; see Petrie's *Egyptian Tales*, 2nd ser., 1895, pp. 53-55.

'she shall become nations' (cf. v. 4³⁵); 'kings of peoples shall be from her' (cf. v. 6³⁵); and see 36³¹). Abraham 'laughs' in incredulity at the idea of a son being born to him and Sarah in their old age; he fixes his hopes upon Ishmael, but is told that, though Ishmael will become a 'great nation,' the covenant will be established with Isaac (vv. 18-21). In ch. 18 (J) the promise of a son is again given to Abraham; and when Sarah, overhearing it, 'laughs' inwardly in incredulity, it is repeated to herself (vv. 9-15). This narrative is in reality not the sequel to the one in ch. 17, but parallel to it: 18⁹⁻¹⁵ is clearly written without reference to 17¹⁵⁻²¹, and the writer is evidently not conscious that a promise of the same kind had already been given.

Ch. 20 (E) describes Sarah's adventure at the court of Abimelech, in Gerar, i.e. (Trumbull, Guthe, Dillm., Buhl, p. 89) the Wādy Jerār, 70 miles S. of Gaza, and 55 miles S.W. of Beersheba. As before (12¹⁰⁻²⁰) in Egypt, Abraham, in fear on account of his own life (v. 11), passes Sarah off as his sister: Abimelech takes her, but is warned by God in a dream that she is a married woman; like the Pharaoh (12¹⁸), though in stronger terms, he rebukes Abraham for his deceit (v. 9); Abraham excuses (v. 11) and defends (v. 12) himself; and Abimelech then makes reparation, both to Abraham (v. 14) and to Sarah (v. 16), for the injury he has unwittingly done them. The narrative is in substance remarkably similar to those in 12¹⁰⁻²⁰ (Abraham and the Pharaoh) and 26⁶⁻¹¹ (Isaac and Abimelech); it can hardly be doubted that all three are variations of the same fundamental theme,—a popular story told of the patriarchs, and attached sometimes to one and sometimes, at different localities, to another (cf. ABIMELECH, vol. i. p. 9; ISAAC, vol. ii. p. 484^b).

Isaac's birth is narrated in 21¹⁻⁷ (vv. 1^a & J; vv. 6. 7 E; vv. 16. 22-5 P). The exclamation in v. 6 ('God hath prepared laughter for me; every one that heareth will laugh over me') is meant as a third explanation of the name 'Isaac' (cf. 17¹⁷ in P, 18¹² in J; and see ISAAC, vol. ii. p. 485, No. 8); v. 7 the aged mother gives expression to her joyous surprise at the birth of a son. Two or three years afterwards (21⁸), upon occasion of the family-feast held to celebrate Isaac's weaning, Sarah's jealousy of her handmaid is again aroused; she peremptorily demands the expulsion of both Hagar and Ishmael; and Abraham reluctantly complies (21⁹⁻¹⁴). Ch. 23 (P) relates the death of Sarah (cf. the allusion of J in 24^{7b}), at the age of 127 years, in Kiriath-arba' (Hebron), and the purchase by Abraham of a cave in the field of MACHPELAH, 'in front of' MAMRE, in which to bury her (cf. 23¹⁰ P, 49¹ P). The only other reference in the OT to Sarah is Is 51², where she is alluded to as the mother of the chosen race.*

Sarah is a typical but not an ideal character. She is a devoted wife and mother; but, at the same time, like many another woman, imperious, hasty in her judgments, and jealous: wrapt up in her husband and her son, she resents the smallest disparagement, or assumption of superiority, on the part of either Hagar or Ishmael, and does not rest satisfied till she finds herself in her home without a rival.

In NT Sarah is mentioned Ro 4¹⁰ 9⁹ (Gn 18¹⁴), He 11¹¹ (her faith), 1 P 3⁶ (her conjugal 'obedience' to Abraham, calling him 'lord,' Gn 18¹²); and the narrative of Sarah and Hagar, and of their respective children, is treated allegorically, as foreshadowing the freedom of Christians, the 'children of promise,' in Gal 4²¹⁻⁵ (cf. HAGAR, vol. ii. p. 278).

2. The daughter of Raguel and wife of Tobias,

* In Gn 24⁶⁷ the very strange syntax of the existing Heb. text makes it probable that 'of his mother Sarah' is a gloss.

To 37¹⁷ and oft. (LXX Σάρρα). See TOBIT (BOOK OF). S. R. DRIVER.

SARAIAS.—1. (Σαραίας) 1 Es 5⁵, Seraiah, the high priest of Zedekiah's time, father of Jehozadak, and grandfather of Jeshua (cf. 1 Ch 6¹⁴). 2. (Σαρεύς) 2 Es 1¹, the father of Ezra. It is uncertain whether he is the same person as the AZARAIAS of 1 Es 8¹, where the following ZECHRIAS takes the place of Azaraias of 2 Es 1¹.

SARAMEL, RV *Asaramel* (Α Σαραμελ, RV 'Asaramel').—Saramel appears to be a word in the original Heb. or Syr. text of 1 Mac. which the translator did not understand when preparing the existing Gr. version. Nearly all commentators adopt the reading *Asaramel*. By some, including Luther, it is held to be a place-name, and to have been the spot at which the assembled Jews made Simon Maccabæus 'their leader and high priest' (1 Mac 14^{28.29}). By others various restorations of the Hebrew text have been proposed.—1. (*Wēsar-am-ēl*, 'and prince of the people of God,' understanding this as a title of Simon. The original *wē*, 'and,' is supposed to have been corrupted into *bē*, 'in.' This view, first proposed by Wernsdorf (1747), is adopted by Scholz, Grimm, Schürer, Zöckler, Kautzsch, Kraetzschmar, and others. 2. (*Bēshāar-am-ēl*, 'at the gate of the people of God,' or—3. (*Ba'hāzar-am-ēl*, 'in the court of the people of God' (Ewald, *et al.*). 4. A. R. S. Kennedy (*Expos. Times*, Aug. 1900, p. 523 ff.) proposes either (a) *ba'āzār* (*ath l'isra*) 'ēl', 'in the court of Israel,' which was incorrectly deciphered *ba'āzar-ham-ēl*, the letters *z* and *h* and *z* and *h* being very like each other in the older Phœn. characters; or (b) *ba'āzart-am-ēl*, 'in an assembly of the people of God.' He prefers the former. C. W. WILSON.

SARAPH (סָרָפ; B Σαρά, A Σαρφ).—A descendant of Shelah, 1 Ch 4²².

SARCHEDONUS.—The form in which the name ESAR-HADDON (which see) appears in To 1²⁴. The misspelling 'Sarchedonus' of the AV has been retained, surely inadvertently, by the RV. The correct form is 'Sacherdonus' (ΒΣ Σαχερδονός, A Σαχερδαν, in v. 22 Σαχερδονοός).

SARDINE.—At Rev 4¹ AV renders *δμοιοι λίθω σαρδίνω* by 'like a sardine stone.' The reading is that of the TR. It is rightly rejected by modern editors, on the overwhelming authority of NAQ, etc., which read *σαρδίω*; RV has 'like a sardius': see, therefore, SARDIUS, below.

SARDIS (Σάρδεϊς).—The capital of Lydia, when a Lydian kingdom existed before B.C. 549, was one of the greatest and most ancient and famous cities of Asia Minor. It was situated on the northern skirts of Mount Tmolos, at the point where the small river Pactolos issues from a glen in the mountains to join the Hermus, which flows westwards about two or three miles north of Sardis. The acropolis of Sardis was situated on a spur of Tmolos, separated by a depression from the mountains on the south, and rising sharply from the level plain on the north, with the Pactolos washing its western base, and formed an almost impregnable fortress in ancient times. The city, which is naturally the capital of the middle Hermus valley, was still, in the first century after Christ, the metropolis of a group of cities (in the south of the middle Hermus valley and throughout the upper valley), which formed one of the *conventus* into which the province of Asia was divided.

Political circumstances had been as favourable

to it as geographical. It was the residence of a satrap, after the Persians conquered Asia Minor, and the burning of the lower town in 501 by the revolted Ionians excited vehement anger in Darius, as an insult to his government and himself. It surrendered willingly to Alexander the Great in 334, and was made by him an autonomous, self-governing city of the Greek type, electing its own magistrates and striking, presumably, its own coins: the Sardinian coins of earlier date were not municipal, but regal, and perhaps satrapal coins,* struck by despotic governors resident at Sardis. After the death of Alexander, in 322, it fell under the authority of Antigonos till 301, when after the battle of Ipsus it passed under the domination of Seleucus, and became the residence of the governor of the western part of the Seleucid empire (called, doubtless, satrap). In 190 the battle of Magnesia set Sardis free; and the Romans incorporated it in the Pergamian realm (in which there was much greater municipal freedom than under Seleucid rule). The known coinage of the city begins under the Pergamian kings, and continues under Roman rule in increasing quantities.

The special religion of Sardis was the worship of Cybele, the ruins of whose temple with two columns standing, partly are seen, partly lie buried in the glen of the Pactolos near the river-bank. Her nature and the character of her worship were very similar to those of DIANA at Ephesus.

The necropolis of Sardis, where its chiefs and kings in early times were buried, was a great group of tumuli, some small, some of very large size, about three miles north of the Hermus, on the south side of the Gygean Lake (Mermere Göl). There, near the shrine of Gygean Artemis, beside the Lake, the people of the goddess returned at death to their divine mother.

In A.D. 17 Sardis was destroyed by a great earthquake, and Tiberius remitted all its taxes for five years, and contributed ten million sesterces towards rebuilding the city. Eleven other cities, which had been its partners in ruin, and had shared in the emperor's benefaction, and also two later sufferers, joined with it in erecting at Rome a monument in his honour; and a miniature copy of that monument, constructed in A.D. 30 at Puteoli (the harbour for the Eastern and Asian trade at that time), is still preserved.†

While the three cities, Pergamus, Smyrna, and Ephesus, vied for the title of First City of Asia, Sardis, though still a place of importance, was, beyond any other of the prominent cities of Asia, a town of the past, retaining the name of greatness, but decayed from its former estate. The words addressed to it in Rev 3¹ are singularly appropriate to its history: 'I know thy works, that thou hast a name that thou livest, and thou art dead.' The words are, of course, addressed to the Church of Sardis, and must be understood as describing its condition about A.D. 90-100, already decaying from its original high promise; but it seems clear that the writer must have been conscious of the historical parallel, and chose his words so as to express it. When he goes on to say, 'Be thou watchful . . . for I have found no works of thine fulfilled: . . . if therefore thou shalt not watch I will come as a thief, and thou shalt not know what hour I will come upon thee,' one's thoughts are carried back to the two occasions when, through careless watching, the impregnable citadel failed to keep up its reputation and name and to fulfil its works, when the Median

soldier in 549 and the Cretan Lagoras in 218* climbed the steep hill and stole unobserved into the acropolis. The very hill itself is in ceaseless decay, washed away to an extraordinary extent by the rains and frosts disintegrating the soil and rock.

These historical parallels were not drawn by the writer of the Apocalypse from literature: the story of the Median and the Cretan was doubtless a household word in Sardis, and the character of the city as failing to keep up its ancient greatness and promise would assuredly be very plain. We may fairly infer that the writer was personally familiar with the place; and speaks from what he had learned by eye and ear in Sardis.

When about A.D. 295 the great province Asia was broken up into several smaller provinces, Sardis once more became the capital of Lydia; and in all the Byzantine lists the bishop of Sardis is mentioned as metropolitan and archbishop of Lydia, and as sixth in order of dignity of all the bishops, European and Asiatic, subject to the patriarch of Constantinople. The acropolis on its lofty hill was of a type suited for the frontier warfare of Arab and Turkish raids, and the fortifications remaining on it are all of a late period. It is uncertain when it passed into the hands of the Turks. Lydia was exposed to frequent raids at the end of the 11th cent., and again after the defeat of Manuel Comnenus in 1176. In 1257 the Emperor Theodore II. encamped at Sardis, but after 1267 the raids of the Turks became bolder and more continuous in the Hermus valley (Pach. ii. p. 313 f.), and they swept the country down to Menemen near the sea. Magnesia and Philadelphia were then the two chief cities of the valley (as they still are), and Sardis was quite a secondary town. In 1306 the Turks were admitted to the Sardinian acropolis, but shortly after were expelled (Pach. ii. 403 f.); but this success was only temporary, and there can hardly be any doubt that Sardis had fallen into their hands before 1316, when they took Nymphaion.

In 1402 Sardis was captured and destroyed by Tamerlane, and it has never recovered from that crushing blow. It is now only a ruin, with a tiny village called Sart, while the town is Salikli, about five miles east. Sart is a station on the railway from Smyrna to Philadelphia and Kara Hissar. Three miles south are great hot springs.

The bishopric of Sardis is mentioned in even the latest *Notitia*, but probably it ceased to have any real existence soon after 1300. The fourth *Notitia Episcopatum* in Parthey's collection, p. 132, puts the situation plainly. It mentions Sardis in its ancient place as sixth in dignity, but adds that the bishop of Philadelphia has now been substituted in the place of the Sardinian exarchos.† The substitution was later than 1284, when Andronicus Chalaza, bishop of Sardis, evidently an influential dignitary, was expelled from the Council of Adramyttium (Pach. ii. p. 65 f.), and may be dated about 1316. With that change Sardis ceased. History had decided against it, and it was dead.

W. M. RAMSAY.

SARDITES.—See SERED.

SARDIUS.—AV uses this word thrice in the OT (Ex 28¹⁷ 39¹⁰, Ezk 28¹³) and once in the NT (Rev 21¹⁰). In the OT passages RVm has 'or ruby.' The Heb. in each case is יָסָף: see, therefore, RUBY, above.

At Rev 21²⁰ the *σάρδιος* of TR or *σάρδιον* of the

* In 218 Antiochus the Great, after a year's siege, captured Sardis, where his usurping rival Achæus maintained himself.

† This should have been quoted in vol. iii. p. 831 to complete the account of the bishopric of Philadelphia; the relation of *Notitiae* iv. and xi. is uncertain, but iv. is later.

* No coins, however, are known struck at Sardis either by the satraps under Persian rule or by the city as set free by Alexander. Probably Antigonos deprived it of freedom and the right of coinage, and under Seleucid rule it continued in that oppressed condition.

† See *CIL* x. 1624; Rushforth, *Latin Historical Inscr.*, No. 96.

better MSS is the sixth foundation of the New Jerusalem. Epiphanius (quoted by Alford, *Gr. Test.* iv. 595) derives its name from its resemblance in colour to a salted fish called *sardion*. Theophrastus, with whom King (*Antique Gems*, p. 7) agrees, traces it to the fact that the gem was first imported into Greece from Sardis. Middleton (*Engraved Gems*, p. 143) thinks it comes from a Pers. word meaning 'yellow.' He does not give the word in question, but the *Encyc. Brit.* (art. 'Sardonyx') connects *sard* with the Pers. *sered*, 'yellowish-red.' There does not appear to be any such word: the nearest approach to it is *zard* = 'yellow.'

The sard is one of the crypto-crystalline gems of the silicon family, identical in chemical composition with the carnelian, but more crystalline, more transparent, and less ruddy. Its colour varies from pale golden-yellow to reddish-orange. Pliny (*HN* 37, 106) justly remarks: *Nec fuit alia gemma apud antiquos usu frequentior.* This was owing to the beauty of the stone, which in the best specimens is brilliantly transparent and very fine in colour, to its toughness, its facility of working, and the high polish of which it is susceptible. It also retains its polish longer than other gems. The finest engravings of ancient times were on sards. Pliny states that the best examples came from Babylon, but that source of supply had failed in his day. Others were obtained from Paros, Assos, India, and Egypt. Theophrastus (*Lap.* 56) speaks of two principal kinds—the *male*, brownish in colour, and the *female*, transparent red: τὸ μὲν διαφανές, ἐρυθρότερον δὲ, καλεῖται θῆλυ· τὸ δὲ διαφανές μὲν, μελάντερον δὲ, καλεῖται ἀρσεν. Considering how largely this gem was used, not only amongst Greeks and Romans but also for Assyrian cylinders and Phoen. scarabs, it is curious that there should be only one verse in the Bible where it is unquestionably mentioned, and that not as an engraved stone.

J. TAYLOR.

SARDONYX.—The name indicates the structure of the gem, a layer of sard and one of onyx. Pliny (*HN* 37, 86) says: *Sardonyx olim . . . intelligebatur candore in sarda, hoc est veluti carne unguis hominis imposita et utroque translucido.* The finest then came from Arabia and India. In the latter country it was found in torrent-beds, some pieces being large enough for sword handles. It is better adapted for cameos than for signets, but was much used by the Romans for both purposes, and it possesses one quality valuable for a seal: wax does not adhere to it. Juvenal twice refers to sardonyx seals—

'Arguit ipsorum quos littera gemmaque princeps
Sardonycheum, loculis que custoditur eburnis' (*Sat.* xiii. 185),
and

'Ideo conducta Paullus agebat
Sardonyche . . . ' (*ib.* vii. 144).

This gem has always been easy to produce artificially, either by joining together layers of different stones or by placing a sard on a red-hot iron, when the surface exposed to the heat becomes of an opaque white colour.

The sardonyx (σαρδόνυξ) is the fifth foundation-stone of the New Jerusalem (*Rev* 21³⁰). RVM gives *sardonyx* as an alternative for *diamond* in translating יָהוּדִים at Ex 28¹⁸ 39¹¹, but at Ezk 28¹² RV contents itself with the *diamond* of the text. There is no sufficient reason for supposing that יָהוּדִים means sardonyx. The *Oxf. Heb. Lex.* is inclined to derive יָהוּדִים from יָהוּד, and to explain the name as pointing to the hardness of the stone. This would not favour the identification with the sardonyx.

J. TAYLOR.

SAREA.—One of the swift scribes who wrote to the dictation of Ezra (2 Es 14²⁴).

SAREPTA.—See ZAREPHATH.

SARGON (סַרְגִּין, 'Arap).—Once mentioned in the Bible (*Is* 20¹), when it is said that he sent his TARTAN (*turtannu*) or commander-in-chief against Ashdod (B.C. 711). The name had been borne by a famous king of early Babylonia, who founded an empire which extended to the Mediterranean (B.C. 3800); and as Sargon's two predecessors, Tiglath-pileser III. and Shalmaneser IV., had assumed new names after seizing the Assyrian throne, it seems probable that Sargon also was an assumed name. It is written in cuneiform Sarg-gina, as if a compound of the Semitic *sar*, 'king,' and the Sumerian *gina*, 'established,' and is accordingly rendered by the Semitic *Sarru-kinu*, 'the established' or 'legitimate monarch'; but the inscriptions of the elder Sargon show that the name is really a corruption of *Sarganu*, 'the strong one' (cf. the biblical Serug).

When Shalmaneser IV. died or was murdered, during the siege of Samaria (B.C. 722), the crown was usurped (on the 12th of the month Tebet) by the Assyrian general Sargon, who claimed descent from a semi-mythical king of Assyria called Belbani. Samaria was captured soon afterwards, and Sargon transported 27,200 of its population into captivity, the city being placed under an Assyrian satrap. Meanwhile Babylon had been seized by the Kaldā chief, Merodach-baladan, who maintained himself in Chaldaea for 12 years, notwithstanding the defeat of his Elamite allies. In B.C. 720 a certain Ilu-bihdi, also called Yahubidi, arose at Hamath, and led Arpad, Damascus, and Palestine into revolt. This was easily suppressed, however; Hamath was colonized by 4300 Assyrians, and the Philistines and Egyptians were defeated at Raphia on the borders of Egypt. In B.C. 719 the Minni, east of Ararat, were attacked and defeated, and two years later Sargon gained a great victory over the combined forces of the Hittites of Carchemish and of Mita of the Moschi (Meshech). Carchemish became an Assyrian city, its trade passed into Assyrian hands, and Sargon carried from it to the treasury of Calah 11 talents and 30 manehs of gold and 2100 talents of silver.

In B.C. 716 Sargon was called on to meet a confederacy of the northern nations—Rusas of Ararat or Van, Mita of the Moschi, and many other tribes, the Minni, Tubal, Milid (Malatiyeh), etc. In the course of the campaign he marched into the land of the Medes towards the Caspian Sea, and received tribute from eight of their chiefs. The following year the country of the Minni was overrun, the Minnean chief Daiukku (Dēiokes) being transported to Hamath, and the Bedāwin of N. Arabia were chastised. In 714 the Minni submitted, and the army of Rusas of Ararat was annihilated. Rusas himself committed suicide. In 713 forty-five Median chiefs, including Arbaku (Arbaces), were made tributary, as well as the kingdom of Ellipi in which the city of Ecbatana was afterwards built. Tubal and Cilicia also submitted, and in 712 Milid was captured and destroyed. In 711 a vassal prince was established at Marqasi (Mer'ash), the capital of Gurgum in N. Syria, and the *turtannu* was sent against Palestine, where a rebellion had broken out. A league had been formed between Merodach-baladan and the princes of the West, including Hezekiah of Judah, but, before the confederates could move, Ashdod, the centre of the revolt, was taken by storm, and Judah, Moab, and Edom paid homage to the conqueror. The turn of Merodach-baladan came in 710-709, when he was driven first from Babylonia

and then from his ancestral city, Bit-Yakin in the marshes, and Sargon was crowned at Babylon. After this he sent a statue of himself to the vassal princes of Cyprus, which was set up at Idalion, and is now in the Berlin Museum. Kummukh, or Comagène, was annexed to Assyria in 708, and a war was commenced with the Elamites in 707. Sargon had already built his palace of Dur-Sargina (now Khorsabad, but called Sarghûn by the Arabic geographers), about 10 miles N. of Nineveh. He was murdered B.C. 705.

A. H. SAYCE.

SARID (סָרִיד; B Ἐσεδεργιά, Σεδδούκ; A Σαριθ, Σαρίδ; *Sarid*).—A border town of Zebulun, situated to the west of Chisloth-tabor (*Iksâl*, Jos 19^{10, 12}). Eusebius and Jerome (*Onom.* s. *Σαριθ, Sarith*) do not identify it. Conder, following the reading Σεδδούκ, and that of the ancient Syriac version, 'Asdod,' reads 'Sadid,' and identifies it with *Tell Shadûd*, an artificial mound with fine springs, on the north side of the great plain of Esdraelon, and about 5 miles to the westward of *Iksâl* (*PEF Mem.* ii. 43, 70).

C. W. WILSON.

SAROTHIE (B Σαρωθιέ, A Σαρωθιέ), 1 Es 5³⁴.—His sons are named among the sons of Solomon's servants who returned with Zerubbabel. There is no corresponding name in the lists of Ezra and Nehemiah.

SARSECHIM (סָרְשָׁחִים; BΑΣ Ναβουσαρχ, Q Ναβουσαρχ, Q^{ms} Ναβουσαρχ; Vulg. *Sarsachin*).—One of the princes of the king of Babylon who was present at the taking of Jerusalem by Nebuchadnezzar in the 11th year of Zedekiah, Jer 39 [Gr. 46]². He seems to have borne the title of RAB-SARIS, 'chief of the heads or princes.' There is much doubt as to the original form of the name, and its meaning is, therefore, likewise obscure. Schrader (*COT* ii. p. 110) merely remarks that the first part of the name is quite clear (רָשָׁ = 'king'), and queries the reading. In all probability, testimony to its incorrectness is to be found in the fact that the vocalization is practically the same as that of the Hebrew form of Sennacherib (Sanhērib, Sarsechīm; cf. Nimrod, Nisroch, etc.). If the first element, *sar*, be regarded as certain, the original form may have been *Sar-iskun*, 'he (the god) has made a king,' that is, provided a successor to the throne. In this case the original form of the name would have been סָרִשְׁכֻן, * which would go back to a time when no vowels whatever were written.† In the present state of our knowledge, however, all identifications of this name must be regarded as tentative and unsatisfactory, presenting, as they do, several difficulties, and being unsupported by the monuments. The Greek forms beginning with *Naḥov* are probably due to the name *Samgar-nebo*, which precedes. If, however, they have any authority—and sometimes the Greek forms are the more correct (cf. NISROCH)—that of Q *Ναβουσαρχ* would be the best for comparison, as it resembles very closely the *Nabû-sar-âhê-su*, 'Nebo is his brothers' king,' of the inscriptions (Strassmaier, *Inscriptionen von Nabuchodonosor*, 172, 23; ‡ 216, 12, § and elsewhere). See also artt. NERGAL-SHARZER and SAMGAR-NEBO. T. G. PINCHES.

* סָרִשְׁכֻן would also be likely.

† As the Greek form *Saracos* shows, the name of *Sin-Iarra-iskun* ('Sin has made a king'), the last king of Assyria, could be pronounced without the name of the deity, and would then be the same as the *Sar-iskun* here suggested, at the same time furnishing an objection, for any one bearing such a name would probably have been regarded as claiming the throne.

‡ *Nabû-sar-âhê-su*, son of *Dikta*, and father of *Nabû-muketîš-urri*, fifth witness to a contract dated in the 27th year of Nebuchadnezzar.

§ *Nabû-sar-âhê-su*, son of *Kinunnâs*, son of *Iddina-Pap-ukal*, third witness to a contract dated in the 30th year of Nebuchadnezzar.

SATAN (Heb. שָׂטָן, Arab. شَيْطَان, Syr. ܫܬܢܐ)

Greek *saravās* [but in 2 Co 12⁷ *Sarav*, A^{***} A^{**} D^{**} EKL^P etc.—yet the evidence is doubtful, and the reading *Saravā* (genit.) is preferred by Lachmi. Tisch.⁸ and WH on the authority of A^{*} A^{*} BD^{*} FG Copt. It. Vulg. Orig. Iren. Tert. On the other hand, the reading *Sarav* was preferred by Meyer, though there is no analogy to it in the NT, and in the LXX only in 1 K 11¹⁴ 23³, and Aq. on Job 1⁶]. More frequently (especially in the Gospels) the Heb. proper name is simply rendered by ὁ διάβολος, 'the accuser' or 'calumniator.' In Rev 12⁹ ὁ καθ' ἑαυτὸν is the equivalent used.—The name and conception of Satan belong to the post-exilic age of Hebrew development. Probably Zec 3¹ is the earliest instance of its appearance in our Canonical literature. On the other hand, the roots of the conception can without difficulty be traced in the writings of pre-exilic and exilic times.

1. PRE-EXILIC PERIOD.—(1) The Serpent, who tempts Eve and lures man to his doom, is a demon in animal shape, analogous to the Arabic *jinn* which frequently resided in serpents. See art. DEMON and also MAGIC (vol. iii. p. 208, footnote 2).

(2) The Babylonian *Tūmat*, the dragon-monster of the great abyss, with whom Marduk, god of light, contended (see art. COSMOGONY), corresponds to the Hebrew Leviathan or Rahab in exilic and post-exilic literature (cf. also Am 9²), with whom Jehovah entered into conflict and whom He destroyed. See artt. RAHAB and SEA MONSTER.

(3) The individual subject might be possessed by an 'evil spirit' (1 S 16¹⁴, cf. Jg 9²), which drives him to commit acts of violence in opposition to the Divine will. In 1 S 16¹⁴ this 'evil spirit' is placed in opposition to the Spirit of the LORD which departed from Saul upon its advent. This evil spirit, which 'distressed' (נָגַע) the king, is also spoken of as 'from Jehovah.' Wellhausen draws attention to the curious distinction that, whereas רִיחַ is the good spirit, רִיחַ נָפֶשׁ (or רִיחַ * אֱלֹהִים) is a bad spirit. The former expression connotes a closer community of mind and purpose between the Deity and His emissary. For the present, however, it is sufficient to take note that evil, whether it be misfortune or sin, is referred to a Divine causality in accordance with the intense feeling of dependence on God which characterized the ancient Hebrew, 1 S 15¹⁸ 19²⁶, 2 S 24¹, 1 K 22²¹, Jg 9², Is 6¹⁰ 63¹⁷, Ps 51⁶ (Max Löhr). In the interesting parallel Jg 9² the evil spirit shows itself as a spirit of discord between Abimelech and the Shechemites, just as it exhibited itself in Saul's outbreaks of violent jealousy against David. It is thus somewhat analogous in character to the Homeric Ἄρῃ, daughter of Zeus. Cf. art. MAGIC in vol. iii. p. 208^a.

(4) In Micaiah's vision the emissary who goes forth to execute Jehovah's behest is a lying spirit (רִיחַ נָפֶשׁ) in the mouth of the prophets who lures Ahab to his doom (1 K 22²²). It would lead us beyond the limits of our subject if we were to discuss the OT conceptions of Jehovah's character involved in this naive portrayal of the relation subsisting between God and the lying spirit. On this passage Kittel's remarks may be studied with advantage in his commentary. This narrative in 1 K 22¹⁻²⁷ forms an almost continuous section following on ch. 20, and there are no sufficient grounds for separating vv. 19-23 or other portions from the narrative as later additions (as Schwally proposes in *ZATW*, 1892, p. 159 ff.; cf. Marti in *SK*, 1892, p. 230).

(5) Of subsidiary significance is the difficult * אֱלֹהִים is not so distinctive a name for the God of the Hebrews, since it may even designate heathen deities.

section Gn 6¹⁻⁴, in which supernatural causes are assigned to growing human corruption in the fleshly union of angels and women and the rise of a race of *nephilim*. Holzinger (*Commentary on Gen.* p. 67) suggests that it contains a fragment of an old cosmogony with a conflict of higher and lower deities, parallel to the Babylonian. Note the influence of the tradition on the Book of Enoch.

We have sufficiently indicated the roots of the conception of Satan which are to be found in pre-exilic and to a certain extent in exilic literature. The word *šāṭān* occurs in pre-exilic literature in the sense of 'opponent' or 'adversary.' It is thus applied to David by the Philistines (1 S 29⁴), and to Hadad the Edomite whom God raised up as Solomon's adversary (1 K 11¹⁴, cf. a like use in Mt 16²³). Thus an angel may fulfil this function with good intent (Nu 22^{22f.}).

ii. POST-EXILIAN (OLD TESTAMENT) PERIOD.—When we come to post-exilic literature we find the existence of a Satan who is a supernatural adversary of man in an essential sense, whose set purpose it is to work vital injury either to the individual or to the race. The growth of this conception was probably due to the unconscious operation of two tendencies. (1) As the conception of God became freed from the limitations of primitive nationalism and also more ethically exalted, and His sovereignty over the world regarded as universal and transcendent, there gradually arose an inevitable tendency to interpolate mediating angelic agencies between this transcendent Divine sovereign and the world of which He was Lord. (2) By an unconscious logical process an attempt was made to solve the ethical problem of the presence of evil in the world on the one hand and of Divine righteousness and absolute sovereignty on the other. To post-exilic Judaism, as the Books of Psalms and Job clearly testify, it was of supreme moment to vindicate the ways of God to Israel in the presence of dire calamity and persecution. Though the problem of the ultimate origin of evil is not even discussed, evil is ascribed to Satan the opponent of man and, to a certain extent, of God's beneficent purpose. He is a spirit who takes delight in man's misfortune, and is even permitted by God to work his fell designs though they be contrary to the Divine intention. Thus in Zec 3¹ Jehovah is angered against Satan because the latter is not yet satisfied with all the misfortunes that have befallen Jerusalem, but demands further punishment. In the *Book of Job* the righteous sufferer is made the victim of Satan's malicious purpose. We even find ourselves involved in an apparent contradiction: Satan takes his place in the heavenly court among the other sons of God, and gives an account of his acts, and receives his commands from his Divine Lord. But a contrary spirit is manifest in the Divine Sovereign and in His malignant angel. The former desires to see Job's righteous character vindicated; the latter denies its genuineness, and desires to see it subjected to a strain that will wreck it. Here the characteristic traits of Satan's character are clearly visible, implied in his name and illustrated continually in subsequent literature: (a) He is the accuser (*ḡdāḡōlōs*) and also (b) the tempter (*δὲ πειράζων*) that seeks to entrap piety and work its ruin. It is in this latter rôle that he meets us in 1 Ch 21¹, where he tempts David, whereas in the pre-exilic form of the story (2 S 24¹) it is God Himself who submits David to the test. We have here an interesting indication that in the time when the Books of Chronicles were written (4th cent. B.C.) the personality of Satan had become distinctly realized. Whereas in the earlier post-exilic writings, Zechariah and Job, the def. article is attached, the form 'Satan' in 1 Ch 21¹ is anarthrous (Smend).

iii. LATER JUDAISM.—The evolution of the Jewish conception of Satan is marked by an ever-growing tendency to a dualism, which, however, always stops short of being absolute through the all-controlling limitations imposed by Hebrew monotheism. The tendency undoubtedly existed, and was probably fostered by Persian influence; for in Persian religion the dualism of good and evil is more accentuated than in any other ancient system. The extent to which Persian ideas moulded the *Book of Tobit* has been recently made the subject of an interesting study by J. H. Moulton (*Expos. Times*, March 1900). This writer confirms the doubts expressed by the author of the present article (see APOLLYON) that the Asmodeus of Tobit (or the Ashmedai of the Talmud) is identical with the Aeshma Daeva of the Bundahesh. This identity is confidently asserted by Holtzmann (*Neutest. Theol.* i. p. 53), but it cannot be accepted without stronger evidence.* His main contention, however, that Persian influence largely affected Jewish satanology, we hold to be well founded. Twelve years ago Cheyne contended for a like influence in the realm of Jewish eschatology (*Expos. Times*, ii. 202, 224, 248; *Bampton Lect.* p. 394 ff.). Cf. Kohut, *Jüd. Angel.* p. 62 f.

The demonology of the *Book of Enoch* is developed with remarkable fulness, and presents striking analogies to that of the NT. Charles, in his art. APOCALYPTIC LITERATURE in the present work (cf. his edition of the *Book of Enoch*), would place the dates of the different sections between 180 and 64 B.C.† The demons proceeded, according to 16¹, from the giants, who were the offspring of the fallen angels who lusted after the daughters of men. These demons accomplish man's moral ruin until the day of final judgment arrives. Satan, as in the NT, is represented as the ruler of a rival kingdom of evil, which is nevertheless subject to the 'Lord of spirits' (65⁹). We read, moreover, not only of Satan, but also of Satans; and it should be noted that in the *Similitudes* the Satans and the fallen angels are carefully distinguished. The latter fall in the days of Jared according to chs. 1-36 and 91-104, while in ch. 69, where a catalogue of names is given (cf. 8⁷), the functions of the two classes are confused (Charles). Jektn is the first chief 'who led astray all the children of the angels and brought them down to earth.' The names of other tempters follow. The name of the Satan who led Eve astray is Gādreel (69⁹). He is third in the hierarchy described in § 3 ff. The Satans are first mentioned in Enoch 40⁷, where we read that Fanuel, one of the four chief angels, wards off the Satans and forbids them to appear (as Satan in the *Book of Job*) in the presence of the Lord of spirits to accuse the dwellers on earth. These Satans belong to a counter-kingdom of evil ruled by a chief called Satan (53³). They existed as evil powers before the 'Watchers'‡ fell by corrupting themselves with the daughters of men. The four chief angels, 'Michael, Gabriel, Rafael, and Fanuel will take hold of them on that great day [i.e. Judgment Day] and cast them into a burning furnace, that the Lord of spirits may take vengeance on them for their unrighteousness in becoming subject to Satan and leading astray those who dwell on the earth' (54⁶). These Satans, according to 40⁷, have the means of access to heaven, which the 'watchers' or other fallen angels did not possess (13³ 14³). They have a threefold function: they tempt to evil (69⁴⁻⁶), they accuse the

* This is also the view of Baudissin in *PRE³ sub voce* 'Asmod.'
† Baldensperger (*Selbstbetrachtung in Jeru²*, pp. 12-19) would place the dates considerably later. So also Schürer; cf. his *GV¹³ iii.* pp. 195, 199-201.
‡ Cf. the *ἰππίζων* of Dn 4¹⁰; cf. also *Book of Jubilees* and *Testaments of the XII Patriarchs*.

inhabitants of earth (40⁷), and they punish the condemned. In this last character they are called 'angels of punishment' (53⁸ 56¹ 62¹¹ 63¹) (Charles).

This multifarious activity in the kingdom of evil, expressed in multiplied personalities, is a marked feature of the Book of Enoch; and, viewed from this aspect, there is a close resemblance between the demonology of the Book of Enoch and that of the later Judaism expressed in the treatises of the Talmud, to which attention will presently be called.

In the *Apocrypha*, apart from the Book of Tobit, the references to Satan, though significant, are not numerous. As in the Book of Enoch, we are in the presence of a kingdom of demons. Satan, according to the *Book of Sirach*, so takes possession of the ungodly man's soul that when he curses Satan he may be said to curse himself (Sir 21²⁷). In the *Book of Wisdom* (2²⁴) we see that Satan and the Serpent of Gn 3 are more or less identified. Death entered into the world through the envy of the devil. This identification of the Serpent and Satan is the ever-recurring feature of Judaism and Christianity alike. In the *Book of Baruch* (4⁷⁻³⁰) the deities of the heathen are called demons (cf. Dt 32¹⁷, Ps 106³⁷), and Israel suffers punishment for sacrificing to them (cf. Rv 9²⁰); but of Satan there is no express mention. In the *Book of Tobit*, Asmodi (Asmodeus) may be regarded as the equivalent of Satan in being the chief personification of evil. This demon is conjured by the magical prescription described in ch. 6, viz. burning the heart and liver of a fish with the ashes of incense. In its demonology this book stands apart from the other books of the *Apocrypha*, but in its ascription of lustful qualities to Asmodeus we find a close parallel to later Jewish conceptions. In the *Psalms of Solomon* we have only a slight reference to the supernatural agency of evil. Ryle and James have noted the simplicity of the religious ideas of this book. There is only one clear allusion to angelology (17⁴⁹). In 4⁹ the prosperous man is compared to 'a serpent speaking with the words of transgressors words of deceit to pervert wisdom.' Here Gn 3 is evidently in the mind of the Psalmist. In *Philo Judæus* demons and Satan fall into the background and disappear. His attitude is exhibited in his Treatise on Giants, c. 4, where his rationalizing tendency is manifest. Note his treatment of Ps 77⁴⁰ LXX. The sources of evil are found in the flesh and its passions, in self-love and ignorance, rather than in supernatural personalities (see Drummond, vol. ii. pp. 297-305).

Some reference may here be made to the interesting *Book of the Secrets of Enoch* recently brought to light in its Slavonic form by Mr. Morfill. It has been supposed that it was originally composed about the beginning of the Christian era. Here again we note the identification of Satan with the Serpent in Gn 3. We read in 31²⁸. 'The devil took thought as if wishing to make another world because things were subservient to Adam on earth . . . He became Satan after he left the heavens. His name was formerly Satanail. He conceived designs against Adam in such a manner that he entered and deceived Eve. But he did not touch Adam.' 29²⁸ graphically portrays how Satanail was hurled from the heights with his angels on the third day of creation: 'One of those in the ranks of the archangels having turned away with the rank below him, entertained an impossible idea that he should make his throne higher than the clouds over the earth, and should be equal in rank to My power. And I hurled him from the heights with his angels. And he was flying in the air continually above the abyss.' Here we have one of the ultimate sources of Milton's conception of Satan's revolt.

The *Jewish ideas* reflected in the *Targums* and *Midrash* present a close resemblance to those just described. The identification of the Serpent with Satan was expressed in Jewish theological writers by the name bestowed on the latter, *הַשָּׂטָן*. Thus in *Sifre* 138b the heathen are called the disciples of *הַשָּׂטָן* who seduced Adam and Eve. In *Bereshith* 29 we find the tradition that *Sammael*, the highest angel that stands before God's throne, caused the Serpent to seduce the woman. Thus Satan and Sammael coalesce into one personality. Sammael, according to *Deut. Rabba* 11, is the angel, the wicked one, chief of all Satans. Here again we observe the same divided personalities as in the Book of Enoch, and Satan appears to be a personified generalization. There is an arch-Satan called Sammael, and there are Satans who are subordinate to him, just as the angels who are subject to God as His attendant ministers. According to *Targ. Jerus.* i. on Gn 3⁸ Eve saw, at the moment when the Serpent addressed her, Sammael, 'angel of death,' and became afraid. Envy is made the motive to man's temptation. According to *Sanhedrin* 59, the Serpent was jealous of the services rendered to man by the angels. In *Sota* 9a and *Beresh. Rabba* 18, the temptation is ascribed to the motive of lustful jealousy. *ib.* 24 relates the curious legend that demons held intercourse with Adam and Eve during the first 130 years after the Fall, and other demons (*דִּמְיוֹן*, *לִילִי*, *רִמְיוֹן*, and *רִמְיוֹן*) were the product of the union. *Bereshith* 42 ascribes the birth of Cain to the union of Satan with Eve (Weber).

Freedom of will is ascribed in the Talmud to man even after the Fall. He can therefore choose either good or evil. The evil impulse in man is designated by the term *הַרָּעָה*, which works within him like a leaven (*Berakh. 17a*). Satan accomplishes his fell purpose by the instrumentality of the *הַרָּעָה* (*Bammidbar rabba* 20, *Baba bathra* 15a). Moreover, Satan is not only tempter, but also *accuser*, of whom the individual is continually in dread, since he never knows what is his standing before God, whether he is justified in His sight, or liable to condemnation through Satan's accusations. A similar conception underlies 1 Ti 3^{6,7} and Rev 12¹⁰.—Targums frequently foist Satan into the OT narrative, e.g. *Targ. Jon.* on Ex 32¹⁹ (Lv 9⁹). Eisenmenger, *Ent. Jud.* i. p. 845, quotes rabbinic passages in which the angel who wrestled with Jacob is identified with Sammael. Similarly Belial (Beliar), according to *Ascensio Jesaiæ*, enters into Manasseh and accomplishes the martyrdom of the prophet.

iv. NEW TESTAMENT IDEAS RESPECTING SATAN. —These follow the broad outlines of contemporary Judaism, but are without its grosser and more extravagant elements, and are generally characterized by simplicity. The epithets bestowed on Satan are various. He is apparently identified with *Beelzebub* * (*Beelzebub*) in Mt 12^{24,27}, cf. 10²³;

* Instead of *Βελζαβουλ* the better attested form in Mt 10²³ 12^{24,27}, Mk 3²², Lk 11^{15,18} is *Βελζαβουλ* (sustained by B and partly by K; see WH). The latter is obviously a corruption of the former, and the former (*Βελζαβουλ*) arose out of the OT form adopted by Jerome and Aramaized, *Beelzebub*. How did *Βελζαβουλ* arise? About this we have three theories—(1) *Βελζαβουλ* in Mt 10²³ is held to be a rendering based on the Aramaic *בְּלִזְבוּל*. This may be true in reference to *בֵּית*, but that *בֵּית* means 'house,' 'dwelling,' is doubtful. In 1 K 8¹³ the reading is uncertain; cf. LXX and Wellh. in Bleek's *Einführung*, p. 236. See also Nowack on Hab 3¹¹. (2) *בְּלִזְבוּל* is regarded as a purposed variation with a contemptuous meaning, 'lord of filth.' *בֵּית* (= *בֵּית* Syr. *zeblu*) means *stercus*. Cheyne in *Encycl. Bibl.* argues that superstitious Jews would hardly use such an opprobrious epithet against the prince of the demons. Moreover, such a mode of pronouncing the name is not found anywhere but in the NT. (3) More probable is the view of Baudissin (art. 'Beelzebub' in *PKB*) that we have a change of final consonant in popular pronunciation parallel to

but this is doubted by Weiss (*Bib. Theol. of NT*, i. p. 103, footnote). He is usually called διάβολος (a literal rendering of the Hebrew name); sometimes δ πονηρός, Mt 13³⁵, 2 Th 3³, and perhaps in the Lord's Prayer; ὁφει ἀρχαίος, Rev 12⁹ 20²; ὁ ἐχθρός, Mt 13³⁹; ὁ τοῦ κόσμου ἀρχὼν, Jn 14³⁰ etc.; [ὁ] ἀρχὼν τῶν δαιμονίων, Mt 12²⁴; ὁ ἀρχὼν τῆς ἐξουσίας τοῦ ἀέρος, Eph 2².

(a) *The Synoptic tradition.*—Jesus felt Himself in the presence of demons belonging to a kingdom of evil ruled over by a supreme personality, Satan or Beelzebub. These personal agencies work every form of physical and moral calamity. They recognize, however, the might of Jesus the Messiah gifted with the power of God to destroy the works of Satan and all his personal subordinates (Mk 12²⁴, 31¹¹, 12¹⁵, 23-27 6⁷, Lk 10¹⁷⁻²⁰ 11¹⁴⁻²² 13³²). Jesus on His side fully recognizes the existence and power of the kingdom of Satan, which resists the establishment of the kingdom of God (Mt 12²⁸, Mk 3²⁴). In the narrative of the Temptation the world is regarded as ruled by Satan (cf. Jn 14³⁰); but in the Luke tradition (4⁸ *last clause*), Satan, on the other hand, confesses that his authority is not original and fundamental, but is derived (ἐμὸι παραδόδοται); and this power he is willing to transfer to Jesus upon condition of His allegiance. The narrative illustrates the character of cunning that belongs to Satan as the tempter of mankind (Gn 3¹), for he quotes Ps 91¹¹⁻¹² for his own purposes (Mt 4⁶), and applies the words to the Messiah. Against this subtle deceit Jesus warns His disciples. Satan is eager to sift Simon as wheat (Lk 22³¹), and enters, like a demon, into Judas (v. 3).

The prevailing belief that physical maladies were due to the direct agency of evil spirits (see DEMON) was recognized by Christ. This demonic power that works physical havoc is under the supreme control of Satan, and is ascribed to him in the case of the afflicted woman (Lk 13¹⁶). In the expulsion of demons by His disciples Christ sees the overthrow of Satan's power (Lk 10¹⁸, in which utterance our Lord recurs to the well-known passage in Is 14¹²). Accordingly the dualistic tendency, to which we have before adverted, is definitely limited by the absolute nature of God's righteous rule, whereby a definite term is set to Satan's sway. Meanwhile the anarchy which prevails works its baleful effects in the rival kingdom which Satan sets up as a quasi-god of this world (cf. 2 Co 4⁴). This evil is intellectual and moral as well as physical. The devil takes the seed of the Divine word out of the heart of man (Mk 4¹⁵, Mt 13^{19, 30}) and plants the spurious wheat (darnel, ζιζάνια). In other words, to borrow Pauline phraseology, he shows his craft by beclouding the understanding, 'blinding the thoughts of the unbelieving, so that they are unable to behold the gospel light of Christ's glory' (2 Co 4⁴).

(b) *Pauline teaching.*—This stands in perfect continuity with that of Jesus reflected in the Synoptic tradition. We are still in the presence of many of the ideas that prevailed in contemporary Judaism, viz. of the *Book of Enoch* in the more remote past; of the *Book of Wisdom*, the *Testaments of the XII Patriarchs*, and of the *Book of Jubilees* in the age that immediately preceded the time when St. Paul wrote; of the *Assumption of Moses* coeval with the time of his literary activity and of the *Apocalypse of Baruch*, which immediately followed it. The apostle's conceptions respecting angelology and demonology have been

carefully examined by Everling in a special treatise, and abundantly illustrated from the literature just mentioned.

In the writings of St. Paul we are confronted by an array of supernatural agencies which are not all definitely evil or good, but some of which stand in relative opposition to God (Ritschl, *Rechtfert. u. Vers.* 1 ii. p. 251, quoted by Everling). In Ro 8³⁸, 1 Co 15²⁴ we find them designated by the names ἀρχαί, ἐξουσίαι, and δυνάμεις. Here the ἀρχαί are perhaps to be identified with the ἀρχοντες τοῦ αἰῶνος τούτου of 1 Co 2⁶.* The gods of the heathen are not absolutely non-existent (see DEMON), but have a subordinate potency in heathen *sacra* as θεοὶ καὶ κύριοι (1 Co 8⁴⁻⁶, cf. 12³). These supernatural 'rulers of this world' have a certain wisdom of their own (1 Co 2⁶, 8), to which the eternal wisdom revealed by God's Spirit to simple-minded faith appears to be folly. Such wisdom will be brought to nought (cf. 2 Co 10⁵). To the κύριοι καὶ θεοὶ correspond the στοιχεῖα τοῦ κόσμου, which may be considered to be an abstraction † standing in place of the personal concrete names (cf. ἀρχαί, ἐξουσίαι, θρόνοι, and κυριότητες), or, as Spitta ‡ would interpret the phrase, the στοιχεῖα represent the sphere of their personal activity. These are the κοσμοκρατορες of the dark spiritual world against which the Christian is to arm himself (Eph 6¹²); over which Jesus triumphed in the Cross (Col 2¹⁵, see Lightfoot).

Over all this world of evil energy Satan reigns, and all its collective power for evil is gathered up in his personality. He is the tempter (ὁ πειράζων, 1 Th 3⁵, 1 Co 7⁵; cf. Mt 4³ and parallels). Bodily diseases are ascribed to him just as in Lk 13¹⁶. Indeed, in one remarkable passage, 1 Co 5⁴⁻⁵, we even see Satan utilized for the advantage of the individual and the Church. The offender in a solemn Church assembly is to be delivered over to Satan for the destruction of the flesh, in order that the spirit of the sinner may be saved in the day of the Lord's appearing. Satan, as the inflicter of physical malady, is apparently identified with the destroyer, Ex 12³³ (LXX ὁ δειπνέων, see APOLLYON), Nu 16²², to which 1 Co 10¹⁰ evidently alludes. Compare also the destroying angel of 2 S 24¹⁶, 2 K 19³⁵, and also Wis 18²⁵. According to Wis 22⁴ death entered into the world through the devil, an idea which is closely related to the conception which prevails all through biblical literature, that long life is the reward of the righteous (Ex 20¹² etc.), while the wicked are cut off and their lamp (of life) put out. Thus, according to St. Paul's own belief, surrender to Satan brought death as its ultimate consequence (1 Co 5⁵, 2 Co 2¹¹); while in Jn 8⁴⁴ Satan is ἀνθρωποκτόνος ἀπ' ἀρχῆς (cf. Gn 3¹⁵). This power Jesus destroyed by death (He 2¹⁴).

St. Paul ascribed his own physical maladies to Satan's agency. 'The stake (σάκος) in the flesh' he calls 'Satan's messenger' (2 Co 12⁷). The phrase ἐν δοθεῖν in v. 9 followed by ἐν δοθεῖν clearly points to some bodily affliction, probably chronic fever (see Ramsay, *Expositor*, July 1899, pp. 20-23). Here again Satan is made subordinate to God's purposes of grace, and becomes a servant of moral discipline which St. Paul was strengthened to bear, though he prayed frequently to be delivered from it. With this passage and 1 Co 5⁴⁻⁵ cf. 1 Ti 1²⁰.

The apostle, like his contemporaries, did not think of the demons as inhabiting subterranean regions (as the Arabs and ancient Babylonians

others, e.g. Báb el Mandel (for Mandeb).—The theory supported by Riehm is certainly worthy of consideration, that Beelzebub in the time of Christ was understood as מלך המלכות 'lord of enmity' = διάβολος; see Brockelmann's *Lex. Syr. sub voce*, and cf. Assyrt. *bēl dabbī*. Cf. art. BAALZEBUB.

* Heinrici doubts this, and would prefer to identify the ἀρχοντες here with those of Ac 13¹⁰.

† Identified with αἱ κοσμοκρατορίαι in *Test. Salam.*; see Everling, p. 70.

‡ *Der Zweite Brief des Petrus*, etc. p. 270.

did). The angels of God had their residence in the higher regions of the heavens; and even Satan and his retinue dwelt, not beneath the earth (their final destination after the last judgment), but in the lower atmospheric realm. Thus in Eph 2¹ Satan is called ὁ ἀρχὸν τῆς ἐξουσίας τοῦ δέπου. Cf. Eph 6¹² 'the wicked host of spirits ἐν τοῖς ἐπουρανίοις.' An interesting parallel may be found in the *Testaments of the XII Patr.*, Levi 3, where it is stated that 'he who fears God and loves his neighbours cannot be smitten by the spirit of the air (τοῦ ἀέρος πνεύματος), Beliar.' Other interesting illustrations may be found in Everling's treatise, p. 107 ff. The most significant is from *Ascension of Isaiah* 10²⁹ (ed. Charles, pp. 74, 132), in which we read that Jesus descends through all the seven heavens, assuming at each stage the form of the angels which inhabit that special region. At length He comes to the firmament where dwells the 'prince of this world' (cf. 7⁹ 11²³).

Belial,* the variant of the name Belial (see BELIAL), is apparently identified by St. Paul in 2 Co 6¹⁵ with Satan; but about this question of identification we have the greatest divergence in the Jewish and early Christian tradition. The subject is discussed in Bousset's learned monograph, *Der Antichrist*, part II. ch. iv., Anhang i. (p. 99 ff.). Belial seems identical with the 'Man of Sin' in 2 Th 2³ (see MAN OF SIN).

St. Paul follows the Jewish tradition in identifying Satan with the serpent which tempted Eve. This clearly underlies Ro 16²⁰ 'The God of peace shall bruise Satan under your feet,' obviously based on Gn 3¹⁵ (cf. 1 Ti 2¹⁴, Rev 12⁹ 20²). This view is again apparent in 2 Co 11^{2,3}, where the apostle speaks of himself as though he were Christ's ὁν παρὰ νόμιμος (κ:β:β:ε), to guard the chastity of the Church from the devil's wiles of seduction (on the image, cf. Jn 3³⁰), whereby Satan even transforms himself into an angel of light (v. 14).

(c) *The Book of Revelation* obviously stands apart from the rest of the New Testament by reason of its strongly-marked Apocalyptic character. Into the recent controversies respecting its original form, suggested by the ingenious theory of Vischer (supported by Harnack's authority), this is not the place to enter. In the Book of Revelation we enter a transcendental region where the world-drama is enacted before us in a series of scenes of conflict between superhuman personalities. It is a πόλεμος ἐν οὐρανῷ between God with His angels of light, and Satan or the dragon, the 'old serpent,' the deceiver of the whole world (12⁹), with his hosts of darkness. Chapter 12 has been the subject of much discussion since Gunkel wrote his stimulating treatise, *Schöpfung u. Chaos* (pp. 171-398). At the foundation of the story he sees Babylonian legend thinly veiled. The dragon is Tiāmat, the woman is Damkina, the mother of Marduk (here expressed by Christ). This primitive Babylonian myth was worked up into Jewish apocalyptic, Chaos or the Dragon (Tiāmat) being interpreted as Rome, and the entire legend transferred to the end of the world. But such a theory raises certain difficulties, though some appear to be solved. Bousset (*Antichrist*, Anhang, p. 169) is by no means disposed to agree to the dictum that no essential trait in the narrative is of Christian origin. After the last great overthrow of the Beast and the kings of the earth (Rev 19), Satan is imprisoned in the bottomless pit a thousand years (20²). After this he is loosed and deceives the nations, but at length is

finally cast into the lake of fire and brimstone where the beast and false prophet are (20¹⁰, cf. Enoch 54^{5,6}, 2 P 2⁴).

(d) In *St. John's Gospel and Epistles* such legendary features disappear. We move in a serener, clearer atmosphere of sharply-marked antitheses. Satan and Christ are mutually opposed. Satan cannot touch him who is born of God and sinneth not (1 Jn 5¹⁸). The devil is the ruler of this world, and has nothing in Christ (Jn 14³⁰ 16¹¹, cf. 12³¹). Sin enslaves through the power of the devil (8²⁴); and this bondage is established, as St. John and St. Paul alike taught, through the flesh, which is the organic point of human attachment to the κόσμος. Satan sinned from the beginning (1 Jn 3⁸), and was the cause of death (Jn 8⁴⁴). Falsehood is his special realm (8⁴⁴). Jesus stands outside the world that is ruled by him (8²² 17^{14,16}), and gradually wins individuals from him into the kingdom of God. First, Christ's own disciples are rescued from Satan's worldly dominion (15¹⁹ 17^{12,14}). One only has abandoned himself to the devil to his own ruin (6⁷⁰). The world is at present in hostility to Jesus and His disciples (14^{17,19,22} 15^{18,19} 16⁹ 17⁹, 1 Jn 2¹⁵⁻¹⁷ etc.), but we are assured of Christ's final conquest of the world (Jn 16³³, cf. 17^{21,23}). For the Son of God was manifested for the express purpose of destroying the works of the devil (1 Jn 3⁸). This is in harmony with Christ's own teaching respecting Satan's overthrow reported in Lk 10¹⁸. In Jn 16¹¹ the judgment and condemnation of the devil are regarded, according to the tense usage which frequently occurs in the NT, as already finally accomplished (κέκριται, cf. 12³¹). See the eloquent remarks on this passage in the *Pulpit Commentary* by the late Dr. H. R. Reynolds.

V. GENERAL CONCLUSIONS.—From the preceding exposition of the biblical conceptions respecting Satan we clearly see that early Christianity shared in the prevailing Jewish belief in demons and Satan. The attempt has been made by Beyschlag to deny the inference to which the Synoptic narratives lead us, that Jesus accepted the belief in a personal Satan. And with the elimination of a personal Satan he would also erase a belief in demons and angels from the inner consciousness of Christ. 'It is certain that Jesus did not recognize as personal devils the demons in whom the popular Jewish belief saw personal angels of Satan.' 'The form of the representation is undoubtedly personifying, but all the passages are poetic in style.' If language is to be manipulated in this fashion, it is difficult to see why Christ's belief in a personal God may not be eliminated also, or why such a process of evaporation might not be successfully applied to all contemporary literature. Jesus used parabolic language, and His discourses are steeped in similitudes; but when He used a symbol, it was understood to be such, or, if not at once so understood, its actual meaning was nearly always disclosed (Jn 3⁴⁻⁸ 4¹⁰⁻²⁶, 22-24 Gal. 3¹¹, but in 2¹⁹ the enigma was solved by the close of His earthly career). But to suppose that Jesus persistently and consistently used the ordinary language of angelology and demonology, and even acted in accordance with it, and yet all the time held in secret opinions totally at variance with those of all His fellow-countrymen, and never revealed them by a single hint,—surely this is to invalidate Christ's claims to candour. Yet there is not a particle of evidence adduced by Beyschlag to support his monstrous contention that Jesus did not mean by the words Satan, demon, and angel, what His contemporaries meant and understood Him to mean. See Beyschlag, *NT Theol.* vol. i. pp. 93-95.

Our argument by no means implies that Jesus

* In *Asc. Is.* 4² he appears as Beliar, and in 7⁹ as Sammael. *Ges. Theol.* i. 210 notes the rendering of Belial (Beliar) by dominus aeris in Syriac lexicographers. Sense as well as sound (ἀ:ρ corresponds to the ending) contributed to this translation, which accords with tradition respecting Beliar's realm.

shared in all the current conceptions respecting demons. The problem, as we have already indicated, is a complex one. We have to give due place to two considerations: (1) that Christ's sayings and deeds are necessarily coloured by the representative human media through which they are conveyed to us; (2) that the demonology of Christ's belief is scarcely visible in the Fourth Gospel, though His belief in a personal Satan is clearly apparent. There can, however, be no scientific Christology which does not recognize that Christ's humanity was so genuine and complete that He shared in the cosmic presuppositions of His time. His Deity spoke to us through a true humanity. It was veiled and limited during His earthly ministry by those very conditions which He, in His *kénosis*, voluntarily assumed when 'He took the form of a slave, and being found in the likeness of man, emptied Himself' (Ph 2⁷). Now, demonology was a necessary part of the intellectual apparatus of that period. It was the latest phase of that animistic interpretation of the universe which was destined still to survive for centuries until the gradual growth of our inductive methods has substituted for demonology (as formerly understood) a rationally co-ordinated nexus of physical causality and law. But the ultimate and fundamental truth of angelology and demonology has not been and never can be destroyed by the march of modern science. Behind and beyond the physical nexus of interrelations there must lie *personality* and, moreover, *personalities*. However complex the material conditions, at both ends—nay, even along the entire path—of the intricate windings of the phenomenal chain there must ever live *personal power*. Our whole life rests upon the presupposition of our own individual initiatives of volition operating upon one another in the phenomenal world and modifying its successions and coexistences. That a supreme transcendent and personal (and, to the Christian consciousness, righteous) reason and will is ever present and potent in the entire realm, is a necessary postulate of any intelligible universe. The assumption that other superhuman as well as subordinate agencies are at work, and that some among these are embodiments of evil influence, adds no fundamental difficulty to those which already exist. No moral world is conceivable except as involving interrelations between personalities. Now, it is matter of historic notoriety that some personalities have lived in this world that might be called incarnations of evil influence. The supposition that other and superhuman personalities may also be *foci* of evil moral energy, and operate like ganglionic centres in a nervous system, presents no fundamental difficulty in addition to the difficulties already involved in the problem of evil. That Satan exists as a personal centre of evil influence, physical as well as moral (for the two are closely associated), is the undoubted teaching of the Bible. He is not represented to us as the absolute origin of evil or the only source of it, but as its most potent superhuman representative. See Dorner, *Christliche Glaubenslehre*, § 86, 3, vol. ii. p. 213 ff.

LITERATURE.—In addition to the ref. in the article, see art. 'Teufel' in *PRE²* and 'Satan' in Smith's *DB*; also Dorner, *Christliche Glaubenslehre*, Bd. ii. pp. 188-217, and the list of literature on p. 189; Martensen, *Christian Dogmatics*, pp. 186-203; Kaftan, *Dogmatik*, pp. 348 ff. (much to be commended), 478. On *Eccelesiastical teaching* (which does not come within the scope of a Bible Dict.) see esp. Harnack, *Dogmengesch.* (Index, s. 'Teufel' and 'Dämonen'); Iren. *adv. Hær.* v. 1. 1; Origen, s. *Celsum*, vii. 17; Nitzsch, *Lehrb. der Evang. Dogm.* p. 333 ff.; Dorner, *ib.* ii. p. 197 ff. Respecting the *Mohammedan doctrine* (based on Jewish), see Hughes, *Dict. of Islam*, s.v. 'Devil' (where *Mishkat* i. 3 is cited). Cf. also art. 'Genli,' and on this subject (*Jinn*) E. W. Lane's elaborate note 21 to his Introduction to his translation of the 'Thousand and One (Arabian) Nights.' The Devil was called *Iblis* (إبليس) and identified with Satan (as in NT). There were also *Shaitāns*

(plur.), just as in Jewish belief.—In *Kordā* see 2164c, 321 (on Satan 'driven forth by stoning,' cf. Palmer's note) 422 78 5 322, 723 1262 1426c. 1942. Satan is constantly called man's 'open foe.'

SATRAP.—See LIEUTENANT.

SATYR.—The Heb. original שָׁטִיר *sāṭir*, plur. שָׁטִירִים *sāṭirim*, is usually tr^d 'he goat,' its primitive meaning. In two passages (Is 13²¹ 34¹⁴) it is tr^d in AV and RV 'satyr,' RVM 'he goat,' LXX in both *δαίμονια*= 'demons.' In other two passages (Lv 17⁷, 2 Ch 11¹⁵) AV renders it 'devils,' RV 'he goats,' RVM 'satyrs,' LXX *μᾶταια*= 'foolish things.' Probably in all these passages the intention is to refer to some demon of popular superstition believed to have a goat-like form (cf. art. DEMON). The Greek mythology describes the satyr as a creature the upper part of whose body is that of a gross, sensuous man, the lower that of a goat. He is the ravisher of the wood-nymphs, the drunken companion of Bacchus in his revels (Hesiod, fr. 91). The Roman *faun* is similar, and is represented with horns and pointed ears (cf. Verg. *Ecl.* v. 73; Hor. *Ep.* ii. ii. 125, *Ars Poet.* 233). Disgustingly realistic statues and paintings of these creatures are to be seen in the Museum at Naples (cf. W. R. Smith, *RS¹* 113 f.; Bochart, *Hieroz.* ii. 844, iii. 825). G. E. POST.

SAUL (שָׁאֻל, Σαουλ).—1. The first king of Israel. The son of Kish, he belonged to the small but warlike tribe of Benjamin, within which tribe his family had its seat at Gibeah.* During his early years the Philistines had overrun the Southern tribes of Israel, had captured the ark, had destroyed Shiloh, and were so thoroughly masters of Judaea that they maintained an outpost in Benjamin (1 S 13⁶). Yet, though the tribes were humbled and separated, they had not entirely lost the sense of belonging to one race or of having a common destiny; and the oppression of the Philistines served to make clear to them that, in order to assert these things, a single leader was an indispensable necessity. To have discovered the unknown Saul, to have recognized his fitness for this task, and to have nerved him for attempting it, is the large service of Samuel, whom every account agrees in connecting with the rise of the new king.

According to one account, the future chief was sent by his father to seek for some strayed asses. Baffled in the search, he turned aside to ask Samuel, an inconspicuous seer in the land of Zuph, for information about their fate. Samuel satisfied this anxiety, but roused in the questioner the conviction of a greater destiny. Commanding him in J's name to deliver Israel, he confirmed the message by certain signs, the occurrence of which would serve to remove any hesitation in attempting so grave a task, and bade Saul then wait at home until his opportunity arrived (1 S 9. 10¹⁻². 14^c). The opportunity was not long delayed. Nahash, a chief of Ammon, besieged Jabesh-gilead, and, when the inhabitants offered to surrender, would grant no milder terms than that their right eyes should be put out. So convinced was he of the helpless condition in which Israel lay, that he even allowed them to send messengers asking help from the tribes west of Jordan, for thus would his glory be increased by the disgrace inflicted on all Israel. The news reached Saul as he was driving his cattle home from the plough. He saw

* Unless Gibeon is confused with Gibeah in 1 Ch 8^{26c} the clan had once dwelt in Gibeon. Zela is also mentioned (2 S 21¹⁴) as the burial-place of Kish, and as the final burial-place of his son.

in his own wrath at the insult the indignation of Israel, and in the incident the very means needed to stir the pride of his people to a strong effort. Slaying the oxen, he sent a species of fiery cross through the South, and, with the hastily-levied force which obeyed the summons, defeated Nahash. The grateful people at Samuel's bidding brought their newly-found leader to the sacred place at Gilgal, and solemnly crowned him as their king before J' (1 S 11, omit vv. 12, 13, 14c).

The other account represents Samuel as the acknowledged head over Israel, who ruled in Ramah as judge. When the Israelites, dissatisfied with their condition and with the conduct of the judge's sons, desired a king, he at first refused their request, as rejecting God's immediate government in the nation, but at J''s command consented (1 S 8). A popular assembly was held at Mizpah, where Saul was elected prince by the sacred lot (10¹⁷⁻²⁴). A few opposed the election, and Saul withdrew with his supporters to Gibeah. The Nahash incident offered the new king the occasion which justified his election, and silenced all opposing voices. After it the people, convened at Gilgal, renewed the consecration, while Samuel solemnly resigned his office (11^{22c}, 12). This account regarded the kingship not only as a novelty, but as a backward step from the older theocracy, an accommodation to the weakness of the people.

It was impossible for the Philistines to view with indifference Saul's election (however it had been brought about), and not to dread the quickened national life which the victory over Nahash was sure to produce among their subject people. Realizing this, and preparing for the inevitable shock, Saul retained about him a small army. He chose 3000 men, placed one-third of them under his son Jonathan at the home of the clan, but kept the other two-thirds under his own orders near Bethel. Probably he intended to rouse the strong tribe of Ephraim to his support. The impatient courage of Jonathan precipitated the struggle. He struck down the garrison or representative (צב) which the Philistines had in Benjamin.* The Philistines replied by gathering an army, which they marched up the valley of Ajalon in the direction of Michmash. They thus drove themselves like a wedge between the Northern and Southern tribes. Lest they should cut him off from Benjamin, Saul was forced to fall back, especially since the majority of his troops fled, some into hiding, others across Jordan. The king with the 600 men who still clung to him retired on Gilgal,† in which position he secured a safe base on the transjordanic tribes. He left at the head of the wady and opposite the Philistine position a small outpost under Jonathan, who should watch the movements of the enemy and warn the main body (13¹⁻⁷).

For a time there was hesitation. Probably the Phil. wished to draw the Isr. army from its strong position and from its supports. But the invaders were too proudly confident of their strength. Forming a camp above Michmash, they divided almost their whole force into detachments and sent these northward to forage and to check any rising which Ephraim might attempt (13^{18-18, 22}). Jonathan saw his opportunity and seized it. Without delaying to request support from his father, he struck full at the weakened centre, overwhelmed the outpost at Michmash which had been set to watch him, and penetrated to the camp. Thence it would be an easy task to crush the divided

detachments in detail. So sudden was the defeat that Saul on hearing the news had no time even to consult the oracle. He followed instantly his son's assault. The Isr. auxiliaries among the enemy deserted. The scattered Philistines were only preserved from utter ruin by the exhaustion of their victors; they streamed back by the same pass by which they had entered, and the South country was for a period free (14¹⁻⁴⁶).

Here it would appear that the independent record of Saul's reign ceased. Here accordingly (14^{46f}) have been inserted a brief list of his household, and a statement that the struggle between the young kingdom and the Philistines continued during his entire lifetime. Most of the remaining information about the reign is derived from accounts which relate it as introductory to the appearance of David on the stage of Isr. history; and it is only just to the first king's memory to remember that the rest of his life is narrated from the point of view of an introduction to the life of his greater rival. But the king showed his prowess, and turned the new vigour of his realm against other foes than the Philistines. Men long remembered his victory over the Amalekites, partly because the motive of the war had been such a racial and religious antipathy, as the quickened self-consciousness of the young nation was keener to feel (1 S 15). And something of the same feeling must have prompted the king to crush the Gibeonites, that foreign tribe which had been received into the Isr. nation (cf. 2 S 21¹⁴).

About this period, however, Saul lost the support of Samuel, who had done so much to set him on the throne. The accounts differ as to the reason which produced the quarrel. One referred it to the victorious campaign against the Amalekites. These borderers had long troubled the South country of Judah, ravaging it with sudden forays, since the desert offered refuge in defeat or secure retreat with booty. Samuel commanded the king to proclaim a religious war and root them out; and Saul obeying delivered a blow from which the people never again recovered. He spared, however, the best of the spoil, and especially Agag, the captured king. For this disregard of the exact terms of his command Samuel denounced the fall of Saul's house in the very hour of his triumph (1 S 15). The other account dated the strife from the time when Saul had retreated on Gilgal, and was anxiously expecting, with a handful of wavering men, the assault of the Philistines. Samuel had bade him wait there during seven days, with the promise to come down then and offer sacrifice on his behalf. As the prophet's arrival was delayed beyond the set period, and the people were threatening to desert him, the king ventured to sacrifice independently. For this he brought upon himself the prophecy of the fall of his dynasty* (13^{8-12a}).

Certainly, Saul through this quarrel was deprived of a restraining and a strengthening influence. The victory, too, at Michmash could not be final, it was only introductory. The Philistines, with their organized force and their strong cities, could better bear such a defeat than the Israelites such a victory. What was required from the young realm was no longer a vigorous rising followed by a momentary effort, but the patient organization of a steady defence. And this, because

* It must always be remembered that there was a theological question debated in these matters. Saul, the heaven-appointed king, failed in his mission and fell on Gilboa. There must therefore have been something in his life which brought upon him the displeasure of J', who would otherwise have given him victory. Thus the Chronicler (1 Ch 10¹³) gives as an additional cause for the king's rejection the fact that he had consulted an evil spirit at Endor; and Josephus (*Ant.* vi. xiv. 9) adds also as a cause that he had destroyed 'Ahimelech the high priest and the city of the high priests.'

* The exact sense of צב (1 S 13⁵) cannot be considered certain, but in this connexion it is enough to know that it represented in some way the Phil. superiority.

† See, however, Wellh. *Comp.* 247 f.; Budde, *Richt. u. Sam.* 191 ff., and W. R. Smith, *OTJC* 2 134 n., acc. to whom Gilgal is an unhistorical interpolation.

it was so novel in Isr. history, must have severely tried the temper of tribes not yet fully weaned from their desert instincts. Intertribal jealousies, further, which played so large a part in that early period (cf. Jg 9^{35a}, 81-3 12¹⁻⁶ etc.), and which troubled the kingdom even after David's reign had consolidated it (e.g. 1 K 12¹⁶), could not fail to spring up, especially since the chief belonged to one of the smaller tribes. All these things are enough to account in a sensitive man for the deep melancholy which clouded the king's powers at the very time when those were most needed (1 S 16¹⁴).

David's fame as a skilful harp player led to his being brought to the little court, where his music soothed the king's vexed mood. The charm, which made all men whom he met love the future king, laid hold on Saul, and he attached the young man permanently to his person as his armour-bearer (16¹⁴⁻²²). By this time the war against Philistia had changed its character. On their side the Philistines, taught by the disaster at Michmash not to despise their foes, and probably considering the subjugation of the barren hill-country scarcely worth the trouble it cost, were content to keep open their trade-route along the coast. On his side Saul recognized the folly of attempting to besiege the five strongly fortified cities in the valley. In the new border warfare which sprang up David soon proved himself an adept, and rose to a trusted position in the army. Recognizing his prowess, Saul gave the young captain his daughter Michal in marriage, and asked as bride gift the present of 100 Phil. foreskins—a gift significant at once of the low culture of the period and the character of the war (18^{25a}). But the new son-in-law proved dangerously strong. His deeds in the field and the personal magnetism which never forsook him, won him the love of Jonathan and the more perilous applause of the multitude. To the darkened mind of the king it seemed by no means impossible that ambition might prove too strong for gratitude and kinship. By guile and by open force he sought to get David into his hands. Each effort failed: even his daughter deserted him and tricked his messengers, while her husband escaped (ch. 19). After that open rupture David continued to linger in the neighbourhood of the court, while efforts were made, especially by the leal-hearted Jonathan, to heal the breach between Saul and the stoutest of his servants. But this only served to draw upon the prince the suspicion that he had entered into a conspiracy with the son of Jesse to dethrone the king,*—a suspicion which Jonathan was too proud in his integrity even to deny. The proud silence, however, would not appeal to so darkened a mind as Saul's had become. Such a position could not endure. At last David fled to Nob, northward from Jerus., and thence made his way through the country of the Philistines into the familiar South, where his own clan were sure to shelter him (ch. 21).

Saul, 'sitting under the tamarisk-tree at Gibeah,' reproached his own men as traitors because they had not betrayed the plotter, and as fools because they failed to recognize how the first result of setting up this Judahite would be the loss of power and prestige by Benjamin. He forthwith took a fearful vengeance on the priests who had harboured the fugitive, by massacring almost the entire household of Ahimelech at Nob, and then pursued the refugee in his retreat (22^{6a}).

How far this quarrel was the result of baseless suspicion in the diseased mind of the king, and how far it may have been justified by facts, must always remain uncertain. The fulness of the

* This is undoubtedly the meaning and the sting of 1 S 20^{30c}.

details which we possess, both over this period and over that in which David was hunted through the Negeb, proves that the hairbreadth escapes of the great king before he came to the throne were a favourite subject with the early historians. But all the accounts were written from a standpoint which regarded David as the divinely appointed king over all Israel. And it is not an impossibility that the active, patriotic mind of the young soldier may have seen the need, if his country were to be delivered, of some stronger hand upon the reins of government at that period. It is also possible that he may have been betrayed into words or acts which wrought with extra power on the morbid mind of Saul.

The first intention of the fugitive seems to have been to settle in a tract still occupied by the Canaanites which lay between Judah and Philistia. It enjoyed the double advantage of lying near the settlements of his own kindred, and of offering the desert for a last retreat. There he might hope to set up an independent principality without going over to the hereditary enemy; and the intermittent war along the western frontier might draw the king's attention away from his escaped captain. Once, therefore, he attempted to settle in a town at Keilah (23^{15a}). But the district was devoted to the king, and Saul drove him headlong from this refuge. He then betook himself to the pasture country S.E. of Judah and adjoining the Dead Sea. But here also, though he allied himself with the strong clan of the Calebites by his marriage with Abigail, he was unable to maintain himself. Saul's government was powerful enough to expel him even from this corner of the realm (chs. 24-26), and he was finally driven to find refuge under the protection of Achish in Gath (27¹). The Philistine princes, recognizing his worth, and especially his aptitude for the border warfare in which he had annoyed themselves, settled the fugitive in Ziklag (v. 6), where he might cover their unguarded flank, and keep the 'way of the sea,' the trade-route for Egypt, against the unruly tribes of the desert.

It is a strong proof of the extent to which the kingdom had been consolidated even during these years of war, that Saul was able to drive out of this remote part of his government one who combined with his popularity as captain family ties in that very region. The young realm must also have included much on the eastern side of the Jordan, for the last stand of Saul's house under Ishbosheth was made at Mahanaim (2S 2^{26a}). It now began to creep along the backbone of the hill-country and to aim at overpassing the valley of Jezreel into the Northern tribes. Had this succeeded, it would not only have gained a great accession of strength in linking the Northern tribes more closely with the Southern, it would also have cut the line of communication by which the trade of the Euphrates found its way over Damascus and Philistia to Egypt. This would have meant draining one chief artery of the life-blood in that trading community. (Only on this view of the problem can we understand why the final grapple between the two powers was not fought in the South near the headquarters of them both, but in the comparatively far-off North.)

Threatened in their most vulnerable point, the Philistines roused themselves to action, and marched by Sharon and Megiddo into Esdraelon to clear the threatened route. Saul followed, them along the hills, and crossing by En-gannim posted his army on Mt. Gilboa at the opposite side of the valley from Shunem where his adversaries lay.*

* No reference has been made to the other positions occupied by Saul and the Philistines, because, so long as the position of Aphek depends on nothing better than conjecture, all the rest must remain uncertain also. For a careful discussion of

In this position he commanded both Jordan and E. draelon. This was no longer a guerilla contest, but a grapple of sheer bodily strength between the two kingdoms. Saul realized it, suspected also that the Philistines were too strong for him. His visit to the witch at Endor (ch. 28) both betrayed and increased the agitation with which he faced the battle. Men said he went into the fight knowing what was before him; that the evening before, Samuel, who had first anointed him to lead the armies of Israel, summoned him to a tryst at the grave. So it fell out. The ground on which the fight befell was not such as could protect the Isr. infantry from the dreaded chariots of the enemy. The Philistines crossed the valley and mounted the hill slopes. Saul saw his army routed, his sons slain, and retained only strength enough to command his own death. The Philistines next day found their great enemy dead, consecrated his armour in the temple of the Ash-taro, and hung his decapitated body in the public square of Bethshan. But gratitude was as strong as hate, for men of Jabesh-gilead crossed the Jordan in the night, took down the body of the prince to whom they owed so much, and buried it on the site of his first victory (ch. 31).

Saul had been called to the task of freeing Israel from the Philistines, for without that freedom no advance was possible for the nation. And what had prompted him to seat himself on the throne had been no personal ambition, but a recognition of this fact, a very call of J". Because they could not fail to recognize this and the excellence of the deed, his people could not fail to reverence his memory, and even he who had fared worst at the king's hands sang his imperishable lament over him (2 S 1^{19a}). Yet Saul had failed in his attempt, and died on Mount Gilboa. How that could be possible was the problem which long puzzled men in Israel. May it not be that they did not look widely enough? For Saul had done his work, despite his failure. No one ever questioned but that the kingdom must continue; he had proved its value too well for that. The only question which still remained was as to the man who should succeed and complete the imperfect task. That some one must, was a foregone conclusion. The first king, though outward circumstances had proved too strong for him, and though he had been unable to resolve the many difficulties which the new condition of affairs raised within Israel itself, had done enough to make the way clear for his successor: Saul died on Gilboa, but he made David possible.

Saul was married to Ahinoam, the daughter of Ahimaaz (1 S 14⁵⁰). Most of his sons died at his side (31³); but one at least, Ishbaal or Ishbosheth (which see), escaped from Gilboa to meet a sadder fate (2 S 4⁹). A son of Jonathan, Mephibosheth (which see), appears in the history of David (2 S 9¹²⁻¹⁹), and from him the Chronicler (1 Ch 9⁴⁰) derives a long line of descendants. It was one of Dean Stanley's suggestions which requires nothing except proof, that as Zimri appears in that list, the rebellion of 1 K 16⁹ may have been the last effort of the fallen house to recover its position. Saul also left issue by a subordinate wife (2 S 21⁸), for whose fate see RIZPAH.

It is difficult to accept the computation of Ac 13²¹, which makes the length of this first reign in Israel 40 years. For, within two years of his father's accession, Jonathan was able to lead troops into battle (1 S 13¹⁻³), a fact which argues for Saul an age of 40 years at his 'coronation,' and it is almost impossible to believe that it was a man of 80 years of age who fought at Mount Gilboa. Josephus (*Ant.* x. viii. 4, vi. xiv. 9) gives the length of the reign as 20 years. While this may be

the question and a good statement of its difficulty, see Smith, *HGHL* 400 ff., 675, and cf. APHEK, No. 3. It is just possible that Bethshan was the objective of both forces, and that the Philistines sought to relieve, the Israelites to cover, the siege of the town.

merely a guess, it does not present the above difficulties, and agrees with the fact that Ishbaal was 40 years old at his father's death.

See, further, BENJAMIN, DAVID, and the Literature at end of the latter article.

2. Saul of Tarsus. See PAUL.

A. C. WELCH.

SAVARAN.—1 Mac 6⁴ AV. See AVARAN.

SAVE, SAYING.—Both 'save' and 'saving' (from Fr. *sauf*, its force being seen in *sauf mon droit*, 'my right being reserved,' see Skeat, *Etymol. Dict.* s.v.), in the sense of *except*, frequently occur in AV. Thus Ps 18³¹ 'For who is God save the Lord?'; Lk 18¹⁹ 'None is good, save one, that is God'; Dt 15⁴ 'Save when there shall be no poor among you'; Ac 20²³ 'Save that the Holy Ghost witnesseth in every city'; Neh 4²² 'None of us put off our clothes, saving that every one put them off for washing'; Ec 5¹¹ 'What good is there to the owners thereof, saving (אֵין) the [beholding] of them with their eyes?'

The phrase 'to save one alive' (Gn 12¹² 50²⁰, Ex 17¹⁸ 23 etc.) is used synonymously with 'to keep one alive' (Gn 6¹⁹ 30 73, Jos 14¹⁰ etc.), or 'to preserve one alive' (Dt 6⁴), the Heb. being a causative form of יָצַח 'to be alive.' Cf. Mt 28¹⁴ Tind. 'If this come to the rulers' ears, we will please him, and save you harmless.'

J. HASTINGS.

SAVIAS (B om., A Σαβίας), 1 Es 8² = Uzzi, an ancestor of Ezra; cf. Ezr 7⁴.

SAVIOUR.—See SALVATION.

SAVOUR, SAVOURY.—Savour comes from Lat. *sapor* taste (from *sapere* to taste) through the Old Fr. *savour* (mod. *sauveur*). It was used first of all, in accordance with its derivation, for the taste or relish of a thing; then it passed to the expression of the kindred sense of smell; and from this it was easily used in the fig. sense of name or reputation. All these uses are found in AV.

(1) *Taste*: Mt 5¹³ || Lk 14³⁴ 'If the salt have lost his savour (μωρὰ θῆναι), wherewith shall it be salted?' (ἀλισθησεται; in Lk ἀρνηθησεται, EV 'be seasoned'). The tr. in both places is from the Geneva version of 1557. The meaning is probably more than mere taste, rather 'virtue,' its power to make food 'savoury' (see the quotation from Udall's *Erasmus* at the end of this art.).

(2) *Smell*: Jl 2²⁰ 'His stink shall come up, and his ill savour shall come up' (רִיחָם, Cov. 'his filthy corruption,' Gen. 'his corruption'); elsewhere in OT always 'sweet savour' (Heb. רִיחַ, except Ezr 6¹⁰ 'sacrifices of sweet savours,' Aram. רִיחָא). In the Apocrypha εὐωδία is rendered a 'good savour' in 1 Es 1¹², a 'sweet savour' in Sir 35³ 38¹¹; other examples of the word are 2 Es 2¹² 'for an ointment of sweet savour' (in odorem unguenti), Sir 39¹⁴ 'give ye a sweet savour' (εὐωδισατε δαμῆν), 50¹⁵ 'a sweet-smelling savour' (δαμῆν εὐωδίας). In NT εὐωδία is tr. 'sweet savour' in 2 Co 2¹², and δαμῆν εὐωδίας is tr. 'a sweet-smelling savour' in Eph 5² (but in Ph 4¹⁸ 'an odour of a sweet smell'); elsewhere we find δαμῆν alone, 2 Co 2¹⁴ 'the savour of his knowledge,' i.e. the sweet smell of the knowledge of God (δαμῆν τῆς γνώσεως αὐτοῦ); and 2¹⁶ 'To one we are the savour of death unto death; and to the other the savour of life unto life' (οἱς μὲν, δαμῆν θανάτου εἰς θάνατον οἱς δὲ, δαμῆν ζωῆς εἰς ζωὴν; edd. insert ἐκ before θάνατον and before ζωῆς, whence RV 'from death . . . from life'). Cf. Mandeville, *Travels* (in 'Macmillan's Lib. of Eng. Classics,' p. 113), 'And at the foot of that mount is a fair well and a great, that hath odour and savour of all spices'; Ju 12³ Wyc. 'the hous was fullid of the savour of the oynemente'; Jer 48¹¹ Cov. 'hir taist remayneth, and hir savoure is not yet

changed'; and the Note to Lv 1⁹ in *Matthew's Bible*, 'This *sweet odoure* is: the sacryfyce of fayth and of pure affeccion, in whych God is as delited, as a man is delited in the good savoure of meates, as it is said of Noe, Gen. viii. d.'

(3) Figuratively, *reputation*, Ex 5²¹ 'Ye have made our savour to be abhorred (AVm 'to stink') in the eyes of Pharaoh.' Cf. also Gn. 34²⁰, 1 S 13¹, 2 S 10⁶, and the Eng. 'to be in (or to bring into) bad odour.'

The verb 'to savour' is (1) to taste or smell of, as Pref. to AV, 'Thus to minse the matter, we thought to savour more of curiosity than wisdom.' (2) To seek out by taste or smell, as Cranmer, *Works*, i. 181, 'By this you may soon savour what judgment this man is of.' So in AV Mt 16²³ || Mk 8³³ 'thou savourest not the things that be of God' (οὐ φρονεῖς), Vulg. *non sapis*, whence Wyc. 'thou savorist not,' and all following versions till RV, 'thou mindest not.' Cf. Bunyan, *Holy War*, p. 25, 'And that which made him yet the more ignoble . . . was, that he never could savour good, but evil.'

The adj. 'savoury' occurs in AV only in Gn 27⁴. 7. 9. 14. 17. 31 of the 'savoury meat' which Isaac loved (Heb. קָצִיקִים always plu., from קָצַק to taste). The word is also found in Is 30²⁴ marg., and accepted into RV text, AV 'clean', RVm 'salted,' in reference to the provender of oxen and young asses (Heb. קָצִיקִי קָלִיל וְקָצִיקִי, *Oxf. Heb. Lex.*: 'provender seasoned with salt or a salt herb, rendering it more tasty'). Cf. Udall, *Erasmus's Paraph.* i. 19 (on Mt 5¹³), 'It muste nedes bee a lively and a piththie thyng that can be sufficient to sawce and make savourie the life of all mankynde, being so verishe and unsavoury thorowe the desyres and fond opinions of vayne thynges.'

J. HASTINGS.

SAW.—קָצַר 2 S 12²¹, 1 K 7⁹, 1 Ch 20⁸ [but in this last the correct text is קָצַר 'axes'], קָצַר Is 10¹⁶; LXX κτενισ. From 1 K 7⁹ it is evident that saws were used for cutting stone. In Syria, at the present time, long smooth blades of iron are used to cut out columns. These have no handles: a heavy piece of wood is fitted to the back of the saw; this is grasped by two men, who draw it backwards and forwards, sand and water being plentifully used. It seems probable, from the marks on the rocks, that the ancient Egyptians used bronze saws with emery for cutting granite (Wilkinson, *Anc. Egypt*, ii. p. 254 n.). The ancient Egyptian carpenters in cutting wood drew the saw towards them instead of pushing it from them. In India the same custom prevails. English saws are bought eagerly by the Hindu carpenters, but the English handles are removed, and other handles fixed at the narrow end of the blades. In the NT the verb used is σφίλω, He 11³⁷.

W. CARSLAW.

SCALL.—See MEDICINE, vol. iii. p. 329^b. Scall is the AV and RV translation of קָלַל (Lv 13. 14³⁴): Wyc. has 'wem', Tind. 'burning', Cov. 'skyrfe', Gen. 'blacke spot', Dou. 'spotte', Bish. 'fret'. The Eng. word is of Scand. origin, and signified primarily baldness (Icel. *skalli*, a bald head), but in Middle Eng. (also spelt *scalde*) it is a scab or eruption, generally of the head. Cf. Chaucer, *Scrivener*, 3—

'Under thy longe lockes thou maist have the scalle';

Spenser, *FQ* i. viii. 47—

'Her craftie head was altogether bald,
And, as in hate of honourable eild,
Was over growne with scurfe and filthy scald';

and Tindale, Lv 21²⁰ 'Broken handed, or croke backed, or perleyed, or gogeyed, or maunge, or skaulde'; Dt 28²⁷ 'And the Lorde will smyte the

with the botches of Egipte and the emorodes, scalle, and maungynesse.'

J. HASTINGS.

SCANDAL.—In Wis 14¹¹ marg. the Gr. σκάνδαλα is translated 'scandals' (text 'stumbling-blocks'). See OFFENCE, vol. iii. p. 586^b. The Rheim. version uses 'scandal' as the tr. of σκάνδαλον (after Vulg. *scandalum*), in Mt 13⁴¹ 'The Sonne of man shal send his Angels, and they shal gather out of his kingdom al scandals, and them that worke iniquitie'—16²⁸ 18⁷, Ro 14¹⁴; and the verb 'scandalize' occurs freq. as the tr. of σκανδαλίζω, as Mt 5²⁸ 11⁶ 15¹² 18⁸, Lk 7²³, Jn 16¹.

J. HASTINGS.

SCAPE-GOAT.—See AZAZEL.

SCARLET.—This word is the equivalent in AV of—1. שָׁנִי, or שֵׁנִי *hashshuni* (the latter in Gn 37²⁰, Ex 28⁵ 35²⁵. 35 38² 39¹. 3, Jos 2¹⁸. 21, Ca 4⁸). 2. שָׁנִי *shānī* (Is 1¹⁸ [with art.], Pr 31²¹). 3. שֵׁנִי-תֹלַאֲתִי *shēni-tōlā'ath*, and שֵׁנִי-חַטְטֹלַאֲתִי *shēni-hattōlā'ath* (Lv 14⁴. 6. 49. 51. 52 19⁶). 4. שֵׁנִי-תֹלַאֲתִי-הַשֵּׁנִי *tōlā'ath-shānī*, and שֵׁנִי-חַטְטֹלַאֲתִי-הַשֵּׁנִי *tōlā'ath-hashshūnī* (Ex 25-39 *passim*, Nu 4⁵). 5. תֹּלַאֲתִי *tōlā'ath* (La 4⁵). Once (Jer 4³⁰) only is *shānī* tr'd AV 'crimson', RV 'scarlet' (see CRIMSON). In one passage (Is 1¹⁸) AV and RV tr. *shānī* 'scarlet' (LXX φοινικεύς), and *tōlā'ath* 'crimson' (LXX κόκκινος). 6. κόκκινος (Mt 27²⁸, He 9¹, Rev 17³. 4 18¹². 16). As our Eng. versions do not rigidly preserve the distinction between crimson and scarlet, we cannot wonder that the ancients did not always do so. *Tōlā'* originally signifies the worm or insect, and *shānī* the colour. In point of fact, both colours are produced from the same insect. Sometimes one of the two words is omitted, and sometimes the other, and sometimes both are given. The article is inserted or omitted, without an obvious reason. The creature alluded to, which produces the colour, is the cochineal, a hemipterous insect, *Coccus ilicis*, of which the male in the imago state is winged, and the female wingless. This insect attaches itself to the leaves and twigs of *Quercus coccifera*. An allied species, *Coccus cacti*, is raised on the leaf-like branches of *Cactus Ficus Indica*, Haw., and *C. cochillini*, Mill., particularly in the neighbourhood of Nablūs. The female is oval in form, convex at the upper, flat at the lower surface. She is about the size of half a cherry kernel, but dries up to that of a grain of wheat. The Arab. name of this bug is *kirmiz*, from which the word *crimson* is derived. Other colours besides scarlet and crimson, as purple and violet, are manufactured from the cochineal. See, further, art. COLOURS, s. 'Scarlet.'

G. E. POST.

SCEPTRE is AV and RV tr. of 1. שֵׁבֶט *shēbet*: Gn 49¹⁰ ('The sceptre [LXX ἀρχὴν] shall not depart from Judah,' etc.; on this passage see art. LAW-GIVER in vol. iii. p. 83, and SHILOH, below, p. 500 f.), Nu 24¹⁷ ('there shall come forth a star out of Jacob, and a sceptre [LXX ἀσπερας] shall rise out of Israel,' where sceptre and star [cf., for the latter figure, Is 14¹², Rev 22¹⁶] are symbolical for a mighty prince *), Ps 45⁷ ('a sceptre [LXX and NT ῥάβδος] of equity is the sceptre of thy kingdom,' quoted in He 1⁸), Is 14⁵ (|| שֵׁבֶט; 'the LORD hath broken the staff of the wicked, the sceptre [LXX ῥαβδος, which is used also for 'staff' immediately before] of the rulers'), Ezk 19¹¹ ('she [the vine symbolizing Israel] had strong rods for the sceptres of them that bare rule'; cf. v. 14, where, after her destruction, 'there is in her no longer a strong rod to be a sceptre to rule'), Am 1⁶. 8 ('I will cut off him that holdeth the sceptre' [LXX here and in the two verses in

* This appears decidedly preferable to the suggestion of Ball (in *SBOT*, on Gn 49¹⁰) that שֵׁבֶט ('star') may here mean, like the Sumerian MULMUL, 'a lance, or else a club, mace, or maul, with a spiked head.'

Ezekiel has *φολή*, taking *shēbet* in the sense of 'tribe'], Zec 10¹¹ ('the sceptre [LXX *σκήπτρον*] of Egypt shall depart away'). 2. *שַׁרְבִּיט* *sharbit*, used of the golden sceptre [LXX *ἡ χρυσή ῥάβδος*] of Ahasuerus, Est 4¹¹ 5² *בַּשָּׁרְבִּיט* 8⁴ [all]. *Sharbit* is simply an Aramaism for *shēbet* (cf. the insertion of *r* in Darmeseḫ for Dammeseḫ in 1 Ch 18⁶, and see Siegfried, *Lehrb. d. neuheb. Sprache*, § 18 c).

In addition to the above instances, RV in Nu 21¹⁸ corrects AV 'by direction of the lawgiver' (LXX *ἐν τῇ βασιλείᾳ αὐτῶν*) to 'with the sceptre.' The Heb. is *בְּרִחְוָה* || *בְּרִיחְוָה* 'with their staves.' Similarly RV reads in Ps 60⁷ (9) = 108⁸ (9) 'Judah is my sceptre' (same Heb. word) for AV 'Judah is

some portrayals of the Persian monarchs (see Rawlinson, *Anc. Mon.* iii. 203 ff., who describes the Persian sceptre as a rod about five feet long, ornamented with a ball or apple at its upper end, and tapering at its other extremity almost to a point). Probably both forms of 'sceptre' are in view in Gn 49¹⁰ (where *עֶזְרָא* should prob. be taken as a royal emblem), the longer one being represented by the *קֶרֶן* (prop. 'commander's staff') of the second clause, and the shorter one by the *עֶזְרָא* of the first clause.* The long sceptre is simply an ornamented staff, the short one is a development of the club or mace (cf. art. ROD, and see figures in Ball, *l.c.* pp. 50, 199^a, 217). It is this last-named weapon that is called *shēbet* in 2 S 23²¹ = 1 Ch 11²³ (AV and

ASSYRIAN KING WITH SCEPTRE (DOG-RIVER DESCRIPTIONS).

my lawgiver' [LXX *βασιλεύς*]. See LAWGIVER, *l.c.* It also substitutes 'sceptre' for 'rod' as tr. of *shēbet* in Ps 125³ ('the sceptre [LXX *ῥάβδος*] of wickedness shall not rest upon the lot of the righteous').

'Sceptre' is the appropriate rendering of *shēbet*, when this is associated with a king or used absolutely,* in which latter instance it probably always designates a royal possession (see Driver, *Expos.* July 1885, p. 13). *Shēbet*, in this sense, may stand either for a short ornamental sceptre such as appears in some representations of the Assyrian king (see illustration above, and the figures in Ball, *Light from the East*, pp. 160, 199^b, 217), or for a long staff reaching to the ground, which characterizes

* In instances like Jg 5¹⁴ (*קֶרֶן עֶזְרָא*) 'baton' would be a very suitable rendering.

VOL. IV. — 27

RV wrongly 'staff') and Ps 2⁹ 23⁴ (AV and RV less clearly 'rod').

The 'golden' (*χρυσέον*) or 'gold-studded' (*χρυσέοις ἡλοισι*) sceptre (*σκήπτρον*) appears frequently in the pages of Homer in the hands of kings and chiefs (e.g. *Il.* i. 15, 246; *Od.* xi. 91, 569). With such a 'sceptre' Ulysses beats Thersites (*Il.* ii. 265 ff.); a sceptre is put by a herald into the hands of Menelaus when he rises to address the Greeks (*ib.* xxiii. 568, cf. *Od.* ii. 37).

On the difficulty of approaching the presence of the Persian kings referred to in Est 4¹¹, cf. also Herod. iii. 118, 140.

J. A. SELBIE.

* Dillm., Ball, Gunkel, *et al.*, make *קֶרֶן* and *עֶזְרָא* synonymous here, and understand both to refer to a long 'sceptre' or staff; but this is not required by the parallelism. In Ps 110² *קֶרֶן* is likewise an emblem of rule, and virtually a 'sceptre.'

SCEVA (Σκευᾶς, *Sceva*), Ac 19¹⁴.—The name (Blass, *ad loc.*) was probably of Latin origin *Scaeva*, but had been assimilated to a Greek form as if derived from σκεύος; it occurs in an inscription at Miletus (*CIG* ii. 2889. 5). In Ac 19¹¹⁻²⁰, in the account of St. Paul's preaching at Ephesus, we are told that God wrought special miracles by the hands of Paul, even handkerchiefs carried from his body were sufficient to heal. But some of the wandering Jewish exorcists tried to exorcise in the name of Jesus, saying, 'I adjure you by Jesus, whom Paul preaches.' Then is recorded the special instance of the seven sons of Sceva, described as a Jewish high priest, who attempted this and failed, the evil spirit answering, 'Jesus I know, and Paul I know, but who are ye?' and the man driving two of them * naked and wounded out of the house. This caused great fear. Many who had used curious arts came confessing what they had done. Many also burnt magical books amounting in value to 50,000 drachmas (about £2000). 'So mightily grew the word of God and prevailed.'

The whole paragraph must be taken together. It represents St. Paul's miracles and spiritual power in contrast to the magical customs which so widely prevailed. Many Jews especially devoted themselves to sorcery, and Ephesus was noted for, amongst other forms of sorcery, the *Ephesia grammata* (see *EPHESUS* and *MAGIC*). St. Paul's power and success led to imitation of him. The name of Jesus evidently seemed to have some special efficacy, and so was adopted by the sorcerers, as every other name in turn was adopted (on the power of names see Frazer, *Golden Bough*, i. 403). The discoveries of papyri made in the last few years have enabled us to realize the very large extent to which magical practices prevailed, and the number of magical books which existed. The name of Jehovah in some form is common, and in the following extract from a magical papyrus at Paris the name of Jesus is used. The papyrus is of the 4th cent., and the original cannot be earlier than Hadrian, who is mentioned by name; it is published by C. Wessely, 'Griechische Zauberpapyrus von Paris und London,' in the *Denkschriften der phil.-hist. Classe der kais. Akad. der Wissenschaften in Wien*, vol. xxxvi. (1888) l. 3007 ff.†

πρὸς δαιμονιοζόμενους Πιβηχίω δίκυμον. λαβὼν ἔλασιν ὀρθοκλῆντα μετὰ βοτάνης μαγεύματα καὶ λογιμότητας ἵνα μετὰ γυμνασίου ἀγροῦσιντο . . . ἐτίσας ἀντικρὺς ὀρθῶς. ἔστιν δὲ ὁ ὀρθισμὸς οὗτος: ὀρθῶς εἰ παρὰ τοῦ θεοῦ τῶν Ἑβραίων Ἰησοῦ ἰαβᾶ ἰανῶ ἀβραῶν* αἰα: θεὸς ἐλ' ἐλ' αὐῶ αὐῶ τῶν Ἑβραίων ἀβραῶν ἰαβραῶν ἀβ' ἐλ' ἐλ' αὐῶ ἀβραῶν μαρεῖα βραχμῶν πυρραῶν* εἰ ἐν μίση ἀνέστης καὶ χρίσας καὶ ὀμχλῶς ταννῆς* παταξέτω σου ὁ ἀγγέλος ὁ ἀπαράντης καὶ ἐκπορεύτω τὸν πνεύματόν σου δαίμονα τοῦ πλάσματος τούτου ὁ ἐπ' αὐτὸν εἰς τὸ ἄγιον ἰουδοῦ παραδίδω (MS παρὰδίδω) . . . ὀρθῶς εἰ τὸν σμακοῦντα τῷ Ἰερμὶλ ἐν ἐστύμ φανταῖ καὶ νεφίλῃ ἡμμερῇ κ.τ.λ.

Both the evidence of papyri and the incident recorded in the Acts imply a conviction, even amongst those who did not believe, that there was power, perhaps special power, in the name of Jesus. It would imply a general impression that miracles were wrought in His name, and bears witness to the force and power of Christianity. It is instructive also to notice how from the beginning Christianity is the resolute foe of all magic.

There are a number of critical questions connected with this narrative. First of all there is a question of text. The RV (Codex B) reads: 'And there were seven sons of one Sceva, a Jew, a chief priest, which did this. And the evil spirit answered and said unto them, Jesus I know, and Paul I know; but who are ye? And the man in whom the evil spirit was leaped upon them, and mastered both of them, and prevailed against them, so that they fled out of that house naked and wounded.' D (supported by the margin of the Philoxenian)

* But see footnote on next column.

† For this and other information the present writer is indebted to Dr. F. G. Kenyon of the British Museum.

reads: 'And among those also the sons of one Sceva, a priest, wished to do the same thing, who had a custom of exorcizing such; and having gone in unto the man possessed with devils, they began to call upon the name, saying: We command thee in Jesus, whom Paul preaches, to come forth.' According to Ramsay (*Church in the Roman Empire*, p. 163): 'Codex Bezae here gives a text which is intelligent, consistent, and possible; the accepted text is badly expressed and even self-contradictory.' This opinion seems to be largely followed. To the present writer the text of D is clearly a bad paraphrase, and its growth can be shown. The statement that Sceva was a Jewish high priest seemed (as it is) very curious, and therefore was altered in various ways. D alters ἀρχιερεὺς into ἱερεὺς, and omits Ἰουδαίου, so G¹⁹ reads 'sacerdotis,' and Cassiodorus explains by 'principis synagoga.'

Then again in the text of B, while in v. 14 we have seven sons, in v. 16 it is stated that the man 'mastered both of them,' implying only two. G¹⁹ therefore substitutes 'duo' for 'septem.' D leaves out the number altogether, while the majority of later authorities prefer to omit or alter ἀμφοτέρων in v. 16, the Sahidic even putting *eorum septem*. The remaining alterations of D are, as is generally the case, mere inept expansions. The narrative of St. Luke is very much abbreviated, and the paraphrast or translator thought that he could make it more clear, but he does not add a single point which could not be guessed. Even in the few words he does add he manages to introduce the form ἵχνη and the word δαιμονιοζόμενος which are not Lukan, and the expression ἰερακλῆσαι τὸ ὄνομα which does not occur unqualified in the NT, and betrays a later age. It may be noted that the word ἀμφοτέρων is undoubtedly Lukan (8 or 9 times in Luke and Acts, 6 times elsewhere in NT). The inconsistency may be difficult, but it is quite inconceivable that any one who had the D text before him should have taken the trouble to insert *septem*. On every principle of textual criticism the text of B must be the original.

The statement that Sceva was a Jewish high priest is undoubtedly difficult, but we have no right therefore to correct it away. Yet in the sense of a member of a high priestly family there must have been many who could claim it, and as Zeller (*Acts of the Apostles*, Eng. tr. ii. p. 59) says: 'It is quite possible that a band of exorcists, giving themselves out for sons or disciples of a Jewish high priest, may have made an experience of the futility of their arts in the person of a lunatic who had heard something of Paul and of Christ.' The difficulty about the discrepancy of numbers is more interesting. St. Luke's narrative is obviously very much shortened; only the necessary statements are made, and only what is essential is given. He never tells us that only two out of the seven were engaged in this incident, and it comes out accidentally in ἀμφοτέρων.* Does not this small point imply that the writer had here a source, almost necessarily a written one, from which he abbreviated his narrative?

It has been suggested that vv. 11-20 have been added to the original work. Hilgenfeld ascribes the passage to R. Ramsay, who has taken a dislike to it, says: 'If there were many such contrasts in the book as between vv. 11-20 and 23-41, I should be a believer in the composite character of the Acts' (*St. Paul the Traveller*, p. 273). It will be interesting, therefore, to examine the language. It will appear that throughout the passage we find characteristic Lukan expressions.

οὐ τὰς τυχούσας, cf. Ac 28.
τυχούσας, 7 times in Acts and Luke, 6 times elsewhere.
ἐπισταμαι, 10 t. in Acts, 5 elsewhere.
διὰ χειρὸς, τὴν χειρὸς, 8 times in Acts.
γινώσκω, 10 t. in Acts, twice in Luke, 3 t. elsewhere.
τοῖς κατακλινοῦσιν with acc. 13 t. in Acts, once in Luke.
ἐπισπέντω, 10 t. in Acts and Luke, 4 elsewhere.
φάρμακον ἰσχυρὸν, cf. Lk 11.
μεγαλύνω, 5 t. in Acts and Luke, 3 elsewhere.
ἀντιστοιχεῖν, common in Acts.
ἰκανοί, 29 times in Acts and Luke, 12 elsewhere.
τιμὴ, or τιμῆς of price, 5 times in Acts. With v. 30 cf. 67 129.

The whole structure of the paragraph is exactly in the manner of the writer of the Acts, with the final clause summing up the whole, while there are indications that here as elsewhere he has reproduced partly in his own words a written narrative, just in the same way as he reproduces the Synoptic narratives in the Gospels with signs of his own phraseology.

Besides the special point touched on above, the historical character of the narrative has been attacked more generally. Ramsay (*St. Paul the Traveller*, *loc. cit.*) finds in it a vulgarity of tone compared with the great scene at Paphos. This seems to the present writer purely fanciful. Zeller (*op. cit.* ii. 58) says: 'Even from the standpoint of the miraculous faith presented in our book, such an utterly crass and magical representation of the healing power of the apostle has too much that is offensive.' What he particularly objects to is the story of the healing power in the handker-

* [In *Expos. Times*, Dec. 1900, p. 144, it is argued by Nestle that ἀμφοτέρων, like 'both' in English (see editorial note, 41), may include more than two, and is at times equivalent to *paris*. It was also discussed by J. B. Bury in the *Classical Rev.* xi. 393 (1897). There are at least two instances in Papyri: *Brit. Mus. Pap.* 336; *Geneva Pap.* 67].

chiefs of St. Paul, and this is supposed to be a mere parallel to the narrative in Ac 5^{14, 15}. The parallel is too distant to have any weight, and here, as elsewhere, we need only remark about the miracles, that even if the handkerchiefs of St. Paul had no healing power it would certainly be believed that they possessed it, and that if the faith of the recipient was a condition of healing it might surely act equally with those who received a handkerchief in the virtue of which they believed. The whole narrative must be criticised and judged from the point of view of the time and place. The remarks of Conybeare and Howson, ch. xiv., who bring out how exactly the story harmonizes with the atmosphere of Ephesus, are much more valuable. 'The character of miracles was not always the same. They were accommodated to the peculiar forms of sin, superstition, and ignorance they were required to oppose. . . . So on this occasion garments were made the means of communicating a healing power to those who were at a distance . . . such effects thus publicly manifested were a signal refutation of the charms and amulets and mystic letters of Ephesus.' A. C. HEADLAM.

SCHISM.—Only 1 Co 12²⁵ 'That there should be no schism in the body': Gr. *σχίσμα*, which means either lit. a rent in a garment (Mt 9¹⁶ = Mk 2²¹) or fig. a division in a community (Jn 7³³ 9¹⁶ 10¹⁹, 1 Co 1¹⁰ 11¹⁸ 12²⁵). RV retains 'schism' in 1 Co 12²⁵, and in the marg. of 11¹⁸ points out that the Gr. is 'schisms' (text 'divisions'). See HERESY, vol. ii. p. 351^a.

SCHOOL.—See EDUCATION.

SCHOOLMASTER.—Only Gal 3^{24, 25} AV (Gr. *παιδαγωγός*, which occurs also in 1 Co 4¹⁵ AV 'instructor'; RV in all places 'tutor'). The *παιδαγωγός* (Lat. *pædagogus*) was a person (generally a slave) who had charge of the Greek or Roman boy till he reached manhood. Tindale's translation 'scholmaster' (Wyc. 'maister') is misleading, as the *παιδαγωγός* was not a schoolmaster or teacher (*διδάσκαλος*). Nor is the apostle thinking of one who conducted to school, though no doubt the *παιδαγωγός* might lead the boy to school if he went there. The contrast in Gal. is between the restraint of boyhood and the liberty of manhood. To be under the Law is to be always under the control of a *παιδαγωγός*, to be in Christ is to be free from that irksome restraint.

SCHOOLS OF THE PROPHETS.—See EDUCATION, vol. i. p. 647^a, and PROPHECY, p. 109^a.

SCIENCE.—This word, as used in AV, means simply *knowledge*. Wyclif (*Works*, iii. 122) renders 1 Co 8¹ 'Science blowes men' (AV 'knowledge puffeth up'). Cf. Barlowe, *Dialogue*, 109, 'There is no truthe, no mercy, nor science of god in the yerth'; Golding, *Calvin's Job*, 571, 'Thou shalt not run after witchcrafts, and other vaine sciences'; and Ro 2²⁰ Rhem. 'Having the forme of science' (AV 'which hast the form of knowledge', Gr. *τῆς γνώσεως*). The word occurs in AV only Dn 1⁴ 'Children . . . understanding science' (אֲנִי יְדִיעָה, LXX γραμματικούς, Theod. γινώσκοντας γνώσιν); and 1 Ti 6²⁰ 'Avoiding . . . oppositions of science falsely so called' (*ἀντιθέσεις τῆς ψευδωνύμου γνώσεως*, Rhem. 'oppositions of falsely called knowledge'). See KNOWLEDGE and Gnosticism.

Science in the modern sense, that is, the discovery and classification of secondary laws, is unknown to the Bible. To the Hebrew mind phenomena were immediately due to the word of Jehovah. See P. Thomson in *Expos.* 2nd ser. vol. i. pp. 161 ff., 241 ff.

J. HASTINGS.

SCORPION (שְׂרָפָה *akrābh*, σκορπίος, *scorpio*, Arab. *akrab*).—There has never been any reason to doubt the identity of this animal. It is of the order *Arachnidae*, resembling in shape a lobster, except that it has a long tail, at the end of which is its venomous sting. Its claws are used for seizing its prey, which it kills with its sting. When the animal runs it holds its tail upward in readiness to strike. It is carnivorous, living on insects and worms. Scorpions swarm under stones and in chinks of walls, and often conceal themselves under beds and mats in houses. Their sting is very painful, frequently causing a night of agony, which nothing but a large dose of morphine will assuage. The wound is dangerous to human life only when in a situation where the swelling obstructs the respiration. Not less than a dozen species are found in Palestine and Syria. The largest is 6 in. long, and black. Others are yellow, brown, white, and red, and variously striped.

The scorpion is frequently mentioned in Scripture. Allusion is made to its residence in the desert (Dt 8¹⁵). Rehoboam threatens to chastise his contumacious subjects with scorpions (1 K 12^{11, 14}, 2 Ch 10^{11, 14}). This is prob. figurative (see next art.). Again, scorpions are alluded to figuratively with briars and thorns to designate a rebellious people (Ezk 2⁶). The offer of a scorpion instead of an egg (Lk 11¹²) is mentioned in a way that shows the horror which this creature inspired. The figure employed by our Lord in this passage is suggested by the egg-like form of the scorpion when at rest (see Plummer, *ad loc.*). The pain of its sting (Rev 9³), the organ that inflicts it (v. 10), and its venomous quality (v. 3), are noted. The scorpion is also mentioned in Apocr. (Sir 26⁷ 39²⁰, 4 Mac 11¹⁰).

G. E. POST.

SCOURGE (αἶψα, usually translated 'scourge,' six times [1 K 12^{11, 14}, 2 Ch 10^{11, 14}, Pr 26³, Nah 3³] 'whip'; Gr. nouns and verbs μάστιξ, *μαστιγίζω*, *μαστιγίσω*; φραγέλλιον, *φραγελλῶ*; *flagellum*, *flagellare*).—Among the Hebrews the usual mode of corporal punishment, legal and domestic, was that of beating with the rod, just as the bastinado is still the common method in Eastern countries. The only reference to the scourge as an instrument of punishment is found in 1 K 12^{11, 14}, 2 Ch 10^{11, 14}. Rehoboam signaled his accession to the throne by threatening that, whereas his father had chastised the people with whips (or scourges), he would chastise them with scorpions. The scorpion (שְׂרָפָה) may have been a more terrible kind of weapon in actual use—either a knotted cudgel or a scourge armed with barbed points, just as the Roman *scorpio* was described by Isidore as *virga nodosa et aculeata*. It is possible, however, that the king was only using a lively figure of speech.

Under the Roman system of scourging, the culprit was stripped and tied in a bending posture to a pillar, or stretched on a frame (*divaricatio*), and the punishment was inflicted with a scourge made of leathern thongs weighted with sharp pieces of bone or lead. This is what Horace calls the *horribile flagellum* (*Sat.* i. iii. 119). Jesus was scourged with it by order of Pilate before being led away to be crucified (Mt 27²⁶, Mk 15¹⁵, Jn 19¹). He had foreseen and foretold this indignity (Mt 20¹⁹, Mk 10³⁴, Lk 18³²). The punishment of scourging usually preceded crucifixion (see references in Swete, *St. Mark*, *ad loc.*). The Porcian law forbade the scourging of Roman citizens; and on one occasion St. Paul, after being actually bound in order to be scourged, escaped the infliction by demanding if it was lawful to scourge a man who was a Roman and uncondemned (Ac 22^{24, 25}).

Jesus forewarned His disciples that they would be scourged in the synagogues (Mt 10¹⁷ 23³⁴). The Jewish method is fully described in the Mishna.

The scourge consisted of three thongs of leather, and the offender received thirteen stripes on the bare breast and thirteen on each shoulder (*Makkoth* iii. 12). St. Paul records that he five times suffered this punishment at the hands of the Jews (2 Co 11²⁴); and 'others had trial of . . . scourgings' (He 11²⁶).

Legal usages apart, Jesus made a scourge (*φραγέλιον*) of small cords before cleansing the temple (Jn 2¹⁵). Opinion differs as to the use He made of it. Meyer thinks He drove out the animals with it, not the persons; Godet, that 'it was not an instrument but an emblem, a sign of authority and judgment.'

'Scourge' is frequently used in a metaphorical sense. The Canaanites were a scourge (*עֲרֹב*) in the side of the Israelites (Jos 23¹³); Eliphaz spoke of hiding from the scourge of the tongue (Job 5²¹); the plague was the scourge by pre-eminence (Job 9²³, Is 10²⁶); and by a fusion of metaphors an invasion was called an overflowing scourge (Is 28¹⁵).

For literature see art. CRIMES AND PUNISHMENTS.

J. STRACHAN.

SCRABBLE.—1 S 21¹³ only. 'And scabbled on the doors of the gate' (*שָׁרַבְלָה*). *AVm and RVm 'made marks': the subst. *שָׁרַבְלָה* a mark or signature, esp. in the form of a cross, became the name of the Heb. letter *n*; see MARK, § 6). The Eng. word comes from the Geneva version, where the marg. is 'by making marks and toys.'

Though the same in meaning as 'scribble' (from Lat. *scribere* to write), it has no connexion with that word etymologically. Skeat considers it to be a dialectic form of 'scrapple' (a frequentative of 'scrape'), of which 'scramble' is a nasalized form. Bunyan uses 'scrabble' in the sense of 'scramble' (*PP* p. 116, see Venables' note on p. 467). 'Now, after a while, Little-faith came to himself, and getting up, made shift to scabble on his way.' The modern word 'scrawl,' says Skeat, 'appears to be nothing but a careless form of "scrabble".'

J. HASTINGS.

SCREECH OWL.—See OWL.

SCRIBES.—i. ORIGIN AND CHARACTERISTICS.—In the time of our Saviour Jewish piety was largely legalistic and formal. The whole life of a pious Jew was strictly regulated by the Law. The Law was God's greatest gift to Israel; it was the complete revelation of His will and the basis of the covenant into which He had entered with them at Sinai; in it God had made known the perfect way of life, binding Himself by its terms to reward both in time and eternity the pious Jew in proportion to his observance of its precepts. The Law was therefore the binding norm both of the religious and the moral life. Religion was not a communion of man with God, but a legally correct walk before God. Love of the Law was the essence of piety; conformity to the Law was the standard and source of all righteousness. The aim and motive of this piety was the hope of reward in the present age and in the age to come (cf. Weber, *Jüd. Theol.* 1 ff.).

This legalistic tendency, which dates at least as far back as Ezra and Nehemiah, called into existence a class of men who specially devoted themselves to the study and exposition of the Law. These were the *gōphērim* or scribes. The earlier scribes, however, must not be identified in all respects with those of NT times. The latter were mainly jurists; the former were men of (sacred) letters: copyists, editors, students, and interpreters of Scripture, and more especially of the Law. Ezra, 'the scribe' *par excellence* according to Jewish tradition, is the great typical form of these earlier scribes or exegetes of the Law (Ezr 7^{6, 11, 12}, Neh

8^{1, 4, 9, 13} 12^{26, 28}). * He is described as 'a ready scribe in the law of Moses' (Ezr 7⁶), i.e. as a man of letters skilful in the Law, and as having 'set his heart to seek the law of the Lord, and to do it, and to teach in Israel statutes and judgments' (v.¹⁰). This description of their activity doubtless applies in the main to Ezra's immediate successors. They occupied themselves in gathering together and elaborating Israel's sacred literature, in interpreting it to the common people, who were largely ignorant of Hebrew, and in making the Law the rule of faith and life.† But down to the Maccabean period their obedience to the Law was not synonymous with the narrowness of later Judaism (see Wildeboer, *Die Sprüche*, xvi). They were the 'wise,' the 'men of understanding,' the 'just men' of Proverbs and Ecclesiasticus (cf. Sir 6²², 9¹⁴, 14²⁰, 38²⁴⁻³⁹, Dn 11^{23, 25} 12²). It would seem from 1 Ch 2⁵⁶ that they tended to form themselves into guilds and families.

Like Ezra himself (Ezr 7¹² etc.), the scribes were originally found among the priests and Levites (cf. Neh 8^{7, 13}, 2 Ch 34¹³). But pious 'laymen' also naturally devoted themselves to the professional study of the Law, so that there was gradually formed, alongside of the priests, who were the official interpreters of the Law, a relatively independent class of scribes. During the Greek period this independence developed into opposition, not indeed to the priesthood generally, but to the priestly aristocracy, several of whom fell away to Hellenism and neglected the laws and customs of the fathers. The attempt of Antiochus Epiphanes to suppress the Jewish religion brought matters to a crisis. It increased the scribes' devotion to the Law, and made them more narrow and exclusive. It also greatly increased their reputation among the people as being the leaders of those who were zealous for the Law (cf. 1 Mac 7¹² for their connexion with the Hasidæans), and as men who were ready to suffer martyrdom for their faith, 'welcoming death with renown rather than life with pollution' (2 Mac 6¹⁸⁻³¹). The issue of the Maccabees rising in the Hasmonæan State intensified their narrowness and exclusiveness; they became Pharisees. Under John Hyrcanus (Kuenen), or more probably under Alexandra Salome (Wellhausen), their leaders received a seat in the Sanhedrin, as a separate class, alongside of the chief priests and elders. They thus gained a kind of official position, and assumed a new character. From being men of sacred letters, they became mainly jurists. Amid all the changes that followed the downfall of the Hasmonæan dynasty down to the destruction of Jerusalem, although they were never in possession of political power, they were the real leaders of the people, such as we find them in the time of our Saviour.

In the NT they are usually called γραμματεῖς ('scribes,' 'men of letters'), occasionally also νομικοὶ ('lawyers') and νομοδιδασκαλοὶ ('doctors,' 'teachers

* Scribes are mentioned in Jer 8⁸, where the prophet accuses them of falsifying the Law (cf. Giesebrecht, *ad loc.*). The term *gōphēr* occurs frequently in the OT in other significations, e.g. Jg 5¹⁴, 2 K 25¹⁹, 2 Ch 26¹¹, Jer 37^{15, 20} 52²³ 'muster-master, an officer who had charge of the enumeration and enrolment of the troops; a kind of adjutant-general' (Moore on Jg 5¹⁴); Is 33¹⁸ the official that rated the tribute or war-tax that had to be paid to the oppressor; Ezr 4⁸ [N⁷⁵], Ps 45¹ (Heb. 2), Jer 36^{23, 33}, Ezk 9² 3 writer; 2 S 8¹⁷ 20²³, 1 K 4³, 2 K 12¹⁰ (Heb. 11) 14^{18, 27} 19² 22^{3, 8}, 1 Ch 18¹⁶ 24⁶ 27³², 2 Ch 34^{15, 18, 20}, Est 3^{12, 22} 8⁷², Jer 36^{10, 12, 20, 21} secretary of the king, secretary of State. In 1 Mac 5⁴² the 'scribes of the people' are also military officers, the 'captains of thousands, and captains of hundreds, and captains of fifties, and captains of tens' of 3²⁵. In Sir 10⁶ 'scribe' probably means prefect of the people. Cf. Deissmann [Eng. tr.], 110 ff.

† The tradition regarding the Great Synagogue, which is said to have fixed the Canon of Scripture, has no historical foundation; see Kuenen, *Gesammelte Abhandlungen*, 125 ff.; Montet, *Essai sur les origines des partis saducéens et pharisiens*, 91 ff.; and art. SYNAGOGUE (THE GREAT).

* We should probably emend to שָׁרַבְלָה, 'and he drummed on (the doors).' So Driver, Budde, Löhr, et al., following the LXX *τυμπαίνων* and Vulg. *impingebat*.

of the law'). These three terms are used almost synonymously (see art. LAWYER).^{*} They practically formed the same party as the Pharisees, though such expressions as 'the scribes of the Pharisees' (Mk 2¹⁶) and 'the Pharisees and their scribes' (Lk 5³⁰, cf. Ac 23⁵) show that some of the scribes were Sadducees (see art. PHARISEES, § ii. (1)). The main seat of their activity was Judæa; but we find them also in Galilee (e.g. Lk 5¹⁷); and they were probably to be found even in the Diaspora. They were indispensable wherever there was living zeal for the Law. Though any one qualified might be called on by the ruler of the synagogue to read and expound the Scriptures in the synagogues, the scribes, when present, were naturally most frequently invited to do so (cf. Mk 1²²).

The scribes were very ambitious of honour (Mt 23⁸⁻¹¹, Mk 12³⁸, Lk 11⁴³, 20⁴⁶), which they demanded more especially from their pupils. 'Let the honour of thy disciple be dear unto thee as the honour of thine associate; and the honour of thine associate as the fear of thy master; and the fear of thy master as the fear of Heaven' (*Aboth* iv. 17 in Taylor, *Sayings of the Jewish Fathers*³). The claims of one's teacher were to be preferred to those of one's father, unless the latter were also one of the learned. If one's father and one's teacher had lost anything, or were bearing burdens, or were in captivity, the teacher was to be assisted first (*Baba mezia* ii. 11 in Schürer, *GVV*³ ii. 317, and Taylor, *op. cit.* 71). The honour which they demanded was freely accorded to them. They enjoyed a great reputation not only among their pupils, but also among the people generally. They were usually addressed as *Rabbi* ('רַבִּי, literally 'my lord'; it also meant 'master' in the sense of 'teacher,' Jn 1³⁸),[†] occasionally also as *Rabban* or *Rabbon* (cf. *Rabboni*, addressed to Christ in Mk 10⁵¹, Jn 20¹⁶), *father* (= *abba*) and *master* (= teacher, Mt 23^{9, 10}).

ii. FUNCTIONS.—It was mainly, though not exclusively, with the Law that the scribes occupied themselves. In respect of it their functions were threefold: (1) they had theoretically to develop the Law itself; (2) they had to teach the Law to their pupils; and (3) they had to act as judges in the Sanhedrin and in the various local courts.[‡]

(1) *The theoretical development of the Law.*—Theoretically, the written Law, contained in the Pentateuch, was the absolute norm of life, the religious, civil, and penal code of Israel. The pious Jew was required to observe it in its minutest details. But it was impossible for an average man to do so without special guidance. For this guidance they looked to the scribes. One of their chief functions was to study the exact letter of the Law, to harmonize and develop its various precepts into the minutest details, so as to secure its complete fulfilment, and to show how its precepts were to be observed in daily life. This they did also with the great mass of unwritten legal traditions, which in course of time had grown up alongside of the written Law. Cases, however, were of frequent occurrence, in regard to which both the written Law and tradition were silent, while the

changes that were taking place in the national life rendered some of the old enactments highly inconvenient, if not obsolete. How, under these changed conditions, was it possible to live in accordance with the general principles of the Law? How were these new cases to be met? The solution of these difficulties was one of the leading occupations of the scribes. By means of an exegesis which was frequently very artificial, they not only based existing legal tradition more or less directly on the written Law, but also deduced from it rules that would meet the new case; or they met it by giving to some saying or recent custom of the 'wise' the value of fixed legal tradition. They were not satisfied, however, with expounding the Law and tradition so as to meet actually occurring cases. They busied themselves in providing for all conceivable cases that might occur, and especially in making a hedge or fence round the Law, i.e. in so expanding the compass of legal precept beyond what was laid down in the Pentateuch and in the oldest form of tradition, that it might be impossible for a man, if he observed all their traditional rules, to be even tempted to transgress the Law.^{*} From being 'exegetes of the Law' the scribes thus became legislators; they not only made the Law more precise, but also introduced into it many innovations, supplementing and, in some cases, abolishing it, by their inferences and traditions. Still they had no intention of innovating; they were great sticklers for antiquity; they only meant to say what was old (cf. Wellhausen, *JG*³ 284).

This ever-accumulating mass of legal traditions and of legal determinations was called *Halāchā*.[†] It was equally binding with the written Law, the two together constituting the absolute rule of life. It was given by God to Moses at Sinai; Moses delivered it to Joshua, and Joshua to the elders, and the elders to the prophets, and the prophets to the men of the Great Synagogue (*Aboth* i. 1, where Torah = the oral law; cf. Weber, *op. cit.* 88 ff.). It was the authentic interpretation and supplement of the Torah; Jehovah not only taught Moses the Torah, but also its authentic interpretation, or the *lex oralis* (*Pesikta* 38a, in Weber, 89). In theory the written Law was the highest norm; but in practice the scribes assigned greater importance to the oral law (cf. Mt 15², Mk 7⁸). They interpreted the Law by tradition, which was 'the fence to Torah' (*Aboth* iii. 20). 'The Bible was understood by the help of the Halacha, quite as much as the Halacha was based upon the Bible' (W. R. Smith, *op. cit.* 64). It was more necessary to learn and teach tradition than Scripture. The transgression of Rabbinic precepts was sin. Whoever transgressed the words of the wise was worthy of death. 'An offence against the sayings of the scribes is worse than one against those of Scripture' (*Sanh.* xi. 3, quoted in Edersheim, *The Life and Times of Jesus the Messiah*, i. 98; cf. also Weber, *op. cit.* 102 ff.). They nevertheless maintained that tradition was essentially nothing more than the interpretation and more specific determination of the Torah, from which, they alleged, all legal decisions were derived (cf.

^{*} "Scribe" (Lat. *scriba*) unfortunately lays stress on the etymological sense of the word (γραμματεὺς = ὁ γράψας); "lawyer" (*νομικός*) is scarcely better; Lc.'s *νομικοὶ διδάσκαλοι* is perhaps the most exact title' (Swete on Mk 12³⁸). Josephus occasionally calls them *γραμματεῖς* (*B.J.* i. xxiii. 2, ii. xlii. 8, 9). 'The word *νομικός*, which in earlier times had been applied to one who was skilled in any of the arts of life . . . had come to be applied, if not exclusively, yet at least chiefly, to one who was shrewd with practical wisdom, or who knew the thoughts and sayings of the ancients' (Hatch's *Hubert Lectures*, 20). Hatch also reminds us (p. 28) that 'by Grammar was meant the study of literature.'

[†] According to Schürer it was not till after the time of Christ that 'Rabbi' became a title; in the Gospels it is not a title, but a respectful form of address.

[‡] Cf. *Aboth* i. 1: The men of the Great Synagogue 'said three things: Be deliberate in judgment; and raise up many disciples; and make a fence to the Torah.'

^{*} Cf. W. R. Smith, *OTJC*¹ 61 [247]; Taylor, *op. cit.* 11: 'to make a fence to the Torah means to impose additional restrictions so as to keep at a safe distance from forbidden ground.' Strass, *The Age of the Maccabees*, 22: 'The term means the prohibition of things innocent in themselves, but bordering too closely for safety on things forbidden.' Weber, *op. cit.* 133, gives the following example: 'It was forbidden to drink the wine of the Gentiles, because they were never certain that they did not thereby come into contact with idolatry.'

[†] *Halāchā* means literally 'going,' 'way,' hence fig. 'custom,' 'usage,' 'rule,' esp. one fixed traditionally, *jus a majoribus traditum* (Weber¹, 93); Halacha was legal teaching, systematized legal precept . . . the system of rules applying the Pentateuchal law to every case of practice and every detail of life' (W. R. Smith, *op. cit.* 63).

Weber, 96 ff.). Whether an inference or a custom should become a binding *halāchā* was determined by the majority of those distinguished for learning. It was thus also that they decided the differences between the rival schools of Hillel and Shammai. Theoretically, the *halāchōth* were unchangeable; but for various reasons it was impossible to maintain this principle in practice. But a *halāchā* could be changed or abolished only with the consent of a majority of the Wise. 'One Sanhedrin cannot abrogate the decision of another Sanhedrin, unless it be superior in wisdom and in number' (*Eduyoth* i. 5, quoted in Montet, *op. cit.* 231).

As expositors and guardians of the Law the scribes occupied themselves mainly with precepts regarding sacrifices, the festival celebrations, the observance of the Sabbath, the payments to be made to the priests and the temple, and more especially with those relating to levitical purity in the matter of foods, purifications, etc. They laid the greatest stress on these ascetic elements because they thereby kept Israel separate from the Gentiles. 'Their ideal was not righteousness, but holiness' (Wellhausen, *op. cit.* 150). The marks of a religious Jew were fasting (cf. Lk 18¹²), almsgiving (Mt 6¹⁶), and prayer, as the fulfilment of statutory duties (cf. Mt 6²⁸; *Aboth* ii. 17: 'be careful in reading the *Shema*', i.e. Dt 6⁴⁻⁹). Really ethical duties were assigned a subordinate place (Mt 15⁴⁸, Mk 7³⁸, Mt 23²³). A distinction was drawn between greater and lesser commandments; but they were enjoined 'to be attentive to a light precept as to a grave' (*Aboth* ii. 1). Great stress was laid on the idea of reward (*Aboth* iv. 13 ff.: 'whosoever fulfils the Torah in poverty will at length fulfil it in wealth'; 'if thou labourst in the Torah, He hath much reward to give unto thee'; 'he who performs one precept has gotten to himself one advocate; and he who commits one transgression has gotten to himself one accuser.' Cf. v. 11 ff., where seven kinds of punishment are shown to come on account of seven main transgressions, such as dearth from failure to tithe).

Piety was thus reduced to an external and mechanical formalism. Nothing was of value, if not strictly regulated by an external law; no room was left for moral originality or spontaneity; uniformity and formal exactness were all important. Life under the Law was felt to be a heavy burden; the scribes themselves had to devise methods whereby to evade some of their own precepts (Lk 11⁴⁶, Mt 23¹⁶). Instead of proving a help to men in their moral and religious life, the Law had become a means whereby access to God was cut off (Lk 11⁵²).

(2) *The teaching of the Law.*—With a view to 'raising up many disciples' (*Aboth* i. 1), the more famous rabbins gathered round them studious young men, to whom they expounded the Law (cf. Josephus, *Ant.* xvii. vi. 2, *BJ* i. xxxiii. 2). Seeing that the oral law was the main theme of their instruction, their teaching consisted in a constant repetition of its numerous precepts, so that their pupils might have them imprinted on their memory. They also put concrete cases, real or imaginary, before their pupils, in order to train them in the application of legal principles. Their pupils were also allowed to put questions to them, and to attend the disputations which they held among themselves over difficult questions. The pupils had only two duties: (a) to retain everything faithfully in their memory, and (b) never to teach otherwise, even in expression, than they had been taught by their master (cf. *Aboth* v. 18, of

the four characters in scholars, 'quick to hear, and slow to forget, is wise'; iii. 12, 'when a scholar of the wise sits and studies, and has forgotten a word of his Mishna, they account it unto him as if he were guilty of death'; ii. 10, 'Eliezer ben Hyrcanus is a plastered cistern, which loseth not a drop'). Both teachers and pupils adhered rigidly to tradition. On any subject whatever, the fact that the rabbis had said so and so was decisive (cf. Mk 9¹¹).

Both for the disputations of the scribes among themselves and for the instruction of their pupils there were special academies (*beth hammidrash*), distinct from the synagogues. In Jerusalem their lectures were delivered also in the temple (cf. Lk 2⁴⁶, Mt 21²³ 26⁵⁵, Mk. 14⁴⁹, Lk 20⁴¹ 21⁵⁷, Jn 18²⁰), i.e. in the outer court. The scholars sat on the ground, the teachers on a raised bench (cf. Lk 2⁴⁶, Ac 22⁵, Mt 26⁵⁵, *Aboth* i. 4, v. 21).

(3) *As judges.*—Although in NT times a professional knowledge of the Law was not requisite on the part of a judge, the scribes would naturally be called upon to fill that office. In the Sanhedrin at Jerusalem the 'chief priests' had the first place; but scribes also had a seat in it (cf. Mk 14⁵³⁻⁵⁴ 15¹, Lk 22⁶⁶ 23¹⁰, Ac 4⁵), and exercised the greatest influence (*Ant.* xviii. i. 4). See art. SANHEDRIN.

Their whole professional activity both as teachers and judges was understood to be gratis. 'R. Zadok said, Make them [i.e. words of Torah] not a crown, to glory in them; nor an axe, to live by them. And thus was Hillel wont to say, And he who serves himself with the tiara [the crown of the Law] perishes. Lo, whosoever makes profit from words of Torah removes his life from this world' (*Aboth* iv. 9; cf. Taylor, *op. cit.* 68). They had therefore to earn the means of living in other ways. Those of them who were not possessed of private means carried on a trade in addition to the study of the Law (cf. Ac 18³). But they had to make the study of the Law supreme (Sir 38²⁴⁻³⁹¹¹; *Aboth* ii. 6, Hillel said, 'He that has much traffic will not become wise'; iv. 14, 'R. Meir said, Have little business, and be busy in Torah').

It is probable, however, that they received payment for their *teaching* (cf. our Lord's saying, Mt 10¹⁰, Lk 10⁷, and St. Paul's assertion of his right, seldom exercised, of being supported by those to whom he preached the gospel, 1 Co 9³⁻¹², 2 Co 11⁸⁻¹⁹, Ph 4¹⁰⁻¹⁸), and that they knew how to enrich themselves at the expense of the people (cf. Mk 12⁴⁰, Lk 20⁴⁷ 16¹⁴).

Though it was mainly with the Law that the scribes occupied themselves, they also turned their attention to the historical and didactic contents of their sacred writings. These they treated with far greater freedom than the legal contents, amplifying and embellishing them in the most arbitrary manner. The teaching that was thus derived from Scripture was called *Haggadā*. 'Haggada was doctrinal and practical admonition, mingled with parable and legend.' 'It was recognized as a rule of faith and life, and embraced doctrinal topics, practical exhortation, embellishments and fabulous developments of Bible narratives' (W. R. Smith, *op. cit.* 58, 168; cf. Driver, *LOT*⁷ 487).

Of historical *haggadā* we have an example in the Books of Chronicles, an idealization and amplification of the history in Samuel and Kings (see art. CHRONICLES, vol. i. 395 ff.). Later haggadists treated mainly of the history of creation and of the lives of the great men of the past.* They

* For the legal traditions regarding the observance of the Sabbath, etc., see Schürer, *op. cit.* ii. 464 ff.; Eilersheim, *op. cit.* ii. 774 ff., and cf. art. SABBATH.

* For Creation cf. *Aboth* v. 1, 9; for Abraham, cf. Josephus, *Ant.* i. vii. 2, *Aboth* v. 4 with Taylor's note, *op. cit.* 80; as to Moses cf. *Ant.* ii. iv. and what is said in the NT of his culture (Ac 7²²); of JAKNES and JAMRES (2 Ti 3⁹); of the rock (see Rock) that followed the Israelites through the wilderness (1 Co 10⁴); of the Law being given him, not directly by God, but through the mediation of angels (Ac 7⁵³, Gal 3¹⁹, He 2⁹); of Michael

also elaborated the ethical and religious contents of Scripture in an altogether unhistorical and fantastic manner, devoting attention especially to angelology, theosophy, and eschatology. Unlike legal tradition (*halāchā*), historical and doctrinal tradition (*haggādā*) was not binding, save on a few points such as the creation and government of the world by God, the Divine origin of the Law, and the resurrection of the dead.

On the scribes and Jesus, see art PHARISEES, § iii.

D. EATON.

SCRIP.—Scrip occurs once as the tr. of שֵׁכֶר *yalkūt* (from שָׁבַל to glean), a shepherd's bag, in its single occurrence, 1 S 17⁴⁰; and six times as the tr. of שֵׁכֶר, a traveller's leathern bag for holding provisions (cf. LXX, 2 K 4⁴², Jth 10¹³, 13¹⁰, 15), Mt 10¹⁰, Mk 6⁸, Lk 9³ 10⁴ 22³⁵, all the examples of that word. RV retains 'scrip' in OT, but changes into 'wallet' in NT. The Eng. word has nothing to do with 'scrip' (formerly spelt 'script', from *scriptum*), a schedule: it is of Scand. origin (Icel. *skreppa*), and is allied to, if not derived from, 'scrap' (Icel. *skrap*), as made from a scrap of skin, or as used for holding scraps of food. See BAG.

J. HASTINGS.

SCRIPTURE.—The words so translated in EV are—

1. סֵפֶר, only Dn 10²¹ 'I will show thee that which is noted in the scripture of truth' (RV 'writing'), where the reference is to 'the book in which God has inscribed beforehand, as truly as they will be fulfilled, the destinies of mankind'—Driver. Elsewhere this word is tr^d 'writing,' except Ezr 2⁶², Neh 7⁶⁴ (EV 'register').

This idea of a *Book of God*, in which are recorded men's names or deeds, runs through OT, the Apocalyptic lit., and NT. It appears that burgess-rolls of cities were kept, in which were enrolled the names of the citizens, with their families (Jer 22³⁰ 'Write ye this man childless') and their vocations (the priests' roll or 'register' in Ezr 2⁶², Neh 7⁶⁴). Such rolls suggested the figure of a roll or book kept by God, containing the names of the covenant people of Israel. In Is 43 ('he that remaineth in Jerusalem shall be called holy, even every one that is written among the living [RVm 'unto life'] in Jerusalem') and Ezk 13⁹ ('neither shall they be written in the writing [RVm 'register'] of the house of Israel') we see the transition from the civil to the religious use, or at least from the actual to the ideal. From the roll or book the name of the citizen was removed at death; so in Ex 32³² Moses says, 'Blot me, I pray thee, out of thy book which thou hast written,' and v. 33 Jehovah answers, 'Whosoever has sinned against me, him will I blot out of my book.' See Charles, *Book of Enoch*, p. 131 ff.

2. γράμμα: this word is used in NT in the foll. senses.—(1) A letter of the alphabet, a written character, Gal 6¹¹ (where AV follows Tind. in rendering 'how large a letter,' but RV, according to the usage of γράμματα γράφειν, 'how large letters,' Wyc. and Rhem. already had 'what manner of letters'). In AV, after TR, this sense is found also in Lk 23⁸, but omitted from RV, after the best MSS. (2) Any written document, Lk 16² AV 'bill,' RV 'bond' (TR τὸ γράμμα, edd. τὰ

contending with the devil for his body (Jude 9); Sa'ma or Salmon, the father of Boaz (1 Ch 2¹¹, Ru 4^{20c}), was the husband of Rahab (Mt 19¹); the drought and famine of 1 K 17¹ 18^{1ff} were known to have lasted three and a half years (Lk 4²⁵, Ja 5¹⁷; see also Gal 4², cf. under ISHMAEL).

γράμματα). (3) An epistle, Ac 28²¹ (γράμματα, EV 'letters'). (4) The law of Moses, Jn 5⁴⁷ (τὰ ἐκείνου γράμματα, EV 'his writings'); in St. Paul as written and judicial in opposition to the liberty of the law of life in Christ, Ro 2⁷ 3² 7⁶, 2 Co 3⁶ 6⁷. (5) The sacred Scriptures of the OT, 2 Ti 3¹⁵ (TR τὰ ἑρὰ γράμματα, edd. omit τὰ, AV 'the holy Scriptures,' RV 'the sacred writings'). (6) Learning, Jn 7¹⁵, Ac 26²⁴.

3. γραφή. Once this word refers to NT writings, viz. the Epp. of St. Paul, 2 P 3¹⁶; elsewhere the reference is to a passage of the OT,* or to the OT Scriptures in general. In Gal 3⁸ 'the Scripture' is personified.

The question whether γραφή in the sing. is ever used of the OT as a whole is much disputed. In a note to Gal 3²² Lightfoot lays down the rule that 'the sing. γραφή in the NT always means a particular passage of Scripture.' But in a subsequent note to Ro 4³ he somewhat modifies this statement: 'Dr. Vaughan,' he says, 'takes a different view, and instances examples from St. John. The usage of St. John may admit of a doubt, though, personally, I think not; St. Paul's practice, however, is absolute and uniform.' Hort (on 1 P 2⁶) says that in St. John and St. Paul γραφή 'is capable of being understood as approximating to the collective sense.' See Westcott, *Hebrews*, p. 474 ff.; Deissmann, *Bibelstudien*, 108 ff., Eng. tr. 112 ff.; and esp. Warfield in *Pres. and Ref. Review*, x. (July 1890) p. 472 ff.

J. HASTINGS.

SCYTHIANS (Σκύθαι, Jg 1⁷, Jth 3¹⁰, 2 Mac 4⁷ 12²⁰, 3 Mac 7⁵; Gn 14¹ Σκ. in Symm. = Σϋϋ).—A nomadic tribe of Indo-European origin who lived between the Danube and the Don, and spread over the region between the Caucasus and the Caspian. In the time of the elder Pliny the name Scythia was applied vaguely to the remote regions of Central Asia and S.E. Europe. The cruelty of the Scythians was proverbial (Herod. iv. 64), and their injustice (2 Mac 4⁷, cf. 3 Mac 7⁵). Herodotus mentions (i. 103-105) that a horde of Scythians invaded Media, became masters of Asia, and intended to attack Egypt. Psammetichus, the king of Egypt, met them in Palestine, where he was besieging Azotus, and prevailed on them by bribes to retreat. It is not improbable that the description of the foe from the north in Jer 4³-6³⁰ was suggested by the ravages of these Scythian hordes, and that the imagery of Ezk 38^{4ff} had a similar origin. Zephaniah's description of the 'Day of the Lord' may also reflect the impression produced upon the prophet's mind by the news of the advance of these formidable hosts (see Driver, *LOT* 6 252, 291 ff., 342, and cf. art. JEREMIAH in vol. ii. p. 570^b). Thuc. (ii. 96) connects the Scythians with the Getae, their neighbours, with whom they afterwards coalesced. Horace (*Od.* iii. xxiv. 9 ff.) praises their simplicity and describes their nomadic habits. In Col 3¹¹ (cf. Gal 3²⁸), where it is said that Christianity does away with all ethnical distinctions, Scythians are mentioned in connexion with, and probably as a synonym for, barbarians. C. H. PRICHARD.

SCYTHOPOLIS.—See BETHSHEAN. Its inhabitants are called *Scythopolitans* (Σκυθοπολι(ε)ῖται) in 2 Mac 12³⁰.

SEA (Heb. יָם; Gr. ἡ θάλασσα; only twice τὸ πῆλαγος, Mt 18⁶, Ac 27⁵).—Besides the literal use, either generally or specially, with often a descriptive epithet, of the Mediterranean (Ex 23³¹, Nu 34³, Dt 11²⁴), the Dead Sea (Nu 34³, Jos 3¹⁶, Zec 14⁸), the Red Sea (Ex 10¹⁹, Ac 27³⁴, 1 Co 10¹, He 11²⁹), the Sea of Galilee (Nu 34¹¹, Jos 12³, Mt 4¹⁸ 15²⁸, Mk 1¹⁶ 7³¹, Jn 21¹ 6¹), and even the Nile (Is 18² 19⁵, Ezk 32², Nah 3⁹) and Euphrates (Is 21¹, Jer 51³⁰), and the figurative use in OT for *west*, because the Mediterranean was the western limit of Palestine (Gn 28¹⁴, Ex 10¹⁹ 27¹², Jos 8⁹ 11²), there are poetical,

* Hort, however, holds that in 1 P 2⁶ ἡ γραφή cannot mean 'in Scripture,' nor even 'in a passage of Scripture,' but must mean simply 'in writing,' as Sir 39²² 42⁷ 44³ etc.

mythological, and apocalyptic references to the sea, which in several passages give to the word a theological significance. In this use the word 'sea' is closely allied with the word 'deep' (עֲמֻקָּה LXX and NT ἡ ἀβύσσος), which means (1) the primeval sea, from which all arose (Gn 1², Ps 24²); (2) the ocean stream and subterranean waters (Gn 7¹¹ 8³ 49²⁵, Dt 33¹³ 8⁷); (3) any mass of waters (Ex 15¹, Ps 42⁷ 107²⁶); (4) the depths, the deep places of the underworld (Ps 71³⁰; see Cheyne on Ps 88⁶ and 148⁷), as the abode of the dead generally (Ro 10⁷), and specially of demons (Lk 8³¹, Rev 9¹. 11 11⁷ 17⁸ 20¹). While generally used only in the third sense, the word 'sea' seems in some passages to borrow the fourth sense also (Rev 13¹, Dn 7³). Either by poetical personification or as a mythological survival, the sea is spoken of as a monster over which God sets a watch, and with which He wages war (Job 7¹², see Davidson, *Job*, p. 54; Is 27¹, see Cheyne, *Isaiah*, i. p. 158; Is 51¹⁰). The image of the sea is used regarding man and his ways: the wicked are as the sea casting up mire and dirt (Is 57²⁰), man's grief is as the unquiet sea

SEA, BRAZEN (נֶחֱשֶׁת; 2 K 25¹³, 1 Ch 18⁸, Jer 52¹⁷; called in 1 K 7²²=2 Ch 4² **Molten Sea** [מִקְוָה]; also called in 1 K 7²⁴ *et al.* absolutely 'The Sea' [יָם]).—The large basin* of copper or bronze (see BRASS) which stood S.E.S. of the house, and, as in the case of the corresponding laver (יָדִי) of the tabernacle, was situated between the altar and the porch.† The metal of which it was made is said to have been taken by David from the cities Tibhath and Cun.‡ The basin was itself 5 cubits high, with a diameter of 10 cubits and a circumference of 30.§ It was a handbreadth in thickness. Its rim was bent outward as in that of many cups, being of the shape of a lily. That is all we are told of its shape, but from these *data* Josephus concluded that it was a hemisphere: others have thought of it as cylinder-shaped. Winer,|| Riehm,¶ and Thenius** hold it to have been a kind of cylinder, in which the lower part bulged out. Thenius, Keil, and others object to Josephus' view that, if the basin were a hemisphere, it could not hold 2000, much less 3000 baths of water. The same might be said of the cylinder form which

THE BRAZEN SEA (AFTER STADE).

(Jer 49²³), the doubtful man is as a wave tossed by the wind (Ja 1⁶), wicked men are raging waves of the sea foaming out their own shame (Jude 13), invading hosts are compared to overflowing streams (Is 8⁷, Jer 47²) and the noisy sea (Is 17¹²). In Rev 13¹ the beast rises out of the sea (as in Dn 7³ the four beasts rise), because (1) the sea as a wild, terrible power (Ps 107²³⁻³⁰; see G. A. Smith, *HGHL* bk. ii. ch. vii.) represents heathenism (Reuss on Dn 7³); or (2) the Roman power actually came from the sea, or the west (Holtzmann, *Handcom.* on Rev 13¹); or (3) the sea is but a synonym for the abyss (cf. Rev 11⁷ 17⁸); or (4) the sea represents humanity, as in the passages noted above (so in Rev 17¹⁵ the many waters of v.¹ are explained as 'peoples, and multitudes, and nations, and tongues'; see Carpenter on Rev 13¹ and 17¹⁵ in Ellicott's *NT Commentary*, xii. pp. 167, 207). The words in Rev 21¹ 'the sea is no more' (RV) will mean accordingly that powers hostile to God, whether men or demons, shall be brought to nought.

See also art. SEA OF GLASS, and for 'brazen sea' and 'molten sea' next article.

A. E. GARVIE.

some give it. Benzinger†† points out that 2000 baths are equivalent to 72,800 litres, and that a hemisphere of the dimensions of the brazen sea could contain but 32,707 litres, while a cylinder of these dimensions would contain, at the utmost, 49,062 litres. It is possible that the diameter and circumference are taken at the narrowest part, say immediately beneath the rim; but it is more probable that the measurements apply to the rim, and that lower down the vessel bulged out very much.

According to 2 Ch 4⁵ and Josephus, *Ant.* viii. iii. 5, the sea held not 2000, but 3000 baths. Keil and Thenius trace the error to a transcriber, and accordingly alter 3000 to 2000. There is, however, no external support for the change, and it is exceedingly likely that we owe the larger number to the fondness of the Chronicler for exaggeration—a fondness equalled at least by the Jewish historian.

Below the rim, somewhere near the middle of

†† Com. on 1 K 7²².

the vessel, probably two rows of colocyntns* were figured, these being cast with the basin, and not subsequently carved. Stade† has shown on grammatical and other grounds that the numeral 'ten' must go with 'cubits' and not with 'colocyntns,' and that, in short, the words constitute a clumsy gloss, and had far better be left out.

The Brazen Sea rested upon 12 brazen oxen, with their heads turned towards the four cardinal points, 3 looking in each direction. All of them probably stood upon one basement of metal.

It is likely that the space between the several groups was greater than that between the several members of the group; but we have no information on this, or concerning the height of the oxen or their other dimensions.

Josephus‡ says that in making them Solomon broke the law of Moses which forbade the making of any graven image,§ as he did also in making the lions that were about his throne. He might surely have added the cherubim, which come under the same category. Riehm says the figures of oxen were chosen to form a rest for the basin, because oxen formed so large a part of the offerings. This may also supply a reason for the horns at the four corners, as Franz Delitzsch suggests.¶ Stade, Benzinger, Nowack, and others hold that the oxen have a connexion with the worship of Jehovah in the form of a bull, which prevailed in the North; the horns of the altar are traced to the same source. Kosters¶¶ tries to prove that the 'Sea' stands for the *בְּיָרֵךְ*—the deep, 'one source of water supply, and that the layers** represent the clouds, the source of the rain supply. Benzinger gives his approval to this theory,†† and so did Smend‡‡ before him. On these matters the Bible is silent.

We are not told how the basin was supplied with water, nor how the water was got out.

As to the first, Keil thinks it was filled by means of a crane which raised the water from the fountain close to the altar and transferred it by means of some vessel to the 'Sea,' whenever it was wanted. With regard to the second, there must have been some apertures low enough to be reached; possibly the water came out of the mouths of the oxen through pipes supplied with taps. For the opinions of leading rabbinical writers, see Lundius, *Jüd. Heilig.*, Hamburg, 1738, p. 356.

Not a word is said in the older and soberer account of Kings of the purpose served by the Brazen Sea. But in 2 Ch 4⁹ it is said to be for the priests to wash in: that is, if we take the account of the *כִּיֹּר* or laver§§ of the tabernacle to guide us, the priests washed their hands and feet with its water before they proceeded to offer sacrifices.

The next point at which we meet the Brazen Sea is in 2 K 16¹⁷, where it is narrated that Ahaz, for the sake of their value, took away the brazen oxen, and laid the 'Sea' on the stone pavement. The Chaldeans at a later time, led by Nebuchadnezzar, broke the 'Sea' into pieces and carried away these pieces to Babylon.¶¶¶

After this we read no more about it. Yet Sir 50⁸¶¶¶ seems to show that in the mind of the writer

* The addition 'ten colocyntns to every cubit' has no support in the MT, nor in the LXX, though Thenius and Keil defend this rendering.

T. W. DAVIES.

SEA OF CHINNERETH, SEA OF GALILEE.—See GALILEE, SEA OF.

SEA OF GLASS (AV), GLASSY SEA (RV), *θάλασσα ὑάλινη*, occurring Rev 4⁸ 15² b¹⁶, has no exact parallel in previous or contemporary literature. But, as the scene in Rev 4 attaches itself to Ezk 1, it is natural to find in the 'glassy sea' before the throne a reproduction of the picture in Ezk 1²² 'the likeness of a firmament (Heb. *רָפָף* = 'expanse'; LXX *στερέωμα* = 'solid structure', whence Vulg. *firmamentum*) like the colour of the terrible crystal' (LXX *ὡς ὅρασις κρυστάλλου*, 'having the look of crystal'), extending over the head of the living creatures and under 'the likeness of a throne, as the appearance of a sapphire stone' (Ezk 1²⁶). We are reminded also of Ex 24¹⁰, where it is said that, when Moses and Aaron and the elders of Israel ascended the mount and 'saw the God of Israel,' 'there was under his feet as it were a paved work of sapphire stone, and as it were the very heaven (LXX *εἶδος στερεώματος τοῦ οὐρανοῦ*, 'the appearance of the heaven's firmament') for clearness.' And just as there was 'fire on the top of the mount' (Ex 24¹⁷), so also in Ezk 1⁷ we are told that 'there was an appearance of fire . . . round about,' and again in Rev 15² the glassy sea is 'mingled with fire.' Another imperfect parallel is found in Enoch 14². The walls of the heavenly house from which Enoch saw in vision a second house and a throne in it and the great glory thereon, were 'like a mosaic crystal floor, and its groundwork was of crystal . . . and its floor was fire.' Perhaps the most nearly exact parallel occurs in the *Book of the Secrets of Enoch* (the Slavonic fragment of the Enoch literature, probably composed in its present form in the first half of the 1st cent. A.D.).² In 3^d Enoch tells how the angels had taken him up into the first heaven, next above the ether: 'and they showed me (he adds) a very great sea, greater than the earthly (i.e. the Mediterranean), and they brought before my face the elders.' Afterwards, in a higher heaven (the seventh in Enoch) he saw the throne and the glory. In *Test. xii. Patr.*, Levi 2, this sea is said to lie between the first and second heavens, and is called the 'water hanging' between the two. It is to be noted, further, that just as we have, in connexion with the crystal appearance, 'living creatures' in Ezekiel, and 'holy ones' in Enoch, and, in connexion with the great sea, 'elders' in the *Secrets of Enoch*, so also in Rev. we have, in connexion with the glassy sea, 'living creatures' (ch. 4) and victorious saints (ch. 15).

It is not necessary to harmonize all these apocalyptic images. But it is clear that the writer of Revelation is in contact at various points with previous apocalyptic literature when he conceives of a wide expanse of water in heaven, stretching away in front of the throne, smooth, clear, bright with a golden sheen† (21¹³), like a fire, upon it, that flashes from the seven burning lamps; while hard by (or upon) this sea stand types of created life (ch. 4), and a triumphant host of those whose life has been created anew (ch. 15), glorifying the

* See Charles and Morfill's edition.

† See article GLASS.

Lord God Almighty. It is possible that the idea of the glassy sea may have come from the temple pavement of ornamental polished stones (2 Ch 7³; Jos. BJ vi. i. 8 and iii. 2) on which the people bowed themselves in thanksgiving to the Lord, and the gleam of which the Rabbis compared to the gleam of crystal.* The suggested relation to the 'molten sea' (θάλασσα χαλκή), the large copper reservoir of Solomon's temple used for the ablutions of the priests (2 S 8⁸ [LXX], 1 K 7²³), seems to be more remote, if not quite imaginary.

SEA OF THE ARABAH (AV 'the Plain').—See DEAD SEA.

SEA OF TIBERIAS.—See GALILEE, SEA OF.

SEAH.—See WEIGHTS AND MEASURES.

SEAL, SEALING (subst. σφῆν; σφραγίς, ἀποσφράγισμα [LXX twice]; specifically *signet-ring*, σφῆν, σφῆν, in Aramaic סָפְרָא, סָפְרָא. Verb, σφρ; σφραγίζω [all voices], κατασφραγίζομαι [act. and pass.], ἐπισφραγίζω [act. and mid.]).—These words are used (1) in a literal, (2) in a figurative sense.

i. LITERAL SENSE.—(a) *Use of Seals.*—There is evidence of the general use of seals in the early ages 'extending from the mists of Babylonian antiquity to the decline of Roman civilization' (*Encyc. Brit.* art. 'Gems'). We know from the OT that seals were used at an early date by the Hebrews (Gn 38^{18, 25} Judah's signet), by the Egyptians (Gn 41⁴² Pharaoh), and by the Persians (Est 3¹⁰ 8² Ahasuerus). Herodotus tells us (i. 195) that the accoutrement of a Babylonian was incomplete without a staff and a ring, but this ring was probably a talisman more frequently than a signet. And the literary evidence is supported by that of gems and inscriptions dating as far back as B.C. 2000 and 3000, and showing that the practice extended to other nations (see Riehm, *HWB*, quoting Levy's *Tables*, and de Vogüé's *Mélanges d'Archéologie orientale*). Arabs and Persians of to-day wear similar seals. In the NT we have the σφραγίς upon the stone closing the mouth of the Lord's tomb (Mt 27⁶⁶), and the δακτύλιος (probably a signet-ring containing the father's name) put upon the finger of the prodigal (Lk 15²²); probably also the gold ring of the rich worshipper in Ja 2² was not only an ornament but a signet-ring, indicating in itself that he was a person of consequence.

(b) *Structure of seals.*—If we may judge from the seals and signet-rings that have come down to us, seals were of two kinds: (1) the small seal of precious stone or precious metal in a signet-ring; (2) the more ample cone-shaped or round seals, some of metal (occasionally set in stone), some of porcelain or terra-cotta[†] (some even of wood are in vogue to-day in the East), large enough to contain inscriptions and animal figures, such as figures of oxen or antelopes, and intended to be hung by a cord from the neck or from the arm (Gn 38^{18, 25}, Ca 8⁶) or attached to the thing sealed (a door or a document, for example) when the impression was not made in the material of the thing itself.‡

(c) *The material used as the medium.*—Beckmann

* See Bousset, *Offenbarung*, in loco.

† It is very doubtful, however, whether the 'great mass of existing (Babylonian) cylinders' could have been used as seals.

‡ Mr. Bernard Grenfell tells the present writer that sealings are not at all uncommon on Egyptian papyri, sometimes large, more frequently small. He believes that the practice of sealing documents went back in Egypt to the earliest times, though the date of the earliest papyrus seal is as yet uncertain. Jar-stoppers, however, were stamped in the time of the First Dynasty (earlier than B.C. 4000, according to Brugsch), and papyri of the Fourth and Fifth Dynasties, extant in fragments, probably, in their original state, contained sealings.

(*Hist. of Inventions*, i. 140, Bohn's tr., quoted in Smith's *Christian Antiquities*, art. 'Seals') gives it as his opinion that 'in Europe wax has been everywhere used for sealing since the earliest ages.' But in the East it was not wax but clay (Job 38³⁴), sealed when soft and then made hard by burning. When a door or a stone was to be sealed, a clay seal was put at each end of the cord stretched across it (cf. *Evangel. Pet.* 8, ἐπέχρισαν ἐπὶ τὰ σφραγίδια, with Jn 9^{6, 11}). Some stones so sealed still retain the cord marks. But, like the Arabs and the Persians, the Hebrews also seem to have dipped seals or stamps in a black pigment, a paint or an ink. The picture which Ezekiel draws (9⁴) of the man 'with the writer's inkhorn by his side,' marking the foreheads of the men that sighed and cried for the abominations in Jerusalem, is doubtless the source of the sealing picture in Rev 7.

(d) *Purposes of sealing.*—Sealing was sometimes a substitute for signature (and conveniently so in days when writing was not a general accomplishment), if a letter had to be authenticated or a document to be ratified. So Jezebel forged Ahab's signature (1 K 21⁸); and in Neh 9³⁸ 10¹ the sealing signified adherence to the contents of the covenant there and then made with God. At other times it denoted an *inalienable possession*, the signet itself being also the type of all that was most precious and inviolable (Ca 8⁹, Jer 22²⁴). This comes out in the figurative application 2 Ti 2¹⁹ 'Having this seal, the Lord knoweth them that are his.' (In the same sense, perhaps, are the στίγματα, the 'brands' of the Lord Jesus, Gal 6¹⁷). Akin to this idea was that of *security and permanency*, as when the stone of the lions' den was sealed by the king with his own signet and those of his lords, 'that nothing might be changed concerning Daniel' (Dn 6¹⁷, cf. also Bel 14, Mt 27⁶⁶). These ideas of *ownership and security* are often combined with that of *destination*, as in Ezk 9⁴ and Rev 7³, where the persons sealed were, as God's people, secured from imminent destruction and designated for future reward. Finally, connected with the ideas of security and destination was the idea of *secrecy or postponement of disclosure*, as when the words of a roll, more particularly if prophetic, were sealed up for the uninitiated, or till the time came to publish them (Is 29¹¹, Dn 12⁹, Rev 10⁴). Quite in harmony with all these ideas was the idea of *authority* in the seal or signet, so that when a king bestowed his signet he thereby invested the recipient with royal authority, lending him, in fact, the royal name (Gn 41⁴², Pharaoh and Joseph).

ii. FIGURATIVE SENSE.—In illustrating the scope of the literal, it has been unavoidable to trench upon the figurative, literal sealing being emblematic of one idea or another. But we have still to deal with the religious, the spiritual sense of *seal* and *sealing*, where there is nothing literal at all, even in vision. This comes out principally in the NT.

The idea of *authentication* is prominent when converts are called the seal of apostleship (1 Co 9²), and when circumcision is named a seal, i.e. an authentication, of that righteousness by faith which existed before the rite was performed (Ro 4¹¹). The solemn *authentication* of human experience lies in the expression that he who has received the witness of the Son 'hath set seal to this that God is true' in what He promised through the Son (Jn 3³³); while the saying 'Him hath God the Father sealed' signifies *authentication and destination* to convey eternal life (Jn 6²⁷). The figurative sense of *seal* in the passage (2 Ti 2¹⁹), 'The firm foundation of God (God's foundation of firm believers) standeth, having this seal, The Lord knoweth them that are his,' includes *ownership, authentication, security, and destination*. All these ideas, but especially *destination*, are present when

it is said that believers are sealed with the Holy Spirit of promise (Eph 1¹³); sealed unto the day of redemption (4³⁰); sealed and having, in the Spirit within us, the earnest of what we shall be (2 Co 1²¹).

Working back from the early assimilation of baptism to circumcision as a seal (Hermas, *Sim.* viii. 6; 2 Clem. vii.), some have interpreted the sealings just mentioned as directly referring to the baptismal rite. But Lightfoot seems to be justified in questioning (2 Clem. vii.) whether 'St. Paul or St. John (e.g. Rev 9⁴) used the image with any direct reference to baptism.' Hatch (*Hibbert Lectures*, p. 295) and Harnack (*Dogmengesch.* I. i. 151) trace the baptism sense of *σφραγίς* to the Greek mysteries; but Anrich (*Mysterienwesen*, p. 120 ff.) gives in his adherence to the belief that the origin of the use is the Jewish view of circumcision as a seal (see Anrich for illustr., and Sanday-Headlam on Ro 4¹¹).

One peculiar figurative use remains to be noticed. St. Paul, in speaking (Ro 15²⁸) of handing over the collection to the saints at Jerusalem, describes his act as 'sealing to them this fruit' (of his efforts, or of the spiritual blessings that had gone forth from the Jews). The simplest explanation seems to be that of Theodore of Mopsuestia: that the apostle is referring to the solemn and exact formalities of the transaction—a view which Deissmann supports from the papyri of Fayyûm, where such sealing of wheat-sacks and the like stands for a guarantee that they contain the amount they profess to contain. St. Paul desires to act like a conscientious merchant, and to guarantee formally that he hands over the amount due from him. The suspicions which some of his enemies had set afloat, that he helped himself from the collection, must be definitely and completely foreclosed. J. MASSIE.

SEAL, SEAL SKINS.—See BADGER.

SEAMEW (RV Lv 11¹⁶, Dt 14¹⁵).—See CUCKOW.

SEA-MONSTER.—This Eng. term occurs only twice in RV (text): Gn 1²¹ 'God created the great sea-monsters' (AV 'great whales,' LXX τὰ κήτη), and Job 7¹² 'Am I a sea or a sea-monster (AV 'whale,' LXX δράκων), that thou settest a watch over me?' The Heb. in both these passages is תנין (plur. תנינים and תנינות), which has been supposed to come from an (unused) root תנן='stretch,' 'extend,' and so to signify properly an *elongated* animal (see Ges. *Thes.* 1511). The word תנין, in addition to these two occurrences, is used of serpents or serpent-like creatures in Ex 7^{9a}. [P; JE and R use שׂוּן, LXX ὄφις, in the similar passages 4³ and 7¹⁵], Dt 32³³, Ps 91¹³; perhaps the crocodile is in view in Is 27¹ 51⁹, Ezk 29³ 32² (see small type below), Ps 74¹³; large water animals* of some kind are designated by it in Jer 51 [Gr. 28]²⁴, Ps 148⁷. In all these passages the LXX tr. תנין by δράκων, RV has 'dragon,' except in Ex 7^{9a} 'serpent' (RVm, 'Heb. *tannin*, any large reptile'); and Ps 91¹³ 'serpent'; in Ps 74¹³ RVm has 'sea-monsters,' in 148⁷ 'or sea-monsters or waterspouts.'

In Neh 2¹³ we hear also of the 'en hattannin' ('well of the dragon,' LXX πηγή τῶν οὐκῶν, 'fountain of the figs,' evidently confusing תנין with תאנה 'figs').

Quite a different term, although it has sometimes been confused† with it both by copyists [תנין, LXX δράκωντες, of La 4³ is a textual error for תנין, while, conversely, תנין of Ezk 29³ 32² (LXX in all δράκων) should be תנין] and by interpreters, is תנין

(once Mal 1³, if the text is correct, תנין, LXX δέμας=Heb. מִמָּוֶה; cf. Jer 9¹⁰ 10), Ps 66¹²), the plur. of (unused) תנין, which means some beast that haunts solitary places, probably the jackal. Its occurrences are Is 13²² 34¹³ 35⁷ 43²⁰, Jer 9¹⁰ (11) 10²² 14⁵ 49³³ 51³⁷, Mic 1⁸, Ps 44²⁰ (19) (if the text is correct, but see Cheyne or Wellh.), Job 30²² [in all these passages AV has 'dragons,'* RV 'jackals'†], La 4³ (AV [wrongly] 'sea-monsters,'† m. 'sea-calves,' RV 'jackals').

Another monster, belonging to the same category as *tannin*, is LEVIATHAN (לִיְיָתָן *liwyāthān*, prob.= 'wreathed,' 'coiled'), which appears as a denizen of the waters in Ps 104²⁶ '*liwyāthān* whom thou hast formed (שָׂרָף) to play therein' (or 'with him,' שָׂרָף, LXX ἐμπαίζειν αὐτῷ), and Job 41^{1a}. [Heb. 40^{26a}]. In the first of these passages the whale is often supposed to be referred to, in the second the crocodile, which last may be the reference also in Ps 74¹⁴, where *liwyāthān* is apparently symbolical of Egypt. In Job 3⁸ [where it is not necessary to read, with Gunkel, c, 'sea' for c, 'day'] magicians are supposed to be able to 'rouse up' (עָרָר) B χειρώσασθαι this monster. On Is 27¹ see below. [LXX in all these passages tr. תנין by δράκων, except in Job 3⁸, where it has τὸ μέγα κῆρος; Aq., Symm., and Theod., where they are extant, always transliterate λειυάθαν, except in this same passage in Job, where Theod. has δράκων]. Leviathan is referred to also in Enoch 60⁷⁻⁹, 2 Es 6³⁴⁻³⁵; cf. Apoc. Bar 29⁴.

It has been contended that, in most of the OT passages where *tannin* and *liwyāthān* occur, a mythological or semi-mythological allusion is present. Such an allusion is discovered, for instance, in Is 27¹ 'In that day the LORD with his sore and great and strong sword shall punish *liwyāthān* the fleeing serpent (נָחָשׁ שָׂרָף, LXX ὄφις φεύγων, Aq. ὄφις μοχλός, Symm. ὄφις συγχελίων) and *liwyāthān* the coiled serpent (תִּנְיָן שָׂרָף, LXX ὄφις σκολιός, Aq. and Symm. ὄφις ἐνερκεσιωμένος), and he shall slay the *tannin* that is in the sea.' The language here certainly recalls the Babylonian mythology with its account of the primeval conflict between Marduk and Tiāmat (see art. COSMOGONY). The 'fleeing serpent' (cf. Job 26^{12a}) is portrayed on a Bab. seal, with Marduk in pursuit; the 'coiled serpent' might be the earth-encircling ocean. These two *liwyāthāns* are held to be simply differentiations of Tiāmat, whose consort, Kingu, may be 'the dragon in the sea' (so Gunkel, followed by Cheyne, *et al.*). At the same time Gunkel (p. 40) admits that they are employed by 'Isaiah' to symbolize kingdoms. In Is 51⁹ (on which see art. RAHAB) the 'dragon' (symbolical, as the context shows, of Egypt at the time of the Exodus) appears, as in the Bab. cosmogony, as having been destroyed by God long ago (so also in Ps 74^{13a}. 'Thou brakest the heads of the *tanninim* in the waters, thou didst crush the heads of *liwyāthān* in pieces,' 89¹⁰ *al.*), whereas in 27¹ the monster is thought of apparently as imprisoned in the sea, and destined to be destroyed at last by Jahweh's sword (cf. Job 3⁸, where, as was noted above, magicians have the power to 'rouse up' *liwyāthān*; 7¹², where watchers are set over the *tannin*; and Am 9², where the serpent [שָׂרָף, δράκων] is in any case no venomous marine snake, for such are not found in the Mediterranean, but 'an imaginary monster, supposed by the Hebrews to have its home at the bottom of the ocean, and to be at the disposal of the Almighty' [Driver, *ad loc.*; similarly Nowack, who has no doubt that there is a reference to the sea-monster of mythology]). Again, in Ezk 29³⁻⁸ and 32²⁻⁸ the *tannin* to which Pharaoh is compared, although it has points in common with the crocodile, is held to

* The creature which is said to have swallowed Jonah (see vol. ii. p. 750) is called simply a great fish (גָּדִיל גָּדִיל, Jon 1¹⁷ [Heb. and Gr. 2]). The familiar 'whale' comes from LXX κήτη (αἰψα), reproduced in the *apoc.* of Mt 12⁴⁰.

† Pocock in his *Commentary* on Mic 1⁸ (1677) first showed that these two words had been confused, and pointed out that תנין must denote some kind of jackal.

* The word 'dragon' in AV should probably be viewed merely as an old and poetical word for a large serpent (not necessarily a fabulous monster). See examples of its use in this sense in old writers as quoted by Murray in *Oxf. Eng. Dictionary*, s.v.

† This is the only occurrence of 'sea-monster' in AV.

find its only true equivalent in the monster *Tiāmat*. The treatment to be meted out by God to Pharaoh recalls, we are told, the way in which *Tiāmat* and her allies were vanquished and afterwards treated by Marduk; compare, for instance, *Ezk* 32⁵ 'I will spread out my net for thee,' etc., with Creation tablet iv. ll. 95, 112, 'Bel (Marduk) threw wide his net, made it encompass her'; 'In the net they lay, in the meshes they sat.' But the net is a common OT figure, and may be used here independently. Upon the whole, while it is practically certain that the *Tiāmat* myth had reached Palestine and that there are allusions to it in the OT, it will hardly be questioned that Gunkel exaggerates its influence.

The 'dragon' of *Neh* 2¹³ is probably a serpent regarded as the tutelary deity of the spring, and believed to give living power, perhaps healing virtues, to its waters (cf. W. R. Smith, *RS* 156, 161 [2 172, 176]).

It does not fall within the scope of the present article to discuss the 'dragon' of the Greek Book of Daniel (see art. *BEL AND THE DRAGON*), the 'dragons' of *Ad. Est* 10⁷ 11⁴ or of *Ps-Sol* 2²⁸, or the 'dragon' of *Rev* 12³ 13² 4. 13 16¹³ 20², for which last see *REVELATION (BOOK OF)*, p. 256, and Bousset's *Comm. ad loc.* See also art. *RAHAB*.

LITERATURE.—Gunkel, *Schöpfung u. Chaos*, esp. pp. 29-30; Cheyne's art. 'Behemoth and Leviathan' and 'Dragon' in *Encyc. Bibl.*; Weber, *Jüd. Theol.* 3 160, 202, 402, 404 (on Jewish fancies about Leviathan); the *Comm.*, esp. those of A. B. Davidson, Dillm., Budde, and Duhm on *Job*; of Cheyne, Dillm.-Kittel, and Marti on *Isaiah*; and of Bertholet and Kraetzschmar (both disinclined to admit in *Ezk* 29³ 32² the mythological allusions contended for by Gunkel) on *Ezekiel*.

J. A. SELBIE.

SEBA (סֵבָא).—Son of Cush, *Gn* 10⁷=1 *Ch* 1⁹. Since Seba is mentioned in connexion with Cush in *Is* 43³ and 45¹⁴, it is probable that this genealogy is a gloss on the passages of *Isaiah*, or, at any rate, based upon them. Of Seba this author knows that its inhabitants were tall; and since he prophesies that they should be brought in chains to Jerusalem, it seems reasonable to identify them with a race mentioned in the oracle of *Is* 18² 7, who were to be brought as an offering to the temple, who also were connected with a nation living beyond the rivers of Cush, and who are described as 'drawn out, clean-shaven, and of power from ancient times.' The rest of the description is at present unintelligible. There is a further reference to them in *Ps* 72¹⁰, where, however, they are merely typical of a distant race, and coupled with the familiar Sheba on the ground of the resemblance of their names. On this resemblance Glaser (*Skizze*, ii. 387 ff.) bases his theory that they represent the Sabæans of Jebel Shammir in Nejd—a theory which is to be rejected on the ground that the only author who knows anything definite about them keeps them carefully apart from the Sabæans, and mentions them in connexion with Cush and Egypt. Since from the 8th cent. B.C. Cush had played an important part in politics, it is probable that an educated man would have some idea of the locality of Cush, and therefore any attempt to seek for Seba anywhere but in the heart of Africa should be rejected. The researches of Mr. Theodore Bent (*Ruined Cities of Mashonaland*, 1892) have certified the existence in the heart of Africa of the vestiges of ancient States, the names of which are lost to history. The description given by him of the ancient State of Mashonaland bears some resemblance to that given in *Is* 18, possibly on the ground of Egyptian despatches or the statements of Ethiopians then dominant in Egypt. 'There is,' says a Portuguese traveller quoted p. 207, 'a tower or edifice of worked masonry, which appears evidently not to be the work of black natives of the country, but

of some powerful and political nations'; p. 231, 'there is little doubt that the ancient builders of the ruins in Mashonaland, the forts and towns between the Zambesi and the Limpopo, utilized the Sabi river as their road to and from the coast.' This, like other African rivers, was in ancient times suitable for large craft, but, through silting, is no longer fit for it (p. 231). It does not appear that epigraphic research has as yet thrown any light on this name. D. S. MARGOLIOUTH.

SEBAM (סֵבָא; Σεβὰμ; *Saban*).—A town in the pastoral district, 'a land for cattle,' in which Heshbon, Elealeh, and Nebo were also situated (*Nu* 32²). It is apparently the same place as *Sibmah*, which was in the territory of Reuben, and was rebuilt by the children of Reuben (*Jos* 13¹⁰, *Nu* 32²⁸). Sebam probably soon fell into the hands of the Moabites, in whose possession it was in the days of *Isaiah* and *Jeremiah*. It was then celebrated for its vines, which were destroyed by 'the lords of the nations' (*Is* 16⁸, *Jer* 48³⁴). Jerome (*Onom. s. Sabama*) calls it a town of Moab in the land of Gilead, and says that it was barely 500 paces from Heshbon (*Com. in Is. v.*), and one of the strong places of the district. It is perhaps *Súmia*, on the south side of *Wādī Hesbān*, and 2 English miles from Heshbon. There are here some ruins, rock-hewn sarcophagi, and rock-cut wine-presses (*PEF Mem. East Pal.* p. 221).

C. W. WILSON.

SEBAT (Σαβάρ) 1 *Mac* 16¹⁴, or **SHEBAT** (שֵׁבַט) *Zec* 1⁷.—The eleventh month; see *TIME*.

SECACAH (סֶקַח; Βαλχοῦζά, Σοχοῦζά; *Sachacha*).—One of six cities situated in the 'wilderness' (*midbār*) of Judah (*Jos* 15⁶¹), that is, in the waste land west of the Dead Sea. It was unknown to Eusebius and Jerome (*Onom. s. Σαχά*, *Seacha*), and there is no clue to its position. Conder (*Hbk. to Bible*) identifies it, doubtfully, with *Khurbet ed-Dikkeh*, also called *Khurbet es-Sikkeh*, 'ruin of the path,' 2 miles S. of Bethany. This is too near Jerusalem. Secacah was probably between the Kidron ravine (*Wādī en-Nār*) and En-gedi.

C. W. WILSON.

SECHENIAS (Α Σεχενίας).—1. (B om.) 1 *Es* 8²=Shecaniah, *Ezr* 8³, where the text needs rearranging to agree with 1 *Esdras*. 2. (B *Elechorias*), 1 *Es* 8²=Shecaniah, *Ezr* 8³.

SECOND COMING.—See *PAROUSIA*, vol. iii. p. 674.

SECT.—See *HERESY*, vol. ii. p. 351.

SECU (סֵעִי, with the article; Β ἐν τῷ Σεφεί, Α ἐν Σοκχά).—A place mentioned only in 1 *S* 19². It was not far from Ramah (Samuel's residence), and apparently on the road from Gibeah to that place. In or near it there was a large cistern (*RV* 'the great well' [בֹּר תְּהִיָּה], *RVM* 'the well of the threshing floor' [בֹּר תְּהִיָּה, LXX φάρος τοῦ ἀλω]) which Saul passed on his journey. The place is unknown, and its site depends upon the position assigned respectively to Gibeah and Ramah. Several identifications have been proposed: for instance, *Bir Nebala*, near Gibeon (Smith's *DB*), *Khurbet Shuweikeh*, a little S. of *Bireh* (Conder, *PEF Mem.* iii. 52, 126), and the ancient reservoir at Solomon's Pools (*PEFSt*, 1898, p. 17), but this last is dependent upon an improbable site for RAMAH (see above, p. 198*). The LXX (B) ἐν τῷ Σεφεί implies the Heb. סֵעִי='bare height' (often in *Jeremiah*). This is preferred to MT by Thénius, Driver (*Text of Sam. ad. loc.*), Löhr, H. P. Smith, and recent writers in general.

C. W. WILSON.

SECUNDUS (Σεκούρδος [TR], Σέκουρδος [WH,

Blass]).—A man of Thessalonica, who accompanied St. Paul from Philippi to Europe (Ac 20⁴), probably one of the apostles of the Churches taking the Macedonian contributions to Jerusalem, Ac 24¹⁷, 2 Co 8²². The name (with SOSPATER) occurs in the well-known inscription of Thessalonica, CIG ii. 1967, which gives a list of Politarchs.

A. C. HEADLAM.

SECURE.—As used in AV 'secure' means 'confident,' 'trustful,' 'not anticipating danger.' It is always in OT the tr. of נָסַב to trust, confide, or some of its derivatives. In NT it occurs only as a verb, and only in Mt 28¹⁴ 'And if this come to the governor's ears, we will persuade him, and secure you,' where the Gr. is ὑμᾶς ἀμερίμους ποιήσωμεν, i.e. 'make you free from care,' which corresponds exactly with the derivation of the Eng. word (Lat. *securus*, i.e. *se* 'free from,' and *cura* 'care'). Cf. Jg 18⁷ 'they dwelt careless, after the manner of the Zidonians, quiet and secure.' How greatly the word has changed its meaning may be seen from Jg 8¹¹ 'Gideon . . . smote the host: for the host was secure.' Davies (*Bible Eng.* p. 103) quotes from Sandys (p. 210), 'There is no where any place wherein it is safe to be secure.'

Securely (Pr 3²⁸, Mic 2⁸, Sir 4¹⁵) has the same meaning. And so also **security** in 2 Es 7²³, Sir 5⁷; but in Ac 17⁹ 'when they had taken security of Jason, and of the other, they let them go,' this word is used in its modern sense (Gr. τὸ ἰκανόν).

J. HASTINGS.

SEDEKIAS (*Zedekias*, AV *Zedechias*), 1 Es 1⁴⁶ (LXX ⁴⁶), Zedekiah king of Judah.

SEDUCTION.—See art. CRIMES AND PUNISHMENTS, vol. i. p. 522^b.

SEED, SEEDTIME.—There is a threefold usage of the words rendered by EV 'seed.' 1. *Botanical and agricultural.*—The common Heb. term is זֶרַע (Aram. זֶרַע Dn 2⁴³), usually 'seed,' but in Gn 8²² 'seed time,' and in Lv 26⁵ 'sowing time.' In Ezk 17⁵ זֶרַע is tr. 'fruitful field' (RV 'fruitful soil'). 'Sowing seed' (Lv 11³⁷) and 'things that are sown' (Is 61¹¹) are equivalents of זֶרַע. In Jl 1¹⁷ זֶרַע is tr. 'seed' (RV 'seeds'). 'Mingled seed' (Lv 19¹⁹) and 'divers seeds' (Dt 22⁹) are renderings of זֶרַע. In Is 19⁷ זֶרַע לֵאמֹר appears in AV as 'every thing sown,' RV 'all that is sown.' The usual Gr. word in Apoc. and NT is σπέρμα, but σπόδος also occurs Mk 4²⁸ [cf. Swete's note], Lk 8^{8, 11}, 2 Co 9¹⁰. The most interesting Scripture references to 'seed' in this sense are the poetic figure in Ps 126⁵ and our Lord's parables of the Sower and the Tares. See AGRICULTURE, vol. i. 49^a. 2. *Physiological.*—The phrase זֶרַע הַחַיִּים is variously tr. in Lv 15^{16, 17, 18, 32} 18²¹ 19¹⁹ 22⁴, Nu 5¹³. 'To conceive seed' stands in Lv 12² for the Hiph. of זָרַע, in Nu 5²⁸ for the Niph. with the noun זֶרַע, and in He 11¹¹ for εἰς καρποβολήν σπέρματος. σπέρμα has this meaning in Wis 7², and σπόρα bears the same sense in the metaphor of 1 P 1², where Christians are said to have been 'begotten again, not of corruptible seed (ἐκ σπορᾶς φθαρτῆς), but of incorruptible (ἀφθάρτου), through the word of God.' 3. *Metaphorical for offspring,* whether of animals (Jer 31²⁷) or of man. Here the words are זֶרַע and σπέρμα. The former is twice tr. 'child' (Lv 22¹³, 1 S 1¹¹). 'Seed' has the meaning of genealogy or pedigree, Ezr 2⁵⁰, Neh 7⁶¹. 'The holy seed' is a special designation of the people of Israel, Is 6¹³, Ezr 9², 1 Es 8⁷⁶. 'Seed,' like 'generation,' is sometimes used to describe a class of people with reference to character rather than to descent. Thus we have 'seed of evil-doers' (Is 1⁴), 'of falsehood' (Is 57⁴), 'blameless seed' (Wis 10¹⁵), 'accursed seed' (Wis 12¹¹), a seed 'honoured' or 'dishonoured' (Sir 10¹⁹).

Two NT passages call for separate remark.

(a) The words σπέρμα αὐτοῦ ἐν αὐτῷ μένει (1 Jn 3⁹) have been interpreted to mean either (1) that Christians, as the 'seed' or children of God, abide in Him and are thus kept from sinning; or (2) that a Divine principle of life remains in the Christian, which secures the same result. The latter is the view now almost universally accepted. It makes αὐτοῦ=θεοῦ, and the σπέρμα θεοῦ is much the same as the σπορά ἀφάρτος of 1 P 1². (b) In Gal 3¹⁶ St. Paul bases an argument on the promises of Gn 13¹⁵ 17⁸, and lays much emphasis on the use of the singular σπέρματι rather than the plural σπέρμασιν as pointing to the fulfilment of the promises in an individual, viz. Christ. Now it has to be admitted, first, that neither in Heb. nor in Gr. would it have been natural to use the plural form of 'seeds,' even if the promises had been meant to point only to a plurality of descendants of Abraham; and, second, that St. Paul's language elsewhere (Ro 4¹⁸ 9⁷) shows that he did not regard the singular σπέρματι as necessarily excluding the plural meaning. St. Paul's argument in Gal 3¹⁶ is therefore somewhat artificial and Rabbinical in its form. It does not logically prove that the promise to Abraham must be fulfilled in a single individual. But we can take from it the thought that the collective noun, with its singular form, suggests an individual in whom the destiny of Abraham's posterity is summed up, and by whom their mission to the world is carried out. The terms of the promise, though not incompatible with a multiple or national fulfilment, are peculiarly compatible with one which centres in a single person, as Christ's fulfilment does (see Lightfoot, Beet, Eadie, Findlay, Lipsius, Meyer, *ad loc.*).

JAMES PATRICK.

SEER.—See PROPHECY, p. 108.

SEETHE.—To seethe is to boil, as Berners, *Froissart*, xvii, 'These Scottish men . . . take with them no purveyance of bread nor wine, for their usage and soberness is such in time of war, that they will pass in the journey a great long time with flesh half sodden, without bread, and drink of the river water without wine, and they neither care for pots nor pans, for they seethe beasts in their own skins.' The old past tense is **sod**, Gn 25²⁹ 'Jacob sod pottage'; 1 Es 1¹² 'As for the sacrifices, they sod them in brass pots and pans with a good savour'; and past ptep. **sodden**, Ex 12⁹ 'Eat not of it raw, nor sodden at all with water.'

J. HASTINGS.

SEGUB.—1. (זְבֻנִּי *Kerē*, זְבֻנִּי *Kethibh*; B *Zeγούβ*, A *Zeγούβ*) the youngest son of HIEL who rebuilt Jericho, 1 K 16²⁴. The death of Segub, which synchronized with the setting up of the gates, may have been due to an accident in the building operations, or he may have been offered in sacrifice by his father—a circumstance purposely obscured in the present form of the story. See FOUNDATION and HIEL. In any case, popular opinion finally connected the death of Hiel's two sons with a curse believed to have been pronounced by Joshua on the man that should rebuild Jericho. The form in which this curse is expressed in Jos 6²⁶ is moulded by a knowledge of the events recorded in 1 K 16²⁴. See, further, Bertholet, and esp. Kittel on this last-named passage. 2. (זְבֻנִּי; B *Zeγούχ*, A *Zeγούβ*) son of Hezron and father of JAIR, 1 Ch 2²¹.

J. A. SELBIE.

SEIR (שַׁעִיר 'rough,' 'shaggy').—1. The name of a mountainous district east of the 'Arabah, peopled by the Edomites. It was originally occupied by *Horites* or 'cave-dwellers' (Gn 14⁶ [where read, after LXX and Sam., שַׁעִיר הָרִי for הָרִי שַׁעִיר of MT]) 36²⁰ [in the latter passage Seir is personified as the eponymous ancestor of the indigenous inhabit-

ants]). As **Mt. Seir** (שֵׁיר, ὄρος (τὸ) Σε(ε)ῖρ, Gn 36st, Dt 21st *al.*) is practically synonymous with Edom (cf. Gn 32^d 'the land of Seir, the field of Edom,' אֶדוֹם שֵׁיר אֶרֶץ, γῆ Σεῖρ χώρα 'Eδῶμ), it will suffice to refer for further details to art. **EDOM**. 2. Quite different is the Mt. Seir (B 'Ασσά, Α Σεῖρ) mentioned in Jos 15¹⁰ amongst the points defining the boundaries of Judah. The name may still be preserved in that of the ruins at *Sáris*, S.W. of Kiriath-jearim (cf. the name Σωρίς in LXX A [but B 'Εωβήρ] of Jos 15⁶⁰). See Robinson, *BRP* iii. 154 ff.; Buhl, *GAP* 91, 167; Dillm. *Jos. ad loc.* J. A. SELBIE.

SEIRAH (שֵׁירָה, with the article; B Σερεῖρᾰ, Α Σεερεῖρᾰ; *Seirath*).—The place to which Ehud escaped after killing Eglon, king of Moab (Jg 3rd). It was in the hill-country of Ephraim, and apparently not very far from Gilgal. Its site was unknown to Eusebius and Jerome (*Onom.* Σερεῖρᾰ, Sirotha), and it has not yet been identified.

C. W. WILSON.

SELA (סֵלָא 'the cliff'; סֵלָא, Is 16¹ 42¹¹; סֵלָא, הָ סֵלָא, Jg 1st, 2 K 14⁷).—The capital of Edom or Mt. Seir, situated in a valley amidst the Edomite mountains, five days' journey (of 12 miles each) by the Arabah from 'Akabab (Elath), and 6 from the Dead Sea by the same route.* Its identification as the capital of Edom may also be inferred from its proximity to Mount Hor (if we are right in identifying this with *Jebel Haroun*), which rises in a grand escarpment immediately to the N.W. of the ancient city, and which, as observed by Dean Stanley, is one of the few spots connected with the wanderings of the Israelites which admit of no reasonable doubt (*Sinai and Palestine*, 86). According to Strabo, **Petra** was the metropolis of the Nabateans, and it is described as a city situated in a valley, decorated with gardens and fountains, but bounded on all sides by rocks.†

Description.—Petra is undoubtedly one of the most remarkable of the ancient cities of the East, not only for its position, shut in by mountains and formidable rocky precipices from the outer world, but for the peculiar character of its architecture and the degree of preservation in which the structures themselves have come down to us through many centuries. It lies along the course of the Wady Mûsa,‡ a stream which descends by a narrow gorge called the *Sik* from the tableland of Edom at the margin of the great Arabian desert, and which ultimately finds its way into the Wady el-Jeib, and thus to the Dead Sea, in a north-westerly direction. On issuing from the *Sik*, the valley suddenly opens out into a plain, about 1000 yards across,§ bounded by stupendous cliffs of red and variegated sandstone, into which several other valleys enter from the north, west, and south, also lined by lofty cliffs, through one of which the river escapes by a channel almost as narrow as that by which it entered. This central plain, of a rudely quadrangular form, contains several ruined temples and foundations of habitations. On all sides the nearly vertical walls of rock are covered by works of art—not

built up of hewn stone, but cut out of the living rock itself; while a few ruined structures occupy sites rising directly from the valley. This style of architecture, not unknown in other Eastern countries, such as the Valley of the Nile, Peninsular India, and Asia Minor, here attains a variety and magnificence elsewhere unreachd; and as the tombs appear to predominate in number above other kinds of structures,—not excepting the temples,—Petra has been likened by travellers to a vast necropolis, where the inhabitants could never issue forth from their dwellings without being confronted with monuments of death.

It would be out of the place here to attempt to describe even some of the finest examples of ancient architecture to be found in Petra, which call to mind the varied styles of Egypt, Greece, and Rome. We will only observe that in hewing out the porticoes, columns, and architraves or crowning parts of the buildings, the architects commenced at the top and worked downwards; so that, as the face of the rock was not absolutely vertical, the hewn portions became more and more deeply set into the mass of the rock itself. To this protection, caused by the projection of the original face on either side, as well as sometimes overhead, may be attributed the degree of preservation of the structures themselves. The following are the more important of the monuments as known by their present names:—(1) *el-Khazné*, a portico of a tomb with Corinthian columns at the entrance to the *Sik*; (2) the Theatre; (3) the Tomb, or Temple of the Urn; (4) Corinthian Tomb; (5) Great Tomb, with three rows of columns; (6) Tomb with Latin inscription*; (7) Ruin of Triumphal Arch; (8) Ruined Basilica (*Zob Phiroun*); (9) Temple (*Serail Phiroun*); (10) Large Tomb (*ed-Deir*); (11) Isolated Column. All the lateral valleys entering the great central plain have their walls perforated with tombs, and a few habitations, the entrances to which are adorned with sculptured façades, while niches for statues are to be observed at intervals. Amongst the most interesting objects is the Roman Theatre, cut out of the solid rock on the western side of the city, and estimated to have afforded seats for 3000 spectators; and lastly, the Circular Arch, which spans the *Sik* high above the floor, which was doubtless constructed as part of an aqueduct to carry the waters of the brook to the higher parts of the city.† For figure of the recently discovered high place of Petra, see *SANCTUARY*, p. 396^d.

Outline of the history of Petra.—The history of Petra has yet to be written. The following are some of the leading historical events:—

- (1) Its history commences in the time of Abraham, when Chedorlaomer, king of Elam, with his allies, swept over the region of Mount Seir, then inhabited by the Horites (or cave-dwellers), Gn 14^e.
- (2) Esau settled in Mount Seir on separating from his brother Jacob, and the country was henceforth ruled by his descendants, the Edomites (Gn 36^e).
- (3) At the time of the Exodus the Edomites appear to have been a powerful nation under a king; and on the Israelites requesting permission to pass through Mount Seir, by the king's highway, on their journey towards the plains of Moab, they were refused, and the Edomites made a demonstration of force to resist the passage (Nu 20¹⁴⁻²¹).

* Giving the name of the Roman governor, Quintus Prætextus Florentinus, who died in the city probably in the reign of Hadrian, A.D. 117-180.

† A rude plan of the city is given by Burckhardt; but a much more full and perfect one by Laborde, together with numerous views and illustrations of the works of art. The beautiful drawings of David Roberts need only be referred to. The wonderful colouration of the sandstone rock ('the Nubian sandstone' of the Cretaceous age), in which the prevalent red is varied by wavy bands of pink and yellow in one direction and of purple to blue in the other, has called forth the admiration of all travellers.

* There is no doubt in the mind of the present writer that **Petra** of the present day is the **Sela** of the OT, the Greek name being the equivalent of the Semitic; and the importance of the place in ancient times, together with its situation, point to it as the capital of that part of Arabia. But see Moore, *Judges*, 551., and cf. art. *Rocks*, No. 4.

† Urbem in regione plana, et hortis fontibusque instructam, cinctam tamen rupibus undique (lib. xvi.).

‡ How this stream obtained its name, unless from the fancy of the Arabs, it is impossible to say; but it cannot be admitted that it ever had any connexion with Moses, the Israelitish leader. It is one of the grounds on which Dean Stanley (*Sinai*, p. 92) endeavours to make out that Petra is Kadesh-barnea; but at this point we shall return further on.

§ Measured by scale from Laborde's plan near the centre of the quadrangle.

(4) In later times they were sufficiently powerful to maintain wars with the kings of Israel and Judah. At an early stage they were brought into subjection by David, who put garrisons in the Edomite strongholds (2 S 8⁴); but, in the days of Joram, Edom revolted from the rule of Judah (2 K 8²⁰), and, although defeated, maintained their independence and set a king over themselves. After their defeat by Amaziah in a great battle in the Valley of Salt on the shore of the Dead Sea, Sela, the capital, was captured, and re-named by the conqueror *Joktheel* (? 'protection of God'), 2 K 14⁷. At the end of the 4th cent. B.C. Edom came into possession of the Nabataeans, one of the two chief tribes descended from Ishmael. These established a powerful dynasty, successfully resisting the attacks of Antigonos (Diod. Sic. xix. 731, ed. 1804), and encouraging commerce and works of art. One of their kings, Aretas, was father-in-law of Herod Antipas, and during their sway many of the monuments of Petra which have come down to the present day were constructed.

(5) The sway of the Nabataeans was terminated by the capture of the city, and the reduction of Arabia Petræa to a Roman province by Trajan's general, Hadrian, from whom the capital received the name of Hadriana, as appears from the legend on the coins of this period (Dion Cass. lib. 68). Under the fostering care of the empire it probably attained to the summit of its commercial prosperity and grandeur.

(6) Christianity appears to have been introduced into Petra at an early date, though it is impossible to verify the tradition that the city was visited by St. Paul on his retirement to Arabia after his conversion. Petra, however, became the seat of a bishopric, and Athanasius mentions Asterius as bishop of Petra early in the 4th cent. (*tom. ad Antioch.* 10: 'Ἀστέριος ἱερέων τῆς Ἀραβίας, et al. '); again we find Petra mentioned as the metropolis of the episcopal province of Palestina Tertia, which included a large number of towns or villages, all of which seem to have since disappeared. (*Excerpta* from MS in the Vatican, quoted by Reland, i. 160).

(7) With 'the decline and fall' of the Roman empire a period of decadence for Petra set in, which was hastened by the invasion of Chosroës, king of Persia, in the middle of the 6th cent.; and its ruin was consummated by the desolating wave of Mohammedan conquest which swept over Arabia Petræa from A.D. 629 to 632. The Christian inhabitants were either massacred or compelled to embrace the faith of the conqueror, and their temples and monasteries were reduced to ruins. Of the large number of ecclesiastical buildings which existed at the beginning of the 7th cent. in Arabia, only the monastery of Mount Sinai remains to the present day. Henceforth Petra became a city of ruins, absolutely lost to the view and knowledge of the outer world for several centuries during the Middle Ages till rediscovered by Sultan Beybars of Egypt towards the close of the 13th cent. It is now only the home of the Bedawin; and the terrible predictions of the prophet, 'Thus will I make Mount Seir an astonishment and a desolation' (Ezk 35⁷), have been literally fulfilled. Dean Burgen has well expressed this desolation in the following lines:

'How changed—how fallen! All her glory fled,
The Widow'd City mourns her many dead.
Like some fond heart which gaunt disease hath left
Of all it lived for—all it loved—bereft;
Mute in its anguish: struck with pangs too deep
For words to utter, or for tears to weep.'

Petra, 1845.

* On the coins of Petra the city is represented as a veiled and turmented female sitting on a rock. For other predictions of the desolation of Edom, see Is 34⁵⁻¹⁷, Jer 49¹³⁻²², Ob 1-10.

Petra and Kadesh-barnea.—The suggestion that these two places were identical comes from Dean Stanley, and would not have been considered worthy of notice had it emanated from a less distinguished writer. Both topographical and historical reasons are sufficiently clear to render the view untenable. (1) Kadesh was a place situated in immediate proximity to the Canaanitish inhabitants (Nu 13²⁰). This does not apply to Mount Seir, which was separated from them by the wide valley of the Arabah (wilderness of Zin). (2) Kadesh was in the wilderness of Paran (Nu 13²⁶), a region lying to the west of the Arabah, and generally corresponding to the Badiet et-Tih of the present day (cf. Gn 21²¹, Nu 10¹² 12¹⁶ 13²⁶). This is in harmony with (1) above. (3) As the king of Edom refused the Israelites a passage through his territory when about to leave his neighbourhood, is it conceivable that he would have permitted them to occupy the capital of his kingdom for a period of thirty-eight (or forty) years? Dean Stanley's main reason for his suggestion is the name Wady Mûsa (or Moses' Valley) attached to the stream along the banks of which Petra is situated. But however difficult it may be to account for the name, the reasons against the suggestion far outweigh whatever evidence may be derived from this source. See article SANCTUARY.

LITERATURE.—Burckhardt ('Sheikh Ibrahim'), *Travels in Syria and the Holy Land* (1822); de Laborde, *Journey through Arabia Petræa, etc.*, Eng. tr. 2nd ed. (1838); Hull, *Mount Seir, Sinai, and Western Palestine* (PEF, 1889); Reland, *Palæstina ex monumentis veteribus illustrata* (Nuremberg, 1610); Stanley, *SP* (1860); *JBL*, 1889, p. 132 ff. E. HULL.

SELAH (שֶׁלֶה).—This word occurs 71 times in the Psalter, 17 of these occurrences being in Book I., 30 in II., 20 in III., 4 in V. The majority of the psalms wherein it appears are Elohist, and all of them ascribed, in the titles, to David, Korah, Asaph or Ethan, except Ps. 66 and 67, the latter of which has ψαλμὸς τῷ Δαυὶδ in the LXX. In 16 psalms it is found once, in 15 twice, in 7 thrice, in 1 four times. It stands also three times in the psalm which is known as Hab 3. In the so-called Psalms of Solomon διάψαλμα is used twice (17³¹ 18¹⁰), but in one of the eight MSS of which Swete has availed himself (*The OT in Greek*², vol. iii.), omits it in both cases. Its usual position is at the end of a poem or of a strophe, the only instances of its occurrence in the middle of a verse being Ps 55¹⁹ 57², Hab 3²⁻³. These exceptions, however, are apparent rather than real: the first passage is full of impassioned feeling, and the *Selah* immediately follows a Divine title; in the second the LXX has διάψαλμα at the close of the verse; the other two are connected with loose quotations from Dt 33², Ps 77¹⁶⁻²¹.

It is universally agreed that *Selah* is a musical or liturgical sign of some kind. Nowhere has the word any grammatical connexion with the context. Ps 9¹⁶ is not an exception, for *Higgaion*, *Selah*, are both used interjectionally, 'Resounding music! Up!' It is not found in the prophetic writings, and its reference to the temple music is evinced by the fact that 31 of the 39 psalms containing it are ascribed in their titles σιχαλ, as is Hab 3 at the close.

The derivation and precise significance of the note have been much disputed. (1) One suggestion is that we have in it simply the Heb. form of ψάλλε. But the musical signs of the Psalter date from an earlier period than that of the Greek influence. Besides, if the word had come from the Greek, it is strange that no tradition to that effect should have reached any of the Greek translators. (2) It has been taken as an abbreviation. For example, שֶׁלֶה נֶלֶה שֶׁלֶה = *da capo*. But

territories which took place in B.C. 321 he obtained the governorship of Babylon, and, though driven out by Antigonus in B.C. 316, he succeeded in B.C. 312 in establishing himself in the Babylonian provinces in the east as well as in the Syrian provinces in the west. He then founded the Seleucid dynasty, which held its place for about two hundred and fifty years. He died by the hand of an assassin in B.C. 282. He is the *captain* (צ) of the king of the South, Ptolemy Soter of Egypt, referred to in Dn 11⁸ as having become stronger than the king. He founded several cities which became famous, among them Antioch and Apamea on the Orontes, Laodicea and Seleucia, Edessa and Bercea. He settled many Jews, who had served their time under him, in Antioch and others of the cities founded by him, and conferred upon them all the rights of citizenship.

LITERATURE.—Josephus, *Ant.* xii. iii. 1; Schürer, *HJP* p. l. 114, ii. 271; Ewald, *HI* v. 237; Driver, *Daniel*, xxxv. 165 f.

J. MACPHERSON.

SELEUCUS II. (Callinicus), king of Syria, B.C. 246–226, son of the grandson of Nikator, Antiochus II. Theos. His mother, Laodice, having murdered the Egyptian princess Berenice, Ptolemy Euergetes, the brother of the murdered lady, in order to avenge his sister's death, invaded the territories of the Syrian monarch, and plundered Syria and Babylonia. Reference to this episode is made in Dn 11⁷⁻⁹. Ptolemy took possession of Seleucia, which for a considerable time was retained by the Egyptians. Seleucus afterwards sought to retaliate, and for this purpose led an expedition against Egypt, but was immediately put to flight. We have no particulars about the close of his reign.

LITERATURE.—Bevan, *Short Com. on Daniel*, 1892, pp. 174–177; Ewald, *HI* v. 271, 283; Driver, *Daniel*, 167 f.

J. MACPHERSON.

SELEUCUS III. (Ceraunus), king of Syria, B.C. 226–223, son of Callinicus and brother of Antiochus the Great. These brothers are referred to in Dn 11¹⁰ in the word 'his sons.' Seleucus did not make war directly with Egypt, but his campaign in Asia Minor may be regarded as preliminary to the expedition carried out against Egypt by his brother. Seleucus was killed in that campaign, after a reign of two years, before the accession of Ptolemy Philopator, against whom Antiochus fought unsuccessfully (cf. Driver, *Daniel*, 168 ff.).

J. MACPHERSON.

SELEUCUS IV. (Philopator), king of Syria, B.C. 187–175, son of Antiochus the Great and brother of Antiochus Epiphanes. Dn 11²⁰ refers to this Seleucus, whether we understand the writer to speak of him as sending an exactor, or (transposing two words) as himself the exactor who rises up in the place of his father. In the former case, we shall understand by the exactor Heliodorus, whom Seleucus is said (2 Mac 3⁷ 5¹⁶) to have sent to obtain the money treasured up in the temple of Jerusalem. Bevan prefers the above transposition, rendering the passage thus: 'And there shall arise in his place an exactor, who shall cause the royal dignity to pass away.' Such a designation would be very suitable for Seleucus, who was notorious for his avarice. He is spoken of in 2 Mac 3³ as 'the king of Asia.' In 1 Mac 7¹, 2 Mac 14¹ he is alluded to as father of Demetrius, and in 2 Mac 4⁷ mention is made of his death, and of the fact that he was succeeded by Antiochus. After having reigned twelve years, Seleucus was murdered, some say by Heliodorus, his minister, who sought to win the kingdom to himself; but others say at the instigation of his brother Antiochus, who was on his way from Rome, where he had been detained for some years as a hostage. This latter view seems to be most agreeable to the language of Daniel.

J. MACPHERSON.

SELF-SURRENDER.—By this title we may understand to be indicated the fundamental principle of Christianity on its subjective side. The roots of it may be traced back in the OT and further to the primitive instincts of religion. Schleiermacher's definition of religion as 'the sense of dependence' is defective and one-sided in leaving out of account this most essential element. It is seen in an extreme form in the extravagance of pagan fanaticism. The Indian fakir, the yogi who abandons himself entirely to religious devotion, aims at making the most absolute surrender of his life and person; and yet it is seen that pride, self-will, vanity, and various self-regarding affections are not excluded by the extremity of fanaticism, and therefore some deeper if not more demonstrative experience must be looked for in real self-surrender. The OT prepares for this, and the NT shows the way of completely realizing it.

i. **SELF-SURRENDER IN THE OT.**—(a) This is an important element of the Hebrew faith in its various phases. In the patriarchal history it appears in the submission and obedience of Abraham and his family in leaving Ur of the Chaldees and migrating to an unknown land where they must live a nomadic life in response to the call of God (Gn 12¹⁻⁹), and in the subsequent conduct of Isaac (26¹⁻⁸) and Jacob (28¹⁶⁻²²). In the prophets it is apparent as the very foundation of their work and mission. The prophet is not an involuntary instrument in the hands of God through whom the Divine will is declared. Before he receives his message he surrenders himself to the call of God; he must be a 'man of God' if he is to be a 'seer.' Moses surrenders his prospects at the court of Pharaoh in the passion of patriotism; and later, receiving his call at the burning bush, gives himself up to the service of God as His ambassador to Pharaoh. A spirit of complete self-surrender is seen later in his willingness to be blotted out of God's book that the offending people might be forgiven (Ex 32²³). Ruth's devotion to her mother-in-law, though issuing in a great act of self-surrender (Ru 1¹⁶ 17), has only a secondary bearing on the giving up of self to God. Samuel is dedicated to God from his birth by his mother (1 S 1¹¹), and his subsequent career shows that he confirmed this dedication by his own conduct. Elijah throughout his adventurous career manifests a life completely given up to the service of God in face of the greatest dangers. Elisha, responding to the call of the older prophet, takes solemn farewell of his parents and the circle of his friends at a final feast (1 K 19²¹), which may have furnished Levi the publican with the precedent for his similar action (Lk 5²⁶). Amos leaves his herds and his orchards to go as God's messenger to the dissolute court of Jeroboam II. at Bethel. But the typical act of prophetic self-surrender is seen in the case of Isaiah, who gives us a full account of God's call and his response in a vision at the temple (Is 6). Jeremiah, shrinking from the difficult task laid on him, but going to it with the supreme courage of a naturally timorous man who is braced to face danger by a strong sense of duty and a full faith in God, lives his martyr life in the spirit of entire self-sacrifice.

(b) When we turn from the history to the teaching of the OT, we find that this supreme act of religion is repeatedly insisted on. The prophets call upon the people to give themselves up to God. Hosea invites the unfaithful to return (Hos 14¹⁻²). Isaiah, denouncing the sin of Jerusalem as unfaithfulness and rebellion (12¹⁻²³), calls the people back

to their loyalty, and promises a redemption that implies a return to God in the spirit of submission (v. 37). Early in the Captivity, Ezekiel sketches the ideal of a restored nation fully devoted to God, and in Deutero-Isaiah the restored Israel appears as a people given up to the service of God. The completed Pentateuch gives a large place to the idea of self-surrender on the part of the Jewish people. The whole nation is holy, i.e. set apart for God (e.g. Ex 19² 22³¹). The Levites and the priests are dedicated to God in an especial way for the performance of specific functions, but not to the exclusion of the self-dedication of the laity. Thus the people generally are expected to 'sanctify' themselves and to be 'holy' (e.g. Lv 20⁷). Among the sacrifices the burnt-offering (*ôlâh*, i.e. 'that which goes up') was especially significant of the self-surrender of the man who offered it. This was entirely consumed on the altar (therefore thought of as a 'whole offering'), while other sacrifices were eaten in whole or in part by the priests and the worshippers. As the smoke ascended to heaven the essence of the victim was supposed to pass up to Jehovah, and represented the offerer, who was thus supposed to give himself up to God under the symbol of his sacrifice (see Bennett, *Theol. of OT*, pp. 148, 149, and art. SACRIFICE).

ii. SELF-SURRENDER IN THE NT.—(a) This is first presented to us in the life of Jesus Christ, whose whole course consists in the abandonment of self and self-interest in order to do the will of God; which is summarized in sayings reported in the Fourth Gospel, 'My meat is to do the will of him that sent me, and to accomplish his work' (Jn 4³⁴); 'I came down from heaven not to do mine own will, but the will of him that sent me' (6³⁸), and described in Hebrews by the application to Christ of Ps 40⁸ 'Lo, I am come to do thy will' (He 10⁵). The agony in the garden reveals the spirit of perfect self-surrender under the severest trial when our Lord cries, 'Howbeit, not what I will, but what thou wilt' (Mk 14³⁶), and the endurance of the passion consummated in the crucifixion completes the sacrifice.

(b) Jesus Christ invites His disciples to a similar life of self-surrender. That is seen outwardly in the call of the Twelve, which leads each to give up his work and his home in order to follow Christ. At Caesarea Philippi the underlying principle is made at a level of universal application when our Lord says, 'If any man would come after me, let him deny himself (*ἀπαρνησάτω ἑαυτόν*), and take up his cross, and follow me' (Mk 8³⁴, Mt 16²⁴, Lk 9²³—Luke has 'take up his cross daily'). Plainly, this means much more than what we commonly understand by self-denial, i.e. the giving up of certain of the conveniences of life. The essential difference is that it involves the abandonment of self altogether as the end of life (see Swete, *St. Mark*, in loc.). The word rendered 'deny' (*ἀπαρνεῖται*, stronger than *ἀρνέσθαι*, and meaning a more thorough abandonment, suggested by the prefix *ἀπό*) is used for St. Peter's denial of Christ (Mk 14³⁰) and for the denial in the presence of the angels of those who deny Christ on earth (Lk 12⁹). But while the absoluteness of the surrender is thus demanded, certain mistaken forms of self-denial are excluded. The notion does not involve asceticism or any form of self-torture. Primarily it is negative; it is requisite as a preliminary condition to following Christ, which is the real object to be aimed at, not commended as a meritorious act on its own account. Self must be renounced in order that Christ may be followed. Further, there is no idea of the abandonment of the *ego* in the destruction of the personality, or the fusing of the individual in the universal being of God. Christ's teaching

does not tend in this pantheistic direction. The very appeal to the act of self-renunciation brings in the idea of the will that is to perform it (*ἐλτίς θέλει*), and that will is equally requisite for the following of Christ, which is to be the subsequent aim of His servant. The disciple is to follow Christ as an individual personality, walking after his Master, though in the Master's footprints; not to merge his own consciousness and activity in the being and life of Christ. But while the individuality of the *ego* is to be thus preserved, the surrender of the will in submission and obedience is to be unconditional and complete. Probably we should regard our Lord's hard sayings on the subject of riches in the light of this primary condition. That He did not lay down a rule of poverty as a universal condition of discipleship is proved by the fact that some of His disciples who possessed property were not required to sacrifice it, e.g. Zacchaeus, the Bethany household, the mother of St. Mark—in whose house the Church met after the resurrection. Therefore the difficulty of a rich man in entering the kingdom of God, concerning which Jesus spoke with great emphasis, must be found in the entanglement of worldly goods hindering the complete surrender of will, and not in the hard necessity of giving up all the possessions. The case of the young ruler, who, when asked what he should do to obtain eternal life, was told to sell all he possessed and give it to the poor, stands by itself: we have no other instance of such a demand, and therefore it is just to conclude that it had a specific application to this man, his wealth being his fatal hindrance, and a career of discipleship being open to him if he would abandon all his worldly goods to follow Christ with the peasants and fishermen. Thus riches may be classed with the hand, or foot, or eye that is to be cut off or plucked out if the member offend. Poverty *per se* is no more required as a condition of membership in the kingdom of God than mutilation. But if any hindrance is found in what seems most valuable and our own by right—even a limb of the body—so that the precious thing must be abandoned rather than that the life should be ruined, much more must this process be followed in the case of what is so extraneous as material wealth. For a full discussion of this position see Wendt, *Lehre Jesu*, pp. 376-389 [Eng. tr. ii. 58 ff.].

While absolute surrender to the will of God is thus required by Christ at any cost, pure altruism is not demanded. The 'golden rule,' which may be regarded as the primary law of Christian ethics, enjoins that we should do to others as we would wish them to do to us, on the principle that we should love our neighbours as ourselves, where some self-regarding thought is allowed, since this is expressly named as the measure of our feelings and actions towards others. Still it is to be observed that the more advanced teaching of the Fourth Gospel carries us beyond this line of measurement with the '*new* commandment,'—perhaps *new* in contrast with the *old* commandment about love to our neighbour,—inculcating love like Christ's ('*even as I have loved you*,' etc., Jn 13³⁴), because His love involved complete self-sacrifice for the saving of others. In the same way Jesus spoke of the necessity of bearing the cross, not meaning the endurance of some hardship, but the readiness to face death, like the condemned man who carries his cross to the place of execution; and He laid down the great principle contained in the words, 'Whosoever would (or rather *wishes* to, *θέλει*) save his life shall lose it; and whosoever shall lose his life for my sake and the gospel's, shall save it' (Mk 8³⁵ etc.). Confusion has come into the interpretation of this passage through the two senses of the word *ψυχή*, as *life* and *soul*, being

introduced; but the previous sentence about the cross, an instrument of capital punishment, should make it clear that it is not the soul, especially as we now understand the word 'soul,' but the life, that is here referred to. The Gr. word is used in the same sense in Mk 10⁴⁵, where Jesus speaks of giving His *ψυχή*, i.e. His life, in the sense of giving Himself up to die. The passage, then, means that whoever is willing to face martyrdom for his Christian faith shall save his life—i.e. live on in spite of being killed, by entering into the eternal life; while he who makes it his aim to escape martyrdom will really die, because he will miss the eternal life. Here the self-surrender, even to the extent of suffering a martyr's death, i.e. the surrender which will face that extremity if necessary, is what Christ requires, not in every case the actual endurance of the martyrdom,—for the sentence is hypothetical. But this self-surrender is not the end, it is the means through which we are to enter into life. In a larger application of the essential principle it may be said that we must renounce ourselves in order to realize ourselves. The end then, as we saw above in another connexion, is not self-abnegation, much less is it extinction of being, or loss of personality and conscious existence, Buddhist *Nirvana*, or Hindu absorption in Brahm, but the very opposite—the full, enduring, conscious activity known as eternal life.

(c) In St. Paul's Epistles this principle comes out with regard to the mystical union of the Christian with Christ. He dies with Christ (Col 2²⁰); he is crucified with Christ (Gal 2²⁰); through the cross of Christ the world has been crucified to him, and he to the world (6¹⁴); the old man is crucified with Christ (Ro 6⁶). The last of these phrases throws light on the others. St. Paul is thinking of the pre-Christian condition, the life of sin and the world. This is so completely put away in Christ that it is said to be killed, crucified. The apostle means more than repentance; he is thinking of an actual end of the old thoughts, affections, desires, habits. But the peculiarity of his teaching is that this result is brought about by union with Christ, and especially by an inward, spiritual assimilation to His death. Thus, on our part, the cause is self-surrender to Jesus Christ, for Him to be the supreme commanding influence over the soul. Then this same surrender to Christ, resulting in union with Him and assimilation to His experience, carries the soul on to a resurrection. Accordingly, St. Paul writes of Christians as being 'raised together with Christ' (Col 3¹). Writing of his own experience, the apostle declares that it is no longer he that lives, but Christ who lives in him (Gal 2²⁰). This, which may be called the mystical element in St. Paul's thought, links itself to his rabbinical and legal view of redemption as an act of justification by God which we receive through faith. The bond of union between the two parts of the apostle's teaching may be found in his ideas on faith. It is faith that secures the grace of forgiveness, and so places the guilty person in a state of justification. Now, faith with St. Paul is not merely intellectual assent to dogma; it is personal trust in and adhesion to Christ. But such a condition of soul is the very surrender which secures the mystical union with Christ. Thus the two experiences—the subjective dying and rising, and the objective forgiveness and justification—spring out of the same act on our part, the faith that implies self-surrender. Further, out of this and its results arise moral obligations to continual self-renunciation for the service of Christ and the benefit of mankind. The Christian is not his own, because he has been bought with a price (1 Co 6^{19, 20}). Therefore a special obligation is on him to spend his life in unselfish service. For the same reason he must

avoid unchastity, since his body is a temple of the Holy Ghost. Christians are exhorted to present their bodies to God as a living sacrifice, an act which the apostle calls 'reasonable service' (*λογικὴν λατρείαν*), perhaps meaning 'spiritual service' in contrast to the external service of Judaism (Ro 12¹).

(d) The Epistle to the Hebrews, treating chiefly of Christ and His work, does not devote much attention to the subjective side of religion. Still it exalts faith as the secret of spiritual power and heroism, and this faith involves the renunciation of self in accepting the help of God to do His will. Thus one instance is that of Moses, who gave up the treasures of Egypt, enduring 'as seeing him who is invisible' (He 11²⁷).

(e) St. Peter describes Christians as persons who were going astray but are now returned to the Shepherd and Bishop of their souls (1 P 2²⁵); and this return involves surrender to obedience, since the sheep of the flock follow their shepherd.

(f) In the Johannine writings the act of self-renunciation does not come forward so prominently on its own account as elsewhere in the NT; but it is even more completely involved in the requirements that correspond to the Divine side of religion than in the other apostolic writings. The new birth of which Jesus speaks to Nicodemus (Jn 3¹⁻⁸) requires the surrender of self in the abandonment of pride and self-sufficiency, in order that it may be experienced. To drink of the water of life, to eat the bread of life, to follow the Light of the World, are actions that require the abandonment of all claims to self-sufficiency. Then St. John demands faith as the great condition on our part for the reception of eternal life (1 Jn 5¹⁴). At the same time, in the prominence which he gives to this gift of eternal life as a present possession, it is plain that he does not teach any doctrine of the abandonment of the human personality for absorption in the Divine. W. F. ADENEY.

SEMACHIAH (שִׁמְכִיָּהוּ 'J' has sustained').—The name of a Korahite family of gatekeepers, 1 Ch 26⁷ (B *Σαβχιάδ*, A *Σαμαχίας*). It is not improbable that the same name should be substituted for **Ismachiah** (יִשְׁמָחִיָּהוּ 'J' sustaineth'; B *Σαμαχιάδ*, A *Σαμαχιάδ*) in 2 Ch 31¹³. See Gray, *HPN* 291, 295.

SEMEI (B *Σεμελ*, A *Σεμεί*), 1 Es 9³³ = Shimei of the sons of Hashum, Ezr 10³³.

SEMEIAS (B *Σεμείας*, A *Σεμείας*; AV Semei), Ad. Est 11² (LXX, A¹) = Shimei, the ancestor of Mordecai; cf. Est 2⁶.

SEMEIN (B *Σεμείν*, A *Σεμεί*; AV Semei), Lk 3³⁸.—The father of Mattathias in the genealogy of Jesus Christ.

SEMEIS (B *Σεμεϊς*, A *Σεμεις*; AV Semis), 1 Es 9³² = Shimei the Levite, Ezr 10³².

SENAAH (סֵנָאָה; B *Σαανά*, *Σαανάρ*, A *Σαανάρ*, *Σεννάδ*, *Ασάν*; *Senaa*).—Amongst the 'people of Israel' who returned from the Captivity with Zerubbabel were the 'children of Senaah.' Their numbers were 3630 according to Ezr 2³⁶, and 3930 according to Neh 7³⁸. The name occurs again, with the article, *has-Senaah* (Neh 3³), in connexion with the rebuilding of the walls of Jerusalem. The people of Senaah built the Fish-gate, and are mentioned next in order after the people of Jericho (cf. Ezr 2³⁴). From this it may perhaps be inferred that Senaah was in the vicinity of Jericho. In this case it may possibly be the village *Magdalsenna*, *Μαγδαλσεννά*, which Eusebius and Jerome (*Onom.*) place 7 M.P. north of Jericho.

In the lists in 1 Es. (5²³) the name is given as

Sanaas (AV Annaas; B Σανά, A Σανάς; *Anaas*), and the number of the children as 3330.

C. W. WILSON.

SENATE is the rendering of *γενοῦσα* in Ac 5³¹, where 'all the senate of the children of Israel' appears to be epexegetical of the preceding 'council' (συνέδριον). See also EPHEBUS, vol. i. p. 722^a, and SANHEDRIN. It is the Jewish 'senate' that is meant likewise by *γενοῦσα* in 2 Mac 1¹⁰ 44^a. The allusions to the Roman senate in 1 Mac 8^{17a} will be found handled in art. ROME, p. 306^b.

SENEH (סֶנֶה; Σενή; *Sene*).—One of two jagged points, or 'teeth of the cliff,'—the other being Bozez, between which the 'passage of Michmash' ran. It is mentioned in connexion with the exploit of Jonathan and his armour-bearer, and was to the south of and nearer to Geba than Bozez (1 S 14^a). Sench was possibly so called from the thorns (cf. *נֶחֱם* of Ex 3²⁻⁴, Dt 33¹⁶) which grew upon it (cf. 'the plain of thorns,' ἀκανθών αὐλῶν, near the village of Gabathsaul, Jos. BJ v. ii. 1). The name is retained in the *Wady Suweinit*, on the right bank of which, not far from *Jeba*, the rock Seneh must have been. A good description of the locality is given by Conder (*Tent-Work*, ii. 112-114). See also Robinson (*BRP*² i. 441).

C. W. WILSON.

SENI'R (סֶנִיר; *Savelp*; *Sanir*).—The Amorite name of Mt. Hermon (Dt 3^a), and one of the few Amorite words preserved in the Bible. In 1 Ch 5²³, Ca 4^a, Senir is apparently distinguished from Mt. Hermon, and probably designated a particular part of the Hermon range (so Driver, Buhl). In Ezekiel's lamentation for Tyre (27^a) the builders are said to have made planks of the 'fir trees of Senir,' and in 1 Chronicles Senir is given as one of the limits to which the children of Manasseh overflowed from Bashan. In an inscription of Shalmaneser, Hazael of Damascus is said to have made Mt. Sanir, the top of the mountain opposite Lebanon, into a fortress (Schrader, *KAT*² 210). The Arab geographers, as late as the 14th cent., also called Anti-Lebanon *Jebel Sanir*, and attached the name more particularly to that portion of the range near Damascus and between *Baalbek* and *Homs*. There was also a district of *Sanir* in which *Baalbek* was situated (Guy le Strange, *Pal. under the Moslems*, 32, 78, 79, 295-298). See, further, art. HERMON.

C. W. WILSON.

SENNACHERIB (סֶנְחֶרֶץ, Σενναχηρη, Assy. *Sin-akhi-erba*, 'the Moon-god has increased the brethren,' from which we may infer that he was not the eldest son of his father, Sargon).—Sennacherib succeeded Sargon on the 12th of Ab, B.C. 705. His first campaign was against Babylonia, where Merodach-baladan (or another prince of the same name) had reappeared. (See, however, MERODACH-BALADAN). After a reign of six months the latter was forced to fly for his life. Sennacherib made a certain Bel-ibni king of Babylon, and then turned against the Kassî or Kossæans in the western mountains of Elam. After this he swept Ellipi, north of Elam, with fire and sword. In B.C. 701 came the campaign against Palestine, which had rebelled after Sargon's death. Lulia (Elulæus), king of Tyre, fled to Cyprus, and Sidon and other Phœnician cities were sacked by the Assyrians, Ethbaal being appointed king of the country. Ashdod, Ammon, Moab, and Edom now sent tribute, Judah with the dependent Philistine cities of Ashkelon and Ekron alone holding out. Ashkelon and Ekron were captured, and Hezekiah was compelled to restore to the throne of the latter city the anti-Jewish prince Padi, who had been imprisoned in Jerusalem. The Egyptians, now ruled by the Ethiopian Tirhakah, came to

the help of Hezekiah, but they were defeated at Eltekeh and driven back. Sen. thereupon swept the country of Judah, capturing 46 fortresses and carrying into exile 200,150 persons. While he was besieging Lachish, Hezekiah sent rich presents to him, in the vain hope of buying off his attack. The presents consisted of 30 talents of gold, 800 talents of silver, precious stones, couches and seats inlaid with ivory, girls and eunuchs, male and female musicians (?). But all was of no avail: Lachish was taken and plundered, and the Rabshakeh or Vizier sent a letter to Hezekiah demanding the surrender of his city (2 K 19^{ff.}). Then came the catastrophe, which obliged Sen. to leave Judah without punishing his rebellious vassal, and over which he draws a veil of silence in his annals. The events and the date of this campaign are fully discussed by Prásek in a series of articles in the *Expos. Times*, xii., xiii. (1901-2). Prásek contends that there were two campaigns of Sennacherib to the West and against Judah.

The following year he again entered Babylonia, of which he made his son Assur-nadin-sum king, and drove Merodach-baladan out of the marshes. A few years later he had a fleet of ships built on the Euphrates, at Til-Barsip near Birejik, which he manned with Ionians and Phœnicians. They then sailed across the Persian Gulf to the mouth of the Eulæus, where the followers of Merodach-baladan had taken refuge, and burnt and plundered the Chaldean colony. In return for this Assur-nadin-sum was carried off to Elam, and the Elamites made Nergal-yusezib king in his place (B.C. 694). The usurper was defeated and captured by the Assyrians, but with little result, since the Elamites remained all-powerful in Babylonia for a time. In B.C. 691, however, Sen. again marched into the country. At the battle of Khalulê the Bab. and Elamite forces were obliged to retreat after a hard-fought day, but two years more were required before Babylonia could be finally subdued. Sen. had already attempted to invade Elam, but the winter had set in before he began his march, and the snow obliged him to return. At last, in B.C. 689, Babylon was taken and razed to the ground, and the canal Arakhtu, which flowed by it, was choked with its ruins.

On the 20th of Tebet, B.C. 681, Sen. was murdered by his two sons (2 K 19³⁷). The deed seems to have been prompted by jealousy of their brother Esarhaddon, who was at the time conducting a campaign against Ararat. For 42 days the conspirators held Nineveh; then they were compelled to fly to the king of Ararat and seek his aid against their brother. (The subject of the assassination of Sennacherib, and esp. the question whether this was the work of one or of two of his sons, is treated in art. SHAREZER, No. 1).

Sen. was vain and boastful, with none of the military skill and endurance which distinguished his father. He built the palace of Kouyunjik at Nineveh, 1500 ft. long by 700 ft. broad, and restored a second palace on the mound of Nebi-yunus. He constructed brick embankments along the sides of the Tigris, and repaired the ancient aqueducts which had gone to decay. To him also was due the great wall of Nineveh, 8 miles in circumference.

A. H. SAYCE.

SEORIM (סְוֵרִים; B Σεωρη, A Σεωρη).—The name of the fourth of the twenty-four classes of priests, 1 Ch 24⁸.

SEPARATION.—For 'separation' in the sense of *נֶחֱם*, see artt. RED HEIFER, p. 208^b, UNCLEANNES, and in sense of *נָזִיר* art. NAZIRITE.

SEPHAR (סֶפָרָה [with ה locale]; LXX A Σωφῆρα),

Gn 10³⁰.—Given as a limit of the territory occupied by the Joktanides, and apparently identified with the Eastern mountain. This place is ordinarily identified (since the time of Fresnel, *op. Ges. Thes.*) with Zafār, the name of two places of importance in S. Arabia—one of them the capital of the Himyarites, near San'a in Yemen, the other a coast town in the district of Shihir, to the extreme east of Hadramaut, and, indeed, a place, from its situation with regard to Hadramaut and the great Dahna, likely to serve as a landmark. So in the *Taj al-arus* (iii. 370) this place is said to be 'at the extreme end of Yemen.' Wellsted (*Travels*, ii. 153) says of it: 'Dofar is situated beneath a lofty mountain; the country around is well cultivated, but it only deserves to be called 'a miserable village.' Apparently, then, with the depopulation of S. Arabia that has gone on for some centuries, the place has declined from the importance which the Arabic geographers sometimes assign to it. Against this identification Glaser (*Skizze*, ii. 437) urges that we cannot prove Zafār to have existed at so early a period; but we also have no record of its foundation. The representation of the Arabic Z by ʔ is surprising, but scarcely constitutes a serious objection, when the situation of the place corresponds so well with what the Biblical writer intends.

D. S. MARGOLIOUTH.

SEPHARAD (ספרד; BA 'Eppadā, ʔa Sappadā, ʔa Sappadā; Vulg. in *Bosporo*).—Ob²⁰ speaks of Jews who were in captivity in the land of Sepharad. Sepharad or [see Driver, *LOT* 320] *Sēphārēd* is the Sapardā of the Assy. inscriptions, who, in concert with the Kimmerians, Medes, and Minni, attacked Assyria in the reign of Esarhaddon. Their allies would seem to indicate that they came from the north-east of Assyria; but in the inscriptions of Darius Hystaspis at Behistun and Naksh-i-Rustem the province of Sparda is named between Egypt and Ionia in one instance, and between Cappadocia and Ionia in another. A Bab. inscription (Rm. 710. 31, 36) states that in 'the 37th year of Antiochus and Seleucus, the 9th day of Adar, the governor of Chaldea and an officer of the king, who had gone to the country of Sapardu in the previous year to meet the king, returned to the city of Seleucia.' We may gather from this that the district was in the northern part of Asia Minor, though, in the annals of Sargon, Sapardā is placed to the east of Assyria. The Targum of Jonathan identified Sepharad with Spain, probably in consequence of the similarity of the name to that of Hesperis; hence the Spanish Jews are at present known as Sephardim, as distinguished from the Ashkenazim or German Jews. See, further, art. OBADIAH, vol. iii. p. 579^b. A. H. SAYCE.

SEPHARVAIM (ספרבאי; LXX A has in all the passages in Kings Σεφραβαιμ, B has in 2 K 17²⁴ Σεφραβαιμ, in v.³¹ [where MT is dub.] Σεφραβουιν, in 18³⁴ Σεφραβουαμιν, in 19¹³ Σεφραβουαμιν; in the Isaiah passages B has 'Eφραβουαμ, A Σεφραβειμ).—The 'two Sippars,' a city of Babylonia, called in the cuneiform inscriptions 'Sippar of the Sun-god' and 'Sippar of Anunit.' Sippar of the Sun-god was discovered by Hormuzd Rassam in 1881 at Abu-Habba on the Euphrates, 16 miles S.E. of Baghdad. A large quantity of valuable monuments and tablets have been found in the ruins of the temple of the Sun-god, which was termed Bit-Uri by the Semites, E-Babara by the Sumerians. The Sumerian name of Sippar was Zimbar. Among the colonists transplanted to Samaria were men of Sepharvaim (2 K 17^{24, 31}), and the capture of Sepharvaim by the Assyrians is referred to in 2 K 18³⁴ 19¹³, Is 36¹⁹ 37¹³. According to Berosus, Xisuthros, the Chaldaean Noah, buried the records

of the antediluvian world at Sippara, as it was called by the Greeks. Abydenus (*Fr.* 9) states that Nebuchadnezzar excavated a great reservoir there; and Pliny (*HN* vi. 30) affirms that Sippar (which he calls 'oppidum Hipparenorum') was the seat of a university. In the reign of Nabonidos the camp of the Bab. army was just outside its walls, under the command of 'the king's son,' and the fall of Sippar followed immediately upon the decisive battle at Opis, which laid Babylonia at the feet of Cyrus.* A. [Abbreviations in this article:—G=Gr. Text of OT; H=Heb. Text of OT; Lag.=Lagarde; SSt.=Lag. *Septuaginta-Studien*; St.=Nestle, *Septuaginta-Studien*; Sw.=H. B. Swete, *An Introd. to the OT in Greek* (Cambridge, 1900); Urt.=*Urtext und Übersetzungen der Bibel* (Leipzig, 1897, being a reprint of the art. 'Bibeltext und Bibelübersetzungen' in Herzog's *RE*);].

i. IMPORTANCE.—The Greek version of the OT, called Septuagint, is in most respects by far the most important version of the Bible treated in this Dictionary. To the Fathers of the Greek Church it appeared of such weight that they praised the Septuagint with one accord as a token of the special providence of God, as a link in the Divine dispensation for the salvation of mankind, seeing in it the work of direct inspiration, and placing it in a line with the writings of the prophets and the preaching of the apostles (cf., for instance, Irenæus [III. xxi. 4], 'unus enim et idem spiritus Dei, qui in *Prophetis* quidem præconavit, quis et qualis esset adventus Domini, in *Senioribus* autem [i.e. the Seventy Elders, to whom this version was ascribed] interpretatus est bene, quæ prophetata fuerant, ipse et in *Apostolis* prædicavit).

The various claims which call for careful attention to the LXX are, perhaps, best summed up in the second edition of it published in England (Cambridge, 1665, 12°), by John Pearson, afterwards bishop of Chester:† 'The LXX is useful and even necessary (*utilis atque necessaria*): (1) ad Hebraicam veritatem probe perspicendam; (2) ad auctoritatem testimoniorum Apostolicorum confirmandam; (3) ad nativum Novi Fœderis stylum recte intelligendum; (4) ad Græcos Latinosque patres rite tractandos; (5) ad scientiam denique linguae Græcæ ipsamque criticism adornandam: quis eam doctis omnibus, præsertim theologis non videt esse commendatissimam?‡

* [The identification of Sepharvaim with Sippar, which has the weighty support of Schrader (*KAT* 279 [COT¹ i. 271 f.]), has been challenged by Halévy (*ZA* ii. 401 ff.), who would identify it with *Shabaraïn*, a place subdued by Shalmaneser iv. (B.C. 727–722). Halévy suggests that the same place is meant by the *SHIBRAIM* of Ezk 47¹⁶. See, further, the Comm. of Bertholet or Kittel on *Kings*, and of Dillm.-Kittel on *Isaiah*, ad locc.—Ed.]

† The preface of his edition has been frequently repeated—1683, 1694, 1707, 1730, 1831, 1843; at last separately, Cambr. 1855, cum notulis Ed. Churton [by Prof. W. Selwyn].

‡ Comp. in Sw. chs. 2–5 of part iii. on the Literary use and Value of the LXX, p. 433: 'No question can arise as to the greatness of the place occupied by the Alexandrian version in the religious life of the first six centuries of its history. The LXX was the Bible of the Hellenistic Jew, not only in Egypt and Palestine, but throughout Western Asia and Europe. It created a language of religion which lent itself readily to the service of Christianity, and became one of the most important allies of the gospel. It provided the Greek-speaking Church with an authorized translation of the OT, and, when Christian missions advanced beyond the limits of Hellenism, it served as a basis for fresh translations into the vernacular.

'The LXX has long ceased to fulfil these or any similar functions. . . . On the other hand, this most ancient of Biblical versions possesses a new and increasing importance in the field of Biblical study. It is seen to be valuable alike to the textual

ii. NAME.—The name 'Septuagint' is shortened from *secundum* or *iuxta Septuaginta* (*interpretes* or *seniores*), and is based on the legend that the translation of the OT from Hebrew into Greek was made by seventy, or more exactly seventy-two, elders or scholars, whom king Ptolemy Philadelphus, by the advice of his librarian Demetrius Phalereus, sent for for this purpose, from the high priest Eleazar of Jerusalem.

κατα τῶν ἰδρυμένων stands in the subscription to Genesis in Codex B; κατὰ ἰδρυμένους stands at the end of Proverbs in C; ἡ τῶν ἰδρυμένων ἰδρυσις in the note of Q before Isaiah; ἡ τῶν ἰδρυμένων ἰδρυσις (or ἰδρυσις), and shorter ἡ ἰδρυσις (or ἰδρυσις), became a common expression, especially subsequent to the labours of Origen in textual criticism (*ad Africanum*, § 5, τῶν ἰδρυμένων τῶν ἰδρυμένων; in Mt. xv. 14, κατὰ τῶν ἰδρυμένων; see Hezazla, ed. Field, i. p. xlviii ff.; and the 'testimonia' at the end of Wendland's edition of Aristeas).

Augustine (*de Civit. Dei*, xviii. 42=Eugippius, p. 1018, Knoell) writes: 'post ille (Philadelphus) etiam interpretes postulavit: et dati sunt septuaginta duo, de singulis duodecim tribubus seniores homines, linguae utriusque doctissimi, Hebraeae scilicet atque Graecae, quorum interpretatio ut Septuaginta vocetur, iam obtinuit consuetudo.' Where and when the word 'Septuagint' first makes its appearance in English we cannot tell.* On title-pages of editions it occurs subsequent to the editio Sixtina of 1587: ἡ παλαιὰ διαθήκη κατὰ τοὺς ἑβδομήκοντα, *Vetus Testamentum iuxta Septuaginta* (in the reprint of Paris, 1628: *secundum LXX*). The London reprint of 1653 adds *Interpretum*, writing *ex versione Septuaginta Interpretum*; and this has been retained in all following reprints.

An edition of Bagster (1821) is entitled, *secundum Septuaginta Seniorum interpretationem* (=Irenaeus, iii. xxi. 2, ἰδρυμένων πρεσβυτέρων, in Latin *septuaginta seniores*).† The English form 'Septuagint' occurs in the title of an edition of Bagster, as well as in that of the Cambridge edition of Swete (*The OT in Greek according to the Septuagint*), and the great Oxford Concordance of Hatch-Redpath (*A Concordance to the Septuagint and the other Greek Versions*). The *Dictionnaire de l'Académie Française* 2. 7 gives only the plural, *Les Septante*, la version des Septante, la traduction des Septante.‡

In English as in German it became common to use the word as singular, supplying 'version,'

critic and to the expositor, and its services are welcomed by students both of the Old Test. and of the New.

From this point of view, Prof. Ferd. Hitzig of Heidelberg, one of the acutest commentators on the OT, used to open his academic courses on OT exegesis with the question to his students: 'Gentlemen, have you a Septuagint? If not, sell whatever you have, and buy a Septuagint.'

Even the student of early English cannot succeed without a knowledge of it. When he reads in king Ælfred the word to the serpent (Gn 314), 'on dinre wambe *ond on átnum breostum* du scealt snican,' he ought to know that the words in italics go back through the medium of the Old Latin Bible to the LXX, and that it is therefore out of place to print beside them the Latin Vulgate of Jerome, which rests on the Hebrew, as has been done by A. S. Cook, *Biblical Quotations in Old English Prose Writers* (London, 1898; cf. the notice of Max Foerster in *Englische Studien*, xviii. p. 421). The English Church retained substantially the LXX in the Prayer-Book version of the Psalms and in her Liturgy.—No words of praise are spared by E. W. Grinfield (*Apology*): he calls the LXX the viaduct between the OT and NT, the vestibule of the Christian Church, the first interpreter of the OT and the sole canonical of the NT, the bond of union between Jews and Gentiles, the morning star before the sun of righteousness, the key of the sacred treasury, the light of the Alexandrian Pharos, the sacred amalgam; he who studies the LXX is declared to be in no danger of falling into neology (p. 173). Grinfield also rightly refers to the introduction of its study by Maltby at Durham, Arnold at Rugby; to its recommendation by great philologists like Valckenaer, Heinaius (*Vos exemplaria graeca*, etc.).

* On book titles cf. W. Wall, *The Use of the Septuagint Translation*, 1780; Charles Hayes, *A Vindication of the History of the Septuagint*, 1786; *Letters to a Friend concerning the Septuagint*, 1789; H. Owen, *An Enquiry into the Present State of the Septuagint Version of the OT*, 1799. Grinfield (*Apology*, p. 157) uses the adjective 'Septuagintal MSS,' and calls Bp. Pearson (p. 177) 'the best Septuagintalist.'

† The adjective 'septuagintaviralis' we have found in titles of dissertations since 1631, 1706, etc.

‡ In Italian, 'La Versione de Settanta,' 'I Settanta.'

'Übersetzung,'* though of course the plural is also used, especially when *Septuaginta* is translated into the vernacular, 'the Seventy,' 'die Siebenzig.' Many scholars now prefer 'the Alexandrian' or 'the Greek version of the OT,' or 'the OT in Greek.' We retain here the familiar name 'Septuagint,' for which 'LXX' has been hitherto the usual abbreviation, but for which the modern sign Ⓔ† is still more convenient.

A frequent designation among the old Greek writers was also ἡ κοινὴ ἐκδοσις, or merely ἡ κοινὴ, 'the common, the Vulgate edition,' in contradistinction to the Hebrew text and the later Greek versions; cf., for instance, Basil, i. 447 D, on Is 22 ἐν τοῖς ἀντιγράφοις τῆς κοινῆς ἐκδόσεως οὐ κείται ταῦτα, ἀλλ' ἐν τῷ Ἑβραϊκῷ κείμενον ἐκ τῶν Λατῶν μετεκομίσθη. In the writings of Jerome ἡ κοινὴ has a more definite signification assigned to it, on which see p. 445^b. Other designations are: ἡ ἐκκλησιαστικὴ ἐκδοσις (Gregory of Nyssa, in *Psalm*, 8); τὰ ἀντίγραφα τῆς ἐκκλησίας (Origen); τὰ ἡμέτερα ἀντίγραφα (Eusebius, in *Psalm*, ed. Mai, 591).

iii. ORIGIN AND HISTORY OF THE LEGEND.—The story that there were seventy (or rather seventy-two) translators was first told by Aristeas, who claims to have been one of the ambassadors sent by Philadelphus to the high priest Eleazar of Jerusalem, to ask from him the copy of the Law and the men to translate it.

This interesting piece of literature was published first in Latin in the famous Roman Bible of Sueynheym and Pannartz (1471, fol.), reprinted at Nurnberg, 1475; separately at Erfurt, 1483. The editio princeps of the Greek text was prepared by Simon Schard, printed at Basle 1561; subsequent editions, 1610, 1691, 1692, 1705 (Hody), 1849 (Oikonomos), 1869 (Moritz Schmidt in *Merx, Archiv*, i.); all superseded by that of Mendelssohn-Wendland (*Aristeas ad Philocratem epistola* . . . Lipsiae, Teubner, 1900), and that of H. St. J. Thackeray in the Appendix to Swete's *Introduction to the OT in Greek* (Cambridge, 1900). L. Mendelssohn had begun to add a commentary, only a part of which appeared after his death, edited by M. Kraschennikow, Jurievi (ol. Dorpati), 1897. A German translation (by P. Wendland) opens the second volume of *Die Apokryphen und Pseudepigraphen des Alten Testaments übersetzt*. . . u. herausgegeben von E. Kautzsch (Tübingen, 1900, ii. 1-31).

Fresh investigations are necessary; for though it is now generally acknowledged that the letter is a literary fiction,—Constantine Oikonomos (*περὶ τῶν ο' ἐρμηνευτῶν τῆς παλαιᾶς διαθήκης*, βιβλία δ', Athens, 1844-1849, 4 vols.; cf. also E. W. Grinfield, *An Apology for the Septuagint, in which its claims to Biblical and Canonical Authority are briefly stated and vindicated*, London, 1850) is the last defender of its genuineness,—scholars disagree entirely about its date and value. E. Schürer places it not later than c. 200 B.C.; Herriot (on Philo), c. 170-150; Wendland, between 96 and 93, nearer to 96; L. Cohn (*Neue Jahrbücher für das klass. Altert.* i. (1898) 521 ff.) doubts whether it was used by Philo; H. Willrich (*Judaica*, Göttingen, 1900, pp. 111-130) brings its composition down to 'later than A.D. 33.'

Strange, above all, are the varieties of form

* At one time it was common in German to speak of the '70 Dollmetscher'; cf. J. D. Michell, *Programma worinne er von seinen Collegis über die 70 Dollmetscher Nachricht giebt* (Gött. 1767); the translation of Owen's *Enquiry* (*Untersuchung der gegenwärtigen Beschaffenheit der 70 Dollmetscher*, 1773). Lessing seems to have formed the noun 'Siebziger' (see Grimm, *Deutsches Wörterbuch*, x. 834); in Old German we read in Isidore, 7. 4, in *dhro nibunzo tradunum* = 'in translatione LXX.'

† It is strange that Lic. Kabisch (*Religionsbuch*, i. Göttingen, 1900, p. 2) finds the sense of the name obscure, and thinks of connecting it with the legend of the 70 hidden (or apocryphal) books in 4 Ezra (2 Esdras).

which the story assumes in the writings of Epiphanius, though he refers to Aristaeas as his authority. He makes the number of books in the Alexandrian Library '54,800 πλεον ἢ ἐλάσσω,' Aristaeas 'more than 20 myriads'; he has two letters of Philadelphus, and in one of them the saying from Sir 20²⁰ 41¹⁴ θησαυροῦ κεκρυμμένου καὶ πηγῆς ἐσφραγισμένης τίς ὠφέλεια ἐν ἀμφοτέροις. He alone, and that only in the Syriac text as first published by Lagarde (*Symmicta*, ii. 148 ff.), states that it was 'the seventh year of Philadelphus, more or less,' when the translation took place. He makes the translators work by pairs in 36 different cells, and originated the statement, repeated as late as 1587 in the preface to the Sixtina, that this happened 'trecentis uno plus annis ante Christi adventum' (cf. Sw. p. 176; Wendland, 153, 159; Nestle, *Sst.* i. 12). Draeseke believed that Epiphanius drew from the lost chronicle of Justus of Tiberias, and that Augustine was dependent on Epiphanius; but this has been refuted by Wendland (*Rheinisches Museum* 56, i. 112 ff.). On the use made of this story by Philo, Josephus, and the ecclesiastical writers see Sw. 12-17, and especially the 'testimonia' in Wendland's edition, pp. 85-166.* That the number 70 and the legend of their wonderful harmony may be due to Ex 24¹¹, where *Ex* reads καὶ τῶν ἐπιλέκτων τοῦ Ἰσραὴλ οὐδὲ διαφώνησαν οὐδὲ εἰς, was first pointed out by Daniel Heinsius in the *Aristarchus sacer*, ch. 10.

As the year in which the translation originated, other ecclesiastical writers give the 2nd, 17th, 19th, or 20th year of Philadelphus; in the *Chronicle* of Eusebius the MSS vary between the years 1734, 1735, 1736, or 1737 of Abraham (see Walton's *Prolegomena*). As the day, the Jews name the 8th of Tebet; according to the letter of Aristaeas the arrival of the interpreters coincided with the day of a great naval victory of Philadelphus in the war against Antigonus, and was ordered to be celebrated for ever. Rabbinical Jews called that day the fast of darkness, for they regarded this translation as a national disaster, 'like the day on which the golden calf was made' (see D. S. Margoliouth, 'The Calendar of the Synagogue,' in the *Expositor*, Nov. 1900, p. 348 f.). Philo relates that in his time the Jews of Alexandria kept an annual festival, τὸ χωρίον σεμνονοῦντες, ἐν ᾧ πρῶτον τὰ τῆς ἐρμηνείας ἐξέλαμψε καὶ παλαιὰς ἐνεκεν εὐεργεσίας δι' ἐκείνης ἐχαριστήσαντες τῷ θεῷ. He knows that the interpreters, before they began, asked God's blessing on this undertaking, ὁ δ' ἐπινεύει ταῖς εὐχαῖς ἵνα τὸ πλεῖον ἢ καὶ τὸ σύνπαν γίνωσι τῶν ἀνθρώπων.

* That the preservation of Aristaeas goes back to the library of Caesarea has been suggested by Wendland. It may have had a place in one of the Bible MSS issued by Eusebius and Pamphilus.—Add to the 'testimonia' collected by Mendelssohn-Wendland the strange statement from pseudo-Eusebius on the Star (publ. by W. Wright in *Journal of Sacred Literature*, 1866, vol. ix. 117, x. 150), that the version was made under a king Ἀρταξέρξης [= Artaxerxes?]; and the notice, translated from Greek into Syriac at the end of the Fourth Book of Kings in the Syro-Hexapla, that the men came from Tiberias (*Origenis fragmenta*, ed. Lagarde, 355; *Bibliotheca Syriaca*, 254). Cf. further the notice of F. Nau on 'Fragment d'une chronique Syrienne Maronite' (*Revue de l'Orient Chrétien*, iv. [1899] 318), in which the names are given of the 72 translators who produced 36 identical versions. Nau has not printed the names. See on the names: *The Book of the Bee*, by Salomo of Basra, ed. by A. Wallis Budge (*Anecdota Oxoniensia, Semitic Series*, vol. i. part ii., Oxf. 1886, 4° p. 1201.). The last but one of the interpreters has the strange name Ἀβιήτης in the Greek text, Ἀβιή in one of the Syriac lists, Ἀββῆ in another. If this stands for the Latin name *Abitus*, the list would be late. But this identification is rather uncertain. An Arabic chronicle combines the two figures 72 and 70 by the supposition that two of the interpreters died on the way. On the Jewish notices about the origin of the version and its (13) deviations from the Hebrew text, see the literature quoted in *Urt.* p. 63, and by Oikonomos, ii. 558, iii. 43. Zosimus Panopolitanus (*de Zythorum confectione*, ed. Gruner, 1814, p. 5) relates that Simon the high priest of Jerusalem sent to Ptolemy Lagi, Ἐρμῆν, ἃ ἡμεῖς ποιεῖν τὴν Ἑβραϊκὴν ἀλλήλων καὶ αἰγυπτίαν (Oikonomos, ii. 328).

ὠφελήθη χρησόμενον εἰς ἐπανόρθωσιν βίου φιλοσόφους καὶ παγκάλους διαπάγμασι.

This aspiration was fulfilled when the work became one of the chief aids to the spread of Christianity. As this was at the same time the first attempt made on a larger scale, in the domain of Græco-Roman or Mediterranean culture, to translate a literary work from one language into another, it is the more interesting to ask whether this attempt, as the above story relates, was due to the literary interest felt by a bibliophile king—φιλόκαλος καὶ φιλόλογος, as he is styled by Epiphanius*—or to the wants of a religious community. The latter view now generally prevails (cf. Wendland in Kautzsch, *Pseudepigraphen*, ii. 1; *ZNTW* i. 268). A third view is, that the undertaking was intended as an aid to Jewish propagandism. This explanation may find some support in the words of Philo (who expresses the hope that these laws will obscure those of the other nations, as the rising sun obscures the stars), and in the very first document which speaks of *Ex*, namely the prologue of the Bk. of Sirach (compare the whole, especially ἀλλὰ καὶ τοῖς ἐκτὸς δύνασθαι τοὺς φιλομαθοῦντας χραιομένους εἶναι λέγοντας καὶ γράφοντας).

This last passage is also the first to speak of all three parts of the Hebrew Bible (*νόμος, προφήται, καὶ τὰ ἄλλα πάτρια βιβλία*) as already extant in Greek; Aristaeas, Philo, and Josephus restrict their language to the Law, a fact to which Jerome emphatically called attention. If the LXX version was due to the wants of the synagogue, it is all but certain that the Torah was the first part translated. How soon and in what order the other parts of the OT were overtaken is not made out; nor has even the question how many different hands may be distinguished in the present collection yet been sufficiently investigated. Two books only contain a notice bearing on this point.

(1) *Esther* (see Jacob, *ZATW*, 1890, 241 ff.; Willrich, *Judaica*, Gött. 1900, 2 ff.; art. *ESTHER*, vol. i. 744). Willrich thinks that the fourth year of Ptolemy and Cleopatra, in which a priest and Levite, Dositheus and his son Ptolemy, are said to have brought τὴν προκειμένην ἐπιστολὴν ἣν ἔφασαν εἶναι καὶ ἐρμηνευμένα Δυσίμαχον Πτολεμαῖον τῶν ἐν Ἱερουσαλὴμ (*Est* 11¹), was not that of Philometor (B.C. 166-165) nor of Soter II. (B.C. 114), but that of Ptolemy XIV. (B.C. 48-47); but this seems very doubtful.

(2) The second note, which is equally obscure, stands at the end of *Job* (in Cod. A even twice, with strange variations): οὗτος ἐρμηνεύεται ἐκ τῆς Συριακῆς βίβλου (cf. art. *JOB*, vol. ii. 660, where it is translated, 'this man is described in the Syriac book as living,' etc.).

In accordance with the usage of the ancient Church, we include in this article not only those books, the original of which was or is in the Hebrew Bible, but also those which were originally written in Greek, as the Wisdom of Solomon, or not received into all MSS or editions, as the Prayer of Manasses. In an appendix we shall refer briefly to similar literary productions, as the Psalms of Solomon, the Bk. of Enoch, and other 'Pseudepigrapha' (see p. 450^b).

As *Ex* was the Bible of the Early Church, it has a most intricate and complicated history; it seems practical to begin with the history of the printed text, and to work our way backward as far as possible.

iv. PRINTED EDITIONS.—Long before the first edition of the New Testament in Greek appeared in print, a Greek and Latin Psalter was printed in Milan as first part of *Ex* (20th Sept. 1481), containing among the Canticles at its end the Magnificat

* On the notice of Aristobulus (Clement Alex. *Strom.* i. 22; Euseb. *Præp. Ev.* 13. 12), see Schürer³, iii. 384-392.

and Benedictus from Lk 1⁴⁶⁻⁶⁸. On the following editions of the Greek Psalms (Venice, 1486; Aldus [without date, c. 1497]; the Polyglot Psalters of Justiniani, Genua, 1516, and Potken, Cologne, 1518), see *Sst.* iii. 7. 30-32. The first complete edition was the *Complutensian Polyglot* of Cardinal Ximenes (1514-17; the OT finished 10th July 1517), in which the Latin Vulgate is placed between the Hebrew on the left and *℣* on the right, 'tanquam duos hinc et inde latrones, medium autem Jesum.'

See on it Sw. p. 171; Nestle, *Introd.* to *Textual Criticism of NT*, p. 1. On the 'Spanish Greek' of this Bible, i.e. the places in which the editors translated passages missing in their Greek MSS for themselves into Latin, see *Urt.* 64, and Field's edition of 1859, *Append.*; Ceriani on *Cod. Marchalianus*, *Eck* 337.

Its text—best signature *c*—rests chiefly on the MSS lent by the Vatican, Ho 108, 248,* and a copy of the Venice MS Ho 68.

The Complutensian was reprinted (1) by Arias Montanus in the Antwerp Polyglot of Plantin, 1569-72; (2) in Wolder's Polyglot, Hamburg, 1590; and (3) in the greatest of all, that of Michel le Jay, Paris, 1645. On (1) and (3) see Nestle, *Introd.* 101.

The second great Greek Bible was that of Aldus Manutius and his father-in-law Andreas Asolanus (1518, mense Februario),—signature *a*,—based, as the editor states, 'multis vetustissimis exemplaribus collatis'; as far as is ascertained as yet, on the Venice MSS 29, 68, 121. An interesting commentary on this edition is Steuchi Augustini Eugubini, *VT ad Heb. veritatem collata editione Septuaginta interprete*, Ven. 1529, 4°.

This was reprinted (1) 1529 by Joh. Lonicus, Strassburg, in the Lutheran order, with the addition of 4 Mac. [Ed. Pr.] and various readings from Ho 44; (2) 1546, at Basle, with Preface of Melancthon, various readings and restoration of the common order in Proverbs and Sirach; (3) 1560, at Basle; (4) in the Heidelberg Polyglot 'in officina Santandreana,' edited by B. O. Bertram, 1581[67] (new title-pages, 1599, 1616); (5) 1597, by Franciscus Junius (du Jon; others say Fr. Sylburg), with alterations from *c*, and useful notes, the basis of the Concordance of Trommius; (6) 1687, by Nic. Glykas, Venice.

The third and best edition was that printed at Rome, 1586 (most copies by pen, 1587; signature *b*), 'auctoritate Sixti V. Pont. Max.', based chiefly on the Codex Vaticanus *κατ' ἐξοχήν* (1209 = Ho II., now B), but making use of the preceding editions, *a c* 1526, 1545, 1572, and of the MSS Ho 16, 23, 51.

The prefatory matter is reprinted (partially) by Bretinger, Tischendorf, and others, and recently by Swete, *Introd.* Useful are the 'Scholia' at the end of most chapters from the other Greek versions, and the Church Fathers; and an important complement is the Latin translation, published 1588, patched up by Flaminius Nobilius (and others) from the fragments of the Old Latin (vol. iii. 53*), with additional Notes to the Greek Text.

Reprints: (1) Paris, 1628, by Joh. Morinus, together with the Latin of Nobilius, as even then copies were rare; (2) 1653, London, R. Daniel, 4° and 8° (and Cambridge); (3) 1667, in the London Polyglot of Brian Walton, with useful additions (collations from A, D, G, Ho 60, 75), and valuable Prolegomena, the latter reprinted by Wingham, Camb. 1823, in 2 vols.; (4) 1665, Cambridge, with the fine Preface of J. Pearson (see above); (5) 1688, Amsterdam,†; (6) 1697, Lipsie (prepared by Johannes Frick); (7) 1709, Frankfurt, by Boe, source of many reprints; (8) 1725, Amsterdam, by Mill* (facsimile of cod. G and variants collected by Vossius, Ho 133); (9) 1730, Lips., Reineccius*; (10) 1759-62, Halle*; (11) 1796-1827, Holmes-Parsons (see below); (12) 1805, Oxford*; (13) 1817, Oxford*, 6 vols., with Pref. of J. G. [not B., as on the title] Carpoz, and variations from A; (14) Londini (without date), in *edibus Valpianis** (905 pp.); (15) 1821, Lond., Bagster† (very small print, 585 pp.); (16) Lond., Bagster* (without date, with an English translation, 1130 pp.); (17) 1822, Venice, Michel Glykas, 3 vols. (not seen); (18) 1824, Lipsie, van Ess*, and often; 1887, with Prolegomena and Epilegomena; (19) 1831 (Glasgow)†; 1843, Londini, Tegg; two very small vols., 667, 703 pp.†; (20) 1839,

Paris, Didot-Jager*, also Greek and Latin; often; (21) 1848, Oxford*, 3 vols.; 1875, improved in 4 Mac.; the latter reprint is the basis of the Concordance of Hatch-Redpath; (22) 1850, Lipsie, Tischendorf*, 6 80, 7 87, the last two reprints corrected and enlarged by collations of E. Nestle; (23) 1874-76, Londini, *Biblia Hezagiotta*†, ed. E. R. de Levante; § (24) the latest Polyglot advertised from Paris, to be edited by F. Vigouroux, printed by Didot, published by Roger & Chernovitz, has not been seen by the present writer. From notices in the periodicals (Vigouroux, *l'Univers*, 4th Nov. 1898; F. Nau, *Journ. Asiat.*, May-June 1899, 545 ff.; Fonck, *Zeitschrift für Kath. Theol.* xliii. (1899) 174-180; P. Th. Calmes, *RB*, 1900, 301, 302) it is apparent that it is only a mechanical reprint of the Greek column in the *Polyglottenbibel* of Stier and Thelle (1847-55), the text of which is based on unsound principles.

A merit of its own belongs to the fourth great edition which was begun by Ernest Grabe (†1712), and appeared in 4 vols. fol. or 8 in 8° at the Oxford University Press, only the first (Octateuch), 1707, and the fourth (Poetical books), 1709, during his lifetime, the second (Historical books), 1719, being finished by Fr. Lee, M.D., the third (Prophets), 1720, by W. Wigan, D.D., 'ex antiquissimo codice Alexandrino accurate descriptum et ope aliorum exemplarium ac priscorum scriptorum præsertim vero Hexaplaris editionis Origenianæ emendatum atque suppletum additis sæpe asteriscorum et obelorum signis,' with useful Prolegomena.

As the title indicates, Grabe followed a twofold plan: (1) to represent the text of the Codex Alexandrinus, and (2) to make his text at the same time correspond with the Hebrew text. This he accomplished by the use of smaller type for the changed and supplemented passages, placing the readings of the Codex in the margins, and inserting the critical signs of Origen.

Grabe's text was repeated (1) by Bretinger, Turici, 4 vols. 4°, 1730-32, compared with the Vatican; (2) by Reineccius in the *Biblia quadrilingua*, 1750, 1751; (3) in a Bible issued by the Holy Synod of Russia (Moscow, 1821), but without any attention to the meaning of the additions in small type, to the marginal readings and the critical signs, thus completely spoiling the work; and this is circulated δι' ὁλόκληρον τῆς ἀνατολῆς διακονοῦντες ἐν ὅλοις τοῖς ῥωσικοῖς καὶ παλαιῇ (διαβήν) κατὰ τοὺς ἰσθμικοῖς καὶ τοὺς ὡς εἰναι τὴν ἀκριβοῦς ὑποθέτοντες ἀρχαίον Ἀλεξανδρινὸν χειρογράφον, and was repeated, as the title states, (4) in τὴν ἐν Μόσχῃ . . . ἐκτυπωμένην ἀρχαίον Ἀλεξανδρινὸν Κώδικον, in an edition of 4 vols. printed at Athens, δακτύλῳ τῆς ἐν Ἀγγλῇ ἐταιρίας τῆς πρὸς διάδοσιν τῆς Χριστιανικῆς παιδείας (1843, 46, 49, 50). The 5th edition, based on Grabe, is that which Fr. Lee prepared for the same Society at Oxford, 1869, avoiding as much as possible the faults inherent in the conditions of the task enjoined on him: see his preface, and *Lag. Sst.* i. 5-8.

The result, so far, is, that we have up to the present day not a single edition of *℣* based upon sound critical principles; for even the two editions which remain to be mentioned have not yet attained this end. These two editions we owe to the two great universities of England—the *Vetus Testamentum Græcum cum variis Lectionibus*, ed. Robertus Holmes (. . . editionem a R. H. inchoatam continuavit Jacobus Parsons), Oxonii, 1798-1827, 5 vols. fol.; and *The Old Testament in Greek according to the Septuagint*, edited for the Syndics of the University Press by H. B. Swete (Cambridge, 1887-94, 1895-99, 3 vols. 8°).

As early as 1779, Joseph White published a letter to the Bishop of London, suggesting a plan for a new edition of the LXX. In 1788 R. Holmes appealed to the liberality of public bodies and private persons, and obtained such a response as enabled him to procure collations from all parts of Europe. On the history of this edition, see an appreciative article in the *Church Quarterly Review*, April 1899, 102 ff., and Sw. 184 ff. It was the greatest attempt ever made to bring together a critical apparatus; the list of MSS at the end of vol. v. numbers 311. Of Versions used were those in Arabic (several), Armenian, Bohemian, Coptic, Ethiopic, Georgian, Latin, Slavonic & Syriac; further, the quotations of the ancient writers from Philo and Josephus downwards. In spite of some points in the plan and in the execution of the work, which are open to criticism, it is a unique monument of the love to learning of the editor and his nation, and remains a storehouse of materials, indispensable to

* On this designation see below.

† Editions omitting the scholia are marked*, omitting the Apocrypha†; no edition without the scholia is to be recommended, because they supply to those who cannot afford to procure Field's *Hexapla* a minor edition of the latter.

§ The edition London, 1837 (ex editione Holmesii et Lamberti Bos, in 2 vols.), quoted by Sw. 182, from *Urt.* 67, seems identical with No. 19; whether the date 1819 given by *Urt.* 67, Sw. 182, for the edition of Valpy is correct, seems doubtful; it is taken from Grasse's *Tresor*, where editions are mentioned, Glasgow 1822, 18° (=No. 19), and London, 1827 (=No. 15†).

all who have to do with the OT in Greek.* The work as sold at present is divided into 5 vols. fol.: I. (Pent.) 1798, II. (Jos.-2 Chron.) 1810, III. (Ezra-Cant.) 1823, IV. (Proph.) 1827, V. (Apocr.) 1827; but it does not seem to have been published in this order (see Jac. Amerstorff, *De variis lectionibus Holmænanis locorum quorundam Pentateuchi Mosæici*, Lugd. Bat. 1815, p. 45).

The text in the work is a reprint of *b*; but, as it seems, after a copy of Bos, corrected, but not everywhere according to an original copy. Its value lies, therefore, exclusively in the apparatus.

The advance that has been made in the course of the 19th cent. upon the work of Holmes-Parsons is due, on the one hand, to the discovery of new materials—for instance, the Codex Sinaiticus—which led to an enriching of the apparatus; on the other hand, to greater exactness in using them, which was promoted especially by the progress made in the reproduction of MSS by the various methods of photography.

Of both advantages use was made in the *Cambridge Septuagint* (Sw. 188-190). The text is no longer that of *b*, but of B itself, given in the first ed. after the so-called (printed) facsimile-edition of Verellone-Cozza, revised for the second by Dr. Nestle, after the photograph of the Codex. In the apparatus the variants are given of such uncial MSS as have been published in a similarly trustworthy way; above all of the Codices Alexandrinus, Sinaiticus, Ambrosianus, Marchalianus. This text will be repeated in the larger *Cambridge Septuagint*, the joint editorship of which is entrusted to A. E. Brooke and N. McLean. Its apparatus will embrace the evidence of all uncial MSS and of a considerable number of cursives selected after investigation, with the view of representing the different types of text; the Old Latin, Egyptian, Syro-Hexaplar, and Armenian versions; and the quotations from Philo, Josephus, and the more important Christian Fathers.

It is clear that the manual and even the larger edition are but a step towards the ideal of a truly critical edition. For the text is that of a single MS with all its faults, while in the manual edition the grossest blunders are corrected only occasionally (e.g. Gn 6¹. 10 Χαφ. 10³¹ Σηθ, 32⁶ βες for παίδες; but not, for instance, 36³¹ ἱερουσαλὴμ for Ἰσραήλ, 37¹⁸ ἐπορεύοντο for ἐπονηρεύοντο, etc.). The present writer cannot but repeat his wish (see *Proceedings* of the 9th International Oriental Congress held in London, ii. (1892) p. 57 ff.) that at all places where the text of the MS, and, in consequence, of the edition, is clearly false, the better readings might be placed on the outer margin.† Thus the advantages of Grabe's plan would be secured and its disadvantages avoided; we should get at the same time a diplomatic reproduction of the MS, and a hint as to the true reading. The Octateuch, forming the first volume of the larger edition, may be expected, as we are informed (Sw. 189), in the course of a few years.

EDITIONS OF SINGLE BOOKS:—A. CANONICAL BOOKS:—

Genesis:—*Pentateuchus hebraice et graece*, ed. G. A. Schumann, Lips. 1829, 8°, only part i. (Genesis); *Genesis graece et latina editionis Sixtinae addita scripturae discrepantes et libri manu scripti a ne collatis et editionibus Complutensibus et Aldina accuratissime enotata*, ed. P. A. de Lagarde, Lips. 1868 (of permanent value for its introduction and its accuracy; collations from ADEFGS, 29, 31, 44, 122, 130, 135, abc).

Joshua:—*Joshua Imperatoris Historia illustrata atque explicata ab Andrea Masio*, Antv. 1574, fol., with new title-page 1609 (valuable for its introduction and its use of the Syro-Hexaplaric Version).

* Comp. on some faults in the new edition of the works of Philo, which would have been avoided by the use of Holmes-Parsons, *Philologus*, 1900, p. 259 ff.; or see Ulysse Robert in his Preface to the Latin Heptateuch of Lyon (1900, p. xxxi).

† To quote some of the examples pointed out in the paper mentioned—

Is 8²¹ text πάτρια, which is nonsense, for εἰδωτάριον, 'idols'; 1 Es 4⁴⁰ αὐτῶν for αὐτῶν; Ps 77 (78)³⁶ ἡγάπησας for ἡγάπησας; Sir 7¹⁸ 27¹ 42⁶ διαφύρου for διαφύρου; Sir 16²⁴ πρὶς for πρὶς, etc.

Judges:—*De graeca LXX interpretum versione Syntagma*, J. Usserli, Lond. 1655, 4°, in Ussher's Works, vol. vii.; *Liber Judicum sec. LXX interpretes*, ed. O. F. Fritzsche, Turici, 1867, 4°; P. de Lagarde, *Septuaginta-Studien*, i., 1891 (two texts of chs. 1-5); *The Book of Judges in Greek according to the text of Codex Alexandrinus*, edited . . . by A. E. Brooke and N. McLean, Camb. 1897. On a promised edition see G. F. Moore in the 'Internat. Crit. Comm.' on *Judges*, p. xlv.

Ruth:—By John Drusius, 'ad exemplar complutense', Franek. 1586, 8°, 1632, 8°; by L. Boe, Jena, 1788, 'secundum exemplar vaticanum'.

Psalms:—The Psalter is that book of the OT which was and is most used in the Church, especially in the Greek Church. In addition to the 32 editions mentioned in Sw. p. 192, there have come to the knowledge of the present writer editions of 1521, Venice (mentioned by Grabe, *Prolog. to Psalms*, ch. iii. § 3, as lent to him by the Bp. of Ely; but perhaps this may be a misprint for 1524; see *British Museum Catalogue of Bibles*, col. 390); 1525, Venice; 1545, 4 editions from Basle, Paris, Strassburg, Venice; 1548, Basle; 1584, Antwerp; 1605, Paris; 1652, London (different copies, with *Ψαλμῶν* and *Ψαλμῶν* on the title-page); 1673, Venice; 1700 (s.l. probably in Bucharest); 1706, in Montfaucon's *Collectio nova*, i.; 1740, Bianchini's *Psalterium duplex*; 1743, Venice; 1754, with the Commentary of Euthymius Zigabenus, reprinted 1857 in Migne's *Patr. Gr.* vol. 123; 1786, Paris; 1798, Constantinople; 1812, Baber, from Codex A; 1820, Venice; 1831 and 1835, London, *Bible Society*, with modern Greek; 1835, Smyrna; 1843, London, *Biblia Ecclesiae Polyglotta*; 1855, Jerusalem; 1873, Rome (3 editions).

Job:—From Codex A, by Patrick Young, in the *Catena* of Nicetas, 1637, Franeker, 1662 (63).

Proverbs:—1564, Draconites (Polyglot).

Ester:—Ussher, in his *Syntagma*, 1655, Works, vol. vii. (the two texts), repeated Leipzig, 1696; O. F. Fritzsche, Zürich, 1848, 1849 (two texts).

Hosea:—Pareus, Heidelberg, 1605; Philippeaux, Paris, 1636.

Joel:—Draconites, 1665.

Amos:—Vater, 1810, Halle.

Jonas:—Münster, 1524; Artopæus, 1543.

Micah:—Draconites, 1565.

Zechariah:—Draconites, 1565.

Malachi:—Draconites, 1564; Hutter, 1601.

Isaiah:—S. Münster, 1540, Polyglot; J. Curter, 1590, *Procopii Commentarii*.

Jeremiah:—S. Münster, 1540; G. L. Spohn, 1794, 1824.

Lamentations:—Kypser, 1552, *Libri tres de re gramm. Heb.* (Polyglot).

Ezekiel:—Ἰζακιὴ κατὰ τοὺς δ', Rome, 1840 (important).

Daniel:—(a) The received text: Melanchthon, 1546; Wells, 1716. (b) The LXX text: Rome, 1772 (Simon de Magistris or A. Ricchini), very important; repeated Gottingae, 1773, 1774; Utrecht, 1775; Hahn, Lipsie, 1845; new edition by Cozza, 1877; this text also in Holmes-Parsons, vol. iv. 1818; Oxf., 1848, 1875; Tischendorf, 1850; Swete.

B. APOCRYPHA:—The first separate edition of the so-called Apocrypha appears to be that of Plantin, Antwerp, 1566, 4°: *Το τῶν Βιβλίων μυστῶν, ὡς ἔβριμται ἐν τῷ οἴκῳ τῶν ἱερῶν*. This edition has the strange arrangement, that on the first three sheets the leaves are numbered and the lines counted on the margins, on the following sheets the pages and the verses. The same arrangement appears in the copies, which have the title: *Το τῶν Βιβλίων μυστῶν, ὡς ἔβριμται γράφῃ οὐκ ὑπὸ πνεύματος*; *Bibliorum pars Graeca, Quae Hebraice non inueniuntur*, Antwerp, 1584. A third edition, 'cum interpretatione Latina ex Bibliis Complutensibus deprompta' (344 pp.), followed in 1612. *Οἱ [sic] ἀποκρυφοὶ βιβλῖοι; Libri VT apocryphi omnes Graece ad exemplar Vaticanum emendatissime expressi. Accedit Oratio Manassae et Prologus incerti auctoris in Ecclesiasticum*, Frankfurt, 1694. Later editions are: Halle, 1749, 1766 (Kircher); Leipzig, 1757 (Reineccius); Leipzig, 1804 (Augusti); Oxonii, 1805; Leipzig, 1837 (Apel); London, 1871 (Greek and English); Leipzig, 1871 (Fritzsche; best edition hitherto). A part of the Apocrypha is given in *Liber Tobiae, Judith, Oratio Manassae, Sapientia, Ecclesiasticus Graece et Latine, cum dictis Scripturae parallelis . . . et ad calcem Ecclesiastici positum duplex alphabetum ethicum Ben Sira*, Frankf. et Lips. 1691.

Tobit:—J. Drusius, Franeker, 1691, 4°; F. H. Reusch, Freiburg, 1870, 4°.

Judith:—A. Scholz, *Commentar*, Würzburg, 1887.

Wisdom:—M. Roberti Holkothe . . . in librum Sapientiae . . . *Salomonis praelectiones CCXIII. . . cum inserto Graeco textu* . . . (ed. by J. Ryterus), 1586, fol.; Joh. Faber, Coburg, 1601; in Greek, Latin, and Armenian, Venice, 1827; F. H. Reusch, Freiburg, 1858; W. J. Deane, Oxf., 1881.

Sirach:—See article SIRACH.

Books of Maccabees:—*Liber Hasmonaeorum qui vulgo prior Maccabeorum Graece ex editione Romana, et Latine ex interpretatione J. Drusii*, Franeker, 1600; *Maccabeorum liber I. Graece sec. ex. Vat. . . . recudi curavit P. J. Bruns*, Helmstedii, 1784.

For literature see *Urt.* 64 ff., Sw. 171-194.

v. EARLIER HISTORY OF THE SEPTUAGINT.—Much more complicated is the earlier, especially the earliest, history of *Gr.* Of its pre-Christian

* Other editions in the complete (Polyglot) Bibles of Plantin of 1584; 1613, 10, 15; Aurelius Allobrochorum, 1609; Christian Bened. Michaelis, Züllichavia, 1741, 40 (the latter the only complete Bible in the original languages hitherto existing).

took the greatest biblical work which Christian antiquity ever saw—the first Polyglot Bible, the so-called *Hexapla*, and a smaller edition of it, the *Tetrapla*.

In the first column he placed the Hebrew text in Hebrew letters, in the second the same in Greek transliteration; then followed the version of Aquila the Jew,—no doubt because it was the most literal one; in the fourth column that of Symmachus. Then followed the column of Θ with the critical marks; finally, the version of Theodotion, as being a recension of Θ . For some biblical books, especially the poetical, he added a *fifth*, *sixth*, and even a *seventh* version; * so that in those parts there were seven, eight, and even nine columns. The *Tetrapla* was an abridged edition,—whether later or earlier is not quite certain,—containing only Aquila, Symmachus, Θ , and Theodotion.

Till quite recently Origen's great work was known only from the description of Eusebius, Epiphanius, Jerome, and other writers, and some specimens preserved in scholia of biblical MSS; but in 1896 Giovanni Mercati discovered in a palimpsest MS of the 10th cent. at Milan the first continuous fragments of a copy of the Hexapla (Psalms). These helped us to understand what an enormous task it must have been to arrange the whole OT in such a way, and at the same time showed also how easily mistakes might arise in it, and whence the variants come which are found in the statements about the Hexaplaric text.

And now there has been published quite recently by C. Taylor another leaf from among the *Hebrew-Greek Cairo Genizah Palimpsests* from the Taylor-Schechter Collection (Camb. 1900, 4*), containing a fragment of Ps 22. From this double-leaf the outer columns and some lines of the top are cut away, but it is at least 200 years older than the MS discovered by Mercati, and confirms the view that the arrangement according to *cola* (διελών τε πρὸς κῶλον), of which Eusebius speaks (*HE* vi. 16), consisted in this, that Origen generally placed only *one Hebrew word*, or at the most two, in one line, and was careful to see that the Greek corresponded to it exactly. *Even so small a word as* χ *in Hebrew, μή in Greek, had a separate line.* In the Cairo Palimpsest all the Hebrew lines, 105 in number, consisted—they are cut off, but we are quite certain about their extent—of *only one word*; in the Milan-text this was the case with 10 out of 17, the rest contain two, none more than two. As a full page of the Cairo Palimpsest contained 42 (or 43) lines, just as many as Codex B, which, when opened, represents with its six columns the appearance of the Hexapla, a manuscript of the Hexapla Psalter arranged like the preserved Cairo fragment must have filled about 450 leaves; for the Hebrew Psalter has about 19,000 words.† As the Psalter is, further, something like the 14th or 15th part of the Hebrew Bible, the whole Hexapla

would have filled more than 6000 leaves or 12,000 pages. It is probable that these figures go beyond the real extent, for we may assume that other books were treated less luxuriously than the Psalms. At all events, the Hexapla was much larger than even the latest estimate supposed.* These specimens,† besides giving a glimpse of the whole, show at the same time that for the Church at large, and even for its most learned members, so costly a work was not necessary; it was sufficient to copy the Θ column, and to place on its margins the most notable various renderings from the other versions. This was done partially already by Origen himself, and especially by his followers Pamphilus and Eusebius. Such manuscripts, more or less carefully copied by later copyists, translated into Latin, Syriac, and Arabic, and excerpted by the commentators, are the sources from which hitherto our knowledge of the Hexapla has been derived, thanks to Drusius (1581, 1622), Nobilius (1587, 1588), Montfaucon (1713, 1769), and especially Fred. Field (1875, 2 vols.): see on this highly deserving scholar *Expos. Times*, viii. 160, 274, 325.

The later fate of the original is unknown. Jerome saw and used it in the library of Caesarea;‡ perhaps it was destroyed by the invasion of the Arabs. A similar fate may have brought the codex, from which the Cairo-leaf was saved, into the hand of the Jew who used it in the eleventh cent. for a Hebrew liturgical book. In these specimens there was no occasion to apply either obelus or asterisk. In Gn 1 the first occasions to use the obelus occurred v. 4—*καὶ ἐγένετο οὕτως* χ , v. 5—*καὶ εἶδεν ὁ θεὸς ὅτι καλὸν* χ , v. 9—*καὶ συνήχθη* . . . ἡ γῆρα χ . In vv. 8-9 the only document known which has preserved the obelus in the text is the Arabic version made from the Syriac; on vv. 8 and 9 Origen himself, Basil, and some scholia testify that the obelized passages were not found in the Hebrew. The first occasion to insert a piece with the asterisk occurred at the end of v. 7, where $\kappa\alpha\iota$ had no equivalent in Θ and Origen supplied * *καὶ ἐγένετο οὕτως* χ , and so on.

These are simple cases; but what was to be done when there was variation of order or difference of sense? In the former case (different arrangement of \mathfrak{H} and Θ , as in Exodus, Proverbs, Jeremiah) Origen adopted a twofold course. If the difference was not too great, he let the text of every column follow its exemplar, but marked these passages by both signs at once, asterisk and obelus (*ὡς παρὰ πᾶσι μὲν φερόμενα, οὐκ ἐν αὐτοῖς δὲ τοῖσι*). Elsewhere

* See Sw. p. 74: 'It is difficult to conceive of a codex or series of codices so gigantic as the Hexapla. . . Its bulk would have been nearly five times as great as that of the Vatican or Sinaitic OT. It may be roughly estimated that the Hexapla, if written in the form of a codex, would have filled 3250 leaves or 6500 pages; and these figures are exclusive of the *Quinta* and *Sexta*, which may have swelled the total considerably. Even the Tetrapla would have exceeded 2000 leaves.'—According to the *edictum Diocletiani* copyists were paid at the rate of 25 or 20 denarii for 100 lines, according to the quality of the writing. From the stichometrical lists of the Bible we know that the Psalter had 5100 lines, a complete OT about 80,000, a complete Bible about 100,000. This would make 25,000 or 20,000 denarii for the copying of an ordinary Bible. In the time of Constantine, Epiphanius, when becoming monk, reserved from his fortune for buying the divine and life-giving Scriptures μ' *τομίσματα* (forty gold coins).

† See p. 444; also the examples given by Field (l. p. xiv from 2 K 23⁴ in 7 and Ps 109 (110)³ in 9 columns.

‡ See de Vir. *III*. c. 54; *commentarii in Psalmos* (ed. Dom Morin, *Anecdota Maredolana*, 1895 (iii. 1, p. 5): 'nam *ἐκπλοὺς* Origenis in Caesariensi bibliotheca relegendis; and p. 12 on Ps 48 'Id quod in pluribus codicibus invenitur, "et ole eorum," cum vetustum Origenis Hexapla Psalterium relegerem, quod ipsis manu fuerat emendatum, nec in hebraeo nec in ceteris editionibus nec apud ipsos quoque Septuaginta interpretes reperiri.' (All MSS have it, and the Syriac Hexapla has it). It may have belonged to those books in his library which Acacius and Euzoius took care 'in membranis instaurare,' i. e. *ἐν μαντινῶν ἐκταῖς*, to transcribe from papyrus on vellum (*Philonis opera*, ed. Cohn-Wendland, l. p. iii; Jerome, de Vir. *III*. c. 113; cf. 34, i.).

τὸν ἀριθμὸν παρῶσαν ὑπαγορεύοντι, χρόνιος τιμημαῖος ἀλλήλους ἀμείβονται" βιβλιογράφος τε οὐχ ἴστας, ἅμα καὶ μαρὰς ἐπὶ τὸ καλλυγρῶν ἡτοιμαῖος" δὲ ἀπάντων τῶν διουμένων τῶν ἐκτελεσθῶν ἀφῶναι τιμημαῖος" δ' Ἀμύριον παρῶντα . . . μάστιγα αὐτὸν πρὸς τὸν ἐπὶ τῶν ὑπομνημάτων εὐνοῦν. It is true, Eusebius speaks here only of the commentaries of Origen; but Epiphanius refers the help of Ambrosius also to the Hexapla, and 'copyists' (βιβλιογράφοι) and 'type-girls' would be needed by Origen for this costly work even more than for his commentaries.

* Eusebius (*HE* vi. 16) goes on after the words quoted p. 442b, note*: 'ἰδ' ὅτι (the other versions besides Aquila, Symmachus, and Theodotion) διὰ τὴν ἀδελφότητα, τοῖς ἀρ' αὐτὸν εἰς ἑκάστην τὴν ἐκτελεσθῶσαν, ὡς ἂν τὴν μὴ ἐπὶ τῇ πρὸς Ἀκτίους Νικαίᾳ, τὴν δὲ ἐπὶ τῇ τοῦδε τοῦ: ἵνα μὴ τοῖς ἐκπλοῖς τῶν ψαλμῶν μὲν τὰ ἐκτελεσθῶσι τιστὰς ἰσότητος οὐ μόνον τιμῶνται, ἀλλὰ καὶ ἰσότης καὶ ἰσότης παρῶναι ἰσότητος, ἐπὶ μὲν αὐτῶν ἐκτελεσθῶν, ὡς ἐπὶ ἰσότης πρὸς τὸν ἐπὶ τῶν ὑπομνημάτων, διὰ τὸν ἐπὶ τῶν ὑπομνημάτων, καὶ ἐκτελεσθῶν ἀλλήλους μὲν καὶ αὐτῶν τῶν ἑρμηνείων ἐκτελεσθῶν, τὰ τὸν ἀριθμὸν τῶν ἐκπλοῖν ἀντίρροπον καταλείπονται, τῶν τῶν Ἀκτίων καὶ Συμμάχων καὶ Θεοδοτίωνος ἰσότητος ἅμα τῇ τῶν ἰσότητων ἐπὶ τῶν ἐκτελεσθῶν ἐκτελεσθῶν.

† For the Heb. Psalter the Massoretic numbering does not seem to be preserved, but for the Syriac Psalter the number of words is given as 19,834, of letters as 90,852.

—, but also with two dots — or ÷; or without any dot ~; so especially in the Codex Sarravianus. The form ÷ was called *λημίσκος*, ÷ *ὑπολήμίσκος*; their exact meaning is unknown, for what Epiphanius says about their difference is nonsense (see Field, *Proleg.* lix.). The *netobelus* ∨ (a mallet) or ∷ signifies the end of the notation. As a specimen

of the use of these signs we may take Gn 34^{24b} from the Codex Sarravianus *—

και πε
μετεμορτο ~ την
~ σαρκα της ακροβυ-
~ στειας αυτων : παν
αρσην * παντες εξερ
* χομενοι πυλην πο
* λεως αυτου : εγενε

As it is of importance to have a view of the documents from which the G column of the Hexapla can be recovered, the present writer had drawn up a list of all MSS which trace back their origin to the Hexapla and Tetrapla, and designed stemmata for them, but want of space forbids the printing of them here. One of the most important means is the Syriac version made by Paul of Tella in the year 617 (=p), and, where this is defective, the Arabic version made by Harith ben Sinān ben Shabāt so late as 1486 (see Prof. of Holmes, vol. i.). The Hexapla is expressly cited in still existing documents as the source for Ex., Josh., 1 Kings, Ezra, Esth., Prov., Cant., Lam., Is., Ezek.; the Tetrapla for Gen., Josh., Ruth, Is., Ezek., Job, 12 Proph., Dan.; the Heptapla for 2 Kings. The 'Oxaplatides' (Octapla) is occasionally quoted as having a different reading from the Tetraplatides (Tetrapla) in a scholion on Ps 86⁵ (καὶ τῇ Σιών for μέγα Σιών). Heptapla is used in p at 2 K 16²; Πενταπίλιδες (not Tetraplatides) in Q at Is 32⁴. See, for Genesis, Field on Gn 47²⁶; for Ex., Josh., Judges, Ruth, 1 and 2 Kings, Job, Prov., Eccles., Cant., 12 Proph., Is., Lam., the notes of p, for Ezra and Esther the notes in Cod. S, for Is. and Ezek. the notes in Q; for Ezek. and Dan. the Codex Chisianus. On the order of the biblical books in the Hexapla we are not perfectly informed; in Q it is Octateuch, Kings, Chron., Ezr.-(Neh.), Judith, Tobit, Psalms, Job, Prov., Eccles., Cant., Wisd., Sirach, 12 Proph., Jer., Bar., Ep. of Jer., Dan., Sus., Bel, Ezek., Isaiah.

For Exodus a copy is attested, in which the Hebrew was compared by Eusebius with the Hebrew of the Samaritans. Seventeen such passages are preserved in G, and 5 from Numbers.† Curious is the expression μετατέθεικεν ἄν ὁ ἑβραϊσμός ἱεραλὼν (Tischendorf, *Notitia*, 122); the note in S at the end of Esther speaks of τὰ ἱεραλὼν ἡρωϊσμοὶς αὐτοῦ διορθώματα. At the end of Ex. τὰ κατὰ τὰς ἱεραλὼν ἱεραλὼν are distinguished from a ἱεραλὼν ἱεραλὼν. In the note at the end of Proverbs (Sw. p. 75) for καὶ ἄλλοι αὐτὰ χερὶ we must read καὶ ἄλλοι ἀπὸ χειρὶ, and again; by Pamphilus' own hand. Strange is the quotation of Origen on La 117 (Op. iii. 252) κατὰ Σαμαρειτῶν καὶ ἱεραλὼν ἐκδοσαν τὸν Ἑβραϊσμόν.

If the copies of the G column of the Hexapla, which it was the task especially of Pamphilus and Eusebius to prepare, had been copied with all its marks, it would have been well; but later copyists neglected these completely, and produced thus what we may call *krypto-Hexaplaric* copies, completely spoiling by this carelessness the value of G—such a copy is found, for instance, in the Codex Alexandrinus for 1 and 2 Kings. At the same time we have no right to complain, seeing that in the 19th cent. the same process was repeated in the case of Grabe's edition.‡

Now it is clear that if we were to succeed, by a comparison of those documents which go back directly or indirectly to the Hexapla, in restoring its G column, we should have a Septuagintal text, but not the original one; for, as indicated above, the principles on which Origen chose his text are not the true ones; moreover, it would appear that he even further introduced little changes, so as to make his text correspond to the Hebrew, for instance in the matter of proper names, writing Γηρωων (Ex 6¹⁶) for Γεδων, etc.§ We must therefore look for

* Origen took this whole system of notation from the Alexandrian critics of Homer, especially Aristarchus; see the passages quoted by Swete, p. 71, and the enumeration of the passages of Proverbs which varied in order from the Patmos codex, in Tischendorf's *Notitia*, p. 76. How inconvenient this was before the invention of numbering the verses and chapters may be seen there.

† On other passages (Gn 48^{52b} etc.) for which τὰ Σαμαρειτῶν is quoted, see Field, i. p. lxxii ff., and S. Kohn, 'Samaritikon und Septuaginta' in *Monatschrift für Wissenschaft des Judenthums*, N. F. i. (1894) 1-7, 49-67; ZDMG, 1893, 650. Kohn believes that there was originally a complete Greek translation of the Samaritan Targum.

‡ See above, p. 440b, on the Moscow and Athens reprints of Grabe's edition of the Codex Alexandrinus; and cf., for its disastrous results, e.g. Oikonomos, ii. 251, on the reading ὁραὶν and χερῶν in Ps 131¹⁵.

§ Cf. Ps 114, where εἰς τὴν σῖναια has nothing answering to it in Hebrew; a scholion remarks that it εκτετατο ἐν τῇ σῖναια τὸν ὁμοῦ ἀμφιβάλλον; Cp. 184, sah., Theodoret have for it εἰς τὴν σῖναια.

other sources. These have been found in the recensions which Jerome mentions as being circulated in his times, besides the copies produced by Eusebius and Pamphilus. Jerome, who was almost the only one who opposed the popular views about G, had also the right insight into the consequences of Origen's labours in textual criticism, when he wrote to Augustine—

'Et miror quomodo LXX interpretum libros legas non puros ut ab eis editi sunt, sed ab Origene emendatos sive corruptos per obelos et asteriscos. . . . Vis amator esse verus Septuaginta interpretum, non legas ea, quae sub asteriscis sunt, imo rade voluminibus, ut veterum te fautorem probes. Quod si seferis, omnes ecclesiarum bibliothecas damnare cogaris. Vix enim unus aut alter invenietur liber qui ista non habeat.'

He mentions several times three sets of Bible texts as used in his time (*Prof. in Paralip.*, adv. Ruf. ii. 27)—

'Alexandria et Egyptus in Septuaginta suis Hesiychium laudat auctorem, Constantinopolis usque Antiochiam Luciani (var. lec. Juliani) martyris exemplaria probat, medius inter has provinciae Palaestinos (var. lec. -nae) codices legunt quos ab Origene elaboratos Eusebius et Pamphilus vulgaverunt; totiusque orbis hac inter se trifaria varietate compugnat.'

The Gothic priests, Sunnja and Fretela, who had addressed him about questions in textual criticism, he instructed in the year 403—

'Aliam esse editionem quam Origenes et Caesariensis Eusebius omnesque Graeciae tractatores καὶ, i.e. communem appellant atque vulgatam, et a plerisque nunc Λουκιανῶν * dicitur, aliam Septuaginta interpretum quae in ἱεραλὼν codicibus reperitur et a nobis in latinum sermonem fideliter versa est et Jerosolymae atque in orientis ecclesiis decantatur. . . . καὶ, autem ista, hoc est communis, editio ipsa est quae et Septuaginta, sed hoc interest inter utramque quod καὶ, pro locis et temporibus et pro voluntate scriptorum vetus corrupta editio est, ea autem quam habetur in ἱεραλὼν et quam nos vertimus, ipsa est quae in eruditiorum libris incorrupta et immaculata Septuaginta interpretum translatio reservatur.'

About the person and the work of Hesiychius we know very little. He may have been (not the lexicographer of the second half of the 4th cent., who was a pagan, but) the martyr-bishop mentioned by Eusebius, *HE* viii. 13, together with Phileas of Thmuis (Sw. 79: 'It is pleasant to think of the two episcopal confessors employing their enforced leisure in their Egyptian prison by revising the Scriptures for the use of their flocks, nearly at the same time that Pamphilus and Eusebius and Antoninus were working under similar conditions at Caesarea'). The fruit of his work is now sought for the Octateuch in the MSS 44, 74, 76, 84, 106, 134, etc. (see N. McLean, *JThSt*, ii., Jan. 1901, p. 306); for the Prophets, at least for Isaiah and the XII, in Q and its supporters, 26, 106, 198, 306 (see A. Ceriani, *de codice Marchaliano*, Rome, 1890, pp. 48 ff., 105 ff.).

More clearly defined is our information about Lucian and his work (see on him Sw. p. 80 ff.). Westcott-Hort came to the conclusion, that for the NT the growing diversity and confusion of Greek texts led to an authoritative revision at Antioch, which was at a later time subjected to a second authoritative revision, carrying out more completely the purposes of the first. Of known names, they wrote, Lucian's has a better claim than any other to be associated with the early Syrian revision. These revisers of the NT 'evidently wished their text to be as far as possible easy, smooth, and complete, and for this purpose borrowed freely from all quarters, and as freely used the file to remove surviving asperities' (ed. min. p. 557). This description agrees fully with our information about the Lucianic revision of the OT, and with the observations we can gather from the existing documents, in which it is found to survive, for the Octateuch in 19, 82, 108, 118; in the Historical books 93 is to be added; in the Prophets 22, 36, 48, 51, 62, 90, 93, 144, 147, 233, 308.

The Lucianic recension is of the highest value

* Oikonomos, iv. 99, wishes to read Λουκιανῶν.

for the textual criticism of the Hebrew OT; for the Hebrew MSS, used by Lucian at Antioch, seem to have been different from those which were at Origen's disposal, further removed from the traditional Hebrew text; but it must not be confounded, as its editor P. de Lagarde was careful to warn us (see especially *Mittheilungen*, ii. 171), with the Septuagint. On the question, whether among the materials used for his revision the Syriac version was also included, and the other, how his revision is related to the Latin versions, see Nestle, *Introd.* p. 182.* The statement that his autograph copy in 3 columns was, after his martyrdom, found at Nicomedia, we see no reason to doubt (against Sw. p. 85).†

No express statements emanating from later times are known to the present writer regarding attempts to revise \mathfrak{C} . That the emperor Constantine ordered 50 Bibles for his churches from Eusebius, and that Athanasius procured for Constans $\pi\upsilon\kappa\rho\iota\alpha$ τῶν $\theta\epsilon\iota\omega\upsilon$ γραφῶν, may be mentioned in this connexion. Later emperors and empresses showed their religious zeal partly by writing copies with their own hands. The history of \mathfrak{C} passed on to the nations, which received it in the form of translations.

vi. VERSIONS MADE FROM THE SEPTUAGINT.—If we are to trust the statement of Zosimus Papanopolitanus (see Oikonomos, ii. 328), the Hebrew Bible was translated for Ptolemy at one and the same time into Greek and into Egyptian; but *Latin*, not Egyptian, was probably the first language into which \mathfrak{C} was translated.

On the *Latin* versions of \mathfrak{C} see the exhaustive article of H. A. A. Kennedy in vol. iii. p. 47 ff.‡ The most important addition to note is the publication of *Heptateuchi partis posterioris versio latina antiquissima e codice Lugdunensi* par Ulysse Robert (Lyon, 1900, 4°). This discovery, already noticed by Kennedy (p. 49), called by McLean the most important event of the past decade in connexion with Sept. studies (*JThSt*, ii. 305), shows the *mixed character* of the Latin Bible text, already acknowledged by Kennedy, in the most striking way; no Greek MS or group of MSS being known to which this Latin text adheres persistently. And the second, not less puzzling feature of these Latin texts becomes once more apparent, namely their variety. Cf., for instance, Dt 31 in the [Lugdunensis], [M]onacensis, and [W]irceburgensis].

* E. Klostermann (*Origenes' Werke*, iii. p. xi) promises an investigation on the Jeremiah text used by Origen, which agrees frequently with the group of MSS which are considered as Lucianic. Adam Metz (*Die Bibel des Josephus untersucht für Buch v.—vi. der Archäologie*, Basel, 1895) notices that the Bible used by Josephus shows in Judges and Samuel many agreements with Lucianic readings, and presupposes, therefore, an 'Ur-Lucian.' The paper on 'Lucian's recension of the Septuagint' (*Church Quarterly Review*, Jan. 1901, pp. 379-398) came to the knowledge of the present writer too late to be used for this article.

† On a copy going back to Basil, see Synellus (*Chronogr.* p. 382): ἡ ἐν τῇ ἀντιόχειᾳ ὑπὸ τοῦ βασιλέως κατὰ τὴν ἐπιτομὴν καὶ ἀρραβωνίαν, ἢ τῆς ἐν Κωνσταντινῇ ἐκδομένης, ἢ τῆς ἐν τῇ ἰταλῇ ἐκδομένης, ἢ τῆς ἐν τῇ βασιλῇ ἐκδομένης, ἢ τῆς ἐν τῇ ἀντιόχειᾳ ἐκδομένης. In this copy Synellus found 28 (πν) years for the reign of Φ in 2 K 1597. This number is found to-day in the MSS 55, 56, 64, 118, 245, 246.

‡ The influence which \mathfrak{C} exercised on the formation of the mediæval Roman and even Teutonic languages through the medium of the Latin Bible version can be only hinted at. Even words of common life like *canapé*, *cidre*, find their origin ultimately in \mathfrak{C} .

In the Bk. of Judges the new text sides regularly with A against B; in some cases (1^o 5²⁰, 30) it alone offers what seems to be the original reading (see McLean, *l.c.*). On Wisd., Sirach, Esth., Job, Judith, 1 and 2 Mac., Passio Maccabæorum, Bar., 3 Es., Cant., see Ph. Thielmann, 'Bericht über das gesammelte handschriftliche Material zu einer kritischen Ausgabe der lateinischen Uebersetzungen biblischer Bücher des alten Testaments' (*Sitzungsberichte der K. bayer. Akad. d. Wiss.* 1899, Bd. ii. Heft 2, pp. 205-243).

On the *Egyptian* versions see Forbes Robinson in vol. i. p. 668 ff. There is but one important addition to mention—*The earliest known Coptic Psalter*, edited by Wallis Budge (Lond. 1898). F. E. Brightman (*JThSt*, ii. 275) has shown that it represents the complete Greek text, of which U contains fragments, and that it has some remarkable readings, which do not occur in the common Greek text but only in Latin documents, e.g. $\epsilon\beta\alpha\sigma\iota\lambda\epsilon\upsilon\sigma\epsilon\tau\epsilon\ \alpha\pi\omicron\ \epsilon\lambda\lambda\omicron\upsilon$ in Ps 95¹⁰, which is quoted from Justin onwards. Cf. further, Lieblein, 'Thebansk-Koptick Oversættelse af Davids 89. 90 Psalme' (*Academy of Christiania*, 1896); W. E. Crum, 'Coptic Studies' in *Eg. Expl. F. Rep.* for 1897, 1898).

On the *Ethiopic* versions see R. H. Charles in vol. i. p. 791. With the fact quoted there that the Ethiopic Bible at no time contained the books of Maccabees, compare the parallel fact that they are unknown also to the Canon in the 39th festal letter of Athanasius and in Codex B, which is connected by Rahlfs with Athanasius (*GGN*, 1899, i. p. 72).

Scarcely any addition has been made to the *Arabic* versions since they were treated by F. C. Burkitt in vol. i. p. 136 ff.

Of the *Gothic* version ascribed to Ulfilas, only a few fragments of the OT are extant, from Gn 5³⁻²⁰, Ps 52²³, Ezr 15. 16. 17 (not 28-42); but these are sufficient to show that Ulfilas, as might have been suspected, followed the recension used in Constantinople—that of Lucian. The best edition is that of Uppstrom (Upsala, 1854, 1857, 4°), the most convenient that of Stamm-Heyne (¹⁸⁹⁶), in which, however, as in all, the order in Ezra must be reversed in the way indicated above, or E. Bernhardt, 1884.* For the literature see Sw. p. 116; *Urt.* 119-121.

The recension of Lucian is the basis also of the *Slavonic* version (first printed at Ostrago, 1581). From the quotations in Holmes (on Gen.) one might almost conclude that its present form is based on the Aldine edition of 1518, so frequently does it agree with it. For literature see *Urt.* p. 215 (Leskien); Sw. p. 120; Holmes, *Præf. in Pent.*

The *Georgian* version was used for Holmes (see *Præf. in Pent.*), but the first edition (Moscow, 1743) was made conformable to the Slavonic Bible by the Prince Vakhush, son of Vakhtang, king of Georgia. See *Urt.* p. 161; Sw. p. 120.

The *Armenian* version (see the article of F. C. Conybeare in vol. i. p. 151) rivals, in importance for the textual criticism of \mathfrak{C} , the Syriac, and will be used for the larger Cambridge edition of \mathfrak{C} .

The version of the OT which came into common use in the *Syriac*-speaking churches was made from the Hebrew, though it occasionally underwent influences from \mathfrak{C} (see art. SYRIAC VERSIONS). But besides this common version (Peshitta), the zeal of this Church produced a translation of \mathfrak{C} , probably the most literal that ever appeared in any language, and therefore of the greatest importance for the textual critic. It was the work of one Paul, bishop of Tella die Mauzelath (Constantine

* An American edition was published by G. H. Balg, Milwaukee, 1891. That of Massman is from 1855-1857.

in Mesopotamia), and was executed by him in Alexandria in the years 616-617. There he had at his disposal several MSS, which went back—with few intervening links—to the very Hexapla or Tetrapla of Origen; hence the usual name of this version, the *Syro-Hexaplar*. Andrew du Maes (Masius, †1573; see on his merits *Sst.* i. 13-16) possessed a copy containing part of Deut., Josh., Judges, 1 and 2 Sam., 1 and 2 Kings, Chron., Ezr., Esth., Judith, and part of Tobit. Unfortunately, this codex has disappeared; but what, in all likelihood, is the second volume of it, is preserved at the Ambrosian Library at Milan, and was given to the world through the labours of Ceriani and a generous gift of Frederick Field (see above, p. 443^b) as the *Codex Syro-Hexaplaris Ambrosianus* in a photo-lithographic facsimile edition as tom. vii. of the *Monumenta sacra et profana* (Milano, 1874, fol.); while the other parts that survived of this version (from Gen., Ex., Numb., Josh., Judges, 1 and 2 Kings) have been most carefully edited in the last work of P. de Lagarde (*Bibliotheca Syriaca a Paulo de Lagarde collecta quæ ad Philologiam Sacram pertinent*, Gottingæ, 1892, 4°, finished by A. Rahlfs). Of the former publications—see the list in Nestle, *Litt. syr.* p. 29 f.—only that of Thomas Skat Rordam (*Libri Iudicum et Ruth secundum versionem syriaco-hexaplares*, Hauriæ, 1859-61, 4°) deserves mention, on account of the 'Disertatio de regulis grammaticis, quas secutus est Paulus Tellensis in Veteri Testamento ex Græco Syriace vertendo' (pp. 1-57), together with Field's *Otium Norvicense, sive Tentamen de Reliquiis Aquilæ Symmachi et Theodotionis e lingua Syriaca in Græcam convertendis*, Oxon. 1864, 4°. On account of the MSS used by Paul, and the principles followed by him, this version forms our chief authority for the text of Origen's recension. On the Arabic translation based on it see above, p. 445^a. For the literature see W. Wright, art. 'Syriac Literature' in *Encyc. Brit.* vol. xxii. = *Short history*, p. 18; Field, *Hexapla*, i. p. lxxvii ff.; Sw. 112 ff.; *Urt.* 117.

On other attempts to translate parts of \mathfrak{E} into Syriac, by Polycarp in the 5th cent. (Psalms), Jacob of Edessa in the years 704-5, see Sw. p. 115 f.; Gwynn, *Dict. Chr. Biog.* iv. 433.

On the fragments of translations in the so-called Palestinian dialect, we may refer to Sw. p. 114 f., and especially to F. C. Burkitt ('Christian Palestinian Literature' in *JThSt.* ii. 174 ff.). The fragments enumerated by Sw. p. 115, from Gen., Ex., Numb., 1 Sam., 1 Kings, Psalms, Prov., Job, Wisd., Amos, Micah, Joel, Jonah, Zech., Is., Jeremiah, have been augmented since by the publication of Palestinian Syriac texts from palimpsest fragments in the Taylor-Schechter collection, edited by A. S. Lewis and M. D. Gibson (Lond. 1900, 4°), containing portions of Numb., Deut., Psalms, Is., Jer., and—as recognized by V. Ryssel—of Sirach (frag. xviii.). On the date and place of this whole literature see Burkitt, *l.c.*

Up to the present day several of the Churches in which these various versions of \mathfrak{E} arose, have never emancipated themselves from them. But even in those parts where, as in the Latin West through Jerome, or in modern Europe through the influence of the Reformation, new Bible versions, based on the Hebrew original, came into use, there is still, in greater or less degree, an echo of \mathfrak{E} to be heard through worship and theology. It may suffice to recall the Prayer-Book version of the Psalms, or even the latest revision of the English Bible, in which it is not the names alone of the books of the OT from Genesis to Ecclesiastes that tell of this first and most remarkable of all biblical versions.

MATERIALS FOR THE RESTORATION OF \mathfrak{E} .—

The materials for the restoration of \mathfrak{E} are, as can be gathered from the preceding history, (1) manuscripts, (2) versions, (3) quotations.

(1) *Manuscripts*.—The MSS used for the work of Holmes-Parsons are counted at the end of vol. v. as 311; i.-xiii., being uncial MSS, are designated by Roman, the rest, being cursives, by Arabic figures. There are some mistakes in this list: 23, for instance, the *Codex Venetus*, is an uncial codex; others, counted under different numbers, have turned out to be parts of one and the same MS. Another system of designation, used by Lagarde and in the Cambridge Septuagint, is to denote the uncial MSS by the capital letters of the Latin (and Greek) alphabet; for a particular class of MSS Lagarde used small letters of the Roman, Cornill (in Ezekiel) of the Greek alphabet. It will be the task of the large Cambridge Septuagint to introduce a system of notation that will be generally accepted; meanwhile it is best to adhere for the uncials to the system of Lagarde-Swete, for the cursives to Holmes-Parsons, always keeping in mind that the sharp distinction between uncials and cursives is in no way justified.

As to the *contents*, the MSS may be divided into those which contain the whole Bible (OT) or parts of it, the Octateuch,* the Historical, Poetical, and Prophetical books. Most frequent are MSS of the Psalms. The arrangement of these groups, and of the books within each group, varies greatly (see Sw. pp. 195-230: 'Titles, Grouping, Number, and Order of the Books').

The books of Moses seem to stand at the head with no exception, and in all MSS the order seems to be the usual one, the inverted order, Nu. Lev. being attested only by Melito (Eus. *HE* iv. 26; Sw. p. 203), in the list published by Mommsen (Sw. p. 212), and by Leontius of Byzantium (Sw. p. 207). In Latin the third book is sometimes called *Leviticum*, the fifth *Deuteronomius*. Philo's designation of the latter, ἡ *Ἐπινομίς*, is taken from the book of Plato so inscribed; Judges he calls ἡ τῶν Κριμάτων βιβλος. The counting of four books of Kings or rather Kingdoms (*Βασιλειῶν*) has been retained by the Latin Bible, partially also the name *Παραλειπόμενα* for Chronicles. The form *Παραλειπόμενα* occurs not only in Gregory of Nazianzus and Leontius (see Sw. pp. 205, 207), but also in Origen (new Berlin edition, iii. 74, l. 15; not decisive ἐν τῇ πρώτῃ [δευτέρῃ] τῶν II., i. 341, ii. 374). On the other books and their names see Sw. p. 216; but note that the last books are generally called τὰ *Μακκαβαϊκά*, books treating of (Judas) Maccabæus; the extension of the name to the whole family, now generally in use, the Maccabæes (plural), is not original. On the grouping of the books (Historical, including Pentateuch, Poetical, Prophetical) see Sw. p. 218; on their number, Sw. p. 219; art. *CANON* in vol. i. p. 348 ff.; on the internal order, Sw. p. 226. The statement of J. M. Fuller (*Speaker's Commentary on the Apocrypha*, i. 368), that the MSS ordered by Constantine from Eusebius were 'the first complete Greek Bible,' and that it contained apparently the books of the Hebrew Canon and the Alexandrian version of the Apocrypha added as an Appendix, does not seem to rest on sure foundation. When Eusebius writes that he sent off the books ἐν πολυτελεῶς ἡσκημένοις τεύχεσι τρισσὰ καὶ τετρασσὰ, the most probable explanation of the much disputed closing words seems to be, that each Bible consisted of three or four volumes. In a note at the end of Esther in the *Codex Sinaiticus* it is stated that it

* Greek MSS mostly count Gen.-Ruth as books 1-8, as *ἐννέα τόμοι*; the Latin MSS Gen.-Judges as *Heptateuchus*; the word *Hexateuch*, now so much in use that it has an article devoted to it in the present work, seems to be an innovation of the late 19th century.

was compared with a MS belonging to Pamphilus, which ἀρχὴν μὲν εἶχεν ἀπὸ τῆς πρώτης τῶν βασιλειῶν, εἰς δὲ τὴν Ἑσθῆρ ἔληγεν. From this it is probable that it was arranged, not like B, which inserts the seven Poetical books (the five Canonical + Wisdom and Sirach) between Ezra and Esther, nor like A, in which the Prophets follow Chronicles, and after them Esther, but like S and N, in which Ezra and Esther follow immediately upon Chronicles. This would give a Bible of four volumes (Octateuch, Historical books, Prophetical books, Poetical books).

As regards their age, the MSS range from the 3rd to the 16th cent. To the 3rd cent. is ascribed a scrap of papyrus in the British Museum, yielding the text of Gn 14¹⁷ (Pap. cexii.; see Sw. p. 146) and the fragment of a Psalter (cont. Ps 127-154), 'the oldest Bible MS in any language in the British Museum and one of the oldest in existence anywhere' (see *Facsimiles of Biblical Manuscripts in the British Museum*, edited by Fred. G. Kenyon, 1900, pl. i. Pap. cexxx.).

It is impossible to give here a list of the MSS of Ⲭ, or even of the uncials; some of them have been treated under separate articles; see the letters ANBCL; we must refer to Sw. p. 122 ff. and the literature quoted there; only some supplementary remarks may be offered—

In A (Alexandrinus) the Psalter appears not to have been copied from the same original as the rest of the MS, but taken from a separate Church-Psalter (just as in the Aldine Bible of 1518). Hence the additions before and after the Psalms (letter of Athanasius, canon of morning and evening psalms, etc.; Canticles). It would be well to control its use in the Cambridge Septuagint by comparison once more with the original or a former collation; see, e.g., 1 Es 4¹⁴ A + αὐτῶν; 2 Es 7⁵ A has πρῶτον, not παρῶν.

On the connexion of B (Vaticanus) with Athanasius see Th. Zahn, *Athanasius und der Bibelkanon* (Erlangen, 1901: Sonderabdruck aus der Festschrift der Universität Erlangen zur Feier des . . . Prinzregenten Luitpold von Bayern), p. 33: 'It must be seriously considered whether the famous Codex Vaticanus is not that Bible which was produced by Athanasius at the order of Constans at Rome about 340 through Alexandrian copyists' (see Nestle, *Introduction*, p. 181, where in the note read 'Constantius' for 'Constans'). Ceriani's view, that B was written by a Western scribe, had been proposed already by Richard Simon (*Hist. Crit. du NT*, c. 32). That it contains the recension of Hesychius, was for the first time, as it seems, stated by Grabe; Masius believed it was that of Lucian, Montfaucon that of Origen. On the text of Judges in this MS see below.

S is a more convenient symbol than Ⲭ for the Codex Sinaiticus, and is adopted in Swete. That the copyist who wrote the note at the end of Esther on the collation with the Codex of Pamphilus is identical with the corrector Ⲭ^o is an important hint for the restoration of the recension of Eusebius-Pamphilus.

D (Cottonianus). As this famous MS was reduced by fire in 1731 to a heap of charred and shrivelled leaves, it would be worth while to make investigations whether the collation made before that time by Wetstein (*NT* i. p. 134) is still in existence. On the relation of its pictures to the mosaics of San Marco in Venice, see J. T. Tikkanen, *Die Genesismosaiken von San Marco in Venedig und ihr Verhältnis zu den Miniaturen der Cottonbibel*, etc., Helsingfors, 1889, 4° (Acta Soc. Scient. Fenn. xvii.).

G (Sarravianus). Add to the publications mentioned by Sw. p. 137:—P. de Lagarde, *Semitica*, Zweites Heft, Gött. 1879 (vol. xxv. of the 'Abhand-

lungen,' etc.): 'Die pariser blätter des codex Sarravianus'.

M (Coislinianus), collated by Wetstein (*NT* i. 134), for a great part by Lagarde (*Symm.* ii. 142; *Ankündigung*, iii. 27; *SSt.* i. 8).

Q (Marchalianus). The distinction established by Ceriani between the origin of the text and of the marginal matter in this MS, the latter only being Hexaplaric, is a great help for the classification of the MSS of Ⲭ.

On the 23 uncial MSS, or parts of such, which have not yet been used for any edition, and remain for the present without a symbolical letter or number, see Sw. 146 ff., 170. No. 14 (formerly in the possession of W. H. Heckler) has lately been acquired by the University of Heidelberg, and will be edited by Prof. G. Deissmann. On No. 6, the oldest biblical MS in the British Museum, see preceding column.

The transition from the uncials to the cursives may be made by the MS E, which is now dispersed in Oxford, London, Cambridge (1 leaf), and St. Petersburg. It was brought by Tischendorf from the East in 1853 and 1859; the Oxford part written in uncials, the Cambridge leaf, which was kept back by Tischendorf, making the transition from uncial to cursive writing, the rest in cursives. The whole recent history of this MS has been described by A. Rahlfs in *GGN* (not *GGA* as in Kenyon, *Facsimiles*, plate v.), 1898, 98-112; see also Sw. 134 f.; Lagarde, *SSt.* i. 1-11; facsimile in Kenyon, pl. v.

Most cursives await careful investigation; some will repay it; others may be discarded by it, as later copies of MSS still existing, like 33, 97, 238, which belong to one MS, and are copied from 87, or even as copied from printed editions. This we suspect to be the case with Ho 31 (Genesis with catena), at Vienna (*Theol. Gr.* 4) [on the date of this MS Holmes wrote, 'videtur esse xiii. vel xiv. seculi'; Sw. p. 149 '(xiv.)'; Lagarde, *Genesis graece*, 'saeculi xv. a me non collatus, sed inspectus tantum'; H. Achelis, 'Hippolytstudien' in *TU*, N. F. i. 4, p. 97, places it in the 16th cent.], and with 83, a Pentateuch at Lisbon (formerly Evora) 'of the 16th cent.' Both will turn out to be copied from the Aldine edition of 1518.

See on the cursives the list of Sw. pp. 148-168, and note that 25 is at Munich in the 'Staats- (not Stadt-) bibliothek'; 53 agrees in Numbers frequently with the Old Latin Codex Lugdunensis; 130 is by Lagarde called t, and ascribed to the 13th 'ut vid.', Sw. '(? xi.)'; 93 in 3 columns, with 2 texts for Esther; facsimile in Kenyon, pl. viii.; 155 'Cod. Meermannii ii.' is now Bodl. misc. Gr. 204; 156 the only Greek MS containing in Ps 95 (96)¹⁰ the addition *a ligno*, in the form ἀπὸ ῥῆ ἐύλω.

(—) A Psalter not mentioned by Sw. is in the Brit. Museum, Add. MS 19,352 A.D. 1066, valuable not only as a dated example of Greek writing of the 11th cent., but especially as an example of the best style of Byzantine decorative art, applied to the ornamentation of copies of the Scriptures [see Kenyon, *Facsimiles*, pl. vii., where Jesus Christ is enthroned between two cherubim (or rather seraphim) as illustration of Ps 79 (80)¹¹].

On the *Lectionaries*, which must be classed among the MSS, see Sw. p. 168 f. Their value would be increased if the Lectionary-system of the Greek Church is as old as has been contended for recently by C. R. Gregory, *Textkritik des Neuen Testaments*, i. (1901), p. 327 ff.

In spite of the great mass of witnesses thus used for the great work of Holmes-Parsons and later editions, their classification is still a problem, even in a book like that of Judges, where the differences are most marked. Compare the judgment of G. Moore (*SBOT*, 'Judges,' p. 22): 'A

complete *stemma* exhibiting the filiation of these MSS and recensions cannot be made from the collations in HP; we may even doubt the correctness of the remark added by Moore: 'it would be comparatively easy if we possessed a few accurate collations of typical MSS properly arranged.'

Perhaps a good step towards this end would be to arrange complete lists of the singular and sub-singular readings of our oldest witnesses, as ABS, especially for B, because this MS serves as standard for the collations of the larger Cambridge Septuagint.

Another fact worth mentioning in this connexion is, that every new witness, in spite of the great number of MSS already collated and the still greater number of variations extracted from them, adds a new reading, even for the Psalms, for which some 120 MSS have been used for HP. See, for instance, the spelling *πρόσρχες* instead of *πρόρχες* first making its appearance in Kenyon, *Facsimiles*, plate v. Ps 79 (80).²

(2)(3) The same is the case with the *Versions* and *Quotations*. On these see above, §§ iv. and vi. As but few of the Greek Fathers are accessible in trustworthy editions, a large field waits here for patient and careful workers. But, even before these *minutiae* be settled, *℣* can and must be used for that purpose for which it is of the greatest importance, namely the textual criticism of the Hebrew Bible.

vii. USE OF *℣*.—The remark of Swete has already been quoted—that *℣* possesses a new and increasing importance in the field of biblical study (p. 437ⁿ). Its value as a witness to the Hebrew text was recognized partially in the time of Origen and Jerome, and afresh in the days of the Renaissance and onwards from the 17th cent.; but it can be fully acknowledged only by those who adopt the views maintained chiefly by Olshausen, Lagarde, and their followers, that all existing MSS of the Hebrew OT go back to a single official copy or recension, made up somewhere in Palestine, perhaps at Jamnia, about the 2nd cent. after Christ. To quote only one statement. G. Moore (*SBOT*, 'Judges,' p. 23) writes—

'The other Ancient Versions [except *℣*],—the Latin of St. Jerome in its Vulgate form (3), the Syriac (*℔*), and the Jewish Targum (*℥*) are all based on the *Palestinian Hebrew Standard Text* of the 2nd cent. A.D., as are also the new Greek translations of *℣* 20, and the revisions of *℣* after these, and in the main the translation found [for Judges] in *℣* BVBmN (i.e. B and its allies). The pre-hexaplaric *℣* alone represents a Hebrew text older than the official revision made in the school of R. Akiba.'

In other words, *℣* represents for us (1) the exegetical tradition, or at least the exegetical opinions of a Jewish school, or—if that name asserts too much—of individual scholars more than 2000 years before our time; it is the oldest commentary on the Hebrew Bible in existence; (2) when re-translated into Hebrew—with the necessary precautions, of course—it represents for us the Hebrew MS (or MSS) lying before its authors, which is 1000 years older than the oldest MS at present at our disposal, and 300 years older than the one to which all of our Hebrew MSS go back.

In the first instance, it is sufficient to recall the great number of *hapax legomena* which occur in the limited range of Old Hebrew literature. In the second place, we learn first that the paleographical character of the pre-Massoretic MSS was very different from ours: few *matres lectionis*, no vowels, no *litteræ finales*, no separation of words, so that even in liturgical books there was uncertainty about those points (cf. Ps 105 (106)⁷ *avašalvorres*=*וְלֹא* for *וְלֹא*); perhaps abbreviation

² Cf. for the following, Sw. ch. v. 'The Septuagint as a Version,' pp. 314-341.

strokes for *א*, *ב*, *נ*; see Lagarde, *Mittheilungen*, i. 21; Fel. Perles, *Analekten* (1895, pp. 4-35).

The second fact that comes to light from a comparison of *℣* and *℔* is, that there is a great difference between particular books or sets of books in the OT. This arises partly from the circumstance that all the books are not due to the same translators, but still more from the different character of the text lying before them. That Isaiah, for instance, found an interpreter not worthy of this book, was remarked long ago by Zwingle; the translator of Job, says Swete, p. 316, was perhaps more familiar with Greek pagan literature than with Semitic poetry; where the grandson of Jesus Sirach made his mistakes, we can judge better now than before. But more important is the fact that already the Hebrew texts used by the translators differed in varying degrees from the Massoretic text.

The differences between *℣* and *℔* can be tabulated as touching the sequence or the subject-matter. The differences of the subject-matter are, of course, of greater interest; they are of a three-fold character—additions, omissions, variations.

On the differences of sequence see Sw. pp. 231-242. There are unimportant differences in Gn 31. 36. 47, Ex 20 (order of commandments); Nu 1. 6. 26, Jos 9. 19 (vol. ii. p. 782); great differences in Ex 35-40, 3 Regn. 4. 5. 6. 7. 10. 11, Pr 15. 20. 24, Jer 25-41. On Ex. see vol. i. p. 810 f.; on Kings, ii. 862 ff.; on Prov., Sw. p. 241; on Jer., vol. iii. p. 573 f.).^{*} Very awkward is the different numbering of the Psalms.

On the difference in the subject-matter see Sw. 242 ff. If we were to have a complete edition of Origen's Hexapla with its critical signs, it would be convenient to see at a glance the omissions and additions.

The Law offers the smallest number of differences; but besides some famous additions, as Gn 4⁸ *διέλωμεν εἰς τὸ πῆδιον*, the second *Καὶνάν* (who has been erased in Cod. A 10²⁹) 10²⁴ 11¹² 13 (1 Ch 1¹⁷⁻²³ A)—his addition, in connexion with other variations, made the whole chronology of the world different, see vol. i. p. 397 ff.; Oikonomos, iii. 703-835—there are smaller additions of interest, as 8 sons of Japheth for 7 in Gn 10; 11 nations for 10 in Gn 15¹⁹ 20 (the addition of the *Εβλαῖτες*, either overlooked by Origen or wanting in his copy); 5 sons of Dedan for 3 in 25³; 13 heinous offences for 12 in Dt 27 (on v.⁸ see Grinfield, *Apology*, pp. xii, 191).

On Joshua, which does not seem to have been translated together with the Pentateuch, see vol. ii. p. 781 ff., and Bennett (*SBOT*). On the word *γαῖος*—or *γαῖος*; this is the accentuation of B³—Oikonomos, ii. 495 ff., 551, has 40 pages.

For Judges, e.g. 16¹² 14, it is sufficient to refer to G. Moore.

The chapters 1 Regn. (Samuel) 17. 18 furnish a good example of how much difference of opinion still prevails. What Kuenen and Wellhausen call a harmonistic omission on the part of *℣*, is considered by others as a later interpolation in *℔*.

That *℣* preserved in 3 Regn. (1 K) 8¹² 23 a quotation from the Book of Jashar (see vol. ii. p. 551), and, with it, what Kittel (*Handkom.*) styles the *oldest* more explicit confession of Jahweh in Israel, should alone be sufficient to prove its importance.

For the Book of Psalms even cursive MSS of *℣* enrich our knowledge about the liturgical use of the Psalms (see Sw. 250); in the alphabetic psalm 145 the missing letter *י* is restored, perhaps only

^{*} B. Pick in *The (Americ.) Independent* (1897, p. 1273) writes on Cornill's edition of Jeremiah (in *SBOT*): 'If I have counted right, no less than 182 words have thus been eliminated from the text; and it is surprising that none of these relegated passages concern any of the quotations from Jer. in the NT.'

by conjecture. The addition to Ps 13^a quoted in Ro 3¹³⁻¹⁸ is omitted by A and 95 cursives out of 105. Already Jerome declared the codices of \mathfrak{E} which contain it, to be interpolated from Ro 3. If this be so, the agreement of \mathfrak{AB} , on which for the NT Westcott-Hort laid so much stress, is of no great value at least for the Psalms; * on the other hand, it is to the credit of these MSS if they have preserved a text similar to that in the hands of St. Paul.—On Ps 151 see Oikonomos, iii. 634 f.; on the ecclesiastical Canticles and the Prayer of Manasses among them, Nestle, *Sst.* iii. 6 ff.; and note that this piece has not been utilized for the Greek Concordances of Trommius and Hatch-Redpath (cf. ἀνεξιχνίαστος, ἀνυπόστατος, ἀερεκτος).

On Proverbs Lagarde's early book of 1863 is still useful.

Whether the shorter form of Job, in which, according to Jerome's reckoning, 'septingenti ferme aut octingenti versus desunt,' preserved a primitive form, or is, on the contrary, the effect of abbreviation, see vol. ii. p. 164; and correct there the statement from Origen, that sometimes 16 or 19 verses were missing, into 14 or 15 (*Expository Times*, x. 523; Sw. 255).

On Esther see vol. ii. p. 774; the Greek of the book reminds one of 2 Mac. (cf. τρισαλιτήριος); on Jeremiah see ii. 572; and cf. i. 252 as to the identity of language in Jer. and Baruch, which book in all MSS of \mathfrak{E} is immediately connected with Jer. and Lamentations. On the heading of the latter see vol. iii. p. 22. On Daniel see i. 557. Dn 11³⁰ is the only passage where the name of the Ῥωμαῖοι occurs in a translation from the Hebrew (for Ῥῶμα as in \mathfrak{E} Oak Nu 24²²). The affinity of the Greek of this book with that of 1 Esdras has been justly pointed out in i. 761.

In Jeremiah, Esther, and Daniel \mathfrak{E} offers considerable passages not to be found in \mathfrak{fH} ; but in addition to these \mathfrak{E} has preserved whole books, some of them of the highest historical or theological interest, which are not to be found in the Hebrew Canon, partly because they were originally written in Greek, partly for unknown reasons.

The number of these books varies greatly in the still existing documents; of others only the titles have survived; a certain number remained known through the medium of the mediæval Bible as 'Apocrypha' even in the Protestant Churches. On these see art. APOCRYPHA, vol. i. p. 111 ff., and the special articles, as BARUCH, i. 251; † BEL AND THE DRAGON, 276; ESDRAS, FIRST AND SECOND, 757, 763; ‡ JEREMY, EPISTLE OF, vol. ii. p. 578; JUDITH, 822; MACCABEES, BOOKS OF (i.-v.), vol. iii. p. 187; MANASSES, PRAYER OF, 232; further, SIRACH, THREE CHILDREN (SONG OF THE), SUSANNA, WISDOM OF SOLOMON.

That the collection of these books, though it is

transmitted to us almost exclusively through the Church, began to form itself in pre-Christian times, is clear from the contents (see vol. i. 117, iii. 35). A trace that \mathfrak{E} differed from \mathfrak{fH} in its order and extent may be found in Josephus; for he uses not only the Greek Esdras and the Additions to Esther, but follows also the order of \mathfrak{E} (not \mathfrak{fH}) when he counts 5 books of Moses, 13 Prophetical and 4 Poetical books, placing, apparently, Chronicles, Ezra-Nehemiah, Esther (from the Hagiographa) after Kings (see Strack, 'Kanon des AT,' in *PRE³* ix. 752).

On some lists of other Apocryphal books see Sw. p. 281; the Catalogue of the Sixty Books begins after the canonical and so-called 'apocryphal' books (the two Wisdoms, etc.): Καὶ ὅσα ἀποκρυφά· Ἀδάμ, Ἐνώχ, Ἀδάμ, Πατριάρχαι, Προσευχή Ἰωσήφ, Ἑλδὰδ, Διαθήκη Μωυσέως, Ἀνάληψις M. etc. It is an interesting question, whether a trace of this apocryphal tradition is not to be found already in Sirach (49¹⁴⁻¹⁶). For, after he has gone through the whole literature of the OT down to Zorobabel and Nehemias, he suddenly returns to Enoch, Joseph, Shem, Seth, and Adam.

In an appendix to the Cambridge Septuagint at least two of these books have found a place—the *Psalms of Solomon* (the apparatus being much enlarged in the 2nd ed. (iii. 765 ff.)) and the Greek fragments of the Book of Enoch (for the first time added in the 2nd ed. (iii. 789 ff.)). On the Psalms of Solomon cf. the German translation of Kittel in Kautzsch, *Die Pseudepigraphen*, 127-148; on Enoch, the new Berlin edition, *Das Buch Henoch*, herausgegeben von Dr. Joh. Flemming und Dr. L. Radermacher, 1901. Much to be welcomed would be a collection of the OT apocrypha as sketched by Sw. p. 285, including amongst other remains the *Rest of the Words of Baruch*, the *Apocalypse of Baruch*, the *Testament of Abraham*, parts of the *Oracula Sibyllina*, the *Testaments of the XII Patriarchs*, the *Latin Ascension of Isaiah* (with the new Greek fragments published by Grenfell-Hunt in *The Amherst Papyri*, part i. 1900; see on it F. C. Burkitt, *The Classical Review*, xiv. 457-459); perhaps also the Latin versions of 4 Esdras, *Assumption of Moses*, *Book of Jubilees*.

All these additions and omissions cover but the smaller part of the differences between \mathfrak{fH} and \mathfrak{E} ; far more numerous are the variations in the proper sense of the word, the passages where \mathfrak{E} offers a reading different from \mathfrak{fH} . On this point cf. Sw. part ii. ch. v. 'The Septuagint as a Version,' and part iii. ch. iv. 'The Greek Versions as aids to Biblical Study.' A thorough, accurate, and cautious comparison between \mathfrak{fH} and \mathfrak{E} will exhibit these variations. The comparison must be cautious, else there is the risk of stating variations where there are none, and it must be accurate and thorough, else real variations might be overlooked. In the first place, care must be taken to eliminate as much as possible from \mathfrak{E} all intra-Greek corruptions, i.e. clerical errors, that sprang up in the course of transmission of the Greek text, and it is a mistake of many Commentaries to rest content to take the text of the small Cambridge Septuagint as the standard, as former scholars used to acquiesce in that of the Sixtina. Take as example the latest German Commentary on *Genesis*, that of Gunkel (Göttingen, 1901), and the very first note touching the textual criticism of this book. It concerns the use of the Divine names in ch. 2, and runs: 'יְהוָה אֱלֹהִים is found in *Genesis* in Hebrew only in chs. 2. 3 (LXX, differing from the Hebrew, has in 2^a. 7. 9. 10. 22 δ θεός).' Now, this is true of the Codex Alexandrinus: if Gunkel had used the editio Sixtina, he would have had to add vv. 8. 22; and if we are still more circumspect, as commentators ought to be, and resort to Philo, Field's *Hexapla*, the collations of

* Swete's statement, that Origen marked the passage with an obelus, lacks reliable testimony; the words of Jerome are curious: 'in hebraico non haberi nec esse in septuaginta interpretibus, sed in editione vulgata, quae graece sacra dicitur et in toto orbe diversa est.' The words in italics are omitted in Field's quotation from ed. Vall. iv. 688.

† The puzzling fact that on the margin of the Syro-Hexaplaric text of Baruch there are 3 notes stating that certain words in 117²³ are not found in the Hebrew, which has been quoted for a Hebrew origin of this part of the book (i. 252; Sw. 275, n. 3, from Bevan in *Encyc. Bibl.* i. 494), is in contradiction to the remark at the head of the book, that the whole was obelized by Origen, and finds a very simple solution. For these notes do not refer to the text of Baruch, but of the Hebrew OT quoted by Baruch 2³ from Dt 28²³. Origen called attention to the fact that the generalizing 'every man' ἀνθρώπων in Bar 2³ has no ὅτις ἄνθρωπος to correspond in Dt 28²³. Thus these notes are a token of the great care which Origen bestowed on his Hexapla.

‡ On the statement of Sw. p. 265, and Thackeray (*DB*, vol. i. p. 758), that Cod. A entitles both books ἱερὴ, cf. Nestle, *Marginalien* (1893), p. 281, where it is shown that this is merely due to the knife of the English bookbinder, who cut away in both cases the first line of the title *Εξῆς* (or *Εξῆς*) = β.

Holmes, the versions as witnesses for \mathfrak{C} , we must add further v.†; i.e. not 5 times, but 8 times, \mathfrak{C} omits $\eta\eta$ in this chapter, and has it only twice (vv.^{15. 16}).^{*} The second care must be to observe the practice of these translators; cf. Sw. p. 325: 'The Alexandrian translators, while loyal to their original, sometimes even to a fault, manifest nothing like the slavish adherence to the letter with which Aquila has been charged. They often amplify and occasionally omit; they render the same Hebrew words by more than one Greek equivalent, even in the same context; they introduce metaphors or grammatical constructions which have no place in the Hebrew text, and probably at no time had a place there, or they abandon figures of speech where they exist in the original.' There is no mention here of the fact especially urged by Frankel, that the translators followed some sort of exegetical tradition (L. Frankel, *Vorstudien zu der Septuaginta*, 1841; *Ueber den Einfluss der palästinsischen Exegese auf die alexandrinische Hermeneutik*, 1851). We must further bear in mind that the translators were accustomed to the Aramaic speech rather than to the Hebrew. To the examples quoted by Sw. p. 319, add, for instance, Ps 59 (80)⁸ $\eta\eta\eta = \epsilon\lambda\eta\lambda\iota\varsigma$, 140 (141)⁸ $\eta\eta\eta\eta = \epsilon\upsilon\delta\omicron\kappa\lambda\alpha\iota\varsigma \alpha\beta\tau\omega\omega\varsigma$. Already Jerome remarked on this word in Ec 1⁴ $\eta\eta\eta = \pi\rho\alpha\lambda\epsilon\upsilon\sigma\iota\varsigma$: 'non hebraicum sermonem expresserunt, sed *syrum*.' On meanings attached to Hebrew roots known to us only from Arabic see Sw. p. 498, Ps 83 (84)⁷ $\delta\omega\sigma\epsilon\iota$, Dn 7²² (LXX) $\epsilon\delta\delta\theta\eta = \sqrt{\eta\sigma\eta}$.

'A glance into modern commentaries or the 'Critical Notes' after the Hebrew text in *SBOT* will show the importance of \mathfrak{C} in this direction. No conscientious commentator on the Hebrew OT can dispense with constant reference to \mathfrak{C} . We quote some examples from the first chap-er of some books in *SBOT*—

In Gn 1 Ball replaces *chpp* by *mp* = *mayyayk*; but he, too, has overlooked the interesting variant in v.18 (like all commentaries [to our knowledge, Dillmann, Spurrell, Holzinger, Gunkel], except T. M. Michel, *Critische Syllogotische Concordanz über das erste Buch Moses*, 1796; worth of praiseworthy industry), giving the sing. *hnyq*, *h* the pl. *hnyq*, i.e. *hnyq*, the latter being confirmed by Ps 135 (136), where *hnyq* has the pl. *hnyq*, i.e. singular. The same difference is shown by *hnyq*, "he work", and *hnyq*, "his work", in the same passage as the Targum Jonathan, which understands the passage of those 10 wondrous works which God is said by rabbinical wit to have created.

In Lv 1 Driver receives readings of ③ into the text in vv. 2.7 & 16; in Nu 1 Paterson in v. 14 מִיָּאֵל for מִיָּאֵל, אֵל. For Jos 1 it is sufficient to quote Bennett's remark on v. 2: 'In this and other cases glosses, etc., not found in ③ are probably glosses later than the MS from which ③ was translated, and therefore better treated as variations of the text.'

A remark on *Judges* by Moore has already been quoted; in 116 he reads *העסקל* for *עק*; one witness of G and the Coptic offering the doublet *μαρὰ τοῦ λαοῦ Ἀμαλίκ*. The original reading, the simple Amalec, has been found since, for the first time, in the Latin Lugdunensis, published by U. Robert.

On Samuel, after what has been done by Thénius, Wellhausen, Driver, Klostermann, Budde, H. P. Smith, any word is superfluous; but the question may be asked, whether one would have found, e.g., in 1 S ¹² the true reading וַיִּשְׁלַח יְהוָה בְּיָד שָׁמְעֵי by mere conjecture without the help of the versions (*ἡμετέρας ἐπιστήρας*). And if we had hit on it in this way, we should not have had the same confidence in its truth as we have now, when it is attested by the oldest witness attainable.

As far as we have seen, in *every part* of the SBOT that has appeared as yet, one or more readings from C have been received into the text in the first chapter by such different scholars as Cornill, Toy, Wellhausen, Siegfried, Kämpfhausen, Guthe, Kittel. But how much remains to be done may be illustrated by two examples from 1 Ch 1. On v. 5 Kittel remarks: 'C + *Exera*; it has crept in by error from v. 7 after N' (cf. G¹), overlooking the

fact that G has 'Elisa' among the sons of Japheth already in Gn 10². Again, in v.³² Kittel omits to mention the additional names Raguel and Nabdeel, offered by many witnesses, just as in Genesis. *If carefully compared with M, G turns out to be the most valuable aid for the explanation of the Hebrew Bible.*

But **Ε** is not less indispensable to the *study of the NT*: see on this point Sw. pp. 450-457; Pearson's judgment (at the head of this article); Thayer's art. LANGUAGE OF THE NT, vol. iii. p. 40. To quote only one example: **ἀγαπᾷτε** and **μωροῦτε** both correspond in **Ε** to Heb. **יָרֵא**; the one occurs in the Synoptic Gospels, the other in John.

Nor can the student of *Ecclesiastical Literature* succeed without familiarity with \mathfrak{C} (see Sw. pt. iii. ch. v, 'Influence of the LXX on Christian Literature,' p. 461 ff.). The doctrinal as well as the devotional writings are full of its influence. Take a book like Brightman's *Liturgies, Eastern and Western*, where the quotations are printed in black type, or an edition like that of the *Apostolic Constitutions* by Lagarde, which gives at the foot of the text the references to the biblical passages; the index of the latter shows more quotations from the OT than from the NT.

Even many works of *Christian art* cannot be understood without recourse to *Gr.* Cf. D. Kaufmann, 'Errors in the Septuagint and the Vulgate from which Illustrations and Sculptures derived their origin' (*JQR* xi. 163-166). If we speak of the firmament, we do so because *Gr* used στερέωμα, considering the heavens as frozen water.

One side of the importance of **Æ**, which Pearson was not yet able to appreciate, lies in the value it has for *Semitic philology*, apart from the exegesis of the OT. The system of Hebrew vocalization is an invention of about the 7th cent. A.D.; how the words were pronounced in the time of Christ, or Isaiah, or king Meshah,—**Æ** calls him *Mosa*, see vol. iii. p. 349,—or David, or Moses, we do not know. Our oldest witness is again the transliteration of proper names and other words in **Æ**. Whether nouns of the form מֶלֶךְ *melek* were still heard as monosyllables (*malke*), can be ascertained by the help of **Æ**. To have pointed out this importance of **Æ** is one of the merits of Lagarde (*Uebersicht*, etc.); the Supplement to the Concordance of Hatch-Redpath (Fasc. i., containing a Concordance to the Proper Names occurring in the Septuagint, 1900) helps much to facilitate studies in this direction. These transliterations have, *vice versâ*, their bearing on the question of Greek pronunciation; see some remarks in this direction by Kittel (*SBOT*, 'Chronicles,' p. 52f.) and Macke, *Erasmus oder Reuchlin* (Siegburg, Progr. 1900).

On the place which Σ occupies in the *history of the Greek Language*, philologists now judge much more favourably than twenty years ago; cf. ch. iv. in Sw. 289-314, 'the Greek of the Septuagint,' and add to the literature quoted there, p. 314, a reference to Iv. Korsunskie, *Perevod LXX* (Moskva, 1878, 704 pp.), in Russian: *The version of the Septuagint and its importance in the history of Greek Language and Literature*; further, Thayer's art. LANGUAGE OF THE NT, vol. iii. p. 36 ff.; and Paul Kretschmer, 'Die Entstehung der Koine' (*Sitzungsab. d. Wiener Akad., phil. hist. Kl.*, vol. 143, and separately, 1900); Albert Thumb, *Die griechische Sprache im Zeitalter des Hellenismus: Beiträge zur Geschichte und Beurtheilung der Koiné*, Strassburg, 1901 (cf. Ed. Schwyzzer in *Neue Jahrb.* 1901, p. 233 ff.); Oikonomos, *ib.* 914 ff.; Grinfield, 146; H. A. A. Kennedy, 'Recent Research in the Language of the NT' (*Expos. Times*, xii. 341, 455, 557); J. H. Moulton (*ib.* p. 362 in the notice of G. A. Deissmann, *Bible Studies*; *Authorized Tr.* by Alexander Grieve; Edinburgh, Clark, 1901 *).

* Interesting are the philological remarks of Origen (new ed.), IL 367, *tis γὰρ ποτὶ Ἑλλήνων ἰχθύετο τῇ ἐνατίζου προσηγορίᾳ* . . .

* Even in v.15 it is omitted by a few witnesses (Cod. 37, Ambrosius), but Augustine testifies to it, saying expressly: "Nullo modo vacare arbitror . . . quod ab ipso divini libri huius exordio . . . usque ad hunc locum, nusquam positum est Dominus Deus, sed tantummodo Deus: nunc vero ubi ad id ventum est . . . ita Scriptura locuta est: Et sumpsit Dominus Deus."

If the use and importance of \mathfrak{E} are such even in the unsatisfactory condition in which it lies at present before us, how much more will these be acknowledged when we have a better edition of it. In such an edition, also, the accessory matter will demand due attention, the capitulation, lections, etc. (see Sw. pp. 342-366, 'Text-divisions: *Stichoi*, Chapters, Lections, *Catenae*').

(a) In careful MSS of the classics (as in those of Demosthenes, Herodotus) the lines have been counted by hundreds or by fifties, and their total stated at the end, because the copyists were paid according to their number, the normal line or *στιχὸς* being the Homeric hexameter of 16 syllables or 37 to 38 letters on an average.* This has been introduced into Bible MSS. One of the copyists of B, for instance, preserved on the margins the numbers from the MS which he copied; so did Paul of Tella from the copy which he translated (616) into Syriac. Afterwards the numbers were gathered into stichometrical lists; the most important of those lists are that in the Codex Claromontanus, the one first published by Mommsen, and that of Nicephorus; see Sanday, *Studia Biblica*, iii. 266; Sw. 346; Berger, *Histoire de la Vulgate*, 1893, pp. 316-327, 363; C. H. Turner in *JThSt*, II. (Jan. 1901) 236. For books like Sirach and Job (with asterisks, 2200; without, 1800 *stichoi*) these lists are especially valuable.

(b) Jerome introduced into his Latin Bible the custom of writing the text according to *senae-lines*, *καὶ αὐτὰ* or *πόμενα*, 'quod in Demosthenes et Tullio solet fieri'; the same was done for the Greek *Dodekapropheton* by Hesychius of Jerusalem, who at the same time divided the text into chapters.

(c) Such a *capitulation* is found already in some of our oldest MSS, as AB⁵; for several books B gives even a double capitulation, dividing, for instance, Proverbs into 61 and 16, Eccles. into 25 and 7, Canticles into 40 and 5 chapters. Likewise the Syriac *Hexapla* (apparently from the copy from which it was taken) has in Joshua 52 and 11, Judges 65 and 7, 3 Regn. 105 and 18 chapters. In the same version and several Greek MSS summaries, *τίτλοι* or *κεφάλαια*, are added, and lists of them prefixed to the books (Sw. p. 354). The 'Synopsis' ascribed to Chrysostom is, to a large extent, nothing but a collection of such *κεφάλαια*. The 38 chapters into which Hesychius divided Isaiah have been published lately by M. Faulhaber (*Hesychii Hierosolymitani Interpretatio Isaiae prophetae*, Friburgi, 1900). These capitulations may become important hints for the classification of MSS. In Canticles the summaries assume the character of stage directions; see Er. Klostermann, 'Eine alte Rollenverteilung zum Hohenliede' (*ZATW* xix. (1899) 158-162, from Cod. V).

(d) The beginning and the end of the Lessons, which were read in Church already in the times of Origen and still earlier, were marked with *ἀρχή* and *τέλος*, the occasion sometimes being added on which the lesson was read (Sw. p. 356). An early specimen was the copy from which Paul of Tella made his version.

On the division of the Psalter into 20 *καθίσματα* see Sw. p. 359, or any printed Greek Church-Psalter.

Interesting is the different numbering of the Commandments of the Decalogue in AB (see Sw. p. 365), and the division of the Book of the Covenant (Ex 20-23) into 77 sections in the Codex Zittaviensis (H. A. Redpath in *Expos. Times*, viii. 883).

All these particulars must be attended to in a future edition, somewhat in the same way as in the edition of Jerome's Latin NT published by Wordsworth-White; but the chief difficulty is about the constitution of the text. For some books, as Judges, Esther, Tobit, it will be indispensable to give parallel texts. In the closing chapter of his *Introduction* Swete has sketched some of the lines on which a future edition must be prepared. But before this great work can be finished, and for the benefit of all who cannot afford to procure it, it seems desirable to put together, either on the outer margins of the minor edition or in an *Appendix*, those emendations of the errors of B which are certain or all but certain. Still better would be a *Commentary* on \mathfrak{E} , which is as urgently needed as a *Grammar* and a *Lexicon*.†

ἀντὶ τοῦ ἐν τῷ Στμ διέμε; iii. 159, ἰκανοὶν δὲ ἀπὸ Ἑβραϊσμοῦ ἰρην-νίσαντες μὴ ὑπάρχει τὴν λέξιν καμίνην παρ' Ἑλλήνων ἀναπαλα-κίζει δὲ ἐν ἑλλόν πολλὰ καὶ ταῖσι καὶ πινυνοῦναι τὴν ἱεροσ-φοῦσαν. But this very word is found in Cicero, ad *Attic.* xiii. 20.

* By a happy fortune the lines in the Greek NT of the Württemberg Bible Society at Stuttgart agree as closely as possible with the length of the ancient *στιχὸς*; see Nestle, *Introduction*, p. 48.

† Take some examples at haphazard. In 3 Regn. 18¹⁰ all texts (MSS, etc.) give καὶ ἰνερσεν τὴν βασιλείαν ('and he burnt the kingdom'). \mathfrak{E} has וְהָרַבּוּ ('he took an oath of the king-
dom'). This is correct; the translator mistook it for וְהָרַבּוּ.

APPENDIX: THE LATER GR. VERSIONS.—The question whether \mathfrak{E} was used also in Palestine in the synagogues, has been answered affirmatively and negatively. At all events after \mathfrak{E} had passed into the hands of the Church, and an official Heb. text, different from the old one, had received the approbation of the Rabbis, attempts were made among the Jews at new translations. From Justin we learn that the Jews declared \mathfrak{E} to be wrong in some details (*μὴ εἶναι ἐν τισὶν ἀληθῆ*), and that they tried new translations (*αὐτοὶ ἐξηγεῖσθαι πειρῶνται*). Irenæus mentions two who *dared* such a thing in his time (*ὡς ἐπὶ τοῖς πασὶν τῶν μεθερμηνεύειν τολμῶντων τὰς γραφάς*)—Theodotion of Ephesus and Aquila of Pontus, both Jewish proselytes. Origen was so zealous as to procure both these translations and, in addition, that of Symmachus and parts of three more. With those materials he composed his Hexapla (see above). And all that we knew till quite recently of these translations—apart from a few Talmudic translations from Aquila—we owed to Origen. It was only in 1897 that the first fragments of a separate copy of Aquila were found among the palimpsests of the Taylor-Schechter collection; but even those may go back to the library of Origen. For brevity's sake we must refer to Sw. pp. 29-58.

(1) The version of **Aquila**, according to one tradition *πεντεπλῆς* or *πεντεπλὸς* of the emperor Hadrian, superintendent of the building of *Ælia Capitolina*, won for Christianity, but finally pupil of R. Akiba, is the most literal imaginable. By the emperor Justinian it was ordered that no other was to be used in the Jewish synagogues. It is therefore possible that the copy of which fragments were found among the Hebrew-Greek palimpsests from Cairo, and which is ascribed to the 6th cent., may have been a synagogue copy. But as it has been used for Jewish purposes apparently by the same time and hand which turned the fragments of Origen's Hexapla to the same use, both Greek MSS may have come from the same quarter; and of the Hexapla it is the more probable that it came from Christian hands, because fragments of Greek MSS of the NT were found along with them. See, besides the publication of Burkitt, Taylor's new book mentioned above. On plates iii-viii it contains portions of Ps 90-92. 96-98. 102. 103. Another small but interesting fragment of Aquila (mentioned by Sw. p. 170, postscript) has been published by Grenfell-Hunt in *The Amherst Papyri*, part i. (Lond. 1900, pp. 30, 31). On the top of a letter from Rome, written probably between 250 and 285 A.D., an uncial hand of the late 3rd or, more probably, early 4th cent. has written part of the first verse of the Epistle to the Hebrews, and a more cursive hand, apparently about the time of Constantine, the first 5 verses of Genesis in \mathfrak{E} , followed by the version of Aquila. These two biblical fragments may therefore claim 'to be amongst the earliest known, and the Genesis fragment is the oldest authority for the first 5 verses.' In the Aquila fragment the beginning of v.⁴ and the end of v.⁵ are here recorded for the first time.

The Hebrew text which was translated by Aquila agrees very closely with \mathfrak{H} ; but it is interesting to observe that, of his few variations, some at least have the support of still existing Hebrew MSS. The tetragrammaton יהוה is written in the old Hebrew letters. The version seems to have covered the whole of the Hebrew canon.

(and he satisfied, *ἰκανοῖς*). Again, we have in 19¹¹ *ἐνέμενον* for *οὐκ ἐν πν. κερὸς*, the latter (*κέρως*) being read in A. A commentary would have further the task of calling attention to the interpolation; cf. Ps 44 (45)⁷, where it is a question whether there must be a comma before and after *ἰ θες*, or in v.⁸ after *ἰχρὸς* *σε*, or in Is 61¹ after *ἰχρὸς* *με* and *ἀντιπάλαι* *με*. In Is 7¹⁶ *ἀντιβί* is in the Concordance of Hatch-Redpath referred to *ἀντιβί*, while it is a verb, etc.

Strange is the statement of Origen on *Lamentations* (new edition, iii. 256): "Ἐκδοσις δὲ Ἀκύλα καὶ Θεοδοτίωνος ἐν τοῖς ὁρθοῖς οὐ φέρεται, μόνου δὲ Συμμάχου καὶ τῶν Ἐβδομήκοντα, especially when we compare the same author's remark on 4th (p. 276): ὁ δὲ Ἀκύλας ἐφη πνεῦμα μνητῆρων ἡμῶν, Σύμμαχος δὲ πνοή μ. ἡ. (see Field, ii, 743 ff.).

(2) Theodotion's work—on his date see Sw. p. 42 f., and Th. Zahn, *PRE*³ ix. 403 (on Irenæus)—was rather a revision of *ε* than an independent version, the revision being made on the whole upon the basis of *ffl*. For a specimen of it see Jer 40¹⁴⁻²⁶ and the Bk. of Daniel, where it replaced the original *ε*; see S. R. Driver, *The Book of Daniel*, in the Cambridge Bible for Schools, 1900, pp. xviii, xcvi-c. The statement that his version seems to have included Baruch (*Dict. Chr. Biog.* iv. 44; Sw. p. 44, etc.) is to be corrected after the explanation given above, p. 450, note †. Cf. on Theodotion (whose name has the same meaning as that of the Targumist Jonathan), Rahlfs in *GGN*, 1898, p. 109.

(3) The works of Symmachus, including a Commentary on St. Matthew,* Origen got from a Christian woman, Juliana,† who had received them from the author himself. If Aquila is the most important of the three because of his literalness, Symm. is in many respects the most interesting for his attempt to produce good Greek and for many of his interpretations; cf. Gn 1²⁷ ἐκτίσεν ὁ θεὸς τὸν ἄνθρωπον ἐν εἰκόνι διαφύρου ὁρθίου [ὁ θεὸς] ἐκτίσεν αὐτὸν with 1 S 28¹⁴ (Nestle, *Marginalien*, p. 3).

(4) Besides these versions of the whole of the OT, Origen had at his disposal for single books two or three other versions, which from their place in the Hexapla got the designations *Quinta* (ε' πέμπτη), *Septa* (ζ' ἑκτη), *Septima* (ζ' ἑβδόμη). As to whence and when he obtained them, tradition varies (see Sw. p. 53 ff.): one at Nicopolis near Actium, the other at Jericho; one under Caracalla, the other under Alexander Severus. One at least is reported to have been found ἐν πύλαις; from this and from the expression of Eusebius, οὐκ οἶδ' ὅθεν ἐκ τινῶν μυθῶν τὸν πάλαι λαθρονοῦσας χρόνον εἰς φῶς ἀνιχνεύσας, it has been concluded that they were, perhaps, hidden during a time of persecution, and that the one found at Nicopolis may have been a relic of the early Christianity of Epirus (see Sw. p. 55, quoting from Lightfoot, *Biblical Essays*, p. 432). But πύλαις—see Sw. p. 53, n. 2—are mentioned elsewhere, as used for preserving books instead of *cistæ* or *capsæ*. Jerome attributes both to Jewish translators; but they seem rather to be due to Christians. The author of the *Quinta* is characterized by Field as *omnium elegantissimus*. Which of the books of the OT were preserved in them is not quite clear; in the *Quinta* at all events 4 Regn., Job, Psalms, Canticles, Minor Prophets; in the *Septa* also Job, Psalms, Canticles, Hab 3.

A kind of version sometimes seems to be quoted as ὁ Σόπος (see SYRIAC VERSIONS) and ὁ Ἐβραῖος; but under the latter designation are to be understood Greek quotations from the Hebrew, due to such authors as were acquainted with that language.

The so-called *Græcus Venetus*, a version of part of the OT, preserved in a single MS of the 14th or 15th cent. at Venice, is interesting as the work

of a mediæval Jew, perhaps a certain Elisseus at the court of Murad I. at Adrianople in the 2nd half of the 14th cent.: it attempts to give the Hebrew in Attic Greek and the Aramaic parts of Daniel in the Doric dialect, and renders *יהי* by *δωτωτής*, *οὐσιωτής*, *δωτουργῆς*. See the edition of O. v. Gebhardt (Leipzig, 1875, with a Preface by Franz Delitzsch; Sw. p. 56).

The Greek column of the Hebrew-Chaldee-Spanish-Greek Polyglot of the Pentateuch, printed at Constantinople in Hebrew characters (1547), has been transliterated and printed separately (1897) by D. C. Hesselung, and described by Lazare Belletti (Paris, 1897, *La version néogrecque du Pentateuque Polyglotte*). It is of interest for the student of modern Greek, and so are the translations of the whole Bible or of parts of it into modern Greek; but they do not fall within the scope of the present article. Of the OT as a whole the Catalogue of the British Museum mentions but one edition in modern Greek (London, 1840, by H. D. Leevess, assisted by N. Bambas).

LITERATURE.—At the end of the article on the Greek Bible Versions (*PRE*³ iii. 20 = *Urt.* 80) the present writer has given a list of about 280-300 books and articles treating of these versions from 1601 up to 1897 in chronological order. Swete gives in his *Introduction*, at the end of most chapters, literary references, amounting to about 600 in number. The first list (p. 27) embraces a mere fraction of the vast literature selected for the purpose of representing the progress of knowledge since the middle of the 17th cent. It begins with the *Critica sacra* of S. Cappellus, 1651; Pearson's *Præfatio* and Ussher's *Synagoga*, 1655; the *Prolegomena* of Brian Walton, 1657. It is impossible to repeat these lists here. A few remarks must suffice. The most copious work on *ε* that appeared in the 19th cent. is that of Constantine Oikonomos *επι τῶν ε' ἰσχυμένων*, 4 vols., Athens, 1844, 1845, 1846, 1849, more than 3700 pages. Though it starts from wrong premises (canonical and inspired character of *ε*), it contains much useful information; in vol. iii. 130 pages are devoted to the difference of chronology between *ε* and *ε*, in the last vol. 170 pages to the quotations of the NT, 325 paragraphs to a list of the writers who used or praised *ε*. The author may be compared to Grinfield, whose *Apology for the Septuagint* (Lond. 1850) is equally wrong in its principles, but still useful. Of Jewish books L. Frankel's *Vorstudien zur der Septuaginta* (Leipzig, 1841) and *Ueber den Einfluss der palästinenischen Exegese auf die alexandrinische Hermeneutik* (1851), are not superseded. A standard work for all times remains, H. Hody, *de bibliorum textibus originalibus*, Oxf. 1705. On the views of the ancient Church, especially Jerome and Augustine, it is useful to compare P. Wendland, 'Zur ältesten Geschichte der Bibel in der Kirche' (*ZNTW* [1900] 267 ff.). On Augustine see also Joh. Hausleiter, *Der Aufbau der altchristlichen Litteratur. Eine kritische Untersuchung nebst Studien zu Cyprian, Victorinus und Augustin* (Berlin, 1898 = *GGA*, 1898, v. 337-379). Of all the scholars of the 19th cent. none has done more in this field than Paul de Lagarde (1827-1891). Of his publications which bear directly or indirectly on *ε*, note: *Libri apocryphi syriaci* 1861, *Constitutiones Apostolicæ* 1892, *Anmerkungen zur griechischen Uebersetzung der Proverbia* 1863, *Clementina* 1865 (Preface), *Pentateuch koptisch* 1867, *Materialien zum Pentateuch* 1867 (here the notice on the original copy of *ε*), *Genesis graece* and *Hieronymi quaestiones in Gen.* 1868, *Onomastica sacra* 1870, *Psalterium Hieronymi* 1874, *Psalterium memphiticum* 1875, *Synmicta* I and II, *Semítica* II 1879, *Orientalia* II, *Veteris testamenti ab Origene recensiti fragmenta* 1880, *Ankündigung einer neuen Ausgabe der griechischen Uebersetzung* 1882, *Librorum veteris testamenti canonicorum pars prior graece* 1883 (cf. *GGA*, 1883, 1249-52), *Aegyptiaca* 1883, *Mittheilungen* I.-IV. 1884, 1887, 1889, 1891, *Probe einer neuen Ausgabe der lat. Uebersetzungen des AT* 1885, *Catenæ aegypt.* 1896, *Specimen novæ edit. psalterii graeci* 1887, *Septuaginta-Studien* I.-III., 1891, *Bibliotheca syriaca quæ ad philologiam sacram pertinet* 1892, *Psalterii graeci quinquagena prima* 1892. Among the MSS he left there is a complete collection of the biblical quotations of Augustine (13,176 from OT and 29,540 from NT, now in the University Library of Göttingen), MS Lagarde 34, and others; see *Urt.* p. 77. No other scholar can be mentioned beside him.

Among articles in Encyclopedias add: Hoberg, 'Septuaginta' in *Wetzer-Welte's Encyclopædie* 21. (1890) 147-159.

To Sw. p. 56 (Lit. on Hexapla) add the first attempt to collect their fragments made by J. Driesschus (= Drusus) in *psalmos Davidis veterum interpretum fragmenta*, Antw. 1581; the enlarged edition of the collection of Nobilius in the Latin translation of the *editio Sixtina* (Rome, 1588, reprinted by P. Morinus, 1624, see above, p. 440); Bahrdt's abridgment of Montfaucon's *Hexapla* (Lips. 1769, 2 vols.).

To Sw. p. 108 (Coptic version) add: J. Goettalberger, 'Die syro-koptischen Bibelcitaten aus den Scholien des Barhebraeus' (*ZATW* xxi. [1901] 128-140).

To Sw. p. 110 (Ethiopic) add: Osw. Kramer, *Die aethiopische Uebersetzung des Zacharias: eine Vorstudie zur Geschichte und Kritik des Septuagintalexzes*, erstes Heft, Leipzig, 1896.

* On the hope that this work was still in existence in the 16th cent. see *Urt.* p. 83. On the sect of the Symmachian see Philastrius, *de hæres.* c. 145: 'hæretici alii qui Theodotionis et Symmachii ibidem interpretationem diverso modo sequuntur,' and the remark of the same writer, c. 115: 'est hæresis, quæ iterum post Aquilam triginta hominum interpretationem accipit, non illorum beatissimorum septuaginta duorum qui integre inviolatæque de Trinitate sentientes ecclesiam catholicam fundamenta certissima tradiderunt interpretantes scripturas sacras.'

† The tombstone of a certain Juliana from Antioch, who died at Germa, has been found there by Merrill; see *RB*, 1895, 386; Schürer, *GVV*² II. 143 n., 332.

To Sw. p. 119 (Armenian) add: J. Goetteberger, 'Die syro-armenischen . . . Bibelcitäre . . . des Barhebraeus' (ZATW xxi. [1901] 101-127).

To Sw. p. 280 (Canon) add: H. L. Strack, art. 'Kanon des Alten Testaments' (PRE³ ix. 741-767).

To Sw. p. 263 (Canonical Books), on Ecclesiastes, add: Dillmann. On Canticles: Wilh. Riedel, *Die Auslegung des Hoheliedes*, Leipzig, 1898, pp. 105-109, *Die Hds. der griech. Übersetzung des Hl.* On Daniel: Riessler, *Das Buch Daniel: Textkritische Untersuchung*, Stuttgart, 1899, pp. 52-59, where the close relation between the LXX of Dan. and 1 Esdras is recognized.

To Sw. p. 285 (non-Canonical Books) add: W. J. Moulton, 'über die Überlieferung und den textkritischen Wert des dritten Ezra-Buches' (ZATW, 1899, ii. 209ff.; 1900, i. 1ff.). Judith: Willrich, 'Esther und Judith', in *Judaica*, Göttingen, 1900, 1-39. On Tobit: M. Löhr, 'Alexandrinus und Sinaiticus zum Buche Tobit' (ZATW xx. [1900] 243-263). On Maccabees: R. Niese, *Kritik der beiden Makkabäerbücher*, Berlin, 1900 (reprint of two articles in *Hermes*, xxxv, 268-307, 453-527); * Willrich, 'Jason von Kyrene und das II Makkabäerbuch', in *Judaica*, pp. 181-176.

Sw. p. 380 on Philo. Note in addition to the paper mentioned (374 n. 3) from the *Philologus* the answer of Wendland-Cohn, pp. 521-536, and the rejoinder in vol. ix. pp. 274-279. On Josephus the earlier treatises of Spittler (1779) and J. G. Scharfenberg (1780) still deserve mention. Oikonomos has a chapter of 90 pages, *ὅτι καὶ τὰς τοῖς ἀρχαῖς ἰσχυρὰς ἐποφάνειαν* (1780), ii. 76ff.

Sw. p. 404 (Quotations in the NT). The extent of these quotations has been estimated by Spearman in the anonymous Letter on the Septuagint (1759) as equal in length to Ps 119; by Grinfield (1850) as twice that length or the extent of Mark. The first collection seems to be in the Greek Testament of R. Stephen (1550), about 250 passages; the first treatment of these quotations in England by Bishop Wettenhall, *Scriptures Authentic and Faith Certain* (1603); further, Randolph, *The Prophecies and other Texts cited in the NT*, 1782, 1827; Grinfield, p. 142. On Hühn see *Expos. Times*, May 1901, 355. Of Dittmar, *Vetus Testamentum in Novo*, a second part is in course of preparation.

Sw. p. 477 (Influence of G on Christian Literature). See Oikonomos, vol. iv. E.B. NESTLE.

SEPULCHRE (קבר 'grave,' קברא 'burying-place' [Mishn. כּוּבֵי, כּוּבֵי, burial lairs or niches]; Gr. *μνημα*, *μνημείοι* 'tomb,' 'monument,' *τάφος* 'sepulchre') is represented in Scripture, and particularly in OT, not only by these Hebrew and Greek equivalents, but also by words and phrases which are synonymous. It is *the pit* (בּוֹר Is 38¹³), *the stones of the pit* (בּוֹר אֲבֹנֵי Is 14¹⁰), *a man's house* (בֵּית Is 14¹⁸), *his everlasting house* (בֵּית עֹלָם Ec 12⁵), *the house of assemblage for all living* (בֵּית מִסְכָּה לְכָל חַיִּים Job 30²³), and *field of burial* (שָׂדֶה הַקְּבָרָה 2 Ch 26²³).

Of the terms used for the grave by the later Judaism none is more significant than the *house of the living* (בֵּית הַחַיִּים), and this is the euphemism by which the burying-place of the dead is now generally designated by modern Jews. 'We are the dead, they are the living,' was the remark actually made to the present writer by an aged Rabbi in Smyrna, whose office it was to attend at the burial of his Jewish kinsmen, and see them laid to their last rest. The ancient Egyptians thought of the departed as the living, and called the coffin *the chest of the living*. The Egyptian conception of the grave as the *everlasting house* was not, however, inconsistent with a strongly cherished hope of resurrection. But there was no expectation among the Jews of a return to earthly life in the original body, such as prevailed among the Egyptians and led among them to the embalming and preservation of the dead. The later literature of Judaism speaks rather of a general resurrection, when the souls of the departed shall enter into new bodies and live on in them.

The terms employed to describe the grave are

* Niese begins with the remark, that the origin of the common text in Holmes-Parsons, Tischendorf, etc., was apparently accidental and arbitrary ('offenbar ziemlich zufällig und willkürlich entstanden'); Kautzsch, *Apokryphen*, p. 32, gives 'aus cod. V. und aus nicht näher bezeichneten Minuskelcodices'; Fritzsche, *Libri apocryphi*, p. xix, 'nescio unde desumptus.' Now take the edition of 1583, where Nobilius remarks on 1 Mac 420 'Addendum est ex codice quem potissimum in his libris sequuti sumus et multis aliis ei scripi' *leiden*'; on 84 'delendum est ex auctoritate codicum quos sequuti sumus et vulgate illud i.e., quod in multis antecedit et in nostram editionem per typographi incuriam irrepsit.' These and similar passages confirm the present writer's suggestion (see Sw. p. 181, n. 2), that, besides the Aldine edition, Cod. Ho 19 has been used for the Sixtine edition. To these there must perhaps be added 64 (93).

† It is natural to connect such an expression with the argument which Jesus summed up in the memorable words, 'God is not the God of the dead, but of the living' (Mk 12²⁷). Cf. also the striking words 4 Mac 16²⁵ 'Those who die on behalf of God live unto God, as do Abraham, Isaac, and Jacob.'

used often to describe the Underworld where the dead live on. The gathering-place of the departed in the world beyond is, as above, *the pit* (Is 38¹³), *the nether parts of the earth* (Is 44²²), *Sheol and Abaddon* (Job 28⁵, Pr 15¹¹), *the pit of destruction* (Ps 55²³), *the place of silence* (Ps 94¹⁷ 115¹⁷), *the land of darkness and of the shadow of death* (Job 10²¹). 'Hence,' says Dr. Salmond,*

'the distinction is occasionally sunk in the OT, and it became confused in the later usage of the Targums. But that *Sheol* denotes a definite realm of the dead, and is not identical with the grave, appears from the usage of the term, and is recognized by the ancient Versions. It is to Sheol that Jacob speaks of going to join the son whose death he mourns, but of whose burial he knows nothing. It is Sheol that swallows up Korah and his company alive. That a common habitation of the dead like the *Sukla* of the Babylonians, the *Hades* of the Greeks, the *Orcus* of the Romans, is meant, is indicated also by the fact that the expressions to be gathered to one's people or to one's fathers, to go to one's fathers, to sleep with one's fathers, are used in cases like those of Abraham, Jacob, Aaron, Moses, David, and others, where the temporary or permanent resting-places were far removed from the ancestral graves.'

A touching illustration of the father looking forward to a meeting in another world with a departed child is David's 'I shall go to him, but he shall not return to me' (2 S 12²³). But while Sheol is thus 'the house of assemblage for all living,' it was in the sepulchre of his fathers, in the ancestral burying-place and with his departed kindred, that the ancient Israelite desired to be buried. And there can be no doubt that the wish to be reunited with parents and children in Sheol had to do with the desire to be buried in the family sepulchre. The object of burial, not merely in a grave but in the family grave, was to introduce the departed into the society of his kinsfolk and ancestors. In the earliest times this society was supposed to exist either in the family grave or in its immediate neighbourhood.† 'Bury me not, I pray thee, in Egypt,' said the dying Jacob to Joseph, 'but I will lie with my fathers, and thou shalt carry me out of Egypt and bury me in their burying-place' (Gn 49²⁹⁻³⁰, cf. Joseph's burial, Jos 24²²). And nothing could be more pathetic in this reference than the request of Barzillai, who declined king David's invitation to live with him at court, and said, 'Let thy servant, I pray thee, turn back again, that I may die in mine own city, by the grave of my father and my mother' (2 S 19³⁷ RV). It was a duty of piety to see the bones of the dead placed in the family sepulchre, as David did for the bones of Saul and his sons (2 S 21¹³⁻¹⁴); and it was the proper punishment of disobedience to the command of Jehovah that a man's carcass should not come into the sepulchre of his fathers (1 K 13²⁴). To be deprived of burial was the last indignity and the greatest of calamities; the spirits of the unburied dead were believed to wander restlessly abroad, or to lie in recesses of the pit, if they were admitted into Sheol at all (Ezk 32^{25a}, Is 14¹⁵). For this reason the possibility of death at sea was regarded with horror. So, too, no vengeance upon enemies could be more cruel than to throw their bodies to the dogs, or to allow them to rot upon the battlefield, or to be left as a prey to the fowls of heaven and the beasts of the field (Ezk 39⁴, 2 K 9³⁶). Of Jason, who 'slaughtered his own citizens without mercy,' it is said (2 Mac 5¹⁰), 'he that had cast out a multitude unburied had none to mourn for him, nor had he any funeral at all, or place in the sepulchre of his fathers.' But the humane prescription of the law of Moses was that the criminal hanged upon the gallows should be buried, and buried at all hazards, on the day of execution (Dt 21²³); and in the case of the enemies of Israel captured and hung we find the law precisely carried out (Jos 8²⁹ 10²⁶). The treat-

* *Christian Doctrine of Immortality*, p. 199 [1901 ed. p. 161].

† R. H. Charles, *Eschatology: Hebrew, Jewish, and Christian*, p. 31 ff.

ment of the body of Jesus (Jn 19⁴¹), and the burial of John the Baptist (Mt 14¹²), and of Stephen (Ac 8²), by their friends are later illustrations. Even suicides received the ordinary rites of burial, as is seen in the case of Ahithophel (2 S 17²³). It was the duty of any one who found a corpse in the open field to give it burial (To 1¹⁸ 2⁸, cf. 1 S 21¹⁰); and it is creditable to Jewish feeling that the bodies of the Gentile dead were allowed to rest in the Jewish burying-place side by side with Jewish remains.*

Into the family grave only members of the family were admitted. In the Nabatean sepulchral inscriptions† a curse is pronounced upon the man who defiles or sells a grave, or who buries in it any who are not members of the family. And the famous inscription on the tomb of Eshmunazar, king of Sidon, pronounces doom upon any who may disturb his repose, or open or carry off his coffin for the sake of treasure,—may they have no rest among the departed, may they be buried in no grave, and may they have no prosperity in their city!‡ The family grave was holy ground and a permanent possession. The family might lose their estate, but never the ancestral tomb; for in selling land no Jew could dispose of the burying-place, to the use of which his descendants were entitled to all time.§

When the Jewish people came to be dispersed among the nations it was an object of solicitude and ambition to be buried in the sacred soil of Canaan. 'Whoever,' says the Talmud, 'is buried in Palestine is as if he were buried under the altar.' And again: 'Whoever is interred in Babylonia is as well off as if he lay in Palestine, and whoever is buried in Palestine lies the same as under the altar.'¶ About the 3rd cent. it became 'a pious custom to be buried in Judaea's holy earth, to which was attributed an expiatory power. The resurrection was confidently expected to take place in that country, which it was also believed would be the scene of the coming of the Messiah. Those who had died in unhalloved countries would roll about in the light loose earth until they reached the Holy Land, where they could be revived. In place of living inhabitants who were continually decreasing, Judaea was becoming every day more thickly populated with corpses. The Holy Land, which had formerly been an immense temple, inspiring great deeds and noble thoughts, was now a holy grave which could render nothing holy but death.'‡

Burial was the universal mode of disposing of the dead at all periods of Jewish history [see BURIAL]. **Burning**, which was the Babylonian and Roman usage, was among the Jews a death punishment inflicted for aggravated transgressions rather than a mode of disposing of the dead (Gn 38²⁴, Lv 20¹⁴ 21¹⁰, Jos 7²⁵, 1 K 13², 2 K 23²⁰). Even when criminals had suffered the last penalty of the law by stoning or burning, or where, as in the case of Saul and his sons, slain in battle, necessity required that their bodies should be burned (1 S 31¹² 13), their remains or ashes were provided with a resting-place in the bosom of the earth.** There was great variety in the choice of a burying-place among the Jews, at least in the earliest times. Abraham buried Sarah in the cave of the field of Machpelah (Gn 23¹⁹); Deborah, Rebekah's nurse, was buried under an oak (Gn 35⁸); Jacob buried Rachel (see, above, p. 193*) by the wayside (Gn 35¹⁹); they buried Joshua 'in the border of his inheritance in Timnath-serah, which is in Mt. Ephraim' (Jos 24²⁰); and the men of Jabesh-gilead buried the bones of Saul and his sons under a terebinth (1 Ch 10¹³). Burial in the open street or at cross roads was expressly forbidden by the enactments of later times. There does not appear to be evidence in the Scripture his-

tory to warrant the statement that the family grave was originally in the house.* This belongs, so far as it appears to have been the case, to a later time, and is represented as an exceptional honour reserved for kings, prophets, and other outstanding personages (1 S 25¹, 1 K 2³⁴, 2 K 21¹⁸, 2 Ch 33²⁰). In Babylonia and Assyria, at all events, 'only members of the royal family were permitted to be buried within the precincts of the town. Their bodies might be burned and entombed in one of the many palaces of the country. We are told of one king, for instance, that he was burned or buried in the palace of Sargon; of another, that he was burned in his own palace. The practice throws light on what we read in the Books of Kings; there, too, we are told that Manasseh "was buried in the garden of his own house" (2 K 21¹⁸), and Amon in the "garden of Uzza" (2 K 21²⁰). Private burial in the palaces they had inhabited when alive was a privilege reserved for the kings alone.'† The sepulchres set apart for the kings of Judah (קברות המלכים) are specially mentioned (2 Ch 21²⁰ 24²⁸ 28²⁷). Not all the kings were privileged to receive interment in the royal mausoleum. Neither Joash nor Jehoram was buried in the sepulchres of the kings (2 Ch 21²⁰ 24²⁸), whilst Jehoiada was accorded the honour 'because he had done good in Israel and towards God and his house' (2 Ch 24¹⁶). The remains of Uzziah were not admitted to the sepulchres of the kings, but were interred in 'the field of burial which belonged to the kings, because they said he was a leper' (2 Ch 26²²). It is not possible to locate 'the sepulchres of the kings' in Jerusalem. It seems to be implied in a statement of the prophet Ezekiel (43⁷⁻⁹) that certain kings of Judah were buried close to the temple, if not actually within its precincts; and though there is no record of such a thing in the historical books, the statement is justified by the fact that the royal palaces, within which some of them were interred, and the first temple, stood virtually within the same enclosure. There were also common burying-places called 'the graves of the children of the people' (2 K 23⁸, Jer 26²³), into which the dead were sometimes cast in dishonour and contempt.

To prepare for himself a tomb in his lifetime has been the custom of every right-thinking Jew from early times down to the present day. Shebna, whose Jewish origin, however, is doubtful (Is 22¹⁶), Asa (2 Ch 16¹⁴), Joseph of Arimathea (Mt 27⁶⁰), are instances in point. The custom was not confined to the Jews, for we find it followed by the Pharaohs, who built pyramids to receive their remains, by Eshmunazar, by the Caliphs, and others.

Of the sepulchres and sepulchral monuments of the ancient Hebrews and the later Jews it is possible now to give an adequate description and a fairly complete history. We owe this to the labours—often skilled labours—of residents and travellers in Palestine, and especially to the organized and persevering efforts of the Palestine Exploration Fund and the kindred German *Palästina-Verein*. The sepulchral remains of Western Palestine, in particular, have been in many cases carefully examined and measured and described, with plans and sketches, in the Reports and Memoirs of these societies. We can now classify the sepulchral remains according to the type which they represent, and even, with some measure of certainty, assign them to the period to which they belong,—to the Phœnician or Hebrew, Jewish, Herodian, Roman, Byzantine, Saracenic, or Crusading periods. There are three principal types of ancient tombs

found in Western Palestine: * (i.) Rock-hewn Tombs; (ii.) Masonry Tombs; (iii.) Sarcophagi.

i. ROCK-HEWN TOMBS.—These are by far the most numerous, and they are found in many varieties. They are also the earliest in date. The soft limestone ranges of Western Palestine and Syria were honeycombed with natural caves, admitting of easy enlargement and adaptation. They had been available for the shelter of the living before being used for the reception of the dead (1 S 22¹ 24³). The usual form of Hebrew tomb in the earliest period took advantage of these caverns in the soft strata of limestone. In this the Hebrews copied the Phœnicians, whose principle of architecture, Renan tells us,[†] was the carved rock, not the column, as with the Greeks; but in point of architectural taste and skill they were far behind their masters. In striking contrast to the Egyptian sepulchral monuments,—massive pyramids and vast underground chambers,—the Hebrew tomb, whether single or more complex, was marked by extreme simplicity. In fact, simplicity of construction and absence of architectural ornament are the surest notes of the antiquity of a Hebrew sepulchre. No less remarkable is the contrast between the inscriptions and wall-paintings on Egyptian tombs—as at Beni-Hassan and elsewhere—and the plain and unadorned simplicity of Hebrew tombs, which until a late period are entirely devoid of inscriptions. In some cases tombs are found singly on the hill-sides, as though individuals chose to have their last resting-place in their own vineyard, like Joseph of Arimathea, who had his own new tomb in his garden. More often they form a regular burying-ground or cemetery. Tombs of notable personages, like the so-called Tomb of Joshua, have generally other tombs around them, the desire being strong among all Orientals to be laid near to some holy man or national hero.

(1) The simplest form of rock-hewn tomb is that in which a grave has been sunk in the surface of the rock to receive the body, and fitted with a slab, let in round the mouth, to cover it, the cover being sometimes flush with the flat surface of the rock, and sometimes raised and ornamented like the lid of a sarcophagus.

(2) Another simple form of tomb is an excavation driven into the face of a rock—called קֶבֶר, plural קְבָרִים—just large enough to receive a corpse, the mouth being closed by a rough stone slab.

(3) The most common description of tomb is that in which a number of *kokim* are grouped together in one or more chambers of the same excavation. These, again, are in three varieties: (a) A sepulchre consisting of a *natural cavern* in one of the softer strata of limestone, having *kokim* cut in its sides with their beds on a level with the floor, the mouths of these being closed by rough stone slabs, either made to fit close, or only resting against the perforated face of rock. (b) A sepulchre where a *square or oblong chamber* has been cut in the rock, and *kokim* ranged along three of its sides, their mouths closed by neatly dressed stone slabs fitting closely, the entrance to the chamber itself being by a low square opening, fitted with a slab in the same manner, or with a stone door turning on a socket hinge, and secured by bolts on the inside. In this kind of tomb there is usually a bench running in front of the *kokim*, and raised from 1 ft. 6 in. to 3 ft. above the floor of the excavated chamber. (c) A sepulchre in which one entrance leads into a number of chambers, each containing *kokim*. Such tombs generally have a

sort of porch or vestibule hewn in the rock, the front of the roof being often supported by pillars of natural rock surmounted by a frieze, and bearing other kinds of ornamentation. From this porch a low door leads into an antechamber, with or without tombs, from which access is obtained to the tomb chambers, all of which have raised benches running in front of the *kokim* openings. Some of the chambers have, instead of *kokim*, arched recesses (*arcosolia*) cut out in their sides, in which the body was laid, or perhaps a sarcophagus placed. The so-called Tomb of Joshua at Tibneh, on the Roman road from Antipatris to Jerusalem, is of this class. It is prominent among the nine tombs that make the rock cemetery of the place, and has a portico supported on rude pieces of rock with very simple capitals. There are niches for over two hundred lamps, arranged in vertical rows, giving the appearance of an ornamental pattern, and all smoke-blackened. 'Entering the low door,' says Conder, 'we find the interior chamber to be a square with five *loculi*, not very perfectly cut, on their sides. The whole is quite unornamented, except by four very rough brackets supporting the flat roof. On becoming accustomed to the darkness, one perceives that the central *loculus* at the back forms a little passage about 7 ft. long, 2 ft. 6 in. high, and 3 ft. 4 in. broad, through which one creeps into a second but smaller chamber, 9 ft. 3 in. by 8 ft. 1 in., and 5 ft. 5 in. high. In this, opposite the entrance, a single *loculus* runs at right angles to the wall, and a single niche is cut on the left for a lamp.'

Conder (*PEFS*, 1878, p. 31) classifies the rock-cut tombs as follows:—1. *Kokim* tombs. 2. *Loculus* tombs. 3. Sunk tombs. The first two classes he believes to be of Hebrew and Jewish origin, but the third more likely to be Christian of the Byzantine period. The word *kok* and its plural *kokim* designate the pigeon-holes or tunnels running in from the side of a sepulchral chamber, each having room for a corpse and nothing more. The designation *loculus* (*locus in sepulchro*) is applied to the *shelf*, or *trough*, or *bench* receptacle for the corpse, which is of later use than the *kokim*. In many tombs which have been examined there is a mixture of both *kokim* and *loculi*, indicating a transition period about the Christian era or earlier. 'The *kokim* tombs,' Conder explains, 'are those which have parallel tunnels running in, three or four side by side, from the walls of a rectangular chamber. The bodies lay with their feet towards the chamber, and stone pillars for raising the heads are often found at the farther end. The *kokim* vary in number from one or two up to fifteen or twenty, and are of various lengths, from 3 or 4 to 7 ft. There is no system of orientation, and the entrance door is in the face of the cliff, the chamber within being directed according to the lie of the rock. This kind of tomb is certainly the most ancient in the country, for the *kokim* are sometimes destroyed in enlarging the tomb on a different system.' These tombs were used by the Jews. This is proved by a rare Hebrew inscription, by a representation of the seven-branched golden candlestick, and by the fact that some of them are sacred to modern Jews as the tombs of their ancestors, and that their measurements agree with the prescriptions in the Talmud. The *kokim* are not sufficiently large, as a rule, to admit of the supposition that the bodies were embalmed or swathed in bandages like those which make the Egyptian mummy so bulky when preserved untouched. There is nothing in the sepulchral remains of Palestine any more than in the Bible itself to lead us to believe that the embalming of the dead was a Hebrew custom (Conder, *Syrian Stone Lore*, p. 133). For another classification of tombs see Benzinger, *Heb. Arch.* p. 225, which follows Tobler's in *SWP*, Volume of Special Papers, p. 288 f.

We have seen that the simple tombs belong to the earlier period, and that the portico at the entrance, with its ornaments, is usually a note of more recent origin. It is to the Herodian Age that the ancient tombs on the east side of the Kidron Valley, Absalom's Pillar (possibly the tomb of Alexander Jannæus), the Tombs of St. James and Zechariah, and the monolith known as the Egyptian Tomb, are to be assigned. The so-called Tomb of St. James, now known as the Tomb of the Bene Hazir, with its Aramaic text, Doric pillars, and triglyphs, and inner chamber containing *kokim*, is perhaps the earliest of the group, and belongs to the 1st cent. B.C. The others are prob

† *Mission de Phénicie*, p. 822.

ably later. The fine monument to the north of Jerusalem, commonly called the Tombs of the Kings, but known to the natives as Kubâr es-Salatîn (Tombs of the Sultans), has been identified by Robinson as the tomb of Helena, queen of Adiabene. It contains that mixture of *kokim* and *loculi* which would seem to date it on the border of the Christian era. In one of the lower chambers of the tomb was found a sarcophagus with an Aramaic inscription containing the words *Sara Meleka*. It is not impossible that this was the native name of Helena herself, and that the remains found in the sarcophagus were her own.

ii. MASONRY TOMBS.—These are rarely found in Palestine, and they are later than the rock-hewn sepulchres. They are confined to the northern portion of the country. The most famous are described by Sir Charles Wilson (*SWP* 283). He mentions—(1) a building at Kedes (Kedesh-naphthali), 34 ft. 4 in. square, with a doorway on its southern side leading to a chamber containing *kokim*, which have been used for interments down to a late period; (2) two tombs at Tell Hum (one of the possible sites for Capernaum), the one of which has 26 *kokim*, and, being subterranean, is closed with a door of basalt, the other of which has *loculi*, and is built of coursed basaltic rubble; (3) a fine tomb at Malal, near Nazareth, with 4 *kokim* and attached semi-pillars of the Ionic order outside; (4) a square tomb at Teiâsir with three *loculi*, a domed roof, and pilasters on each side; (5) the remains of a building at Ain el Bâineh, which had stone over rock-cut tombs. To these Conder has added four more, three of them at or near Jerusalem.

iii. SARCOPHAGI.—Between the 6th and the 4th cent. B.C. the Phœnicians buried in sarcophagi called anthropoid, having a human head and even an entire recumbent form on the lid, the body of the sarcophagus being shaped like a mummy case. Such is the famous tomb of Eshmunazar with the celebrated Phœnician inscription. In the great discovery of sepulchral remains made at Beyrout some years ago, sarcophagi, mummy shaped, some in white and some in black marble, were found. Among the sarcophagi discovered in the excavations was a splendid sarcophagus in black stone resembling that of Eshmunazar, and bearing an inscription purporting that it is the tomb of Tabnith, priest of Ashtoreth and king of the Sidonians, son of Eshmunazar. Some of those sarcophagi were made of pottery, recalling the slipper-shaped glazed earthen coffins found by Loftus* on the ancient Babylonian mounds at Warka. Although the Hebrews copied from the Phœnicians in their rock-hewn tombs, they did not follow them largely in the use of sarcophagi. We have already mentioned the sarcophagus of queen Sara found in the Tomb of the Kings. Of others found in Palestine, those discovered at Kedes are the most ornamented. The material out of which they are hewn is hard white limestone, almost like marble, and the workmanship is excellent. Some of them had been made for two bodies laid in opposite directions, and at the bottom of the *loculi* were small raised pillars to receive the heads. With the exception of those great anthropoid sarcophagi, there is nothing to show a very marked distinction between the Hebrew and Phœnician tombs from the earliest to the latest age. The history of the sepulchres found in Phœnicia agrees perfectly with the chronological series which has been established independently in Palestine.†

In the Greek age monuments erected over tombs became common, the tombs beneath being rock-cut. In such cases there is a combination of

the masonry and sarcophagus type of tombs. Hiram's Tomb,* about three miles from modern Tyre, containing a tomb or sarcophagus formed out of a huge block and emplaced on a pedestal made of three courses of grey limestone, most probably belongs to this period; and tomb towers containing sarcophagi are to be found throughout Syria. At Palmyra those structures consist sometimes of four or five storeys. Tombstones and sculptured sepulchres have been found at Rabbath-ammon, in Eastern Palestine, belonging to the age of the Antonines, but are to be classed among pagan funerary monuments. Sometimes solid monuments were erected near tombs like the *Kammûat el-Hirmil*, east of the Jordan—a solid tower in two storeys, with pyramidal roof and bas-reliefs representing the hunting of the stag, the bear, and the wild boar, which date, it is supposed, from the 3rd or 4th cent. Of sepulchral monuments we have a notable example in the mausoleum erected at Modin by Simon the Maccabee for his father and his brother. 'Simon,' says the writer (1 Mac 13²⁷⁻²⁹), 'built a monument upon the sepulchres of his father and his brethren, and raised it aloft to the sight, with polished stone behind and before. And he set up seven pyramids, one over against another, for his father and his mother and his four brethren. And for these he made cunning devices, setting about them great pillars, and upon the pillars he fashioned all manner of arms for a perpetual memory, and beside the arms ships carved, that they should be seen of all that sail on the sea.' Of this famous structure all trace has been lost since the 4th cent., and its site has not yet been identified. (See MODIN).

In this connexion we recall the stinging words of Jesus describing the Pharisees as whited sepulchres, outwardly beautiful, but inwardly full of the bones of the dead—as building the tombs of the prophets and garnishing the sepulchres of the righteous, but being of a totally different spirit from those they seemed to honour (Mt 23²⁷⁻²⁸). Whited sepulchres were evidently sepulchral erections whitewashed or plastered over to render them conspicuous, and to preserve passers-by from the ceremonial defilement they might contract by approaching them. That some such distinguishing mark was necessary we gather from a similar saying in St. Luke's Gospel, in which Jesus describes the scribes and Pharisees as 'graves which appear not' (Lk 11⁴⁴). The reference in this passage must be to the humbler class of graves simply dug in the earth, and with no monument of any kind to mark the spot. At the present day the white-washed slabs covering Mohammedan graves around Jerusalem glitter in the sunshine and easily attract notice. (See for cairns or stones heaped on graves art. BURIAL).

There are two sepulchres in particular which must always have a special interest to the Bible student, and which are both alike enveloped in a certain degree of mystery—the cave of Machpelah, the burial-place of Sarah, Abraham, Isaac and Rebekah, Jacob and Leah; and the Holy Sepulchre at Jerusalem, where the body of Jesus was laid and remained for 'three days and three nights in the heart of the earth.' As regards the grave of the patriarchs, now covered by the mosque at Hebron, see art. MACPELAH [cf. also Stanley's *Sermons in the East* (pp. 141-169) and *PEFS* for 1882 (pp. 193-214)]. Touching the Holy Sepulchre for which Saracens and Crusaders contended, and regarding whose site heated controversies still rage, it seems impossible to attain to certainty. The tradition of more than fifteen centuries located it within the Church of the Holy

* W. K. Loftus, *Chaldaea and Susiana*, p. 202.

† Conder, *Syrian Stone Lore*, p. 97.

* See it figured in *Syrian Stone Lore*, p. 96.

Sepulchre. This tradition has been called in question since the days of Robinson. Its truth would require the site to have been without the wall of the city, for it is said that 'Jesus bearing the cross went forth unto the place called the place of a skull' (Jn 19^{17, 18}), and that 'He suffered without the gate' (He 13¹²). But the Church of the Holy Sepulchre is not only near the very heart of the city as it is now occupied, but it must always have been within the line of the second wall. The latter contention is opposed, however, among recent authorities by Conrad Schick, who, after having resisted the traditional site for nearly forty years, has been led to accept it as the true site. He professes * to have ascertained by excavations and measurements that Calvary and the tomb in the garden where Jesus was laid were without the line of the wall though very close to it, just as we read in Jn 19²⁰. The site favoured by recent authorities is a knoll of rock of rounded form and covered with shallow soil and grass, just outside the north wall of the city, and a little distance from the Damascus Gate. Under it is the cave called 'Jeremiah's Grotto,' and there are two holes in the face of the steep and rocky bank terminating the knoll, which look like the sockets of eyes in a skull. Dr. Selah Merrill, long United States Consul in Jerusalem, the late General Gordon, the late Sir J. W. Dawson, and Colonel Conder,† have given their support to this site (see art. JERUSALEM, vol. ii. p. 596*, and cf. *Survey of Western Palestine*, vol. on Jerusalem, pp. 429-438). Thomson,‡ after examining all the evidence on both sides, attained to no certainty as to the site: 'Far better,' he says, 'rest contented with the undoubted fact that somewhere without the walls of this limited platform of the Holy City the Son of Man was lifted up, "that whosoever believeth on Him should not perish, but have eternal life."' "

THOMAS NICOL.

SERAH (סֶרָה).—A daughter of Asher, Gn 46¹⁷ (A *Sap, D Sappa*), Nu 26⁴⁸ (B *Kapa, B^{ab} AF Sapa, AV Sarah*), 1 Ch 7³⁰ (B *Sope, A Sapa*).

SERAIAS (סֶרַיָּה, סֶרַיָּה, LXX *Saraias* or *Saraiad*).—1. Scribe or secretary in the reign of David, 2 S 8¹⁷ (B *Ard, A Saraias*). In 2 S 20²³ he is called *Sheva* (כֶּרֶם שֶׁבַּי, *Keth. שֶׁבַּי*), B *I'hoüs, A I'hoüs*. In 1 K 4³ the name appears as *Shisha* (שִׁשָּׁה, B *Sapad, A Sivad*). This form or *Shasha* would be restored elsewhere by Thenius, Wellhausen, and Stade; while Klostermann prefers the form *Shavsha* (שֶׁבַּשָּׁה, B *I'hoüs, A Söv, A Sivad*), which is found in 1 Ch 18¹⁶. 2. High priest in the reign of Zedekiah. He was put to death with other distinguished captives by order of Nebuchadnezzar at Riblah, 2 K 25^{18, 21}, Jer 52^{21, 27}. He is mentioned in the list of high priests, 1 Ch 6¹⁴. Ezra claimed descent from him, Ezr 7¹ (1 Es 8¹ *Azaraias*, 2 Es 1¹ *Saraias*). His name also occurs in 1 Es 5¹ *Saraias*. 3. One of 'the captains of the forces' who joined Gedaliah at Mizpah after his appointment as governor by Nebuchadnezzar, 2 K 25²³, Jer 40⁶. The text of Kings is evidently abridged from that of Jeremiah. The epithet 'the *Netophathite*' applied to his father in Kings really belongs to a different person. 4. Second son of Kenaz, and brother of Othniel, 1 Ch 4^{14, 15}. He was father of Joab, who was the 'father' of the

Valley of Craftsmen, cf. Neh 11³⁶. 5. Grandfather of Jehu, a prince of Simeon, 1 Ch 4³¹. 6. One of the twelve leaders who returned with Zerubbabel, Ezr 2². In the corresponding list, Neh 7⁷, he is called *Azariah* (1 Es 5³ *Zaraias*). 7. A priestly clan, probably named after the high priest of No. 2. This course of priests was first in order in the times of Zerubbabel (Neh 12³, 1 Es 5³), Joiakim (Neh 12¹²), and Nehemiah (Neh 10³). This family is noted as one of those that settled in Jerusalem (Neh 11¹¹). In the corresponding list, 1 Ch 9¹¹, *Azariah* is substituted. 'Very probably they were father and son, and the two lists have selected different names to represent the priestly house, cf. 1 Ch 7¹³' (Ryle). 8. One of the three princes whom Jehoiakim sent to apprehend Jeremiah and Baruch (Jer 36³⁶). 9. Son of Neriah and brother of Baruch, Jer 51⁵⁹⁻⁶⁴. He held the office of מִשְׁכָּן (AV 'a quiet prince,' m. 'or prince of Menucha or chief chamberlain'; RV 'chief chamberlain,' m. 'or quartermaster'). The Vulg. tr. *princeps prophetiae*; the Targ. (רַב מִשְׁכָּן) and LXX (ἀρχὴν δώρον), followed by Grätz and Cheyne, read 'in command over (the) gifts,' i.e. מִשְׁכָּן. In this official capacity he attended Zedekiah when that prince went to Babylon to pay homage to Nebuchadnezzar. Like his brother Baruch, he was a friend of Jeremiah; and the prophet having written in a book the denunciations against Babylon that are now contained in Jer 50-51²⁶, entrusted the volume to Seraiah, and bade him on his arrival at Babylon to read the prophecies, publicly, as it would seem, and then with the symbolic action of a prophet to cast the book into the Euphrates and proclaim, 'Thus shall Babylon sink, and shall not rise again because of the evil that I will bring upon her.' This scene suggested to St. John the imagery of Rev 18²¹.

N. J. D. WHITE.

SERAPHIM (סֶרָפִים; *Seraphim* and *Seraphim*; *seraphim*).—The seraphim are an order of celestial beings referred to only in Is 6²⁻⁷. In his vision of Jⁿ the prophet sees them as attendants of the heavenly court, ministers of the ideal sanctuary. They are apparently human in form—they have faces, hands, and feet (vv. 2-6); each of them has three pairs of wings (v. 2); they stand or hover above Jⁿ as He sits upon His throne (v. 3); and they proclaim His holiness in antiphonal chant (v. 3).

Opinion varies as to the origin of the word and the conception. Gesenius was doubtful, but thought it best to connect the term with the Arab.

سَاف 'to be noble,' thus viewing the seraphim as the princes or nobles of the heavenly court. A considerable number of Jewish writers, such as Abulwalid and Kimchi, derived the word from סָרַף, regarding the seraphim as *bright* or *shining* angels. But סָרַף means 'to burn,' not 'to shine,' and accordingly others have supposed the word to denote the ardent love or burning zeal of the Divine attendants. The verbal root, however, is not intransitive, but active; it means not to *glow with heat*, but to *consume with fire*. Hence the seraphim would have rather to be regarded as agents of purification by fire. This is in accordance with Is 6⁴, where one of the spirits is represented as carrying celestial fire from off the altar to purify the lips of the prophet and purge away his sin (but see Dillm.-Kittel, *ad loc.*).

It is now usual to bring the prophet's conception into relation with popular Hebrew mythology. The *sarāph* of Nu 21⁶, Dt 8¹⁵ is a 'fiery,' i.e. venomous, serpent, which bites the Israelites in the desert (see SERPENT). In Is 14²⁹ 30⁶ allusion is made to a 'flying fiery serpent' (*sarāph*), which has its home in the desert between Palestine and

* PEFSt, 1893, p. 119 ff.

† Handbook to the Bible, p. 355.

‡ The Land and the Book (Southern Palestine and Jerusalem).

Egypt. The latter is certainly a creation of popular imagination. As the analogous cherub was primarily a personification of the thundercloud, so the seraph was of the serpent-like lightning. Now just as a psalmist represents Jⁿ as making the flaming fire His ministers (Ps 104⁴), so the prophet seizes the popular notion of the seraph and transfers it to the realm of pure spiritual ideas. Not a trace of the serpentine form is left in his conception. His seraphim are the guardians of Jⁿ's holiness, who keep the profane and unclean at a distance, and purge from defilement that which is to be taken into Jⁿ's service. By means of this splendid symbolism the prophet vividly expresses the truth that 'Jⁿ' is a consuming fire' (Dt 4²⁴, He 12²⁹).

Another view has been started by Dillm.-Kittel and Marti owing to the discovery in an Egyptian tomb of the 12th dynasty at Beni-Hassan, of two winged griffin figures placed as guardians at the entrance. The griffin is represented in Demotic by the word *seraf*, and Marti suggests that the seraphim in Isaiah's vision are to be thought of as guarding the threshold of the temple.*

The 'living creatures' of Rev 4⁶⁻⁸, which are partly like Ezekiel's cherubim, resemble Isaiah's seraphim in possessing six wings and in proclaiming the Trisagion. But Cheyne has remarked that 'the popular notion of the seraphim as angels is, of course, to be rejected. They are, indeed, more like Titans than placid Gabriels or Raphaels' (*Prophecies of Isaiah*, i. 32).

The similarity of the word seraph to the Egyptian Serapis led Hitzig and others to identify the two. This idea has found little acceptance (cf., against it, Dillm.-Kittel, *Jes. ad loc.*), and still less has Knobel's suggestion that *seraphim* is a false reading for *serafim*, an imaginary Heb. word meaning 'ministers.'

LITERATURE.—See art. CHERUBIM, and cf. the Comm. on Isaiah, esp. Cheyne, Dillm.-Kittel, and Marti. J. STRACHAN.

SERAR (Σεράρ, AV Aserer), 1 Es 5²²=Sisera, Ezr 2⁶⁸, Neh 7⁵⁵.

SERED (סֶרֶד).—A son of Zebulun, Gn 46¹⁴ (A Σέρεδ, D Σερעד), Nu 26³⁰ (22) (BA Σάρεδ).

SERGIUS PAULUS.—See PAULUS (SERGIUS).

SERJEANTS is used in Ac 16^{35, 36} as an approximate English rendering of *παῖδοι* (= 'rod-bearers'), which represents in Greek the Latin *lictores*, officials whose duty it was to attend the Roman magistrates, to execute their orders, and especially to administer the punishments of scourging or beheading. For this purpose they carried, as their mark of office, the *fascēs*, a bundle of rods with an axe inserted. At Philippi they were attached to the *σπαργητοί*, i.e. the *dumviri*, or *pratores*, who administered justice in that Roman colony (Marquart, i. 475 ff.); but who found on this occasion that by summarily inflicting stripes and imprisonment, without due trial, they had violated the rights of Roman citizens, and so had to undo, as best they might, the effects of the rash action for which they, rather than their instruments the lictors, were responsible.

WILLIAM P. DICKSON.

SERON (Σήρων).—The commander of the host of Syria' (ὁ ἀρχὼν τῆς δυνάμεως Συρίας), who was defeated by Judas Maccabæus at Beth-horon, 1 Mac 3^{15, 24}; Jos. *Ant.* XII. vii. 1.

SERPENT.—Eight Heb. words are used for

* On the Egyptian custom of keeping a live snake in the larger temples as the representative of the tutelary demon, see Cheyne's 'Isaiah' in *FP* p. 139, where the famous Black Granite Serpent of Athribitis is figured.

serpent. One Gr. word only (ἐχίδρα, 'the viper'), which is not used in the LXX, occurs in the NT.

1. שָׁרָף *nāhāsh*, is supposed by some (identifying roots שָׁרַף and שָׁנָף) to mean 'the hisser.' It is generic for a serpent or snake. The Arab. equivalent *hanash* is clearly the same word, with a transposition of the first two radicals. Its meaning is, however, far more general than that of the Heb. term. The root signifies 'to hunt or capture.' *Hanash* is defined 'anything that is hunted or caught or captured, of birds or flying things, or venomous or noxious reptiles, such as scorpions and serpents, or vermin, such as hedgehogs and lizards, and the rat and mouse, and any animal the head of which resembles that of a serpent.' It even includes the common fly. But, in popular usage at the present day, it is applied to serpents only.

2. תַּנִּינִים *tannin*, plur. תַּנִּינִים *tanninim*. This, which is usually tr. 'dragon,' sometimes otherwise (see DRAGON, §), is tr. 'serpent' in AV and RV of Ex 7^{10, 12} [v. 10 RVm 'Heb. *tannin*, any large reptile'], and in RV of Ps 91¹³ (AV 'dragon'). It is interesting to note that while P in the above passages of Exodus uses *tannin* for the creature into which Moses' rod was changed, E in ch. 4³ (cf. 7¹² [? R]) uses *nāhāsh*. The LXX tr. *tannin* by *δράκων* and *nāhāsh* by *ὄφεις*. It would have been better if our versions had preserved a similar distinction in terms.

3. אֶפֶס *'ephēh*. The Arab. *'af'a* is defined as 'a certain serpent of a malignant kind, spotted white and black, slender in the neck, broad in the head. It is said that it will not quit its place.' There is nothing in this description which fixes the species or even genus of the serpent referred to. AV and RV tr. *'ephēh* in the three places in which it occurs (Job 20¹⁶, Is 30⁶ 59⁶) 'viper,' LXX *ὄφεις*, *ὄφεις*, *βασίλισκος*. Tristram believes that this may be *Echis arenicola*, Boie.

4. אֲשָׁפִי *'akshābh*, *asphis* (Ps 140³), AV and RV 'adder.' St. Paul, quoting the passage in Ro 3¹² according to the LXX, gives *aspis* = 'asp.'

5. נָחָשׁ *pethen*. This word occurs 6 times (Dt 32³³, Job 20^{14, 16}, AV and RV 'asp'; Ps 58⁴, AV and RV 'adder,' AVm 'asp'; 91¹³ AV and RV 'adder,' AVm 'asp'; Is 11⁵ AV and RV 'asp'). In all of these the LXX has *aspis*, except Job 20¹⁶ where it gives *δράκων*, and Ps 91¹³ where it has *βασίλισκος*. These discrepancies of translation, ancient and modern, show the uncertainty as to the serpent intended by *pethen*. *Aspis* seems to have been the equivalent in Gr. of more than one species. The repeated mention of the venomousness of the *pethen*, and the allusion to its being used in the tricks of serpent charmers (Ps 58⁵), led Tristram to think that the animal intended is the Egyp. cobra, *Naja haje*, L., on the ground that snake charmers usually have one or more cobras. It is common to see a cobra, on each side of a winged globe, in the attitude of striking, chiselled over the doors of Egyp. temples. The Eng. 'asp' is derived from the Gr. and Lat. *aspis*. It is usually understood in those languages of the *Vipera aspis*, L.

6. נָחָשׁ זִפְרִי *'nāhāsh ziph'ri*. These words occur 5 times (Pr 23³² LXX *κεράστis*, AV and RV 'adder,' AVm 'cockatrice,' RVm 'basilisk'; Is 11⁵ 14²⁹ *ἐκγόνα ἀσπίδων*, AV 'cockatrice,' m. 'adder,' RV 'basilisk,' m. 'adder'; 59⁶ *aspis*, AV 'cockatrice,' m. 'adder,' RV 'basilisk,' m. 'adder'; Jer 8¹⁷ *θανάτοῦρας* = 'deadly,' AV 'cockatrices,' RV 'basilisks,' m. 'adders'). The meaning of the root of the Heb. word is unknown, and hence gives no clue to the species intended. Both cockatrice and basilisk are fabulous. Neither the LXX nor our translators have been able to fix on any species.

7. נָחָשׁ שְׂפִיפְחִינִי *(Gn 49¹⁷ 'adder,' AVm 'arrow-snake' [given by RV in Is 34¹⁵ for *κίχρηδ*, AV 'great owl'; see OWL, RVm 'horned snake,' LXX *ἐγκα**

thuevos = 'one in ambush'). By general consent this serpent has been identified with *Cerastes Hasselquistii*, Strauch, the *horned serpent*, a desert species of the most venomous kind, which hides in depressions in the way, as those made by a camel's foot. This would explain the allusion to biting 'the horse's heels.' It is a foot or 18 in. long, of a sandy colour, with brown or blackish spots. It has a pair of horn-like processes above the eyes. The Arabs of the desert call it *sheffûn*, which, though not classical, seems to be a survival of its ancient name.

8. סָרָפָה *sārāph*, 'fiery serpent,' from a Heb. root signifying 'to burn,' hence poisonous from inflammation. It is usually an adjective to other words signifying serpent, as *nāhāsh* (Nu 21⁶ LXX *tharōdras*), but also appears as a substantive (Nu 21⁸, Is 14²⁹ 30⁶ LXX *δῆσις*, *dōsis*?). The 'fiery serpents' (Nu 21⁶⁻⁸), which were sent to torment the Israelites in the desert, may have been any or all of the venomous species of et-Tih, as the cobra, the cerastes or sand snake. The 'fiery flying serpent' (Is 14²⁹ 30⁶), סָרָפָה כְּעָפָה *sārāph kē'ōphēph*, is probably to be understood of some fabulous serpentine creature with wings, such as are sculptured on Egyptian monuments; but the expression *flying* may have been intended to indicate the rapid darting with which a venomous snake strikes its prey. One of the snakes of Syria, called by the Arabs *'akd-el-jauz*, is also called *et-tayyārah*, because of its arrow-like, darting motion.

9. Ἐχίδνα is used only in the NT, and is tr⁴ 'viper' (Mt 3⁷ 12³⁴ 23³³, Lk 3⁷, Ac 28³). It is probably generic for poisonous snakes. Tristram thinks that the one which fastened on St. Paul's hand may have been *Vipera aspis*, L., which, although now extinct in Malta, whence venomous serpents have entirely disappeared, may have been there in the apostle's day.

A review of the above critical analysis shows (1) that the translators have been at little pains to render the Heb. terms by the same Gr. and Eng. words in different places; (2) that to only one Heb. word, *shēphiphon*, is it possible to give a scientific name with any degree of certainty. Of another, *pethen*, the most probable but not certain equivalent is the cobra. Of the others, three, *'akshābh*, *zephā'* or *ziphōni*, and *'ephēh*, are wholly uncertain or indefinite; one, *tannin*, had perhaps better be tr⁴, as elsewhere, 'dragon'; one, *nāhāsh*, is generic; and one, *sārāph*, is primarily of adjective not substantive force.

The following is a list of the principal venomous serpents in Palestine and Syria and Sinai: *Daboia xanthina*, Gray, a nocturnal species, large enough to swallow a hare; *Cerastes Hasselquistii*, Strauch, the horned snake; *Naja haje*, L., the Egypt. cobra, a very deadly species; *Echis arenicola*, Boie, also extremely deadly; *Vipera Euphratica*, Martin, and *V. ammodytes*, L., both widely diffused and highly poisonous. Besides the above there are numerous species of non-venomous snakes, among which are *Zamenis viridiflavus*, Dum. et Bibr., a species of a greenish-yellow to tobacco-leaf colour, often 6 ft. long, the variety *carbonarius*, Bonap., being black; *Z. dahlii*, of a bluish colour mottled with black spots, and various species of *Ablabes*, *Coluber*, etc.; in all, 27 non-venomous kinds. It is probable that the Hebrews regarded all snakes with abhorrence, and that the common people supposed most or all of them to be venomous.

The reputation of the serpent has always been double. It was the emblem of Mercury and Æsculapius. A serpent, to this day, figures on devices and badges pertaining to the healing art. The Phœnicians worshipped the serpent, and the Chinese do so now. The Egyptians also worshipped Kneph under this form. They embalmed the bodies of serpents. The Scripture allusions to

the wisdom of the serpent are two: Mt 10¹⁶, which refers to its caution in avoiding danger, and Gn 3¹⁻⁴ 12, in which guile and malice are plainly intended (cf. 2 Co 11³, Rev 12⁹). Heathen mythology also attributed to the serpent such qualities of diabolism. And just as Israel came to worship the brazen serpent, which, according to tradition, was made to remind them of the venom and destroying properties of its prototype (2 K 18⁴), so the heathen have come to worship the creature they most fear. This is not to be wondered at, as all heathen worship is a compound of superstition and fear. Most of the Scripture allusions to the serpent are to its evil qualities. It is *treacherous* (Dan is a serpent in the way, Gn 49¹⁷); *venomous* (Ps 58⁴); *skulking* (סָרָפָה *bārāh*, Job 26¹³, AV 'crooked,' RV 'swift,' m. 'fleeing' or 'gliding'; Is 27¹, AV 'piercing,' m. 'crossing like a bar,' RV 'swift,' m. 'gliding' or 'fleeing'; the expression seems to refer to its habit of skulking noiselessly away); *crooked* (סָרָפָה Is 27¹, RVm 'winding,' referring to the wavy motion with which he glides out of danger); it *bites* (Pr 23²⁹, Ec 10⁸⁻¹¹, Am 5¹⁹). Christ compares the scribes and Pharisees to serpents (Mt 23³³ *δῆσις*; cf. the remarkable phrase *γερῆματα ἐχιδνῶν* in Mt 3⁷ 12³⁴). The power to take up and tread on serpents unharmed was promised to the disciples ('Mk' 16¹⁸, Lk 10¹⁹). On the whole subject of the serpent of Gn 3 and the NT reference to that narrative, see artt. FALL and SATAN. The mystery of the serpent's motion did not escape Agur (Pr 30¹⁹), and only in modern times have we fully understood its solution. The fact that serpents are produced from eggs is also noted (Is 59⁵). They were tamed (Ja 3⁷). Sirach alludes to those bitten by serpents, presumably poisonous (12¹³).

G. E. Post.

SERPENT CHARMING.—It is said in Jer 8¹⁷ 'I will send serpents, cockatrices, among you, which will not be charmed, and they shall bite you'; and in Ps 58⁴ 'they are like the deaf adder that stoppeth his ear, which will not hearken to the voice of charmers, charming never so wisely.' The reference here is clearly not to any species as distinguished from other serpents, but to individuals not amenable to a general law. It need not be taken literally, as it may be that any snake, properly charmed, would be subject to the mysterious fascination of the cunning masters of the art. The object being to show the extreme malignity of the wicked, a case beyond the range of experience is invoked to point the moral. Were it a normal thing for a *pethen* not to be capable of being charmed, the comparison would lose its force. An uncharmed serpent is a monstrosity. The stopping of the ears is clearly wilful. To attempt to explain this literally by the fable of the snake applying one ear to the ground, and stopping the other with its tail (Rabbi Solomon), is childish. The snake has no external ear to stop, and no tympanic cavity. The only tenable explanation is that the moral monsters, so graphically described by the psalmist, are comparable to such an exception 'as a (not *the*) deaf adder,' etc.

The art of charming serpents is a very ancient one, and has been brought to a high state of perfection in Egypt and India. The apparatus is very simple. It consists of a shrill pipe or gang of pipes, and a basket or bags in which the snakes already trained are kept. These are of various species, some highly venomous, others harmless. The former have their fangs extracted, or else the lower jaw sewn to the upper with silk thread or silver wire. When the piper has played a shrill

* On the supposed mythological allusions in Job 26¹³ and Is 27¹ see the *Comm. ad loc.*, and Gunkel, *Schöpfung u. Chaos*, esp. p. 45 f.

air, the snakes crawl out of the basket or bag, and, coiling the tail end of their bodies, erect their heads, and sway backwards and forwards. The charmer winds some of them around his body or arms or legs. Mishaps sometimes occur to the charmer with serpents which have not yet had their fangs extracted. Lane (*Mod. Egyptians*, 461) tells of a charmer who had a venomous snake brought to him from the desert. He put it in a basket, and kept it several days to weaken it. He then put his hand into the basket to withdraw it in order to extract its fangs, when the snake bit him on the thumb. His arm swelled and turned black, and in a few hours he died. Some serpent charmers pretend to have the faculty of discovering serpents in a house or ruin, or in the rocks or fields, and luring them by their music, so that they can catch them. Doubtless in many cases the snake is introduced into the place by the charmer or his confederates; yet it is undeniable that, in broad daylight and surrounded by keen-eyed spectators, he does cause serpents to emerge from their holes or dens, and so fascinates them by the music that they become subject to his will. Sometimes he grasps a serpent by the nape of its neck, and bites pieces out of its head and neck. G. E. POST.

SERUG (סֶרֶג, Σερύχ).—Son of Reu and father of Nahor, Gn 11^{20, 22, 23}, Lk 3³⁸. Ethnologically the name is that of *Saruḡ*, a district and city north of Haran (see Dillm. *Gen. ad loc.* and the authorities quoted there).

SERVANT, SLAVE, SLAVERY.—

i. The hired servant.

ii. The slave.

1. Name and meaning.
2. Origin of slavery.
3. Slavery and ancient civilization.
4. Slavery in ancient pre-exilic Israel.
5. Legislation respecting slaves: (A) pre-exilic, (B) post-exilic, (C) compensation for injury to slaves, (D) runaway slaves.
6. Status of female slaves.
7. Price of slaves.
8. History of slavery from Jeremiah onwards.
9. Christian attitude to slavery.
10. Religious use of the term 'slave' ('servant'). Literature.

i. Hired Servant.—The word employed in Hebrew for a servant who worked for hire, a hired servant, is סֶרֶג, a term also employed in Jer 46²¹ for a mercenary soldier. Such a *hired servant* was, however, free to render such service or not as he pleased. There was no constraint over his activity except for the stipulated time and mode of it, for which payment or wages (סֶרֶג) was received. It is very difficult to determine what place the hired servant or workman filled in the earlier period of Israel's pre-exilic history. There are no regulations about him in the primitive compend of laws called the Book of the Covenant (Ex 21–23). The wild followers whom Abimelech hired (Jg 9⁴) scarcely come under this category, and the same remark applies to the priest hired by Micah (Jg 18⁴). But it is otherwise when we come to the more developed code of the Book of Deuteronomy, which reflects a more advanced state of civilization. There we find distinct provision made that the *hired servant* is to be paid regularly every evening (Dt 24¹⁵) before sunset, and this rule is made to apply to both Hebrew and foreign labourer alike. In the post-exilic legislation contained in the Book of Leviticus (19¹³) this instruction is maintained in full force. In fact, in post-exilic times an effort becomes clearly apparent in legislation to make the lot of the slave approximate to that of the hired servant (Lv 25⁴⁰). In the post-exilic literature the references to the hired servant are not infrequent. See the Lexicons, s. סֶרֶג. The Greek

equivalent is μισθιος, μισθωτός. The former is the term employed in Lk 15^{17, 19}. The difference between the relation of the סֶרֶג or hired servant to the Hebrew household and that of the slave (עֶבֶד), or of the stranger or resident alien (גֵּר), was that the relation of the hired servant was looser; see FAMILY.

ii. Slave.—1. NAME AND MEANING.—The ordinary Heb. equivalent of 'servant' was the word which properly designates *slave*, עֶבֶד, 'ebed, a word common to all Semitic languages, including Sabaean. It is, however, seldom found in Assyro-Babylonian, in which the equivalent more frequently used is ardu. The Gr. equivalent is δοῦλος (also θεράπων, παῖς, οἰκέτης). The word עֶבֶד is as common in Phœnician as in Hebrew, and enters into Phœn. proper names (compounded with the name of deity precisely as in Heb.). See Bloch, *Phœnicisches Glossar*, pp. 47, 48, both pages being entirely filled with examples. The Tel-el-Amarna tablets give us further evidence of Canaanite names of the 15th cent. (circ.), viz. 'Abd-Addi, 'Abd-Uras, 'Abd-Asirta, 'Abd-Milki, etc. For similar names compounded with 'Abd (fem. Amat) in Arabic, see Wellhausen, *Reste*, pp. 2–4. The verbal root of the substantive עֶבֶד connotes fundamentally the idea of *working*. In primitive life this meant chiefly the tilling of the soil (Gn 2⁵ 3² 4², 2S 9¹⁰). Then it came to be specially associated with the conception of working for (Heb. לְ) another. Accordingly, the subst. עֶבֶד is based on this special meaning, and therefore signifies *one who labours for another and remains permanently subject to this relationship*.

This is, in fact, the cardinal distinction between a free man whose activity is not restricted by any compulsion to serve the interests of another, and the slave whose activity is so restricted.

2. ORIGIN OF SLAVERY.—Slavery was probably a necessary element in all ancient industrial life. Slavery arises from two main causes, viz. *Want* and *War*. Privation and famine compel a man, a family, or a clan to accept terms of service and maintenance from others to which under normal conditions they would never submit. War, a yet more potent cause, brings in its train foreign captives who are forced to enter a lot of subjection to the will of their conquerors. War, moreover, carries in its track desolation of house and home and of all means of subsistence. Whole populations are rendered destitute, and flee for protection and maintenance to some friendly but alien race, and thus voluntarily enter into the position of bond-slaves as a refuge from famine and death. 'The greatest of all divisions,' says Tylor, 'that between freeman and slave, appears as soon as the barbaric warrior spares the life of his enemy when he has him down, and brings him home to drudge for him and till the soil. How low in civilization this begins appears by a slave-caste forbidden to bear arms forming part of several of the lower American tribes.' We shall presently see how this condition of slavery belonged to the old-world life of ancient Heb. society, where the male and female slave rank next above the ox and the ass. The terms used for both were sometimes closely similar, and indicated that they were regarded as *property* that had been acquired. The oxen were called by the Hebrew his עֶבֶד, his *acquired* property or possessions (Lat. *peculium*, Gr. κτήνος). The slave, on the other hand, was his *purchased* possession or עֶבֶד קָנָה (Gn 17^{12, 13, 23}, Ex 12⁴ 21^{1b}). Tylor (*ib.*) thinks that the hired labourer arose out of the more ancient slave, the hired servant out of the ancient *servus*. 'The master at first let out his slaves to work for his profit, and then free men found it to their advantage to work for their own profit, so that there grew up the great wage-earning class.' The

* *Anthropology*, p. 434 ff.

reader will not fail to note that this theory is confirmed by the results of critical inquiry in the OT, for at the commencement of this article we showed good grounds for believing that the קָנָן or hired servant hardly appears in the earlier stages of pre-exilic Hebrew history.

3. SLAVERY AND ANCIENT CIVILIZATION.—It can hardly admit of doubt that the advance of early human society in the arts of life was largely aided by the institution of slavery. Through slave labour, agriculture and industrial life progressed, wealth accumulated, and leisure was given to priests, scribes, philosophers, and *litterati* to reflect and raise the level of human intelligence. What modern machinery accomplishes for man now, slave-labour accomplished then. In a word, early civilization rested upon slavery as a basis. Without servile toil such vast structures as the pyramids and the sphinx of Gizeh would never have been reared. This is confirmed by the tradition of Heb. bondmen employed by the Egypt. Pharaoh in the erection of his granaries (Ex 1^{11, 14}). And when we turn to the Assyrian monuments the same features of slave-labour powerfully impress us. The Assyrian empire, unlike the Babylonian, was essentially military, and the captives obtained by foreign conquest were employed in executing the laborious task of dragging colossal monuments into position. The vivid reliefs discovered at Kouyunjik, portrayed in Layard's *Ninveh and Babylon* (pp. 25, 27), clearly exemplify the character of those heavy tasks executed in an almost tropical climate. We see the Assyrian king superintending the removal of an enormous bull. Several hundreds of slaves, provided with a rope which passes over their shoulders, are struggling in a long succession that ascends in single file up a steep declivity, dragging into position an immense bull which has been landed from the river. By that river it has evidently been conveyed from the stone quarries where it has been hewn and probably shaped. Other slaves are portrayed carrying saws, picks, and shovels. A pair of them are dragging along by a rope, passing over the shoulder of each, a cart laden with planks or levers. At intervals a task-master can be seen wielding a stick.

But slaves were employed not only in the more laborious forms of manual exertion, but also in the arts requiring manual dexterity and artistic skill. According to Wilkinson (i. p. 457), the monuments testify that the Egyptian male and female musicians and dancers were slaves, just as we know to have been the case in ancient Greece and Rome. The maidens who formed the chorus of the *Helene* of Euripides were slaves brought to the Egyptian market by Phœnician traders. In Egyptian banquets the men were attended by slaves, while the women were waited upon by handmaids who were female slaves. 'An upper maidservant or a white slave had the office of handing the wine or whatever refreshment was offered to the ladies who were present at a banquet, and a black woman followed her in an inferior capacity to receive an empty cup.' Female slaves are easily recognized in Egyptian portrayals. For they were not permitted to wear the same dress as the ladies, and their hair was adjusted in a different fashion. We find it tied at the back of the head into a kind of loop or arranged in long plaits at the back, while eight or nine others hang down on either side of the neck and face. Also they wore a long tight gown tied at the neck, with short close sleeves reaching nearly to the elbow, or they wore a long loose robe thrown over it. On the other hand the lowest menials, i.e. the men-slaves who toiled in the country, wore 'rough skirts of matting which they were wont to seat with a piece of leather'

(Lepsius, Wilkinson), while those who were compelled to adopt a more active mode of life wore nothing but a simple fringed girdle, like that which is still worn by many African tribes, 'a narrow strip of stuff with a few ribbons or the end of the strip itself hanging down in front.' Under the New Empire we even find that the young slaves who served wealthy nobles at feasts wore, as their only article of clothing, a strip of leather which passed between the legs, and was held up by an embroidered belt (Erman).

4. SLAVERY IN ANCIENT PRE-EXILIC ISRAEL.—In the primitive social conditions of ancient Israel the different ranks of the community moved easily and freely amongst each other and came into hourly contact. The courtesies and etiquette of life, especially in salutations and meals, were certainly not neglected; yet the gulfs created between class and class by our highly developed modern civilization were, fortunately for human happiness, then unknown. In the life presented to us in the Books of Judges and Samuel we find high and low equally engaged in pastoral or agricultural employment. We are reminded of the genial state of society in Ithaca as depicted in the *Odyssey*. When the deputies of Jabesh-gilead came in quest of Saul, they found the Benjamite chief and Israel's future king returning with a yoke of oxen from his field (1 S 11³). We associate Saul with the figure of the Roman Cincinnatus summoned straight from the plough to assume the office of dictator.

Thus, in that early and simple Hebrew civilization, slavery was free from half the terrors with which the later Roman civilization and the conditions of our modern life have invested it. It cannot be said that in the earlier pre-exilic days the lot of a Hebrew bond-slave among his countrymen was oppressive or even irksome. The description given by Doughty of slavery in the remoter parts of Arabia corresponds in many particulars with the conditions of the early Hebrew bond-servant (*Arabia Deserta*, i. p. 554)—

'The condition of the slave is always tolerable and is often happy in Arabia; bred up as poor brothers of the sons of the household, they are a manner of God's wards of the pious Mohammedan householder who is *ammy* (properly "my uncle") of their servitude and *abdy* ("my father"). . . . It is not many years "if their household fears Allah" before he will give them their liberty; and then he sends them not away empty; but in upland Arabia (where only substantial persons are slave-holders) the good man will marry out his free servants, male and female, endowing them with somewhat of his own substance, whether camels or palm-stems.'

We shall note the close parallel between the latter part of this extract and the details of Hebrew usage prescribed in the Book of Deuteronomy.

A slave could attain to a high position in his master's household. He might even become his heir in default of offspring (Gn 15^{2, 3}). The important place filled by the slave Eliezer, though a foreigner (Damascene), in the household of Abraham, is not without parallels in the narratives of antiquity. The Hebrew captive Joseph becomes the prime-minister of Pharaoh. In 1 Ch 24⁴ we read the interesting fact that Sheshan in default of male issue married one of his daughters to the Egyptian (?) slave Jarha. In case of an emergency, the master of a household might seek counsel from his slave as from a trusted friend. Abigail has recourse to one of Nabal's slaves for advice in order to appease David's anger (1 S 25^{14ff.}). A homely episode of this character occurs in the life of Saul (1 S 9⁹⁻¹⁰), belonging to the older stratum of the narrative called by Budde G; cf. *Richter u. Samuel*, p. 169 ff.). Saul, in his baffled search for his father's lost asses, turns at length for counsel to his slave. The slave gives the right advice, and directs his master's steps to the seer Samuel. A

fee is requisite for the consultation, and the slave lends his master a quarter of a shekel (about 8½d.). Saul, in response to his slave's advice, says, 'Your advice is good: come, let us go.' This vivid narrative reminds us of Gn 24 (J; according to Ball J², but Kuenen regards it as J¹), in which Abraham sends Eliezer on an important mission to secure a wife for his son, and exhibits in the clearest manner the confidential relations which subsisted between the head of a household or the sheikh of a clan and his slave. From the above narrative respecting Saul, in which he borrows a small sum from his slave, we gather the significant hint that slaves might even be the owners of property.

The position of a slave in a household would largely depend on his origin, viz. whether of Hebrew or of foreign nationality. In the latter case his situation would certainly not be so favourable, unless indeed, as in the case of Eliezer, he had been born and bred in the household, and thus came to be incorporated in the clan to which he was locally attached, sharing in its hospitality and protection, and taking his due part in its *sacra*. The position of a recently purchased slave taken captive in war would be far different. In a Roman or Greek household he would be set to do the most menial tasks of drudgery; and his place in a Hebrew family would be similar, though not so forlorn. The Canaanites, as we learn from Jg 1^{28, 30, 32, 35}, were employed in hard task-work (עֲבָדָה). These lower employments are described in Dt 29¹¹ as gathering firewood and drawing water. The laws respecting warfare in Dt 20^{10a} prescribe that the inhabitants of those cities which surrendered voluntarily to Israel should be taken as slaves, while in case of resistance the male inhabitants were to be slain with the sword, and the women and children with the cattle were to be taken as a prey (cf. Nu 31^{17, 28}). In the time of David, through his numerous foreign wars, there came to be a large number of these foreign helots engaged in laborious task-work (עֲבָדָה). From 2 S 20²⁴ we gather that it became necessary to appoint an officer to superintend this special department of national life, viz. the עֲבָדֵי הַמֶּלֶךְ (Gn 49¹⁵) or forced service exacted from the slave-labourer. This was probably true of the reign of David's successor Solomon (1 K 9²¹), who did not find it necessary to exact any bond-service from Hebrews (save for the special work mentioned in 5²⁷⁽¹³⁾¹⁶), since the foreign slaves abundantly sufficed for all needs. Indeed, slaves of foreign origin were very numerous in the East, and this became especially true in the 9th and following centuries. Assyrian inscriptions and portrayals abundantly testify to the barbarous practices that prevailed in ancient Asiatic warfare when cities were stormed and sacked. We know from numerous inscriptions that a large number of the prisoners* were carried away captive. Many of these, of whom female captives constituted a considerable proportion, would inevitably find their way to foreign markets. The great mercantile Canaanite or Phœnician peoples, who had their celebrated emporia of commerce at Tyre and Sidon, shared with the Philistines the unenviable notoriety of being the chief slave-dealing race of antiquity. Thus in the middle of the 8th cent. *Amos* brings this accusation against the Philistines, who passed

on their captive Israelites to the Edomites (Am 1⁶). We may conjecture that the last-named sold them again to traders who shipped them from Elath for foreign shores and markets. It is nearly certain that these traders would be Phœnicians, for 'trader' and 'Phœnician' (Canaanite) were almost synonymous terms in those days (Hos 12⁷, Is 23³) and later (Zeph 1¹¹, Ezk 17⁴, Pr 31²⁴). Hence the same prophet brings a similar charge against the Phœnicians because they forgot the covenant of 'brethren' which subsisted between Phœnicia and Israel from the days of Solomon (Am 1^{9, 10}).^{*} In post-exilic times Joel (3 [Heb. 4]⁹) denounced both these nations for selling the captives of Jerusalem beyond seas to the sons of Javan, i.e. to the Greek populations which covered the western shores of Asia Minor.

In contrast with the forlorn, though far from hopeless, lot of a foreign slave in a Hebrew household, the condition of a home-born and Israelite slave would be far more tolerable. The Hebrew slave frequently came into his unfortunate position through the exigencies of the harsh laws of debt (see DEBT) which prevailed then and prevail still in Oriental countries. This is clearly shown in Lv 25^{25, 39}, which exhibits the case of a man voluntarily entering the state of servitude in order to discharge the debts which his poverty and embarrassments had contracted. During the regal period Canaanite civilization had spread and had become absorbed by the Hebrew inhabitants, the population of towns had increased, and the power of the rich landowning class was seriously felt. The creditor became sometimes so harsh and exacting, that, if the father died, the sons might be sold into slavery to pay his debt (2 K 4¹).[†] These social evils must have been aggravated in the 9th cent. B.C., when the Syrian wars desolated the borders of both Ephraim and Judah, and the small farmers lost their crops and cattle through the ravages of the invader (cf. Is 17, Jer 6¹²), and were driven to borrow at the oppressive rate of even 20 per cent.

It is not surprising, therefore, that the miserable lot of the oppressed peasantry awakened both the pity and indignation of the prophets of the 8th cent., who rebuked the overbearing avarice of the wealthy landowner. Amos upbraids the harsh creditor who sells his helpless victim into slavery for a paltry debt equivalent in value to a pair of sandals (Am 2^{6, 8}). A generation later Isaiah denounces the aggravated evils of his own time, the accumulation of the smaller properties consequent on the dispossession of the smaller owner (Is 5⁸). Meanwhile wealth increased with rapid strides in spite of the Assyrian invasions. In the days of Amos the nobles lived in luxury in their summer and winter houses (Am 3¹⁵, cf. ch. 6). In the Northern kingdom houses were erected of hewn stone instead of the common brick, and of cedar in place of the common sycamore (Is 9¹⁰). 'The land was full of silver and gold, and there was no end to the treasures' (27). Young foreign slaves were sold into Israel in considerable numbers.[‡]

5. LEGISLATION RESPECTING SLAVES. — This is

* For a different interpretation of the 'covenant of brothers,' see Driver, *Joel and Amos*, p. 137.

† A young family is sometimes an insupportable burden to poor parents. Hence it is not a very rare occurrence in Egypt for children to be publicly carried about for sale by their mothers or by women employed by the fathers; but this very seldom happens except in cases of great distress (Lane, *Manners and Customs of the Modern Egyptians*, p. 205).

‡ So we should probably understand the doubtful passage Is 2²⁰, which runs in the Hebrew יְלָדִים יִשְׂרָאֵלִים 'and they abound in young foreign (slaves)'. It is probably rendered with fair correctness by the LXX καὶ τὰ ἑξωτικά ἀλλοτρίων ἰσχυροὶ αὐτοῖς. That the Hiph'il of עָבַד probably meant 'abound' is confirmed by the Aram. ܥܒܕܐ *effusus est, satis fuit*, and

Kal in 1 K 20¹⁰. Moreover, this meaning harmonizes with עָבַד and עָבְדָה in the context.

* The Assyrian term was *ballatu* (ܠܬܐ) and *kikittu* (ܟܝܬܬܐ, root ܟܬܐ). The former term, characteristically enough, is inclusive of spoil generally (figlath-pileser 1. Prism Insc. col. ii. 80, iii. 66, 85 [a.c. 1100]). But the meaning is only too clear in Assurnasirabal's Annals, i. 108 (c. 880 B.C.), where we read that he stormed the fortress of Hulal, and III M *ballasunu ina isati ašrup*, 'I consumed with fire 3009 of their captives and left not one soul alive,' — *kikittu*, on the other hand, means definitely war-captives. These were employed by Eashaddon in building temples (Prism Insc. A and C, col. iv. 44-46). Respecting slavery in Babylonia, see Tiele, *Bab.-Assyr. Gesch.* (1888) ii. p. 506 ff.

to be found in all three codes of the Torah, viz. (a) the Book of the Covenant in Ex 21¹⁻¹¹; (b) its subsequent development in the Deuteronomic legislation in Dt 15¹²⁻¹⁸; (c) lastly, in the post-exilic Book of Leviticus (P) in Lv 25³⁹⁻⁴⁶. All these, except Lv 25⁴⁴⁻⁴⁶, deal with the conditions of a Hebrew slave in the possession of a master of the same nationality, and not with the case of a foreign slave. This must be considered separately.

A. We shall deal, first, with the pre-exilic legislation contained in the two sections (a) and (b). The period of service is fixed as six years; in the seventh there is the year of release. The question has been asked whether the six years may not be regarded as a *maximum* period. It is certainly quite possible that when, as in the case of debt, the sum to be earned by service could be worked out in a shorter term, the six-years' period might be abridged, but we have insufficient data in the OT to guide us on this point. The legislation appears to contemplate six years as the least period for which service could be entered. So Rabbis in their interpretations have inferred. Jacob's seven years' bondage to Laban (Gn 29¹⁸) seems to point to a somewhat divergent tradition. It is evident that the six-years' period corresponds to the six days of work followed by the day of Sabbath rest. So with agricultural land, which in the seventh year is to lie fallow. Jer 34²⁻²³ is interesting and significant, since it shows that these laws respecting slaves were constantly violated by the owners.

In the pre-exilic legislation the special cases are duly provided for. But this is more particularly true of the earlier compend of laws (Book of the Covenant). In Ex 21²⁻⁴ the case of a man who enters bond-service unmarried is distinguished from that of a married man. Under the latter case there are two varieties. If the marriage took place prior to the term of service, husband and wife become free together. But if the slave marries one of the slave-girls in his master's household, the wife and the children born to him by her do not accompany the husband in his year of release. This last stipulation is not mentioned in the Deuteronomic legislation. Are we to understand that the express provisions of the earlier legislation are tacitly assumed in the later? This is scarcely probable, since (1) the Deuteronomic legislation consistently repeats the earlier provisions of the Book of the Covenant, when adopted into its own code. Their omission, when tacitly understood, would have greatly abbreviated the later legislation in its written form. (2) We note a striking contrast between the express provision in Dt 15^{17b} (viz. that the ceremony described in Ex 21⁶, Dt 15^{17a} should apply to *women as well*) and the hard injunction of Ex 21⁷ that the daughter who is sold as a bond-woman shall not go free as the bondman does. It is true that the case here contemplated is that of concubinage; but, as Driver in his commentary pertinently observes, the terms in Dt 15¹²⁻¹⁷ are quite general, and we are not therefore justified in introducing exceptions out of the earlier legislation. The code of Deuteronomy is evidently separated from the Book of the Covenant by several centuries during which the Hebrew race advanced both socially and politically. The humanitarian tendency which was already conspicuous in the more primitive legislation had advanced still further. It may even be true, as Driver suggests, that Deuteronomy belongs to an age so far advanced on that of the earlier code that the case no longer practically occurred of a woman being sold into slavery for concubinage, or at all events this was not contemplated or recognized. This could hardly have been true at a date earlier than B.C. 622.

It sometimes, perhaps not infrequently, happened that a slave loved his master, or was impelled by

the strong motives which the sustenance and protection of his master's home afforded, not to avail himself of the opportunity of the seventh year of release. Under the terms of the earlier legislation, a wife, married when her husband was living in bondage in his master's household, and the family reared under these conditions could not pass into freedom with the man when the seventh year of release had come. This would furnish an even stronger inducement not to avail himself of the freedom which the seventh year permitted. The master would then take the slave and bring him to God (i.e. to the local priest in the nearest sanctuary*), and bore through his ear in token of the fact that the slave was now the property of his master in perpetuity (Ex 21⁶). This should not be understood to mean merely until the year of jubilee, as Josephus (*Ant.* iv. viii. 28) and Rashi assume, since this would introduce an arbitrary qualification. The year of jubilee, as we shall have subsequent occasion to see, belongs to a later stage of national life.

The growing humanitarian tendency which is characteristic of the Deuteronomic legislation shows itself in the addition of an express stipulation (Dt 15¹²⁻¹⁴) that the master on releasing his slave was to provide him liberally from his flocks, his corn, and his wine† (cf. the modern Arabian usage cited from Doughty, above, p. 462²).

The special case must now be considered of a father selling his daughter into slavery to another. To this the Book of the Covenant refers (Ex 21⁷⁻¹¹). This was done under the stipulation that the maiden should become the master's concubine or that of his son. If she fail to please her master (or his son) who has destined her for himself (read *לֹא* with *Kêrê* in place of *לֹא*), she shall be redeemed [by her father or some near relative]. Under no circumstances is she to be sold into the hands of a foreigner. If she be the concubine of the master's son, she is to be treated as a daughter of the master's household. But if another woman is married, she is in no way to be defrauded of her food, dress, or conjugal rights. If any of these three rights of food, dress, etc., be not preserved intact, she may claim her freedom and depart without any redemption money being paid as compensation. As already stated, the case of a concubine-slave does not arise in the Deuteronomic code.

Budde in *ZATW*, 1891, p. 100f., discusses the difficulties of Ex 21⁸⁻¹¹. After remarking that Dt 15¹²⁻¹⁷ indicates an advance in civilization, he compares Lv 19²⁰, which, however, contemplates a different set of conditions. Budde suggests an ingenious emendation of the doubtful *לֹא יָדָעָהּ* into *לֹא יָדָעָהּ* 'provided that he has not known her (carnally)'. The LXX *ἡ αἰὶν καὶ ἀκατακτάτως*, 'has promised or pledged herself to him,' appears to sustain the reading of the *Kêrê*. We might, on the other hand, also render the Heb. text (*Kêrê*) 'to whom [one] has destined her.' W. R. Smith, however, in *ZATW*, 1892, p. 162, supports Budde's reading of *לֹא יָדָעָהּ*, and makes the further suggestion that *לֹא* did not originally stand in the text, which was simply *יָדָעָהּ*. This involved a primitive usage

* This is the view taken by most commentators; *לֹא יָדָעָהּ* does not mean 'to the judges,' as Dillm. seems disposed to understand it. For Jg 5⁸, 18 2²⁶ (see Löhr, *ad loc.*), and Ex 22⁷⁻⁸ are passages where *לֹא יָדָעָהּ* should be rendered by 'God' not 'judges,' God being regarded as the fountain of true justice, who spoke through the priest and witnessed the transaction. Hence LXX *ἡ αἰὶν καὶ ἀκατακτάτως*. Nowack would understand by *לֹא יָדָעָהּ* here the 'family ancestors' (cf. 18 28¹³, 18 8¹⁹). The slave was taken to the family sanctuary and adopted permanently into the possessions of the family. But this is a far-fetched theory, and the employment of *לֹא יָדָעָהּ* in a code of legislation in a sense so exceptional is certainly improbable.

† The boring of the ear (probably the right ear, Lv 19²⁸, 19 14¹⁴) was also practised by other Oriental peoples, e.g. the Mesopotamians (Juven. i. 104), Arabs (Petronius, *Sat.* 102), Lydians (Xenoph. *Anab.* iii. i. 81), and Carthaginians (Plautus, *Poenul.* v. ii. 21). For other parallels consult Dillm. on Ex 21⁶.

† This humane Deuteronomic law was fully maintained in the later Jewish usage. According to *Riddushin* 17, the worth of these parting gifts to the released slave must amount to 30 *selaim* or 78 shillings (Hamburger).

whereby the heir (or son) inherited marital rights (*Kinship and Marriage*, p. 89 f.). The story of Absalom shows that this might occur even in the lifetime of the father without shocking public feeling. But to the later Jewish ideas this was abhorrent. Hence the insertion of *ל* into the text. Subsequently another textual tradition arose through the *יָרָה* of v. 9, which caused *יָרָה* to be corrected to *עָרָה*, which found its way into our Massoretic text. *ל* of the *K'thiv* thus remained unintelligible, and it was extremely easy for the Jewish scholars to assume that here as in so many passages it stands in place of *לו*. The reading *יָרָה* is confirmed by (1) the phrase *בבגדו בה*, which obviously presupposes sexual intercourse, (2) best explains *בְּעִינִי*.—If we accept W. R. Smith's emendation, it would seem to show that the Book of the Covenant arose considerably earlier than the 8th cent. For in Am 27 the prophet denounces the profanation of the 'holy name' by the intercourse of father and son with the same paramour (cf. Gn 35^{22b} (P), 49^a). Here the *יָרָה* may probably refer to the *קָדְשָׁה* of some local high place. The sentiment which underlies the verse is unmistakable.

B. The post-exilic legislation of the Book of Leviticus (25³⁹⁻⁴⁵) was distinct, and was designed to meet the special conditions of the post-exilic times. The institution of the year of JUBILEE now takes the place of the old pre-exilic law respecting the seventh year of release. An express distinction is made between Hebrew slaves and foreigners. The latter are to be slaves for life, and do not come under the operation of the law of jubilee, whereby the Hebrew slave with his family in the fiftieth year passed out of bondage and returned to his own kindred and to his own inherited property, where he was enabled to maintain himself and his family in freedom.

The older biblical scholars attempted to reconcile the Levitical legislation with the older codes. Thus Saalschütz held the view that the legislation of Exodus and Deut. referred to the tribes related to the Hebrews, while the law of jubilee applied to Israelites only. But this distinction is an artificial 'Nothbehelf,' and the same remark applies to Dillmann's attempt to harmonize Levit. with the earlier legislation by assuming that the former was designed to secure to those who had not made use of their right of release in the seventh year through utter impoverishment, that they should not be slaves for ever, but obtain their release in the fiftieth.—But both these theories are based on a failure to recognize that the Levitical regulations were a completely new constructive effort to settle the conditions of Hebrew bond-service.

It is not by any means clear how far the slave benefited by the new conditions. Indeed the old Deuteronomic law seems more favourable, if the year of jubilee was over six years distant. The object of the new law seems to have been to fix a universally valid date of release, and thus to unite the lot of the individual to the collective life of the nation. Moreover, an express injunction was made (v. 47^a), that Hebrew slaves should be redeemed from bondage to a foreign owner by the nearest kin (first brothers, then uncle or cousin), so that a foreign master had not the unconditional right of possession towards the Hebrew slave until the year of jubilee. The slave was, if possible, to be redeemed before that time, the price of redemption being regulated by (1) the original sum of purchase; (2) the distance of the year of jubilee. We thus find that the fundamental principle was recognized that the Hebrew slave was rather to be regarded as a hired workman, and the price of his purchase or redemption was to be considered as a kind of hire paid for in advance. The Hebrew master was, moreover, exhorted to treat him rather as a brother, or a 'hired servant' and 'sojourner' (vv. 38, 40).

The condition of foreign (i.e. non-Hebrew) slaves has been already referred to, and will now be considered in further detail. The captive taken in war naturally bore a somewhat heavier lot than the Hebrew slave who had passed into that condition by impoverishment or debt. But there were mitigations even in the lot of a foreign slave. A foreign captive woman taken in war and made a

concubine was to be treated with a certain deference by her captor (Dt 21^{10a}). The fact that the slaves of the household were circumcised meant much. They were thereby received into a religious community, and, by taking part in its *sacra*, shared in its protection. Thus from Dt 12¹² 18 16¹¹ 14 we learn that they partook of the passover and other sacrificial meals, and, as we can easily infer from Ex 20¹⁰, they enjoyed their Sabbath rest from toil in common with their Hebrew masters. According to Rabbinic tradition a slave could not be compulsorily circumcised, and, if he was circumcised, he was not to be sold to a foreigner, i.e. he was treated as though he were a Hebrew and not a foreign slave. But if he refused circumcision, he was to be sold after the expiration of a year. On the other hand, if before entering service he made the express stipulation that he was not to be circumcised, he might remain in bondage for an indefinite period; see Mielziner, *Die Verhältnisse der Sklaven bei den alten Hebräern*, p. 58.

C. Compensation for injury to slaves.—The earliest code of legislation sought to protect the Hebrew slave from maltreatment, and the rules we find on this subject (Ex 21²⁰ 21. 26. 27) are very explicit on the whole. Smiting a slave so as to entail loss of eye or tooth entitled the slave to complete enfranchisement, and, in case death immediately ensued, a sure vengeance for such an act would be taken. If, however, the slave survived for a day or two before his death, the punishment of his loss by death was considered penalty enough, for the money-value of the slave was the measure of the master's loss.

We note here some vagueness as to what the 'sure vengeance' (v. 20), to be wreaked on the slave-owner who murdered his slave, was to be. We cannot fail to remark that the expression falls considerably short of the explicit language of v. 12, where the murder of a free Hebrew citizen is to receive the death penalty as its award. When we turn to the post-exilic legislation we observe the contrast. In Lv 24¹⁷ 22 all distinctions and special provisos are swept aside. Even the national barriers were discarded in this case by the post-exilic Jew. Bond and free came under the same law as well as the foreigner and Jew. Every murdered man's death was avenged by death.

D. Law respecting runaway slaves.—The beneficent legislation in Deuteronomy on this subject is based on the sacred rights of hospitality which we find not only among primitive Semitic nations,* but also in ancient Greece. It runs: 'Thou shalt not deliver up a slave to his master, who escapes to thee from his master. With thee shall he abide in thy midst in the place that he chooses, in any one of thy cities that he likes.' It may therefore be readily inferred that the recovery of a runaway slave in ancient Israel was far from easy. This we know to have been the case (cf. 1 K 2³⁹). This was another circumstance that tended to mitigate the slaves' lot, by making it incumbent on the owner of slaves to make the conditions of their life tolerable.

6. STATUS OF FEMALE SLAVES.—This varied considerably. As in the case of male slaves, the lot of the foreigner was not so favourable as that of a Hebrew or home-born slave. Yet, on the whole, even the foreign captive might enjoy a position of comparative comfort. The humane legislation of Dt 21^{10a} ordained that a foreign captive woman taken in war and made a concubine

* Respecting this law of the G.E.R. see RS² p. 76, 'From the earliest times of Semitic life the lawlessness of the desert, in which every stranger is an enemy, has been tempered with the principle that the guest is inviolable. A man is safe in the midst of enemies as soon as he enters a tent or even touches the tent-rope'; cf. also p. 270.

was to be treated with a certain chivalrous deference, the respite of a month being allowed her by her captor. Note the position of the captive Israelite maiden in the Syrian general's household, 2 K 5³², the confidential relations that subsisted between her and her mistress, and the sympathy displayed by the former with her master's disease. The genial treatment of foreign slaves in pre-exilic times evidently prevailed among other Semitic races besides the Hebrews.

A Hebrew female slave is described by various terms, according to the position she held. If she became the concubine of her master or of his son, she was designated by the more dignified term

אִמָּה (Assyr. *amtu*, Syr. *أُمّة*, Arab. *أمة*, Phœn.

אִמָּה; in fact the word is common to all Semitic languages, rendered in LXX by δούλη or θεραπαινά. Under the adverse circumstances brought about by poverty, to which reference has already been made, it not infrequently happened that the daughter could not be disposed of as freeborn in ordinary marriage, because the utter poverty of the parents constituted a social barrier. But if the daughter was dowered with good looks, she could easily be sold as a slave, and the price she would obtain might not fall far short of the ordinary *mōhar* or purchase-money of a free woman, which in the 7th cent. amounted to 50 shekels, or nearly £7 (Dt 22²⁹). Under any circumstances the transaction in primitive Israel would not have differed essentially from that which took place when a marriage was contracted with a free woman for whom purchase-money called *mōhar* was paid as though she were a chattel.* She would thus take her place as a concubine, and, if she bore children, her position sensibly improved. But if, as in the case of Hagar, she was simply the property of her mistress, and was introduced into this relation, the rights of the mistress might impose somewhat galling restraints. Accordingly, she might be called אִמָּה, as the concubine who bore children to her master, and entitled to the rights of a married woman (see above), or, by the inferior designation of a אִמָּה or 'bond-slave,' called upon to do menial tasks (Gn 16³, cf. on the other hand 21¹⁰, where Sarah herself calls Hagar אִמָּה), since she still remained under the control of the freeborn and superior wife (16⁶). אִמָּה is the expression which a woman does not hesitate, in the ordinary etiquette of social intercourse, to employ respecting herself when she is addressing a superior. This corresponds to the expression אִמָּה employed by a man under similar circumstances. This distinction in the rank and dignity of the two terms is made clear in the speech of Abigail to David in 1 S 25⁴¹. With true womanly dignity and courtesy combined she calls herself אִמָּה, and yet consents to become a אִמָּה and do the menial task of washing the feet of David's slaves. It was to the אִמָּה that the laborious duty was assigned of grinding at the mill. This is the word used to designate the slave-girl behind the millstones in Ex 11⁵, where the term is employed to describe the lower end of the social scale. The LXX render—δούλη, θεραπαινά, and οἰκέτις.

There is another interesting word employed in Hebrew to express slave-concubine, viz. אִמָּה (אִמָּה). No satisfactory Semitic etymology can

* See art. MARRIAGE, vol. iii. p. 270^b, under 'Dowry,' and quotation from Tristram's *Eastern Customs*, &c.

† Similarly in Gn 30 Bilhah is called by Rachel in her conversation with Jacob 'my *amāh*,' while in the narrative she is described as her *shiphāhah*. This chapter is an intricate complex of J and E. It is impossible to say that either document shows a preference for one expression over the other, though in ch. 21 E prefers the title אִמָּה for Hagar.

be found for the word, and its form strongly suggests a Greek origin *παλλακίς* (πάλλαξ, cf. Latin *pellez*). The Greek race was called π; by the ancient Semites. It is found in the Race-table Gn 10²⁻⁴ (P) and in the Assyr. inscriptions of Sargon and in the Tel el-Amarna tablets. See art. JAVAN. The term therefore originally meant a foreign slave-concubine (cf. Is 2²⁰ and footnote above, p. 463). The references Gn 35², Jg 19¹, 2 S 15¹⁸ 20³ seem to suggest that the *pillegesh* was of a lower class and lax in morals.

7. PRICE OF SLAVES.—According to the Book of the Covenant (Ex 21³²) this was 30 shekels, or about £4, 5s., which was evidently the average price in the pre-exilic period. The money-value would of course vary with the slave's age and physical condition. Joseph's brethren were content with 20 shekels when he was sold to the Midianite (Ishmaelite) traders (Gn 37²⁸). This was due to his youth. According to the post-exilic Jewish legislation (Lv 27²⁻³), 20 silver shekels (nearly £3) was the sum fixed for the redemption of slaves between 5 and 20 years old. We find the same price (¼ *maneh*) paid for a slave from Suri mentioned in a very early contract-tablet of Babylonia.* The ordinary price, however, for an adult slave prevailing in Western Asia during several centuries was that stated in Ex 21³², viz. 30 shekels. This, according to the most probable computation of the money-value of a *homer* and a *lethech*, was the price paid for his wife by the prophet Hosea (3²). See Nowack, *ad loc.* This was nearly the amount paid by Ptolemy Philadelphus for every Jewish captive in Egypt that he redeemed, viz. 120 drachmæ (about £4).† In 2 Mac 8⁹⁻¹⁰ we read that Nicanor attempted to defray the Roman tribute of 2000 talents by the sale of Jews at the rate of 90 per talent. This shows that the same value prevailed in the 2nd cent. B.C. Nor can we forget that for 30 shekels our Lord was sold by His traitor-disciple to the Jewish authorities (cf. Zec 11¹²).

When we turn to the clay documents of Babylonia we find like sums and even lower paid for a slave. The values also range in special cases much higher. Thus in the time of Nebuchadnezzar we hear of a woman, Sakinna, and her daughter, a little girl of 3 years of age, being sold for 35 shekels [or nearly £5]. In another case a husband and his wife fetch 55 shekels [or about £7, 10s.] (Sayce). Mr. Pinches has transcribed a contract-tablet, in which a slave is sold for 2½ *manehs* of silver, or more than £22;‡ while, according to Tiele, a slave might even cost as much as £95.§ In both these last instances the slave must have been particularly valuable, probably owing to his possession of skilled qualifications.

8. SUBSEQUENT HISTORY OF SLAVERY FROM THE DAYS OF JEREMIAH.—In Jer 34^{at} we read of the unsuccessful attempt which was made in the reign of Zedekiah to carry out the provisions of the Deuteronomic code respecting the seventh year of release, the philanthropic efforts of the king being thwarted by the avarice of the owners. On the other hand, Nehemiah's strenuous endeavours in the years that followed the return from exile were crowned with better success. Acting in the spirit of the new Levitical legislation (Lv 25⁴⁷), the Jewish slaves of foreign masters were redeemed, and the rich were persuaded to forego at least a portion of their rights of usury through which the whole trouble of bondage to a foreigner was brought about. 'We have borrowed money to pay the royal tribute upon our fields and our

* Schrader, *KTB* iv. p. 44 (iii.).

§ *Bab.-Assyr. Gesch.* p. 507.

vineyards . . . and, lo! we reduce our sons and our daughters to slavery, and it is not in our power to help it; for other men have our fields and our vineyards' (Neh 5¹⁻¹³). Nehemiah's request, that the fields, vineyards, oliveyards, and houses should be restored, was complied with. Doubtless in later times there was full scope for the operation of this injunction to redeem the Israelite slave from bondage to a foreign master, for we read that in the wars of the Ptolemies and the Selencidæ large numbers of Jewish captives were taken (1 Mac 3⁴, 2 Mac 8¹¹).

It would be an interesting object of investigation to endeavour to determine how far the philanthropic tendencies of Nehemiah and of the post-exilic legislation were influenced by the humane civilization of Babylonia. That that civilization was humane is clearly attested in the OT. Jeremiah's advice to the Jewish captives in Babylonia, 'Build ye houses, and dwell in them; plant gardens, and eat the fruit of them; take ye wives, and beget sons and daughters' . . . (Jer 29⁵⁻⁶), would have been impracticable under any other than an enlightened and humane polity. And the fact that large numbers of Jewish residents preferred to remain in the land of exile instead of availing themselves of the edict of Cyrus to return to their own land, is a significant hint in the same direction. Babylonia, as Sayce has pointed out, was a land where agricultural pursuits were carried on, as in Egypt, by industrious, peace-loving freedmen (not by slaves, as in Assyria, where the pursuits preferred by the conquering race were trade and war). In many instances we learn from the clay documents of purchase or sale that mother and child were sold together. Indeed, rights were accorded to women in possessing property superior to those of their Hebrew sisters in pre-exilic Canaan. 'The ancient Accadian law ordered, that if children had been born to slaves whom the former owner had sold while still keeping a claim upon them, he should, in buying them back, take the children as well at the rate of 1½ shekels each' (Sayce, *Social Life among the Assyrians and Babylonians*, p. 79).

The number of slaves in Palestine at any time down to the 1st cent. A.D. was probably small in comparison with that which was to be found in ancient Greece or in Rome in the later days of the Republic. From the report of a census made in A.C. 309, the male citizens of Athens numbered 45,000, and the slaves 350,000. It must be confessed, however, that the accuracy of this computation might be questioned. That the number was very considerable cannot be denied. For even the poorest citizen had a slave for his household, and a great number were employed in the occupations of baking, cooking, tailoring, etc. The father of Demosthenes possessed 50 slaves. Others owned many more (cf. Xenoph. *Vect.* 4. §§ 14, 15). They were employed in workshops or mines.—In ancient Rome large portions of the *ager publicus* began to be held by patricians as the Roman State extended its confines. These land-possessiones were cultivated to a large extent by slaves (cf. Liv. vi. 12). Thus slaves increased in number, displaced the poorer class of freemen and peasant proprietors, and in the Licinian Rogations (B.C. 367) a provision became necessary that a certain number of freemen should be employed on every estate. In the later days of the Republic, and under the first emperors, the number of household slaves increased greatly (cf. Juv. *Sat.* iii. 141). Horace seems to regard ten slaves as a moderate number for a person in comfortable circumstances to keep (*Sat.* i. iii. 12, vi. 7). These would be largely supplied from the vast number of captives taken in war. From Cæs. *BG* iii. 16 we gather that slave-dealers followed in the track of an army, and after a victory, when a sale of slaves took place (*sub corona vendidit*), purchased at a cheap rate.

The treatment of slaves became more inhuman both in Greece and Rome as their number increased. In some respects their position in Athens was worse than it was in Rome. For in Athens the manumission of slaves did not take place so frequently as in Rome. Moreover, their position as manumitted slaves (*ἐλευθεροί*) was inferior to that which they enjoyed in Rome; for instead of becoming citizens they passed into the condition of mere *πίνακες*, and were obliged to honour their former master as their patron (*ἐπαυτοῦ*), and, if they neglected certain duties which they owed towards him, might even forfeit their modified condition of freedom. Even Aristotle regards a slave as a mere possession or chattel (*κτῆμα*), or an *ἐκδοχὴν ὀργάνου*, an instrument endowed with life (*ἔκτ. Nic.* viii. 13,

Pol. i. 4). The bad treatment of Greek slaves is evidenced by the fact that they often mutinied (Plato, *Legg.* vi. 777 C). The insurrections under the Republic in Italy and Sicily attained formidable proportions. The two servile revolts in Sicily in B.C. 135 and 103 taxed all the resources of Rome, and were with difficulty suppressed, while the rebellion under Spartacus carried devastation through the Italian peninsula (B.C. 73-71). Nor are we in any degree surprised when we take account of the harsh penalties inflicted on slaves by their Roman masters, e.g. working in chains and fetters (Plautus, *Most.* i. i. 18; Terence, *Phorm.* ii. i. 10), suspension by the hands while heavy weights were tied to the feet (Plautus, *Asin.* ii. ii. 31). We read also of hard labour in the *ergastulum*, and of such harsh penalties as the *furca*, *crux*, and *notatio* (or branding inflicted on runaway slaves). Even ladies treated their slave attendants harshly in the days of the Empire, as Martial and Juvenal testify (Juven. *Sat.* vi. 219 ff., 492; Mart. *Epiq.* ii. 66; cf. Ovid, *Am.* i. 14, 15). Varro, in his *de Re Rustica* (i. 71), expressly classes slaves with beasts of burden; and even the gentle and refined Cicero feels constrained to apologize to his friend Atticus for feeling 'more than a becoming grief' for the death of his slave Sosithus' (*Ep. ad Attic.* i. 12).

But as we enter Jewish society we pass into a new and happier world. In the first place, the number of slaves was far smaller in relative proportion. At the return of the exiles there were 42,360 Hebrew freemen, and only 7337 slaves, or one slave to 5·72 freemen. The teachers of the Talmud looked with disfavour on the ownership of many slaves. The more slaves, so much the more thieving; the more female slaves, so much the more unchastity (cf. *Babâ mezi'a* 60b). The Essenes and Therapeutæ did not tolerate slavery, as being contrary to man's dignity (Philo, ii. 458, 482). The later literature of the OT reveals the humane attitude of Judaism towards the slave, and the religious basis on which it rested. The latter is vividly expressed in Job 31¹²⁻¹⁵. Humane and gentle treatment of a slave from his early youth will engender a filial feeling in him towards his master (Pr 29^{10, 21}). On the other hand, it was clearly realized that there were dangers from undue laxity.

'Set thy servant to work, and thou shalt find rest;
Leave his hands idle, and he will seek liberty . . .
Send him to labour, that he be not idle;
For idleness teacheth much mischief' (Sir 33^{25, 27}).

And the same writer advises even severe disciplinary measures—

'Yoke and thong will bow the weak;
And for an evil servant there are racks and tortures' (v. 26).

It is necessary to bear the last passage in mind if we are to gain a true and complete picture of this aspect of Jewish social life (cf. Mt 25⁹, Lk 12⁴⁶), the latter passage showing that very severe corporal chastisement, falling short of loss of limb or life, might be meted out to an 'evil servant'.† According to the Mishna (*Yadain* iv. 7), it was a subject of discussion among Pharisees and Sadducees as to whether a slave who had committed an injury on another was himself responsible or his master. According to the contention of the Pharisees, the master was *not* responsible, though he *was* responsible if the injury were committed by his ox. Thus the Pharisees (in contrast with the Roman Varro above cited) emphasized the distinction between an unreasoning brute and a slave. They argued, moreover, that a slave might otherwise easily wreak his spite on his master by committing an injury on another which the master had to pay. According to *Babâ kammâ* (viii. 4), the slave, if he committed an injury on another, was liable to make compensation when he obtained his release.

Respecting the conditions of release of Gentile slaves owned by a Jewish master we have not many data to guide us; see above, under 5 B, *ad fin.* Every facility was afforded for the manumission of

* 'Me plus quam servi mors debere videbatur commoverat.'

† We are led to suspect that these sterner traits of Jewish treatment reflect Græco-Roman influence.

Gentile slaves. According to the prescriptions of the Talmud, the Gentile slave received release through (1) redemption purchase (Maimonides, *Abadim*, v. 2), (2) letters of manumission (*ib.* 3), (3) testamentary disposition, (4) silent recognition of his freedom (*Peah*, iii. 8), (5) by becoming a Jew (*i.e.* a proselyte), (6) by marriage with a free woman, etc. (Hamburger).

In Schürer, *GJV* 3 (iii. p. 53), interesting details are furnished respecting the influence of Greek legal procedure on Jewish practice in the release of slaves. The act of release took place *ἐν τῇ συναγωγῇ*, *i.e.* in the synagogue before the assembled congregation (probably with some reference to Ex 21⁸; see above). Full freedom was granted to the slave, *χρῆσις* is (= *ἐν*) *τῇ συναγωγῇ* *δοῦλος* *τῆς καὶ συναγωγῆς* [cf. *ἐπεκαταστῆναι* in Ac 24. 46 | 14 64, Ro 12¹, Col 4¹, *i.e.* with the exception of regular worship in the synagogue to which the slave was bound. Accordingly, this mode of release in a sacred place involved a definite pledge on the part of the released slave to honour its religious usages. We have a parallel in Hellenic custom, whereby the procedure took place in a temple, and consisted in a fictitious sale of the slave by the master to the deity, the slave himself bringing the purchase-money. This did not in reality make the emancipated slave into a temple servant. He became actually free, and only morally appropriated by the deity. These facts are certified by documents discovered at Panticapæum and Gorgippia (cf. Schürer, *ib.* p. 18). The same tradition passed into the Christian Church in the eastern provinces of the Roman empire, and was called *manumissio in ecclesia*; see Schürer, p. 53, footn. 53.

The treatment of slaves in the Jewish household was not only humane, but under a good and pious master it would be even brotherly. Of the most distinguished personages it is related that they readily feasted their slaves with the same food of which they themselves partook, addressed old slaves as 'father' or 'mother,' and regarded their death as that of a beloved relative (*Berakhûth* 16b; *Kethubûth* 61; Jerus. *Babâ kammâ* 6).^{*} Acc. to *Berakhûth*, *passim*, slaves are placed with women and children in exemption from *shema* and wearing phylacteries, though bound in other matters of ritual.

9. THE CHRISTIAN ATTITUDE TO SLAVERY.—This may best be described as the religious attitude of Judaism expanded to the dimensions of Christ's gospel of universal redemptive love to man. With its advent new powers had entered into the world—new conceptions of human duties and relationships. All these lie implicit in Christ's Gospel of the Kingdom. 'To the poor the gospel is preached' (Mt 11⁵). St. Paul expressed the new consciousness in the words: 'All are sons by faith in Christ Jesus . . . As many of you as have been baptized into Christ have put on Christ. . . . There is neither Jew nor Greek, there is neither slave nor free . . . for ye are all one in Christ Jesus' (Gal 3²⁶⁻²⁸, cf. Col 3¹⁰⁻¹¹). And so the doors were thrown open wide to a world that yearned for salvation.

'The kingdom of God with its sublime universalism offers its invitation to all men as children of a heavenly Father, and binds those who follow His call into a society. . . . In the Christian Church the poor man found the civic rights of the Divine kingdom accorded to him without reserve as God's own child. . . . To the slaves, that lowest and most unhappy class of Græco-Roman society, the rights of man were restored. In the Church they heard the magic tones of the words: "Ye are men for whom also Christ has died; redeemed, to whom the same position belongs in the kingdom of God as to your masters." Masters also heard in the Church the solemn admonition that they were the brethren of their slaves, since both had taken upon themselves by voluntary choice the yoke of obedience to Christ (1 Co 7^{21ff.}, Eph 6^{5ff.}). When Paul uttered thoughts like these in his letter to Philemon, in which he interceded for the runaway slave of the latter, he was writing the charter of emancipation for the many millions of slaves who were held down by a minority in a degrading bondage.'[†]

^{*} On the humane treatment of slaves by Moslems see Lane's *Arabian Nights*, vol. i. p. 64 ff. (ch. i. note 13). Nevertheless, we are told that 'a master may even kill his own slave with impunity for any offence, and he incurs but a slight punishment (as imprisonment for a period at the discretion of the judge) if he kills him wantonly' (p. 68).

[†] Mangold, *Humanität und Christenthum*, Rede beim Antritt des Rektorats der Rheinischen Friedrich Wilhelms Universität, am 18 October 1876. Bonn, Adolph Marcus.

Nevertheless, the Church issued no authoritative mandate that masters were to liberate their slaves. On the contrary, obedience to masters was inculcated (Eph 6⁵, cf. parallels), as well as forbearance to slaves (v.⁶).^{*} The leaven was to work slowly and surely, without external compulsion by ecclesiastical authority, through eighteen centuries, until in the 19th cent. slavery was abolished in all the territories of Christian European peoples. In the 20th the leaven will work its course in society to yet larger issues!

10. RELIGIOUS USE OF THE TERM 'SLAVE' ('SERVANT').—The word 'servant' or 'slave' is constantly employed in the etiquette of daily intercourse in ancient Semitic society and among Arab populations at the present day. 'Thy servant' (or if a woman, 'thy handmaid') is the language of ordinary courtesy employed by an individual, when he speaks of himself, in addressing a superior or even an equal. In relation to God, this term is universally used by the worshipper. The root *ʿbd* expresses the dependent relation of subordination and obedience on the part of the individual to his Divine patron and Lord. And it has been shown, under ii. 1, how constantly this expression enters into proper names compounded with the name of deity, whether Canaanite or Hebrew. That collective and idealized Israel was so designated is especially apparent in Deutero-Isaiah. The term had been already employed in Ezk 28²⁵ 37²⁵, and also in Jer 30^{10ff.} 46^{nd.}† The passages in which the expression occurs in its most characteristic form within the collection designated by the term 'Deutero-Isaiah' (chs. 40-56) are specially called the 'servant' passages, and are regarded by most critics as distinct in authorship; viz. 42¹⁻⁴ 49¹⁻⁶ 50⁴⁻⁹ 52¹³ 53¹².

The portrayal of the servant in these four sections is distinct from that which prevails in the rest of Deutero-Isaiah. In the former the servant is idealized, personal and sinless. He is Jehovah's disciple, chosen to minister to the heathen as well as to his own people (49⁶), going about his own mission with quietness (42³ 53⁷), suffering like Jeremiah and Job through the scorn of the unfaithful, and so offering a propitiation for the guilt of his race (53⁴⁻⁶). On the other hand, in the rest of Deutero-Isaiah, the 'servant Jacob' is blind, deaf, a prisoner plundered, despised, full of sin, though chosen by God, protected and destined for a glorious future. Yet these two portrayals have their essential features in common. Accordingly, 'servant (or slave) of Jehovah,' as a religious term applied to Israel, is a name of honour. Israel is chosen as God's messenger as well as servant. In fact the difference between Jacob as God's *ʿbd* and as His own personal slave, called to a high and honourable mission, is very slight. The two expressions stand in parallelism in 42¹⁹. The servant is the chosen one in whom God takes pleasure. We are reminded of the relationship of Abraham to God as the 'friend of God' (2 Ch 20⁷ Ja 2²³, cf. Korān. sur. 41²⁴). See, further, art. ISAAH, and Smend, *ATliche Religionsgesch.* 2 p. 352 ff. In fact the expression is constantly employed in the OT as a name for God's messengers, especially the prophets (Am 3⁷ Jer 7²⁵ 25⁴ 90⁵ etc.), cf. Rev 10⁷ 11¹². It is used of Moses (Dt 34⁵ Jos 1¹), of Isaiah (Is 20³). Furthermore, it is used of the Messiah in Zec 3⁸, and of the angels in Job 41⁸ (on the other hand, in Ps 103²¹ 104⁴ the term employed is *ʿm* *ʿl*, which properly expresses honourable, voluntary, and, moreover, priestly service to God).

^{*} It should not be forgotten that the distinction between bond and free is cancelled, according to St. Paul's conception, *only in Christ*, *i.e.* within the confines of the redeemed society—the Church. Outside the Church the distinction might still prevail, and even be regarded as valid. St. Paul hardly contemplates any reorganization of society that does not rest on redemption and sanctification of individual life as a basis. In that outside world St. Paul might conceivably still regard Roman law as a *quasi* *παράνομος*, and hold that slavery, as a human institution, under certain guarantees, might be under temporary Divine sanction. Modern missionaries of the Cross in heathendom, with its more primitive social conditions, have been compelled to adopt this view.

† It can scarcely be held that either of these latter passages is genuine. In Cornill's text (*SBOT*) they are relegated to the foot of the page.

‡ But see Budde, *Die sogenannten Ebed-Jahwe-Lieder*, 1900. Marti also argues against separating the conceptions in the Servant-passages from the rest of Deutero-Isaiah; see his commentary, p. 289 f.; so also Cornill in *Theolog. Rundschau*, Nov. 1900.

The transition from this OT use to the NT application of the corresponding term *δοῦλος* is very slight. It is applied to himself by Symeon (Lk 22²⁹) in his prayer to God (*Nunc Dimittis*). Who is consistently addressed as *δεσπότης* (a master of slaves, cf. Ac 4²⁴, Rev 6¹⁰), and similarly the Virgin Mary speaks of herself as God's *δούλη* (ἡ δούλη), Lk 1³⁸.

This term St. Paul, in the introduction to his Epistles, not infrequently uses with reference to himself (Ro 1¹, Ph 1¹); and that it is employed as an honourable designation, like the *נָזַק* of Ezekiel and Deutero-Isaiah, is evident from the corresponding use of *ἀπόστολος* in 1 Cor., 2 Cor., Gal., Eph., and Col. (equivalent to *נָזַק*, see above).

The relation of service to God is one of freedom and sonship (*υιοθεσία*), as we learn from Ro 8²¹. We have been emancipated from the older relationship to the law, which was one of fear and constraint, summed up in Ro 8¹⁵, in the phrase *πνεῦμα δουλείας . . . εἰς υἱοθεσίαν*. These two contrasted states of relationship, belonging respectively to the new covenant of freedom and to the old covenant of bondage to the law, are compared by way of allegory to Isaac, son of the freewoman Sarah, and Ishmael, son of the bond-slave (*παῖς δούλης*) Hagar. The one is represented by the heavenly Jerusalem and the other by Mount Sinai (Gal 4²¹⁻⁵¹). By His death Christ has freed us from subjection to bondage throughout our life through fear of death (He 2¹⁵). Obviously, such a relationship of free, loving service to Christ is not adequately expressed by *δουλεία*. The slave has no proper cognizance of his master's thoughts, but Christ has confided all His Father's purposes of love to His disciples. 'Henceforth I do not call you servants (slaves), but I have called you friends' (Jn 15¹⁵).

LITERATURE.—Nowack, *Heb. Arch.* and the corresponding work of Benzinger; Ewald, *Alterthümer*, pp. 280-288 (Eng. tr. p. 210 ff.); the articles on Slaves in *PRE*, in Riehm's *HWB*, and in Hamburger's *RE*; Mielsner, *Die Verhältnisse der Sklaven bei den alten Hebräern*; Mandl, *Das Sklavenrecht des AT*. All these have been duly utilized in the present article. Suggestive for the OT is ch. vi. on 'Society, Morals,' etc., in McCurdy, *HPM* ii. 168 ff. On Græco-Roman Society cf. Smith's *Dict. of Gr. and Rom. Ant.* and the *Concise Dict.* by Warre Cornish (from which materials have been drawn). Other works have been referred to in the course of the article. On Arab slavery see Lane's *Arabian Nights*, ch. i. note 13; on slavery in the light of Christian ethics see Jul. Köstlin, *Christliche Ethik*, pp. 318, 400 ff.; Lightfoot, *Philemon* (Introd.). OWEN C. WHITEHOUSE.

SESIS (B *Σεσις*, A *Σεσσις*), 1 Es 9²⁴ = Shashai, Ezr 10⁴⁰.

SESTHEL (*Σεσθήλ*), 1 Es 9²¹ = Bezalel of the sons of Pahath-moab, Ezr 10³⁰.

SET.—The Eng. verb to 'set' is properly a causative form of 'sit,' but it has been confused with 'sit' (partly through spelling both 'set'), and, like other monosyl. verbs, has come to be used very freely. 1. Observe the foll. passages: Gn 30³⁰ 'And he set three days' journey betwixt himself and Jacob' (Wyc. 'And putte a space of three daies weye betwixt,' 1388 'settide the space of weie of thre daies betwixt'); Ex 19¹³ 'And thou shalt set bounds unto the people round about' (Wyc. 'ordeyn termes,' 1388 'sette termes'; Tind. 'sett marks rounde aboute the people'); Ps 73¹⁸ 'Surely thou didst set them in slippery places'; Sir 10⁹ 'Such an one setteth his own soul to sale' (ἡν ἑαυτοῦ ψυχὴν ἐκπρακτον ποιεῖ); Lk 7⁸ 'I also am a man set under authority' (τασσομένους); He 12¹ 'the race that is set before us' (τὸν προκειμένον ἡμῶν ἀγῶνα); 12² 'for the joy that was set before him' (ἀπὸ τῆς προκειμένης αὐτῷ χαρᾶς).

2. To 'be set' is sometimes used as an equivalent for to 'sit,' like Scot. 'be seated,' as Lk 7⁷ Rhem.

'As she knew that he was set downe in the Pharisees house.' So Dn 7¹⁰ 'The judgment was set' (כִּתְּבָהּ לְךָ, LXX *κριτήριον ἐκάθισε*, Vulg. *judicium sedit*, Wyc. 'the dom sate'); Sir 38²⁸ 'Who is alway carefully set at his work'; Mt 5¹ 'When he was set, his disciples came unto him'; 27¹⁹; Lk 22³⁴ 'This child is set for the fall and rising again of many in Israel' (κεῖται); Jn 13¹³ 'So after he had washed their feet . . . and was set down again'; Ph 1¹⁷ 'I am set for the defence of the gospel' (κεῖμαι); He 8¹; Rev 3²¹ 'To him that overcometh will I grant to sit (καθίσαι) with me in my throne, even as I also overcame, and am set down (ἐκάθισα) with my father in his throne.'

3. To set means to arrange in proper order, in 2 Ch 20¹⁷ 'Set yourselves, stand ye still,' Ps 2⁸ 'The kings of the earth set themselves' (ἑτάθη), Driver [*Par. Psalt.*], 'take their stand', Ca 5¹³ 'His eyes are . . . fitly set,' Is 3²⁴ 'Instead of well set hair, baldness.' Cf. Ex 25⁷ Tindale, 'Onix stones and sett stones for the Ephod'; Chaucer, *Duchesse*, 828—

'So had she
Surmounted hem alle of beaute,
Of maner and of comeliness,
Of stature and wel set gladnesse.'

4. The sense of 'fix,' 'determine,' arises naturally from the original idea of 'cause to stand.' Thus Neh 2⁸ 'It pleased the king to send me; and I set him a time'; so Gn 17²¹ 'At this set time in the next year' (cf. 21², Ex 9³); 'set office' (ἡγεσία), 1 Ch 9²², 21², 2 Ch 31¹⁵⁻¹⁸; and esp. 'set feast' (as the tr. of *שָׁבַע*, lit. 'appointed time' [of sacred seasons]) Lv 13²². RV (7 such are enumerated in this ch.), Nu 10¹⁰ (RV) 29²⁹ al. Cf. *Judgement of the Synode at Dort*, p. 4, 'Hee hath chosen in Christ unto salvation a set number of certaine men, neither better nor more worthy then others.'

5. The following phrases are mostly biblical: (1) *Set one's hand to*, Dt 23²⁰ 'In all that thou settest thine hand to' (RV 'puttest thine hand unto'), 28⁸. Cf. Ac 12¹ Rhem. 'And at the same time Herod the king set his handes, to afflict certain of the Church.' (2) *Set one's heart to*, Ex 7²³ 'Neither did he set his heart to this also' (RV 'lay even this to heart,' RVm 'Heb. set his heart even to this'); Dt 32⁴⁶ 'Set your hearts unto all the words which I testify among you this day'; 1 Ch 22¹⁹ 'Now set your heart and your soul to seek the Lord your God'; Job 7¹⁷ 'What is man . . . that thou shouldest set thine heart upon him?'; Ps 78⁸ 'A generation that set not their heart aright'; Jer 31²¹ 'Set thine heart toward the highway'; Dn 6¹⁴ 'Then the king . . . set his heart on Daniel to deliver him.' Cf. 1 Ch 29³ 'I have set my affection to the house of my God.' (3) *Set one's face*. This is one of the many Hebraisms in which the 'face' plays its part. It has two meanings: (a) *Turn towards with a purpose or resolution, determine*, Nu 24¹ 'But he set his face toward the wilderness'; 2 K 12¹⁷ 'And Hazael set his face to go up to Jerusalem'; Ezk 21¹⁶ 'Go thee one way or other . . . whithersoever thy face is set'; Jer 42¹⁵ 'If ye wholly set your faces to enter into Egypt,' 42¹⁷; Lk 9⁵¹ 'He stedfastly set his face to go to Jerusalem' (τὸ πρόσωπον ἐστήρισεν). (b) *To take up an antagonistic position*, Lv 17¹⁰ 'I will even set my face against that soul that eateth blood,' 20⁹, 16⁹; Jer 21¹⁰ 'For I have set my face against this city for evil'; Ezk 6² 'Son of man, set thy face toward the mountains of Israel, and prophesy against them,' 13¹⁷ 15⁷ 20⁴⁶ 21² 25³ 28²¹ 29² 35² 38². (4) *To set eyes on*, Ac 13⁹, is not as now 'to catch a glimpse of,' but to 'fix one's eyes upon': 'Then Saul (who is also called Paul), filled with the Holy Ghost, set his eyes on him' (ἀρετίσας εἰς αὐτόν, RV 'fastened his eyes on him').

6. The verb to 'set' is used with certain adverbs in a sense that is antiquated or Hebraistic: (1) *Set at*, that is, 'valued at,' 2 K 12⁴ 'The money that every man is set at' (RV 'the money of the persons for whom each man is rated,' RVm 'Heb. each man the money of the souls of his estimation'). Cf. Lv 27² Tind. 'Yf any man will geve a synguler vowe unto the Lorde acordynge to the value of his soule, then shall the male from xx. yere unto lx. be set at fyftie sycles of sylver'; and Shaks. *Hamlet*, I. iv. 67—'I do not set my life at a pin's fee.' (2) *Set at nought*, i.e. despise, treat with contempt or mockery, Pr 1²⁶ 'But ye have set at nought all my counsel,' Mk 9¹², Lk 23¹¹, Ac 4¹¹ 19²⁷, Ro 14¹⁰. (3) *Set by*, i.e. esteem, 2 Mac 4¹⁵ 'Not setting by the honours of their fathers, but liking the glory of the [Grecians] best of all' (ἐν οὐδενὶ ρητέμενοι, RV 'making of no account'). Cf. Ps 15⁴ Pr. Bk. 'He that setteth not by hym selfe, but maketh moche of them that fear the Lorde'; Ridley, *Works*, 27, 'Lest I should seem to set by mine own conceit, more than is meet'; *Babees Book*, p. 72—

'He that good manners seemes to lack,
No wyse man doth set by:
Without conditions vertuous,
Thou art not worth a fye.'

So *set much by*, 1 S 18³⁰ 'His name was much set by,' 26²⁴ 24: cf. 1 P 3⁴ Tind. 'With a meke and a quyet sprete, which sprete is before God a thinge moche set by.' So also *set little by* or *set light by*, Dt 27¹⁶ 'Cursed be he that setteth light by his father or his mother'; Ezk 27¹², Jth 11². Cf. Jer 50¹² Cov. 'She shall be the least set by amonge the nacions'; Tindale, *Expos.* p. 229, 'Called the least, that is to say, shall be little set by and despised: called great, that is to say, shall be much set by and had in reverence.' Even *set at light* is found in the margin of 2 S 19⁴⁵. Cf. Fisher, *A Spiritual Consolation* (in Morley's *Eng. Religion*, p. 140), 'Such as we set but at light, full greatly shall be weighed in the presence of his most high Majesty'; Knox, *Hist.* 49, 'Perchance this hand of God will make them now to magnifie and reverence that word which before (for the fear of men) they set at light price.' (4) *Set forth*. This phrase has various meanings: (a) *Begin a journey*, Nu 20¹ 'These shall first set forth'; Ac 21² 'We went aboard, and set forth' (ἀναχθήμεν, RV 'set sail'). Cf. Bunyan, *Holy War*, 68, 'The time, therefore, of his setting forth being now expired, he addressed himself for his march'; Melvill, *Diary*, 172, 'Sa, parting from Berwik, hartlie recommendit to the blessing and grace of God, be manie godlie men and women, and be sum sett and convoyet a guid way on our jorney, we cam that night to Anweik.' (b) *Bring forward or cause to be seen*, Ps 141² 'Let my prayer be set forth before thee as incense' (תָּבִיחַ, LXX κατεβυσθησθαι, Vulg. dirigatur); Ezk 27¹⁰ 'They hanged the shield and helmet in thee; they set forth thy comeliness' (תָּבִיחַ, LXX ἐδωκαν); Dn 11¹¹ 12 'And he shall set forth a great multitude' (תָּבִיחַ); Am 8⁸ 'When will the new moon be gone, that we may sell corn? and the sabbath, that we may set forth wheat?'; (תָּבִיחַ, AVm and RVm 'open'); Lk 1¹ 'To set forth in order a declaration of those things' (ἀναδείξασθαι); Ro 3²⁵ 'Whom God hath set forth to be a propitiation' (ὁ προθεστος ὁ θεός, AVm 'foreordained,' RVm 'purposed'); 1 Co 4⁹ 'For I think that God hath set forth us the apostles last' (ἀνέδειξεν); Gal 3¹ 'Before whose eyes Jesus Christ hath been evidently set forth' (προεγράφη, RV 'was openly set forth'); Jude 7 'Even as Sodom and Gomorrha . . . are set forth for an example' (πρόκεινται δειγμα). Cf. Pr. Bk. *Exhort. to Confession*, 'When we assemble and meet together . . . to

set forth His most worthy praise, to hear His most holy word'; Shaks. *King John*, II. i. 295—

'Up higher to the plain, where we'll set forth
In best appointment all our regiments.'

The same phrase is used technically of placing food before one, Jn 2¹⁰ 'Every man at the beginning doth set forth good wine' (τίθεται). (c) *Praise*, Sir 11 heading 'We may not vaunt or set forth ourselves.' Cf. Pr. Bk. 1549 (Canticle foll. *Te Deum*), 'Speak good of the Lord; praise him, and set him up for ever'; and Shaks. *Lucrece*, 34—

'Beauty itself doth of itself persuade
The eyes of men without an orator:
What needeth then apologies be made
To set forth that which is so singular?'

(5) *Set forward*. See FORWARD in vol. ii. p. 60. (6) *Set on* means: (a) *Place on table*, Gn 43¹¹ 22 'And he washed his face . . . and said, Set on bread'; Bel 11 'Set on the meat, and make ready the wine.' (b) *Incite or urge to some course of action*, Jer 38²² 'Thy friends have set thee on, and have prevailed against thee' (הִתְנִיחַ); 43⁸ 'But Baruch the son of Neriah setteth thee on against us' (הִתְנִיחַ). (c) As a ptep. *bent on*, Ex 32²² 'They are set on mischief.' (d) *To attack*, Ac 18¹⁰ 'No man shall set on thee to hurt thee' (ἐπιθῆσθαι σοι). (7) *Set to*, meaning *affix*, of a seal, Jn 3³⁵ 'He that hath received his testimony hath set to his seal that God is true' (ἐσφράγισεν). Cf. Ex 21³⁰ Tind. 'Yf he be sette to a summe of money, then he shall geve for the delyveraunce off his lyfe, accordynge to all that is put unto him'; Adams, *Works*, I. 18, 'In testimony whereof I have set to my hand, and sent it you as a token of the gratitude of my heart.' (8) *Set up*, meaning *establish*, Mal 3¹³ 'They that work wickedness are set up.'

J. HASTINGS.

SETH (שֵׁת, i.e. Shēth; LXX and NT Σῆθ [in 1 Ch 1¹ A has Σῆς]).—The third son of Adam, Gn 4²⁵ (J) 5⁸ (P), 1 Ch 1¹, Lk 3³⁸. In the first of these passages J assigns a characteristic etymology for the name, Eve being made to say 'God hath set (shāth) for me another seed instead of Abel,' for which reason she called him Shēth (i.e. 'setting' or 'slip,' Dillm.). In Sir 49⁶ Seth is coupled with Shem as 'glorified among men.' A heretical Jewish sect, whose tenets afterwards found acceptance in Christian Gnostic circles, derived its name from Seth. These *Sethians* or *Sethites* held (like other Gnostics, Jewish and Christian) that the material universe was the creation of angels and not of the supreme *Dynamis*, to whom Seth owed his birth. Theodore (Hær. Fab. i. 14) appears to identify them with the Ophites: Σηθιαροὶ οὗτοι Ὀφίταις ἢ Ὀφίτας τινες ὀνομάζονται. Some of the Jewish Sethites believed Seth to have been the Messiah, and later Gnostics held that Jesus Christ was a re incarnation of Seth. For further information as to this sect and its relations to the Ophites and Cainites (a subject beyond the scope of this art.), see Friedländer, *Der vorchristliche jüdische Gnosticismus*, 1898, p. 18 ff.; Preuschen, *Die apokr. gnost. Adamschriften*, I: 50, passim; and cf. Epiphanius (adv. Hær. xxxix.), pseudo-Tertull. (viii.), and Philast. (iii.).

J. A. SELBIE.

SETHUR (שֵׁתוּר, Σαθούρ).—The Asherite spy, Nu 13¹³ (14).

SETTLE (שֵׁתָּלָה).—See TEMPLE, p. 710^b n.

SEVEN, SEVENTY.—See NUMBER, vol. iii. pp. 562 f., 565^a.

SEVENEH (שֵׁנִי; Gr. Συνη, Syene; Egypt. Swen, Dem. Sone, Copt. סוּנַן [Swan]; Arab. أسوان [Asuwan]).—A city on the east bank of the Nile

immediately above the First Cataract, the southern frontier post of Egypt. For some distance north of Aswan the cultivable portion of the Nile Valley is extremely narrow. At Aswan the hills draw in rapidly on either side, and the town is built against a rocky barrier of sandstone supported by a dyke of granite that crosses the Nile and forms the cataract. Here there is no cultivation on either bank beyond that of a few palm trees and tiny patches of garden; but the little island of Elephantine in the middle of the stream opposite Aswan is almost clothed with vegetation, and formed the ancient capital of the first nome of Upper Egypt. West of the river are cliffs, shrouded with sand, but pierced by countless tombs of the former inhabitants of the island. Elephantine-Syene must have formed an almost ideal frontier fortress. Immediately above this point the narrow passage of the Nile was rendered dangerous and very tedious for boats by the rocks and islands and rushing currents of the cataract. On the west bank there is not even a path; the adventurous sightseer must clamber over the rocks; on the east bank there was only one clear road, and this led through a long narrow defile parallel to the river into the open ground opposite Philæ. Elephantine, the island, was the secure metropolis of the district, the residence of the governor, and the centre of the local cult of the cataract gods. Its name in Egyptian was *'bw*, 'elephant,' demotic *yb* (179), a name which seems to have been applied not only to the island but also to the surrounding district, including the quarries of granite. Syene itself was probably considered as only a mainland suburb of Elephantine. 'Wine of *swn*' is mentioned in very early inscriptions, but it is doubtful whether the reference is to Syene. In the Egyptian inscriptions the name of the town is known only at a very late date; its temple is of Ptolemaic age. Gradually the importance of Elephantine waned, and that of Syene grew; with the fall of paganism even the name *Yéb* (Elephantine) was given up and that of *Swan* took its place. It is remarkable that Ezekiel employs the name *Suench* and not *Yéb* for the southern frontier; the references are Ezk 29¹⁰ 30⁴; the reading of RVM 'from Migdol to Syene' is the best. (See MIGDOL). Herodotus often refers to *'Ελεφαντινή*. In ii. 30 he speaks of Elephantine, Daphnæ near Pelusium, and Marea as the garrison cities respectively against the Ethiopians, against the Syrians and Arabs, and against Libya. His only reference to Syene is in ii. 28, where he mentions 'hills between (*sic*) Syene and Elephantine' in a fantastic passage which is no guide to facts; his geography in Upper Egypt is always faulty.

F. LL. GRIFFITH.

SEVER.—The verbs to 'sever' and to 'separate' both come from Lat. *separare*, the former through Old Fr. *sevrer*, the latter directly. The form 'sever' now expresses a sharper stroke than 'separate,' but in older Eng. no distinction was observed between them. All the verbs tr^d 'sever' in AV are also tr^d 'separate.' Cf. Bacon, *Adv. of Learn.* ii. 367, 'We see the chaff may and ought to be severed from the corn in the ear'; and Rhem. NT (note on Ac 10²⁶), 'But when Heretikes began to rise from among the Christians, who professed Christ's name and sundry Articles of faith as true believers doe, the name *Christian* was to common to sever the Heretikes from true faithful men: and thereupon the Apostles by the holy Ghost imposed this name Catholike upon the Beleevers which in al points were obedient to the Churches doctrine.'

J. HASTINGS.

SEVERAL.—Just as 'sever' in AV means to

separate, so 'several' means *separate, distinct*, as 2 K 15¹ 'He was a leper unto the day of his death, and dwelt in a several house'; Mt 25¹⁵ 'to every man according to his several ability.' So *severally*, 1 Co 12¹¹ 'dividing to every man severally as he will.' Cf. Dt 7⁶ Tind. 'The Lorde thy God hath chosen the to be a severall people unto him self'; Tymme, *Calvin's Genesis*, 882 (Gn 49²⁸), 'Every one of them blessed he, with a severall blessing'; Ridley, *Works*, 390, 'Our own servants were taken from us before and . . . we each one appointed to be kept in several places'; Calderwood, *Hist.* 107, 'Their [elders] office is as well severally, as conjunctly, to watch diligently over the flock committed to their charge.'

J. HASTINGS.

SHAALABBIN (שָׁאֲלָבִין; B Σαλαβειν, A Σαλαβειν; Vulg. *Selebin*).—A town of Dan mentioned between Irshemesh (Beth-shemesh) and Aijalon (Jos 19⁴²). It is apparently the same place as SHAALBIM.

C. W. WILSON.

SHAALBIM (שָׁאֲלָבִים; in Joshua LXX BA have Σαλαβειν, in 1 Kings B has Βηθαλαμει, A Σαλαβειν; Vulg. *Salabim, Salebin*).—A town mentioned with Mt. Heres and Aijalon as being occupied by the Amorites who had driven the Danites into the hills (Jg 13³). It was, with Makaz and Beth-shemesh, in the district of one of Solomon's commissariat officers (1 K 4⁹); and if it be the same place as *Shaalabbim*, it is mentioned with Aijalon and Beth-shemesh in Jos 19⁴². It is probably identical with *Shaalbon*, the home of one of David's heroes. Eusebius and Jerome (*Onom. s. Σαλαβειν, Salabim*) identify it with Salaba, a large village in the territory of Sebaste; but this is too far north of Aijalon. Elsewhere (*Com. ad Ezek.* 48) Jerome mentions 'the towers of Aijalon, and Selebi, and Emmaus' in connexion with Joppa and the territory of Dan. From this Conder (*PEF Mem.* iii. 52) identifies *Shaalbim* with *Selbit*, about 8 miles N. of Beth-shemesh, 3 miles N.W. of Aijalon, and 2 miles N. of Emmaus. Possibly (see Driver, *Text. of Sam.* 54) *Shaalbim* should be read for *Shaalim* in 1 S 9⁴.

C. W. WILSON.

SHAALBONITE, THE (שָׁאֲלָבִיט; in 2 S δ Σαλαβωνιτης; in 1 Ch B δ 'Ομει, A ο Σαλαβωνι; de *Salboni*).—Eliabba, the Shaalbonite, one of David's heroes (2 S 23³², 1 Ch 11³²), was a native of Shaalbon,—a place not mentioned elsewhere. See SHAALBIM.

C. W. WILSON.

SHAALIM, THE LAND OF (שָׁאֲלִים; B τῆς γῆς 'Εσσακέμ, A τ. γ. Σααλειμ; *terra Salim*).—Saul, when searching for his father's asses, passed through the land of Shaalim (1 S 9⁴) after he had traversed the hill-country of Ephraim, and the land of Shalishah, and before he reached the 'land of Jemini' (RV and AV 'land of the Benjamites')—probably part of the territory of Benjamin. If Saul started from Gibeah, and Shalishah was, as seems probable, in the western hills (see SHALISHAH), the land of Shaalim must have been a portion of the hill-country east of Lydda, and not far from the boundary of Benjamin. It is possible, however, that Shaalim is a textual error for *Shaalbim* of Jg 13³, Jos 19⁴². See Driver, *Text. of Sam.* p. 54.

C. W. WILSON.

SHAAPH (שָׂאֵף).—1. The son of Jahdai, a Calebite, 1 Ch 2⁴⁷. 2. A son of Caleb by his concubine Maacah, 1 Ch 2⁴⁹. In both passages B has Σάγαε, A Σάγαφ.

SHAARAIM (שָׁאֲרָאִים; *Saaraim, Saarim*).—1. A town of Judah, in the Shephelah (lowland), mentioned (Jos 15³⁵) in the same group with Adullam, Socoh, and Azekah. It was unknown to Eusebius (*Onom. s. Σααραιμ*). Conder (*PEF*

Mem. iii. 194) suggests *Khurbet S'atreh*, west of *Beit Atab*; others identify it with *Zakartya* (Riehm, *HWB*). Shaaraim is perhaps mentioned again in the pursuit of the Philistines after the death of Goliath (1 S 17⁵¹), when 'the wounded Philistines fell down by the way to Shaaraim (RVm 'the two gates'), even unto Gath and Ekron.' The meaning of the word is 'two gates,' and the LXX takes it in this passage to mean the gates of Gath and Ekron. See, further, art. GAI, and Wellh. *Sam. ad loc.*

2. A town of Simeon (1 Ch 4³¹) which appears as *Sharuhin* in Jos 19⁶, and as *Shilhim* in Jos 15³². It was situated in the Negeb, and was possibly the same place as the Canaanite 'fortress of the land of Sharuana,' mentioned in the annals of Thothmes III. (RP ii. 38). This indicates that the form *Sharuhin* is correct. C. W. WILSON.

SHAASHGAZ (שֶׁאֶשְׁגָּז).—A chamberlain of king Ahasuerus, Est 2⁴. The LXX reads *Gai*, the same name as it gives to the official referred to in vv. 8, 15. See HEGAL.

SHABBETHAI (שָׁבְתַי).—A Levite who opposed the action of Ezra in the matter of the foreign marriages, Ezr 10¹⁰ (B *Σαββαθαι*, A *Καββαθαι*) = SABBATEUS of 1 Es 9⁴. He is mentioned also, along with other Levites, in Neh 8⁷ (LXX om.), as explaining the law to the people (in 1 Es 9⁴ SABBATEUS); and in 11¹⁶ (BAG⁹ om., N⁹ Σοββαθαίος) as one of 'the chiefs of the Levites who had the oversight of the outward business of the house of God.'

SHACHIA (שָׁכִיָּה, so Baer; the MSS show the variants שָׁכִיָּה, שָׁכִיָּה, שָׁכִיָּה, שָׁכִיָּה, the last being supported by the Syr. and the LXX [B *Σαχιά*, A *Σεβιά*, but Luc. *Σεχιά*], while the forms in *ś* instead of *ś* can claim the support of the Vulg. *Sechia*).—A son of Shoharaim, a Benjaminite, 1 Ch 8³⁰.

SHADDAI.—See art. GOD, vol. ii. p. 199^a.

SHADRACH (שָׁדְרַח, Σεδράχ).—The name given to Hananiah, one of Daniel's companions, by the prince of the eunuchs, Dn 1⁷. It is related in Dn 3 how Shadrach, along with Meshach (Mishael) and Abed-nego (Azariah), all of whom had been advanced to high offices (2⁴⁹), resisted the command to pay homage to Nebuchadnezzar's golden image, how all three were in consequence cast into a fiery furnace, and how they were miraculously delivered. See HANANIAH, No. 2, and THREE CHILDREN (SONG OF THE).

The etymology of the name *Shadrach* is uncertain. Frd. Delitzsch (*Lib. Dan.* xii.) suggests that it is a variation of the Bab. *Šudur-Aku*, 'command of the moon-god,' comparing the Assy. *Tēm-ilu* = 𐎶𐎵𐎶𐎶, and the Heb. שְׁדֵי־לֵי. This view is pronounced by Schrader (*KAT*² 429 [COT ii. 125]) to have 'considerable probability.'

J. A. SELBIE.

SHAGE (שָׂגִי; B *Σωλά*, A *Σαγῆ*).—The father of Jonathan, one of David's heroes, 1 Ch 11³⁴. See AGEe and SHAMMAH, No. 3.

SHAHARAIM (שָׁהָרַיִם; B *Σαρήλ*, A *Σαρήμ*).—A Benjaminite who is said to have begotten children in the 'field of Moab' after he had sent away two wives, Hushim and Baara, 1 Ch 8³ (RVm). The passage is obscure.

SHAHAZUMAH (שָׁהָזֻמָּה *Kethibh*; AV *Shahazimah*, after *Kere* שָׁהָזֻמָּה; B *Σαλειμ κατὰ θάλασσαν*, A *Σασειμάθ*, *Sehesima*).—A town allotted to Issachar, which was apparently between Mt. Tabor and the Jordan (Jos 19²²). Its site was unknown to

Eusebius and Jerome (*Onom. s. Σασιμά*, *Sasima*), and it has not yet been identified.

C. W. WILSON.

SHALEM (שָׁלֵם; *eis* Σαλήμ; in *Salem*).—According to AV (cf. Luther's translation), which follows the LXX, the Pesh., and the Vulg., 'Shalem' (Gn 33¹⁸) is a proper name, and considered to be a town near Shechem. Eusebius and Jerome (*Onom.*) believed Shalem and Shechem to be the same place. But if Shalem was a town, it must have been *Salim*, 4 miles east of *Nāblus* (Shechem). In Gn 28²¹ שָׁלֵם *bē-shālēm* is translated 'in peace,' and in Gn 33¹⁸ we should probably translate 'in peace to the city of Shechem,' as in RV which follows the Targums of Onkelos and pseudo-Jonathan, the Samaritan Codex, the Arabic Version, and the great Jewish and other commentators of modern times. See Dillm. *ad loc.* C. W. WILSON.

SHALISHAH, THE LAND OF (שְׁלִישָׁה; B *ה' γῆ Σελιά*, A *ה' γῆ Σαλισά*; *terra Salisa*).—Saul, when searching for his father's asses, passed through the 'land of Shalishah' (1 S 9⁴) after crossing the 'hill-country of Ephraim,' and before reaching the 'land of Shaalim.' Leaving Gibeah he must have crossed Mt. Ephraim in a northerly direction, and the 'land of Shalishah' must consequently have been in the western hills. *Baal-shalishah* (2 K 4²³), which was very probably in the land of Shalishah, is said by Eusebius and Jerome (*Onom. s. Βαυθαρισάθ*, *Bethsalisa*) to have been in the Thamnitic toparchy, 15 M.P. north of Lydda. This points to *Khurbet Sirisia*, or, according to Conder (*PEF Mém.* ii. 285), to *Khurbet Kefr Thlith*. See SHAALIM. C. W. WILSON.

SHALLECHETH, THE GATE (שַׁלְּחֶת; *ἡ πύλη παστοφορίου*; *porta quæ ducit*).—One of the gates of the 'house of Jehovah' which Solomon was to build after the death of David (1 Ch 22). It is mentioned only in 1 Ch 26¹⁶, in a list of the gatekeepers (AV 'porters') of the sacred enclosure as settled by David. The gate was on the west side of the outer court, behind the temple buildings, and apparently at, or near, the head of the ramp or causeway (שַׁלְּחֶת) which led up to the sanctuary from the ravine which Josephus calls the Tyropæon Valley. It has been suggested (cf. Smith's *DB*, s.v.) that the causeway was at 'Wilson's Arch'; but, in the uncertainty which still exists with regard to the site of the temple, and the condition of the hill in the time of Solomon, this can only be regarded as speculation. Some authorities (e.g. Riehm [*HWB*], *Speaker's Com.*), from the meaning of the word *Shallecheth*, 'casting forth,' consider the gate to be that by which the ashes and the offal of the victims were thrown out. It is, however, probable that the refuse of the temple was carried out on the east or south side, and burned, or otherwise disposed of, in the Kidron Valley. The LXX rendering, 'Gate of the *Pastophorion*,' appears to point to a building with chambers, of which there were several round the outer enclosure of the temple. C. W. WILSON.

SHALLUM (שָׁלֻם and שָׁלֹם).—1. One of the kings of Israel, 2 K 15¹⁰⁻¹⁶ (Σελλούμ). He headed a conspiracy against Zechariah, the last king of Jehu's dynasty, murdered him, and usurped his throne (c. 740 B.C.). After the short period of a month, he himself fell a victim to MENAHEM (see vol. iii. p. 340^a). 2. It is not improbable that in Jer 22¹¹ (Σελλήμ) שָׁלֹם (AV and RV 'Shallum') is meant to be an epithet, 'the requited one,' applied to Jehoahaz, or it may be that Shallum was the original name of the latter (see JEHOAHAZ, No. 2). The Chronicler takes (perhaps from this passage) Shallum as a proper name, and makes him the

fourth son of Josiah, 1 Ch 3¹⁵ (B Σαλούμ, A Σαλούμ). 3. The husband (or son, LXX in 2 Kings) of HULDAH the prophetess, 2 K 22¹⁴ (B Σελλήμ, A Σελλούμ), 2 Ch 34²² (BA Σελλήμ). 4. A Judahite, 1 Ch 2⁴⁰ (B Σαλούμ, A in v. 40 Σαλλούμ). 5. A descendant of Simeon, 1 Ch 4¹ (Σαλέμ). 6. A high priest, son of Zadok, 1 Ch 6^{12, 13} (B Σαλώμ, A Σελλούμ), Ezr 7³ (B Σελούμ, A Σελλούμ) = SALEM of 1 Es 8¹ and SALEMAS of 2 Es 1¹. 7. A son of Naphtali, 1 Ch 7¹³ (B Σαλωμών, A Σελλούμ), called in Gn 46³⁴ and Nu 26⁴⁰ Shilleem (שִׁלְעָם; in former passage A Συλλήμ, in latter B Σελλή, A Σελλήμ), with the gentile name Shillemites (שִׁלְעָמִי; B δ Σελλήμει, A δ Σελλήμει), Nu 26⁴⁰. 8. The eponym of a family of gatekeepers, 1 Ch 9^{17, 18} (B Σαλώμ, A first time Σαλλώμ), Ezr 4² = Neh 7⁴⁵ (B Σαλούμ, A Σελλούμ), called in 1 Es 5³⁸ SALUM, and (possibly) in Neh 12²⁰ MESHULLAM. 9. A Korahite gatekeeper, 1 Ch 9¹⁹ (B Σαλωμών, A Σαλώμ) 21 (BA Σαλώμ), called in 26^{1, 2, 9} MESHELEMIAM and in 26¹⁴ SHELEMIAM. It is not at all unlikely that this name should be identified with the preceding. 10. Father of Jelizkiah, an Ephraimite chief, 2 Ch 28¹³ (Σελλήμ). 11. One of the porters who had married a foreign wife, Ezr 10²⁴ (B Γελλήμ, & Γαίλειμ, A Σολλήμ). 12. One of the sons of Bani who had committed the same offence, Ezr 10⁴² (B Σαλούμ, A Σελλούμ). 13. The son of Hallowesh, ruler of a district of Jerusalem. He and his daughters are recorded to have assisted in the repairing of the wall, Neh 3¹³ (B Σαλούμ, A Σαλλούμ, & Οδλούμ). 14. The uncle of Jeremiah, Jer 32 (Gr. 39)⁷ (Σαλώμ). 15. Father of Maaseiah, the keeper of the threshold, Jer 35 (Gr. 42)⁴ (Σελώμ). J. A. SELBIE.

SHALLUN (שָׁלֻן).—The son of Col-hozeh, the ruler of the district of Mizpah, who took part in the repair of the wall and gates of Jerusalem, Neh 3¹⁵ (LXX om.).

SHALMAL.—See SALMAL.

SHALMAN (שָׁלְמָן).—Hos 10¹⁴ (only) 'as Shalman spoiled Beth-arbel in the day of battle.' The identity of Shalman and of BETH-ARBEL (which see) are both doubtful. The former name may be a contraction of *Shalmaneser*, although the prophet's language, implying some event fresh in the memory of his hearers, does not suit the reign of Shalmaneser II. (B.C. 860–825) or even Shalmaneser III. (783–773). If Shalmaneser IV. (727–722) be referred to, the words must be a later gloss (so Wellhausen, *Kl. Proph. ad loc.*). To the suggestion of Schrader (*KAT* 441 [*COT* ii. 140]) that the reference may be to an incursion (cf. 2 K 15²⁰) of the Moabite king *Salamanu*, mentioned in Tiglath-pileser's great triumphal inscription (II Rawl. 67, line 60), both Wellh. and Nowack object that such an occurrence would have been too insignificant to supply material for the prophet's comparison. The versions give us no help, the LXX B reproducing Σαλμάνος by ὁ θεὸς Σαλμάνος [i.e. θεὸς Σαλμάνος ἐκ τοῦ οἴκου Ἱεροβοάμ] (A Ἱεροβάμ), while the Vulg. has *sicut vastatus est Salman a domo ejus qui judicavit Baal*, thinking apparently of the slaughter of Zalmunna by Gideon (Jerubbaal), Jg 8. J. A. SELBIE.

SHALMANESER (שָׁלְמַנְאֶסֶר, Σαλαμανασέρ, *Salmanasar*).—The name is abbreviated from Assyrian *Sulman-asaridu*, 'the god Sulman (of peace) is chief.' In 2 K 17³ it is said that 'Shalmaneser, king of Assyria,' came up against Hoshea of Samaria, who submitted at first, but afterwards, being detected in a conspiracy to revolt with the aid of the Egyptians, was deposed and imprisoned. Shalmaneser then besieged Samaria, B.C. 725. This was Shalmaneser IV. of the Assyrian monuments,

whose original name was Ulula, which he changed to Shalmaneser when he seized the throne (on the 25th day of Tebet, B.C. 727) after the death of Tiglath-pileser III. He seems to have been a successful general, and to have had no hereditary rights to the crown. Josephus (*Ant.* ix. xiv. 2), quoting from Menander, states that he attacked Elulæus of Tyre, and, though the Assyrian fleet of 60 vessels was destroyed by the Tyrian fleet of 12, the city was closely invested on the land side. Shalmaneser died at the beginning of the month Tebeth during the siege of Samaria, B.C. 722, after a reign of only 5 years. See, also, art. SHALMAN. A. H. SAYCE.

SHAMA (שָׁמָא; B Σαμαθά, A Σαμαά).—One of David's heroes, 1 Ch 11¹⁴.

SHAMBLES.—1 Co 10²⁵ 'Whatsoever is sold in the shambles, that eat' (Gr. μάκελλον, from Lat. *macellum*, a provision market). The word 'shambles' is now used of the slaughter-house, but formerly, according to its origin, denoted the place where the meat was sold. It is the Anglo-Sax. *scamel*, a stool, from Lat. *scamellum*, a little stool or bench. Cf. Congreve, *Juvenal's Satires*, xi.—

'Many there are of the same wretched Kind,
Whom their despairing Creditors may find
Lurking in Shambles; where with borrowed Coin
They buy choice Meats.'

J. HASTINGS.

SHAME (Heb. חָזַן 'to be ashamed,' חָזַן 'shame,' also other words; Gr. αἰσχύνω, αἰσχύνη, etc.).—In the biblical use of the word 'shame' there is a blending of several meanings: besides the sense of shame proper, felt for oneself (Job 11³, Lk 14⁹, 2 Th 3¹⁴) or for another (Ezr 9⁶, Pr 10⁵ 17², 2 Co 9⁴), there is included the feeling of disappointment (Job 6³⁰, Ps 35⁴, Jer 14³ 22²; cf. Ro 5⁵) or deception (Ps 14⁸, Jer 2²⁰), the experience of disaster (Job 8², Ps 40¹⁵) or disgrace (including reproach, rebuke, or insult) (Jg 18⁷, Ru 2¹⁵, Job 16¹⁰ 19³, Ps 22⁶ 35⁴ 69⁷, Pr 25¹⁰, Ph 3¹²); and thus are combined the subjective sense, the inward feeling, and the objective, its outward cause. This feeling is ascribed figuratively to a fountain (Hos 13¹⁵), Lebanon (Is 33⁹), the sun (Is 24²³), and a vessel (Ro 9²¹, 2 Ti 2²⁰). Shame is awakened by the exposure of some parts of the body uncovered literally (compare Gn 2²⁵ with 3⁷ 9^{20–27}, Ex 32²⁵, 2 S 6³⁰ 10⁴, Is 20⁵, Mic 1¹¹), or figuratively (Is 47³, Jer 13²⁸, Nah 3⁵, Rev 3¹⁸ 16¹⁵), by outrage on a woman's person (2 S 13¹³), by dishonouring treatment of the body (Is 50⁶, Mk 12¹⁴, Lk 20¹¹, 1 Th 2²), as crucifixion (He 6⁸ 12²), and even by the appearance of a corpse (1 Co 15⁵²). Poverty may make ashamed (Pr 13¹⁸, 1 Co 11²²), so beggary (Lk 16³), defeat in battle (2 Ch 32²¹, Ps 44⁹ 89⁴⁵), or even disease (Nu 12¹⁴). A wicked wife (Pr 12⁴), or a bad child (Pr 10⁵ 29¹⁵), may cause shame. Shame arises from any breach of acknowledged rules of propriety, as a woman's being shaven (1 Co 11⁵), or speaking in church (1 Co 14²⁵), or a man's having long hair (1 Co 11¹⁴). Sins so unseemly are found among men, that not only the practice of them awakens shame (Ro 1^{26–27} 6²¹, Jude 12), but even the very sight or mention of them (Ezk 16²⁷, Eph 5¹²). Among the sins mentioned as bringing shame are folly (Pr 3³⁵ 14³⁵ 18¹³), refusal of instruction (Pr 13¹⁸), ignorance of truth of God (1 Co 15¹⁴), quarrelsomeness (Pr 25⁵, 1 Co 6⁸), haste in speech (Pr 18¹³), riot (Pr 28⁷), idleness (Pr 10⁵), wilfulness (Pr 29¹⁵), lying (Pr 13⁵), dishonesty (2 Co 4²; cf. RV and AV), theft (Jer 2²⁰), disrespect to parents (Pr 19²⁶), ingratitude (1 Co 4¹⁴), pride (Pr 11²).

Shame in one or other of its senses is regarded as the Divine punishment of sin, which God threatens (Ps 132¹⁸, Jer 23⁴⁰ 46¹⁸), and which the pious in OT

are sure will, in answer to prayer, fall on His and their enemies (Ps 61¹⁰ 44⁷ 53⁸ 70² 86¹⁷). On the other hand, God promises (Ps 37¹⁹), and the pious are assured, that this experience will either not be theirs at all (Ps 25³ 31¹⁷ 34⁵ 69⁶ 119³¹), or if ever theirs, that they will be delivered from it (Is 29²³ 54⁶ 61⁷, Jl 2²⁶). Even God's chosen people may be exposed to disgrace and disaster, making them first of all ashamed of their state (2 Ch 30¹⁵, Jer 12¹³ 14³), and then truly ashamed of the sin that has brought it on them (Ezr 9⁶, Jer 31¹⁹, Ezk 16⁶¹, Hos 10⁶); but sometimes it is long before this feeling is aroused (Jer 3³ 6¹³ 8^{2, 12}). Fidelity to God's cause may, however, also bring shame (Ps 44¹⁵ 69⁷). The sin that most surely is followed by shame is idolatry (Is 1³⁰ 42¹⁷ 44⁹ 45¹⁶, Jer 17¹³ 48¹³, Hos 4⁷ 10⁹), or alliance with idolators (Gn 34¹⁴, Ezr 9⁶). The idol itself is shameful (Jer 3³⁴ 11¹³, Hos 9¹⁰; perhaps Hos 4⁷ reading with Targ. Pesh. 'they have exchanged their glory for infamy'; cf. Jer 2¹¹ and Ps 106²⁰), and its worship shameful, perhaps because often licentious (see Cheyne on Hos 4⁷ and 9¹⁰). Worthy of note in this connexion is the change of the names Eshbaal (1 Ch 8²⁸), Meribbaal (1 Ch 8³⁴), Jerubbaal (Jg 6²⁹), to Ishbosheth (2 S 2⁸), Mephibosheth (2 S 4⁴), and Jerubesheth (2 S 11²¹). Although the alterations show the prophetic editor's aversion to idolatry, yet the names in their original form are not necessarily a proof of idolatry, as the name Baal may be used as a title of J^r (Hos 2¹⁶). Akin to the sin of idolatry was trust in any foreign alliances for safety instead of in J^r, and this too brings 'shame,' i.e. disappointment (Is 20⁵ 30^{3, 5}, Jer 2³⁶; cf. Ezr 8²⁹). See, further, Driver, *Par. Psalt.* (Glossary. s. 'abashed,' 'ashamed').

In NT the sense of shame is often mentioned by St. Paul. He is not ashamed of the gospel (Ro 1¹⁶), of his converts (2 Co 7¹⁴; cf. 9⁴), of his hope (Ro 5⁵), of his faith (Ro 9³⁸ 10¹¹), of his trials (Ph 1²⁰, 2 Ti 1¹²), of his boasting (2 Co 10⁹). Onesiphorus was not ashamed of Paul's chain (2 Ti 1¹⁶), and Timothy is called on not to be ashamed of the witness of the Lord, or of Paul His prisoner (2 Ti 1⁸). The unruly are to be brought to shame by exclusion from the church (2 Th 3¹⁴). While the enemies of Christ are put to shame (Lk 13¹⁷), and the false accusers of His disciples (Tit 2⁸, 1 P 3¹⁶), they, although slandered and ill-treated (2 Co 6⁸), need not be ashamed to suffer for His name (1 P 4¹⁶); for, if they are ashamed of Him now, He will be ashamed of them in the day of judgment (Mk 8³⁸, Lk 9²⁶); but if they are faithful they need not fear shame in that day (1 Jn 2²⁸), for Christ is not ashamed to call the sanctified brethren (He 2¹¹), and God is not ashamed to be called the God of those who seek a better country (He 11¹⁶); but the wicked and unbelieving shall awake to shame (Dn 12²; cf. Jn 5²⁹).

A. E. GARVIE.

SHAMEFACEDNESS.—The adj. 'shamefaced' occurs in Sir 26^{18, 28} 32¹⁰ 41^{18, 24}, and the subst. 'shamefacedness' in Sir 41¹⁶, 1 Ti 2⁹. But in the 1611 editions, and for some time after, the spelling is always 'shamefast' and 'shamefastness.' Davies says he has not found 'shamefaced,' 'shamefacedness' earlier than 1661.

Trench (*On AV of NT*, p. 60) says: 'Shamefastness is formed upon *shamefast*, that is, *fast* or established in honourable *shame*. To change this into *shamefacedness* is to allow all the meaning and force of the word to run to the surface, to leave it ethically a far inferior word,—and marks an unfaithful guardianship of the text, both on their part who first introduced, and theirs who have so long allowed, the change.' And Davies (*Bible English*, p. 12), after describing 'shamefastness' as 'that modesty which is *fast* or rooted in the character,' adds, 'The change is the more to be regretted because *shamefacedness* is seldom employed now in a very good sense; it has come rather to describe an awkward diffidence, such as we sometimes call sheepishness.' But the confusion between 'shamefastness' and 'shamefacedness' is as old as 1611. Shaks. does not use the subst., but he has the adj. twice: in *III Henry VI.* iv. viii. 53,

'shamefaced' is the only spelling; in *Rich. III.* i. iv. 142, the folio has 'shamefaced,' the quartos 'shamefast.' In the Rheinish NT (note on Lk 24⁵⁰) we read, 'S. Augustine saith that Christ him self not without cause would have his sign to be fixed in our foreheads as in the seat of shamefastness, that a Christian man should not be ashamed of the reproach of Christ,' which shows how the confusion could arise. And James Melvill (*Diary*, 79) uses the word 'shamefastness' practically in the modern sense of 'shamefacedness,' 'Yit my guid God, of his free grace, and love towards me, a vean, vyll, corrupt youthe; partlie by his fear wrought in my heart, partlie by necessar occupation in my calling, and partlie be a certean schamefastnes of a bashfull nature, quhilk he pat in me, sa keipit me that I was nocht overcome nor miscaried be na woman offensivlie to his kirk, nor grievouslie to my conscience, in blotting of my bodie.' For the proper sense of 'shamefastness,' cf. Chaucer, *Doctor's Tale*, 55—

'Shamefast she was in mayden's shamefastnesse';

Spenser, *FQ* II. ix. 43—

'She is the fountain of your modestee:

You shamefast are, but Shamefastnes it selfe is shee';

Elyot, *Governour*, i. 51.—'The moste necessary thinges to be observed by a master in his disciples or scholars . . . is shamefastnes and praise. By shamefastnes, as it were with a bridell, they rule as well theyr dedes as their appetites.'

J. HASTINGS.

SHAMGAR (שַׁמְגָר, Σαμεργαρ).—Son of Anath, and judge in the south of Israel between Ehud and Deborah. He slew 600 Philistines with an oxgoad (Jg 3³¹ 5⁶). The name is Assy. like Samgar-nebo (Jer 39²), and is a shortened form of some such name as Sumgir-Bel, 'be gracious, O Bel,' with the divine name omitted. Anath is also the Assy. Bab. Anatu, the wife of the god Anu (see, however, BABYLONIA, vol. i. p. 215^b), unless we are to read Ben-anath, 'the son of Anatu,' which is the name of a Canaanite in one of the Tel el-Amarna tablets. The names show that Bab. influence lingered in the south of Palestine for some time after the period of the Tel el-Amarna tablets, when Bab. names were not uncommon there (see Moore's *Judges*, p. 106).

A. H. SAYCE.

SHAMHUTH (שַׁמְחֻת; Β Σαλαῦθ, Α Σαμαῦθ).—The fifth captain for the fifth month, 1 Ch 27⁸. He is called the IZRAHITE (Β ὁ Ἰσραῆλ, Α ὁ Ἰσραήλ), and is the same as Shammoth the Harorite (a scribal error for *Harodite*) of 1 Ch 11²⁷ and Shammah the HARODITE of 2 S 23²⁶.

SHAMIR (שָׁמִיר, Σαμήρ).—A Kohathite, son of Micah, 1 Ch 24²⁴.

SHAMIR (שָׁמִיר; Σαμειρ; Samir).—The name of two places in Palestine.

1. (Α Σαμειρ) A town in the hill-country of Judah (Jos 15⁴⁸), which is mentioned in the same group with Jattir and Socoh. Eusebius and Jerome from the reading of A alter the name to Shaphir (see Nowack, *Kl. Proph.* on Mic 1¹¹). Conder (*PEF Mem.* iii. 262) identifies it with *Khurbet Sômerah*, which lies west of *Debir*, and in this agrees with Guérin (*Judée*, iii. 364, 'Sumra').

2. (Α Σαμάρεια) The home and burial-place of Tola, a man of Issachar, who judged Israel for twenty-three years (Jg 10^{1, 5}). Shamir was in Mt. Ephraim, and Schwarz (151) identifies it with *Sanûr*, a picturesquely situated village between Samaria and En-gannim (*Jenin*).

C. W. WILSON.

SHAMLAI.—See SALMAI.

SHAMMA (שָׁמַי; Β Σεμα, Α Σαμαμ).—An Asherite, 1 Ch 7³⁷.

SHAMMAH (שָׁמַח).—1. The son of Reuel the son of Esau, and a tribal chief (שָׁמַח) of Edom (Gn 36^{13, 17} [Σομῆ, in v. 17 D Σομαί], 1 Ch 1³⁷ [Β Σομῆ, Α Σομμε]). 2. (B in 1 S 16⁹, 2 S 13³³ Σαμα, 2 S 13³, 1 Ch 2¹⁸ 20⁷ Σαμαδ, 2 S 21²¹ Σεμεδ; A in 1 S 16⁹ 17¹³ Σαμαμ, 1 Ch 2¹⁸ Σαμαδ, 1 Ch 20⁷ Σαμαδ) The third son of Jesse and brother of David. Like his two elder

brothers, he joined Saul's forces in the campaign against the Philistines, and was with the Israelite army in the valley of Elah when David overcame Goliath (1 S 17³⁴). According to a later writer, he was present at the anointing of David by Samuel (1 S 16¹⁻¹³). He was the father of Jonadab, the friend and adviser of Amnon (2 S 13³¹), and also of that Jonathan whose exploit against a Philistine giant is recorded in 2 S 21²⁰. His name is variously given as **Shammah** (שָׁמַח 1 S 16⁹ 17¹³), **Shimeah** (שִׁמְעָה 2 S 13³²), **Shimei** (שִׁמִּי, *Kêrê* שָׁמִי 2 S 21²¹), and **Shimea** (שִׁמְעָה 1 Ch 2¹³ 20⁷).

3. (2 S 23¹¹ B *Σαμαδ*, A *Σαμμεδ*; 23³³ B *Σαμρνδ*, A *Σαμνδ*; 1 Ch 11³⁴ B *Σωλδ*, A *Σαγδ*) The son of AGEH, a Hararite (read חֲרָרִי in 2 S 23¹¹, see v. 32, 1 Ch 11³⁴), one of David's famous 'Three.' The special act of bravery to which he owed his position is briefly recorded in 2 S 23¹¹⁻¹². The Philistines, in the course of a foray, had driven the Israelites from a field of lentils (1 Ch 11¹³ *barley*) at Lehi (read לֶהִי to *Lehi* (Jg 15²⁻²⁰) for לֶהִי to the *troop* (?), so most moderns; see Driver, *ad loc.*). The Israelites fled before the enemy, but Shammah held his ground, and by his courageous stand brought about a victory for Israel. The succeeding incident which is narrated in 2 S 23¹³, viz. the well-known exploit of David's three mighty men, who broke through the hosts of the Philistines and brought him water from the well of Bethlehem, has been frequently ascribed to Shammah and the two other members of 'the Three'; but the three heroes who performed this feat are clearly stated in v. 13 to belong to 'the Thirty.' Since no previous mention has been made of 'the Thirty,' it is probable that vv. 13-17a are not in their original place, and that v. 17b really forms the continuation of vv. 5-12 (so Wellh., Driver). In the parallel narrative (1 Ch 11^{10c}) Shammah is not mentioned by name, and the exploit which made his name famous is wrongly ascribed to Eleazar the son of Dodo. Klostermann plausibly suggests that the incorrect reading in v. 11 'into a troop' (לֶהִי) represents an original 'to battle' (לִמְלָחָה), and that the Chronicler accidentally passed from this phrase in v. 9 to the same phrase in v. 11, omitting the intervening narrative.

According to the most probable reading of 2 S 23³³ Shammah was the father of Jonathan, one of David's 'Thirty.' In this passage the word *son* has been accidentally omitted, and we must restore 'Jonathan the son of Shammah' (יְהוֹנָתָן בֶּן־שָׁמַח, so Driver, Budde, Kittel, Klost., Löhr); the parallel passage (1 Ch 11³⁴) gives 'Jonathan the son of Shage' (יְהוֹנָתָן בֶּן־שָׁגֵי), but the reading 'Shammah' (for *Shage*) is confirmed by Lucian (*Σαμαδ*). Possibly *Shāgē* (שָׁגֵי) has arisen from a confusion with 'Age' (אָגֵי) in 2 S 23¹¹. Wellhausen (*Text d. B. Sam.* p. 216) prefers the reading of the Chronicler (אֶשְׁרֵי or אֶשְׁרִי), and supposes that Jonathan the Hararite was the son of Shage (which he would restore in v. 11 for *Agce*) and brother of Shammah. Klostermann, adopting the reading of Lucian in 2 S 23¹¹ ('Hād = אָהֵי), identifies Shammah with Shimei the son of Elah, one of Solomon's twelve monthly officers (1 K 4¹⁸).

4. (2 S 23³³ B *Σαμαδ*, A *Σαμμ*; 1 Ch 11³⁷ B *Σαμαδ*, A *Σαμωδ*; 27⁸ B *Σαλαδ*, A *Σαμαδ*) A Harodite, i.e. probably a native of *Ain-harod* (see HAROD), one of 'the Thirty,' and captain of Solomon's fifth monthly course. In the parallel lists he is called 'Shammoth the Harorite' (1 Ch 11³⁷ שָׁמוֹת הַחֲרָרִי; read חֲרָרִי the *Harodite*) and 'Shamhuth the Izrahite' (1 Ch 27⁸ שָׁמְחֻת הַיִּזְרְהִי).

Since the lists of heroes given in 2 S 23 and 1 Ch 11 are admittedly in confusion, it is possible that (3) and (4) are identical, and that the obscure 'Hararite' (2 S 23¹¹⁻²³) is a mistake for 'Harodite.'

J. F. STENNING.

SHAMMAI (שָׁמַי).—1. A Jerahmeelite, 1 Ch 2²⁶ (B *Σαμα*, A *Σαμμα*). In v. 32 the LXX runs the Heb. שָׁמַי בֶּן־יִרְמֵי ('brother of Shammai') together as 'Αχεισάμας (B) or 'Αχισαμμά (A). 2. The 'son' of Rekem and 'father' of Maon, 1 Ch 2⁴⁴ (B *Σαμα*, A *Σαμμα*). 3. A Judahite, 1 Ch 4¹⁷ (B *Σεμν*, A *Σεμμα*). See GENEALOGY, IV. 54.

SHAMMOTH.—See SHAMHUTH, and SHAMMAH No. 4.

SHAMMUA (שָׁמּוּא).—1. The Reubenite spy, Nu 13⁴ (B *Σαμονήλ*, A *Σαμαλήλ*). 2. One of David's sons, 2 S 5¹⁴ (B *Σαμμοῦτ*, A *Σαμμοῦε*), 1 Ch 14⁴ (B *Σαμδα*, A *Σαμμοῦ*, *Σαμαδ*); called in 1 Ch 3⁹ **Shimea** (שִׁמְעָה; B *Σάμαν*, A *Σαμαδ*). 3. A Levite, Neh 11¹⁷ (*Σαμονε*) = SHEMAIAH, No. 6. 4. The head of a priestly family, Neh 12¹⁸ (B *ΣΑΝ* om., *Σαμμοῦε*).

SHAMSHERAI (שָׁמְשֵׁרַי; B *Ἰσμοσαριδ*, A *Σαμσαριδ*).—A Benjamite, 1 Ch 8²⁶.

SHAPE.—In AV, as in earlier English generally, 'shape' is less definite and less material than now. In Wis 18¹ the mod. meaning is nearly approached, 'Not seeing their shape' (*μορφή*, Vulg. *figura*), but even there it is 'outward form' generally. In Lk 3²² 'The Holy Ghost descended in a bodily shape like a dove upon him,' the meaning is simply 'appearance' (Gr. *σωματικῶς εἶδει*, RV 'in a bodily form'); so Jn 5³⁷ (*εἶδος*, RV 'form'). The only other occurrence is Rev 9⁷ 'The shapes of the locusts were like unto horses prepared unto battle' (*τὰ ὁμοιώματα*, RVm 'the likenesses'). Cf. Shaks. *Hamlet*, I. ii. 80—'All forms, moods, shapes of grief' (folios 'shews'); *Jul. Cæs.* II. i. 253—

'It will not let you eat, nor talk, nor sleep:
And, could it work so much upon your shape
As it hath much prevailed on your condition,
I should not know you, Brutus.'

In Rhem. NT Mk 16¹³ is τῷ 'And after this he appeared in another shape to two of them walking,' and on this word there is a note, 'Christ though he have but one corporal shape, natural to his person, yet by his omnipotencie he may be in whatsoever forme, and appears in the likeness of any other man or creature, as he list. Therefore let no man think it strange, that he may be under the forme of bread in the B. Sacrament.'

The old pass. ptep. of the verb, 'shapen,' is found in Ps 51⁶. So Tind. uses the old past tense 'shope' in Gn 2⁷ 'Then the Lorde God shope man, even of the mould of the erth.'

J. HASTINGS.

SHAPHAN (שָׁפָן; B *Σαβδρ*, A *Σαφάμ*).—A Gadite, 1 Ch 5¹².

SHAPHAN (שָׁפָן 'coney or rock-badger'; LXX *Σαφάν*, *Σαφφάν*, *Σεφφάν*; Vulg. *Saphan*: on this name as evidence that 'superstition of the totem kind had still a hold on Israelites in the last years of the independence of the kingdom of Judah,' see W. R. Smith in the *Journal of Philology*, 1880, p. 75, and Gray, *HPN* p. 103).—1. Scribe or finance minister (Ewald) in the reign of Josiah. He is brought prominently before us in the story of the discovery of 'the book of the law' in the temple, 2 K 22^{3a}, 2 Ch 34³⁻²⁸. The system of raising money for the repairs of the temple which had been instituted by Jehoash (2 K 12), seems from this narrative to have been in regular operation since that time. The money chest which had been set up by Jehoiada was emptied periodically under the supervision of the high priest and of the king's scribe. It was on one of these occasions that HILKIAH communicated to Shaphan his great discovery of 'the book of the law.' The Chronicler

(2 Ch 34⁸) represents Shaphan as having been accompanied by two other officials. In any case it was to Shaphan that Hilkiah entrusted the precious volume, and it was from Shaphan's lips that Josiah heard the words that so deeply moved him. Shaphan also formed one of the deputation that subsequently visited the prophetess HULDAH. Assuming that this was the Shaphan who was father of Ahikam (2 K 22¹², 2 Ch 34²⁰, Jer 26²⁴), he was grandfather of Gedaliah (2 K 25²², Jer 39¹⁴ 40⁶, 9. 11 41² 43⁶). The only objection to this supposition lies in the fact that Ahikam seems to take precedence of his father. It is, of course, possible that he may have filled a higher office. Whatever the truth may be concerning Shaphan's connexion with the discovery of 'the book of the law,' it is at least certain that he belonged to the party of reform whose inspiration was derived from that book, and who were friendly to Jeremiah. One of his sons, Ahikam, protected the prophet from the fury of the hostile priests and prophets (Jer 26²⁴). Another, Elasah, was one of the two whom Jeremiah employed to carry his letter to the captives in Babylon (Jer 29³). From the windows of the chamber of yet another son, Gemariah, Baruch read 'the words of the LORD in the ears of the people' (Jer 36¹⁰), words which were given still further publicity by the action of Gemariah's son, Micaiah (vv. 11. 13). And when the last agony of Jerusalem was over, it was with Shaphan's grandson, Gedaliah, that the aged prophet found an honoured asylum (Jer 39¹⁴).

2. Father of Jaazaniah, who was ringleader in idolatry of the seventy ancients of the house of Israel, as seen by Ezekiel (8¹¹).

N. J. D. WHITE.

SHAPHAT (שפח; —1. The Simeonite spy, Nu 13⁸ (BA *Σαφάτ*, F *Σαφάν*). 2. The father of the prophet Elisha, 1 K 19¹⁶. (B *Σαφάθ*, A *Σαφάτ*)¹⁹ (BA *Σαφάτ*), 2 K 3¹¹ (B *Ἰωσαφάθ*, A *Σαφάτ*) 6²¹ (B om., A *Σαφάτ*). 3. A name in the royal genealogy of Judah, 1 Ch 3²² (B *Σαφάθ*, A *Σαφάτ*). 4. A Gadite, 1 Ch 5¹² (LXX [?] confusing with שפח] δ *γραμματεὺς*). 5. On of David's herdmen, 1 Ch 27²⁸ (B *Σωφάν*, A *Σωφάτ*).

SHAPHIR (שפיר; LXX *καλῶς*; Vulg. *pulchra*).—One of the towns or villages—none of them very far from Eleutheropolis—which the prophet Micah addressed (Mic 1¹¹). According to Eusebius and Jerome (*Onom.* *Σαφείρ*, *Saphir*), it was a village of Judah in the hill-country between Eleutheropolis and Ascalon. Robinson (*BRP* ii. 34, note), van de Velde (*S. and P.* 159), and Conder, doubtfully (*PEF Mem.* ii. 413), identify Shaphir with one of three mud villages, called *es-Sūāfir*, which stand near each other about 3½ miles S.E. of *Esdūd*, Ashdod. This appears to be the place referred to in the *Onomasticon*, but the identification is uncertain. On the possible identity of Shaphir with *Shamir* of Jos 15⁴⁸ see Nowack on Mic 1¹¹.

C. W. WILSON.

SHARAI (שראי; B *Σαραιο*, A *Ἀρού*, N *Σαροῦε*).—One of the sons of Bani, who had married a foreign wife, Ezr 10⁴⁰.

SHARAR.—See SACAR.

SHAREZER (שרשזר [see Baer, *ad loc.*]; *Σαρδάρα*, BA in 2 K 19³⁷ and Zec 7², B in Is 37³⁶; *Σαρδάσα*, Luc. in 2 Kings, N/AQ in Isaiah. In its original Assyrian form the name is probably = *šar-usur*, 'protect the prince'; in meaning, a prayer addressed to some god whose name is omitted. *Bel-sharusur*, *Marduk-sharusur*, and similar Assyrian names are then unabbreviated parallels. It has been suggested that the full name of the Sharezer of 2 K 19 [= Is

37] was *Nergal-sharusur*, a Babylonian name which occurs in Jer 39³ [NERGAL-SHAREZER]. The origin of the conjecture is an untenable identification of Sharezer with the *Nergilus* of the historian Abydenus [see below]. In Zec 7² the complete name is very probably *Bel-sharezer*).

1. In conjunction with a brother, ADRAMMELECH, named as the assassin of the Assyrian king Sennacherib (2 K 19³⁷ = Is 37³⁶). The murderers are described as Sen.'s sons, and the scene of the assassination is given as the temple of NISROCH. According to the Babylonian Chronicle, Sen. was killed during an insurrection, and the date was towards the close of the year 681 (20th Tēbeth). The other records of the assassination are an inscription of Nabuna'id, an extract from Polyhistor (Berosus) in Eusebius, and another from Abydenus. These agree with the Chronicle in stating that Sen. was killed by one of his sons. They contain no reference to the complicity of *two* sons. Even Abydenus is explicit in saying that one son was the murderer.* Of the two names given by the Hebrew narrative, that of Sharezer is most affected by this preponderance of negative testimony. Adrammelech has the support of the names Adramelus and Ardumuzanus (Ardumusanus), which are given by Abydenus and Polyhistor respectively. One of Sen.'s sons, also, has a name (*Assur-sum-usabši*) which is said to be capable of readings approximately the same as these variants (Scheil in *ZA* xi. 425-27). There is nothing of a definite character to be said on the other side in favour of Sharezer.† Yet the negative argument is so much *e silentio* that an explanation of the appearance of the name in the Hebrew text is pressingly required before an error can be granted. W. M. Müller imagines too improbable a history. He supposes that Adrammelech was 'Assyrianized' into Sharezer by some archaeologist. Adrammelech was regarded as a translation, Sharezer was a retranslation put alongside of it in the text (*ZATW* xvii. 332). It can only be said, meantime, that Sharezer's name, his part in the assassination of Sen., and his relationship to the king, all rest on the authority of the Hebrew narrative.

The revolt, in which Sen.'s murder was an incident, was obviously designed to secure the throne for the rebel(s), and to prevent the accession of the designated heir Esarhaddon. In this it failed. Esarhaddon triumphed within six weeks, by the second of Adar, although for an unknown reason he did not formally assume the crown until three and a half months later (18th Sivan). The murderers fled to Armenia, according to the OT narrative. There was likely to be a welcome for such exiles there. The fragment of Abydenus says that Esarhaddon put Adramelus to death.

* *Qui a filio Adramelo est interemptus.* By a transposition of this sentence and the preceding, an attempt has been made to bring a certain *Nergilus* there mentioned into some connexion with the assassination of Sennacherib. But even then he is neither Sen.'s son nor his assassin. It is inadmissible to read the statement regarding him in the light of the weaker rather than of the stronger testimony. The supposition that *Nergilus* is Sharezer is a conjecture from an emended text (supporters of the hypothesis are named in Schrader, *COT* ii. 16). Equally possible, and even more probable, is the suggestion that the sentence *deinceps autem post eum Nergilus regnavit* is a reference to the Babylonian king Nergal-ushezib. This identification is made by Winckler (*ZA* ii. 392 ff.). But it is easier to suppose that the context is imperfect than to adopt his combination with another context.

† *Sar-ētir-Asūr* is a son of Sen. whose name might be identified with Sharezer (Winckler, *Altor. Forsch.*, 2nd Series [1898], i. 59). It can also be urged that Polyhistor and Abydenus may have got their names of the assassin from the Heb. Adrammelech. Moses of Chorene gives more positive testimony, but is not sufficiently reliable. He names two assassins. In the Whistons' Latin version (London, 1736) the forms are Adramelus or Ardamozanus and Sanasarius (l. 22). Their settlement in Armenia is the occasion of their being mentioned. Boscawen's recent identification (*Bab. and Or. Record*, viii. 259 ff.) seems to depend too much on a resemblance to the conjectural form *Nergal-sharezer*.

2. One who consulted the spiritual heads of the Jewish community on the question whether the fast observed on the anniversary of the burning of the pre-exilic temple was appropriate after its restoration (Zec 7²⁵).

The grammatical construction of v.², and consequently the purport of the verse, is very uncertain. RV makes 'Bethel' subject and Sharezer and the others messengers from Bethel. Such a personification seems without parallel in prose. AV follows Vulg. in making 'Bethel' accusative of direction and tr. 'to the house of God.' But the temple is never called *bēth-ēl*. The difficulty is removed by finding in these letters the Divine name which, according to analogy, is required to complete the compound *šar-umir*. The text may originally have read Bel-Sharezer (Siegfried-Stade, *HWB*). The *n* may be accounted for as a dittography of *n* in the early Hebrew character.* After this correction has been made, v.³ suggests that the author of the inquiry is one individual, namely (Bel-) Sharezer. Regem-melech and the others are then messengers whom he sent.

Sharezer's question is explained by the new situation which the restoration of the temple created. Since Zechariah addresses his reply to the 'people of the land,' it may be argued that Sharezer was spokesman on their behalf. But v.³ more naturally expresses individual perplexity. V.³ implies that the inquiry came from outside the community in Jerusalem. The question itself comes naturally from one who is not in touch with movements in the capital; it is artificial and unlikely when regarded as an attempt to bring local discussions to an issue (Nowack's view). Zechariah addresses the priests and the whole Jewish community ('people of the land,' as Hag 2⁴). The priests are doubtless named because 'instruction' (*tôrāh*) had been asked of them, and formally they have yet to reply (in v.³ the words 'and to the prophets' may be an insertion, anticipating the fact that actually Zechariah comes forward to reply). The people also are addressed, to secure for the prophet's words a wider currency.

Babylon is more likely to have been Sharezer's home than any part of Judah. His Babylonian name, *Bel-shar-umir*, is one argument; the formality of his deputation another. The hypothesis accounts most simply for the purpose and motive of the inquiry. It does justice also to all the points of the narrative. The primary object of Sharezer's deputation (v.²) was to offer sacrifices at the restored sanctuary ('to entreat the favour of the Lord'). The question to the priests was incidental to this main purpose, although prompted by the same good news. Thusearly the spiritual authority of Jerusalem was acknowledged by the *diaspora*. The incident is dated in the year 518 (v.¹). The temple was completed in 516 (Ezr 6¹⁵); its restoration had commenced in 520 (Hag 1⁹). Either the news which reached Babylon anticipated the complete restoration midway (assuming the dates to be correct); or the rebuilding was so far advanced as to justify Sharezer in taking action.

It is noteworthy that Zechariah's prophecy (vv. 5-7) has no special application to the circumstances of the time. It depreciates or disavows the practice of fasting as such. Zec 8^{18, 19} seems more appropriate as a reply to Sharezer's envoys.

LITERATURE.—On 2 K 19³⁷: Schrader, *COT* ii. 13-17; Winckler, *ZA* ii. (1887) 392-96; Johns, *Expos. Times*, vii. (April 1886). For Polyhistor and Abydenus see Eusebius, ed. Schoene, i. 27 and i. 35; the Bab. Chron. tr. by Winckler in *Textbuch z. AT*, 1892; and Nabuna'id, by Messerschmidt, *Stele Nabuna'id's*, Berlin, 1896.

W. B. STEVENSON.

SHARON.—1. (הָרָרִית [with art.], prob. for הָרָרִית 'the level,' 'the plain,' from *šr* to be level; LXX in 1 Ch 27²², Ca 2¹ *ῥεδιον*, but in Is 33⁹ 35² 65¹⁰ *ὁ δρυμὸς* [see below]) the name applied in Scripture to that part of the Maritime Plain which stretches from Joppa to Mt. Carmel (55 miles). It is of an undulating character, none of its hills exceeding 250-300 feet in height. The following streams cross it in their course to the Mediterranean: *Nahr*

es-Zerkā (the Crocodile River), *Nahr Mefjār* (the Dead River of the Crusaders), *Nahr Iskanderāneh* (their Salt River), *Nahr el-Falik* (their Rochetaille). The plain proper, between the Crocodile River and Joppa, varies in breadth from 8 to 12 miles.

The LXX, as above noted, reproduces הָרָרִית in three passages by *ὁ δρυμὸς*, a term which is applied to Sharon also by Josephus (*BJ* i. xiii. 2; in *Ant.* XIV. xiii. 3, plur. *οἱ δρυμοί*) and Strabo (xvi. : *δρυμὸς μέγας τῆς*). This designation is very appropriate to a district which has still a large oak wood at its northern extremity, and which, even so late as Crusading times, would have appeared from the top of Mt. Ebal as a vast forest of oaks from coast to mountain (*HGHL*¹ 122).* The Crusaders called it the Forest of Assur (Vinsauf, *Itin. Ricardi*, iv. 16); it is the enchanted forest of Tasso (*Gerusalemme Liberata*, ii and xiii); it was called by Napoleon the Forest of Miksi (from the modern village of *Miksieh*). The southern half of the plain is, and must always have been, far more cultivated than its northern portion. Throughout its whole extent it is gay with myriads of brightly coloured flowers.

The beauty and the fertility of Sharon give point to Is 35², where the 'glory of Lebanon' is coupled with the 'excellency' (הָרִי 'splendour' [see Driver, *Daniel*, p. 33]) of Carmel and Sharon, the special allusion perhaps being to the magnificence of its oak forests. We have the opposite picture in Is 33⁹, where 'Lebanon is ashamed and withereth away, Sharon is like the (waste) Arabah, and Bashan and Carmel shake off their leaves.' Again, in Is 65¹⁰ the description of the restoration of Israel contains this feature: 'Sharon shall be a pasturage for flocks.' In 1 Ch 27²² we read of Shitrai the Sharonite (הַיָּרִי, *ὁ Σαρων(ε)ίτης*), who was over king David's flocks that fed in Sharon. The excellence of the pasturage, the superiority of the cattle and the wine of Sharon, are celebrated by Jerome (*Comm.* on Is 33 and 65) and the Talmud (Bab. *Menahoth* 87a, *Shabbath* 70a). Its pottery and the bricks used for building are repeatedly referred to in the Mishna as of very inferior quality, the instability of the houses in Sharon being proverbial (see references in Neubauer, *Geog. du Talm.* 48 f.).

Neubauer appears to be right (against Graetz, *Gesch. d. Juden*², iii. 182) in contending that it is the inhabitants of the maritime Sharon and not of the Gallilee *Saronas* [see below], on whose behalf a special petition is said to have been introduced into the high priest's prayer for the people on the Day of Atonement. This petition ran: 'May God watch over the inhabitants of Sharon, that they be not buried in the ruins of their houses.'

The Shulamite compares herself to the 'rose' [an unfortunate rendering; הַנָּחֳלִי is the *white narcissus*, see Cheyne on Is 35¹ and cf. art. ROSE above] of Sharon' and the 'lily [prob. some flower of a red colour] of the (Jordan) valleys' (עֵקֶס), Ca 2¹.

There is some doubt as to the identity of the Sharon of Jos 12¹⁸ [where read הָרָרִית 'king' of Aphek in Sharon'; see LASSHARON]. It has been proposed (e.g. by Dillm. *ad loc.*) to find here the *Saronas* which Eusebius (*Onomast.* 296. 6) says was the name given to the region between Mt. Tabor and Tiberias—a statement confirmed by the name *Sarōna* still attaching to a ruin on this plateau (*PEF Mem.* vol. i. sheet vi.). This proposal appears, however, to be unnecessary, especially in view of the evidence (see G. A. Smith, *HGHL*¹ 350, 401 f., and s.v. 'Aphek' in *Encyc. Bibl.*) in favour of the existence of an Aphek in the maritime Sharon (cf. W. R. Smith, *OTJC*² 273, 435, and s.v. 'Aphek' in *Encyc. Bibl.*; H. P. Smith, *Samuel*, 31. Buhl, *GAP* 212 f., 218, leaves it un-

* Marti simply detaches *šr* from *šr* and joins it to Sharezer: 'the family of El-Sharezer' (*SK*, 1892, p. 732). G. A. Smith adopts El-Sharezer, but supposes 'J' to be wanting after *bēth*: 'to the temple of J' (*Twelve Prophets*).

* It is not at all likely that the title *ὁ δρυμὸς* is due to any connexion, real or supposed, between the Heb. *šārôn* and the Gr. *δρυμὸς*, a very rare term for an oak (Pliny, *HN* iv. 5, quoted by Beland, *Pal.* 190).

decided whether it is the maritime or the Galilean Sharon that is meant in Jos 12¹³.

The only NT reference to Sharon is Ac 9³⁵ (ὁ Σαρὼν, whence AV **Saron**), in connexion with St. Peter's stay at Lydda. For further details regarding Sharon see Buhl, *GAP* 103 ff.; and G. A. Smith, *HGHL* 147 ff., where a full account is given of its strategic importance and the part it played in post-biblical history.

2. (שָׂרֹן [without art.]; B Γερὰδμ, A Σαρὼν) 1 Ch 5¹⁴. This Sharon (|| Gilead and Bashan) is probably the same as the *Mishôr* (also from root שָׂר), or elevated plateau between the Arnon and the Jabbok (Dt 3¹⁰ 4⁴, Jos 13⁹, 16, 17, 21 20⁸, Jer 48³, 21, 2 Ch 26¹⁰). See vol. iii. p. 309^b, footnote, and p. 893^a, s. 5. J. A. SELBIE.

SHARONITE.—See preceding article.

SHARUHEN (שָׁרוּחַן; cf ἀργολ αὐτῶν; *Sareon*).—A town in Judah which was allotted to Simeon (Jos 19⁶). It appears as *Shilhim* in 15²⁶ and as *Shaaraim* in 1 Ch 4³¹; see SHAAIRAIM (2).

SHASHAI (שָׁשַׁי; BA *Sesel*, Luc. *Seselp*).—One of the sons of Bani who had married a foreign wife, Ezr 10⁴⁰=Sesis of 1 Es 9²¹.

SHASHAK (שָׁשַׁק).—The eponym of a Benjamite family, 1 Ch 8¹⁴. (B Σακήλ) ²⁶ (B Σακήκ; in both passages A has Σωσάκ, Luc. Σασάχ).

SHAUL (שָׁאֻל, Σαούλ).—1. A king of Edom, Gn 36³⁷. [JE]=1 Ch 1⁴⁸. He belonged to 'Rehoboth by the River.' See REHOBOTH. 2. A son of Simeon, Gn 46¹⁶ [R] (A Σαμουήλ, D ²¹ Σαούλ, B *desst*), Ex 6¹⁵, Nu 26¹³ [both P], 1 Ch 4²⁴. The clan of which he is the eponym was of mixed Isr. and Can. descent, hence Shaul is called in Gn 46¹⁰ and Ex 6¹⁵ 'the son of the Canaanitess.' See GENEALOGY, II. 2. In Nu 26¹³ the patronymic *Shaulites* (שְׁאֻלִּים, δῆμος ὁ Σαουλεί) occurs. 3. An ancestor of Samuel, 1 Ch 6²⁴ (9) (called in v. ²¹) Joel. See JOEL, No. 3).

SHAVEH, THE VALE OF (שָׁוֶה; A τὴν κοιλίαν τὴν Σαὴν, D τ. κ. τ. Σαυή; *vallis Save*).—A broad valley (*emek*), known also as 'the king's vale' (Gn 14¹⁷), which was near Salem. It is apparently the same place as 'the king's dale' (שָׁוֶה; 2 S 18¹⁸), in which Absalom set up a pillar or monument. According to Josephus (*Ant.* VII. x. 3), this monument was two stadia from Jerusalem. If the view that Salem was Jerusalem be correct, the valley of Shaveh was possibly the broad open head of the valley of Hinnom which, lower down, contracts to a ravine. See SALEM. C. W. WILSON.

SHAVEH-KIRIATHAIM (שָׁוֶה קִרְיָתַיִם; ἐν Σαὴ τῇ πόλει; *Save Cariathaim*).—A place in which Chedorlaomer smote the Emim (Gn 14⁵). If the reading in AVm and RVm 'the plain of Kiriathaim' be correct, the spot must have been near Kiriathaim (Jer 48¹, Ezk 25²) in Moab, which has been identified with *el-Kureiyât* between Dibon and Medeba. C. W. WILSON.

SHAVING.—Two Heb. words are used with this meaning, שָׁר 'cut off,' 'shear' (wool, 1 S 25¹), 'shave' (one's head, Job 1²⁰, Mic 1¹⁶); and שָׁרַף to make smooth or bald, to shave or shear (Nu 6³, 18, Dt 21¹² etc.). The ancient Egyptians, according to Wilkinson (*Anc. Egypt.*), considered shaving the hair, not of the head only but of the whole body, necessary to cleanliness. Joseph, when summoned to the presence of Pharaoh, 'shaved himself and changed his raiment,' Gn 41¹⁴. The same custom is observed by many Hindu sects at the present time. In cases of mourning the hair was allowed to

grow. Among the Israelites the custom was different. The hair seems to have been allowed to grow to a moderate length, and to have been cut at intervals. Absalom, we are told (2 S 14²⁶), polled his head every year. The beard was held sacred among the Israelites, as it is to this day among the Arabs; and the insult that Hanun, king of the Ammonites, offered to the ambassadors of David, by shaving half of their beards (2 S 10⁴), could be atoned for only by the conquest and slavery of the Ammonites. The Nazirites were commanded to let no razor pass upon their heads, but to allow the hair to grow. When the time fixed by their vow had expired, or if they were accidentally defiled, then they were commanded to shave the whole head (Nu 6³, v. 18^c). In Syria the priests and monks of the Greek Orthodox and Greek Catholic Churches never allow the hair of the head or beard to be cut even in sickness. Many Christian parents dedicate a child to a particular saint for a certain period of time, and during that period the hair of the child is never cut. These children are distinguished from others by their black clothes as well as their long hair. Among the Israelites and Arabs shaving the head was a sign of mourning (Job 1², Dt 21¹², Ezk 44²⁰), and with the neighbouring nations it was the custom to shave the 'corners' of the beard, which the Israelites were expressly forbidden to do (Lv 19²⁷). (See CUTTINGS IN THE FLESH, vol. i. p. 537^a; and for shaving of the head as a sacrificial act, W. R. Smith, *RS* 306).

W. CARSLAW.

SHAVSHA (שָׁבְשָׁא. In 2 S 20²⁶ *Kéthib* שָׁב, *Kêré* שָׁב, EV *Sheva*, are proved to be in error by LXX. Similar to the *Kêré*, however, are B *Σαββ* of 1 K 4² and BA *Σουβά* of 1 K 2⁴⁶. Of LXX forms given below, 'Ἰησοῦς' = 'Ἰσοῦς is a familiar name read for one unfamiliar, perhaps under the influence of a ditto-graphy from the preceding καί).—Royal or State secretary in king David's reign (1 Ch 18¹⁶ B 'Ἰησοῦς, A and Luc. Σουά, N Σοῦς; 2 S 20²⁶ B 'Ἰησοῦς, A 'Ἰσοῦς, Luc. Σουά).

2 S 8¹⁵⁻¹⁸ is a third passage containing a list of David's officers of State. In MT *Seraiah* now stands in place of *Shavsha*. But the list of 1 Chron is dependent on that of 2 Sam. is identical with it except in this one particular, and most probably has preserved the original reading. B 'Ara seems to be a trace of the older text. 1 K 4² and 2⁴⁶ may be counted against *Seraiah* (see below). This name seems to have obtained currency in the 7th century. It may be supposed that the familiar שָׁבְשָׁא is a misreading of the possibly foreign name שָׁבְשָׁא.

The office held by Shavsha is one of a group created by the monarchy in Israel. It dates, however, from the time of David, like others of a similar character, for Saul's 'kingdom' was not an organized State. It was David who made it so. When he ranged himself among the princes of southern Syria his position forced on him the creation of certain offices of State. The occasions, for instance, of communication and correspondence with neighbouring States multiplied. The example of contemporary princes suggested the appointment of a State secretary. Other prospects of usefulness must have commended the precedent. In these circumstances Shavsha was appointed first holder of the office, as it seems. It is noteworthy that of all those who are named in the best list of David's officers of State (1 Ch 18¹⁴⁻¹⁷=2 S 8¹⁵⁻¹⁸) he is the only one whose father is unmentioned. Possibly he did not belong to a family of standing in the country, like the others. Possibly he was a foreigner. If foreign correspondence were in a foreign language it may not have been easy to find a Hebrew with the necessary qualifications. David was not indisposed to have foreigners round his person (see art. FOREIGNER, vol. ii. p. 50^b). Shavsha's name may be Aramæan. Foreign extraction would

account for the name of one of his sons being Elihoreph (1 K 4⁹). It seems to indicate his worship of a god other than J^u.

In Solomon's reign there were two secretaries of State, Elihoreph and Ahijah. They are called sons* of Shisha (1 K 4⁹). Although the evidence for the correct form of this name is very divergent (B *Σαβδ*, A *Σεισδ*, Luc. *Σαφδρ*), it may be identified with Shavsha. Others of Solomon's chief officers of State were sons of those who held similar office under David. If Shavsha was chosen secretary because Aramaic was his native tongue, it is especially likely that his children would inherit this qualification and be chosen for a similar reason. There is a second list of Solomon's officers in the LXX (B) text of 1 K 2^{46b}. In it Shavsha (BA *Σουβδ*, Luc. *Σουρδ*) is given as Solomon's secretary. Benzinger (on 1 K 4) has made the attractive suggestion that this list names those in office during the earlier part of Solomon's reign. It would then be evidence that Shavsha continued for a time Solomon's secretary, died during Solomon's reign, and was then succeeded by his sons. But there does not seem to be evidence to establish this view of the two lists. It is probable that they are duplicates, and that in 1 K 2^{46b} the names of the sons have dropped out before the word Shavsha.

W. B. STEVENSON.

SHEAL (שאל, B *Σαλουδ*, A *Σαδλ*), Ezr 10³⁰.—One of the sons of Bani, who had married a 'strange' wife; called Jassaelus in 1 Es 9³⁰.

SHEALTIEL (שאלתיאל; in Hag 1¹²⁻¹⁴ 2⁸ שאלתיאל; LXX and NT always *Σαλαθιήλ*, hence *Salathiel* of 1 Es 5³⁻⁴⁵⁻⁵⁶ 6², AV of Mt 1¹² and Jk 3²⁷).—The father of ZERUBBABEL, Ezr 3²⁻⁸ 5², Neh 12¹, Hag 1¹²⁻¹⁴ 2²⁻³. According to 1 Ch 3¹⁷ Shealtiel was the eldest son of king Jeconiah. In v. 19 the MT makes Pedaiah (a brother of Shealtiel) the father of Zerubbabel; but BA of LXX read here also *Σαλαθιήλ*, although Lucian has *Φαδαϊα*.

SHEARIAH (שעריה).—A descendant of Saul, 1 Ch 8³⁸ (BA *Σαριαδ*, Luc. *Σεριά*) 9⁴⁴ (BA *Σαριαδ*, Luc. *Σαριαδ*).

SHEARING-HOUSE, THE (שער צמר; B *Βαρθκάθ τῶν ποιμένων*, A *Βαρθκάθ τ. π.*; Vulg. *camera pastorum*; RV tr. 'shearing-house [lit. binding-house], cf. Gn 22⁷) of the shepherds, RVm 'house of gathering [so Targ. but improbable] of the shepherds'.—A place at which Jehu, on his way from Jezreel to Samaria, met and slew the brethren of Ahaziah, king of Judah (2 K 10¹³⁻¹⁴). Eusebius and Jerome (*Onom. s. Βαρθακάθ*) place the shearing-house in the Great Plain (Esdraelon), 15 M.P. from Legio; and in this position, 3 m. east of *Jentn*, is the village of *Beit Kád* (Robinson, *BRP*² ii. 316). This is possibly the site of the shearing-house (Conder, *PEF Mem.* ii. 83). C. W. WILSON.

SHEAR-JASHUB (שערי ישוב; 'a remnant shall return', LXX *ὁ καταλειψέις Ἰασοῦς*, Is 7³).—A symbolic name given to a son of Isaiah to signify the return of the remnant to God after the punishment at the hands of the Assyrians. See 8¹³ 10²⁰⁻²¹, and cf. 7¹⁴ 8¹⁻⁴.

SHEBA (שבע).—1. A Benjamite who headed a new revolt against David immediately after the suppression of Absalom's rebellion. He was besieged by Joab in Abel-beth-maacah, whose inhabitants were persuaded to procure their own safety by casting the head of the rebel from the battlements of the city (2 S 20¹⁷ 21. 10. 13. 21¹¹; B uniformly *Σάβее*, A occasionally *Ἀβее*). See, further,

* LXX 'son,' applying to Ahijah only.

art. DAVID, vol. i. p. 570^b. 2. A Gadite, 1 Ch 5¹³ (B *Σάβее*, A *Σάβαθε*, Luc. *Σάβее*).

SHEBA (שבע), more correctly *Saba* (LXX *Σαβδ*, Jos. *Σάβας*), the name of a race (the *Sabæans*) several times mentioned in the OT. In the genealogical tables it is given three pedigrees (Gn 10⁷ son of Ra'mah, cf. Ezk 27²³, where these two names are juxtaposed; Gn 10²⁸ son of Yoktan, and juxtaposed with Hazarnaveth [Hadrarnaut]; Gn 25³ son of Yokshan). Ezekiel (27²³) mentions Eden (Aden), Haran (Hirran), and Canneh (Kanneh) as connected with it; and of these places the first two are known to be in S. Arabia. At the time of Israel's highest prosperity, Solomon was visited by the queen of Saba (1 K 10¹⁻¹³), an event which gave rise to a number of legends, none of them perhaps of high antiquity in the form wherein we possess them. The Sabæans were known to the Israelites as exporters of gold (Is 60⁶, Ps 72¹⁵), precious stones (Ezk l.c.), perfumes (Jer 6³⁰, Isaiah and Ezekiel), and perhaps slaves (Jl 4(3)⁶). In the Bk. of Job (6¹⁹) there is an allusion to their trading caravans, with at least a suggestion that their capital was Tema (Tayma); and also to their raiding other Arab tribes (15¹).

Till the attention of Orientalists was called by Wellsted and Cruttenden to certain inscriptions discovered by them in S. Arabia, our knowledge of Saba was confined to the meagre and often unintelligible matter collected by the Greek geographers and Pliny. But since the middle of the century large finds of inscriptions have been made in various parts of Arabia, in the old Arabic character (of which a copy was given by the Arabic bibliographer Al-Nadim, in his *Fihrist*, A.D. 978), and dealing with Saba and various institutions connected with it. The attempt made in England to decipher these inscriptions was utterly incompetent; but German scholars were more successful, and the honour of having founded the study of Sabæan is shared by Rödiger and Osiander, whose papers in the *ZDMG*, vols. xx. and xxi., laid the basis for the right understanding of these texts. A full and accurate account of the literature of the subject down to 1891 was given by Fr. Hommel in his *Süd-Arabische Chrestomathie*, Munich, 1893. Next in importance to the collection published by Osiander was that brought back by Halévy, and edited by him in the *Journal Asiatique*, Série 6, vol. ix.; since then great finds have been made by Glaser in his various journeys in S. Arabia, not many of which have as yet been given to the public. In the fourth part of the *CIS*, edited by J. and H. Derenbourg, of which three fasciculi (containing 308 inscriptions) have as yet appeared (1889-1900), the material for the study will be eventually recorded in the most trustworthy form; at present the works of the eight or nine scholars who pursue it (esp. Derenbourg, Glaser, Halévy, Hommel, Mordtmann, D. H. Müller, Prætorius, Winckler) are all indispensable.

Besides inscriptions, considerable finds of coins have also been made. The first Sabæan coin ever interpreted was described in the *Revue Numismatique*, 1868, pp. 169-176; but for this part of the subject the most important stage was marked by the work of Schlumberger (*Le trésor de Sana'a*, Paris, 1880), who gave an account of some 200 coins that had been discovered at Sana'a, and purchased by him of a dealer in Constantinople. Many of these coins contained the monograms of kings whose names also figure in inscriptions; whence, though these signs were puzzling at first, they have all since been interpreted: a list of the monograms, with their interpretations, is given by D. H. Müller in his *Burgen u. Schlösser*, ii. p. 995.

The date of the coins described by Schlumberger was fixed by him, on numismatic grounds (*i.e.* the evolution of the style from Attic, Seleucid, and Roman models), at from about B.C. 150 to A.D. 150, and, while he derived the style of the art from the sources named, he regarded the weight as fixed by Persian models. The purity of the silver and the accuracy of the weight were greatly admired by this numismatist; other coins that have been discovered are described by Mordtmann, *Wiener Numismatische Zeitschrift*, 1880, pp. 289-320. The researches of Glaser and others were also rewarded by the discovery of a variety of other objects, illustrative of Sabæan civilization, of which descriptions have been given by Mordtmann (*Himyarische Inschriften in den königlichen Museen zu Berlin*, 1893) and others (*e.g.* Derenbourg, *Les Monuments Sabéens du Musée d'Archéologie de Marseille*, 1899; D. H. Müller, *Südarabische Alterthümer im Kunsthistorischen Hofmuseum, Wien*, 1899; Hommel, 'Die südarab. Altertümer des Wiener Hofmuseums,' in *Aufsätze u. Abhandlungen*, ii., 1900).

Finally, the works of the S. Arabian geographer and archaeologist Hamdani (Abu Muhammad Al-Hasan) have been brought to Europe, his *Description of the Arabic Peninsula* in a number of copies, and his *Iklil* in portions; both these works have been edited by D. H. Müller, the former at Leiden, 1891, the latter in the *Sitzungsberichte der Wiener Akademie*, Ph.-Hist. Kl. xciv., xcvi., and in Müller's *Südarab. Alterthümer*, p. 8 ff. The lexicon of Neshwan the Himyarite, which is of some value for the interpretation of the texts, is as yet unpublished. In the following paragraphs a few of the chief results of the study will be collected.

[The following abbreviations recur below: *AA* = Glaser's *Absassinier in Arabien* (Munich, 1895); *HI* = *Himyarische Inschriften*; *MM* = Mordtmann and Müller's *Sabäische Denkmäler*; *MVAS* = *Mittheil. d. vorderas. Gesellschaft*; *SA* = Müller's *Südarabische Alterthümer*].

i. HISTORY. — On this subject an authentic chronicle of a few pages could give us more information than all the inscriptions together; it is, however, clear that they cover an enormous length of time—it can scarcely be made less than 1300 years. The dated inscriptions of the mound at Marib (published by Glaser, *MVAS*, No. 6) are of the 5th and 6th cents. A.D., one of them being Christian and another perhaps Jewish; and the final destruction of the Sabæan State is known to have taken place in the 6th cent. A.D. On the other hand, the name of Ithamara the Sabæan, occurring in the inscriptions of Sargon of B.C. 715 (ed. Winckler, p. 97), was identified with justice by Lenormant with the *Yetha'amara* of the Sabæan inscriptions. That name belongs to no fewer than six Sabæan potentates (Glaser, *AA* p. 20); and there seems no probability that Sargon's contemporary is the first of these. The inscriptions, however, are not divided equally over this vast expanse of time; so far as they are at present accessible, it is only for the period just before and just after the commencement of our era that they render the writing of a continuous chronicle possible; an attempt of this sort has been made by H. Winckler, 'Die Inschriften des Alhan Nahfan' (*MVAS*, No. 5), perhaps without conspicuous success. The greater number of the texts published are devoid of political interest, and indeed emanate from members of two families or clans, the Bakilites of 'Amran, and their leaders the Banu Marthad, and the Hashidites of Na'it, and their leaders the Banu Hamdan. These great families are said to exist still in S. Arabia in the neighbourhood of their ancestral seats (Mordtmann in *MM* p. 9).

Saba is the name of a nation or political unit,

not of a city, though the classical writers speak repeatedly of a city Saba. The Arabic etymologists derive its name from *sabā*, 'to take captive'; but they might with greater probability have derived it from the Sabæan verb *sabā'a*, 'he raided'; and indeed in *CIS* 84. 3, the Sabæans are mentioned as normal raiders, somewhat as in Job 1¹². The Sabæan name for 'nation' is *khums*, 'a fifth,' and it is applied by them to other nations as well as to their own, *e.g.* 'the two Khums, Saba and Himyar' (*MM* 5). These nations or 'fifths' were divided into 'tribes' (**shi'b*), which again were sometimes divided into 'thirds' (*CIS* 187, where Derenbourg gives us the names of two 'thirds' of the tribe Sama'i), and sometimes perhaps 'tenths' (*CIS* 128). There might be some ground for suspecting that the word *fifth* implies the original existence of five nations who shared S. Arabia between them; at the latest period of the inscriptions, Saba has swallowed the others up. In these the kings style themselves kings of Saba, Dhu Raidan, Ḥadramaut, and Yamanet. The earliest king who assumed this title was, according to Glaser (*AA* p. 31), Shammir Yuharish, about A.D. 281 (others would place him some 200 years before). Before this he and his predecessors called themselves kings of Saba and Dhu Raidan, a title which implies the conquest of Raidan, which the combinations of Glaser and H. Winckler place about B.C. 70. Prior to this last date the kings style themselves sometimes *malik* ('king'), sometimes *mukarrib*, a word of uncertain meaning, but of a root which forms an element in many proper names, and is the source of Makorabah, the old name for Mecca. It is customary to place the Mukarrib period before the Malik period, and it is certainly noticeable that Sargon does not bestow the title 'king' on his Sabæan contemporary, though the Assyrians are ordinarily rather lavish with the title. Naturally, such a point could not be settled without better documents than are at our disposal. The residence of the king was at Maryab or Marib (in Beled Al-Jihaf), and sometimes at Ghaiman. But Marib had also a king of its own, probably dependent on the kings of Saba, since in *CIS* 37. 7 the two are mentioned simultaneously; and kings of Kamina (*SA* 12) and other places are mentioned.

In the time of Eratosthenes (B.C. 240) Saba was one of four nations which shared S. Arabia between them—Mineans with capital Karna, Sabæans with capital Maryab, Katabanians with capital Tamna, and Ḥadramaut with capital Katabanon. The Greek writer adds that these were all monarchies, but that they were not hereditary, the succession falling to the first male born to one of the leading families after a king's accession. How such a system would work it is impossible to conjecture; but a study of the texts makes it certain that Eratosthenes' account contains some truth, though he may have omitted important details. So about the time of the Aelius Gallus expedition (B.C. 24) we find kings of the Hamdanite family preceded and followed by kings of another family. Alhan Nahfan seems to disclaim the title 'king of Saba' himself, while giving it to his two sons (*AA* 42. 1), though he allows it to be given him by others (*ib.* 24), and in another inscription (*HI* 2698) appears as a subject of the then king of Saba, and in yet another (*CIS* 2, 10) is called simply Hamdanite and Bata'ite by the men who put up a votive tablet for help received in his service. Quite similarly Il-Sharh (Elisaros), who in some inscriptions figures as king of Saba and son of a king of Saba, in others is called Kabir of Akyan, a title of which the import is not known, but

* This name (tribe) is also sometimes applied to Saba (*SA* p. 17). The term 'fifth' is also found in other divisions (*ib.* p. 39).

which seems to have been combined with something like royal functions (*AA* 82 and 105). What we should infer from these facts is that the kingship was held by the leading families in some sort of rotation. This inference is further supported by the nature of the kings' names, which do not appear to differ in form from those of other eminent men; they are ordinarily, though not always, double, consisting apparently of a name and an epithet (rarely of a name and two epithets), and are ordinarily retained unaltered by those persons who figure in different inscriptions as kings and in some other capacity. Finally, the fact that the inscriptions often speak of 'the kings of Saba,' and that as many as three appear as kings simultaneously, implies that the sense which attached to the word 'king' in this community was different from that which attached to it elsewhere. And this not only explains the great number of the kings who figure in the inscriptions, — Müller (*Burgen*, ii. pp. 982-986) counted 33, and some have since been added to the number, — but harmonizes with the fact that Sargon does not give the Sabaean the title 'king.'

Besides the kings, there were eponymous magistrates, after whom the years were named, till the adoption of an era, which Glaser fixes at B.C. 115 (*AA* p. 29; *Gesch.* i. 3), whereas others regard it as the Seleucid era (see *CIS* p. 18); the text *CIS* 46 seems to date 'in the year 386 from the year of Mubih son of Abu-Hubb,' an era of which nothing is at present known. The tribes of which the Sabaean community consisted had sometimes their kings (as the Samai, *CIS* 37), but more often chieftains called *kaul* (in Arabic *kail*); another title is *kabir* ('great'), which in one case appears to be given to the eponymous magistrate (*CIS* 80), but is also held by the king Il-Sharh, probably before his accession (*CIS* 46). Since, however, this personage has a 'niniester' (*muktawi*, *AA* p. 105), while he is still *kabir*, we clearly cannot yet settle the precise meaning of these terms. A distinction which pervades the inscriptions is that between 'lords' and 'men,' analogous to that between 'royalties' and 'men' which is found in the Phœnician inscriptions: probably the former were what Eratosthenes calls 'distinguished,' i.e. qualified to participate in the sovereignty. In most of the votive tablets the author prays the god for the favour of his lords, who sometimes are the whole of a family, sometimes one or more members of it. A difficult constitutional term is that rendered 'heirs' or 'co-heirs' (*CIS* 95. 5) in the same context in which 'lords' usually figures; and indeed the number of terms which imply some unknown status or caste is very considerable.

The state of society seems in general to have borne some resemblance to that of feudal Europe. The great families possessed towers and castles, the building of which is commemorated in many inscriptions; and the word *bait*, which in ordinary Semitic means 'house,' would seem with this community to have meant 'tower.' The *Iktûl* of the archaeologist Hamdani contains a description of these feudal dwellings, portions of which are still to be seen. The right to build a castle was sometimes given by the head of a family (*CIS* 145, 153), sometimes by a king (*CIS* 172); in some of the texts ample details (not as a rule intelligible) are given of the manner in which the building was carried out (*CIS* 17, 29, 40), and these seem to have involved measurements of land and technical distributions of it. In each case the building is put under the protection of a deity. Many of the texts also commemorate renewals, repairs, the digging of wells and other domestic operations, in all of which the deity had some share.

Owing to a far larger portion of S. Arabia being

VOL. IV.—31

under cultivation in ancient times than now, the extent of territory covered by these feudal estates was very great, and, as we have seen, ere the final extinction of the Sabaean State by the Abyssinians in the 6th cent. it had swallowed up the other States in its neighbourhood. Hence the inscriptions which tell of its former glories are found all over South Arabia, except perhaps in Hadramaut, and some even in the far north of the peninsula. Many indeed have been transplanted from the buildings which they originally adorned to distant towns, but of the vast extent of the country which at certain times was subject to the Sabaean there can be no doubt. Certain episodes of the reign of Alhan Nahfan, as mentioned above, have been enucleated from his inscriptions by Glaser (*AA*) and Winckler (*l.c.*); but even in these results there is much that is problematic, and little that is sharply defined; while for the rest of Sabaean history the inscriptions which have as yet been published contain far less material. Arabic writers have only vague recollections of certain events of great importance, such as the bursting of the dam at Marib, which they strangely fancy led to the ruin of the State, and of a few names and words of the old language; even the well-informed Hamdani has only fables and fictions. Hence for a history of Saba the materials are still wanting.

ii. CIVILIZATION.—The list of goods said to come from Saba in Is 60⁶ bears a striking likeness to that given by Sargon (*l.c.*): 'Gold, precious stones, ivory, perfumes of all sorts, horses, camels,' and the gold and perfumes were associated with Saba by classical writers also. It is remarkable that gold and perfume were called by the same name in Saba; for the suggestion of D. H. Müller, that *dhahab* meant perfume as well as gold, has been confirmed by a document brought to light by Count Landberg (*SA* p. 30). The inscriptions reveal a lavish use of gold, if indeed the precious metal be meant thereby. Alhan Nahfan offers thirty statues of gold at once (*AA* p. 42), and numerous inscriptions commemorate the employment of this metal for images of gods and of animals (e.g. camels and gazelles, *MM* 1). Other gifts were of silver, called, in this language, *šifr*; and a variety of objects used for devotional purposes is enumerated by Alhan Nahfan (*l.c.*), not many of which can at present be identified with certainty. Perfumes are also mentioned with considerable frequency, and various sorts are enumerated. D. H. Müller has devoted many pages to the description of them (*Burgen*, ii. 975; *MM* 26; *SA* 48). The greater number of the texts deal not with the commercial side of the Sabaean life (though there may be allusions to that), but with the agricultural and military sides. Prayers for crops and vegetables are mixed with supplications for male children. The sorts of fruits which they desire to thrive are sometimes enumerated. In some we learn a little of the artificial system of irrigation whereby the fertility of the fields was maintained. But more commemorate successful raids, or successful repulses of raids by other tribes; and once it would seem a disaster consequent on delay in the fulfilment of a vow is commemorated (*CIS* 81). The position of women would appear to have been little inferior to that of men, if we may judge by the number of texts in which they figure as authors or joint-authors of inscriptions. One woman (*CIS* 179) appears to be called mistress of a castle; and, though a queen of Saba has not apparently been discovered in the inscriptions, queens of other Arabian tribes occur, both in Arabian and Assyrian texts (D. H. Müller, *Epigraphische Denkmäler aus Arabien*, p. 3). The honourable title 'consort,' by which they are often

called, confirms this. There are, however, texts which imply the practice of concubinage, though not, apparently, of polygamy. It is observable that the women make offerings to the same gods as the men, describe themselves by similar family names, and profess to have received similar benefits.

The Sabæan art, which in some respects is highly praised by experts, appears to have been greatly affected at different times by contemporaneous civilizations, i.e. those of Assyria, Persia, Greece, Rome, and Parthia; and the formulæ of the inscriptions appear here and there to exhibit Assyrian influence. The caligraphy of the inscriptions, especially those first brought to Europe, has won much admiration; the alphabet in which they are written varies somewhat in different places (see especially D. H. Müller, *Epigraphische Denkmäler, ad fin.*), but the present writer sees no reason to doubt that it represents the earliest form of the Semitic alphabet, whence the others are derived, partly by the suppression of a number of unnecessary signs. The excessive vigour with which the consonants are pronounced in S. Arabia, on which several writers have commented, would make that the likeliest country for the invention of a system of writing in which the consonant was the element.

iii. RELIGION.—The greater number of the tablets at present accessible are dedicated to two deities, Il-Makkiḥ and Ta'lab. The latter appears to have been a specially Hamdanite deity, and is ordinarily described as Ta'lab of Riyam. He is called not 'god,' but *shayyām*, 'patron' or 'protector,' a title which is also given to Wadd (*HI* 7), who is sometimes ascribed to Kibab (*ib.* also in *CIS* 30) and Khatban (*CIS* 293), and Hajar ('stone'; *CIS* 49-69). The former of these 'patrons' also figures in pre-Islamic antiquity. If we may judge by the honours lavished on Ta'lab, the position of 'patron' can have been little inferior to that of god. The god of the Bakil was Il-Makkiḥ, probably 'the hearing god,' whose name seems connected with a verb *WKH*, which figures often in the votive tablets. Different forms of Il-Makkiḥ were worshipped in different sanctuaries. The places with which he is most frequently associated are Awam in Alwa (on which see especially *AA* p. 16 ff.), Ḥirran, and Irran. Next in importance to him was probably Athtar, the male form of Ashtoreth, often called Sharkān, which is thought to mean 'Oriental.' He had a divided personality: in *CIS* 293 no fewer than four forms of him are mentioned simultaneously—Athtar lord of Thanain, Athtar lord of Ta'alluk (?), Athtar lord of Jumdan, and Athtar Sharkān. Two other deities whose names are of interest are Samī (*CIS* 282) and Kawim (*CIS* 194), which seem to be perpetuated in the epithets 'the Hearing' and 'the Sustaining,' which the Koran gives to Allah. Considerable popularity was also enjoyed by Ramman (who figures in the Bible as Rimmon), sometimes called lord of 'Alam of Ashkur (*CIS* 140, by a Himyarite). The sun was also much worshipped, and is ascribed to a number of places (e.g. Barrat, *CIS* 293. 2; other places 40, 132, 294), and also to particular tribes and persons, e.g. 'Il-Makkiḥ and their sun' (*CIS* 143. 5), and indeed the plural 'their sun' is of occasional occurrence, implying that the sun was regarded as of divided personality, like Athtar. The Sabæan worship of the sun was sufficiently famous to be known to the author of the Koran (xxvii. 24). A similar deity is Dhu Samai, 'lord of Heaven,' ascribed to Bakir (*MM* 1); and there are some goddesses whose names are similarly formed—Dhat Hima, Dhat Baḍan (*CIS* 41 etc.). Other gods are called Bashir ('bringer of good tidings,' *CIS* 41. 3), Haubas (172,

etc.), Rahman ('merciful,' perhaps of monotheistic times, *CIS* 6), Kānan (8) and others whose name is thought to signify water-nymphs (153, etc.).

This pantheon appears to resemble that of the Italians before Greek influence: the gods were to some extent hypostases of operations or objects, and there was supposed to be some special merit in enumerating them. Of this last process the terminations of many inscriptions offer illustrations. The more important of their temples had names, after which the god was often called. The offerings to them consisted, as we have seen, of lavish gifts to the temples; but sacrifices of the ordinary sort (*CIS* 290) and offerings of incense (194) also form the subject of allusions. Sometimes it took the form of self-presentation on the part of the worshipper, whatever may have been the import of that act. The earliest instance is said to be in a bustrophedon inscription (*ZDMG* xxii. 425), and the most elaborate, that contained in the inscription of Hadakan (*CIS* 37), in which the author declares that he puts the god in possession of himself, his family, his and their property, and all the property belonging to his clan. If the inscription *HI* 2678 (p. 26) be rightly interpreted by Mordtmann, this act could be performed repeatedly; and the inscr. *CIS* 126 would probably explain it more clearly, if we knew the meaning of the words. The plan of erecting stones in honour of the gods also finds illustration (*CIS* 100); and most of the texts we have are *musnads*, or tablets dedicated to the gods, sometimes with other offerings. The office of priest (𐩦𐩣𐩪) seems sometimes to have been united with that of tribal head (*CIS* 41. 1), but at other times was probably delegated to humbler individuals. That pilgrimages were made in honour of the gods appears from the month Dhu Hijjat or Maḥajjat; the former of which is the only month-name which the Sabæans share with the Moslems (the Sabæan twelve are enumerated by Müller in *MM* 51). Prayers are ordinarily designated by the common Semitic word for petition, but the other word (*amlā*), which occurs often, perhaps implies stereotyped formulæ. From the inscr. *CIS* 126 it would appear that the gods were also appeased by certain forms of personal abstinence, and from one of those edited by Winckler (*l.c.*) it might appear that they had some share in the administration of justice. The Sabæans also had certain ideas of ceremonial purity, violation of which had to be atoned for by public acknowledgment on tablets placed in temples: some curious specimens of these are given in *SA* pp. 20-25.

iv. LANGUAGE.—Of the S. Arabian inscriptions, a few are couched in a dialect scarcely distinguishable from classical Arabic. This is the case with the texts dealing with ceremonial purity, to which reference has been made. The Sabæan texts seem to resemble most closely the dialect known as Ethiopic; and indeed Ethiopic may be regarded as the form of Sabæan first given literary shape by Christian missionaries, although, unless the dates on the Marib inscriptions (Glaser, *MVAS* 6) are absolutely misleading, Sabæan must have continued in use for a century or two after the commencement of Ethiopic literature. Owing to the absence of vowels, we know little of the pronunciation or the grammatical finesse of Sabæan; but it clearly differed from the classical Arabic idiom in many particulars; in some of which it preserved what classical Arabic lost, while more often it seems to represent a later stage of development than the latter. Its alphabet retains a sibilant lost to Arabic; and in certain cases the weak letters have still consonantal value in Sabæan (as in Ethiopic) where they have lost it in Arabic. Instead of the prefixed article which governs

Arabic syntax, Sabæan has an affix, similar to that in use in Aramaic; both of which bear a curious likeness to the Armenian system. For the *numeration* which in Arabic supplies, to some extent, the place of an indefinite article, Sabæan has *mimation*. Probably in this matter Arabic retains the older termination, whereas the two languages may have developed or borrowed their definite articles independently. The employment of the dual would appear to have been as regular in Sabæan as in Arabic, though the mode of expressing it differed somewhat. The Sabæan syntax has also some remarkable peculiarities, to which nothing in Arabic corresponds, though they might be illustrated from Hebrew. We have already seen (in art. LANGUAGE OF THE OT) that, like Ethiopic, Sabæan occasionally agrees in its vocabulary with Canaanitish against Arabic; and there are also cases in which it agrees remarkably with the Aramaic vocabulary, although in the most striking of these (see CIS 79) the common words are perhaps borrowed from Aramaic, since the inscription shows signs of having been written by a foreigner. Though there is still much about both grammar and vocabulary that is obscure, the progress made in the study since Osiander's time compares favourably with that achieved in other regions of epigraphy.

D. S. MARGOLIOUTH.

SHEBA (שֶׁבָּא; B Σάββα, A Σάββα; *Sabæe*).—A town, according to AV, which was allotted to Simeon (Jos 19²), and is mentioned between Beersheba and Moladah. This was apparently the view of Eusebius and Jerome (*Onom. s. Σαβέ*). RV, however, and the edition of 1611, read 'Beersheba or Sheba'; and this is in agreement with the number of towns (13) said to have been allotted to Simeon (Jos 19²⁻⁶), and with the omission of Sheba from the list in 1 Ch 4²⁸. It is not unlikely that שֶׁבָּא is due to dittography from שֶׁבֶר, or it may be a corruption of שֶׁבֶר (cf. LXX B) of Jos 15²⁸. So Dillm. *ad loc.*

C. W. WILSON.

SHEBANIAH (שֶׁבְנִיָּה; in 1 Ch 15²⁴ שֶׁבְנִיָּה).—1. The name of a Levite or a Levitical family that took part in the religious services which followed the reading of the Law, Neh 9⁴ (B Σαβανιά, A Σαβανιά, Σαβανιά) (LXX om.). The name appears in Neh 10¹⁰ amongst those who sealed the covenant (B Σαβανιά, A Σαβανιά, Luc. [in both verses] Σεβανίας). 2. A priest or Levite who sealed the covenant, Neh 10¹⁴ (B' Εβανελ, A Σεβανί, Luc. Βανίας) 12¹⁴ (B' A om., A Σεβανίου, Luc. Σεβανίας). See SHECANIAH, No. 8. 3. Another Levite who sealed the covenant, Neh 10¹² (BA Σεβανιά, Luc. Σαβανίας). 4. A priest in David's time, 1 Ch 15²⁴ (B Σεβανιά, A Σεβανιά, Luc. Σαβανιά).

SHEBARIM (שֶׁבְרִים; with art.; καὶ [Luc. θῶς] συνέτριψαν αὐτούς; *Sabarim*).—A place mentioned (Jos 7⁹) in the description of the pursuit of the Israelites by the men of Ai. RVm (so also Keil, *Josua*) tr. *hash-shebārim* by 'the quarries,' a rendering which Steuernagel (in Nowack's *Hakomn.*) is also inclined to accept. The place was on the descent from Ai to the Jordan Valley, but the name has not been recovered. The LXX (cf. Pesh. and Targ. שֶׁבְרִים) does not recognize a proper name, but takes the meaning to be '[they pursued them] till they were broken, i.e. completely routed and mostly destroyed. See, further, Dillm. *ad loc.*

C. W. WILSON.

SHEBAT.—Zec 17. See SEBAT and TIME.

SHEBER (שֶׁבֶר; B Σάβερ, A Σέβερ, Luc. Σάβερ).—A son of Caleb by his concubine Maacah, 1 Ch 2⁴⁸.

SHEBNA (שֶׁבְנָא; in 2 K 18^{18, 28} שֶׁבְנָא SHEBNAH;

LXX Σόβνας [in Is 36³ B Σόβνας, and so Qm^s in 36¹¹]).—A *major-domo* or palace-governor of king Hezekiah, against whom is directed one of the recorded utterances of Isaiah (Is 22¹⁵⁻²⁸). The prophet's language implies that Shebna possessed wealth and high position. His chariots and their splendour drew remark (v. 16). He had begun the construction of a tomb such as princes made for themselves (v. 16). The office he held was domestic in origin, but had become one of the highest in the State. Control of the royal household and management of the affairs of the palace brought the holder of the office into intimate relations with the king, and placed in his hands the dispensing of much favour and patronage. The palace guards were probably under his control, so that the important element of a certain military power was added to his position. Isaiah refers to the supremacy of his authority in the palace (v. 23). He also implies that the office (as in Gn 45⁸) had duties beyond the palace precincts, in Jerusalem and even in Judah (v. 24). When Jerusalem was threatened by the Assyrian king, the holder of this office was one of three chosen by Hezekiah to negotiate for him (2 K 18 f.). The palace-governor, in short, was one of the principal ministers of State.

The full significance of Isaiah's prediction regarding Shebna is apparent only if it be remembered, firstly, that he was a foreigner, and, secondly, that he was just then constructing for himself a tomb which should be his monument and resting-place. It was probably on a day when he was viewing complacently the progress of this work that the prophet came to him with his disturbing, disconcerting message. He will not rest in the sepulchre he is making. He has not even found, as he had thought, an adopted country. He will be cast out from the land of Judah, and die and be buried far away from the tomb he is preparing.

The simplest way of regarding Isaiah's message is to take it as a special case of the warning, 'He putteth down the mighty from their seat, he exalteth them of low degree.' Shebna's pride, his arrogant splendour, and his confidence in the future are marked features in his character as it is presented to us. His fate is not represented as retribution for what he has done. Rather, it is the contrast between his present haughty independence and his future humiliation which exposes him to rebuke and brings upon him the prophet's warning. It might be argued that the application of the words 'my servant to his successor' (v. 20), and the evidence of v. 18, imply that he had transgressed J^h's law. It is certainly probable that a man of Shebna's spirit would in his position be guilty of conduct which Isaiah elsewhere reprobates. But the prophecy does not denounce judgment on him for this reason. It has been suggested that Shebna's policy was not in accordance with Isaiah's, that he was one of those who instigated the king to a breach with Assyria. This also is possible, but is merely conjecture. Even the interpretation of the 'large country' of v. 18 as Assyria is no support.

The date of the prophecy may be inferred from 2 K 18 f. (= Is 36 f.), where Eliakim appears as holder of the office of *major-domo*. That was in the year B.C. 701. Some time before this, accordingly, Shebna had been removed from his office. The prophecy was delivered still earlier. The argument implies, in accordance with Is 22²⁰⁻²³, that Eliakim's tenure of office followed Shebna's (see ELIAKIM). But this same narrative mentions also a certain 'Shebna the scribe' (2 K 18^{18, 26, 37} 19² = Is 36^{11, 22} 37²). It is unlikely that there was more than one Shebna among Hezekiah's officers of State. The subject of Isaiah's prophecy appears, accordingly, to have held, later on, the office of royal secretary. One of two conclusions may be drawn: either the prophecy was unfulfilled in 701, or there is a mistake in describing it as directed against Shebna.

A third view has been maintained, to the effect that change of office from *major-domo* to secretary is degradation equivalent to fulfilment of the prediction. There is not, however, sufficient proof that the office of State secretary was lower than that of governor of the palace. But, besides, Isaiah foretells as Shebna's fate much more than loss of office. That, indeed, is merely part

of the implication of a sentence of exile and banishment. Loss of office, or rather transference to another office, is by no means the same as exile. Isaiah mentions it as a part of Shebna's misfortune. It is less easy to decide between the alternatives which remain. If the spirit and essence of Isaiah's prophecy be considered, Shebna's change of office was not in the slightest degree its fulfilment. This conclusion may be declared impossible on theological grounds. But Shebna's history did not end with the year 701. His exile may have come after that date. Delay in the fulfilment of the prediction or premature anticipation of its fulfilment is all that need be assumed. The alternative conclusion is that the governor of the palace in Is 22 is wrongly named Shebna. In support of this it may be argued (Duhm, *ad loc.*, and others) that the last clause of v. 15 is in its wrong place, was originally an editorial heading to the section, and may be in error. The words 'against (לע) Shebna the palace-governor' certainly read like a heading and leave an improved text when removed from their present position. But the suggestion that an editor took the name from 2 K 18 is improbable, since, (1) Shebna is secretary there, and (2) the identification creates evidence against the fulfilment of the prediction. The difficulty, therefore, that Shebna was royal secretary in 701 remains the only reason for eliminating the name from Is 22¹⁵.

The designation שְׁבַנָּה in Is 22¹⁵ has not been referred to. The title occurs only here in the OT.* In 1 K 12⁴ the feminine is used (AVM 'cherisher'), in a Phœnician inscription about 80 years older than Isaiah's prophecy (7) (CIS i. p. 25) it is used possibly in the sense of city-governor.† This may be its meaning here. It harmonizes sufficiently with the designation of Shebna as palace-governor. The domestic office may have included the other (cf. v. 21). The cognate in Assyrian denotes 'governor' (Del. *HWB* s. שְׁבַנָּה). W. B. STEVENSON.

SHEBUEL (שְׁבַוֵּל).—1. A son of Gershom and grandson of Moses, 1 Ch 23¹⁸ (BA *Σουβαήλ*, Luc. *Σουβιήλ*). He was 'ruler over the treasures,' 26²⁴ (B *Ιωήλ*, A *Σουβαήλ*, Luc. *Σωβιήλ*). He is called in 24²⁰ *Shubael* (שְׁבַוֵּל; B *Ιωβαήλ*, A *Σουβαήλ*, Luc. *Σουβιήλ*), which is prob. the original form of the name (see Gray, *HPN* 310). 2. A son of Heman, 1 Ch 25⁴ (BA *Σουβαήλ*, Luc. *Σουβιήλ*), called in v. 20 *Shubael* (LXX as in v. 4).

SHECANIAH (שְׁכַנְיָהּ; in 1 Ch 24¹¹, 2 Ch 31¹⁵ שְׁכַנְיָהּ).—1. A descendant of Zerubbabel, 1 Ch 32²² (B *Σεκενιά*, A and Luc. *Σεκενίας*, which is the reading of Luc. also in all the following passages). It is probably the same Shecaniah who is named in Ezr 8⁵ (B *Σακαχιά*, A *Σακαχιά*; see Ryle, *ad loc.*). 2. According to the MT of Ezr 8⁵, 'the sons of Shecaniah' were amongst those who returned with Ezra; but a name appears to have dropped out of the text, and we should read 'of the sons of Zattu, Shecaniah the son of Jahaziel' (cf. 1 Es 8²² 'of the sons of Zathoes, *Sechenias* the son of Jezelus'). Ezr 8⁵ is wanting in B; A has ἀπὸ υἱῶν Ζαδοῦς *Σεχορίας*. 3. Chief of the tenth course of priests, 1 Ch 24¹¹ (B *Ιεραχιά*, A *Σεκενιά*). 4. A priest in the reign of Hezekiah, 2 Ch 31¹⁵ (BA *Σεχορίας*). 5. A contemporary of Ezra, who supported him in his action in connexion with the foreign marriages, Ezr 10² (*Σεκενίας*). 6. The father of Shemaiah, 'the keeper of the east gate,' Neh 3²⁰ (B *Εχενιά*, BA *Σεκενιά*). It is possible that he and No. 1 are identical. 7. The father-in-law of Tobiah the Ammonite, Neh 6¹⁸ (*Σεκενιά*). 8. The eponym of a family which returned with Zerubbabel, Neh 12³ (*Σεκενιά*). It is the same name which, by interchange of ש and ס, appears as Shebaniah (see SHEBANIAH, No. 2) in Neh 10⁴ 12¹⁴.

SHECHEM.—1. (שֶׁכֶם) Gn 33¹⁹ 34²⁴ etc. See HAMOR. 2. (שֶׁכֶם, *Συχεμ*) the name of a Manassess clan, Nu 26³¹ (28) (the *Snechemites* שְׁכֶמִיתִים, *σημῶς δ* *Συχεμ*(ε)ί), Jos 17¹, 1 Ch 7¹⁰. The various conflicting schemes by which these three passages (P, J, and the Chronicler) connect Shechem with Manasseh are discussed in art. MANASSEH, vol. iii. p. 231 f.

* Cheyne (*Expositor*, ix. [1899] p. 454) would read this word also in 2 S 8¹⁵ 20²⁴, 1 K 4⁵ (1 Ch 18¹⁷), but see art. PRIESTS AND LEVITES, p. 730.

† Quoted and so translated by Winckler, *Geschichte Israels*, i. 120.

SHECHEM (שֶׁכֶם 'shoulder'; *Συχεμ*, ἡ *Σικιμα* (1 K 12²⁸), τὰ *Σικιμα* (Jos 24³²), *Σήκιμα*, *Σήλω* (Jos 24¹⁻²⁶), *Σικιμορ*, *Σικιμα* (Joseph.); *Sichem*, *Sicima* (Jerome, *Onom.*)).—There are two views with regard to the name. One, held by Eusebius (*Onom.* s. *Συχεμ*), is that Shechem, the son of Hamor, 'the Hivite, the prince of the land' (Gn 33¹⁸⁻¹⁹), gave his name to the town. In this case the name is used in Gn 12⁶ by anticipation. The other view is that Shechem received his name from the town, which was so called from the *shēchēm*, 'saddle,' or 'shoulder' (cf. Gn 48²²), between Ebal and Gerizim, which separates the waters of the Mediterranean from those of the Dead Sea. The latter supposition is the more probable. The name occurs in the 'Travels of a Mohar,' if Max Müller's reading, 'Mountain of Sakama,'—the mountain of Sichem, i.e. Ebal or Gerizim,—be correct (*Asien u. Europ.* p. 394). Eusebius and Jerome (*Onom.*) held the view that Shechem was formerly called *Salem*; but this opinion is apparently based on a wrong interpretation of Gn 33¹⁸ (see SHALEM).

The position of Shechem is clearly indicated in the Bible. It was west of Jordan; in the territory allotted to Joseph (see Gn 48²², where 'portion' is the translation of *shēchēm*); in the hill-country of Ephraim (AV Mount Ephraim), within the limits of the tribe of Ephraim (Jos 20²¹ 21², 1 K 12²⁸, 1 Ch 6⁷⁷ 7²⁸, cf. Jos 17¹), and immediately below Gerizim (Jg 9⁷). It was beyond Shiloh on the high road from Jerus. to the north (Jg 21¹⁹), to the west of Michmethath (Jos 17¹), and not very far from Dothan (Gn 37¹³⁻¹⁷). The evidence outside the Bible is decisive: Josephus distinctly says (*Ant.* iv. viii. 44) that Shechem was between Ebal and Gerizim. Eusebius (*Onom.* s. *Συχεμ*, *Λουῖδ*, *Τερέβινθος*) places it in the suburbs of, or close to, Neapolis; whilst Jerome (*Ep. Pau.* xvi.), Epiphanius (*adv. Hær.* iii. 1055), and later writers identify it with Neapolis, the present *Nāblus*. Shechem is supposed to have been destroyed during the Jewish War, and to have been rebuilt by Vespasian, who named it *Flavia Neapolis*. It is so called on coins (Eckhel, *Doc. Num.* iii. 433), and by Justin Martyr, who was a native. Josephus says (*BJ* iv. viii. 1) that Neapolis was anciently called *Mabortha*, or *Marbatha*—a name which Pliny gives (*HN* v. 13) in the form *Mamortha*. This word has been variously explained. Reland conjectures (*Dis. Mis.* i. 138-140) that the readings should be corrected from coins which have *Morthia*—the classical form, according to his view, of *Moreh*. Tomkins (*Abraham and his Age*, p. 90) connects *Mabortha*, *Morthia*, with *Martu*, the Sumerian form of the name Amorite, and takes it as evidence of a pre-Semitic occupation of the site. He quotes the view of Sayce, who sees *Martu* in 'the terebinth of *Moreh*.' Ritter (*Pal.* 646) considers that the name refers to the 'pass' or valley in which the town is situated. Olshausen, Ritter (as above), Guérin (*Samarie*, i. 420), and Riehm (*HWB*) take it to mean a 'thoroughfare,' or place of 'passage,' or 'crossing' (שְׁכֶם *ma'abartā*)—a name very applicable to a town situated in the natural passage or valley from the Mediterranean to the Jordan, or on the caravan road from Judæa to Galilee. Neubauer (*Géog. du Talm.* 169) sees in the word a corruption of the Aramaean סְכֶמֶת (*mabdrakhta*), 'blessed town,' and supports his view by the statement in the Talmud that the Samaritans called their mountains 'the mountains of blessing.'

When Abram entered the land of Canaan, he camped by the oak (AV 'plain,' RVm 'terebinth') of *Moreh*, at or near 'the place of Shechem' (AV *Sichem*), and there built 'an altar unto the LORD' (Gn 12⁶⁻⁷). Some authorities maintain, from the expression 'place of Shechem,' that the city did

not then exist; but the word 'place' (Ges. *Lex.*) is applied to inhabited towns in Gn 18²⁴ 19¹² and 29²². It is also most unlikely that the Canaanites, who were 'then in the land,' would have overlooked or neglected to occupy a well-watered site which possessed so many natural advantages. The oak of Moreh, or a successor, is apparently mentioned as 'the oak which was by Shechem' (Gn 35⁴), 'the oak that was in the sanctuary of the Lord' (Jos 24²⁶), 'the oak of the pillar that was in Shechem' (Jg 9⁶), 'The oak of Meonenim' (Jg 9²⁷ 'the diviners' tree') is possibly also the tree of Gn 12⁶, but, Moore thinks, not of Jg 9⁶.

When Jacob 'came from Paddan-aram,' Shechem was a Hivite city under the rule of Hamor the father of Shechem. The patriarch pitched his tent to the east of the city on ground which he afterwards purchased from Hamor, and bequeathed to the children of Joseph. Here Jacob erected an altar, and sunk a well for his family and cattle; and here Joseph was buried (Gn 33¹⁸⁻²⁰ 34² 48²², Jos 24²², Jn 4^{5, 6, 12}, Ac 7¹⁶). The size of the 'parcel' is unknown, but it possibly included the oak beneath which Jacob concealed the gods and trinkets of his household before moving to Bethel (Gn 35⁴). From the account of the capture and pillage of Shechem, perhaps alluded to in Gn 48²², and of the events which followed the defilement of Dinah, it would appear that the Shechemites were a peaceful, uncircumcised people, who possessed sheep, oxen, and other wealth (Gn 34^{10, 21, 22, 26-29}; Jos. *Ant.* I. xxi. 1). The massacre of the Shechemites (if indeed it belongs to the patriarchal period, but see arts. HAMOR, SIMEON) does not seem to have aroused the ill-will of the surrounding tribes, for, whilst Jacob lived at Hebron, his sons pastured his flocks at Shechem in peace (Gn 37¹²⁻¹⁴).

Shechem acquired additional importance and sanctity from the promulgation of the Law in its immediate neighbourhood (Dt 27¹²⁻¹⁴, Jos 8³³⁻³⁵); and from the renewal of the covenant with God when Joshua, towards the close of his life, gathered all the tribes of Israel to Shechem and set up a great stone, as a witness, under 'the oak that was in (AV by) the sanctuary of the LORD' (Jos 24^{1, 26-27}). Joshua made Shechem a city of refuge, and gave it to the Levites (Jos 20⁷ 21²¹, 1 Ch 6⁶⁷; cf. Hos 6⁹ (RV); Jos. *Ant.* v. i. 24). Yet under the Judges we find a temple of Baal-berith in or near the town (Jg 9⁴⁻⁶), and the population is plainly Canaanite.

After Gideon's death, the men of Shechem made Abimelech, his son by a Shechemite concubine, king by the oak (RV 'plain') of 'the pillar that was in Shechem'; and it was during, or immediately after, the ceremony that Jotham delivered his parable of the trees from Mount Gerizim (Jg 9¹⁻²⁰). When Abimelech had reigned three years the Shechemites rose against him, but he soon retook the city, and, after destroying it, sowed the site with salt. He also set fire to and burned the temple of Baal-berith, in which a portion of the garrison had taken refuge (Jg 9²³⁻²⁷; Jos. *Ant.* v. vii. 4). In consequence of its central position and sacred associations, all Israel assembled at Shechem to make Rehoboam king (1 K 12¹, 2 Ch 10¹); but the great disruption followed, and the ten tribes revolted, and made Jeroboam their king. Jeroboam rebuilt or fortified the town, and built himself a palace there (1 K 12²⁵; Jos. *Ant.* VIII. viii. 4). The position, however, was not a strong one, and the capital of the new kingdom was first moved to Tirzah and then to Samaria—sites more capable of defence against the attack of an enemy. When Samaria became the political and religious centre of the Northern Kingdom, Shechem lost its importance, and it is not once mentioned during the monarchy. The town was, however, inhabited after the fall of Jerusalem (Jer 41⁵), and became

the chief town of the Samaritans (Sir 50²⁸; Jos. *Ant.* XI. viii. 6). About B.C. 132 it was taken by John Hyrcanus, and the temple on Mt. Gerizim destroyed (Jos. *Ant.* XIII. ix. 1; *BJI* I. ii. 6).

Shechem was probably destroyed during the Jewish War, and its place taken by Flavia Neapolis, built by Vespasian a short distance to the west of the ancient site. Coins struck at Neapolis during the reign of Antoninus Pius represent Gerizim with a large temple on its summit, approached by many steps cut or built in the side of the mountain. This temple, according to the Samaritan Chronicle, Dion Cassius (xv. 12), and Damascius (*Phot. Bibl.* p. 1055), was built by Hadrian, and dedicated to Jupiter. In the reign of Zeno the Samaritans attacked (A.D. 474) the Christians at Pentecost, and wounded the bishop, Terebinthus, whose name was perhaps taken from the terebinth or oak of Moreh. In consequence of this, the emperor deprived the Samaritans of Gerizim and gave the mountain to the Christians, who built a church on it which they dedicated to the Virgin. Justinian afterwards surrounded the church with a strong wall, and rebuilt five churches in Neapolis which the Samaritans had destroyed (Procop. *De Edif.* v. 7). The only known bishops of Neapolis are Germanus, who attended the Councils of Ancyra and Nicæa, Terebinthus, Procopius, Ammonas, and Joannes, who was present at the Council of Jerusalem (A.D. 536). In 1184 Nablus was pillaged by Saladin, and in 1834 by the soldiers of Ibrahim Pasha. In 1202 and again in 1837 the town suffered greatly from severe earthquakes.

Near the centre of Palestine the range of hills which traverses the country from north to south is pierced by a remarkable pass—the only one conspicuous from the sea. The pass, which lies between Ebal and Gerizim, is the Vale of Shechem. The valley rises gradually eastward to a grand natural amphitheatre, with its southern end recessed in Gerizim and its northern in Ebal. Here the gently swelling ground of the arena separates the waters of the Mediterranean from those of the Dead Sea; and here, in all probability, was held 'the great inaugural service of all Israel on taking possession of the country.' Eastward of the water-parting, the ground falls gradually between Ebal and Gerizim to the rich level plain of *el-Mukhna*; and near the spot where the valley merges into the plain are the traditional sites of Jacob's Well and Joseph's Tomb. The beauty of the Vale of Shechem and its exuberant fertility have often been described. The soft colouring of the landscape, the fresh green of the gardens that slope down on either side, the grey olive trees, the joyous notes of the numerous birds of song, and the 'mighty burst of waters from the flank of Gerizim,' make the vale the most beautiful spot in Central and Southern Palestine. Amidst this wealth of verdure, clinging as it were to the lower slopes of Gerizim, lies Nablus (*Neapolis*), the 'little Damascus' of the old Arab writers, and a little to the east, between the modern town and the water-parting, probably lay Shechem. The natural attractiveness of the locality, its central position on the highland road from north to south, and the facilities for communication on the one hand with Sharon and the Mediterranean, and on the other with the Jordan Valley and the trans-Jordanic regions, marked it out as a place of importance from the remotest period. A trade route, to which allusion is made in Hos 6⁹, and which the Psalmist may have had in his mind when he connected Shechem with the valley of Succoth (Ps 60⁶ 108⁷), ran at a very early date from the coast districts, past Shechem to Gilead. The connexion with the districts east of Jordan remained almost to the present day, for, until recently, Gilead was gov-

erned from *Nablus*, which is still the connecting link between the telegraph system east and west of Jordan. The modern town contains three churches built by the Crusaders which are now mosques, the synagogue of the Samaritans, and a few fragments of the Roman city. Immediately outside the town, on the S.W., there is a small mosque on the traditional site of Jacob's mourning when Joseph's coat was brought to him. In the minaret close by there is a stone with a Samaritan inscription containing the Ten Commandments.

Environs.—There are three spots in the neighbourhood of Shechem which require some notice: the Well of Jacob, the Tomb of Joseph, and the site of the 'oak' of Moreh. A tradition that goes back to the early part of the 4th cent., and in which Jews, Samaritans, Christians, and Moslems agree, identifies **Jacob's Well** with *Bir Y'akub*. This well, sometimes called *Bir es-Samarieh*, 'well of the Samaritan' (woman), is situated in the level plain of *el-Mukhna*, about 1½ m. from *Nablus* on the road to Jerus., and a little beyond the village of *Balāta*. The well is sunk to a great depth, partly through alluvial soil and partly through limestone, so as to secure, even in exceptionally dry seasons, a supply of water. By its construction in his own 'parcel' of ground, the patriarch, with great prudence and forethought, made himself independent of the springs which probably belonged to the Shechemite villagers, and avoided those quarrels about water which are so common in a country where the population is partly sedentary and partly nomadic. Eusebius (*Onom.*) and the Bordeaux Pilgrim (A.D. 333) mention the well in connexion with Sychar, a place which they distinguish from Sichem and Neapolis. Jerome (*Onom.*) adds that there was a church at the well which was visited by St. Paula (*Ep. Paul.* xvi.). Antoninus Martyr (A.D. 570), Arculfus (A.D. 670), and Willibald (A.D. 754), mention the well and church, and Arculfus adds that the church was cruciform, the well being in the centre. The church was apparently destroyed before the arrival of the Crusaders and rebuilt in the 12th cent. It was again destroyed after the battle of Hattin, and remained a heap of rubbish until a few years ago, when it became the property of the Greek Church, and its foundations were uncovered by excavation. The stone on which our Lord sat is said to have been taken to Constantinople in the reign of Justinian (see SYCHAR).

Jewish, Samaritan, and Christian tradition identifies the **Tomb of Joseph** with a modern building, called *Kabr Yūsuf*, situated in the plain about ¼ m. north of Jacob's Well. Moslem traditions vary—one accepting the *Kabr Yūsuf*, another placing the tomb in the cemetery *Rijal el-Amūd* at the foot of Gerizim. The latter place was apparently shown to Maundrell (A.D. 1697). Eusebius, the Bordeaux Pilgrim, and Jerome (*Onom.*) place the tomb to the east of Neapolis and close to Sichem. Jerome elsewhere (*Ep. Paul.* xvi.) says that St. Paula, after leaving Jacob's Well, visited the 'tombs of the twelve patriarchs.' The tradition that the twelve sons of Jacob were buried at Shechem rests on the words of St. Stephen (Ac 7^{15, 16}). Josephus (*Ant.* II. viii. 2) says they were buried at Hebron. Nearly all later writers refer to the tomb without distinctly indicating its position; but all Jewish travellers place it in the immediate neighbourhood of the village of *Balāta*.

Two sites have been suggested for the 'oak' of **Moreh**. At the foot of Gerizim, in the recess which forms part of the natural amphitheatre already described, there is a small, well-kept cemetery, with a mosque, a courtyard, a well, and several tombs of which one is the tomb of *Sheikh Yūsuf*. The place is called *Rijal el-Amūd*, 'the men of the column,' or simply *el-Amūd*, 'the column.'

Here, according to one tradition, Joseph and his brethren were buried, or, according to another, several Jewish prophets. A third tradition finds in it the spot where Jacob buried the idols of his household, whilst the Samaritans believe it to be the place where Joshua set up a great stone under the 'oak' that was in the sanctuary of the LORD (Jos 24²⁶). The other site is *Balāta*, a small hamlet with a beautiful spring, not far from Jacob's Well. The village is mentioned in the Samaritan Book of Joshua under its present name, which contains the radicals of the Aramaic word for 'oak.' The place is also, apparently, that mentioned by Eusebius and Jerome (*Onom.*) as *Balanus* (translated by them 'oak') near Joseph's Tomb, and identified by them with the oak of Shechem.

LITERATURE.—Descriptions of *Nablus* and its environs, and of the importance of Shechem in the history of the Jews, will be found in *PEF Mem.* ii. 172-178, 208, etc.; Stanley, *SP* p. 233, etc.; Smith, *HGHL* 332, etc.; Guérin, *Samarie*, i. p. 372, etc.; Robinson, *BRP* 3 iii. p. 96, etc.; Wilson, *PEF St.* 1873, p. 66, etc.

C. W. WILSON.

SHEDEUR (שֶׁדֶּוּר); the first part of the word is probably שֶׁדֶּד *Shaddai*, cf. Gray, *HPN* 169, 197). —The father of Elizur, the chief of Reuben, Nu 1⁸ 21⁹ (B and Luc. in both Σεδιούρ, A Ἐδιούρ) 7²⁰ (B Ἐδιούρ, B^{ab} AF Σεδιούρ) 10¹⁸ (Σεδιούρ).

SHEEP.—The generic name for 'sheep' is שֶׂה *shē* (properly 'small cattle'). The unit is expressed by שֶׂה *shē*, which also applies to goats. אֵיִל *ayil* signifies 'a ram'; רֶחֶל *rahēl*, 'a ewe'; כֶּבֶשׂ *kebesh* (fem. *kibshah* and *kabshah*), or by transposition כֶּשֶׁבֶה *keshēb* (Lv 3⁷, fem. *kishbah*), 'a (yearling) lamb'; טָלֵחַ *talēh* (1 S 7²⁰), and קָר *kar* (Ps 37²⁰), 'a young lamb.' See, further, **LAMB**.

The sheep, as supplying most of the wants of a pastoral people, was their chief possession, and a measure of their wealth and prosperity. Job had 7000 head of sheep at first, then 14,000 (Job 1² 42¹²). Abraham, Isaac, Jacob, and Esau had vast flocks of them. Sheep furnished their owners with clothing, milk, butter, cheese, meat, and a medium of exchange. The king of Moab (see art. **MESHA**) paid an annual tribute of 100,000 lambs and the same number of rams to the king of Israel (2 K 8⁴). Reuben took from the sons of Ishmael 250,000 sheep (1 Ch 5²¹). Solomon sacrificed 120,000 sheep at the dedication of the temple (1 K 8⁶³). His household consumed 100 sheep a day (1 K 4²²). The Israelites entered Egypt as shepherds (Gn 47¹⁻⁶), and left it with much cattle (Ex 12²⁸). The same regions which furnished the vast flocks in ancient times are still noted for their sheep. All the plateaus east of the Jordan, and the mountains of Palestine and Syria, are pasture-grounds for innumerable flocks and herds. In the spring, when the ewes bring forth their young, the succulent grasses furnish suitable nourishment. Later on, when the rain has ceased, the sheep still nibble the dried herbage and stubble, and flourish where to a Western eye all is barren desert. They require water but once a day, and, where they cannot get it from perennial streams as the Leontes, the Orontes, the Jordan, the Yermuk, the Zerka (Jabbok), the Zerka-Ma'in, the Mu'jib (Arnon), etc., they find it in the innumerable wells, fountains, and cisterns known to the Arabs. The descendants of the same shepherds who tended flocks in Bible days, still occupy the great sheep-walks of Palestine.

The male of sheep, as of other animals, was usually chosen for sacrifice, as being the representative sex, and because the female was reserved for breeding. The leper, however, offered two he-lambs and one ewe (Lv 14¹⁰). Similarly, while the sin-offering of a ruler was a male kid, that of one of the common people was a female kid or lamb

(Lv 4^{23, 28, 32}). The idea of sacrifice has not disappeared wholly, even from Islam. On important occasions, as the opening of a new road, or the erection of an important building, sheep are sacrificed, and their flesh given to the poor. There is a 'Feast of the Sacrifice' at Mecca every year, in connexion with the *haj*, when many thousands of sheep and other animals are killed, and their flesh distributed among the poor. The milk of sheep is especially mentioned (Dt 32¹⁴, 1 Co 9⁷). Wool was and is a staple of commerce (2 K 3⁴, Ezk 27¹⁸). It is very frequently mentioned. The priests had the first of the clip (Dt 18⁴). Good housewives spun it and wove it (Pr 31¹³). Sheep-shearing was a festival (Gn 31¹⁹ 38¹², 1 S 25, 2 S 13²³⁻²⁷). The ram has long recurred horns, which were used for trumpets (Jos 6⁴) and oil-flasks (1 S 16⁴). They are now used as powder-horns. Rams' skins, dyed red, were used in the construction of the tabernacle (Ex 26¹⁴). Sheep skins were and are fashioned into a baggy kind of coat (He 11³⁷). Such a garment is the protection of every Syrian shepherd against the wind and rain.

The broad-tailed breed of sheep, now universal in Palestine and Syria, was prob. there from ancient times. The immense tail is a great desideratum. It is the 'rump' of Ex 29²³, Lv 3⁹ (RV 'fat tail'). It furnishes as much as 10 pounds of pure fat. This is tried out, usually mixed with fine morsels of lean, about as large as a white bean, and packed away in earthen jars for winter use. This mixture is the main reliance of the peasants of Lebanon in the way of animal food for several months of each year. It is called *kauramah*. To increase the amount of adipose matter in the tail, the sheep is fattened by forced feeding with mulberry leaves. A bolus of these leaves is made up by the woman or girl in charge, and crammed between the teeth of the animal, which is then compelled to masticate and swallow it. Towards the middle of October the sheep become so fat that they are often unable to stand.

The care of sheep is a subject of frequent allusion in Scripture. They are exposed to the vicissitudes of weather, winter and summer, frost and drought, in the immense treeless plains where they are most raised (Gn 31⁴⁰); to the attacks of beasts and robbers (v.², 1 S 17³⁴, Jn 10^{1, 10, 11}). The shepherd leads (not drives) them to pasture and water (Ps 23, 77²⁰ 78³³ 80⁴); protects them at the risk of his life (Jn 10¹⁵). To keep them from the cold and rain and beasts, he collects them in caves (1 S 24⁹) or enclosures built of rough stones (Nu 32¹⁰, Jg 5¹⁶, Zeph 2⁸, Jn 10⁴). The sheep know the shepherd, and heed his voice (Jn 10⁴). It is one of the most interesting spectacles to see a number of flocks of thirsty sheep brought by their several shepherds to be watered at a fountain. Each flock, in obedience to the call of its own shepherd, lies down, awaiting its turn. The shepherd of one flock calls his sheep in squads, draws water for them, pours it into the troughs, and, when the squad has done, orders it away by sounds which the sheep perfectly understand, and calls up another squad. When the whole of one flock is watered, its shepherd signals to it, and the sheep rise, and move leisurely away, while another flock comes in a similar manner to the troughs, and so on, until all the flocks are watered. The sheep never make any mistake as to who whistles to them or calls them. 'They know not the voice of strangers' (Jn 10⁵). Sometimes they are called by names (v.³). It was such a scene that greeted Jacob's eyes when he fell in love with Rachel at first sight (Gn 29^{10, 11}). Moses met his wife and her sisters at the watering troughs (Ex 2¹⁶⁻²¹). The shepherd often carries the smaller lambs in his bosom, or under his arm, or in the folds of his cloak (Is 40¹¹). Dogs are indis-

pensable to shepherds (Job 30¹). They protect the flock from wild animals and robbers. They are the unkempt, savage, shaggy originals of the city dogs of the East. They help to keep the sheep together like the Scotch collies. Syrian sheep are usually white (Ps 147¹⁶, Is 1¹⁸, Dn 7⁷), but some are brown (Gn 30³²⁻⁴³, RV 'black').

No animal mentioned in Scripture compares in symbolical interest and importance with the sheep. It is alluded to about 500 times. The people of God are His sheep (Ps 95⁷ 100³, Jn 21¹⁵⁻¹⁷), and His ministers *pastors*,* i.e. *shepherds* (Jer 23¹, Eph 4¹¹; cf. our Lord's charge to St. Peter Jn 21^{15a}; see art. PETER, vol. iii. p. 761). Christ is the Good Shepherd (Jn 10¹¹), and 'the Lamb (ὁ ἀμνός) of God, which taketh away the sins of the world' (Jn 1²⁹). The song of the redeemed is 'the song of Moses and the Lamb' (Rev 15³), of the law and the gospel. Satan and his hosts 'made war with the Lamb,' and the Lamb overcame (17¹⁴). The last act of the drama of redemption is 'the marriage of the Lamb' (Rev 19⁹ 21^{9, 14}), and thereafter 'God Almighty and the Lamb are the temple' (v.²²), and 'the Lamb is the light thereof' (v.²³). Those who are written in 'the Lamb's book of life' (v.²⁷) enter into His rest. The last vision of Revelation is 'the throne of God and the Lamb' (τὸ ἀπὸ πρὸς, 22¹). G. E. POST.

SHEEP FOLD.—See FOLD and SHEEP.

SHEEP GATE, Neh 3^{1, 32} 12³⁹.—See JERUSALEM, vol. ii. p. 593. For the Sheep Gate (AV Sheep Market; Gr. ἡ προβατική [sc. πύλη as in LXX of OT passages]) of Jn 5², see *ib.* and art. BETHESDA.

SHEERAH (שְׂעָרָה).—A 'daughter' of Ephraim, who, according to the MT of 1 Ch 7²⁴, built the two Beth-horons and a place of doubtful identity † called **Uzzén-sheerah** (שְׁעָרָה = 'portion' [? lit. something weighed] of Sheerah). In v.^{24a}, while A and Luc. recognize a proper name in שְׂעָרָה, B, reading apparently שְׂעָרָה instead of שְׂעָרָה (A καὶ ἡ θυγατὴρ αὐτοῦ Σαρά, Luc. Σαρά), renders καὶ ἐν ἐκείνοις τοῖς καταλοιποῖς, and makes Ephraim himself the builder of the upper and the lower Beth-horon. In v.^{24b} the LXX gives quite a different turn to the passage. Instead of the place-name *Uzzén-sheerah*, it reads καὶ υἱοὶ Ὁζάν Σηερά (= שְׂעָרָה אֶן וִינִי).

J. A. SELBIE.

SHEHARIAH (שְׁחָרְיָה; B and Luc. Σαριά, A Σαριά).—A Benjamite, 1 Ch 8²⁸.

SHEKEL.—See artt. MONEY and WEIGHTS AND MEASURES.

SHEKINAH (Heb. שְׁכִינָה 'that which dwells or resides').—The word, as well as the conception, originated after the close of the Hebrew Canon, and is characteristic of Judaistic theology, though the conception occurs also, with deeper connotation, in NT writings. The word is never used except of God; and implies what we should designate 'the Divine Presence,' or 'the Divine Manifestation.' The two most remarkable features of Judaistic theology were its development of the doctrine of Divine 'alooness,' and the way in which it then sought to bridge the chasm which it had created between God and man. It was felt to be an indignity to God that He should be supposed to have direct contact with inert matter, and immediate intercourse with sinful man; and He was gradually pushed further away from His world. The transcendence of God, and His exemption

* The same misleading tr. occurs also in Jer 28 815 1021 1718 2222 232⁴, in all of which RV alters to 'shepherd.'

† It is identified in Bartholomew-Smith's map of Palestine (1901) with *Beth Sira*, a little to the S.W. of the lower Beth-horon.

from all limitations, was insisted on with increasing vigour, until it reached the *ne plus ultra* in Philo, who maintains that to assign any quality to God would be to limit Him; and that He is the absolutely unlimited, since He is eternal, unchangeable, simple substance. 'Of God, we can only say that He is, not *what* He is' (Drummond, *Philo Jud.* ii. 23-30). Having thus undeified God, in their endeavour to dehumanize Him, the object of philosophic Jews was to posit some one or more intermediary Hypostases, who might occupy the place which had previously been assigned to God, in the world of matter and of mind. Of these the most prominent were the Metatron, the Word, the Spirit, Wisdom, and the Shekinah. It is the last of these which now calls for investigation.

In the Hebrew religion, even in its least developed form, Jehovah is always the God of heaven as well as of earth. In times of storm, God was very near and very real to the Hebrews. They conceived of Jehovah as sitting on the storm-cloud, which they designated *רָאָה*: 'He rode upon a cherub and did fly. He flew swiftly on the wings of the wind' (Ps 18¹⁰): and the brilliance gleaming forth behind and through the black cloud was conceived to be due to the very presence of God: the light being the body or garment of God. When 'the Lord of (the heavenly) hosts' was described as dwelling in the midst of the earthly 'hosts' of His favoured people, we are told that *cherubim* overlaid with gold were prepared for His throne; and that a brilliance shining behind and through clouds was His mundane manifestation, as He is also seen in the clouds of heaven (Ex 40³⁴⁻³⁶). On the summit of Sinai a cloud rested six days, amid which the glory of the Lord was like devouring fire, and Moses entered into the midst of the cloud (Ex 24¹⁶⁻¹⁸). And when the tabernacle was finished, 'the cloud covered the tent of meeting, and the glory of the Lord filled the tabernacle' (Ex 40³⁴). 'By day the cloud was upon the tabernacle, and there was fire therein by night' (Ex 40³⁸).

It was these celestial and terrestrial phenomena which suggested to the Jew the conception of the Shekinah. The desideratum was to find something which is Divine but is not God. God was very far away; literally 'beyond all knowledge and all thought': yet He rules the world mediately, if not immediately; and being a monotheist the Jew could not let go his belief—that only that which is Divine can rule the world. This, then, was the problem: to discover a mediator, or mediators, Divine, but not God. How can this be made thinkable? Well, the wind (*ruah*) is the breath of God, whether in the zephyr or the storm; and if so, it is Divine. So thought the Jew; and in course of time the *ruah*, which first meant 'breath' or 'wind,' was supposed to be endowed with the attributes of God—power, wisdom, holiness—and then 'spirit' becomes its more appropriate rendering. God's *ruah* is thus Divine—an effluence from Deity—and is thus fitted to be intermediary between God and the world of nature and man. Further, there was the Divine Word. The sacred Hebrew books assigned great importance to Divine utterances or words. 'God said, "Let light be"; and light was' (Gn 1³). It was a peculiarity of the ancient world to ascribe causal efficiency to an uttered word, as is seen in the potency ascribed to magical formulæ. When later Judaism expounded such passages as the one we have just quoted, it assigned to the uttered word a causal efficacy in the physical realm. The very words 'Let there be light' were to them a *vera causa* in the natural sphere, and were instrumental in causing the light to come into being; as Zec 5⁴ speaks of an uttered 'curse'

entering a house and 'consuming its timbers and its stones.' An utterance of God is something Divine: as potent as God Himself, and therefore 'Word' lends itself to Jewish philosophy as a suitable expression for a Divine intermediary between God and the world. This helps us to understand how Judaism came to its conception of the Shekinah. The glory in the storm-cloud, in and over the tabernacle, is a manifestation of God. The brilliance is not God; for it was a matter of fixed Jewish belief that God is invisible, and yet the brilliance is an effluence from Deity. When the Jew had banished God from his universe, the recorded manifestation of the Divine Presence in the ark and elsewhere seemed to him a *tertium quid* between God and Nature: Divine, but separable in thought from God.

The word Shekinah is used very often in the Jewish Targums. It does not indicate the radiance or brilliance, but *the central cause of the radiance*. This centre was conceived to be Divine. The Heb. Scriptures often speak of 'the glory' of the Lord, but, with one exception (Zec 2²), the Targumists never use the word Shekinah to translate the Heb. word for 'glory.' They understood *כְּבוֹד* to be the effluence of the substantial glory, i.e. of the Shekinah. The Shekinah is used in the Targums as the *equivalent for the Divine Being, not for His glory*. A good illustration of this occurs in Is 60², where the Heb. reads, 'The Lord shall arise upon thee, and his glory shall be seen upon thee,' and the Targ. renders, 'In thee the Shekinah of the Lord shall dwell, and his glory shall be revealed upon thee.' Whenever the Heb. text would seem to impose any limitations of space upon God, the Targ. substitutes for 'God,' 'his Shekinah.' In every instance where God is said to *dwell* in a place, the Targ. renders that God 'causes his Shekinah to dwell' there (Gn 9²⁷, Ex 25⁸ 29⁴⁰, 1 K 6¹³ 8¹², Zec 8³). Every expression which would in any sense localize God, is scrupulously altered by all the Targumists, who believed that the Shekinah can be localized, but not the omnipresent God. When Jacob says (Gn 28¹⁶), 'God is in this place,' Targ. renders, 'The glory of the Shekinah of J' is in this place.' So Hab 2²⁰ 'The Lord is in his holy temple,' becomes 'J' was pleased to cause his Shekinah to dwell,' etc. When J' is said to 'sit upon the cherubim' (1 S 4⁴, 2 S 6²) the Targ. must needs read, 'the Shekinah of J' for 'J': and Jerusalem is the place where J' causes His Shekinah to dwell (1 K 8¹³ 14¹², Ps 74²). Similarly, when the Heb. text says that any one *saw* God, or that God appeared to any one, the Targ. can only permit the glory of the Shekinah of J' to be visible to mortal man (Is 6⁵ 'My eyes have seen the glory of the Shekinah of the King of the world'; cf. Ex 3⁴, Ezk 1¹, Lv 9⁴).

The Targumist even shrinks from saying that J' is or dwells in heaven. The Heaven of Heavens cannot contain God; and therefore it is not God, but His Shekinah, which can be localized, even in heaven. Is 33⁵ 'He dwelleth on high,' becomes in Targ. 'He has placed his Shekinah in the lofty heaven' (cf. Is 32¹⁵ 38¹⁴). In Dt 4³⁹ 'J' is God in heaven above and on earth beneath,' Onk. renders 'God, whose Shekinah is (Targ. Jerus. 'dwells') in heaven above, and who rules on earth beneath'; so Dt 34⁴.

If a rigorous conception of God's ubiquity forbade His *dwelling* in a place, so also must it preclude His *removal* from a place. When Hos 5⁶ says, 'J' has withdrawn himself from them,' Targ. reads 'J' has removed his Shekinah from them.' This phrase is also used of God's 'hiding his face' (Is 8¹⁷ 57¹⁷ 59², Jer 33³), and 'hiding his eyes' (Is 1¹⁵). The words 'Thou art a God that hidest thyself' (Is 45¹⁵) are rendered, 'Thou hast

placed thy Shekinah in the lofty fastness.' Cf. Hab 3¹.

It was the belief of the Jews that the glory of the LORD did not dwell in the Most Holy Place in the second Temple. The Talmud (*Yoma* 9b) explains this on the ground that God only dwells in the tents of Shem; not of Japheth, of whom Cyrus was a descendant. This was deplored, and the promises of more intimate fellowship to be enjoyed by the Church in the Messianic age are in the Targ. all made to predict the presence of the Shekinah (Jl 3 (4)¹⁷ 'I will place my Shekinah in Zion'; so Ezk 43⁷⁻⁹, Hag 1⁸⁻⁹, Zec 2¹⁰).

It would be difficult among all these passages from the Targum to point to one in which activity or personality is assigned to the Shekinah. Under the conception that 'God is Light,' the Shekinah is God's mere 'manifestation-form.' When we pass, however, from the Targ. to the Midrash and Talmud, the Shekinah ceases to be inactive, and has functions assigned to it which belong rather to the Logos or the Spirit. Lv 26¹² 'I will walk among you, and be your God,' becomes in Targ. 'I will place the glory of my Shekinah among you, and my *Memra* (word) shall be with you.' Dt 12⁹ Targ. Jerus. 'The place which the *Memra* of J' shall choose to place his Shekinah there'; but in Midr. and Talm. the *Memra* almost disappears, and His functions are assigned to the Shekinah. We find in *Pesachim* 73 that it was the Shekinah which spoke to Amos and the prophets; and the expression מוֹרָא דְּדָוִד ('a Psalm of David') means that the Shekinah came down upon David, and he then spake forth the Psalm (*Pes.* 114). The Shekinah is, in the Talmud, regularly the source of inspiration. The reason why Eli mistook Hannah's grief for inebriety was that the Shekinah had departed from him. The Mishna was given through Moses under the auspices of the Shekinah. *Pirke Aboth* iii. 3 uses Shekinah in the Christian sense of the word Spirit: 'Whenever two men sit together and are occupied with words of the Torah, the Shekinah is with them.' In the Talmud (*Berakhoth* 6a) the number is raised to 'ten.' The Shekinah is always present in synagogues, in schools, and in the homes of the pious (*Sota* 17a). 'He that eats with the Wise enjoys the Shekinah' (Weber, 182 [188]).

We have seen that it was usually taught that the Shekinah was not visible in the second Temple. *Yoma* 1 mentions the Shekinah in a list of things absent from it. But others teach that the Shekinah is inseparable from Israel. When Israel was in Babylon the Shekinah was there. The Shekinah was under the yoke, when Israel so suffered. Wherever Israel is scattered, the Shekinah dwells. When Titus destroyed the Temple, the Shekinah could not desert it, and it is still there behind the remaining western wall (Weber, 60 [182]).

The activity of the Shekinah was conceived to extend not only to earth, but to Sheol. There were some of the Rabbis who held the doctrine now known as 'final restoration.' R. Joshua ben Levi was one of these. He believed that the bound in Gehinnom will one day see the Messiah, and all who bear the mark of the covenant will loose their chains and ascend from the darkness. But in *Bereshith Rabba* to Gn 44⁸ the Shekinah is the deliverer. It affirms that the wicked Jews now 'bound in Gehinnom will ascend out of hell, with the Shekinah at their head' (Weber, 351 [188]).

We turn now to the NT where the word שְׁכִינָה occurs both transliterated and translated. There can be no reasonable doubt that the Greek word σκηνή (= 'tabernacle') was from its resemblance in sound and meaning used by bilingual Jews for

the Heb. *Shekinah*; e.g. in Rev 21³ 'Behold the σκηνή of God is with men, and he will tabernacle (σκηνώσει) with them.' The allusion is equally clear in Jn 1¹⁴ 'The Logos . . . tabernacled (ἐσκήνωσεν) among us, and we beheld his glory.'—The conception of the Shekinah appears in Greek dress under the word δόξα. In several instances δόξα is used of Deity or a manifestation-form of Deity, and thus shows itself to be the equivalent of Shekinah. We will first cite one or two passages from the Apocrypha. In Enoch 14²⁰ we read, 'And the Great Glory sat thereon, and his raiment shone more brightly than the sun'; Enoch 102⁴ 'The angels will seek to hide themselves from the presence of the Great Glory'; To 3¹⁶ 'The prayer of both was heard before the glory of the Great One,' ἐνώπιον τῆς δόξης τοῦ μεγάλου [Query: Since Tobit was translated from a Semitic source, is it not likely, with Enoch before us, that the Greek ought to be ἐνώπιον τῆς δόξης τῆς μεγάλης: 'before the Great Glory'?]; Sir 17¹⁸ 'Their eyes saw the majesty of the glory.' In the NT there are several instances in which δόξα is used as more or less the equivalent of Shekinah. In Ro 9⁴, where St. Paul is enumerating, with patriotic fervour, the privileges of the Jew, and amongst others mentions 'the giving of the law' and 'the glory,' he evidently means 'the Shekinah-glory': as in He 9⁸ 'the cherubim of glory' means 'the cherubim on which the Shekinah was enthroned.' So in He 1³ when the Son of God is said to be 'the effulgence of the glory' (not 'of his glory') it seems probable that the Shekinah was intended, in the sense of 'the manifested Deity.' The personality of the Shekinah is implied in 2 P 1¹⁷, where we read (translating literally), 'when such a voice was borne in to him by (ὑπὸ) the majestic glory.' The word ὑπὸ denotes the agent. 'The glory' is the speaker: as in Targ. Jerus. of Gn 28¹³ the glory of J' says, 'I am the God of Abraham'; and as is possibly implied in Mt 17⁸ 'A bright cloud overshadowed them, and there came a voice out of the cloud.' 2 Mac 2², in anticipating the fulfilment of OT prophecy, says, 'The glory of the LORD shall be sun and the cloud.'

There are three other NT passages where an allusion to the Shekinah is probable, though exegetes are divided on the matter. Ro 6⁴ 'Christ was raised from the dead by means of (διὰ) the glory of the Father.' 'Glory' may of course here mean 'glorious power,' as commentators say; but, with the passage from the Midrash before us, in which the Shekinah is said to release captives from Sheol, it seems to the present writer probable that St. Paul was thinking of the Shekinah piercing with its radiance the gloom of Sheol, and co-operating with God to release the Divine captive from the power of Satan and 'the gates of Sheol.' The second disputed passage is 1 P 4¹⁴ τὸ τῆς δόξης καὶ τὸ τοῦ θεοῦ πνεῦμα, which RV renders, 'The (Spirit) of glory and the Spirit of God,' where Bengel is probably correct in regarding δόξης as an appellation of Christ. If this be so, it helps to elucidate our third passage, viz. Ja 2¹ τῇ πίστιν τοῦ κυρίου ἡμῶν Ἰησοῦ Χριστοῦ τῆς δόξης, which Mayor correctly renders, 'the faith of our Lord Jesus Christ, the Shekinah.' The context refers to an assembly of Christians, where the Shekinah was believed to be present. Thus interpreted, the passage blends together Mt 18²⁰ and the words cited above from *Pirke Aboth*, identifying Jesus with the Shekinah.

LITERATURE.—Weber, *Lehren des Talmud* [2nd ed. under title *Jüd. Theol. auf Grund des Talmud*, etc.]; Gröber, *Urchristenthum*, I. 301 ff.; Langen, *Judenthum zur Zeit Christi*, 201 ff.; Levy's and Buxtorf's *Lexicons*; C. Taylor, *Sayings of the Jewish Fathers*, p. 43. J. T. MARSHALL.

SHELAH (שֶׁלָּה).—1. The youngest son of Judah by Shua, Gn 38⁵. 11. 14. 25 46¹² (A Σηλῶμ, Luc. Σιλῶμ), Nu 26²⁰ (16) (BA and Luc. Σηλῶν, F Σηλῶμ), 1 Ch 2³ (Σηλῶν) 4²¹ (BA Σηλῶμ, Luc. Σηλῶν). He gave his name to the family of the **Shelanites** (שְׁלֹנִי, δῆμος δ Σηλων(ε)ί), Nu 26²⁰ (16). Probably 'the Shelanite' should be read also for 'the Shilonite' (שְׁלֹנִי or שְׁלֹנִי) of Neh 11⁵ (Luc. Σηλωνεῖ, B Δηλωνεῖ, N Δηλωνεῖ, A 'Ηλωνί) and 1 Ch 9⁸ (Σηλων(ε)ί). 2. (שֶׁלָּה) the son or (LXX) grandson of Arpachshad and father of Eber, Gn 10²⁴ 64 11¹³ (12). 14. 15, 1 Ch 1¹⁸. 24 (Σαλᾶ, Luc. in Gn 10²⁴ in second occurrence Σαλᾶς), Lk 3³⁵ (Σαλᾶ).

SHELAH, THE POOL OF (שֶׁלָּה נַחֲלָה; B κολυμβήθρα τῶν κωδίων, N + τοῦ Σιλῶμ, Luc. ἡ κρήνη τοῦ Σιλῶμ; *Piscina Siloe*).—This name occurs only in Neh 3¹⁸, where it is given in AV as 'Siloah.' 'Shelah' is probably a corrupt form of Siloam, the modern *Silwan*. See **SILOAM, POOL OF**. Perhaps in Neh 3¹⁸ we should punctuate שֶׁלָּה as in Is 8⁶.

C. W. WILSON.

SHELANITES.—See **SHELAH**.

SHELEMIAH (שְׁלֵמִיָּה).—1. (B Σελεμᾶ, A Σελεμῆας) One of the sons of Bani, who married a 'strange' wife in the time of Ezra, Ezr 10³⁰; called **Selemias** in 1 Es 9²⁴. 2. (B Τελεμᾶ, N Τελεμῆας) Father of Hananiah, who restored part of the wall of Jerusalem, Neh 3³⁰. His son is perhaps 'Hananiah, one of the apothecaries' (Neh 3⁹, AV 'son of one of the apoth.'), i.e. makers of perfumes, who restored another portion of the wall. 3. A priest who was appointed by Nehemiah to be one of the treasurers over the treasures, to distribute the Levitical tithes, Neh 13¹³. 4. The father of Jehucal or Jucal in the time of Zedekiah, Jer 37³, 38¹; in the latter passage his name appears in the longer form שְׁלֵמִיָּהּ. 5. The father of Irijah, the captain of the ward who arrested Jeremiah as a deserter to the Chaldeans, Jer 37¹⁵. 6. (שְׁלֵמִיָּהּ, B Σαλαμειδ, A Σελεμῆα) 1 Ch 26¹⁴ = **Meshelemiah**, **Meshullam**, or **Shallam**, the head of a family of porters. 7. Another of the sons of Bani who married a 'strange' wife in the time of Ezra, Ezr 10⁴¹. 8. Ancestor of the Jehudi who lived in the time of Jehoikim, Jer 36¹⁴. 9. (LXX om.) Son of Abdeel, and one of those sent by Jehoikim to take Baruch and Jeremiah, Jer 36²⁵. H. ST. J. THACKERAY.

SHELEPH (שֶׁלֶף [pauze]; LXX A Σαλέφ).—Son of Joktan, Gn 10²⁵, 1 Ch 1²⁰. The word is evidently identical with the Arabic *salaf*, *salif*, etc., which figure as the names of several places in Arabia; Yakut mentions a place called 'the two Salafs,' quoting for it a verse of a pre-Mohammedan poet; places called *Salf*, *Salif*, and *Salafah* are noticed in the S. Arabian geography of Hamdani; and a province called *Salif* is mentioned by Muḥaddasi among those of Yemen (p. 90). The Arabic genealogists further discovered a subdivision of the Himyarites which had the name *Sulaf*, and which they identified with the son of Joktan (*Taj al-'arus*, vi. 143). The Arabic *salaf* means simply 'ancestor,' while *salif* or *sif* means 'a sister's husband'; there would therefore be no improbability in the name in the text being not geographical but personal. Some further guesses are recorded by Dillmann (*Genesis*, ad loc.).

D. S. MARGOLIOUTH.

SHELESH (שָׁלֹשׁ; B Σεμή, A Σελλής, Luc. Σέλεμ).—An Asherite, 1 Ch 7³⁵.

SHELOMI (שְׁלֹמִי; B Σελεμῆ [λεμ sup ras B^a], AF Σελεμῆ).—Father of an Asherite prince, Nu 34²⁷.

SHELOMITH (שְׁלֹמִית; in Ezr 8¹⁰ שְׁלֹמִית).—1. The

mother of the man who was stoned to death for having blasphemed 'the Name,' Lv 24¹¹ (B^a AF Σαλωμειθ, Luc. Σαλωμῆθ). 2. Daughter of Zerubabel, 1 Ch 3¹⁰ (B Σαλωμειθ, A Σαλωμειθ, Luc. Σαλωμῆθ). 3. One of the 'sons of Izhar,' 1 Ch 23¹⁸ (B Σαλωμῶθ, A Σαλονμῶθ, Luc. Σαλωμῆθ), called in 24²² **Shelomoth**. 4. The name of a family whose representatives returned with Ezra, Ezr 8¹⁰ (B Σαλειμῶθ, Luc. Σαλιμῶθ). It is probable that a name has dropped out of the MT, and that we should read 'of the sons of Bani, Shelomith the son of Josiphiah' (cf. A^{vid} ἀπὸ υἱῶν Βαανὶ Σελειμμοῦθ, and 1 Es 8³⁰ 'of the sons of Banias, **Salimoth** son of Josaphias').

SHELOMOTH (שְׁלֹמֹת).—1. An Izharite, 1 Ch 24²² (BA Σαλωμῶθ, Luc. Σαλωμῆθ) = **Shelomith** of 23¹⁸. 2. A descendant of Moses, 1 Ch 26²² [*Kere* שְׁלֹמֹת] 28. 29 (in the last Heb. נְשִׁי, BA in all Σαλωμῶθ, Luc. in first two Σαλαμῆθ, in last Σαλωμῆθ). 3. A Gershonite, 1 Ch 23⁹ (*Kere* נְשִׁי; B 'Αλωμειθ, A Σαλωμειθ, Luc. Σαλωμῆθ).

SHELUMIEL (שְׁלֹמִיֶּל, a name exhibiting a late and artificial formation [Gray, *HPN* 200]; LXX Σαλαμῆλ).—Prince of the tribe of Simeon, Nu 1⁶ 21 7. 41 10¹⁹ (cf. Jth 8¹). See also **SHEMUEL**.

SHEM.—See **HAM** and **JAPHETH**.

SHEMA (שֵׁמָּה).—1. A Reubenite, 1 Ch 5⁸ (BA Σᾶμα, Luc. Σεμεῖ). See **SHIMEI**, No. 8. 2. One of the heads of 'fathers' houses' in Aijalon who put to flight the inhabitants of Gath, 1 Ch 8¹³ (BA Σᾶμα, Luc. Σαμαῖα). He is called in v. 21 **Shimej**. 3. One of those who stood at Ezra's right hand, at the reading of the law, Neh 8⁴ (Σαμαῖας). He is called in 1 Es 9²⁵ **SAMMUS**.

SHEMA (שֵׁמָּה; A Σαμαῖα, Luc. Σουῖα).—A town of Judah, situated in the Negeb or South, and mentioned between Amam and Moladah (Jos 15²¹). Some authorities suppose it to be the same place as Sheba (Jos 19²), being a corruption of that name. On the other hand, if Sheba and Beersheba be identical (see **SHEBA**), this cannot be the case, for Shema and Beersheba are both found in the list of towns in Jos 15. The site is unknown. It is probably this Shema which appears in 1 Ch 2⁴³ as a 'son' of Hebron.

SHEMAAH (שֵׁמָּא; B 'Αμᾶ, A Σαμαῖα, Luc. 'Ασμά).—A Benjamite, father, according to MT, of Abiezer and Joash, but, according to the LXX (υἱὸς = γῆ instead of γῆ), of Joash alone, 1 Ch 12².

SHEMAIAH (שֵׁמַיָּה; in 2 Ch 11² 17³ 31¹⁵ 35⁹, Jer 26²⁰ 29²⁴ 36¹² שֵׁמַיָּה; 'J' has heard').—Of the twenty-four persons who bore this name, only four can be certainly said to have belonged to other than prophetic or priestly families.

1. B Σαμμαῖας, A Σαμαῖας (2 Ch 12² 7). A prophet who with **AHIJAH** guided the revolution which deprived Rehoboam of the ten tribes. According to the MT, he does not come on the scene until Rehoboam was on the point of leading a vast army against the revolt. He then appears (1 K 12²²⁻²⁴, 2 Ch 11²⁻⁴) to give the Divine sanction to the rebellion. 'Thus saith the LORD... this thing is from me.' But the second Greek account, which omits all mention of Ahijah in this connexion, introduces Shemaiah at the assembly at Shechem, before the people entered into negotiations with Rehoboam. 'The word of the Lord came to Shemaiah the Enlomite (cf. Jer 29²⁴ LXX), saying, Take to thee a new cloke which hath not gone into water, and rend it into twelve pieces; and thou shalt give it to Jeroboam, and shalt say unto him,

Thus saith the Lord, take to thee twelve pieces to cover thee. And Jeroboam took them, and Shemaiah said, Thus saith the LORD concerning the ten tribes of Israel' (1 K 12²⁴). This is evidently another version of the story told of Ahijah, 1 K 11²⁹. There is another mention of Shemaiah in 2 Ch 12⁵⁻⁶, in which he points the moral of the invasion of Shishak, and at the same time announces the mitigation of it in view of the repentance of Rehoboam. The Chronicler also cites 'the history of Shemaiah the prophet' as an authority for the reign of Rehoboam, 2 Ch 12¹⁵.

2. Son of Shecaniah (1 Ch 3²² Σαμαϊδ; apparently a descendant of Zerubbabel. It is tempting to identify him with 'the keeper of the east gate,' who helped to repair the wall under Nehemiah (Neh 3²⁰ BA Σαμαϊδ, & Σεμεϊδ). On the other hand, Ryle conjectures that the latter was a Levite, and that 'the east gate was the eastern approach to the temple precincts.' Lord A. Hervey (*Genial*, p. 107) would remove the opening words of 1 Ch 3²², and read Shimei for the second Shemaiah, see v. 1⁹.

3. A Simeonite (1 Ch 4⁷ B Συμεών, A Σαμαλας, perhaps identical with the Shimei of 1 Ch 4²⁸, 27).

4. A Reubenite (1 Ch 5⁴ B Σεμεϊ, A Σεμεϊν), called Shema in v. 8. 5. A Merarite Levite (1 Ch 9¹⁴, Neh 11¹⁵ Σαμαϊδ), one of those who dwell in Jerusalem. 6. A Levite of the family of Jeduthun, father of Obadiah or Abda (1 Ch 9¹⁶ B Σαμαϊδ, A Σαμαλας, called Shammua in Neh 11¹⁷). 7. Head of the Levitical Kohathite clan of Elizaphan in the time of David (1 Ch 15⁶ B Σαμαλας, A Σαμαϊδ, & Σαμαλας; v. 11 B Σαμαλας, A Σεμεϊν, & Σαμαλ). He is possibly identical with—8. The scribe (1 Ch 24⁶ B Σαμαλας, A Σαμαλας), the son of Nethanel, who registered the names of the priestly courses. 9. A Korahite Levite, eldest son of Obed-edom (1 Ch 26⁴⁻⁶ B Σαμαλας, A Σαμαλας; v. 7 B Σαμαλ, A Σεμεϊδ).

10. A Levite (2 Ch 17⁶ B Σαμουβας, A Σαμουβας), one of the commission employed by Jehoshaphat to teach the book of the law in Judah. 11. A Levite of the family of Jeduthun in the reign of Hezekiah (2 Ch 29¹⁴ B Σαμαϊδ, A Σαμαλας), one of those who took a leading part in the purifying of the temple. He is possibly identical with 12, one of those who were 'over the freewill offerings of God' (2 Ch 31¹⁸ Σεμεϊ). 13. One of 'the chiefs of the Levites' (2 Ch 35⁹ Σαμαλας; 'captains over thousands,' 1 Es 1⁹ where he is called Samaias).

14. One of the 'chief men' sent by Ezra to fetch Levites and Nethinim (Ezr 8¹⁶ Σαμαϊδ, A Σεμεϊ; Μααμας, Samaias, 1 Es 8³³, 41); possibly the same as—15. A member of the family of Adonikam, (Ezr 8¹³ B Σαμαϊδ, A Σαμαϊδ; Samaias, 1 Es 8³³). 16. 17. Two of those who had married foreign wives, a priest and a layman respectively (Ezr 10²¹ Σαμαϊδ, v. 31 B Σαμαϊδ, & Σεμεϊ, A Σαμαλας; Sameus, Sabeus, 1 Es 9¹¹, 32). 18. A prophet (Neh 6¹⁰⁻¹⁴ B Σεμεϊ, A Σεμεϊ) who had been hired by Sanballat and Tobiah 'to put Nehemiah in fear.' His father's name, Delaiah (see 1 Ch 24¹⁶), would suggest that he belonged to a priestly house. The circumstance is evidently mentioned by Nehemiah as a typical one. The governor's answer to Shemaiah's suggestion indicates that his design was at once to bring Nehemiah into contempt as a coward, and also to expose him to the charge of sacrilege, which would be certainly raised if he, a layman, were to intrude where priests alone might tread.

19. One of the 24 courses of priests, 16th under Zerubbabel (Neh 12⁶ & A Σεμεϊν), 15th under Joiakim (Neh 12¹⁶ & A Σεμεϊν), and 21st under Nehemiah (Neh 10⁹ Σαμαϊδ). It is probably this clan, and not an individual, that is mentioned as taking part in the ceremonies at the dedication of the wall (Neh 12²⁴ B & Σαμαϊδ, A Σαμαλας). 20. Probably a Levite, descendant of Asaph (Neh 12³³

Σαμαϊδ). 21. Probably a Levitical clan of singers that took part in the dedication ceremonies (Neh 12³⁶ Σαμαϊδ; v. 42 & A & B Σεμεϊν). We may suppose that half of it went in one procession and half in the other. 22. Father of the prophet Urijah (Jer 26 [Gr. 33]²⁰ BA Σαμαλας, & Μααλας). 23. A prophet at Babylon, one of those who had been brought into captivity with Jehoiachin (Jer 29 [Gr. 36]²⁴⁻²⁵ Σαμαϊδ, & Σαμαδ). He is called 'the NEHELAMITE' (which see). He belonged to the party opposed to Jeremiah, and it is evident that, like HANANIAH (Jer 28), he had predicted a speedy termination to the Captivity. Enraged at the letter of Jeremiah, in which the exiles had been counselled to acquiesce cheerfully in a prolonged stay in Babylon, Shemaiah sent letters to Jerusalem taxing Zephaniah the second priest and the other ecclesiastical authorities with supineness, in that they did not visit Jeremiah with the punishment due to a false prophet. It would seem from this that it was the special duty of the 'second priest' to enforce order in the temple (see art. PRIESTS AND LEVITES, p. 74). 'Jehoiada the priest' may possibly be the name of Zephaniah's predecessor in the office of 'second priest,' or more probably he may be the great high priest of that name whose zeal in God's service Shemaiah bids Zephaniah emulate. The punishment denounced against Shemaiah for this action was even more severe, according to Hebrew ideas, than that awarded to Hananiah. The latter was visited in his own person with premature death, but Shemaiah was punished not only with exclusion by death from such blessings as might fall to the lot of the exiles in Babylon, but with the complete excision of his family. 24. Father of Delaiah, who was one of the princes in the reign of Zedekiah (Jer 36 [Gr. 43]¹² BA Σεμεϊν, & Σεδεκίας).

N. J. D. WHITE.

SHEMARIAS (שִׁמְרִיָּהוּ).—1. A Benjamite warrior who joined David at Ziklag, 1 Ch 12²⁵ (B Σαμαριαδ, & A Σαμαριδ, Luc. Σαμαριας). 2. A son of Rehoboam, 2 Ch 11¹⁹ (Σαμαριας). 3. One of the sons of Harim who had married a foreign wife, Ezr 10³² (B Σαμαριαδ, & A Σαμαριδ, Luc. Σαμαριας). 4. One of the sons of Bani who had committed the same offence, Ezr 10⁴¹ (B Σαμαριαδ, A Σαμαριας, Luc. Σαμαριας).

SHEMEBER (שִׁמְעֵבֶר).—King of ZEBODIM, one of the five kings defeated by Chedorlaomer, Gn 14² (A Συμβόρος, Luc. Συμόρ, Syr. ܫܡܥܝܒܪ, Josephus Συμβόρος). The Samaritan has שמעבר, which may have arisen from a confusion between ם and ך, or may be due to an attempt to play upon the name. It has even been suggested (cf. Ball in *SBOT*) that the name in the text may have originated from a marginal gloss שם אבד ('name lost').

SHEMED.—See **SHEMER**, No. 4.

SHEMER (שִׁמְרִי).—1. The owner of the hill purchased by Omri, upon which SAMARIA was afterwards built, 1 K 16²⁴ (Σέμρι, Luc. Σέμρι). Difficulties both etymological and historical attach to the statement in the same passage that the name Samaria (שִׁמְרִי) was derived from an individual instead of a clan name (but see Kittel, *Könige*, ad loc.), and that it was first given to the place by Omri (see Stade in *ZATW* v. (1885) 160 ff.). 2. A Merarite, 1 Ch 6³¹ (46) (Σέμρι). 3. An Asherite, 1 Ch 7³⁴ (B Σέμρι, A and Luc. Σώμρι), called in v. 32 Shomer (cf. the names 'Ebed and 'Obed). 4. A Benjamite, 1 Ch 8¹² (B Σήμρι, A Σέμρι, Luc. Σαμαριήλ). The Heb. MSS show here some confusion between ם and ך as the final letter of the name. The AV (Shamed) and RV

(Shemed) retain the reading of the Geneva version, which is based on the Vulg. *Samad*.

SHEMIDA (שְׁמִידָה).—A 'son' of Gilead, according to Nu 26³² [P] (Συμαίρ); called in Jos 17² [JE] a 'son' of Manasseh (B Συμαείμ, A Σεμπαί, Luc. Σαμιδαί); his descendants are enumerated in 1 Ch 7¹⁹ (Σεμ(ε)ράδ, Luc. Σεμειδά). The gentilic name **Shemidaites** (Σημιδαῖται, δ Συμαερ(ε)λ) occurs in Nu 26³². See, further, art. MANASSEH, vol. iii. p. 231 f.

SHEMINITH.—See art. PSALMS, p. 154^b.

SHEMIRAMOTH (שְׁמִירָמוֹת; in 2 Ch 17⁸ *Kēthēdh* שְׁמִירָמוֹת; Σεμ(ε)ραμώθ).—The name of a Levitical family. In 1 Ch 15¹⁸, 30 16⁵ Shemiramoth appears in the list of the members of David's choirs, while in 2 Ch 17⁸ the same name occurs amongst the Levites sent by Jehoshaphat to teach in the cities of Judah. In both cases a guild or family rather than an individual is probably to be thought of.

SHEMUEL (שְׁמוּעַל, the name which, following the LXX and Vulg., is, in the case of the prophet, transliterated in EV *Samuel* [AV has *Shemuel* in 1 Ch 6²⁵; on the derivation and meaning of the name see art. SAMUEL, and Gray, *HPN* 200, n. 3]).—1. The Simeonite appointed to assist in the dividing of the land, Nu 34²⁰. It is not improbable that the MT should be corrected to שְׁלֹמִיֶּלֶךְ (*Shelumiel*); the form in 1⁶ 21¹² 7³⁶, 41 10¹⁹. The LXX in all the six passages has Σαλαμιήλ. 2. Grandson of Issachar, 1 Ch 7² (B Ἰσαμονήλ, A and Luc. Σαμονήλ).

SHEN (שֵׁן *hash-shēn*, the 'tooth' or 'crag'; *τῆς παλαιᾶς; Sen*).—A well-known place, 'the *Shen*,' named with Mizpah to indicate the position of the stone, called Ebenezer, which was set up by Samuel to commemorate the defeat of the Philistines (1 S 7¹²). The site is unknown. It is not improbable, however, that the LXX *τῆς παλαιᾶς* puts us on the track of the original reading, *שֵׁן* or *שֵׁן* (Jeshanah, 2 Ch 13¹⁹). So Wellh., Driver, Budde, *et al.*; cf. art. EBENEZER.

C. W. WILSON.

SHENAZZAR (שְׁנַזָּר; BA *Savazzar*, Luc. *Savazzar*).—A son of Jeconiah, 1 Ch 3¹⁸. See, further, SHESHBAZZAR.

SHEOL.—See ESCHATOLOGY, HADES, and HELL.

SHEPHAM (שֵׁפָם; Σεφάμαρ; *Sephama*).—A place on the eastern boundary of the Promised Land (Nu 34¹⁰, 11), and apparently to the north of Riblah, now *Ribleh*, between *Baalbek* and *Homs*. The site has not yet been identified. In the Targum of pseudo-Jonathan the name is rendered by *Apameia*, but this place is much too far to the north. Perhaps Zabdi, the *Shiphmite*,—one of David's household who was 'over the increase of the vineyards for the wine-cellars' (1 Ch 27²⁷),—was a native of Shepham. So Siegfried-Stade, who would vocalize *שֵׁפָם* instead of *שֵׁפָם*. But see SIPHMOTH.

C. W. WILSON.

SHEPHATIAH (שֵׁפַתְיָה and שֵׁפַתְיָה 'Jah has judged').—1. One of David's sons, 2 S 3⁴ (B *Safareid*, A *Safarid*, Luc. *Safaridas*)=1 Ch 3³ (B and Luc. as before, A *Safaridas*). 2. A family of which 372 representatives returned with Zerubbabel, Ezr 2⁴ (B *Asaf*, A and Luc. *Safarid*)=Neh 7⁹ (*Safarid*), and 84 besides their head with Ezra, Ezr 8⁸ (*Safar(e)id*). The name appears in 1 Es 5⁹ as *SAPHAT* and in 8⁴ as *SAPHATIAS*. 3. A family of the 'sons of Solomon's servants,' Ezr 2⁵⁷=Neh 7³⁹ (*Safar(e)id*). 4. The eponym of a Judahite family, Neh 11⁴ (BA *Safarid*, Luc. *Safaridas*). 5. The eponym of a Benjaminite family, 1 Ch 9⁸ (*Safarid*). Either this or the preceding should perhaps be identified with No. 2

above. 6. A contemporary of Jeremiah, Jer 38 [Gr. 45]¹ (BA *Safaridas*, Q² *Safar*, Q² *Safaridas*). 7. A Benjamite warrior who joined David at Ziklag, 1 Ch 12⁵ (*Safarid*, Luc. *Safaridas*). 8. A Simeonite prince, 1 Ch 27¹⁶ (*Safaridas*). 9. A son of king Jehoshaphat, 2 Ch 21² (*Safar(e)las*).

J. A. SELBIE.

SHEPHELAH.—See PLAIN, vol. iii. p. 893 f.

SHEPHER.—Mount Shepherd (שֶׁפֶרַח הָרִי) is a station in the journeyings of the children of Israel, mentioned only Nu 33²³, 24. Nothing is known about its position.

In both verses שֶׁפֶרַח being in pause is pointed *Shapher*, the form that appears in AV. The LXX in B Luc. has *Safar*, taking no account of 'mount,' which is represented in A by *Αφάρα* and *Σαφάρα*, and in F by *Αφάρα*; Vulg. has *Sepher*. The word (which means 'beauty') occurs (as a noun) only in Gn 49²¹ 'giving goodly words' (words of beauty or elegance); but see Dillmann or Spurrell, *ad loc.*, for an alternative rendering of this verse.

A. T. CHAPMAN.

SHEPHERD.—See SHEEP.

SHEPHI (שֶׁפִּי; B *Saf*, A *Safar*, Luc. *Safar*), 1 Ch 1⁴⁰; or **SHEPHO** (שֶׁפֹּה; A *Saf*, D *Safar*, E *Saf*, Luc. *Safar*), Gn 36².—A Horite chief.

SHEPHUPHAM (שֶׁפֻּחַם; BA *Safar*, Luc. *Safar*), Nu 26³⁰ (43); or **SHEPHUPHAN** (שֶׁפֻּחָן; B *Safar*, A *Safar*, Luc. *Safar*), 1 Ch 8².—The eponym of a Benjamite family. The name appears in Gn 46²¹ as *MUPPIM* and in 1 Ch 7¹², 15 26¹⁶ as *Shuppim*. The proper form of the name must remain doubtful. The gentilic *Shuphamites* (שֶׁפֻּחִים, BA *δ Σαφαν(ε)λ*, Luc. *δ Σαφαν(ε)λ*) appears in Nu 26³⁰ (43).

SHERD.—See POTSDERD.

SHEREBIAH (שֶׁרֶבְיָה;—One of the Levites who joined Ezra at the river Ahava, Ezr 8¹⁸ (LXX om.). Along with eleven others, he was put in charge of the silver and gold and the vessels for the temple, v. 24 (BA *Safarid*, Luc. *Safaridas*). He assisted Ezra in the exposition of the law, Neh 8⁷; took part in the public confession and thanksgiving, 9⁴; and sealed the covenant, 10¹² (13) (B *Safarid*). He is named also in 12²⁸, 24. In all these last passages except 10¹² (13) BA have *Safarid*, Luc. *Safaridas*. The name appears in 1 Es 8⁴ as *ASEBEBIAS*, v. 64 *ESEREBIAS*, and 9⁴ *SARABIAS*.

SHERESH (שֶׁרֶשׁ; B *Souros*, A *Suros*, LXX *Φάρερ*, Φόρος).—The name of a Manassite clan, 1 Ch 7¹⁴. See MANASSEH, vol. iii. p. 232^b.

SHERIFF.—In Dn 3², 'sheriffs' is the EV tr. of Aram. *ܫܪܝܫܝܢ*, a word of quite uncertain meaning. Bevan and Driver regard it as improbable that it has any connexion with the Arab. *ʿasfa* 'to notify a decision of the law' (ptep. *mufti*, 'a jurisconsult'). This supposed connexion probably underlies the RVm 'lawyers.' Bevan thinks it possible that the word may be a mutilated form of some Persian title ending in *pat* 'chief.' For an account of other conjectures see Driver or Prince, *ad loc.* Perhaps Theod. and LXX render by *οἱ ἐν ἑξουσίᾳ*, but it is impossible to be certain, as their text contains only seven names of officials as against eight in the Aramaic text.

J. A. SELBIE.

SHESHACH (שֶׁשַׁח).—This name, which occurs only in Jer 25 (32)²⁶ 51 (28)⁴¹ (LXX om. in both passages), is generally taken to be a designation of Babylon (cf. the parallelism in the latter passage: 'How is Sheshach taken, and the praise of all the earth surprised! How is Babylon become a desolation among the nations!'). It is probable, in fact, that *Sheshach* is simply a cryptical way of writing *Babel*. By the device known as *Atbash*

(שש) whereby ש=ח, כ=ט, and so on, the last letter of the Heb. alphabet being substituted for the first, the second last for the second, etc., שש would be written for כלב. An example of the same thing should probably be discovered in עב לב of Jer 51 (28)¹, which apparently has been substituted for an original כשלב (LXX Χαλδαίους). See, further, A. Berliner, *Beiträge zur Heb. Gramm. aus Talmud und Midrasch*, pp. 12-14. It is right to add that Frd. Delitzsch (*Paradies*, 214 ff.) rejects this explanation of Sheshai, holding that it represents Šiś-kū-KI of an ancient Bab. regal register, which may have stood for a quarter or division (perhaps Borsippa) of the city of Babylon (cf. Lauth in *PSBA*, 1881, p. 47 f.). Schrader (*KAT*² 415 [COT ii. 108 f.]) objects that the name quoted by Delitzsch is not found in the later Bab. literature (dating from the time of Nebuchadnezzar), and that even the reading of the name is by no means settled.

J. A. SELBIE.

SHESHAI (ששאי).—A clan, possibly of Aramaic origin, resident in Hebron at the time of the Hebrew conquest and driven thence by Caleb (Nu 13²³ B Σεσαι, A Σεμει; Jos 15¹⁴ B Σουσαι, A Σουσαι; Jg 1¹⁰ B Σεσαι, A Γεθθι). See, further, AHIMAN, No. 1.

SHESHAN (ששן).—A Jerahmeelite, who, having no sons, gave his daughter in marriage to his Egyptian slave Jarha, 1 Ch 2²¹. 24. 25 (A has Σωσαν, Luc. Σωσαν, throughout; B has Σωσαν in v. 24 bis, elsewhere Σωσαν).

SHESHBAZZAR (ששבתצר).—There is some uncertainty as to the correct form of this name, and still more as to the identity of the man who bears it in the MT.

Ezr 1⁸ B Σαβαζαζαρ, A Σαβαζαζαρος, Luc. Σαβαζαζαρος, which is read by Luc. throughout Ezra.
 „ 111 B om., A Σαβαζαζαρ.
 „ 514 B Βαζαζαρ, A Σαβαζαζαρος.
 „ 516 B Σαβαζαζαρ, A Σαβαζαζαρος.
 1 Es 2¹² (11) B Σαβαζαζαρος, A Σαβαζαζαρος, which is read by A throughout 1 Esdras, Luc. Σαβαζαζαρος.
 „ 215 (14) B Σαβαζαζαρος, Luc. Σαβαζαζαρος.
 „ 618 (17) B Σαβαζαζαρος, Luc. Σαβαζαζαρος.
 „ 620 (19) B Σαβαζαζαρος, Luc. Σαβαζαζαρος.
 Josephus exhibits a similar variety: 'Αβισσαρος, Σαβασαρος, Σαβαζαζαρος, Σαβαζαζαρος.

The above variations (apart from Βαζαζαρ and Σαβαζαζαρ) may be reduced to two types: (1) Sheshbazzar or Sasab(al)azzar, (2) Sanabazzar. If we adopt the first of these, the name may stand for Bab. *Samas-bil* [or *-bal*] *-uzur*, 'O sun-god protect the lord [or the son]'; so van Hoonacker (*Zorobabel*, 43; *Nouvelles études*, 30; cf. *Academy*, 30th Jan. 1892), followed by Wellhausen (*IJG*³ 153 n.), Cheyne (*Academy*, 6th Feb. 1892), Ryle (*Ezra and Nehemiah* in Camb. Bible, 32), Sayce (*HCM* 539), et al. The Sanabazzar type, again, may represent an original *Sin-bal-uzur*, 'O moon-god protect the son'; so esp. Ed. Meyer (*Entstehung des Judenthums*, 77), cf. also Sayce (*l.c.*).

Sheshbazzar is mentioned in Ezr 1⁸. 11 (the work of the Chronicler, who has just quoted what purports to be an edict of Cyrus authorizing the return of the Jews and the rebuilding of the temple) as entrusted by Cyrus with the vessels of the house of the LORD which had been carried away by Nebuchadnezzar, and which were now to be restored. These vessels are said to have been brought up by Sheshbazzar 'when they of the captivity were brought up from Babylon unto Jerusalem' (cf. 1 Es 2¹². 15). The same particulars regarding him are repeated in 5¹⁴. 16 (where the Chronicler uses an Aramaic source, which professes to contain a transcript of the letter of Tattenai and others to Darius), in which he bears the familiar Bab.-Assyr. title *pehah* ('governor'), and is said, further, to have laid the foundations of the temple (cf. 1 Es 6¹⁸. 20).

It is probably * Sheshbazzar also that is called in Ezr 2⁶³ (= Neh 7⁶⁵), Neh 7⁷⁰ by the Persian title *tirshāthā*.

It is a very difficult question whether Sheshbazzar is to be identified with Zerubbabel. Their identity was commonly accepted till lately, and has still the support of weighty names,[†] but the tendency of modern scholars[‡] is to deny it.

In favour of the identification (which appears to be made by Jos. Ant. XI. i. 3) the two strongest arguments are (a) the occurrence elsewhere (e.g. 2 K 23³⁴ 24¹⁷, Dn 1⁷) of double names, and (b) the fact that the laying of the foundation of the temple which in Ezr 3⁸ is ascribed to Zerubbabel is in 5¹⁶ ascribed to Sheshbazzar.

But in answer to (a) it may be urged that the case of Daniel and his companions is not strictly parallel, for there we have native names (Daniel, Hananiah, etc.) and foreign names (Belteshazzar, Shadrach, etc.), whereas Zerubbabel (which see) and Sheshbazzar are in all probability both foreign (sc. Babylonian) names. The names in 2 K 23³⁴ 24¹⁷ really furnish an argument against identifying Sheshb. with Zerubbabel. It is true that in Eliakim-Jehoiakim and Mattaniah-Zedekiah we have two couples of Hebrew names, but the author of these passages at least takes care to let us know that Eliakim is identical with Jehoiakim, and Mattaniah with Zedekiah, just as in Jg 7¹ we read 'Jerubbaal which is Gideon,' and in Dn 2²⁰ 4¹⁹ 'Daniel whose name was Belteshazzar.' In view of the usage elsewhere, it is surely strange (and van Hoonacker's argument, with all its skill and ingenuity, does not, to our mind, remove the strangeness) that in Ezr 3² there is not a hint by the Chronicler that Zerubbabel, who then comes upon the scene for the first time, is identical with Sheshbazzar, who had been mentioned in 1⁸. Moreover, it is hard to believe (and here again van Hoonacker's argument appears to us unconvincing) that Zerubbabel could be spoken of in 5² and Sheshbazzar in 5¹⁴. 16 in the way they are, if the two names stood for one and the same person. §

As to (b), reason will be shown in art. ZERUBABEL for suspecting that Ezr 3⁸ and 5¹⁶ both antedate the laying of the foundation of the temple, transferring it from the second year of Darius Hystaspis (B.C. 520) to the second year of Cyrus (537). But whatever view be held as to that, the identity of Sheshb. with Zerub. does not appear to us to follow from a comparison of 3⁸ with 5¹⁶. All that we need to assume is that the two returned from Babylon at the same time, and that Sheshb. was the official head (*pehah*) of the community, while Zerub. was the moving spirit in the rebuilding of the temple, whatever may have been the date when this work was undertaken. If Ezr 3⁸ (the Chronicler's own account) and 5¹⁶ (a professedly official account) be historical, they contain the names, respectively, of the actual (Zerubbabel) and the official (Sheshbazzar) founders of the temple.

Assuming, now, that the two names designate two different men, was Sheshbazzar a foreigner or

* Unless one holds with Koster that the list of names in this passage really belongs to Nehemiah's time, and that the *tirshāthā* is Nehemiah himself.

† Notably van Hoonacker (*Zorobabel et le second temple*, 29 ff.; cf. his *Nouvelles études sur la restauration Juive*, 30, also 'Notes sur l'hist. de la restauration Juive' in *RB*, Jan. 1901, p. 7 ff.) and Ryle (*Ezra and Nehemiah*, xxxi. 12 f.). Kuenen (*Onderzoek*² [1887], 437, 468, 503) was also at one time disposed to favour the identification, although latterly he abandoned it. See next note.

‡ Stade (*GVI* ii. 98 ff.), Kuenen (*Gesam. Abhandl.* 213 ff.), Renan (*Hist. du peuple d'Israël*, iii. 519 f.), Smend (*Listen*, etc., 19), Koster (*Het herstel van Israël*, 32 ff.), Wellh. (*IJG*³ 158), Sayce (*HCM* 539), and many others.

§ We refrain from citing, as an argument against the identification, the occurrence of the two names together in 1 Es 6¹⁸ (17) (*Σαβαζαζαρ και Σαβαζαζαρος*), because it is probable that the first of these names is interpolated (note the following sing. pronoun αὐτοῦ).

a Jew? It has been contended (by de Sauley, Stade, *et al.*) that he was a Persian. But his Babylonian name does not increase the probability of this view, and the appointment of a Jew to head the return and to act as *pehah* of Judah would be quite in harmony with the policy of Cyrus towards the conquered races of the empire he had overthrown. Hence the view has lately been gaining ground that he was a Jew (Ed. Meyer, Wellh., Cheyne, *et al.*). It is a tempting suggestion, although of course it has not been made out, that Sheshbazzar is the SHENAZZAR of 1 Ch 3¹⁸, one of Jehoiachin's sons and uncle of Zerubbabel (Imbert, Renan, Kisters, Ed. Meyer, *et al.*)*. If this were so, it would justify the epithet 'prince of Judah' (יהודה) applied to him in Ezr 1⁸, a title which those who take him to be a foreigner have to explain as due to a mistake (Kuenen) or an intentional transformation on the part of the Chronicler. The nephew rather than the uncle appears from the first to have played the leading rôle, and his services, especially in connexion with the rebuilding of the temple, gave him such a place in the memories of his countrymen that in Ezr 2² (= Neh 7⁷) Zerubbabel stands at the head of the list, while Sheshbazzar [may the heathenish character of his name have also given offence to the puritan zealots who compiled the list?] is not mentioned at all.

How long Sheshbazzar held office is uncertain, but at all events in the second year of Darius Hystaspis (B.C. 520) he had given place to Zerubbabel, who is known from contemporary evidence (Hag 1¹⁻¹⁴ 2²) to have been then *pehah* of Judah. See, further, ZERUBBABEL, and the Literature cited at end of that article. J. A. SELBIE.

SHETH.—In Nu 24¹⁷ (only) AV and RVm tr. שֶׁת בָּנֵי 'children (sons) of Sheth' (LXX Σῆθ, Vulg. Seth), but there can be little doubt that the correct tr. is that of RV, 'sons of tumult.' In that case שֶׁת would stand for שָׁת (from root שָׁת), and would be = שָׁת of the parallel passage Jer 48⁴⁵ (AV and RV 'tumultuous ones'). G. Hoffmann (ZATW iii. 97) takes שֶׁת to be a textual error for שָׁת, which he supposes in both these passages as well as in Am 2¹ (שָׁת) to be a Moabite place-name, perhaps that of the acropolis of Ar. See, further, Dillm. on Nu 24¹⁷.

SHETHAR (שֶׁתָּר, B⁹ Luc. Σαρθαβαῖος, Α Σαρσθεος).—One of the seven princes who 'sat first in the kingdom' and had the right of access to the royal presence (Est 1¹⁴, cf. ADMATHA). The derivation and meaning of the name, which is presumably Persian, cannot be determined.

SHETHAR-BOZENAI (שֶׁתָּר בִּזְנַי [meaning doubtful]).—Named along with TATTENAI and others in connexion with the correspondence with Darius about the rebuilding of the temple, Ezr 5⁸, 6⁶, 13 (B Σαθαρβουζανά except in 6¹³ Σαθαρβουζάν; A Σαθαρβουζανά in 5⁸ 6¹³, Σαθαρβουζάνης in 5⁸, Σαθαρβουζάνε in 6⁶; Luc. throughout Σαθαρβουζανάος), called in 1 Es 6³, 7, 27 7¹ SATHRABUZANES.

SHEYA.—1. (שֵׁיָא; B Σαού, A Σαούλ, Luc. Σουέ) A son of Caleb by his concubine, Maacah, 1 Ch 2⁴⁹. See Wellh. *de Gentibus*, 18, note 1. 2. See SHAVSHA.

SHEW.—Both verb and subst. (always spelt 'shew,' the modern spelling 'show' had not yet come in; both are found in early copies of Hooker, though 'shew' is even then most frequent) are used in AV with greater freedom than now.

For the verb we find: 1. *Make to see* (or of

* It is scarcely worth mentioning that a Jewish tradition (Jalkut on Ezr 1) identifies Sheshbazzar with Daniel.

things *make to be seen*), literally, as now. Thus Ex 33¹⁸ 'I beseech thee, shew me thy glory'; Jn 14⁸ 'Lord, shew us the Father.' So Bacon, *Essays*, 'Of Death' (Gold. Treas. ed. p. 6), 'Groanes and Convulsions, and a discoloured Face, and Friends weeping, and Blackes, and Obsequies, and the like, shew Death terrible.' 2. *Make to be seen figuratively, declare, reveal* (cf. Driver, *Daniel*, pp. 18 f., 47; *Par. Psalt.* 481). Thus 1 S 22¹⁷ 'They knew when he fled, and did not shew it to me' (וְלֹא הִשְׁתַּחֲסֵם לִי); LXX οὐκ ἀπεκάλυψεν τὸ ὄριον μου; Vulg. non indicaverunt mihi; RV 'did not disclose it to me'; Job 32¹⁰ 'Hearken to me; I also will shew mine opinion'; Ps 19² 'Night unto night sheweth knowledge'; Sir 37²⁰ 'There is one that sheweth wisdom in words, and is hated'; 1 Co 11²⁶ 'Ye do shew (καταγγέλλετε, RV 'ye proclaim') the Lord's death till he come'; 15¹ 'I shew you a mystery' (λέγω, RV 'I tell'). Cf. Shaks. *All's Well*, iv. i. 93—

'O, let me live!

And all the secrets of our camp I'll show.'

3. *To give or do something to one—a natural extension of the general sense cause to appear.* Thus Ac 4²² 'The man was above forty years old, on whom this miracle of healing was shewed' (Gr. ἐγερθῆναι, edd. γέγονει, RV 'was wrought'); 24²⁷ 'Felix, willing to shew the Jews a pleasure, left Paul bound' (θέλων τε χάριτας [edd. χάριτα] καταθέσθαι, RV 'desiring to gain favour with'). Cf. *Babes Book*, 2—

'And eke, o lady myn, Faceia!

My penne thou guyde, and helpe unto me shewe.'

The subst. means: 1. *Outward appearance*, Is 3⁹ 'The shew of their countenance doth witness against them' (שֶׁמֶת פְּנֵיהֶם, RVm 'their respecting of persons'); Sir 43¹ 'The beauty of heaven, with his glorious shew' (ἐν ὁράματι δόξης, RV 'in the spectacle of its glory'); Gal 6¹² 'As many as desire to make a fair shew in the flesh' (ἐν σαρκοσχησάι). Cf. *Pref. to AV*, 'Some peradventure would have no variety of senses to be set in the margine, lest the authoritie of the Scriptures for deciding of controversies by that shew of uncertainty, should somewhat be shaken'; and Drayton, *Sol. Song*, ch. 5—

'His eyes be like to doves'

On rivers' banks below,

Ywashed with milk, whose collours are

Most gallant to the shew.'

2. *Spectacle*, Col 2¹⁵ 'He made a shew of them openly' (ἐδειγμάτισεν ἐν παρηργίᾳ). Cf. Ezk 12⁶ Cov., 'Hyde thy face that thou see not the earth, for I have made the a shewtoken unto the house of Israel.'

3. *Semblance*, Ps 39⁶ 'Surely every man walketh in a vain shew' (שֶׁמֶת, RVm [implying false etym. connexion] 'as a shadow'); Col 2²⁵ 'which things have indeed a shew of wisdom' (λόγον σοφίας). Cf. Fuller, *Holy State*, 158, 'Travell not too early before thy judgement be risen, lest thou observest rather shews than substance, marking alone pageants, pictures, beautiful buildings,' etc.

4. *Pretence*, Lk 20⁴⁷ 'Which devour widows' houses, and for a shew make long prayers' (προφάσει, RV 'for a pretence'). Cf. Purchas, *Pilgrimage*, 386, 'In shew to keepe the straits, in deed to expect the event'; and *Paraph.* 25¹⁰—

'Who can his generation tell?

From prison see him led!

With impious shew of law condemn'd

And number'd with the dead.'

Shewing is used as a subst. in Lk 1⁸⁰ 'Till the day of his shewing unto Israel' (ἕως ἡμέρας ἀναδείξεως αὐτοῦ). The Eng. word is quite unusual, and is simply a literal tr. (after Vulg. *ostensio* and Wyclif's 'schewynge') of the Gr. ἀνδείξεις, which does not occur elsewhere in NT. On comparing Lk 10¹ 'The Lord appointed (ἀνέδειξε) other

corrupt, but capable with the help of the LXX of easy emendation, we read thus (as emended): 'In front of the sanctuary [this also=P's 'Holy of Holies'] was something like an altar of wood, three cubits in height, and the length thereof two cubits, and the breadth two cubits; and it had corners, and its base and its sides were of wood. And he said unto me: This is the table that is before Jⁿ' (Ezk 41^{21, 22}; so substantially Cornill and all recent commentators). Here, then, we have not the altar of incense, but once more the table of shewbread. The twofold circumstance that it is here expressly termed an altar, and is of plain wood without a gold covering, is a strong argument in favour of Stade's restoration of the text of 1 K, discussed above. Ezekiel's table of shewbread resembled in its general outline the similar altars so often seen on the Assyrian monuments (see last section); its height was half as much again as its length, and in section it formed a square of at least 3 ft. in the side. The projections or 'horns' were, no doubt, similar to those of the Assyrian altars (see, e.g., Perrot and Chipiez, *History of Art in Chaldea and Assyria*, i. pp. 143, 255, etc.).

In the temple of Zerubbabel, consecrated in the 6th year of Darius (B.C. 516), the table of shewbread, we may safely infer, had its place in the outer sanctuary, although we have no information as to whether or not it was modelled on Ezekiel's altar-table. After the introduction of the Priests' Code it may have been remodelled according to the instructions there given (Ex 25^{23a}); we may at least, with some measure of certainty, suppose that it was then overlaid with gold, since Antiochus Epiphanes, when he carried off the spoils of the temple (1 Mac 1²²), would scarcely have taken the trouble to remove a plain wooden altar. The well-informed author of 1 Maccabees, in the passage cited, includes among the spoils not only the table itself, but 'the flagons and chalices and censers of gold' used in the ritual of the table (see for these art. TABERNACLE, section on Table of Shewbread). The provision of the shewbread, it should be added, was one of the objects to which were devoted the proceeds of the tax of one-third of a shekel instituted by Nehemiah (10³², cf. Jos. *Ant.* III. x. 7, § 255).

Here attention may be called to two non-canonical Jewish writers who allude to the subject of this article. The earlier of the two is pseudo-Hecataeus, whose date is usually assumed to be the 3rd cent. B.C. (Schürer, *GP* 3 iii. 465; but Willrich, *Juden u. Griechen*, etc., 20 f., argues for a date in the Maccabean period). This writer, in a passage preserved for us by Josephus (c. *Apon.* i. 22), describes the second temple as 'a large edifice wherein is an altar (*βωμὸς*), and a candelabrum (*καύσων*), both of gold, two talents in weight.' The former term, in the light of what has been said above with regard to the altar-tables of Solomon and Ezekiel, we must identify with the table of shewbread. The other writer referred to is pseudo-Aristaeus, whose date falls within the century 200-100 B.C. In his famous letter, purporting to give an account of the origin of the Alexandrian version of the OT, he gives the rein to a lively imagination in his description of a shewbread table of unexampled magnificence—all of gold and precious gems, and of unsurpassed artistic workmanship—which Ptolemy Philadelphus is said to have presented to the temple at Jerusalem (see Wendland's or Thackeray's edition of Aristaeus' letter—tr. by the former in Kautzsch's *Apokryphen u. Pseudepigraphen*, ii. 6 ff.). This table is admitted to have had no existence outside the pages of Aristaeus.

To resume the thread of our narrative, we find that on the re-dedication of the temple (B.C. 165) Judas Maccabaeus had new furniture made, including the shewbread table (1 Mac 4⁴⁹).—now, we may be sure, constructed in entire conformity to the requirements of Ex 25^{23a}.—upon which the loaves were duly set forth (v. 61). This table continued in use till the destruction of the temple by Titus in A.D. 70. Rescued from the blazing pile, it figured along with the golden candlestick and a roll of the law in the triumph awarded to the

victorious general (Jos. *BJ* vii. v. 3-7, esp. 5, § 148). Thereafter, these were all deposited by Vespasian in his newly built temple of Peace (*ib.* v. 7), while a representation of the triumph formed a conspicuous part of the decoration on the Arch of Titus, erected subsequently. Few remains of classical antiquity have been so frequently reproduced as the panel of the arch on which are depicted the table and the candlestick, borne aloft on the shoulders of the Roman veterans (see illustration under MUSIC, vol. iii. p. 462). Both seem to have remained in Rome till the sack of the city by Genseric, king of the Vandals, in 455, by whom they were transferred to Carthage, the site of the new Vandal capital in Africa. From Carthage they were transferred to Constantinople by Belisarius, in whose triumph they again figured. On this occasion a Jew, it is said, working on the superstitious awe felt by Justinian for these sacred relics, induced the emperor to send them back to Jerusalem. They probably perished finally in the sack of Jerusalem by Chosroes, the Persian, in 614 (see Reinach, 'L'Arc de Titus,' in *REJ* 20, p. lxxxv f., in book form, 1890; Knight, *The Arch of Titus*, 112 ff.).

iv. PREPARATION OF THE SHEWBREAD.—According to the express testimony of Josephus (*Ant.* III. vi. 6), the Mishna, and later Jewish writers, the shewbread was unleavened. Nor does there seem to be any valid ground for the assertion, frequently made by recent writers, that it was otherwise in more primitive times. The absence of leaven best suits the undoubted antiquity of the rite, and, moreover, is confirmed by the Babylonian practice of offering 'sweet' (i.e. unleavened) bread on the tables of the gods (see below). The material in all periods was of the finest of the flour (Lv 24⁵), which was obtained, according to *Menahoth* (vi. 7), by sifting the flour eleven times. The kneading and firing of the loaves in the time of the Chronicler was the duty of the 'sons of the Kohathites,' a Levitical guild (1 Ch 9²²); in the closing days of the second temple their preparation fell to the house or family of Garmu (*Yoma* iii. 11, *Shekal.* viii. 1). The quantity of flour prescribed by the Priests' Code for each loaf (הָלָלָה *hallāh*) was 'two tenth-parts of an ephah' (Lv 24⁵ RV), which—reckoning the ephah roughly at a bushel—represents about 3/4ths of a peck (c. 7½ litres), a quantity sufficient to produce a loaf of considerable dimensions, recalling the loaves which gave their name to the Delian festival of the *Μεγαλόπρια*.

In the earlier period, at least, the loaves were laid upon the table while still hot (1 S 21⁶). The later regulations required that they should be arranged in two piles (בְּקֶרֶת, see sect. i. above). On the top of each pile, apparently,—on the table between the piles, according to another tradition,—stood a censer containing 'pure frankincense for a memorial' (זִכָּרֹן, for which see comm. on Lv 24⁷), even an offering by fire unto the LORD.* Alexandrian writers give salt in addition (Lv i. c. in I.XX; hence, doubtless, Philo, *Vit. Mos.* ii. 151). The stale loaves, by the same regulations, were removed and fresh loaves substituted every Sabbath. According to *Sukka* (v. 7 f.), one half went to the outgoing division of priests, the other to the incoming division, by whom they were consumed within the sacred precincts.* In order to avoid repetition, further examination of the details given by post-biblical Jewish writers—many of them clearly wide of the mark—regarding the shape and size of the loaves and their arrangement on the table, as well as regarding the nature and purpose of the vessels mentioned, Ex 25²³, Nu 4⁷, is reserved for the section on P's table of

* It is a mere conjecture that the shewbread was originally burned (Stade, *Akadem. Reden*, etc., 180, note 15).

shewbread and its vessels in the general article **TABERNACLE**.

V. SIGNIFICANCE OF THE RITE.—The rite of 'the presence-bread' is one of the fairly numerous survivals from the pre-Mosaic stage of the religion of the Hebrews, and goes back ultimately to the naïve conception that the god, like his worshippers, required and actually partook of material nourishment. No doubt, as W. R. Smith has pointed out, this idea 'is too crude to subsist without modification beyond the savage state of society' (*RS* 1 212). In the case of the shewbread, it may be suggested that the odour of the 'hot bread' (לֶחֶם חֵם *l. s.* 216⁽⁷⁾) was regarded in ancient times as a 'sweet savour', like the smell of the sacrifice to J' (*Gn* 8²¹, *Lv* 23¹³). In any case the custom of presenting solid food on a table as an oblation to a god is too widespread among the peoples of antiquity to permit of doubt as to the origin of the rite among the Hebrews.

The *lectisternia*, which the Romans borrowed from the Greeks, afford the most familiar illustration of this practice (see Smith's *Dict. of Gr. and Rom. Antiqs.* s. v.). In the OT itself we hear of Jeremiah's contemporaries kneading cakes for the queen of heaven (*Jer* 7¹⁸), and, at a later date, of the table which even Jews spread to Fortune (*GAB*, *Is* 65¹¹ RV). In the religious literature of the ancient Babylonians, again, particularly in the ritual tablets to which the attention of scholars has lately been turned, we find numerous references to the various items of food and drink to be presented to the deities of the Babylonian pantheon. The tables or altars, also, on which the food was set out are frequently represented on the monuments (see, e.g., Benzinger, *Leb. Arch.* 387; Riehm's *HWB* 1. 143, etc.). And not only so, but, as Zimmern has recently shown, the loaves of sweet or unleavened bread thus presented are, frequently at least, of the number of 12, 24, or even as many as 36 (see the ref. in Zimmern's *Beiträge zur Kenntnis der Babylon. Religion*, 1901, p. 94 f.). These numbers, we can hardly doubt, have an astronomical significance, 12 being the number of the signs of the Zodiac, 24 the stations of the moon, and 36 those of the planets (see 2 K 23³ RVm, *Job* 38³², and art. *BABYLONIA* in vol. I. p. 218^a). The knowledge of this ancient practice of offering food on the tables of the gods survived to a late period; see *Epist. of Jereny*, v. 26^a, and the fragment of Bel and the Dragon (esp. v. 11; note also that the food of Bel comprised 'twelve great measures of fine flour'). Hence, if the loaves of the presence-bread were 12 in number from the earliest times,—though of this we have no early testimony,—we should have another of the rapidly increasing instances of early Babylonian influence in the West (cf. Josephus' association of the 12 loaves with the 12 months, *Ant.* iii. vii. 7).

While, however, it must be admitted that the rite of the presence-bread had its origin in the circle of ideas just set forth, it is not less evident that, as taken up and preserved by the religious guides of Israel, the rite acquired a new and higher significance. The bread was no longer thought of as J's food (לֶחֶם ה' in the sense attached to it in an earlier age, but as a concrete expression of the fact that J was the source of every material blessing. As the 'continual bread' (לֶחֶם עֹלָם *Nu* 4⁷), it became the standing expression of the nation's gratitude to the Giver of all for the bounties of His providence. The number twelve was later brought into connexion with the number of the tribes of Israel (cf. *Lv* 24⁶), and thus, Sabbath by Sabbath, the priestly representatives of the nation renewed this outward and visible acknowledgment of man's continual dependence upon God. The presence of the shewbread in the developed ritual, therefore, was not without a real and worthy significance. It may here be added, in a word, that the explanation of the shewbread hitherto in vogue among the disciples of Bähr, according to which the 'bread of the face' was so named because it is through partaking thereof that man attains to the sight of God, accords neither with the true signification of the term, nor with the history of the rite.

A. R. S. KENNEDY.

SHIBAH (שִׁבָּה; *LXX* ὄρκος [*O.L.* *iuramentum*]; *Aq.* Συμμ. πλησμονῆς [*Vulg.* *abundantia*]).—The well dug by Isaac, from which Beer-sheba took its name, *Gn* 26²¹ (J, who apparently makes שִׁבָּה = שִׁבְעָה 'oath'). The well, according to this view, derived its name from the 'swearing' (v. 21) of the

oath by which Isaac, on the one part, and Abimelech, with his friend Ahuzzath, and his chief captain Phicol, on the other, ratified the covenant they had made (vv. 26-33). According to another account, *Gn* 21²²⁻²¹ (E), the well was dug by Abraham, and Beer-sheba was so called because it was there that he and Abimelech 'swore both of them.' In the latter passage there is also manifestly a play upon the word שִׁבְעָה 'seven,' seven lambs having been used (v. 25^a) in the ceremony. For a description of the existing wells see *BEER-SHEBA*, and add to Literature: Gautier, *Expos. Times*, 1899, pp. 328 f., 478 f.; and esp. G. L. Robinson, *Bibl. World*, Apr. 1901, pp. 247-255 (with plan and photos.): an abstract at the end of Driver's *Joel and Amos*.

C. W. WILSON.

SHIBBOLETH (שִׁבְּוֶלֶת, *Jg* 12⁶).—The Ephraimite fugitives at the Jordan-fords betrayed themselves by pronouncing this word *shibboleth* (שִׁבְּוֶלֶת)—an interesting proof of the difference in dialect which distinguished the western tribes from those on the east of Jordan. By confusion of sounds *shibboleth* (שִׁבְּוֶלֶת) would become *sibboleth* (שִׁבְּוֶלֶת), and so *shibboleth* (שִׁבְּוֶלֶת); see Wright, *Comp. Gram.* p. 58. Etymologically ס (s) is quite distinct from ש (sh),* but the two are not infrequently confounded in Heb., e.g. שִׁבְעָה and שִׁבְעָה, *Ps* 44¹⁴ and שִׁבְעָה 2 S 1²², שִׁבְּוֶלֶת and שִׁבְּוֶלֶת *Ec* 1¹⁷ etc.; by using ס (s) rather than ש (sh), the author of *Jg* 12⁶ simply wished to make the sound as distinct from ש (sh) as possible. In illustration of this peculiarity of the Ephraimite speech, it may be noted that the Heb. ש (sh) as a

rule=the Arab. س (s), e.g. سَبْع, سبع; and vice

versa, the Heb. ש (s)=Arab. ش (sh), e.g. شَجَر, شجرة.

שִׁבְּוֶלֶת. Kimhi, in his commentary, *in loc.*, mentions another local peculiarity in the pronunciation of the sibilant: the people of Sarepta sounded ש (sh) as נ (th); so frequently Heb. ש (sh)=Arab. ث (th)=Aram. ܬ (th).

The Gr. versions of the passage are interesting: B εἰσὶν δὲ Σαδύχοι. καὶ οὐ κατεῖδον τὸν λαλῶντα αὐτοῖς; A εἰσὶν δὲ σὺνδύχοι. καὶ κατεῖδον αὐτὸν κ.τ.λ. In both, the Ephraimites' reply is omitted. 'Lucian' (ed. Lagarde): εἰσὶν δὲ σὺνδύχοι. καὶ εἶπον Σαδύχοι κ.τ.λ. Codd. 54, 59, 75, 82 (Moore, M): εἰσὶν δὲ σὺνδύχοι καὶ λίγοντες σὺνδύχοι οὐ κατεῖδον αὐτὸν κ.τ.λ. By σὺνδύχοι is meant 'watchword,' 'countersign'; see 2 Mac 8²² 13¹⁵. The Gr. versions, of course, could not imitate the change of the Heb. sibilants, as the Targ. and Syr. do. *Vulg. Dic ergo: Sibboleth, quod interpretatur epica. Qui respondet: Sibboleth, eadem littera epicam exprimere non valens.*

The meaning of the word is unimportant; it may be either 'ear of wheat' (Assyr. *subultu*), *Gn* 41⁵⁶, *Is* 17⁸ etc., or 'flood,' 'stream,' *Is* 27¹², *Ps* 69^{2, 15}. In the latter sense, which is suitable to the context, the word appears only in late passages; in this ancient story it would probably be understood 'ear.'

Marquart (*ZATW*, 1888, 151 ff.) attempts to prove that the Ephraimites did not pronounce ש (sh) as ש (s) (cf. the name of their chief town שִׁמְרֹנָה *Shomerōn*, Samaria), and that ש (s) could not pass into ס (s) in old Hebrew. He thinks that the Gileadites said שִׁבְּוֶלֶת (*shibboleth*) and meant 'flood,' but the Ephraimites said שִׁבְּוֶלֶת (*shibboleth*) and meant 'ear' (cf. תִּבְּוֶלֶת *Jerus. Targ. Gn* 41⁵⁶). This נ (th) was represented by ס (cf. י and בִּבְל. Aram. י) for want of a closer equivalent. But Marquart's arguments are not convincing, and have not generally been accepted. We have no means of knowing what the Ephraimite dialect was.

For parallels from European history see art. **JEPHTHAH**, vol. ii. p. 568 n. G. A. COOKE.

SHIELD (or **BUCKLER**) is EV tr. in OT of the following Heb. words. 1. (Most commonly) מָגֵן *māgin*, a small round shield, a buckler; the Gr.

* The exact relation between the two sounds is still undetermined; see Ges.-Kautzsch, *Heb. Gr.* p. 30, n. 2 (Eng. ed.).

δωρίς and Lat. *clipeus*. 2. *קָשׁ זִינְנָה*, a large oval or rectangular shield. 3. *קָשׁ שׁוֹהֶרָה*, 'buckler,' only in Ps 91 [90]⁴; the word, however, is probably a participle (LXX *κυκλώσει*); tr. with a slight emendation, 'His truth is an encompassing shield.' 4. *קָשׁ קִידֹן*, 'shield,' 1 S 17⁴⁰ AV, 'target' v.⁵ AV, similarly LXX; RV correctly 'javelin.' 5. *שָׁלָלִיִּם* *shēlālīm*, 'shields,' 2 S 8⁷ = 1 Ch 18⁷, 2 K 11¹⁰ = 2 Ch 23⁸, Ca 4⁴, Jer 51¹¹, Ezk 27¹¹ (only in these places, and only in the plur.), more correctly 'suits of armour,' Jer 51¹¹ RVm (see *Expository Times*, x. (1898) 43 ff.). *אֲגָלָה*, usually tr. 'wagon,' means in Ps 46⁹ [Heb.¹⁰] perhaps 'shield' (so LXX, Vulg., Targ.); EV, Jerome (*Psalter. iuxta Heb.*), Peshitta, 'chariots.' In the NT 'shield' occurs once, Eph 6¹⁶, as tr. of *θυρεός*, the large Rom. shield.

1. *Material and Construction.*—The material of which the shields known to the Hebrews were commonly made can only be inferred. Solomon prepared 200 'targets' (*קָשׁ*, i.e. large shields) and 300 'shields' (*קָשׁ*, i.e. bucklers), which were either made of gold or else heavily overlaid with gold (1 K 10^{16,17}). When these were carried off by Shishak, Rehoboam made 'brazen' (bronze) shields to take their place (*ib.* 14^{26,27}). The 'shields' found among the treasures of Hezekiah were also probably made of one of the precious metals, or at least adorned with it (2 Ch 32⁷).^{*} Both the golden shields and the bronze were probably used only for state ceremonial: the war shield was doubtless either like the Roman *scutum* of leather stretched over a wooden frame, or like the Persian *γέρρον* of wickerwork. That shields were largely composed of some inflammable substance may be inferred from such passages as Ezk 39⁹, Ps 46⁹ [45¹⁰] LXX (cf. Is 9⁹ RV). A shield was overlaid with plates, perhaps of bronze (cf. Job 41¹³ RVm, where the scales of the crocodile are compared with the plates of a shield); it was also furnished with a boss (cf. Job 15³⁰), such as is shown on the Assyrian reliefs, *passim*. The Assyrian shields were highly convex and sometimes round, sometimes irregular in shape, i.e. rectangular at the foot (for planting firmly against the ground) but pointed at the top.

2. *Use.*—The shield was kept in a case when not in use (Is 22⁵; cf. Aristophanes, *Ach.* 574, and Euripides, *Andr.* 617). It was anointed before battle to make its surface slippery (Is 21⁵; cf. Driver on 2 S 12¹, who quotes Vergil, *Æn.* vii. 626). In battle it sometimes had a 'red' appearance (Nah 2³ [4]), either because it was dyed red (A. B. Davidson, *ad loc.*), or because it was overlaid with burnished copper (Nowack, *Heb. Archæologie*, i. 364), or again because the leather itself might be described as 'red,' *אֲדָמָה* *ādōm* being applied to the colour of the human skin (La 4⁷). The large shield was much used in sieges as a stationary screen, from behind which the garrison on the walls might be assailed with arrows (2 K 19²² = Is 37³², Sir 37⁸ Heb.). A large shield was sometimes carried in battle by an attendant in front of his master (1 S 17⁴¹ Heb., LXX [A and Luc.], Peshitta, a verse om. in LXX B, but probably genuine). In times of peace shields were hung in armouries, to the admiration of beholders (Ca 4⁴, Ezk 27¹⁰).

3. *Metaphorical use of the term 'shield.'*—In the OT God's favour (Ps 51^{12,13}) and His faithfulness (Ps 91⁴ [90⁴]) are compared to a shield, cf. 'the shield of thy salvation' (Ps 18³⁰ [17³⁰]). By a still bolder metaphor in several other places God Himself is called the 'shield' (*קָשׁ*) of His people or of His saints: Gn 15¹, Dt 33²⁹, Ps 33⁴ [4] 18^{2,30} [17^{2,31}] 33 [32] 59¹¹ [58¹²] 84^{9,11} [83^{10,12}] 115⁹⁻¹¹ [113⁷⁻¹⁰], Pr 27³⁰ [24³⁰]. In all these passages the LXX tr. *κῆ* either by *ὑπερασπιστής* (once Ps 3⁴ by *ἀντιλήμπτωρ*) or by some form of the verb *ὑπερασίζω*. The Peshitta follows a similar course. It

^{*} But see note *ad loc.* in the Camb. Bible.

is true that *κῆ* taken as Hiphil partic. of *κῆ* is a possible *nomen agentis*, but it is probable that the Heb. metaphor was too bold for the Gr. and Syr. translators. Thus in Ps 84¹¹ [83¹²] the Heb. and Aq. give 'The LORD is a sun and shield,' while the LXX (followed by the Vulg.) timidly paraphrases *θεὸς καὶ ἀλήθειαν ἀγαπᾷ Κύριος*. Symm. (if rightly given in Field) is also timid, *ἡλιὸν γὰρ καὶ ὑπερασπιστὴν Κύριος* (a transitive verb, probably *δώσει* from the next clause, being understood). Jerome (*Psalter. iuxta Heb.*) gives 'Sol et scutum Dominus' here, and 'clipeus' in some other places quoted above, but in Ps 59¹¹ [12] 115⁹⁻¹¹ [17-19] he has 'protector' (= *ὑπερασπιστής*). Ben Sira (51^{12,10} Heb.) writes, 'Give thanks to the Shield of Abraham' (in allusion to Gn 15¹).

In the one passage of the NT in which 'shield' occurs, the word is metaphorically applied to Christian faith (Eph 6¹⁶ *ἀναλαβόντες τὸν θυρεὸν τῆς πίστεως, ὡς ἡλικία σcutum fidei*). In 1 Th 5⁸ the apostle had urged his converts to put on *θώρακα πίστεως καὶ ἀγάπης*, 'a coat of mail of faith and love' (see BREASTPLATE); but during his Roman imprisonment his imagination was struck with the great Roman shield, and he changed his metaphor, without, however, abandoning the thought that faith is the Christian's vital defence. In the OT (Ps 91 [90]⁴) God's faithfulness is man's shield: in the NT the identification of faith with the shield gives us the necessary complementary thought that on man's side faith is needed in order that God's proffered protection may be embraced.

W. EMERY BARNES.

SHIGGAION, SHIGIONOTH.—See art. PSALMS, p. 154^b f.

SHIHOR (שִׁיחֹר, שִׁיחֹר, שִׁיחֹר). — A word meaning 'black' or 'turbid,' from שִׁחֹר to be black (Ca 1⁵).

1. In 1 Ch 13⁸ Shihor of Egypt (*ὄρεα Αἰγύπτου*; *Sihor Egypti*) and the entering in of Hamath are mentioned as the southern and northern limits of the kingdom of Israel in the time of David. The same (or similar) limits recur in 1 K 8², where 'the wady (*nahal*) of Egypt' takes the place of 'Shihor of Egypt.' In Jos 13³ (*ἡ δολιχὸς ἡ κατὰ πρῶτον Αἰγύπτου, fluvius turbidus*) the southern limit of the land that had not been conquered when Joshua was grown old is said to have been 'the Shihor which is before Egypt,' and the northern one was the entering in of Hamath (v.³). Elsewhere the S.W. limit of the Promised Land is 'the wady of Egypt': Nu 34^{6,8}; cf. Ezk 47^{19,20} 48^{1,2,3}, and see EGYPT (RIVER OF). The southern boundary of Judah, also, which corresponded with that of the Promised Land, 'went out at the wady (*nahal*) of Egypt, and the goings out of the border were at the sea' (Jos 15⁴). In the same chapter (v.⁶) the territory of Judah is said to have extended 'unto the wady of Egypt and the great sea.' In each of the above passages the *nahal* referred to as forming the southern boundary of the Promised Land is the same, and it must have been a well-known and well-defined feature. Such a feature is found in the *Wady el-'Arish*, which, with its many branches, drains nearly the whole of the desert *el-Tih*. The '*nahal* of Egypt' (2 K 24⁷, Is 27¹²) and the '*ποταμός* of Egypt' (Jth 1⁹) are also of course the *Wady el-'Arish*. In Isaiah the LXX reads *Ῥινοκορούων*, now *el-'Arish*. Whether, however, this is the same as the Shihor is disputed. It is so taken by some (e.g. Knobel, Keil, König [*Fünf neue arab. Landschaftsnamen im AT*, 1902, p. 37]), but Del. (*Parad.* 311) and Dillm. regard it as the easternmost or Pelusiac arm of the Nile; while, according to Brugsch (*Steinschrift u. Bibelwort*, 153), it is *Shi-Hor*, or the 'Horus canal,' mentioned in lists of the Ptolemaic period as flowing by the border-city of Thiru or Tar (see under SHUR).

2. Shihor is certainly the NILE in 'the seed of Shihor' (Is 23³ σπέρμα μεταβδών [ἡρῶ confused with ἡρῶ; see vv. 2, 3b], *Nilus*); and in 'the waters of Shihor' (Jer 21⁸ ὕδωρ ἰσὺν (*aqua turbida*)).

C. W. WILSON.

SHIHOR-LIBNATH (נַחֲלֵי לִבְנָת; B τῷ Σειῶν καὶ Λαβανᾶθ, A Σειῶν κ. Λ.; *Sichor et Libanath*).—A natural feature near, and apparently to the south of, Carmel, to which the territory of Asher extended (Jos 19³⁶). Eusebius and Jerome (*Onom.*) take Shihor and Libnath to be two distinct places; but modern commentators consider Shihor-libnath to be a river. The meaning of Libnath is 'white,' and some authorities have taken the words to mean 'the glass river,' which they identify with the Belus (Plin. v. 19).—now the *Nahr Na'mān*,—a little south of Acre. The Belus, however, is to the north of Carmel, whilst the boundary of Asher included Dor (Jos 17¹¹), which lay to the south. The Shihor-libnath was most probably the *Nahr ez-Zerka*, which has been identified with the river Crocodileon (of Ptolemy, v. xv. 5, xvi. 2; Pliny, v. 19)—the southern boundary, according to Pliny, of Phoenicia (so Keil, Dillmann, *et al.*). *Shihor*, one of the names of the Nile (Is 23³, Jer 21⁸), may have been given to this river because there were crocodiles in it;—they are still found in the *Nahr ez-Zerka*.

C. W. WILSON.

SHIKKERON (שִׁכְרֹן; B Σοκχώ, A Ἀκκαρῶν; *Sechirona*).—A place on the northern boundary of Judah, mentioned between Ekron and Mount Baalah, the next place westward being Jabneel (Jos 15¹¹). The Targum has the form *Shicaron*, Eusebius (*Onom.*) Σαχωρά, Jerome (*Onom.*) *Sachorona*. The site is unknown (so Dillm.). Tobler (*Drit. Wand.* p. 25) identified it with *Khurbet Sukereir*; but this place lies between Jabneel (*Yebnah*) and Ashdod (*Esdūd*), and is about 4 miles south-west of Jabneel.

C. W. WILSON.

SHILHI (שִׁלְחִי; BA in 2 Chron. Σαλει, B in 1 Kings Σεμελ, A in 1 Kings Σαλαά, Luc. in both Σελελ).—Father of king Asa's wife Azubah, who was queen-mother in the reign of Jehoshaphat (1 K 22²³, 2 Ch 20³¹). It is unusual for the queen-mother's father to be named in the summaries of the earliest reigns. Besides Shilhi, Absalom (1 K 15, Abishalom) and (2 K 8^{18, 26}) Ahab (or Omri) are the only certain cases.

SHILHIM (שִׁלְחִים; LXX B Σαλή, A Σελείμ; Vulg. *Silim*).—A town of Judah, in the Negeb, or South, which is mentioned between Lebaoth and Ain (Jos 15³²). The site was unknown to Eusebius and Jerome (*Onom. s. Σαλει, Selei*), and has not yet been recovered. In the list of towns allotted to Simeon (Jos 19⁹) its place is taken by *Sharuhen*, and in 1 Ch 4³¹ by *Shaaraim* (see SHAARAIM, No. 2). From the reading of the LXX, it has been erroneously supposed that Shilhim and Ain are the Salim and Aenon of Jn 3². See SALIM.

C. W. WILSON.

SHILLEM, SHILLEMITES.—See SHALLUM, No. 7.

SHILOAH.—See SHELAH and SILOAM.

SHILOH (usually שִׁלֹה, 8 times שִׁלֹה, thrice שִׁלֹה, Gn 49¹⁰ [see the next art.] שִׁלֹה; originally, as the gentile שִׁלֹנִי 'Shilonite' shows, שִׁלֹן; LXX Σηλω, Σηλωμ, Jg 21^{12, 19, 21} B Σηλων).—The situation of Shiloh is, in Jg 21¹⁹, described with unusual minuteness: it is said to lie 'on the north of Beth-el, on the east side of the highway that goeth up from Beth-el to Shechem, and on the south of Lebōnāh.' The position of the modern *Seilān* corresponds exactly with this description: as the traveller now journeys along the great north road

which leads to Nāblus (the ancient Shechem), he passes Beitin (Beth-el) at 10 miles from Jerus.; at about 8 miles N. of Beitin (near Sinjil), if he turns to the right for about a mile, and then, at Turmus'Āya, turns northwards and crosses a small plain, he will see rising before him, at 9½ miles N.N.E. of Beitin, the large rounded Tell, on the summit of which is the ruined site of Seilōn; N. of the Tell runs the Wādy Seilōn, and going down this to the W. he will rejoin the high road at a point 10 miles N. of Beitin, and a little E. of *el-Lubbān*, evidently the Lebōnāh of Jg 21¹⁹, 3 miles N.N.W. of Seilōn. The most noticeable feature in the natural situation of Seilōn is its seclusion. 'On the E. and N. it is shut in by bare and lofty hills of grey limestone, dotted over with a few fig-trees; only on the S. it is open towards the plain just mentioned. The Tell on which Seilōn stands is some 1800 ft. in length from N. to S., and 900 ft. from E. to W.; the Wādy on the N. is a deep valley, in the sides of which are many rock-cut sepulchres; at the head of the valley on the E., about ½ mile from the Tell, there is a fine spring of water. The site consists of nothing more than 'the ruined houses of a modern village, with here and there fragments of masonry which may date back to Crusading times, especially one sloping scarp.' The vineyards (Jg 21^{20, 21}) of Shiloh have disappeared; but the traces of terraces, still visible on the sides of the Tell, show that once it was actively cultivated. Below the top of the hill, on the N. of the ruins, a kind of irregular quadrangle, some 400 ft. from E. to W., and 80 ft. from N. to S., has been hewn roughly out of the rock; it has been conjectured that this was the site of the ancient sanctuary (see below). Leaving the Tell on the S.E., traces of an ancient road, about 10 ft. wide, are visible. At the S.E. foot of the Tell there is a small disused mosque, shaded by a fine oak tree; and, some 500 yds. S.E. of this, a building which seems to have been once a synagogue, 37 ft. square, built of good masonry (see further particulars in Guérin, *Samarie*, ii. (1875) 21–23; *PEF Mem.* ii. 367–370, with a plan of the Tell; Conder, *Tent Work*³, 44–46).

Shiloh is mentioned frequently in the earlier history of Israel. It lay in the territory of Ephraim, 12 miles S. of Shechem. It was the spot at which, after leaving Gilgal, the ark and tent of meeting were stationed, and where also, according to tradition, Joshua divided the land by lot between the tribes (Jos 18^{8, 9, 10} JE; 18¹ 19²¹ 21² 22^{26, 12} P). It continued to be the principal Isr. sanctuary throughout the period of the Judges (cf. Jg 18³¹ 'all the time that the house of God was in Shiloh') till the age of Samuel (1 S 1–4). The narrative of Jg 21^{19–22}—which, whatever may be the case with some other parts of Jg 19–21, is certainly ancient—introduces us to a primitive stage of religious feeling and practice in Israel: we hear of 'Jahweh's pilgrimage,' held annually in Shiloh, and of the maidens of Shiloh coming out to dance in the choruses (cf. Ex 15²⁰ 32¹⁹); the feast, to judge from the terms in which it is spoken of, seems (like that of Shechem, Jg 9²⁷) to have been at this time hardly more than a local village festival, though it may have already been attended by pilgrims from the neighbourhood, and in 1 S 1–2 appears to have developed into an early form of what is called in JE the 'pilgrimage of Ingathering' (Ex 23¹⁶ 34²²), or (D, P, and later) the 'pilgrimage of Booths' (cf. Wellh. *Hist.* 94): on the particular occasion referred to, the Benjamites, laying wait for the women in the vineyards, captured them, and carried them home as wives. In 1 S 1–4 (cf. 14³, 1 K 2²⁷) Eli and his two sons are priests at Shiloh; the ark is still there, till it is carried off (4³⁶) to be a protection to the Israelites in their battles with the Philis-

times; a pilgrimage is made to it 'from year to year' (שָׁנָה אַחַד אַחַד: 1st 2nd [cf. 12th]: so Ex 13th, Jg 11th 21st), for purposes of sacrifice, at the 'coming round of the days' (12th, cf. Ex 34th), i.e. at the arrival of the new year, when the pilgrimage of Ingathering (תִּשְׁבִּיטָה Ex. l.c.) was held; Elkanah and his household go up to it regularly (1st 2nd) from their home—probably (see RAMAH, 6) either at Rām-Allah, 12 miles to the S.W., or at Beit Rima, 12 miles to the W.; and the youthful Samuel is presented there to Jahweh, to minister before Him (1st 2nd etc.). The sanctuary in which the ark is, is however no longer, as in the Pent., a 'tabernacle' or 'tent' (אֹהֶל); it is a fixed structure, a 'temple' (בֵּית 1st 3rd) or 'house' (17th 24th), with a 'door-post' (קִרְיָן 1st) and 'doors' (לְוָחַי 3rd); see, further, TABERNACLE. The representation in 1 S 1-4, taken as a whole, points to the existence of a more considerable religious centre, and a more fully organized system of religious observances, than appear to be implied by the terms of Jg 21st 21st. The sanctuary of Shiloh is not, however, after 1 S 1-4, again referred to in the history; and it seems in fact that, shortly after the events narrated in these chapters, it was destroyed, probably by the Philistines; in ch. 22 (v. 11 cf. with 14th), it may be observed, the priesthood settled formerly at Shiloh appears at Nob. The recollection of this disaster was so vividly impressed upon the people's memory that long afterwards Jeremiah could refer to it as a token of what J^r might do then to His temple in Jerusalem (Jer 7th 12th 'But go ye now to my place [i.e. my sacred place], which was in Shiloh, where I caused my name to dwell at the first, and see what I did to it for the wickedness of my people Israel,' v. 14; 26th 'I will make this house like Shiloh,' v. 9); and it is alluded to also by a late psalmist (Ps 78th 'He forsook the dwelling-place of Shiloh, the tent he had caused to dwell among men'). It is indeed very possible that the narrative of this disaster formed the original sequel of 1 S 4th 1st-7th, and that when the Book of Samuel assumed its present form it was omitted to make room for 7th 8th. Shiloh itself, however, continued to be inhabited; for the prophet Ahijah, who promised Jeroboam the kingdom of the ten tribes, was a native of it (1 K 11th 12th 15th [2 Ch 10th 15th; cf. 2 Ch 9th 25th]; and Jeroboam's wife went there to consult him when her husband was ill (1 K 14th 4th): see also Jer 41st.

Though a few medieval writers were acquainted with the site of Shiloh (Moore, *Judges*, p. 451 n.), it was practically unknown from the time of Jerome till it was rediscovered by Robinson, *BRP* ii. 268-270. Cf. Stanley, *SP* 231-3. Jerome speaks of the remains of an altar as just visible there: *Epistaph. Paulæ* (iv. 2, p. 676, ed. Bened.), 'Quid narrem Silo, in qua altare dirutum hodieque monstratur?'; *Comm.* on Zeph 1st (iii. 1655), 'vix altaris fundamenta monstrantur.'

S. R. DRIVER.

SHILOH (שִׁילֹה, Sam. שִׁילֹה), Gn 49th.—i. In examining the various interpretations that have been given of this passage, it will be convenient to take first those adopted by AV and RV, or admitted into RVm. There are four of them.

(1) 'Until Shiloh come.'—This rendering did not appear in any translation of the Bible before the 16th cent., though some authority for it might have been found in a fanciful Talm. passage. The Wyclif VSS followed the Vulg. (*qui mittendus est*, reading apparently שִׁילֹה): 'till he come that shall be (or is to be) sent.' Coverdale's Bible of 1535 has 'till the worthy come.' Seb. Münster's version (1534) was the first to treat the word as a name: *quousque veniat Silo*. John Rogers (1537) has 'until Sylo come.' Matthew, Taverner, the Great Bible, and the Bishops' Bible all adopt it: 'till Shiloh come.'

The difficulty in the way of this rendering is to find a meaning for *Shiloh* as a designation of the Messiah. The only indication of a desire to make

it a *proper* name appears in the Talm. passage alluded to above, *Sanh.* 98b: 'Rab said, The world was created only for the sake of David; Samuel said, It was for the sake of Moses; R. Yochanan said, It was only for the sake of the Messiah. What is his name? Those of the school of R. Shila say, Shiloh is his name, as it is said "Until Shiloh come." Those of the school of R. Yannai say, Yinnon is his name, as it is said (Ps 72nd), Before the sun let his name be propagated (*yinnōn*). Those of the school of R. Chaninah say, Chaninah is his name, as it is said (Jer 16th), For I will give you no favour (*hanina*). This attempt to connect the Messiah's name with that of some favourite teacher, of course renders the passage worthless as an authority.'

Even as a title Shiloh cannot be legitimately supported. It has been taken as an abstract noun put for a concrete, 'till rest (or a rest- or peace-giver) come.' This interpretation has been adopted by Vater, Justi, Rosenmüller, Winer, Baumgarten-Crusius, Hengstenberg, Reinke, Gesenius (*Lex.*), Murphy, and others, though many of these writers understand by the *peace-giver* Solomon or some other earthly ruler, not the Messiah. But the philological difficulties in its way are very great. The form שִׁילֹה presupposes a verb שָׁלַח or שָׁלַח which does not exist. It cannot be legitimately derived from שָׁלַח. Besides, this verb is so often associated with the idea of careless, worldly ease, that a title of the Messiah is not very likely to have been derived from it.

A different justification of Shiloh = Messiah is attempted in the Targum pseudo-Jonathan, and the MT שִׁילֹה may rest on it. It makes it mean 'his son.' But there is no Heb. word שִׁילֹה.

Even could these difficulties be surmounted, a greater one remains in the way of the AV and RV rendering. The announcement of the Messiah by name or title is out of place in a patriarchal blessing. Even a late editor would not so glaringly have violated the proprieties of time. The absence of NT reference is also strongly against such an interpretation.

(2) 'Until he come to Shiloh.' This has much in its favour. Shiloh, wherever else it occurs, denotes the Ephraimite town. It is natural to take it so here. The construction of the sentence and the parallelism both suggest this rendering. In 1 S 4th the very phrase occurs, וְיָבֹא שִׁילֹה.

Taken so, the clause is understood to refer to the assembling of Israel as a nation at Shiloh (Jos 18th), when Judah may be supposed to have lost the pre-eminence or tribe-leadership held by it in the wanderings (Nu 10th 14th, Jg 12th 10th, Jos 15th). This interpretation does not necessarily affect the Messianic character of the whole passage, though it no longer attaches the thought to the word Shiloh. The view is undoubtedly an attractive one. We see Judah, the honoured of his brethren, marching in triumphal progress to the national sanctuary, and there laying down the emblems of authority in order to enjoy the fruits of peace, while the nations around bow submissive to his sway. And if, as seems not unlikely, an effort was made to constitute Shiloh a political as well as a religious centre, thus anticipating Jerus., this interpretation becomes still more attractive.

The objections to it are twofold. First, שִׁילֹה and שָׁלַח seem to suggest sovereignty rather than mere tribal pre-eminence (see art. *LAWGIVER*, vol. iii. p. 83rd). The historical difficulty is still greater. No particular place is assigned to Judah in the histories in connexion with Shiloh. Indeed its rôle took it, not to Shiloh, but to Hebron and its neighbourhood. To obviate this difficulty some commentators supply a general subject to the verb, 'till one or the people come.' But, even so, an

objection remains. It is out of keeping with the spirit of the patriarchal blessings to affix a limit to the prosperity of a tribe. In the case of Judah especially, we should expect a further outlook, and it seems too violent to explain 'Judah will lead till Canaan is subdued and after.' [Cf., however, the use of $\pi\zeta$ in Ps 110¹ 112⁸; see *Oxf. Heb. Lex. s. v.*, II. 16].

Many good names, however, support the rendering just discussed. Among them are Eichhorn, Herder, Ewald, Bleek, Delitzsch, Dillmann [provisionally; but thinking (so also Holz.) that a really satisfactory explanation is not to be found], S. Davidson, Strack (and Rödiger, *Thes.*, giving prominence to the idea of *peace* or *rest* in Shiloh). Influenced by the objections stated above, Hitzig, Tuch, and G. Baur would translate $\pi\zeta$ as *long as*, on the analogy of Hor. *Od.* iii. 30. (7-9); cf. Verg. *Æn.* ix. 446-449. But Shiloh had been destroyed long before Judah obtained real supremacy. It is as a fallen rival to Jerusalem that prophets allude to the place.

(3) 'Until that which is his shall come.' This follows the reading $\pi\zeta$, a poetical equivalent of $\pi\zeta$. It was presumably the reading of the LXX (and Theod.), who render $\epsilon\upsilon\varsigma\ \delta\upsilon\ \epsilon\lambda\theta\eta\gamma\ \tau\acute{\alpha}\ \delta\alpha\pi\alpha\kappa\epsilon\iota\mu\epsilon\nu\alpha\ \alpha\upsilon\tau\omicron\upsilon$, 'till the things reserved for him come.' This is adopted, with some hesitation, by Driver. But, as Dillm. says, $\pi\zeta$ for the relative in an apparently Judæan text would be very strange. The indeterminate expression of the Messianic hope is in its favour.

(4) 'Until he come whose it is.' This follows a variant reading of LXX $\phi\ \delta\alpha\pi\alpha\kappa\epsilon\iota\tau\alpha\iota$, a reading lending itself so readily to Christian exegesis that we do not wonder at its adoption by the Fathers, e.g. Justin, *Ap.* i. 32 (supplying shortly after $\tau\omicron\ \beta\alpha\sigma\iota\lambda\epsilon\upsilon\sigma$), Ignat. *Phil.* (longer form), Iren. iv. x. 2, Origen (frequently). It was adopted also by Onkelos ('the Messiah, whose is the kingdom'), the Peshitta, and Saadya (10th cent.). The rendering is, however, a doubtful one, though it is adopted by Gunkel; for the subject 'it' ($\alpha\upsilon\tau\omicron\upsilon$) is missing: Onkelos' version is a paraphrase which may or may not be legitimate. Ezk 21³² (Heb.) presents a somewhat similar phrase $\pi\zeta\ \beta\alpha\ \pi\zeta\ \alpha\pi\theta\eta\tau$; but the subject in the relative clause is here expressed. Still, whether original or not, this reading seems to express a right sense; cf. (6) below.

ii. Other suggestions are—(1) 'Till tranquillity come.' This assumes the existence of a very possible $\pi\zeta$ or $\pi\zeta$ =peace. But it leaves the sentence without an explanation of $\pi\zeta$, and the parallelism suffers. It has the support of Reuss, Knobel, Friedländer.

(2) 'Till he comes to peacefulness or a place of rest' (also $\pi\zeta$). So Kurtz, Oehler, and Perowne.

(3) 'Till he comes to that which is his own.' So Orelli (*Alttest. Weiss. von d. Vollendung des Gottesreiches*, 1882, p. 137 ff. [= *OT Proph.* 117 ff.]), comparing Dt 33⁷; and apparently Ball.

(4) Lagarde (*Onom. Sacra*, 1870, ii. 96), comparing Mal 3¹, conjectures, as Matthew Hiller had done before him, $\pi\zeta\ \alpha\zeta$ =his desired one. This is accepted by Bickell (*Carm. VT Metrice*, 1882, p. 188). Driver objects that the word savours of Syr. rather than Heb., and that the sense asked is not suitable here.

(5) Wellhausen, in his *Geschichte*, p. 375 (1878), threw out the suggestion that $\pi\zeta$ was a gloss explanatory of $\pi\zeta$. 'Till he come to whom is the obedience,' etc. But this destroys the parallelism and the symmetry of the verse.

(6) Wellh. (*Comp.* 321), abandoning (5), thinks that the verse denotes in some way an ideal limit of time, the coming of the Messiah, and presupposes (as in fact the terms of vv.^{8,9} do likewise) the Davidic monarchy [he does not say clearly

how he understands $\pi\zeta$]. This view of the passage certainly seems correct. In spite of the difficulties connected with $\pi\zeta$, the words do seem to refer to the transition of the power of Judah into the hands of an ideal ruler.

(7) Cheyne (*Isaiah*, ii. [1884] Essay iv.) thinks the text was once fuller, and would read $\pi\zeta\ \pi\zeta$ or $\pi\zeta$.

(8) Neubauer, *Athenæum*, May 30th, 1885, proposes to read $\pi\zeta$, i.e. Jerusalem, 'until he come to Salem' (cf. Ball), with allusion to the establishment of the Davidic kingdom. This, of course, implies that $\pi\zeta$ has the meaning 'leader's staff,' not 'sceptre' (cf. p. 500^b bottom).

It may be noticed that the Messianic tone of the passage is independent of the reading of this clause, being conveyed by the clause succeeding it.

LITERATURE.—Besides above citations and references see Driver in *Camb. Journal of Phil.* vol. xiv. No. 27, 1885 (synopsis and explanation of Rabbin, and other interpretations), and *Expositor*, 3rd series, vol. ii. [1885] p. 10 ff.; S. Davidson, *Introd. to OT*, vol. i.; Kurtz, *Hist. Old Covenant*, vol. ii.; the Comm. on Gn 49¹⁰; and the hist. and exeg. discussion in G. Baur, *Alttest. Weissagung* (1861), 227-290.

A. S. AGLEN.

SHILONITE ($\pi\zeta$; in 2 Ch 9²⁹ $\pi\zeta$; 10¹³, Neh 11⁸ $\pi\zeta$).—Gentile name from SHILOH (which see *ad init.* p. 449^a). It is applied in the OT to 1. AHIJAH (see vol. i. p. 56^a). 2. A Judahite family, settled at Jerusalem after the Exile, Neh 11⁸ (AV wrongly Shiloni), 1 Ch 9⁸. In these last two passages we should prob. read $\pi\zeta$ *Shelanite* (cf. Nu 26³⁰), i.e. descendant of SHELAH, one of the sons of Judah. The LXX readings are: B $\Sigma\eta\lambda\omega\nu\epsilon\iota\tau\eta\varsigma$ (1 K 11²⁹ 12¹⁵ 15²⁹ 10¹⁵), $\Sigma\eta\lambda\omega\nu\epsilon$ (1 Ch 9⁸), $\Delta\eta\lambda\omega\nu\epsilon$ (Neh 11⁸); A (in the same three groups of passages, respectively) $\Sigma\eta\lambda\omega\nu\iota\tau\eta\varsigma$, $\Sigma\eta\lambda\omega\nu\iota$, $\text{H}\lambda\omega\nu\iota$; Luc. (in Neh 11⁸) $\Sigma\eta\lambda\omega\nu\epsilon$.

SHILSHAH ($\pi\zeta$; BA $\Sigma\alpha\lambda\epsilon\iota\sigma\acute{\alpha}$, Luc. $\Sigma\epsilon\lambda\epsilon\mu\sigma\acute{\alpha}\nu$).—An Asherite, 1 Ch 7³⁷.

SHIMEA ($\pi\zeta$).—1. See SHAMMUA, No. 2. 2. A Merarite, 1 Ch 6³⁰ (12) (B $\Sigma\omicron\mu\epsilon\acute{\alpha}$, A $\Sigma\alpha\mu\acute{\alpha}$, Luc. $\Sigma\alpha\mu\acute{\alpha}$). 3. A Gershonite, 1 Ch 6³⁹ (24) ($\Sigma\epsilon\mu\acute{\alpha}$). 4. See SHAMMAH, No. 2.

SHIMEAH ($\pi\zeta$; B $\Sigma\epsilon\mu\acute{\alpha}$, A $\Sigma\alpha\mu\acute{\alpha}$, Luc. $\Sigma\alpha\mu\acute{\alpha}$).—A descendant of Jehiel the 'father' of Gibeon, 1 Ch 8³², called in 9²⁸ *Shimeam* ($\pi\zeta$; B κ Luc. $\Sigma\alpha\mu\acute{\alpha}$, A $\Sigma\alpha\mu\acute{\alpha}$).

SHIMEAM.—See SHIMEAH.

SHIMEATH ($\pi\zeta$ or $\pi\zeta$; LXX in 2 Kings $\text{I}\epsilon\mu\omicron\nu\acute{\alpha}\delta$, B in 2 Chron. $\Sigma\epsilon\mu\acute{\alpha}$, A $\Sigma\alpha\mu\acute{\alpha}$, Luc. $\Sigma\alpha\mu\acute{\alpha}$).—One of the murderers of king Joash of Judah is called son of Shimeath (2 K 12²¹ (Heb. ²²), 2 Ch 24²⁶). His own name in 1 Kings is given as *Jozacar*. But the evidence of 2 Chron., and in a less degree the witness of Heb. MSS, suggest that the name was originally *Jehozabad* (see JOZACAR). This is the name of the second assassin also. It is therefore significant that in the text of 2 Chron. the one is $\pi\zeta$ and the other $\pi\zeta$. It becomes highly probable that the historian named one assassin only, and that a second has been created by dittography and textual corruption. If so, *Shimeath* is probably the original of the variants *Shomer*, *Shimrith*, and *Shimeath*. In the present text of 2 Chron. Shimeath is plainly a woman, an Ammonitess. But in the light of the hypothesis here maintained there is equal reason to adopt the alternative 'Moabite' from the following clause, and the one throws doubt on the other. Probably Shimeath's Ammonite nationality belongs to a later amplification of the narrative. It is then most natural to suppose that the father of Jozacar (Jehozabad) was named Shimeath, and not his mother. $\pi\zeta$ 'to hear' is the root of a number of

proper names both in Hebrew and the cognate languages (Shimea, Shimei, etc.).

W. B. STEVENSON.

SHIMEATHITES (שִׁמְעָתִים; BA Σαμαθιται, Luc. Σαμαθιται).—A minor subdivision of the Calebites (1 Ch 2⁵⁵). They are represented as belonging to that section or generation which inhabited districts near Jerusalem. They appear to be a dependency of Bethlehem as the text stands (cf. v.⁶⁴). Possibly they are named as one of the 'families of the scribes which dwelt at Jabez.' In that case it is unlikely that the name is derived from the name of a place. The Vulgate does not transcribe, it translates *resonantes*. Wellh. (*de Gentibus*, 1870) implicitly suggests the meaning 'traditionists' (p. 30). This would no doubt stamp the record as a description of the post-exilic distribution of the population of Judah (vv.^{50b-53} according to Wellh.'s conjecture). Similarly, but in appearance less logically, the statement: *canentes* (Vulg. tr. of 'Tirathites') *et resonantes ideo scribuntur eo quod assidue in Lege Dei et in Prophetis versabantur* (Jerome, *Opera*, ed. Vallar.³ iii. 855). But the Shimeathites may be distinct from the 'families of the scribes,' and the name may denote the inhabitants of a locality other than Jabez. The state of the text even suggests that they were a dependency of some other town than Bethlehem, now unnamed. It is not clear who are designated 'Kenites' by the last clause of v.⁶². The Kenites were closely allied to the Calebites. See, further, Wellh. *de Gentibus*; also art. GENEALOGY, § IV. 39.

W. B. STEVENSON.

SHIMEI (שִׁמְעִי; B Σεμελ always, A Σεμει always except in Samuel and Kings).—1. Second son of Gershon, Ex 6¹⁷, Nu 3^{18, 21}, 1 Ch 6¹⁷ 23^{7, 10}. In 2 Ch 12¹³ 'the family of the Shimeites' (φυλή τοῦ Σεμεών) is specified merely as a typical instance of a division of the tribe of Levi, which would mourn apart from the other divisions. In 1 Ch 23⁹ Shimei must be a mistake for one of the sons of Libni or Ladan mentioned in the previous verse. 2. 'A man of the family of the house of Saul,' 2 S 16⁵⁻¹⁴ 19¹⁶⁻²³, 1 K 2²⁸ 9. 36⁵⁷. He is called son of Gera, by which it is probably meant that he was descended from Gera, son or grandson of Benjamin (Gn 46²¹, 1 Ch 8^{3, 5}). The incident so graphically described in 2 S 16⁵⁸ must not be regarded as an isolated outrage committed by an individual acting on a momentary impulse. Its true significance will be seen when it is taken in connexion with the rebellion of SHEBA a Benjamite (2 S 20), which occurred very shortly afterwards. The Benjamites never quite forgave David for his having prevailed over the house of Saul; and later on, when the great schism took place, the most important of the Benjamite towns, such as Bethel and Jericho, sided against the Davidic dynasty. David certainly was not directly responsible for the death either of Abner or of Ishbosheth (2 S 3³⁷ 4¹¹), but his complicity in their murders may very possibly have been suspected by Saul's adherents. It would be remembered, too, that David's men had originally formed a division of the Philistine army (1 S 28¹ 29²) that killed Saul and his three sons, and more recently seven of Saul's sons had been sacrificed by the Gibeonites with David's sanction (2 S 21⁶).

When the king was returning in triumph, Shimei was among the first to greet him, 'the first of all the house of Joseph.' Josephus (*Ant.* VII. xi. 2) says that he assisted Ziba and the men of Judah in laying a bridge of boats over the river Jordan. In any case he poured forth an abject apology for his past misconduct, and obtained a promise that his life would not be forfeited for it. As David's strong sense of submission to God's will had previously made him restrain Abishai

from taking summary vengeance on the insulter, so now, realizing that by the mercy of God he was beginning his reign afresh, he felt that it was fitting that the occasion should be marked by the customary exhibition of royal clemency (cf. 1 S 11¹³, 2 K 25²⁷). Perhaps David never forgot that 'grievous curse,' every letter of which was significant, as was afterwards said (Jerome, *Qu. Heb.*), or forgave the utterer of it; and a late (?) writer in 1 K 2 records that years afterwards he recalled it in his dying charge to Solomon, and bade him devise some means whereby Shimei's hoar head might be brought down to the grave with blood.

This narrative, if taken as historical (which Wellh., Stade, and others deny it to be), has given rise to much discussion. It has often been urged that, in acting as he did, David 'kept the word of promise to the ear, and broke it to the hope.' Let it at once be acknowledged that the spirit of David, if he gave the charge ascribed to him, was not that of Christ. Is there not an anachronism involved in the supposition that it should be? But, even apart from that, it does not seem likely that David's promise, as recorded by the historian, 'Thou shalt not die,' or, as recollected by himself, 'I will not put thee to death with the sword' ('non te interficiam gladio sed lingua,' Jerome, *Qu. Heb.*), could have been understood by Shimei as an unconditional one; and in fact, however strongly we may condemn David's unforgiving spirit, it cannot be denied that Shimei's execution was solely due to his own folly. 'His blood was upon his own head.' It should be noted that, in the agreement that Solomon made with him, 'the brook Kidron' (1 K 2³⁷) is to be understood as meaning the city boundaries in any direction. Shimei would not cross the Kidron when going to Gath.

3. An eminent man who remained loyal to David when Adonijah rebelled (1 K 1⁸). It is very uncertain who he was. Jos. (*Ant.* VII. xiv. 4) vaguely calls him 'David's friend.' Jerome (*Qu. Heb. in loc.*) identifies him with No. 2. Other conjectures are that he was the same as No. 4 or No. 5.

4. A brother of David (2 S 21³¹), otherwise known as SHAMMAH (1 S 16⁹ 17¹³), Shimeah (2 S 13³), and Shimea (1 Ch 2³ 20⁷). 5. The son of Ela, one of Solomon's commissariat officers. His district was Benjamin (1 K 4¹⁸). 6. Brother of Zerubbabel (1 Ch 3¹⁹, B om.). 7. Apparently grandson of Simeon (1 Ch 4^{26, 27}). He had sixteen sons and six daughters, and is specially noted as having been the most prolific of all his tribe. 8. A Reubenite, son of Joel (1 Ch 5⁴). A has Σεμελ in the first occurrence of the name; possibly the same as Shema in v.⁸. 9. B Σεμελ, a Levite, son of Merari (1 Ch 6³⁰). 10. A Levite, in the pedigree of Asaph, David's precentor (1 Ch 6⁴²). He is omitted in v.²⁰. 11. A Benjamite chief, 1 Ch 8²¹. See SHEMA, No. 2. 12. B Σεμελ, son of Jeduthun, who gave his name to the tenth course of Levites (1 Ch 25¹⁷). His name is omitted in MT of v.³, but the LXX has it there after 'Jeshaiah.' 13. The Ramathite (1 Ch 27²⁷), one of David's officers. He was 'over the vineyards.' 14. A Levite 'of the sons of Heman,' in the reign of Hezekiah (2 Ch 29¹⁴); one of those who took a leading part in the purification of the temple. Perhaps the same person is meant in 2 Ch 31^{12, 13}, where he is the second Levitical superintendent over the 'oblations and tithes' which were stored in the house of the Lord. 15. A Levite (Ezr 10²³ BA Σαμου, & Σαμουδ; 1 Es 9²³ Semels). 16. A layman 'of the sons of Hashum' (Ezr 10²³, 1 Es 9²³ Semel). 17. A layman 'of the sons of Bani' (Ezr 10²³, 1 Es 9²⁴ Semels). These last three are in the list of those who married foreign wives. 18. A Benjamite in the pedigree of Mordecai (Est 2⁹), called in Ad. Est 11² Semeias.

N. J. D. WHITE.

SHIMEON (שִׁמְעוֹן; the name that appears elsewhere as Simeon).—One of the sons of Harim, who had married a foreign wife, Ezr 10³¹; BA Σεμεών, Luc. Συμεών.

SHIMON (שִׁמְעוֹן; B Σεμων, A Σεμεών, Luc. Σαυλ).—The eponym of a Judahite family, 1 Ch 4²⁰.

SHIMRATH (שִׁמְרָת; BA Σαμαράθ, Luc. Σαμαρελ).—A Benjamite, 1 Ch 8²¹.

SHIMRI (שִׁמְרִי).—1. A Simeonite, 1 Ch 4³⁷ (B Σαμάρ, A Σαμαρίας, Luc. Σαμαρελ). 2. The father of one of David's heroes, 1 Ch 11⁴⁵ (B Σαμερ, A and Luc. Σαμαρ). 3. The eponym of a family of gatekeepers, 1 Ch 26¹⁰ (BA φυλάσσορες [translating, as if שִׁמְרִי], Luc. Σαμαρ). 4. A Levite, 2 Ch 29¹³ (B Σαμβρελ, A and Luc. Σαμβρελ).

SHIMRITH.—See SHIMEATH.

SHIMRON (שִׁמְרֹן).—The fourth son of Issachar, Gn 46¹³ (A Σαμβρόν, D Σαμβρόν, Luc. Σαμβρόν καὶ Σαμβρόν), Nu 26²⁴ (20) (B* Σαμαράν, B^F Σαμβρόν, A 'Αμβρόν, Luc. 'Αμβρόν), 1 Ch 7¹ (B Σεμερόν, A Σαμβρόν, Luc. Σαμβρόν). The gentilic name **Shimronites** (שִׁמְרֹנִי; B* Σαμαραβελ, B^b Σαμαραμेल, A 'Αμβραμेल, Luc. 'Αμβραμει) occurs in Nu 26²⁴ (20).

SHIMRON (שִׁמְרֹן 'watch-height'; B Συμόν, A Σεμρόν (Jos 19¹⁵), A Σεμερόν (11¹), A Σαμρόν (12²⁰); *Semerom, Semron*).—One of the towns whose kings Jabin, king of Hazor, called to his assistance when he heard of Joshua's conquest of Southern Palestine (Jos 11¹). It was afterwards allotted to the tribe of Zebulun (Jos 19¹⁵). Its site is unknown; Dillm. enumerates various conjectures. Neubauer (*Géog. du Talmud*, p. 189) identifies it, very improbably, with the *Simonia* (סימניה) of the Talmud, the *Simonias* of Josephus (*Vit.* § 24), now *Semúnieh*, a small village, 5 miles west of Nazareth, and not far from Bethlehem (*Beit Lahm*), which is mentioned with it in Jos 19¹⁵ (*PEF Mem.* i. 339). Riehm (*HWB*) considers a site so far south in Lower Galilee unlikely, and would identify it with *es-Semeiriyeh*, a village about 3 miles north of Acre, and not far from *Kefr Yasif*.

C. W. WILSON.

SHIMRON - MERON (שִׁמְרֹן מֶרֶן; B Συμόν . . . Μαυρόν, A Σαμρόν . . . Φασγά . . . Μαρόν; *Simeron Maron*).—A Canaanite town, west of Jordan, whose king was amongst those whom Joshua smote (Jos 12²⁰). Comparing its position in the list with that of Shimron in the list given in Jos 11¹, it seems probable that the two places are identical. The LXX treat Shimron and Meron as two places, and in this they are followed by Eusebius (*Onom.*). Possibly Shimron-meron was the full name of Shimron. Schrader (*KAT*² p. 163; cf. Del. *Paradies*, 286f.) identifies it with Samsimuruna, a Canaanite royal city mentioned in inscriptions of Sennacherib, Esarhaddon, and Assurbanipal, and places it at *es-Semeiriyeh*, following Socin (in Baedeker's *Pal.*). See also SHIMRON.

C. W. WILSON.

SHIMSHAI (שִׁמְשַׁי).—The scribe or secretary of Rehum, Ezr 4⁸, 5¹⁷, 23 (B Σαμασά, Σαμαί, Σαμεαί, Σαμεσά; A has Σαμασά and Luc. Σαμαίας throughout). He is called in 1 Es 2¹⁶ SAMELLIUS.

SHIN (שׁ) and **SIN** (שׁ).—The twenty-first letter of the Hebrew alphabet, and as such employed in the 119th Psalm to designate the 21st part, each verse of which in Heb. begins with this letter in one or other of its two forms. These are transliterated in this Dictionary by *sh* and *s* respectively. On the question when the two forms of the letter began to be distinguished by the so-called diacritical point, and for a strong plea in favour of the order *shin-sin*, instead of the customary *sin-shin*, in Heb. Grammars and Dictionaries, see Nestle in *Transactions of the IXth and XIth International Congress of Orientalists* (Semitic section).

SHINAB (שִׁנָּב, *Sennab*, *Sennaab*).—The king of Admah who was attacked by Chedorlaomer and his allies (Gn 14²). The name has been supposed (cf. Frd. Delitzsch, *Paradies*, 294) to be the same as that of Sanibu who is mentioned by Tiglath-pileser III. as king of Ammon. The reading, however, is quite uncertain, the LXX form having the support also of the Sam. שִׁנָּב.

SHINAR (שִׁנָּר; LXX *Sennab*, E *Sennab* Gn 14¹; γῆ *Sennab* [Theod. *Sennab*] Dn 1²; *Sennar*).—The name given, in the OT, to the country known as Babylonia, elsewhere called Babel or land of Babel ('*érez Bābel*'), from the name of its chief city. In Gn 10¹⁰ it is described as the district in which were situated the four great cities of Babylonia, namely, Babel, Erech, Accad, and Calneh, which were the beginning of Nimrod's kingdom, and in Gn 11² it is spoken of as a place where there was a plain, wherein early migrants in the east settled, founded the city Babel or Babylon, and built a tower, afterwards known as 'the Tower of Babel.' In Is 11¹ the Heb. *Shinar* is rendered by the LXX as 'Babylonia,' and in Zec 5¹¹ by 'the land of Babylon,' thus showing that the two terms were practically synonymous. To all appearance Ellasar or Larsa, and the district of which it was capital, does not seem to have been included in this term (Gn 14¹). In Syriac *Senar* was used of the country around Baghdad (*Ges. s.v.*).

The most common explanation of the word *Shinar* is, that it is derived from an earlier form of the Babylonian *Sumer*, a dialectic form of an as yet unfound non-Semitic *Senger*, just as *dimmer* is the dialectic form of the non-Semitic *dingir*, 'god.' It cannot be said, however, that this explanation, plausible as it seems to be, is entirely satisfactory. Jensen objects (*ZKSF* ii. 419) that *Sumer* stands for south Babylonia, whilst *Shinar*, on the contrary, indicates the north, and he puts forward for consideration, whether *Tindir*, the name of the city of Babylon as the 'Seat of Life,' may not go back to an original form *Singar* (*Singir*), comparing, for the interchange between *d* and *g*, *agar* and its dialectic form *adar*. Like most of Jensen's proposals, this is suggestive, but at the same time hardly convincing. Hommel, in the art. *BABYLONIA* (vol. i. p. 224^b), derives *Shinar* from *Ki-Imgir* through the intermediate forms *Shingar*, *Shumir* (= *Sumer*), and *Shimir*, *Ki-Imgir* being an older form of *Ki-Ingi*, 'the region of Ingi,' which was rendered *Sumer* by the Semitic Babylonians. It will thus be seen that he does not recognize the force of Jensen's objection with regard to the geographical position.

One thing, however, is certain, and that is, that the Heb. *Shinar* to all appearance represents the whole of Babylonia, excepting the district of which Larsa was the capital (see above). This being the case, it corresponds with the Kingi-Ura of the non-Semitic texts, which is translated in the bilingual inscriptions by the expression 'Sumer and Akkad'—that is to say, not only N. Babylonia, but S. Babylonia also. The question, therefore, naturally arises, whether a modification of Hommel's theory would not furnish the best explanation. That *k* changed, in the non-Semitic idiom, into *š*, is proved by the post-position for 'to,' which was pronounced either *ku* or *šu*. This would produce the form *Singi-Ura*, from which the Heb. *Shinar* (*Shinār*) might easily have been derived.* It is noteworthy that, from the geographical point of view, such an explanation of the word would leave nothing to be desired.

The latest or one of the latest identifications of *Shinar* is with *Sanhar* of the Tel el-Amarna tablets (Winckler 25 = London

* At least one compound group indicates the possible value of *š* for the character *k*, whilst two others suggest that of *š*.

No. 5). This, however, requires much further light before it can be admitted into the bounds of likely theories. The only statement with regard to Šinār made by the letter in question is a reference to gifts which the king of Ḫatti (Heth, the Hittites) and the king of Šinār had made to the writer, the king of Aššia. W. Max Müller (*Asien und Europa*, p. 279) identifies Šinār with *Σινάρ*, the modern Sinjar.

Sumer, generally regarded as the Babylonian original of Šinār, is usually found coupled with the name of the sister-province Akkad, of which the Accad of Gn 10¹⁰ was the capital. As stated above, the two provinces together are called Kingi-Ura in the non-Semitic inscriptions, rendered, in the bilingual texts, by the words *māt Šu-me-ri u Ak-ka-di-i*, 'the land of Sumer and Akkad.' The first component of the non-Semitic equivalent, *Kingi* (also written *Kengi*), is explained as *mdtu*, 'country,' and *Ura* as *Akkadū* or Akkad. *Kingi* therefore meant 'country' *par excellence*—in fact, in the bilingual inscription of Šamaš-sum-ukin (S R. 62, 40a b), *Kingi-Ura* is translated by the words *māt Akkadī*, 'the land of Akkad.'

The original language of the country of Šinār was to all appearance non-Semitic, and it is very likely that, as already indicated, the Heb. word in question may be derived from that idiom. It is true that several Assyriologists (notably Halévy, the leader of the school) regard this language as being more or less artificial (see art. ACCAD); but that it should be so is hardly likely, the idiom in question (often called Akkadian in England, and generally called Sumerian on the Continent) differing considerably from Semitic Babylonian, not only in words, but also in grammatical forms. Among the chief differences may be cited the use of suffixes instead of prefixes to express the prepositions (*ša-ni-šu* or *ša-ni-ku*, 'to his house,' lit. 'house-his-to'), the use of long strings of verbal prefixes, suffixes, or infixes (*innan-lal* for *inna-in-lal*, 'it he weighed,' *gab-indaria*, 'he opposed,' lit. 'breast-him-with-(he)-set'), the use of compound words (*ki-dur*, 'seat,' lit. 'place-(of)-sitting,' (*lu*)-*gubba-igi*, 'attendant,' lit. '(man)-standing-before,' *ša-bat*, 'sabbath,' lit. 'heart-rest,' *ša-ḫula*, 'heart-joy,' and many others), and the numerical system, which goes up to 5, and then begins a new series, combining the numbers of the first (*dš* for *ia-aš*, 'five-one' = 'six,' *ṭmina* for *ia-mina*, 'five-two' = 'seven,' etc.). The objection that this ancient idiom cannot be a real language, but only a system of writing, because the same or similar words occur in it and in Semitic Babylonian, is easily explained away by the fact that, when two nationalities live together, in close intercourse, words and phrases are extensively borrowed on both sides: and this was certainly the case here.

In support of the contention that there was another race and another language in the land of Šinār than the Semitic, may be cited the fact that the oldest sculptures give, to all appearance, examples of a race not possessing the Semitic type of the later Babylonians. But one differing considerably from it. The Semitic inhabitants of Šinār were thick-set and muscular, as the cylinder-seals of Semitic work and the later monuments, such as the boundary-stone with the bas-relief of king Marduk-nadin-ahi, show. The type of at least one section of the non-Semitic inhabitants, on the other hand, was slim and spare, and is illustrated by the bronze statuettes of the time of king Gudea (c. 2700 B.C.), representing a kneeling figure holding what is generally regarded as a fire-stick; the human figures found in bas-reliefs from Lagāš; and those on a large number of cylinder-seals. It would, moreover, seem that the ancient inhabitants of Šinār were accustomed to do a thing which the Semites do only under foreign influence, namely, shave the hair from the face and head. This is shown not only by the heads of statues and statuettes from Tel-loh (the ancient Lagāš), but also from numerous cylinder-seals and impressions of cylinder-seals of the later Akkadian (or Sumerian) period, in which an official is represented being introduced to the god whom he worshipped. The god himself, however,

generally wears a beard. Whether they regarded the heads of their divinities as being shaved or not is uncertain, as they are commonly represented wearing hats.

In connexion with this may be mentioned, that the great majority of the names of the deities of the Babylonian pantheon are non-Semitic, and this shows what a preponderating influence that part of the population must have had. Indeed the religious system of the Assyro-Babylonians was probably to a great extent alien, and the comparatively few Semitic divine names which are found are to all appearance often applied to deities which were at first non-Semitic.

As to the order of precedence of the two races—the non-Semites and the Semites—in occupying the country, we have no certain information. It is worthy of note, however, that Nimrod, the founder of the great cities of the land of Šinār, is represented as a son of Cush (Gn 10⁹), and that in Gn 11² the name Šinār is spoken of as if it existed before the foundation of Babylon and its tower,—in other words, both passages suggest that the non-Semitic occupation of Šinār preceded that of the Semites. This seems also to be confirmed by the indications of the ancient monuments of the country. The figures of non-Semitic type, for the most part, precede those of the Semitic period in chronological order; the earliest inscriptions are in the language which the majority of Assyriologists regard as the non-Semitic (Sumerian or Akkadian) idiom; the contract-tablets of the dynasty of Ur, called by Radan the fourth, are written in it, as are also, wholly or partly, numbers of tablets of the dynasty of Babylon (that to which Ḥammurabi belonged), though Semitic Babylonian at this period begins to take its place. The Semitic renderings of the early non-Semitic texts are sometimes as much of the nature of glosses as of real translations, for they are written, where possible, in the blank spaces left for that purpose between the beginning and the end of the lines of the original text.* When not arranged thus, the non-Semitic text of these bilingual tablets occupies the first, third, and remaining alternate lines of the inscription, or the left-hand (or first) column.

The early languages of Šinār (Sumerian or Akkadian) are mentioned more than once in the inscriptions of Babylonia and Assyria. Thus the tablet S. 1190 is described as containing 'two Sumerian incantations used (seemingly) for the stilling of a weeping child'; another fragment says 'the tongue of Sumer (?assumed) the likeness (of the tongue) of Ak(kad)'; whilst a third informs us that 'Akkad is above, Su(mer) below,' but what this refers to is doubtful,—perhaps the position of the tablets of each dialect on the library shelves, or in the rooms. The tablet K. 11,856, a fragment which refers to 'the great tablet-house,' states that 'the tongue of Akkad is in the third . . .' (?room, space, division). What these disconnected statements refer to in reality will probably for some time be a matter for discussion, but the existence of other languages than Semitic Babylonian in Šinār or ancient Babylonia can no longer be doubted. To the above indications that this was the case may be added the fact that Sumer was called also *kura Eme-laḫa*, 'the land of the noble (or pure) tongue,' as well as *Kingi*.

The bilingual lists of Babylonia and Assyria distinguish the two dialects, but do not mention by what name the standard idiom (probably the older of the two) was known. The other, generally called by modern scholars 'the dialect,' is distinguished in the bilingual lists by the term *eme-sala*, generally translated 'tongue (of) the woman,' or 'women's tongue,' perhaps so called because it was softer, being more affected by phonetic decay. The possibility that this refers to women of a conquered race taken as wives by the conquerors has been suggested, but seems unlikely.

To all appearance the non-Semitic idiom and its

* The tablet inscribed with the bilingual story of the Creation is written almost wholly in this way, and has therefore the appearance of a text in three columns.

dialect gave way to Semitic Babylonian about the time of the dynasty to which Hammurabi belonged, but when it finally ceased to be spoken is not known. Compositions were probably made in it from time to time until a very late date. This is shown by the existence of a bilingual hymn containing the name of Aššur-bani-apli or Assurbanipal, though the text bears the appearance of an ancient composition into which that king's name has been introduced. His brother Šamaš-um-ukīn (Saosduchinos), king of Babylonia, however, seems to have had original compositions in this old language made for him, as in the case of the text referred to above (5 R. pl. 62). It is noteworthy that all these late inscriptions, made when the non-Semitic idiom was a dead language, are in the 'dialect.' There is not much doubt that Semitic Babylonian was the language of the country from about B.C. 2000 onwards, and continued in use until about the Christian era.

Besides the archaic historical inscriptions, of which the best examples come from the French excavations at Tel-loh; the brick-inscriptions, of which most really ancient Babylonian sites furnish many examples; and numerous short inscriptions on cylinder-seals, the bulk of the non-Semitic literature of Shinar consists of incantations, hymns, and penitential psalms. Several interesting but fragmentary historical inscriptions exist (accompanied by translations into the Semitic idiom), together with the remains of a chronological text supposed to be that made use of by Berossus in his history. It is also worthy of note that several fragments of a glossary of the Semitic story of the Creation (art. BABYLONIA, vol. i. p. 220^b, and NIMROD, vol. iii. p. 523^a), or the story of Bel and the Dragon, imply that that composition existed in the old language of Shinar, and that it was a 'dialectic' text. Classified lists of words, without Semitic translation, are also found. In all probability, however, many other inscriptions known only in their Semitic dress are really of non-Semitic origin. For an account of these, as also for a description of the country, its history, etc., see the article BABYLONIA.

LITERATURE.—Radau, *Early Babylonian History*; Lenormant, *Études Accadiennes*, ii. 3, p. 70; Schrader, *KAT* 2 118 ff.; Keilinschr. u. Geschichtsforſchung, 296, 533; Weissbach, *Zur Lösung der Sumerischen Frage*, Leipzig, 1897; Pinches, 'Languages of the Early Inhabitants of Mesopotamia' in *JRAS*, 1884, p. 391 ff., 'Sumerian or Cryptography,' *ib.* 1900, p. 75 ff., 343, 344, 551, 552; and the works mentioned at the end of the articles ACCAD and BABYLONIA. T. G. PINCHES.

SHION (שִׁיֹן; B Σιωρά, A Σεῖρά; *Seon*).—A town of Issachar (Jos 19¹⁹) mentioned between Haphraim and Anaharath. Eusebius and Jerome (*Onom.*) place it near Mount Tabor. Its identification by Eli Smith with 'Aḡūn ešh-Sh'ain, about 3 miles east of Nazareth, has been very generally accepted.

C. W. WILSON.

SHIPHI (שִׁפְחִי; B Σαφά, A Σεφείρ, Luc. Σωφεί).—A Simeonite prince, 1 Ch 4³⁷ (36).

SHIPHWITE.—See SHEPHAM and SIPHMOTH.

SHIPRAH (שִׁפְרָה; LXX Σεφωρά, the rendering also of שִׁפְרָה *Zipporah*, in Ex 2²¹).—One of the two Hebrew midwives, Ex 1¹⁵ (E). The name is probably connected with the root שָׁפַר 'to be beautiful' (Baentsch in Nowack's *Hdkom.*). It is unlikely that it is a Hebraized form of an Egyptian name. See, further, Dillm.-Ryssel, *ad loc.*

SHIPHTAN (שִׁפְתָן; B Σαθαθά, A Σαθαθάν, F Σαφαράν, Luc. [Σ]αθαθά).—An Ephraimite prince, Nu 34²⁴.

SHIPS and BOATS (שִׁפּוֹת, שִׁפּוֹת [only Jon 1³], שִׁפּוֹת; [only Ac 27⁴¹], πλοῖον, πλοῦριον, σκάφη [only Ac 27¹⁶ 30. 32]).—These are often referred to in the Bible, but to a very small extent in connexion with Israelitish history. In OT the most important instances connected with this people are the building of the fleet of Solomon at the port of Ezion-geber, at the head of the Ælanitic arm of the Red Sea (1 K 9²⁶); and another undertaking of a similar kind in the reign of Jehoshaphat, which had a disastrous result (1 K 22⁴⁹). In NT we have the voyages of St. Paul, especially the last into Italy (Ac 27).^{*} The voyage of Jonah belongs to another category.

The *Phœnicians* were by far the most successful navigators of ancient times; and the history of the art of shipbuilding amongst Eastern nations can be very clearly followed in connexion with the history of this remarkable people (see GREAT SEA). Originally settled on the shores of the Erythræan Sea (Persian Gulf),† they had become familiar with navigation in a rude form before their migration to the shores of the Mediterranean about B.C. 1500, and carried with them the art of shipbuilding to their new home.‡ Perhaps in both countries this art did not extend beyond the construction of rafts, or canoes hollowed out of trunks of trees (*Monoxyla*); but as time went on these would give place to boats, built with a keel, and ribs covered with canvas and daubed with pitch. The models of boats found amongst Phœnician remains are of a very rude and simple form.§ From a Cyprian model, represented by Count L. di Cesnola, and believed to be of early Phœnician date, the ships appear to have consisted of a hull of wood with a high curved stern and an upright bow; from the centre rose a mast not very high, supporting a yard-arm for carrying a sail; from the stern projected two steering oars with broad shovel-shaped blades passing through the timbers of the ship.|| The use of sails was probably preceded for a long period by that of oars. A boat of large size is represented on certain coins, regarded by some as Phœnician, by others as belonging to Cilicia, in which the bow is low, the stern elevated and accompanied by steering oars. It was impelled by one bank of oars, such as was called, by the Greeks a 'triconter' or 'penteconter,' and it was destitute of a mast.¶

About B.C. 700 a great advance seems to have been made in navigation by the Phœnicians, owing to the introduction of two sets of oarsmen seated on benches at different levels, and using double banks of oars; these were called by the Greeks 'biremes'; and, at a later period, a further advance was made by the introduction of a mast and sail, somewhat of the shape of a 'square-sail' of our own times. These ships must have resembled the Chinese junks of the present day.

The Phœnician ships described by Herodotus were of two kinds: those used in war, and those employed in mercantile traffic. The former were broad of beam, and impelled both by oars and sails. The sails were, from their shape, of use only when sailing before the wind. The war vessels were those which the Greeks called tri-conter and penteconter, each impelled by fifteen to twenty-five oars on either side. They were long open boats in which the oarsmen sat all on the same level; each galley was armed at its head with a sharp metal spike or beak, intended for

* On the Sea of Galilee, in the time of our Lord, small trading vessels and fishing boats appear to have been very numerous, and some of the most interesting events in His life are connected with this lake and the sailors on its waters (Mt 8²³ Mk 4³⁶, Lk 5¹⁻¹¹, Jn 6²² 21¹⁻¹⁴).

¶ Rawlinson, *Phœnicia*, 273.

ramming.* Afterwards these were superseded by biremes, which were decked, had masts and sails, and double banks of oarsmen. Later still, triremes, impelled by three banks of oarsmen, came into use; and about the end of the 6th cent. B.C. boats with additional banks of oars were invented.†

For some centuries the Phœnicians confined their navigation to the shores of the Mediterranean, Propontis, and Euxine; but before the time of Solomon (c. B.C. 930) they had launched out into the deep, had passed the pillars of Hercules, and opened a trade with Tartessus (Tarshish) on the Atlantic coast of Spain. Coasting along Africa, they had visited the Senegal and Gambia; and, in the opposite direction, had crossed the Bay of Biscay and the English Channel, and opened a trade for tin with the Cassiterides. It is no less certain that they reached the Canaries (Fortunate Islands), lying 170 miles off the coast of Africa. In Ezk 27 we have an eloquent description of the glories of Tyre and Sidon, and the construction of their ships.

The Greeks.—Ships with four ranks of oarsmen were first constructed by the Greeks about the year B.C. 400, when Dionysius I. of Syracuse built the first quadriremes (*τετραπύρις*), with which he had probably become acquainted through the Carthaginians.‡ After the time of Alexander the Great, ships with four, five, and even more ranks of rowers became general; and, according to Polybius, the first Punic war was chiefly carried on with quinqueremes.§

Assyrian.—While the Phœnicians were making progress in naval architecture, their old neighbours and probably rivals, the Babylonians and Assyrians, were also at work in the same direction, but not to any important extent. As Rawlinson observes, it is only as fresh-water sailors that the Assyrians come within the category of navigators at all.|| They left the navigation of the Persian Gulf and Mediterranean to the Babylonians and Phœnicians, contenting themselves with the profits without sharing the dangers of sea voyages; their attention being concentrated on the navigation of their two great rivers—the Tigris and Euphrates. This was effected at first by rafts of timber supported on inflated skins; and these are still in use on the rivers of Mesopotamia.¶ Bas-reliefs from the most ancient palace of Nimroud show two kinds of boats: the larger contains the king in his chariot with his attendants, and is navigated by two men.** It is considered by Rawlinson to have resembled in structure the Welsh coracle, round in form and made of wicker-work covered with skins and smeared over with bitumen. To have carried such heavy loads they must have been of large size. The smaller was used for the conveyance of merchandise.

In the sculptures of Sargon, who reigned from B.C. 722–705, we have a representation of a ship

* These were probably the kind of boats in use amongst the Greeks in Homer's time, in which he represents the descent of the Grecian warriors on the coast of Ilium (*Iliad*, i. 360, ii. 585, 630; Smith's *Dict. Greek and Roman Antiquities*, art. 'Naves,' 783 (1849), in which the subject is very fully treated).

† The Phœnicians had a practice of placing at the bow of their boats the figure of some monstrous form gaudily painted, in order to strike terror into the natives whose country they were invading. We seem to have something of the kind in the case of the Greek ships invading Asia Minor, 'Twelve ships with scarlet bows' (*Iliad*, ii. 739).

|| Ancient *Monarchies*, i. 544.

¶ Layard, *Ninereh*, ii. 96; Rawlinson, *Anc. Mon.* i. 545. A representation of such a raft carrying blocks of stone for building, taken from Kouyunjik, is given *ib.* p. 338. The raft is impelled by two oarsmen.

** *ib.* p. 546. Boats similar to these are also described by Herodotus, i. c. 194.

of a more advanced type. Here four rowers standing to their oars impel a vessel, having a figure-head of a horse, and for the stern the tail of a fish; but it is possible that this vessel may have belonged to an invading force, not that of the Assyrian inhabitants.*

The sculptures of Kouyunjik represent ships in great perfection. One of these represents a naval battle, as may be gathered from the introduction of marine forms, such as star-fish and jelly-fish, not found in rivers. Layard recognizes in these vessels a resemblance to those used to a comparatively late period by the inhabitants of the cities of Tyre and Sidon on the Syrian coast.† That the Chaldeans were skilful shipbuilders, and were proud of their attainments in this art, may be gathered from the statement in Isaiah (43¹⁴), where they are referred to as rejoicing in their ships.‡

Christian era.—The ships in NT times, chiefly belonging to the Romans, were galleys impelled by oarsmen and using square sails. They were sometimes of large size; that which carried St. Paul containing in all 276 souls, besides cargo.§ Their timbers were so badly put together, that when subjected to the strain arising from a storm, they required to be undergirded (or braced) by means of strong ropes; and they seldom ventured far out of sight of land, or some port into which they could be run in stress of weather.

SHISHA.—See SHAVSHA.

SHISHAK (שִׁשְׁכָּה [in 1 K 14²⁵, *Kéth.* שִׁשְׁכָּה, *Kéré* שִׁשְׁכָּה], Σωσακ(ε)μ).—Shishak is Sheshonk I., the first king of the 22nd or Bubastite Dynasty. He belonged to an important family of chiefs of Libyan mercenaries, who by degrees attained to very high position. His grandfather married a princess named Mehtenusecht, doubtless of the 21st or Tanite Dynasty. The successors of Sheshonk were much attached to Bubastis, and his dynasty is named Bubastite by Manetho; but it is doubtful whether he himself had much connexion with that city. In his 21st year he began building a new court in the great temple of Karnak, and close to it caused to be sculptured a representation of himself sacrificing figures symbolic of the conquered cities in Palestine. In all, 156 place-names were thus recorded, and most of them are still legible. There are few important cities amongst them. They include Rabbath and Hapharaim in Issachar, and Mahanaim on the east of the Jordan, besides towns in Judæa. From the biblical account (1 K 14²⁵), it had been concluded that Shishak attacked only the kingdom of Rehoboam and spared that of Jeroboam, who had lived many years in exile in Egypt; but this interpretation is not necessary. Since Ramses III. no Pharaoh had ventured to transport an army across the eastern desert and to attack Palestine. Later, even Taharka and Psammetichus did not go so far; only Necho went farther. But Sheshonk's expedition was insignificant compared to the expeditions of the 18th dynasty. For the absence of the title 'Pharaoh' in the biblical record see above, vol. iii. p. 819.

LITERATURE.—For Shishak's campaign against Judah see W. Max Müller, *Asien u. Europa*, 166 ff.; Blau in *ZDMG* xv. 233 ff.; Meyer, *Gesch.* i. 385 f.; Stade, *Gesch.* i. 353 f.; Maspero, *Struggle of the Nations*, 772 ff.; Driver in Hogarth's *Authority and Archaeology*, 87 l.

F. LL. GRIFFITH.

SHITRAI (שִׁטְרַי *Kéthibh*, שִׁטְרַי *Kéré*; B' *Asapraits*, A Luc. *Sarpai*).—A Sharonite who was over king David's herds that fed in SHARON, 1 Ch 27²⁵.

* Layard, *Ninereh*, ii. 93.

† Layard, vol. ii. 384, 385.

‡ RV. In the ships of their rejoicing.

§ Ac 27²⁷.

SHITTAH TREE (שִׁטָּה *shittāh*, ῥύκος, *spina*, Is 41¹⁹ RV 'acacia tree'); **SHITTIM WOOD** (שִׁטִּים *shittim*, ξύλα δασεα, *ligna setim*, Ex 25⁵. 10. 13 26¹⁵. 27¹. 6, Dt 10³ RV 'acacia wood').—*Shittāh* is modified from *shināh*, as *hittāh*, 'wheat,' from *hittāh*. The cognate Arab. equivalent for *shināh* is *sonf*, a name identical with the old Egypt. name of this tree, and is, like it, generic for Acacia, but particularly applied to *A. Nilotica*, Del. The desert acacia, of which the Ark of the Covenant, and the boards, tables, etc. of the Tabernacle were made, is no doubt *A. Seyal*, Del., and *A. tortilis*, Hayne, if the two be not, as we suspect, varieties of the same species. Both are called *seyyāl*. *Sayl* means 'torrent,' and prob. the ellipsis 'tree' should be supplied. It is the *torrent tree*, i.e. the characteristic tree of the desert wadis of Sinai, et-Tih, and the Dead Sea. The comus of these trees resembles that of the apple. It is about 15-25 ft. high, and a little broader than its height. It has stiff, thorny branches, bipinnate leaves with leaflets 1-2 lines long, and $\frac{1}{2}$ line broad, and more or less spirally twisted, necklace-shape pods, 3-4 in. long. Its wood is heavier than water, exceedingly hard, of fine grain, the sap-wood yellow, the heart-wood brown. It is not attacked by insects. It was therefore eminently suited for furniture such as that for which it was employed, in a climate where insects commit such ravages as in the desert and in Palestine. These trees must have been very numerous in ancient times, perhaps filling most of the desert valleys, and growing in clefts of the rocks on the now bare mountain sides. Even now, after they have been so extensively cut by the charcoal burners, there are large numbers of them. They form quite a characteristic feature of the desert landscape. The trunks are now not infrequently 2 ft. thick, and old trees may have been much thicker, quite sufficiently so to supply planks 10 cubits long and $\frac{1}{2}$ wide (Ex 36²¹). If any difficulty existed on this point, it would be easily met by supposing that the planks were joined. Arab. carpenters do this now very cleverly in Egypt and Syria. Besides the wood, so valuable on account of its durability and the excellent charcoal which can be made from it, the tree yields the famous 'gum arabic' in considerable quantities. Its astringent bark is used for tanning yellow leather.

A number of places were named from this tree, as SHITTIM (Jos 2¹ *al.*), perhaps the modern *Ghor es-Saisabān*, where there are still plenty of acacia trees, and ABEL-SHITTIM (Nu 33⁴⁹), i.e. the Plain of the Acacias, which is the same as the above. The Valley (בְּנֵי 'wādy') of Shittim (Jl 3 (4)¹⁸) may have been the lower part of the *Wādy en-Nār*, the continuation of Kidron, into which flows the water from the neighbourhood of Jerusalem. This, as all the valleys debouching on to the Dead Sea, would naturally have acacia trees growing in it.

G. E. POST.

SHITTIM (שִׁטִּים always with def. art. 'the acacias,' see preceding article).—One of the limits of the camping-ground of the children of Israel in the plains of Moab, Nu 33⁴⁹ (here only it is called ABEL-SHITTIM). According to Nu 25¹ the anger of the Lord was there kindled against Israel for joining himself unto Baal-peor. The spies were sent out from Shittim (Jos 2¹), and from thence the children of Israel moved to Jordan before crossing the river (Jos 3¹). These are the only places where the word occurs in the Hexateuch. The LXX in the last three passages has *Sarreib* in B (ν is omitted in A of Jos 2¹). In Nu 33⁴⁹ *Belad* in B and *Belgarriū* in A are renderings of *Abel-shittim*.

The word occurs twice in the Prophets: (1) Mic 6⁵ 'from Shittim unto Gilgal.' By some this is regarded as a gloss; others suggest that a part

of the text has been lost here—'[remember that which I did] from Shittim unto Gilgal'—with reference to the wonders manifested at the passage of the Jordan. (2) Jl 3¹⁸ 'the valley of Shittim.' The Heb. word here used for 'valley' (בְּנֵי 'wādy'; see BROOK) is never applied to the broad open space immediately N. of the Dead Sea in which Shittim was situated. The idea in the passage is similar to that in Ezk 47¹⁻¹², Zec 14⁸, and Rev 22¹—waters (of life) issuing from the house of God would reach the Eastern (the Dead) and the Western (the Mediterranean) seas. The ordinary course of waters from Jerusalem to the Dead Sea would be along the *Wādy Sitti Mariam* and *Wādy en-Nār*, the ancient Kidron called בְּנֵי 2 S 15³ (cf. Driver, *ad loc.*, in Camb. Bible for Schools and Colleges).

The LXX rendering in both these passages is *τὸν ἑρμῆον*. It has been proposed (the suggestion is as old as Jerome) to read *ἐρμῆον*, and then the translators would have considered the *shittah-tree* as equivalent to the *mastic-tree* (*ἑρμῆον*, *Pistachia-lentiscus*), a tree common in Mediterranean countries. The agreement between these two passages, and their variation from the renderings in the Hex., are noteworthy (cf. Ryssel on Mic 6⁵).

A. T. CHAPMAN.

SHIZA (שִׁזָּא; B Σαῖζά, A Σεζά, & Σεζά, Luc. Σεζά).—The father of a Reubenite chief, 1 Ch 11⁴⁴.

SHOA (שׁוֹא; B Σοῦέ, A Σοῦδ; *tyranni*).—Apparently a race-name. It is mentioned in connexion with the Babylonians, Chaldeans, PEKOD, KOA, and all the Assyrians (Ezk 23²³), whose relations with Jerusalem had been intimate, and who were to come up and sit in judgment upon her. According to Schrader (*KAT*² p. 425), Shoa is the Assyrian *Sutū*, the name of a people who are constantly associated in the inscriptions with the *Kutū*. The land of *Sutū* is identified by Delitzsch (*Par.* p. 233, etc.) with the district that extends eastward from the Tigris to the southern declivities of the Medo-Elamite mountains.

C. W. WILSON.

SHOBAB (שׁוֹבָב; 1. One of David's sons, 2 S 5¹⁴ (B Σωβάβ, A Σωβάδν, Luc. 'Ισοεβάν), 1 Ch 3⁸ (B Σωβάν, A Luc. Σωβάδ), 14¹ (B 'Ισοβόδμ [i.e. 'and Shobam' ?], A Σωβάβ, Luc. Σωβάβ). 2. A Calebite, 1 Ch 2¹⁸ (B 'Ιασούβ, A Σωβάβ, Luc. Σωβάβ).

SHOBACH (שׁוֹבָח; B Σωβάκ, A Σαβάκ; *Sobach*).—A general in the army of Hadadezer, king of Syria, at the time of the war with Ammon (2 S 10¹⁶). He is not mentioned as taking part in the battle near Rabbah, where Joab and Abishai routed the combined forces of Ammon and Syria, and we may infer that he did not become 'captain of the host of Hadadezer' until after that event. The victory of Joab does not seem to have been followed up (see RABBAH), and before long the Syrians again prepared to attack the newly-founded kingdom of Israel. For this purpose Hadadezer gathered all the forces at his command, even the distant tribes from 'beyond the river': the latter were led by Shobach, who was apparently placed in command of the whole Syrian army. In the engagement that ensued at Helam on the east of Jordan, David commanded the Israelite army in person, and utterly defeated the Syrians. Shobach was mortally wounded in the battle, and his fall doubtless contributed to the rout of the Syrians (2 S 10¹⁵⁻¹⁸). In the parallel narrative (1 Ch 19^{16, 18}) his name is given as *Shophach* (שׁוֹפָח; B Σωφάκ and Σαφάθ, A Σωφάχ and Σωβάχ, & 'Εσωφάκ, & 'Εσωφάχ). J. F. STENNING.

SHOBAI (שׁוֹבַי; 1. A family of gatekeepers, Ezr 2⁴³ (B 'Απαύ, A Luc. Σωβαί)=Neh 7⁴⁰ (B Σαβέλ, A Σαβαί, Luc. Σωβαί).

SHOBAL (שׁוֹבָל).—1. A 'son' of Seir the Horite, and one of the 'dukes' of the Horites, Gn 36^{20, 22, 29} (Σωβάλ)=1 Ch 1^{38, 40} (BA Σωβάλ, Luc. Σουβάλ). 2. A Calebite family in the tribe of Judah. This Shobal is called in 1 Ch 4^{1, 3} (BA Σουβάλ, Luc. Σωβάλ) a 'son' of Judah, and in 2²⁰ (B Σωβάρ, A Σωβάλ, Luc. Σωβάρ)²² (BA Σωβάλ, Luc. Σωβάρ) 'son' of Caleb and 'father' of Kiriath-jearim. The name is probably to be connected, if not identified, with No. 1; see Wellh. *de Gentibus*, etc. 39.

SHOBEK (שׁוֹבֵק; BA Σωβήκ, Luc. Σωβελρ).—One of the chiefs of the people who sealed the covenant, Neh 10²⁴ (25).

SHOBI (שׁוֹבִי; Ousebel; Sobi).—From 2 S 17²⁷ we learn that Shobi the son of Nahash of Rabbah of the children of Ammon, together with two other influential and wealthy landowners of the trans-Jordanic country, came to meet David, when he fled from Absalom, at Mahanaim, bringing with them large quantities of stores and provisions for the Israelite army. It seems, however, very doubtful whether such a person as Shobi ever existed. His name is not mentioned elsewhere, and it is difficult to reconcile this action on the part of a son of Nahash with the insults offered by Hanun the son of Nahash, king of Ammon, to David's ambassadors (2 S 10¹⁴), and with the subsequent war between Israel and Ammon, which resulted in the siege and capture of Rabbah. S. A. Cook (*AJSJL* xviii. 3, p. 155 f.) suggests very plausibly that we should read 'Nahash, etc., brought' (שׁוֹבִי; שׁוֹבִי), in place of 'Shobi the son of Nahash,' etc. (שׁוֹבִי בֶן נָחָשׁ). This emendation restores a natural construction to the verse at the expense of the words 'Shobi son of': in its present form the construction is involved and unusual (see Driver, *ad loc.*). If, however, Cook's emendation is accepted, it is difficult to resist his further contention that the section dealing with the Ammonite war (2 S 10¹–11¹ 12^{28–31}) has been misplaced, and that it should follow and not precede chs. 13–20.

J. F. STENNING.

SHOE (חֵף; na'al, σαράδιον, ὑπόδημα).—The na'al of the modern Arabic shoe means the sole, thus indicating the sandal character of the ancient Heb. na'al, usually tr. 'shoe.' Similarly, the Gr. term ὑπόδημα means something tied on or under the foot, that is, a sandal. Sandals must have varied in material and appearance according to the station and occupation of the wearer, those of shepherds being strongly made as a protection against thorns and rocks, while those worn by women of rank would be of a lighter and more ornamental pattern (Ca 7¹). Cf. art. DRESS, vol. i. p. 627. The shoes of the present day in Syria exhibit various transition forms, from the single strap of leather or embroidered cloth over the toes, and the leather sheath for the front of the foot, to the complete upper in different colours of leather, and covering the whole foot. Sandals of the original form are still worn by Bedawin and monks. Peasants when on a journey prefer to press down the leather at the heel-end of the shoe, and thus make them more loose and open, like the sandals of primitive times. In this way also the dust of the road can from time to time be shaken out without the trouble of removing the shoe. The act of repudiation mentioned in Mt 10¹⁴, Mk 6¹¹, Lk 9¹⁰ 11¹, Ac 13³¹, meant, along with the implied release from all moral responsibility, that the connexion thus dissolved was one of defilement and worthlessness.

1. *Putting on and removal of shoes.*—From the Oriental habit of sitting and moving about in the house with the feet uncovered, the possession of

shoes became one of the essential requirements for a journey, and the wearing of them one of the symbols of travel (Ex 12¹¹). The Gibeonites drew attention to their feet bandaged with rags in order to keep their out-worn sandals together and protect their feet (Jos 9¹³). A similar appearance is presented by Turkish troops at the present day when returning from a punitive expedition against the Arabs of the desert. In the parable of the Prodigal Son the absence of shoes is noted (Lk 15²²). In the apostolic injunction to have the feet 'shod with the preparation of the gospel of peace' (Eph 6¹⁵), the symbol of travel is introduced among the leading truths of the Christian life, making progress one of the permanent features of the Christian Church.

As Oriental peasant life has always been in villages and not in solitary houses, the shoes were constantly covered with dust and defiled with mud and refuse, and consequently were left at the door of the house. This custom, beginning with ordinary comfort and cleanliness, received a new emphasis when the entrance was into a house of prayer and into the presence of One who required cleanliness of heart. Hence the removal of the shoes on holy ground (Ex 3⁵, Jos 5¹⁵, Is 20⁵, Ac 7³³). The custom is still observed in Oriental churches and mosques. It was the inevitable result of such connexions that any reference to the shoe and the thong or latchet that passed through the sandal loops was one of implied inferiority and contempt (Mk 1⁷, Jn 1²⁷, Ac 13³³). 'You are my shoe!' 'You are under my shoe!' are exclamations of abuse often heard in the streets of Oriental villages and towns.
